

ENGLISH FOR WORK / SEPTEMBER 2026

Retail Associate and Cashier English

Conversation lab

8 complete workplace dialogues, followed by eight additional role-play cases. Study the exchanges, then make the conversation your own.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Study complete conversations. Find the right language, speak, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For Retail sales associates, cashiers, fitting-room attendants, and shop-floor customer service staff.

All shops, transactions, stock records, policies, and incidents are fictional English practice. This course covers frontline interactions, not retail strategy, merchandising management, financial advice, or universal consumer-law rules. Follow the employer's actual payment, privacy, safety, and returns procedures; refer exceptions and restricted decisions to the responsible staff.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Inside this conversation lab

Original fictional training conversations in professional English. These are realistic scripts, not transcripts of actual people. The professional roles are the speaker labels; all figures, incidents, and organizations are invented.

- 01 The online photograph includes an accessory
- 02 A display sample has a loose seam
- 03 The checkout price and shelf message disagree
- 04 A shopper changes one item before payment
- 05 The replacement is available in another branch
- 06 The shelf bag contains only part of the order
- 07 A queue splits around a display
- 08 A correction reaches the next shift in time

Then try eight independent role-play cases, followed by feedback criteria and references.

Read it. Hear it. Make it yours.

1. Read the setting. Identify the roles, the immediate problem, and what each speaker needs.
2. Read the whole conversation aloud with a partner. In a group, give a third person the observer role. For three-speaker scripts, assign each professional a separate voice.
3. Notice how the speakers ask a specific question, qualify a claim, disagree, explain a technical point, or agree on a next step. Underline language you would actually use.
4. Cover the script. Recreate the exchange using the situation and professional roles. Keep the meaning, but change the wording.
5. Switch roles and introduce a complication: a missing record, a different priority, an unavailable colleague, or a changed assumption. End with a clear outcome or unresolved question.

Register and terminology

These colleagues use concise professional language. In an internal technical meeting, familiar abbreviations can be natural. With a new colleague or a client, expand unfamiliar terms and check understanding. Keep disagreement directed at the evidence or proposal, and match the degree of certainty to what is known.

Independent study

Speak each role aloud. Pause before the reply and supply your own response before revealing the next line. Record a second version using invented details, then compare its clarity and tone with the script.

Professional context

All shops, transactions, stock records, policies, and incidents are fictional English practice. This course covers frontline interactions, not retail strategy, merchandising management, financial advice, or universal consumer-law rules. Follow the employer's actual payment, privacy, safety, and returns procedures; refer exceptions and restricted decisions to the responsible staff.

FULL DIALOGUE 01 / 12 SPEAKING TURNS

The online photograph includes an accessory

An associate checks which part of a product image the shopper wants. Fictional final prices are thirty dollars for the bag and eight for the pouch, with no additional charges.

Roles: Associate / Shopper

Associate: The photograph shows a bag and pouch. Are you looking for both, or just the bag?

Shopper: Both, if they are sold together. I couldn't tell whether the pouch was part of the pictured product.

Associate: Let's check the description. Product photographs sometimes include accessories sold separately.

Shopper: The description says shoulder bag B72, but the smaller pouch doesn't have a visible label in the picture.

Associate: This product listing identifies the bag only. The pouch has a separate code, P16, on our display here.

Shopper: Then I shouldn't assume the advertised bag price includes the pouch just because they appear together online.

Associate: Correct. Would you like the bag alone, or would you like me to check the pouch's separate price?

Shopper: Please check both prices. I'm choosing a gift and need the total before deciding whether to include it.

Associate: The bag is thirty dollars; the pouch is eight. Both together would be thirty-eight dollars.

Shopper: I'll take the bag alone. Could you make sure the pouch isn't included in the items sent to checkout?

Associate: Certainly. I'll send only bag B72 to checkout and leave the pouch here.

Shopper: Thanks. I'll take the bag on its own and leave the pouch today.

Notice the professional language

'Sold separately' explains that a photograph can contain more than one purchasable item.

'The actual offer' distinguishes the product description from the visual presentation.

FULL DIALOGUE 02 / 12 SPEAKING TURNS

A display sample has a loose seam

An associate helps a shopper who notices a visible flaw.

Roles: Associate / Shopper

Associate: You've pointed to the sleeve join. Is the problem its fit or stitching?

Shopper: The stitching appears loose here. I like the fit, but I don't want this display sample.

Associate: I see the area you're indicating. We can check another item in the same style and size.

Shopper: Please don't tell me every one has that problem. We've only looked at this one sample so far.

Associate: Agreed. This observation concerns this garment; it doesn't establish a defect across the whole product range.

Shopper: Could you check whether an unopened one is available, without promising that the packaging proves it is perfect?

Associate: Yes. I'll look for the same code and let you inspect the actual item before choosing it.

Shopper: Thanks. I don't need a different size or color, just another example of the item I've selected.

Associate: There is another medium in navy. Here it is; the code matches, and you can examine the seam yourself.

Shopper: This one looks different at that join. I'd like to try it to confirm the fit hasn't changed.

Associate: Certainly. I'll keep this sample separate and tell my colleague about the loose stitching.

Shopper: Thanks. I'll try this one and meet you outside the fitting room.

Notice the professional language

fitting room - A designated shop space where customers can try on clothing.

FULL DIALOGUE 03 / 12 SPEAKING TURNS

The checkout price and shelf message disagree

A cashier takes a shopper's specific price concern to a colleague.

Roles: Cashier / Shopper

Cashier: This item scanned at eight dollars, but you expected six. Which shelf message did you see?

Shopper: The label below the red bottle said six. I didn't check its product code carefully.

Cashier: I'll request a price check on this exact size and variety before completing the sale.

Shopper: Can I keep my place here while someone checks, rather than join another queue afterward?

Cashier: Yes, I can hold this transaction here. A colleague is checking the matching label now.

Shopper: Thanks. I don't want a different bottle substituted just because its price happens to match.

Cashier: Understood. We're verifying your selected item, not changing it. The price remains disputed for now.

Shopper: Would the fact that it scanned at eight automatically settle the disagreement in the register's favor?

