

ENGLISH FOR WORK / SEPTEMBER 2026

Automotive Service English

Conversation lab

8 complete workplace dialogues, followed by eight additional role-play cases. Study the exchanges, then make the conversation your own.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Study complete conversations. Find the right language, speak, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For Service reception staff, service advisors, automotive technicians, parts-counter staff, and workshop assistants.

All vehicles, people, prices, incidents, findings, and shop arrangements are fictional English practice, not automotive diagnosis, repair instruction, driving advice, legal advice, or financial guidance. No script establishes vehicle safety or universal rights, charges, warranty terms, or authorization rules. Refer technical assessments, safe-use questions, hazardous conditions, pricing decisions, warranty coverage, and release requirements to the responsible qualified people and applicable local arrangements.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Inside this conversation lab

Original fictional training conversations in professional English. These are realistic scripts, not transcripts of actual people. The professional roles are the speaker labels; all figures, incidents, and organizations are invented.

01 A concern disappears from a shortened note

02 A key drop is not completed intake

03 An unanswered call is not an approval

04 An old finding in a new job-card view

05 A supplier offers an alternative part

06 A brake report uses two names for one component

07 The final bill differs from the estimate

08 A different concern after a previous visit

Then try eight independent role-play cases, followed by feedback criteria and references.

Read it. Hear it. Make it yours.

1. Read the setting. Identify the roles, the immediate problem, and what each speaker needs.
2. Read the whole conversation aloud with a partner. In a group, give a third person the observer role. For three-speaker scripts, assign each professional a separate voice.
3. Notice how the speakers ask a specific question, qualify a claim, disagree, explain a technical point, or agree on a next step. Underline language you would actually use.
4. Cover the script. Recreate the exchange using the situation and professional roles. Keep the meaning, but change the wording.
5. Switch roles and introduce a complication: a missing record, a different priority, an unavailable colleague, or a changed assumption. End with a clear outcome or unresolved question.

Register and terminology

These colleagues use concise professional language. In an internal technical meeting, familiar abbreviations can be natural. With a new colleague or a client, expand unfamiliar terms and check understanding. Keep disagreement directed at the evidence or proposal, and match the degree of certainty to what is known.

Independent study

Speak each role aloud. Pause before the reply and supply your own response before revealing the next line. Record a second version using invented details, then compare its clarity and tone with the script.

Professional context

All vehicles, people, prices, incidents, findings, and shop arrangements are fictional English practice, not automotive diagnosis, repair instruction, driving advice, legal advice, or financial guidance. No script establishes vehicle safety or universal rights, charges, warranty terms, or authorization rules. Refer technical assessments, safe-use questions, hazardous conditions, pricing decisions, warranty coverage, and release requirements to the responsible qualified people and applicable local arrangements.

FULL DIALOGUE 01 / 12 SPEAKING TURNS

A concern disappears from a shortened note

An advisor and customer clarify a booking summary before assessment.

Roles: Advisor / Customer

Advisor: The summary says rear noise, but your message listed two concerns. What was omitted?

Customer: The rattle is one concern. The other is that the cabin display sometimes loses its saved settings.

Advisor: Thank you. We should keep them separate rather than assume the sound and display issue share a cause.

Customer: Exactly. They didn't necessarily occur together, and I don't know whether they are connected at all.

Advisor: I'll add the second reported concern without presenting a connection as a technician's finding or agreed diagnosis.

Customer: Does adding my description automatically approve assessment of both concerns under today's existing booking and price?

Advisor: No. The advisor needs to clarify the actual assessment scope and terms before either additional task is assumed.

Customer: Then please preserve both reports, but ask about scope separately so I understand what today's booking covers.

Advisor: I'll distinguish the newly clarified display concern from the originally booked rattle assessment.

Customer: Also keep both attached to this vehicle. The other car on my account doesn't have these reported concerns.

Advisor: We'll check the vehicle identification number against the booking record and retain that identity throughout the handoff.

Customer: That resolves the missing information without turning two descriptions into one diagnosis or a broader approval.

Notice the professional language

vehicle identification number - The vehicle's unique identifying code, commonly shortened to VIN.

FULL DIALOGUE 02 / 12 SPEAKING TURNS

A key drop is not completed intake

A receptionist and customer clarify an after-hours arrival record.

Roles: Customer / Receptionist

Customer: I used the arranged key-drop service last night. Is intake complete?

Receptionist: The key-drop record confirms the deposit was received, but the service desk still needs to complete intake checks.

Customer: I included my booking reference. I didn't intend the key deposit to authorize any extra work.

Receptionist: I'll keep that clear. The desk will confirm the vehicle, reported concern, and agreed scope against your booking.

Customer: Please contact me at the daytime number, because the number on the envelope is my evening contact.

Receptionist: Let's verify the preferred number through our contact check so today's updates reach the right place.

Customer: Can you promise the technician has started already, since the car was here before opening this morning?

Receptionist: No start is confirmed. Arrival at the property and the beginning of technical work are separate events.

Customer: Then I need a status update rather than an assumption that being first here guarantees first completion.

Receptionist: The service desk can confirm a callback arrangement when intake is complete and scheduling has been checked.

Customer: Please relay my timing question without treating it as a cancellation request.

Receptionist: I'll pass on your contact preference and timing question while preserving the existing booking and scope.

Notice the professional language

contact preference - The customer's stated channel and availability for service communications.

FULL DIALOGUE 03 / 12 SPEAKING TURNS

An unanswered call is not an approval

An advisor and workshop coordinator review a pending additional-work proposal.

Roles: Advisor / Coordinator

Advisor: I left a message about additional work; the customer hasn't responded.

Coordinator: The job card says contacted. That could be misread as an actual conversation with a clear decision.

Advisor: Then I should narrow it to message left, response pending, rather than imply the proposal was discussed.

Coordinator: Yes. What work remains within the existing authorization, and what new item is awaiting a separate decision?

Advisor: The original assessment is authorized. The additional proposal is outside that scope and remains unapproved.

Coordinator: I'll keep those statuses separate in the workshop handoff instead of treating the whole job as approved.

Advisor: The customer's contact preference is a phone call after two. My earlier message was only a callback request.

Coordinator: Then after two is a contact window, not a deadline after which silence becomes permission to proceed.

Advisor: Exactly. I won't attach consent to the fact that the message was delivered or the call rang.

Coordinator: Please tell the next advisor which proposal requires discussion, using the actual estimate version and job reference.

Advisor: I'll identify the proposal and preserve the original authorization without expanding it.

Coordinator: That gives the next person a precise task: obtain a response about the new scope and record the decision.

Notice the professional language

contact preference - The customer's stated channel and availability for service communications.

callback request - A request for a service-team member to contact the customer again.

additional work - Work beyond the currently agreed scope that requires its own clarification and approval.

FULL DIALOGUE 04 / 12 SPEAKING TURNS

An old finding in a new job-card view

An advisor and technician separate historical information from current work.

Roles: Technician / Advisor

Technician: This inspection finding appears to date from the previous service visit.

Advisor: You're right. The system displays historical notes beside today's job, and the date can be easy to miss.

Technician: Before I rely on it, which statements are current customer reports and which are previous technician findings?

Advisor: Today's report is an intermittent cabin buzz. The older entry describes a separate display concern assessed last year.

Technician: Then the old finding should remain available as history, not appear to establish the cause of today's buzz.

Advisor: I'll clarify the handoff with dates and source labels so the two visits don't merge in the summary.