Cashier: No, that's why we're checking both records. The supervisor will confirm the applicable store response.

Shopper: All right. I'll wait for that confirmation before deciding whether I still want this bottle.

Cashier: The supervisor has confirmed six for this sale. I'll show the revised item price before payment.

Shopper: I can see six on the screen now. Please continue with that confirmed amount.

Notice the professional language

price check - A request to verify an item's applicable price when information is unclear.

FULL DIALOGUE 04 / 12 SPEAKING TURNS

A shopper changes one item before payment

A cashier clarifies a basket change before payment. In this fictional transaction, the bowl is six dollars, the mug is eight, and no other charges apply.

Roles: Cashier / Shopper

Cashier: You asked to remove the second item. Do you mean the blue bowl or the white plate?

Shopper: The white plate, please. I still want the bowl and the mug on the counter.

Cashier: I'll remove the plate from this unpaid basket, then read the remaining items back to you.

Shopper: Does removing it mean I need a return receipt, or is that only after paying?

Cashier: A return concerns a completed purchase. Here we're changing your selection before payment has started.

Shopper: Then please keep the other two items separate from the plate so I don't take it accidentally.

Cashier: The subtotal is fourteen: bowl at six, mug at eight. The plate is off the basket.

Shopper: So fourteen for the bowl and mug. Can you turn the screen so I can check?

Cashier: Yes, fourteen. Would you like to check the item descriptions before choosing your payment method today?

Shopper: They match. I'll use cash, but I haven't handed you the money yet this time.

Cashier: Understood. The basket is confirmed, but the purchase remains unpaid until the payment step is completed.

Shopper: The two items are right now. Here's the cash for the bowl and mug, please.

Notice the professional language

'Unpaid basket' distinguishes a changed selection from a return.

'The basket is confirmed' does not mean the payment has completed.

Rehearse this dialogue with an AI partner

FULL DIALOGUE 05 / 12 SPEAKING TURNS

The replacement is available in another branch

A cashier discusses an exchange after local stock has been checked.

Roles: Cashier / Shopper

Cashier: This shirt qualifies for exchange, but the medium black version isn't here. The next branch lists one.

Shopper: Could I collect it there today, or does the listing need checking before I travel?

Cashier: I'll call to confirm the physical item and ask about their collection arrangements before suggesting a trip.

Shopper: Please mention that I have an exchange, not a new purchase. I don't want confusion at their counter.

Cashier: I have. Their colleague has found the item and can hold it until five under today's arrangement.

Shopper: It's already four. I can reach them by half past four if the bus runs normally.

Cashier: They close at six, but the agreed hold ends at five. Shall I put the hold in your name?

Shopper: Yes, please. What do I need to take so their cashier can find the arrangement easily?

Cashier: Bring the shirt and receipt. Their cashier will handle the exchange; H24 identifies the hold.

Shopper: So the hold secures the item until five, but this counter hasn't completed my exchange yet?

Cashier: That's right. The shirt and receipt are still yours to take, and the other branch will handle the transaction.

Shopper: I've got the address and H24. I'll head there now to collect before five.

Notice the professional language

'Hold ends at five' distinguishes a stock arrangement from the shop's closing time.

'Hasn't completed ... yet' keeps a reservation separate from a finished exchange.

Rehearse this dialogue with an AI partner

FULL DIALOGUE 06 / 12 SPEAKING TURNS

The shelf bag contains only part of the order

An associate checks an order before releasing it for pickup.

Roles: Associate / Shopper

Associate: Your order lists two items, but this collection bag has one. Let's check before you leave.

Shopper: I was about to take it because the label has my name and order number.

Associate: The label matches, but the contents don't yet match the full order. One item remains unlocated.

Shopper: Could it be packed separately? The missing item is much larger than the one in this bag.

Associate: That's possible. I'll ask the collection colleague to check the large-item area using the same order reference.

Shopper: Please don't mark both items collected while you search. I haven't received the larger one yet.

Associate: I won't describe it as received. Would you prefer to wait here while my colleague checks?

Shopper: Yes, for a few minutes. I need both for tomorrow, so the missing item matters.

Associate: They've found the second package and checked its code against your order. It's coming to this counter now.

Shopper: Great. Can we compare the two items with the order together before finishing the handover?

Associate: Certainly. Here are both descriptions and quantities. Please check that these are the items you expected to collect.

Shopper: They match now. I'll take both packages, and you can complete the collection record for both items.

Notice the professional language

'Contents don't yet match' focuses on the concrete discrepancy rather than the label alone.

'I haven't received ... yet' prevents an unfinished handover from being recorded as complete.

Rehearse this dialogue with an AI partner

FULL DIALOGUE 07 / 12 SPEAKING TURNS

A queue splits around a display

An associate helps a shopper understand which queue serves two open lanes.

Roles: Associate / Shopper

Associate: Both lanes serve this queue. The display makes it look like two lines.

Shopper: I joined beside the display because I couldn't see the sign. Have I accidentally moved ahead of someone?

Associate: The queue continues behind the red basket stand. I can show you where the current end is.

Shopper: Please do. I don't want an argument with people who have been waiting longer than me.

Associate: The sign is partly hidden, so the confusion is understandable. I'll ask a colleague to move the obstruction.

Shopper: Should I choose lane one now, or wait until a cashier calls the next person forward?

Associate: Wait here until either cashier calls. Both take the next person from this line.

Shopper: That makes sense. Are returns handled in these lanes, or should I go to the separate service desk?

Associate: Returns are at the service desk by the entrance. Are you here for a return rather than a purchase?

Shopper: Yes, an exchange. I should have asked before joining; I only have this item and its receipt.

Associate: Then the service desk is the right place. The colleague there can check your exchange request directly.

Shopper: Thanks. I'll go there, and the queue can keep moving without me waiting in the wrong place.

Notice the professional language

'From this same line' gives an unambiguous queue arrangement.

'Rather than a purchase' checks the task before giving a final destination.

Rehearse this dialogue with an AI partner

FULL DIALOGUE 08 / 12 SPEAKING TURNS

A correction reaches the next shift in time

A supervisor checks an outgoing cashier's correction to a customer message.

Roles: Supervisor / Cashier

Supervisor: The shift log says the customer was refunded, but the transaction screen shows only a review request.

Cashier: I used refunded too soon. The supervisor had accepted the query, not approved or processed any money back.

Supervisor: We need to correct the status and tell the colleague taking the customer's callback at five.

Cashier: I'll change the handover wording to refund review pending, with no completed refund recorded for reference R39.

Supervisor: Did the customer also receive the earlier wording, or was it only in the internal shift log?

Cashier: They heard it on the phone. I need to correct that directly rather than only update our notes.

Supervisor: Please explain the actual status without promising a new outcome. The review owner can answer any decision questions.

Cashier: I've reached the customer. I apologized, explained the pending review, and confirmed they will still receive an update at five.

Supervisor: Has the incoming cashier accepted the callback and received the corrected status for R39?

Cashier: Yes. Morgan has accepted the five o'clock update and knows the review is still awaiting a decision.

Supervisor: Both tasks are assigned. Preserve the earlier entry through our normal correction process.

Cashier: Done. The log shows the correction, and Morgan will report the review outcome.

Notice the professional language

shift log - A store record of relevant events and open tasks passed between work shifts.

Rehearse this dialogue with an AI partner

Eight more situations to make your own

The following cases are open role plays. They give you facts, contrasting roles, useful expressions, and a short model response. Use what you learned from the complete dialogues to create a longer exchange.

Preparation: two minutes. Conversation: three to five minutes. Feedback: one minute. Switch roles and repeat with the second-round challenge.

ROLE-PLAY CASE 01

Finding the item the shopper actually means

SHARED CASE

A shopper asks for the blue shirt in an advertisement. The ad shows two blue shirts: linen L214 and cotton C218. The shopper wants a medium cotton shirt; local availability has not been checked. Confirm item and size before discussing stock.

Role A | Responding professional

Confirm product variation before searching for stock. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Shopper: want the medium cotton blue shirt, not the linen shirt; have not seen local stock information.

Useful expressions

Do you mean the ___ or the ___?

The item code is ___; is that the one?

I'll check this store's stock in ___.

Cover this until after your first attempt

The advertisement shows two blue shirts, so let me check which one you mean. Is it the cotton shirt, code C218, in medium? Once we've confirmed that variation, I can check this store's stock. The picture alone doesn't tell us whether your size is available here today.

Second round

The shopper points at the wrong picture while repeating the cotton code. Clarify before searching.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 02

Comparing fit, materials, and label information

SHARED CASE

A shopper needs a machine-washable jacket. Jacket A is unlined and its label permits machine washing; B is lined and its label states dry-clean only. Both cost \$60. Compare the stated care requirements without inventing comfort or durability claims.

Role A | Responding professional

Use label evidence instead of broad claims about quality. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Shopper: need machine washing, have a sixty-dollar budget, and still need to check fit.

Useful expressions

Both cost ___, but the labels say ___.

This matches your requirement for ___.

The label doesn't establish ___.

Cover this until after your first attempt

Both jackets are sixty dollars, but their care labels differ. Jacket A is unlined and labelled for machine washing; jacket B is lined and labelled dry-clean only. Since machine washing is your priority, A matches that stated requirement. You can still compare the fit before deciding.

Second round

The shopper assumes identical prices mean identical care requirements. Return to the two labels.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 03

Resolving shelf prices and offer conditions

SHARED CASE

A shopper has one juice bottle priced at \$3. The shelf offer says two qualifying bottles for \$5; single bottles remain \$3. The shopper expects one bottle for \$2.50. Explain the quantity condition without treating half the bundle price as the single-item offer.

Role A | Responding professional

Distinguish an average bundle price from a single-item price. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Shopper: want just one bottle unless the two-bottle offer clearly fits your needs.

Useful expressions

The offer applies when you buy ____.

One item remains ____ under these terms.

That is the average, not ____.

Cover this until after your first attempt

The five-dollar offer applies when you buy two qualifying bottles. One bottle is still three dollars under these displayed terms. Two would average two dollars fifty each, but that average isn't the single-bottle price. Would you like one at three, or two qualifying bottles for five?

Second round

The second bottle is a nonqualifying flavor. Explain that quantity and qualifying item both matter.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 04

Checking the basket and payment status

SHARED CASE

Two \$8 mugs were scanned, but the shopper has only one. There are no additional charges in this exercise. Payment has not begun. Acknowledge the duplicate, correct the recorded quantity through the store's checkout process, and confirm \$8 before payment.

Role A | Responding professional

Explain the correction and verify the revised quantity and total. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Shopper: have one mug; point out the duplicate before payment.

Useful expressions

The basket shows ___, but you have ___.

Payment hasn't started, so this is ___.

The revised quantity is ___ and the total is ___.

Cover this until after your first attempt

You're right: the basket shows two mugs, but you have one. I'm sorry about the duplicate scan. I'll correct the quantity before you pay. Your total is now eight dollars, with no additional charges. Please check that the screen shows one mug before we continue.

Second round

The shopper sees a payment notification from an earlier purchase. Keep it separate from this unpaid basket.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 05

Discussing returns and exchanges at the counter

SHARED CASE

In this fictional store, an unused shirt with tags and a receipt can be exchanged within thirty days. The shopper bought it ten days ago and wants a larger size. A receipt is present; larger-size stock remains unchecked. Explain eligibility and the stock uncertainty without stating universal return rights.

Role A | Responding professional

Explain the stated exchange conditions without promising an unavailable replacement. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Shopper: bought the unused tagged shirt ten days ago, have the receipt, and need the next size up.

Useful expressions

Under this store's terms, ___ qualifies for ___.

The remaining question is whether ___ is available.

A refund and store credit are different because ___.

Cover this until after your first attempt

Your receipt shows the shirt was bought ten days ago. Under this store's stated terms, the unused shirt with its tags qualifies for an exchange within thirty days. We still need to check whether the larger size is here. I'll check that before we agree on the replacement.