Technician: Does today's authorization include any follow-up on the old display concern, or only the newly booked assessment?

Advisor: Only today's stated assessment scope. No additional work on the historical concern has been agreed for this visit.

Technician: Please explain why historical information remains visible without extending today's agreed scope.

Advisor: I'll explain that visibility provides context; it doesn't make the old task part of today's approved work.

Technician: I'll record findings against today's job, leaving the historical result identifiable.

Advisor: That will keep the service history useful while making the current report, scope, and findings identifiable.

Notice the professional language

inspection finding - An observation or assessment recorded during the vehicle's technical review.

additional work - Work beyond the currently agreed scope that requires its own clarification and approval.

service history - The available record of previous maintenance and repair work for a vehicle.

Rehearse this dialogue with an AI partner

FULL DIALOGUE 05 / 12 SPEAKING TURNS

A supplier offers an alternative part

An advisor and parts clerk clarify an offer while the requested item is unavailable.

Roles: Parts clerk / Advisor

Parts clerk: The requested battery terminal is unavailable; the offered alternative's suitability remains unconfirmed.

Advisor: Then I shouldn't tell the customer the delay is solved or describe the alternative as approved for this vehicle.

Parts clerk: Correct. The qualified workshop team needs to review suitability, and any changed proposal needs the appropriate customer discussion.

Advisor: Does the offer include a confirmed delivery date, or only the supplier's statement that the alternative is available?

Parts clerk: Only availability at the supplier. No shipment or arrival date is confirmed for our job at this point.

Advisor: I'll keep those stages separate: alternative offered, suitability pending, delivery unconfirmed, and vehicle completion still not established.

Parts clerk: Please describe it to the customer as an option under review, not a promise of faster completion.

Advisor: I will. The customer can understand an option is being reviewed without hearing an unsupported promise of faster completion.

Parts clerk: The supplier wants a response today; that doesn't establish suitability or acceptance.

Advisor: I'll pass the response deadline to the service team as a constraint, not as permission to skip the review.

Parts clerk: Please return the actual decision so our parts record reflects it.

Advisor: I'll return that decision once the relevant reviews and customer communication have reached their actual outcomes.

Notice the professional language

battery terminal - A battery's electrical connection point linking it with the vehicle's electrical circuit.

Rehearse this dialogue with an AI partner

FULL DIALOGUE 06 / 12 SPEAKING TURNS

A brake report uses two names for one component

An advisor asks a technician to clarify recorded brake and tire findings for the customer.

Roles: Advisor / Technician

Advisor: The customer thinks rotor means a different system from the brake-disc description.

Technician: In this note, rotor means brake disc. Please explain that naming equivalence without adding an unsupported condition judgment.

Advisor: So brake pad and brake disc differ, but rotor means brake disc here.

Technician: Correct. My note records observed brake-pad wear; it doesn't say replacement has already been approved or completed.

Advisor: The tire section also records tread depth. Should I turn that number into a roadworthiness statement for the customer?

Technician: No. I need to explain the measurement and its significance. Reception shouldn't infer a safety conclusion from an isolated value.

Advisor: I'll relay your stated observations and ask you to explain what remains uncertain and what you recommend next.

Technician: Please keep recommendations separate from approval. The customer needs the proposed scope and terms before making any decision.

Advisor: They also ask whether this report guarantees nothing else needs attention.

Technician: No. That assurance would go beyond this assessment's scope. I'll explain which findings the report covers and what remains unconfirmed.

Advisor: I'll clarify the terms and arrange your explanation of findings and proposed options.

Technician: That preserves the report's meaning while leaving diagnosis, safety interpretation, and work decisions with the appropriate people.

Notice the professional language

tread depth - The measured depth of the grooves in a tire's tread; interpretation depends on the applicable technical and local requirements.

brake disc - The rotating disc, also called a rotor, against which brake pads act in a disc-brake system.

brake pad - The friction-material component that presses against a brake disc in a disc-brake assembly; condition assessment belongs to a qualified technician.

Rehearse this dialogue with an AI partner

FULL DIALOGUE 07 / 12 SPEAKING TURNS

The final bill differs from the estimate

An advisor and customer compare two amounts without guessing the reason.

Roles: Customer / Advisor

Customer: The approved estimate totals three hundred, but this invoice says three twenty. Why?

Advisor: I can see the difference, but I shouldn't guess its reason. Let's compare the actual lines and approval record.

Customer: Please don't tell me it must be tax or a standard fee unless that is what this record shows.

Advisor: Agreed. A common explanation isn't evidence for your invoice. I'll ask the billing contact to identify the changed line.

Customer: I still want to understand the completed work, but the charge question needs a separate, accurate answer.

Advisor: I'll keep both questions visible: what the job record says was performed, and why the invoice amount differs.

Customer: Does requesting that explanation mean you will mark me as refusing all payment or disputing every listed item?

Advisor: No. I'll record your specific twenty-dollar query rather than broaden it beyond what you've actually asked.

Customer: Please compare the approved estimate's date and version, not an earlier proposal.

Advisor: I'll provide the date and reference alongside this invoice, leaving the reason for the difference unconfirmed until checked.

Customer: Arrange that explanation before anyone marks my specific charge query resolved.

Advisor: I will. The record will show a focused billing query awaiting clarification, not an invented justification or outcome.

Notice the professional language

Do not turn a common billing explanation into an unverified fact.

Keep a specific amount query narrower than a dispute over every charge.

Rehearse this dialogue with an AI partner

FULL DIALOGUE 08 / 12 SPEAKING TURNS

A different concern after a previous visit

An advisor and customer clarify whether a new call concerns the same symptom.

Roles: Customer / Advisor

Customer: I visited last week and now have another concern. Should they share a case?

Advisor: We can link the history, but could you describe what you've noticed so we don't assume the concerns are identical?

Customer: Last week's visit concerned a display setting. This time I hear a sound near the rear of the cabin.

Advisor: Thank you. I'll record a newly reported sound and link the earlier visit as history, without asserting a connection.

Customer: I'd like the service lead to review whether the two might be related, rather than reception deciding either way.

Advisor: I can relay that question. The relationship, cause, and any applicable coverage remain unconfirmed until the appropriate review.

Customer: Does linking the records automatically confirm warranty coverage or waive assessment charges?

Advisor: No. Any proposed appointment, scope, and terms need their own explanation; the reference link alone doesn't decide those matters.

Customer: Then please arrange a callback before any new job is authorized.

Advisor: I'll ask the service lead to confirm a callback time and use the linked references for context.

Customer: Keep the display concern and new sound separate in the handoff.

Advisor: I will. The handoff will show the prior display concern and the new sound report as distinct accounts.

Notice the professional language

Linking records provides context without proving a relationship.

A case reference does not itself decide warranty coverage or charges.

Rehearse this dialogue with an AI partner

Eight more situations to make your own

The following cases are open role plays. They give you facts, contrasting roles, useful expressions, and a short model response. Use what you learned from the complete dialogues to create a longer exchange.

Preparation: two minutes. Conversation: three to five minutes. Feedback: one minute. Switch roles and repeat with the second-round challenge.

ROLE-PLAY CASE 01

Capturing the customer's concern

SHARED CASE

Customer reports an occasional rattle from the rear after the car has been parked overnight. They do not know its cause. Two household cars are on the account; today's booking is the blue hatchback. No technician assessment has occurred.

Role A | Responding professional

Clarify vehicle identity and reported circumstances. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Customer: the blue hatchback rattles on some mornings after overnight parking; you cannot identify a component.