Second round

The larger size is unavailable. Ask about other stated options rather than invent an exception.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 06

Explaining local stock and collection status

SHARED CASE

A shopper's message acknowledges order R61 but is not a collection notification. One item is still being located. The collection colleague will update the shopper at 3:00, even if unresolved. Do not promise readiness or substitute another variation.

Role A | Responding professional

Separate order acknowledgment from pickup readiness. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Shopper: have an order acknowledgment and expected immediate pickup; need a truthful status.

Useful expressions

This confirms ___, not ___.

One item is still ___.

Three o'clock is an update time, not ___.

Cover this until after your first attempt

That message confirms receipt of order R61; it isn't a collection notification. One item is still being located, so I can't say the order is ready. The collection colleague will update you at three, including if the search is unresolved. We won't substitute a different variation without asking you.

Second round

The shopper asks whether choosing another color automatically makes the order ready. Keep substitution and readiness separate.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 07

Managing queues and offering practical assistance

SHARED CASE

A shopper using a mobility aid says the current checkout is too narrow. An accessible checkout is open at lane four. Ask what help they prefer, explain the available route, and ask a colleague to preserve their place; do not touch their belongings or aid without permission.

Role A | Responding professional

Offer a concrete access option without making assumptions about the shopper. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Shopper: need a wider checkout and want to keep your own bag; prefer directions.

Useful expressions

Would you prefer ___ or ___?

Lane ___ has ___.

May I help with ___?

Cover this until after your first attempt

Lane four has the wider checkout space and is open now. Would you prefer directions or someone to accompany you? I'll ask my colleague to keep your place while we move the transaction. Please tell me what assistance you want; I won't assume you need help with your belongings.

Second round

The next shopper questions why the transaction is moving. Explain briefly without disclosing personal details.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 08

Handing over a till and an unfinished query

SHARED CASE

At shift change, the expected drawer balance is \$180 and the recorded count is \$175. A second check has not occurred, and the cause is unknown. A price query for item P32 also remains open. The incoming supervisor accepts both checks; do not accuse anyone or describe a loss as proved.

Role A | Responding professional

Give amounts, open checks, and a named next owner. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

Incoming supervisor: accept the second cash check and item P32 price query as separate tasks.

Useful expressions

The count is ___ against an expected ___.

The cause remains ___.

Can you take the follow-up on ___?

Cover this until after your first attempt

The first count is one hundred seventy-five dollars against an expected one hundred eighty, a five-dollar difference. The second check and cause are still open. Item P32 also has an unresolved price query. Please confirm you'll take both follow-ups and keep the two issues separate in the shift log.

Second round

Someone blames the prior cashier before the check. Keep the report factual without suggesting an unrecorded cash adjustment.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Say one better follow-up question, then repeat the exchange.

Lesson conversations and speaking practice

The following sections match 05 and 06 on the industry webpage and in the learner workbook. Each lesson has three ten-turn conversations and two bounded speaking scenarios. These are original fictional teaching scripts, not transcripts of real people.

LESSON 01 / 05 • CONVERSATIONS / 1 OF 3

Two blue shirts in one advertisement

An associate clarifies a shopper's request on the sales floor.

01 • Associate: There are two blue shirts in that advertisement. Do you mean the cotton or linen version?

02 • Shopper: The cotton one, please. I want a medium, but I can't find it here.

03 • Associate: The cotton code is C218. Let me confirm that against the item pictured on your phone.

04 • Shopper: Yes, that's the one. The linen shirt beside it looks almost the same color.

05 • Associate: I'll check the stock-keeping unit for medium C218, so we get that exact variation.

06 • Shopper: Does being in the advertisement mean you definitely have that size in this branch today?

07 • Associate: No. The advertisement identifies the product; local stock needs a separate check for your variation.

08 • Shopper: Thanks. Could I see a large for comparison if the medium isn't available here?

09 • Associate: We can discuss that after checking, but I won't substitute a different size without asking.

10 • Shopper: That's fine. Medium cotton C218 is my first choice; the other size is only a possibility.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 01 / 05 • CONVERSATIONS / 2 OF 3

The code is clearer than the display location

A shopper brings a loose item from a mixed display.

01 • Associate: You found this near the jackets, but its label identifies it as a lightweight overshirt.

02 • Shopper: I thought everything on that rail belonged to the same range and fitted similarly.

03 • Associate: Items can be moved. Let's check the product code and size label on this one.

04 • Shopper: The code is O316 and the label says small. Does it come in a medium?

05 • Associate: The listed size range includes medium; that doesn't yet confirm one is in this shop.

06 • Shopper: Could you check while I compare how the small feels in the fitting room?

07 • Associate: Certainly. The fitting rooms are beside the mirror, and I'll search this exact code.

08 • Shopper: Please don't bring a similar jacket instead. I need the same material and style.

09 • Associate: I'll look for medium O316, and tell you clearly if that variation isn't available.

10 • Shopper: Great. The label gives us a more precise starting point than where I found it.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 01 / 05 • CONVERSATIONS / 3 OF 3

A gift request without a guessed size

An associate helps a shopper buying a gift.

01 • Associate: What do you know about the item they liked: its color, material, or exact code?

02 • Shopper: Only that it was a green sweater in your window. I don't know their size.

03 • Associate: There are two green styles there. Could you point to the one they mentioned?

04 • Shopper: The one with the textured front. I don't want you to guess their size from a photograph.

05 • Associate: I won't. We can identify the style now and leave the size choice open.

06 • Shopper: Could I see the size range and the stated gift exchange terms before deciding?

07 • Associate: Yes. I'll show both, without treating an available range as proof every size is stocked.

08 • Shopper: That would help. I may ask them for a size before buying anything today.

09 • Associate: This is the textured style, code K420. You can use that code when you return.

10 • Shopper: I'll do that. Identifying the item first saves us choosing the wrong green sweater.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 01 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Finding the item the shopper actually means

A shopper asks for the blue shirt in an advertisement. The ad shows two blue shirts: linen L214 and cotton C218. The shopper wants a medium cotton shirt; local availability has not been checked. Confirm item and size before discussing stock.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Shopper: want the medium cotton blue shirt, not the linen shirt; have not seen local stock information.

Second round: The shopper points at the wrong picture while repeating the cotton code. Clarify before searching.

Scenario 2 | A barcode belongs to the packaging, not the loose item

A shopper presents a mug inside a box marked for a larger model. The mug base shows M12; the box shows M18. No sale has been entered.

Role A: Associate: compare the two identifiers and find the matching label.

Role B: Shopper: want the smaller M12 mug and its correct price.

Possible opening: Can you scan the box? I put the mug in it myself.

Success checks

- Identify the mug actually selected.
- Keep the mismatched box separate.
- Confirm the exact item before quoting a price.

Add a complication: The shopper assumes the larger model's displayed price applies.

LESSON 02 / 05 • CONVERSATIONS / 1 OF 3

The care requirement decides the first comparison

An associate compares two jackets with a shopper.

01 • Associate: Both jackets cost sixty dollars. Is care, warmth, or fit your first priority today?

02 • Shopper: Care. I need something labelled for machine washing because I travel frequently for work.

03 • Associate: Jacket A's label permits that. Jacket B is lined and marked dry-clean only.

04 • Shopper: Then the similar price doesn't mean they have the same care requirements at all.

05 • Associate: Correct. The labels give different instructions, even though both jackets share the same displayed price.

06 • Shopper: I'll consider A first. Does being unlined automatically mean it will fit more loosely?

07 • Associate: No. Lining and fit are separate features; trying it on will help you compare.

08 • Shopper: May I try the medium and large rather than choose from the label alone?

09 • Associate: Certainly. I'll bring both available sizes so you can compare the shoulder and body fit.

10 • Shopper: That's useful. The care label narrows the choice, but I still need the right fit.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 02 / 05 • CONVERSATIONS / 2 OF 3

Sleeve length and body fit are different

An associate checks a shopper's concern outside the fitting room.

01 • Associate: Which part doesn't feel right: the body, the shoulders, or the length of the sleeves?

02 • Shopper: The body feels fine, but the sleeves cover more of my hands than I expected.

03 • Associate: So going up a size may not address the issue you're describing with sleeve length.

04 • Shopper: Exactly. I don't want more room everywhere just because the sleeve shape isn't suitable.

05 • Associate: We have another cut in the same listed size. Would you like to compare that?

06 • Shopper: Yes, as long as it's clear we're comparing a different cut, not identical sizing across styles.

07 • Associate: Certainly. Size labels don't guarantee the same fit in every design or product range.

08 • Shopper: Could you show me where the shoulder seam sits on each one for comparison?

09 • Associate: Yes, here is the stitched join on each garment. Tell me which feels more comfortable.

10 • Shopper: The second style suits me better. I'll check its care label before making my decision.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 02 / 05 • CONVERSATIONS / 3 OF 3

Reading a label without inventing a guarantee

A shopper asks about an unfamiliar fabric-care symbol.

01 • Shopper: Does this label mean the sweater will never shrink, whatever washing method I use?

02 • Associate: No. The label gives care information; it doesn't make an unlimited guarantee about every method.

03 • Shopper: Could you help me find the manufacturer's written explanation rather than guess at the symbol?

04 • Associate: Yes. This item has a printed care explanation on the reverse of the label.

05 • Shopper: I see it now. The instructions are more specific than what I assumed from the picture.

06 • Associate: Would you like to compare another item with care requirements that better fit your routine?

07 • Shopper: Please. I'd prefer a clearly labelled option I can maintain without changing my usual arrangements.

08 • Associate: This alternative has different stated care information. Let's compare the labels before discussing its fit.

09 • Shopper: That helps. I won't treat your explanation as permission to ignore the manufacturer's instructions.

10 • Associate: Exactly. We can clarify the wording while keeping the actual care directions with the product.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 02 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Comparing fit, materials, and label information

A shopper needs a machine-washable jacket. Jacket A is unlined and its label permits machine washing; B is lined and its label states dry-clean only. Both cost \$60. Compare the stated care requirements without inventing comfort or durability claims.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Shopper: need machine washing, have a sixty-dollar budget, and still need to check fit.

Second round: The shopper assumes identical prices mean identical care requirements. Return to the two labels.

Scenario 2 | One bag has pockets, the other has lining

Two bags cost \$24. A has a lining but no internal pocket; B has one internal pocket but no lining. The shopper needs a pocket for keys.

Role A: Associate: compare the stated features without equating lining with storage.

Role B: Shopper: prioritize an internal key pocket over lining.

Possible opening: Does lined mean it has a pocket inside?

Success checks

- Explain lining versus pocket.
- Identify B as matching the stated pocket need.
- Avoid unsupported durability claims.

Add a complication: The shopper assumes the more structured appearance proves stronger construction.

LESSON 03 / 05 • CONVERSATIONS / 1 OF 3

One bottle is not half the bundle offer

A cashier explains the fictional juice promotion.

01 • Cashier: You have one qualifying bottle. Its single price is three dollars under this offer.

02 • Shopper: The shelf says two for five, so I expected this one to be two-fifty.

03 • Cashier: This multibuy offer requires two qualifying bottles. Then each would average two-fifty.

04 • Shopper: I only need one. Are you saying the displayed deal doesn't change its individual price?

05 • Cashier: That's right for these stated terms. One remains three; two qualifying bottles total five.

06 • Shopper: Could I add any flavor, or does the second bottle need the same offer label?

07 • Cashier: Both must qualify. We can check the shelf label for the flavor you're considering.

08 • Shopper: Then I'll keep just this one today. I don't want an extra bottle I won't use.

09 • Cashier: Certainly. I'll leave the quantity at one and confirm the three-dollar price before payment.

10 • Shopper: Three dollars for this one is fine. Please leave the extra bottle off my purchase.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 03 / 05 • CONVERSATIONS / 2 OF 3

The label belongs to the smaller pack

An associate checks a price complaint at a shelf.

01 • Associate: Let's match the shelf-edge label to your pack before deciding which price applies.

02 • Shopper: I picked it from this space, so I assumed the label underneath referred to it.

03 • Associate: The label describes a six-pack, while your box contains twelve and has a different code.

04 • Shopper: That explains the mismatch. Can you find the displayed price for this actual twelve-pack?