Useful expressions

Which vehicle does this concern relate to?

You notice ___ when ___; is that accurate?

I'll record ___ as reported, with the cause unconfirmed.

Cover this until after your first attempt

Let me confirm that this concern is for the blue hatchback, not the other car on your account. You hear an occasional rear rattle after the car has been parked overnight. Have I captured that accurately? I'll record your description for the technician without naming a faulty component before an assessment.

Second round

Customer suggests a component name from an online video. Record it as their suggestion, not a diagnosis.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 02

Clarifying the appointment and drop-off

SHARED CASE

Customer booked an 08:00 drop-off but expects work to begin at 08:00 and finish by 09:00. The booking confirms intake only. Advisor can offer a status update by 10:00, not a finish guarantee; customer prefers a phone call.

Role A | Responding professional

Correct a booking assumption before the customer relies on it. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Customer: you need a realistic update and prefer a phone call; nine was your assumption.

Useful expressions

___ is the drop-off time, not ___.

We can update you by ___ about ___.

Would you prefer contact by ___?

Cover this until after your first attempt

Eight o'clock is your drop-off appointment for intake; it isn't a confirmed technician start or finish time. I understand you were expecting the car back by nine. We can give you a phone update by ten about the assessment status. Before you decide about the visit, let's make that difference in timing clear.

Second round

Customer asks whether a waiting appointment would guarantee a one-hour visit. Do not infer an unconfirmed finish time.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 03

Explaining estimates and approval limits

SHARED CASE

Fictional shop offers assessment for \$95 under its stated booking terms. No repair is included. Customer says 'go ahead' but intends only the assessment. Advisor must read back the scope and route any later repair proposal for separate approval.

Role A | Responding professional

Check what 'go ahead' actually authorizes. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Customer: approve only the \$95 assessment; ask for a separate repair explanation before deciding.

Useful expressions

Your approval covers ___ for ___, correct?

That does not include ___.

Any proposed additional work needs ___.

Cover this until after your first attempt

To confirm, your approval is for the ninety-five-dollar assessment described in this booking, not for a repair or additional work. If the technician recommends something beyond that scope, we'll explain the proposal and seek a separate decision under the shop's terms. Is that the authorization you intend to give?

Second round

Customer sets a contact preference but does not approve repairs. Keep contact permission separate from work authorization.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 04

Handing the concern to the technician

SHARED CASE

Job card 208 concerns a customer-reported intermittent cabin rattle after overnight parking. Customer approved assessment only, is unavailable from 12:00 to 14:00, and prefers a phone call after 14:00. Technician has not reproduced the concern. Advisor hands over these facts without a diagnosis.

Role A | Responding professional

Give a technician a usable handoff without inserting a diagnosis. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Technician: repeat assessment-only scope and the customer's contact window.

Useful expressions

The customer reports ___ under ___.

The approved scope is ___.

Their contact restriction is ___; findings are ___.

Cover this until after your first attempt

Job card 208 is assessment only. The customer reports an intermittent cabin rattle after overnight parking; no technician finding is recorded yet. They are unavailable from noon to two and prefer a call afterward. Please keep their report separate from your findings and return any proposed additional work to the service desk for discussion.

Second round

A previous job card lists a different concern. Keep that history distinct from the current customer report.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 05

Explaining parts and completion delays

SHARED CASE

Part for job 315 is on back order. Supplier estimates Tuesday arrival; shipment is not confirmed. Customer wants Tuesday pickup. Technician scheduling and completion remain unconfirmed. Parts clerk promises a supply-status update Monday afternoon.

Role A | Responding professional

Give parts status without turning a supplier estimate into a collection promise. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Customer: Tuesday pickup matters, but you need an honest update about the supply dependency.

Useful expressions

The part is ____; the supplier estimates ____.

That date refers to ____, not ____.

Our next status update is ____.

Cover this until after your first attempt

The part for job 315 is on back order. Tuesday is the supplier's estimated delivery date, not a confirmed arrival or vehicle collection time. The parts desk will update us Monday afternoon. Once supply is confirmed, the service team can review the completion estimate; I can't promise Tuesday pickup on the information we have.

Second round

A tracking label is created without confirmed carrier possession. Avoid reporting actual shipment from label creation alone.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 06

Relaying findings and technical terms

SHARED CASE

A technician's assessment note records a diagnostic trouble code, or DTC, but no confirmed cause or component fault. Customer assumes it proves a sensor needs replacement. Advisor must relay the limited finding and request a technician explanation; no replacement is approved.

Role A | Responding professional

Explain technical terms and the limits of a technician's stated findings. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Customer: the report mentions a stored code; ask whether that proves a sensor failure and what remains unconfirmed.

Useful expressions

The technician recorded ___, but has not confirmed ___.

In this note, ___ refers to ___.

Please ask the technician to explain the significance before ___.

Cover this until after your first attempt

The technician recorded a diagnostic trouble code, but the note does not confirm a failed sensor or a required replacement. A stored code is information for assessment, not a component diagnosis by itself. I'll ask the technician to explain this finding and any proposed next step before you consider additional work.

Second round

The customer sees rotor on the report and brake disc in a message. Explain the naming equivalence without claiming its condition or approving replacement.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 07

Clarifying the invoice and collection handoff

SHARED CASE

Fictional invoice totals \$180: \$70 parts and \$110 labor. Customer thinks labor includes another \$70 part charge. Vehicle readiness has not yet been confirmed by the service desk; invoice creation alone is not collection confirmation.

Role A | Responding professional

Clarify charge categories and separate billing from vehicle release. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Customer: you misread parts and labor; ask whether you may collect immediately.

Useful expressions

The invoice separates ___ from ___.

These listed amounts total ___.

Collection readiness still needs ___.

Cover this until after your first attempt

This invoice separates seventy dollars for parts from one hundred ten dollars for labor, giving a total of one hundred eighty dollars. The labor line is not another seventy-dollar parts charge. I can clarify those categories now, but the invoice's availability doesn't itself confirm collection readiness; the service desk still needs to confirm that status.

Second round

A friend offers to collect. Do not infer permission from possession of an invoice; refer to the shop's collection requirements.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 08

Handling a repeat concern and follow-up

SHARED CASE

Customer calls two days after service, reporting the same intermittent rattle. Advisor initially said 'that cannot be the same issue.' Cause and warranty coverage are unknown. Service lead Nia can call at 15:00 to review the report and next arrangements.

Role A | Responding professional

Acknowledge the customer's report and repair an unsupported claim. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Customer: the rattle recurred; ask to be heard and linked to the previous visit.

Useful expressions

I spoke too definitively when I said ____.

You report ____ again; we need to review ____.

____ will call at ____ to discuss ____.

Cover this until after your first attempt

I spoke too definitively when I said it couldn't be the same issue. You've reported the rattle again, and we need to review that account alongside the earlier repair order. Nia can call at three to discuss the next arrangements. I can't yet identify the cause or confirm whether any warranty terms apply.

Second round

Customer demands a no-cost outcome before review. Acknowledge the concern and refer the charge or coverage decision without a promise.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

Lesson conversations and speaking practice

The following sections match 05 and 06 on the industry webpage and in the learner workbook. Each lesson has three ten-turn conversations and two bounded speaking scenarios. These are original fictional teaching scripts, not transcripts of real people.

LESSON 01 / 05 • CONVERSATIONS / 1 OF 3

Two cars, one reported rattle

At reception, an advisor clarifies the customer's vehicle and concern.

01 • Advisor: Which car is today's concern about, the blue hatchback or your white sedan?

02 • Customer: The blue hatchback. I sometimes hear a rattle from the rear after overnight parking.

03 • Advisor: Does it happen every morning, or only occasionally when you first notice it?

04 • Customer: Only occasionally. I can't identify a component, and I haven't noticed a consistent pattern.

05 • Advisor: I'll record an intermittent concern, with your rear-rattle description and the overnight-parking detail.

06 • Customer: Please don't call it a suspension fault. That was just someone's suggestion online.

07 • Advisor: I won't. We need the technician's assessment before naming a cause on the repair order.

08 • Customer: Can you make sure the account's other car doesn't inherit this concern too?

09 • Advisor: Yes. We'll verify the vehicle identification number against this booking and vehicle record.

10 • Customer: Thank you. That keeps my symptom description attached to the car actually being assessed.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 01 / 05 • CONVERSATIONS / 2 OF 3

The sound word needs clarification

An advisor asks a customer to clarify an informal noise description.

01 • Customer: I wrote clicking on the booking, but rattling might describe the sound better.

02 • Advisor: Could you describe what you noticed without worrying about choosing a technical word?

03 • Customer: It was several quick little sounds, not one loud impact, near the passenger side.

04 • Advisor: I'll preserve that description rather than translate it into a component diagnosis.

05 • Customer: Please say it was my impression of the location, not something I verified.

06 • Advisor: Certainly. I'll mark passenger side as reported, with the exact source unconfirmed.

07 • Customer: Does changing my word from clicking to rattling mean the booking needs canceling?

08 • Advisor: No. We can clarify the concern on the existing repair order for this vehicle.

09 • Customer: Then include both my earlier wording and the clearer description we're discussing now.

10 • Advisor: I will. The technician can see how your description was clarified at intake.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 01 / 05 • CONVERSATIONS / 3 OF 3

Yesterday is not every day

An advisor checks the timing of a customer's concern.

01 • Advisor: The booking says the display goes blank daily. Is that frequency accurate?

02 • Customer: No. It happened yesterday once; I don't know why I selected daily online.

03 • Advisor: Thanks for correcting it. Had you noticed the same display issue before yesterday?

04 • Customer: Not that I remember. I don't want to claim it has never happened.

05 • Advisor: I'll record one episode reported yesterday, with no earlier episode recalled by you.

06 • Customer: That sounds right. Can the technician see that I corrected the original frequency?

07 • Advisor: Yes. I'll clarify the intake record so daily isn't treated as confirmed history.

08 • Customer: Please also distinguish the display from the whole electrical system. I can't assess that.

09 • Advisor: Agreed. Your report concerns the display only, and the cause remains unconfirmed.

10 • Customer: Then the symptom description now reflects what I actually observed rather than assumptions.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 01 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Capturing the customer's concern

Customer reports an occasional rattle from the rear after the car has been parked overnight. They do not know its cause. Two household cars are on the account; today's booking is the blue hatchback. No technician assessment has occurred.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Customer: the blue hatchback rattles on some mornings after overnight parking; you cannot identify a component.

Second round: Customer suggests a component name from an online video. Record it as their suggestion, not a diagnosis.

Scenario 2 | A relative's report

Customer booked a visit for a concern their partner noticed once on Monday. Customer has not experienced it personally; partner can provide details after 16:00.

Role A: Advisor: attribute the report and confirm who can clarify it.

Role B: Customer: distinguish your knowledge from your partner's experience.

Possible opening: Did you notice this yourself, or are you relaying your partner's account?

Success checks

- Attribute the Monday report.
- Avoid inventing frequency.
- Identify the partner's available contact time.

Add a complication: Customer asks you to record it as happening every trip.

LESSON 02 / 05 • CONVERSATIONS / 1 OF 3

Eight is the drop-off time

An advisor clarifies an 08:00 booking before the customer leaves.

01 • Customer: My appointment is eight, so I expected the car finished by nine today.

02 • Advisor: Eight is your drop-off intake, not a confirmed technician start or completion time.

03 • Customer: I misunderstood. I booked a ride based on having the car back within an hour.

04 • Advisor: I'm sorry the timing wasn't clear. We can provide a phone update by ten.

05 • Customer: Will that call tell me the assessment status, or guarantee the work is finished?

06 • Advisor: It will give the actual status. It isn't a promise of completion by ten.

07 • Customer: Please call rather than text. I can answer at the number on my booking.

08 • Advisor: I've confirmed that contact preference. Is the revised timing clear before you decide?

09 • Customer: Yes. I understand the drop-off appointment and the callback, but no finish time is guaranteed.

10 • Advisor: That's the arrangement. We'll keep any later completion estimate separate from the intake time.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 02 / 05 • CONVERSATIONS / 2 OF 3

Waiting does not settle the finish time

A customer asks reception about remaining at the shop.

01 • Customer: I selected a waiting appointment. Does that mean you'll finish before my eleven-o'clock meeting?

02 • Receptionist: The booking records your plan to wait, but no eleven-o'clock completion is confirmed.

03 • Customer: I need to know that now rather than discover it after the intake check.

04 • Receptionist: Of course. I can ask the service advisor to review timing before you proceed.

05 • Customer: Please tell them the meeting is fixed, but I can choose another appointment.

06 • Receptionist: I'll give them that constraint and request available alternatives, not cancel this booking automatically.

07 • Customer: Could the advisor explain whether leaving the vehicle would change the timing estimate?

08 • Receptionist: Yes. That is a scheduling question for them; I can't guarantee a faster result.

09 • Customer: Then I'll wait for that explanation before deciding whether to keep today's appointment.

10 • Receptionist: I'll connect you now, with the current booking and your meeting time clearly stated.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 02 / 05 • CONVERSATIONS / 3 OF 3

A text cannot reach the customer

An advisor verifies a callback arrangement at drop-off.

01 • Advisor: Your booking lists text messages as the preferred contact method for today's updates.

02 • Customer: That number belongs to an old phone. Please use a call to my current number.

03 • Advisor: Let's confirm the current number through our booking check before changing the contact record.

04 • Customer: Certainly. I also can't answer between one and two because I'm presenting at work.

05 • Advisor: I'll record that availability limit alongside your preference for a phone call today.

06 • Customer: Does giving a new number authorize additional work if someone reaches me there?

07 • Advisor: No. Contact details only arrange communication; any work decision needs its own clear confirmation.

08 • Customer: Thank you. Please make that distinction if another advisor takes over this afternoon.

09 • Advisor: I'll include the verified number, call preference, and unavailable period in the handoff.

10 • Customer: Then the next advisor can reach me without assuming my contact update approves repairs.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 02 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Clarifying the appointment and drop-off

Customer booked an 08:00 drop-off but expects work to begin at 08:00 and finish by 09:00. The booking confirms intake only. Advisor can offer a status update by 10:00, not a finish guarantee; customer prefers a phone call.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Customer: you need a realistic update and prefer a phone call; nine was your assumption.

Second round: Customer asks whether a waiting appointment would guarantee a one-hour visit. Do not infer an unconfirmed finish time.

Scenario 2 | A revised drop-off message

Original booking: 09:00. A reminder says 09:30; office record has not been checked. Customer asks whether the later time replaces the earlier one.

Role A: Receptionist: compare message dates and request booking confirmation.

Role B: Customer: provide both messages; don't cancel either time yourself.