05 • Associate: Yes. I'll check the matching code rather than assume the six-pack price applies.

06 • Shopper: Please don't replace my box with six just to match the lower label I mentioned.

07 • Associate: I won't. You're asking for a price check on the twelve-pack, not a substitution.

08 • Shopper: Exactly. Once I know the correct total, I can choose which quantity I want.

09 • Associate: The matching twelve-pack label says nine dollars. Would you like to keep it or compare the six?

10 • Shopper: I'll keep twelve at nine. Thank you for identifying the mismatch before I reached checkout.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 03 / 05 • CONVERSATIONS / 3 OF 3

A larger pack is not automatically the cheaper choice

A shopper compares two fictional quantities of detergent.

01 • Associate: The one-liter bottle is four dollars; the two-liter bottle is seven dollars today.

02 • Shopper: So the bigger one costs more overall but less for each liter, correct?

03 • Associate: Yes. The smaller is four per liter, while the larger works out at three-fifty per liter.

04 • Shopper: I only have five dollars to spend. The better unit price doesn't fit that limit.

05 • Associate: Then the smaller bottle meets your total budget, although its price per liter is higher.

06 • Shopper: I appreciate that distinction. I don't want to be pushed toward a larger purchase just for a ratio.

07 • Associate: Of course. Unit price is one comparison; the amount you need and can spend also matter.

08 • Shopper: I'll take one liter. Does that displayed four dollars depend on buying anything else?

09 • Associate: No, the supplied price is for one bottle without an additional purchase condition.

10 • Shopper: That's the one I want. Please keep the comparison tied to today's displayed prices.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 03 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Resolving shelf prices and offer conditions

A shopper has one juice bottle priced at \$3. The shelf offer says two qualifying bottles for \$5; single bottles remain \$3. The shopper expects one bottle for \$2.50. Explain the quantity condition without treating half the bundle price as the single-item offer.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Shopper: want just one bottle unless the two-bottle offer clearly fits your needs.

Second round: The second bottle is a nonqualifying flavor. Explain that quantity and qualifying item both matter.

Scenario 2 | An offer starts tomorrow

The shelf sign states a \$12 promotion beginning Saturday. It is Friday and today's confirmed price is \$15. The shopper misread the starting date.

Role A: Associate: explain the date condition and offer a price check if needed.

Role B: Shopper: willing to return Saturday but want to know whether stock is guaranteed.

Possible opening: I thought the twelve-dollar offer was active today.

Success checks

- State today's and the advertised start date accurately.
- Distinguish price terms from stock availability.
- Avoid promising an unverified reservation.

Add a complication: The shopper assumes returning tomorrow guarantees stock at that price.

LESSON 04 / 05 • CONVERSATIONS / 1 OF 3

One mug entered twice

A cashier corrects the item count before payment. In this fictional shop, one mug costs eight dollars and no other charges apply.

01 • Cashier: The point-of-sale system shows two mugs at eight dollars each. Did you choose two?

02 • Shopper: No, I have only one mug. I think the barcode was scanned twice just now.

03 • Cashier: You're right. I'm sorry about the duplicate entry; payment hasn't begun for this basket.

04 • Shopper: Then I don't need a refund, because I haven't actually paid sixteen dollars yet?

05 • Cashier: Correct. I'll correct the basket quantity through the checkout system before taking any payment.

06 • Shopper: Could you show the updated line so I can check that only one remains?

07 • Cashier: Here it is: one mug at eight dollars. Please check the quantity on this line.

08 • Shopper: That's correct. I was worried the correction might remove the whole purchase by mistake.

09 • Cashier: The mug is still in your basket; only the duplicate entry has been removed.

10 • Shopper: I can see that now. Let's continue with the eight-dollar total for one mug.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 04 / 05 • CONVERSATIONS / 2 OF 3

A notification is not the register's final status

A cashier responds when a card-payment screen pauses.

01 • Cashier: The checkout hasn't shown a final payment result yet. Please wait while I check its status.

02 • Shopper: My phone has a banking notification. Doesn't that prove the sale is complete on your side?

03 • Cashier: It may relate to the payment attempt, but it doesn't confirm our checkout's final status.

04 • Shopper: I don't want to pay twice because two screens are giving different impressions.

05 • Cashier: I understand. I won't describe it as completed or ask for another attempt without checking.

06 • Shopper: Could you ask the supervisor to look at the transaction rather than guess from my phone?

07 • Cashier: Yes. I'll keep this sale reference with the query and explain the screen hasn't finalized.

08 • Shopper: Thank you. Please don't ask me to share account passwords to help with the check.

09 • Cashier: We don't need your password. The supervisor will review the store-side transaction information.

10 • Shopper: Then I'll wait for that result before choosing any next payment step with you.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 04 / 05 • CONVERSATIONS / 3 OF 3

A receipt choice before leaving

After a cash purchase, a cashier clarifies a shopper's preferred receipt format.

01 • Cashier: Your purchase is complete. Would you prefer the available paper receipt or a digital receipt?

02 • Shopper: Paper, please. I don't want to supply an email address just to record this purchase.

03 • Cashier: That's fine. I can print the receipt without adding you to a mailing list.

04 • Shopper: Thank you. Does choosing paper change the store's stated return terms for this item?

05 • Cashier: No. The receipt format doesn't alter the terms displayed for this purchase here.

06 • Shopper: Could you point out which line identifies the item, in case I need it later?

07 • Cashier: Certainly. This line shows the product description, quantity, and amount for your selected item.

08 • Shopper: I see cash listed as the tender below. That isn't an extra item, is it?

09 • Cashier: Exactly. It's payment information, not an extra product charge added to your basket.

10 • Shopper: That's clear. I'll keep the paper receipt with the product packaging when I get home.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 04 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Checking the basket and payment status

Two \$8 mugs were scanned, but the shopper has only one. There are no additional charges in this exercise. Payment has not begun. Acknowledge the duplicate, correct the recorded quantity through the store's checkout process, and confirm \$8 before payment.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Shopper: have one mug; point out the duplicate before payment.