Possible opening: Which message is the current booking confirmation?

Success checks

- Identify the two times.
- Ask the booking desk to resolve them.
- Do not invent a technician start or finish time.

Add a complication: Customer treats the most recent automated message as guaranteed correct.

LESSON 03 / 05 • CONVERSATIONS / 1 OF 3

Ninety-five dollars for assessment only

An advisor reads back a fictional shop's assessment terms.

01 • Customer: Ninety-five dollars is fine. Go ahead with the assessment, but not a repair.

02 • Advisor: To confirm, your approval covers the stated ninety-five-dollar assessment only under this booking.

03 • Customer: Yes. I want to hear any findings and proposed repair price before deciding.

04 • Advisor: I'll preserve that authorization limit. Additional work would need a separate discussion and decision.

05 • Customer: Does saying go ahead mean the technician can add other work up to that amount?

06 • Advisor: No. Your approval names the assessment scope, not any task costing less than ninety-five.

07 • Customer: Thank you. Please explain that distinction on the repair order for the technician.

08 • Advisor: I will. The diagnostic charge and any later repair proposal will remain separate.

09 • Customer: And the amount you stated applies to this particular assessment, not every service visit?

10 • Advisor: Correct. These are this booking's stated terms; other service scopes have their own terms.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 03 / 05 • CONVERSATIONS / 2 OF 3

Approval for one proposed item

A customer clarifies a decision after receiving two service proposals.

01 • Advisor: The technician's report includes two proposals, listed separately as item A and item B.

02 • Customer: I approve item A under the quoted terms, but I haven't decided about B.

03 • Advisor: Then I'll record approval for A only, with B awaiting your separate decision.

04 • Customer: Please don't mark the whole estimate approved just because I accepted one line.

05 • Advisor: I won't. Each proposal needs to retain its actual approval status on this record.

06 • Customer: Can I ask more questions about B without that being treated as permission?

07 • Advisor: Yes. I'll arrange an explanation; asking about an item isn't approval to proceed.

08 • Customer: That's helpful. My question is what the recommendation means, not when to start it.

09 • Advisor: I'll pass that question to the technician and leave B's authorization status unchanged.

10 • Customer: Then we agree: A approved as quoted, B unapproved while I seek clarification.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 03 / 05 • CONVERSATIONS / 3 OF 3

An estimate revision needs explanation

A customer queries two differently dated estimates.

01 • Customer: I have an earlier estimate for two hundred dollars and a newer one for two forty.

02 • Advisor: The newer document includes a proposed additional line. It doesn't establish that you approved it.

03 • Customer: I approved the earlier scope. Please explain what changed before seeking another decision.

04 • Advisor: I'll compare the two versions and identify that added line for your review.

05 • Customer: Does the revised total automatically replace the authorization limit from our earlier conversation?

06 • Advisor: No. We need to clarify the proposed change and your actual decision under the shop's terms.

07 • Customer: Then don't describe my request for an explanation as refusal of every service item.

08 • Advisor: I won't. Your earlier approval and the new proposal are separate parts of this record.

09 • Customer: Please give me the explanation with both dates so I can follow the comparison.

10 • Advisor: I'll arrange that now and preserve the additional line as pending your decision.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 03 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Explaining estimates and approval limits

Fictional shop offers assessment for \$95 under its stated booking terms. No repair is included. Customer says 'go ahead' but intends only the assessment. Advisor must read back the scope and route any later repair proposal for separate approval.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Customer: approve only the \$95 assessment; ask for a separate repair explanation before deciding.

Second round: Customer sets a contact preference but does not approve repairs. Keep contact permission separate from work authorization.

Scenario 2 | An amount without an agreed task

Customer says 'up to \$200 is okay' while discussing two different assessments. No scope is selected yet.

Role A: Advisor: ask which assessment the customer means.

Role B: Customer: intend the cabin-noise assessment only; exclude the separate display concern.

Possible opening: Which specific assessment does that amount apply to?

Success checks

- Attach amount to a named assessment.
- Exclude the other concern from this approval.
- Read back the scope before recording the decision.

Add a complication: Another staff member interprets the amount as permission for any work.

LESSON 04 / 05 • CONVERSATIONS / 1 OF 3

Job card 208

An advisor hands an assessment-only job to a technician.

01 • Advisor: Job card two oh eight is assessment only for a reported intermittent cabin rattle.

02 • Technician: Has another technician reproduced it, or is the description entirely from the customer?

03 • Advisor: It is customer-reported after overnight parking; no technician finding is recorded yet.

04 • Technician: I'll keep that report distinct from whatever this assessment actually establishes or doesn't establish.

05 • Advisor: The customer is unavailable from noon to two and prefers a call afterward.

06 • Technician: Thanks. Any additional work proposal should go through the service desk for discussion.

07 • Advisor: Correct. Their contact preference doesn't extend the currently agreed scope on this job.

08 • Technician: Does the previous repair order concern the same symptom or a different visit?

09 • Advisor: It concerns a display issue; don't merge that history with today's reported rattle.

10 • Technician: I have the scope, source, and contact window. I'll return findings against this job card.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 04 / 05 • CONVERSATIONS / 2 OF 3

A coolant observation in a carryover job

A technician hands a stated finding to the incoming service advisor without prescribing work.

01 • Technician: This carryover job includes my recorded coolant observation, but no repair is approved.

02 • Advisor: Please distinguish your actual finding from the customer's original report before I call them.

03 • Technician: The customer reported a visible mark. My note records coolant residue at the inspected location.

04 • Advisor: Has that established a particular faulty component, or does the cause remain unconfirmed?

05 • Technician: No component fault is confirmed. Please relay the observation without adding a repair recommendation.

06 • Advisor: I can explain that coolant is fluid used in the vehicle's cooling system.

07 • Technician: Yes, but refer the observation's significance to me; don't advise the customer on handling it.

08 • Advisor: I'll keep the technical explanation separate from any proposed additional work or charge.

09 • Technician: The service desk owns the callback. No completion estimate has been confirmed for this carryover.

10 • Advisor: I'll report the stated finding and ask you to explain the remaining uncertainty directly.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 04 / 05 • CONVERSATIONS / 3 OF 3

The customer's hypothesis was copied as a finding

An advisor corrects a job-card wording error with a technician.

01 • Advisor: The job card says faulty speaker, but that was the customer's suggestion, not a finding.

02 • Technician: Thanks for flagging it. What did the customer actually report experiencing in the vehicle?

03 • Advisor: An occasional buzz near the door. They wondered whether the speaker might be involved.

04 • Technician: Then the symptom description is the buzz; the speaker explanation remains their unverified hypothesis.

05 • Advisor: I'll correct the source wording and retain both pieces without treating the suggestion as established.

06 • Technician: Please notify the service desk too, since they may have seen the stronger wording already.

07 • Advisor: I will. Updating the card doesn't guarantee earlier readers know the claim was corrected.

08 • Technician: Exactly. We need the handoff to distinguish customer-reported condition from technician finding.

09 • Advisor: No assessment result exists yet. I'll make that explicit in the corrected message.

10 • Technician: That gives me an accurate starting point without presupposing a cause for the reported sound.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 04 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Handing the concern to the technician

Job card 208 concerns a customer-reported intermittent cabin rattle after overnight parking. Customer approved assessment only, is unavailable from 12:00 to 14:00, and prefers a phone call after 14:00. Technician has not reproduced the concern. Advisor hands over these facts without a diagnosis.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Technician: repeat assessment-only scope and the customer's contact window.

Second round: A previous job card lists a different concern. Keep that history distinct from the current customer report.

Scenario 2 | A report from another workshop

Customer brings a note from another workshop stating 'review requested.' Reception labels it a confirmed fault. Current technician has not assessed the vehicle.

Role A: Advisor: distinguish the external note from a confirmed finding.

Role B: Technician: ask for the note's exact wording and source.

Possible opening: Does the note report a finding, or request a review?

Success checks

- Preserve exact note meaning.
- Attribute its external source.
- Leave today's findings unconfirmed.

Add a complication: Someone wants to copy the presumed diagnosis into today's job card.

LESSON 05 / 05 • CONVERSATIONS / 1 OF 3

Tuesday is the part estimate

An advisor updates a customer about job 315.

01 • Advisor: The part for job three fifteen is on back order, with Tuesday estimated by the supplier.

02 • Customer: Does that mean I can collect the car Tuesday afternoon once it arrives?

03 • Advisor: No. Tuesday describes estimated parts delivery, not confirmed arrival or completed vehicle work.

04 • Customer: I need transport arrangements, so please don't leave the distinction hidden in the update.

05 • Advisor: The parts desk will give us another supply-status update Monday afternoon, even if availability remains uncertain.

06 • Customer: After that, can the service team review the completion estimate using the confirmed information?

07 • Advisor: Yes. They'll need supply status and workshop scheduling before giving a supported completion estimate.

08 • Customer: Then I should treat Tuesday pickup as unconfirmed rather than reserve a ride around it.

09 • Advisor: Correct. I'll keep the part estimate, next update, and vehicle readiness as separate stages.

10 • Customer: Thank you. A clear uncertainty is more useful than an arrival date presented as a pickup promise.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 05 / 05 • CONVERSATIONS / 2 OF 3

A label exists, but dispatch is unconfirmed

A parts clerk clarifies shipment evidence with an advisor.

01 • Advisor: The tracking page shows a label created. Can I tell the customer the part has shipped?

02 • Parts clerk: Not from that status alone. We haven't confirmed that the carrier received the actual package.

03 • Advisor: Then label creation is a preparation event, not proof of the supplier's dispatch?

04 • Parts clerk: Exactly. I'll ask for shipment confirmation and keep the estimated delivery date qualified.

05 • Advisor: The customer already knows a part was ordered; they need the current supply stage.

06 • Parts clerk: You can say ordered, tracking label created, carrier possession not yet confirmed.

07 • Advisor: I'll avoid calling it in transit until the tracking or supplier confirms that movement.

08 • Parts clerk: Please do. The completion estimate also remains dependent on arrival and the remaining workshop schedule.

09 • Advisor: Can you send the confirmed update to the service desk once the supplier responds?

10 • Parts clerk: Yes. I'll identify the part request and actual shipment status, not just forward an unexplained tracking number.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 05 / 05 • CONVERSATIONS / 3 OF 3

One part available, another pending

An advisor and parts clerk clarify a mixed supply status.

01 • Advisor: The parts request names a battery terminal and a separate cover. Are both available?

02 • Parts clerk: Only the battery terminal, P1, is available. The cover, P2, awaits the supplier's response.

03 • Advisor: Then saying the parts are here would overstate the status of the whole job.

04 • Parts clerk: Correct. We need to identify each item rather than apply P1's status to both.

05 • Advisor: Is P2 confirmed as a back order, or is parts availability simply unconfirmed?

06 • Parts clerk: Availability is unconfirmed. We don't yet have evidence for the more specific back-order status.

07 • Advisor: I'll tell the customer one item is available and the second supply check remains pending.

08 • Parts clerk: That is accurate. Don't infer a completion date from the availability of only P1.

09 • Advisor: Please let the workshop know the same distinction so scheduling uses the actual supply status.

10 • Parts clerk: I'll send an item-specific update with P1 available and P2 awaiting the supplier's answer.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 05 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Explaining parts and completion delays

Part for job 315 is on back order. Supplier estimates Tuesday arrival; shipment is not confirmed. Customer wants Tuesday pickup. Technician scheduling and completion remain unconfirmed. Parts clerk promises a supply-status update Monday afternoon.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Customer: Tuesday pickup matters, but you need an honest update about the supply dependency.

Second round: A tracking label is created without confirmed carrier possession. Avoid reporting actual shipment from label creation alone.

Scenario 2 | The supplier updates only one date

Supplier moves estimated part arrival from Wednesday to Thursday. No vehicle completion date was confirmed. Customer believes a Wednesday pickup was canceled.

Role A: Advisor: explain which estimate changed.

Role B: Customer: ask for the next supply update and avoid assuming a new pickup date.

Possible opening: Was Wednesday the part estimate or a confirmed vehicle collection?

Success checks

- Identify the parts estimate change.
- Keep collection unconfirmed.
- Agree the next status communication.

Add a complication: Customer treats Thursday arrival as Thursday completion.

LESSON 06 / 05 • CONVERSATIONS / 1 OF 3

Not reproduced is a limited finding

An advisor explains a technician's assessment outcome.

01 • Customer: The report says not reproduced. Are you saying I imagined the rattle?

02 • Advisor: No. The technician didn't reproduce it during this assessment; that doesn't invalidate your report.

03 • Customer: So you haven't confirmed that nothing is wrong under every possible condition?

04 • Advisor: Correct. The cause remains unconfirmed, and I shouldn't turn this finding into a broader guarantee.

05 • Customer: I'd like someone to explain what the finding means before we discuss further options.

06 • Advisor: I can arrange a technician explanation and preserve your question on the repair order.

07 • Customer: Please don't record my request as approval for another assessment or a repair.

08 • Advisor: I won't. Asking for an explanation is separate from deciding on additional work.

09 • Customer: And can reception tell me whether the car is safe to drive now?

10 • Advisor: That question needs the qualified technician's response; I can't provide a safety assurance myself.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 06 / 05 • CONVERSATIONS / 2 OF 3

A recommendation needs an explanation

A customer asks an advisor about a technical recommendation.

01 • Customer: The report recommends further assessment, but the brief message doesn't explain the reason.

02 • Advisor: I can ask the technician to explain the finding behind that recommendation in plain language.

03 • Customer: Please separate what they observed from what they are proposing to do next.

04 • Advisor: I will. An inspection finding and a recommendation serve different purposes in the report.

05 • Customer: Does the recommendation mean additional work has already been approved on my behalf?

06 • Advisor: No. It remains a proposal for discussion, with scope and terms to be clarified.

07 • Customer: I want to understand those details before deciding, not reject everything automatically.

08 • Advisor: I'll preserve that position: explanation requested, decision pending, no new authorization assumed.

09 • Customer: Could the technician also clarify any unfamiliar term rather than just repeat it louder?

10 • Advisor: Yes. I'll ask for an explanation tied to your actual finding and proposed options.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 06 / 05 • CONVERSATIONS / 3 OF 3

A stored code is not a failed component

An advisor clarifies the limits of a technician's recorded diagnostic trouble code.