Second round: The shopper sees a payment notification from an earlier purchase. Keep it separate from this unpaid basket.

Scenario 2 | The quantity was correct but the size was not

A shopper buys one medium shirt. The basket shows one large because a loose tag from another item was scanned. The selected medium is C218-M; the mistakenly scanned large tag is C218-L. The prices are equal, and payment has not started.

Role A: Cashier: correct the identified variation without claiming a price difference.

Role B: Shopper: need the receipt to identify the actual medium shirt.

Possible opening: The total is right, but the description says large.

Success checks

- Distinguish price accuracy from item accuracy.
- Confirm the medium item code.
- Check the corrected record before payment.

Add a complication: The shopper assumes equal prices mean the item record need not be corrected.

LESSON 05 / 05 • CONVERSATIONS / 1 OF 3

The receipt qualifies; the size still needs checking

A cashier handles a shirt exchange.

01 • Cashier: Your receipt shows this shirt was bought ten days ago. Are you looking for another size?

02 • Shopper: Yes, one size larger. It's unused and still has the tags attached to it.

03 • Cashier: That meets this store's stated thirty-day exchange terms. I'll check whether large is available.

04 • Shopper: I'd like the same green, not a different color simply because it's easier to find.

05 • Cashier: I'll search for large in green using this item code. May I keep the receipt here?

06 • Shopper: Of course. I have the shirt with me, so you can compare the labels.

07 • Cashier: The stockroom colleague has found one large green shirt. Would you like to check the fit?

08 • Shopper: Yes, please. I don't want to exchange it twice because I guessed the size again.

09 • Cashier: The fitting room is free. I'll keep this transaction open while you try that one.

10 • Shopper: I'll be back shortly. Please keep my original shirt and receipt together at the counter.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 05 / 05 • CONVERSATIONS / 2 OF 3

A gift without the original price receipt

A shopper asks what a gift receipt can support.

01 • Cashier: Do you have any proof of purchase with the scarf you'd like to return?

02 • Shopper: I have a gift receipt. I don't have the buyer's payment card or full receipt.

03 • Cashier: For this store's stated gift terms, it can support an exchange or store credit after checking eligibility.

04 • Shopper: Would store credit send the money back to the person who bought the scarf?

05 • Cashier: No, it would give you value to spend here; a refund is a different arrangement.

06 • Shopper: I see. I would rather choose another scarf today if one suits me.

07 • Cashier: Let's check the gift receipt and item first, then you can look at the available scarves.

08 • Shopper: Please don't tell me the original price aloud. The gift receipt deliberately leaves it off.

09 • Cashier: I'll handle the check discreetly and explain the available options without discussing the buyer's details.

10 • Shopper: Thanks. I'll start with the blue scarves once you've confirmed the exchange can proceed.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 05 / 05 • CONVERSATIONS / 3 OF 3

A request outside the stated window

A cashier responds to an exception request.

01 • Cashier: The receipt date is outside this store's thirty-day change-of-mind return window. What happened with the purchase?

02 • Shopper: I was traveling and couldn't come back sooner. The item is unused, with its tags.

03 • Cashier: I can ask the supervisor to review those circumstances, but I can't approve an exception myself.

04 • Shopper: Could you tell them I tried calling last week? I have the call time here.

05 • Cashier: Yes. I'll pass on that detail and your request, without treating the review as approval.

06 • Shopper: I'd like to speak with them directly if possible. I can wait a few minutes.

07 • Cashier: The supervisor can speak with you here after finishing another query.

08 • Shopper: Please keep my receipt nearby. I don't want to explain everything again from the beginning.

09 • Cashier: I'll keep the receipt with it and summarize the date, condition, and your travel explanation.

10 • Shopper: Thank you. I understand the decision hasn't been made; I'd just like the circumstances heard.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 05 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Discussing returns and exchanges at the counter

In this fictional store, an unused shirt with tags and a receipt can be exchanged within thirty days. The shopper bought it ten days ago and wants a larger size. A receipt is present; larger-size stock remains unchecked. Explain eligibility and the stock uncertainty without stating universal return rights.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Shopper: bought the unused tagged shirt ten days ago, have the receipt, and need the next size up.

Second round: The larger size is unavailable. Ask about other stated options rather than invent an exception.

Scenario 2 | Different item, different price

An eligible exchange involves a \$20 shirt. The shopper selects a different \$26 style. The fictional store permits this exchange with a \$6 additional payment. Stock is confirmed.

Role A: Cashier: explain the six-dollar difference before proceeding.

Role B: Shopper: can pay six but initially expects an even exchange.

Possible opening: Isn't an exchange always the same price?

Success checks

- Identify both item prices.
- Explain the difference rather than invent an exchange fee.
- Get the shopper's agreement before proceeding.

Add a complication: The shopper asks whether the six dollars is a fee rather than a price difference.

LESSON 06 / 05 • CONVERSATIONS / 1 OF 3

Received does not mean ready

An associate checks a shopper's order message.

01 • Associate: Could I see the message heading and order reference so I can check its status?

02 • Shopper: It says we received your order, reference R61. I thought I could collect it now.

03 • Associate: That's an acknowledgment, not the collection notification. One item is still being located.

04 • Shopper: I've come across town. Can someone give me a definite update rather than leave me waiting?

05 • Associate: The collection colleague will update you at three, even if the search isn't finished.

06 • Shopper: Does that mean everything will be on the collection shelf by three o'clock?

07 • Associate: I can't promise that. Three is the agreed update time; collection readiness is still unconfirmed.

08 • Shopper: Please don't switch the missing item to a different color just to finish the order.

09 • Associate: I'll pass that on. Your requested variation stays unchanged unless you agree otherwise.

10 • Shopper: Thanks. I'll wait nearby until three and check for the update before returning to the counter.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 06 / 05 • CONVERSATIONS / 2 OF 3

Stockroom search for an empty shelf

An associate helps a shopper whose item is not on display.

01 • Associate: The shelf is empty, but I can check whether this size is in the stockroom.

02 • Shopper: Your screen says two available. Doesn't that mean you can give me one immediately?

03 • Associate: It gives us a stock record to check, not the item's exact present location.