- 01 • Customer:** The report shows a diagnostic trouble code. Does that prove a sensor failed?
- 02 • Advisor:** No. The technician recorded the code, but hasn't confirmed its underlying cause.
- 03 • Customer:** I thought a DTC named the exact part that definitely needed replacing.
- 04 • Advisor:** A diagnostic trouble code indicates a monitored condition for investigation, not automatic component failure.
- 05 • Customer:** Then please don't describe my question as permission to replace a sensor.
- 06 • Advisor:** I won't. No replacement is approved, and the technician needs to explain this finding.
- 07 • Customer:** Can they distinguish the stored code from anything actually reproduced during the assessment?
- 08 • Advisor:** I'll ask for that distinction and any proposed next step, with its scope explained.
- 09 • Customer:** Please link the explanation to my current report rather than a generic list of codes.
- 10 • Advisor:** I will. Your code finding and any later diagnosis will remain separately identified.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 06 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Relaying findings and technical terms

A technician's assessment note records a diagnostic trouble code, or DTC, but no confirmed cause or component fault. Customer assumes it proves a sensor needs replacement. Advisor must relay the limited finding and request a technician explanation; no replacement is approved.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Customer: the report mentions a stored code; ask whether that proves a sensor failure and what remains unconfirmed.

Second round: The customer sees rotor on the report and brake disc in a message. Explain the naming equivalence without claiming its condition or approving replacement.

Scenario 2 | A shorthand phrase confuses the customer

Technician note says 'further review recommended.' Customer reads it as a failed inspection. Advisor has no result beyond that exact note.

Role A: Advisor: distinguish recommendation from a confirmed failed result.

Role B: Customer: request a technician explanation before deciding.

Possible opening: Does the note state a failure, or recommend another review?

Success checks

- Relay only the stated finding.
- Seek a qualified explanation.
- Do not infer diagnosis or approval.

Add a complication: Customer asks reception to interpret the technical cause.

LESSON 07 / 05 • CONVERSATIONS / 1 OF 3

Parts and labor are separate lines

An advisor explains a fictional \$180 invoice.

01 • Customer: The invoice lists seventy for parts and one hundred ten for labor. Is seventy charged twice?

02 • Advisor: No. The seventy-dollar parts line and one-hundred-ten-dollar labor charge total one hundred eighty.

03 • Customer: Thank you. I read the headings too quickly and combined them incorrectly.

04 • Advisor: I can walk through the itemized invoice using the actual descriptions shown here.

05 • Customer: Since the invoice is available, can I come and collect the vehicle immediately?

06 • Advisor: Not yet on that basis. The service desk still needs to confirm collection readiness.

07 • Customer: So billing information and the ready-to-collect message are separate confirmations in this case?

08 • Advisor: Exactly. I'll ask for the actual vehicle status rather than infer it from the bill.

09 • Customer: Please call me when that status is confirmed, so I can arrange my ride.

10 • Advisor: I'll record your call preference and keep the collection question open until the desk responds.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 07 / 05 • CONVERSATIONS / 2 OF 3

A friend offers to collect

A customer asks reception about a different collector.

01 • Customer: My friend can collect the car. Is giving them a copy of the invoice enough?

02 • Receptionist: The invoice alone doesn't establish an authorized collector under this shop's collection requirements.

03 • Customer: Then please explain what the service desk needs to confirm my collection arrangement.

04 • Receptionist: I'll connect you with them so the identity and permission details are checked appropriately.

05 • Customer: Please don't change the owner details on the account; I'm only asking about collection.

06 • Receptionist: Understood. Collector permission and the vehicle's account information are different parts of the record.

07 • Customer: Has the vehicle already been confirmed ready, or are we arranging collection in advance?

08 • Receptionist: The ready-to-collect confirmation is still pending. Your collector question doesn't change that status.

09 • Customer: Then my friend should wait for both the arrangement and readiness confirmation before traveling.

10 • Receptionist: Correct. I'll pass both outstanding questions to the desk without treating either as settled.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 07 / 05 • CONVERSATIONS / 3 OF 3

A receipt and an invoice are different records

A customer clarifies two service documents with an advisor.

01 • Customer: This document says invoice. Does that prove the payment has already been received?

02 • Advisor: Not by its title alone. Let me check the payment status separately from the listed charges.

03 • Customer: I don't want to make a second payment because I misunderstood which document I received.

04 • Advisor: The account shows payment received, and the receipt reference is linked to this invoice.

05 • Customer: Then please identify that receipt so I can keep the records together.

06 • Advisor: Here is the matching reference. It confirms the recorded payment rather than adding another charge.

07 • Customer: Does that payment record also confirm every service item I asked about was performed?

08 • Advisor: No. Work performed is described on the completed job record; payment doesn't expand its scope.

09 • Customer: I'll compare those records rather than assume all my earlier questions became completed work.

10 • Advisor: I can help identify the relevant lines and refer any technical completion question to the technician.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 07 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Clarifying the invoice and collection handoff

Fictional invoice totals \$180: \$70 parts and \$110 labor. Customer thinks labor includes another \$70 part charge. Vehicle readiness has not yet been confirmed by the service desk; invoice creation alone is not collection confirmation.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Customer: you misread parts and labor; ask whether you may collect immediately.

Second round: A friend offers to collect. Do not infer permission from possession of an invoice; refer to the shop's collection requirements.

Scenario 2 | The ready message names the other car

Household account has two vehicles. Ready message references the sedan; customer asks to collect the hatchback, whose status is unconfirmed.

Role A: Advisor: match the message to its actual vehicle.

Role B: Customer: provide both bookings; do not infer hatchback readiness.

Possible opening: Which vehicle and repair order does the ready message name?

Success checks

- Confirm the sedan reference.
- Keep hatchback readiness separate.
- Check the hatchback's service status.

Add a complication: Customer assumes one message covers both household cars.

LESSON 08 / 05 • CONVERSATIONS / 1 OF 3

Correcting an overconfident denial

An advisor repairs an earlier response to a repeat concern.

01 • Advisor: I spoke too definitively when I said it couldn't be the same issue.

02 • Customer: I heard the rattle again two days after service. I need that taken seriously.

03 • Advisor: We'll review your report alongside the earlier repair order without assuming its cause.

04 • Customer: Are you promising the next visit is covered by warranty, or is that undecided?

05 • Advisor: Coverage is unconfirmed. Nia can call at three to discuss the report and next arrangements.

06 • Customer: Please don't treat my warranty inquiry as proof that the earlier work failed.

07 • Advisor: I won't. A recurring symptom, its cause, and applicable coverage need separate review.

08 • Customer: Can the callback use the same case reference so I don't repeat everything?

09 • Advisor: Yes. I'll link the previous visit and today's report for Nia's callback.

10 • Customer: Thank you. That corrects the earlier dismissal without making a new unsupported promise.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 08 / 05 • CONVERSATIONS / 2 OF 3

The same symptom may have a different cause

A service advisor takes a repeat-visit inquiry.

01 • Customer: The display went blank again. Does that prove the same component failed twice?

02 • Advisor: I can't establish that from the symptom alone. The technician needs to review the recurrence.

03 • Customer: Please connect this call with last month's repair order so the history is available.

04 • Advisor: I will. I'll record your new report with today's date and the earlier reference.

05 • Customer: I'd also like someone to explain whether any warranty terms apply to this concern.

06 • Advisor: I can refer that warranty inquiry, but I can't confirm coverage before review.

07 • Customer: Does asking the question automatically book another assessment or approve a diagnostic charge?

08 • Advisor: No. We need to discuss any proposed appointment, scope, and terms separately.

09 • Customer: Then for now I'm requesting a callback, not approving a new job.

10 • Advisor: I've recorded that accurately and will ask the service desk to confirm the callback arrangement.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 08 / 05 • CONVERSATIONS / 3 OF 3

A missed callback gets a concrete repair

A customer asks about a promised service response.

01 • Customer: I was promised a callback yesterday afternoon, but I didn't receive one.

02 • Advisor: I'm sorry we missed that contact commitment. Let me check the actual case status.

03 • Customer: Please don't tell me the technical review is complete unless someone has confirmed it.

04 • Advisor: The review remains pending. Our missed call and the unresolved assessment are separate issues.

05 • Customer: I need a named contact rather than another vague promise that someone will respond.

06 • Advisor: Service lead Omar has accepted the callback for four today using this case reference.

07 • Customer: Will that be a status update even if the technical review is still unfinished?

08 • Advisor: Yes. He will explain the current status, not guarantee a conclusion by four.

09 • Customer: Thank you. Please include that I prefer a call, because I may miss a text.

10 • Advisor: I've confirmed the phone preference and Omar's ownership of the four-o'clock callback.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 08 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Handling a repeat concern and follow-up

Customer calls two days after service, reporting the same intermittent rattle. Advisor initially said 'that cannot be the same issue.' Cause and warranty coverage are unknown. Service lead Nia can call at 15:00 to review the report and next arrangements.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Customer: the rattle recurred; ask to be heard and linked to the previous visit.

Second round: Customer demands a no-cost outcome before review. Acknowledge the concern and refer the charge or coverage decision without a promise.

Scenario 2 | A callback recorded as a booked repair

Customer requests a Friday call about a repeat concern. Record incorrectly says repair booked Friday. No appointment or work approval exists.

Role A: Advisor: correct the contact-versus-work confusion.

Role B: Customer: confirm a Friday call only; review options before deciding.

Possible opening: You requested a call Friday, not a repair appointment, correct?

Success checks

- Correct the booking claim.
- Notify anyone relying on it.
- Preserve the callback without inventing work approval.

Add a complication: A colleague promises completion Friday based on the mistaken entry.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and switches roles and repeats the exchange. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All vehicles, people, prices, incidents, findings, and shop arrangements are fictional English practice, not automotive diagnosis, repair instruction, driving advice, legal advice, or financial guidance. No script establishes vehicle safety or universal rights, charges, warranty terms, or authorization rules. Refer technical assessments, safe-use questions, hazardous conditions, pricing decisions, warranty coverage, and release requirements to the responsible qualified people and applicable local arrangements.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Digital.gov: plain-language guidance

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Guided message practice gives four choices with explained feedback. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-28. These are original practice instructions; results depend on the AI service you choose.

Rehearse with an AI colleague

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

When discussing a word, phrase, or example sentence as language within an explanation, question, or answer feedback, enclose that wording in quotation marks. For example: What does "about" mean in "about twenty people"? Use "on" with a named day. Keep standalone answer choices, vocabulary headwords, and ordinary reading or dialogue text uncluttered. Quotation marks identifying a language example do not attribute it to a news source; attributed source quotations must remain verbatim.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Automotive Service English

Professional audience: Service reception staff, service advisors, automotive technicians, parts-counter staff, and workshop assistants

Scope: All vehicles, people, prices, incidents, findings, and shop arrangements are fictional English practice, not automotive diagnosis, repair instruction, driving advice, legal advice, or financial guidance. No script establishes vehicle safety or universal rights, charges, warranty terms, or authorization rules. Refer technical assessments, safe-use questions, hazardous conditions, pricing decisions, warranty coverage, and release requirements to the responsible qualified people and applicable local arrangements.

Dialogue 01: A concern disappears from a shortened note

Original fictional setting: An advisor and customer clarify a booking summary before assessment.

Professional roles: Advisor / Customer

Published dialogue (reference script, not my own performance):

Advisor: The summary says rear noise, but your message listed two concerns. What was omitted?

Customer: The rattle is one concern. The other is that the cabin display sometimes loses its saved settings.

Advisor: Thank you. We should keep them separate rather than assume the sound and display issue share a cause.

Customer: Exactly. They didn't necessarily occur together, and I don't know whether they are connected at all.

Advisor: I'll add the second reported concern without presenting a connection as a technician's finding or agreed diagnosis.

Customer: Does adding my description automatically approve assessment of both concerns under today's existing booking and price?

Advisor: No. The advisor needs to clarify the actual assessment scope and terms before either additional task is assumed.

Customer: Then please preserve both reports, but ask about scope separately so I understand what today's booking covers.

Advisor: I'll distinguish the newly clarified display concern from the originally booked rattle assessment.

Customer: Also keep both attached to this vehicle. The other car on my account doesn't have these reported concerns.

Advisor: We'll check the vehicle identification number against the booking record and retain that identity throughout the handoff.

Customer: That resolves the missing information without turning two descriptions into one diagnosis or a broader approval.

Vocabulary in this exchange: vehicle identification number: The vehicle's unique identifying code, commonly shortened to VIN.

END REFERENCE

TASK: Interactive workplace role-play

1. Use the supplied case or dialogue as the starting situation. Give a two-sentence briefing and offer two relevant professional roles for me to choose from. For a supplied dialogue, use its actual roles. Ask which role I want, then stop and wait. Do not write my replies.
 2. After I choose, identify who you will play and the immediate communication goal. Play the other professional; where a meeting requires a third person, label each of your speakers clearly. Start with one natural workplace turn and wait for my reply. Keep most turns to one to three sentences and ask no more than one question at a time.
 3. Let the exchange develop across six to ten learner turns, or end earlier if I type "feedback". Respond to what I actually say. Include a plausible clarification, disagreement or tradeoff without silently changing the starting facts. Mark any added constraint as a fictional second-round variation. Do not resolve approvals, evidence or commitments that remain uncertain.
 4. Stay in role during the exchange. If my meaning is unclear, ask for clarification naturally. Give a hint only if I ask or cannot proceed. Do not deliver a model conversation in advance.
 5. At the debrief, quote two of my phrases: one successful choice and one worth improving. Check factual accuracy, language, register and whether the next step was clear. Give up to three focused suggestions. Ask me to retry the weakest turn; wait. Only then offer an alternative wording and a harder replay.
- Use voice replies when available. If I prefer selections, offer four plausible spoken replies and explain my choice before continuing. Do not require written compositions.

END REFERENCE

TASK: Extend the conversation library

1. Propose six distinct, common scenarios in this field beyond the supplied case or script. For each, name the setting, two or more professional roles, the communication problem and one useful terminology focus. Include routine coordination, clarification, a complication, disagreement, handoff and follow-up where relevant. Choose scenarios that fit this profession, rather than forcing unsuitable situations into it.
2. Ask me to choose one scenario, or request all six in sequence. Stop and wait. Do not write all the scripts before I choose.
3. For the selected scenario, write an original fictional dialogue of 12-18 substantial speaking turns between two or three professionals. Name each role, establish an actual work problem, and let the exchange progress through questions, clarification, competing constraints and a credible next step or explicitly unresolved issue. Use the occupation's natural nomenclature and register. Avoid an interview between a teacher and a learner, generic small talk, and inserting a glossary definition into every reply. Explain specialist terms outside the dialogue instead.
4. After the script, explain five useful expressions in context, identify two grammar or register choices and ask three questions about the speakers' reasoning. Withhold the answers until I attempt them. Add one role-switch challenge.
5. Before presenting a script, check names, numbers, chronology, roles and terminology for consistency. Label invented facts and acknowledge uncertain specialist usage. If I requested all six, deliver one complete script at a time and wait for "next". Make each scenario materially different.