04 • Shopper: Could one be on the sales floor somewhere else, perhaps in the fitting-room returns?

05 • Associate: Possibly. I'll ask the colleague checking that area while I look in the stockroom.

06 • Shopper: Please search for the medium, not just any item from the same product range.

07 • Associate: I have the code for medium navy. I'll keep the size and color together in the request.

08 • Shopper: How long should I stay here before checking with you again about the search?

09 • Associate: I'll come back to this display in five minutes with an update, whether found or not.

10 • Shopper: That works. I'll look nearby, and you can tell me what you've actually located.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 06 / 05 • CONVERSATIONS / 3 OF 3

A reservation has an end time

An associate confirms a shopper's held item.

01 • Associate: The jacket is reserved under your name until six today. Is collection before then possible?

02 • Shopper: I can arrive at five-thirty. Do I need to pay again because you reserved it?

03 • Associate: No payment has been taken for this hold. You'll decide about the purchase at collection.

04 • Shopper: Could I try it on before deciding, or does reserving it commit me to buying it?

05 • Associate: Under today's stated hold arrangement, you can check the fit before deciding to purchase.

06 • Shopper: That's helpful. I might be delayed; should I assume the hold continues after six?

07 • Associate: Please contact us if you're delayed. I can't promise an extension beyond the agreed time.

08 • Shopper: Then I'll aim for five-thirty and call if that changes, rather than arrive after closing.

09 • Associate: The store closes at seven, but remember your item's agreed hold ends at six.

10 • Shopper: Understood. The two times are different; I'll keep the hold deadline in mind.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 06 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Explaining local stock and collection status

A shopper's message acknowledges order R61 but is not a collection notification. One item is still being located. The collection colleague will update the shopper at 3:00, even if unresolved. Do not promise readiness or substitute another variation.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Shopper: have an order acknowledgment and expected immediate pickup; need a truthful status.

Second round: The shopper asks whether choosing another color automatically makes the order ready. Keep substitution and readiness separate.

Scenario 2 | Two customers have the same surname

Two collection orders are labeled Chen. Their references are C41 and C47. The shopper presents C47; only C41 is on the front shelf, while C47 is being checked in back.

Role A: Associate: use the order reference rather than surname alone.

Role B: Shopper: need C47 and are willing to wait for its status.

Possible opening: That bag has my surname. Is it mine?

Success checks

- Confirm C47 as the required reference.
- Do not release C41 because of a matching surname.
- Give an accurate update on the search for C47.

Add a complication: The shopper says the bag's color looks familiar.

LESSON 07 / 05 • CONVERSATIONS / 1 OF 3

A wider checkout without unwanted help

An associate responds to a shopper's access request.

01 • Associate: Lane four's accessible checkout is open and has wider space. Would that work better for you?

02 • Shopper: Yes, this one feels too narrow with my mobility aid. I can carry my bag myself.

03 • Associate: Of course. Would you prefer directions, or would you like someone to walk with you?

04 • Shopper: Directions, please. I can get there, but I don't want to lose my place in line.

05 • Associate: I'll ask the colleague at four to keep your place while we transfer the transaction.

06 • Shopper: Thank you. Is the route past the display wide enough, or should I go another way?

07 • Associate: The clear customer route runs along this side. I'll point out where it joins lane four.

08 • Shopper: I can see it now. Please leave my bag with me while I move over.

09 • Associate: My colleague is ready at four and will pick up your transaction.

10 • Shopper: Good. I'll go across now with my bag. Thank you for arranging that.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 07 / 05 • CONVERSATIONS / 2 OF 3

A price query blocks the lane

A cashier explains a delay without disclosing another shopper's purchase.

01 • Cashier: This checkout lane is waiting for a price check. Lane two can take the next customer.

02 • Shopper: I'm next in this queue. Will moving mean I have to start again behind someone else?

03 • Cashier: My colleague is opening it for the next person here, so you can go directly across.

04 • Shopper: What is the customer ahead buying that takes so long to check at the register?

05 • Cashier: We're waiting for a price check; I can't discuss another shopper's purchase.

06 • Shopper: Fair enough. I have a few fragile items; I'd rather keep them in this basket.

07 • Cashier: You can take the basket with you. My colleague will help with checkout at lane two.

08 • Shopper: Should I wait for an announcement, or can I move there once you point me over?

09 • Cashier: You can move now. Lane two is staffed and ready.

10 • Shopper: Thanks. I'll follow the clear aisle rather than cut through the closed lane beside it.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 07 / 05 • CONVERSATIONS / 3 OF 3

An assistance call with a useful location

An associate requests help for a shopper on the sales floor.

01 • Associate: Assistance call for bedding, please: a customer needs a blue cover from the high shelf.

02 • Colleague: Which item and size do they want? There are several similar packages on that wall.

03 • Associate: It's the queen-size blue cover, code B24, on the top display shelf beside the pillows.

04 • Colleague: I'll come to that location. Have you promised the customer an exact collection time?

05 • Associate: No. I said I was requesting help and would stay here while we wait.

06 • Colleague: Good. Please keep the aisle available; I need room to assess the retrieval properly.

07 • Associate: The customer is waiting by the lower display, and nobody has attempted to climb for it.

08 • Colleague: I'm here now. Could you confirm the selected package with the customer before I begin?

09 • Associate: Yes. They pointed to B24 in queen, not the similar king-size package beside it.

10 • Colleague: I've confirmed that with them. I'll handle the retrieval using the store's equipment and procedures.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 07 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Managing queues and offering practical assistance

A shopper using a mobility aid says the current checkout is too narrow. An accessible checkout is open at lane four. Ask what help they prefer, explain the available route, and ask a colleague to preserve their place; do not touch their belongings or aid without permission.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Shopper: need a wider checkout and want to keep your own bag; prefer directions.

Second round: The next shopper questions why the transaction is moving. Explain briefly without disclosing personal details.

Scenario 2 | The shopper wants a seated pause

A shopper becomes tired in a long checkout queue and asks for a seat, without describing a medical emergency. A customer seat is available beside lane one; the cashier can call them at their turn.

Role A: Associate: offer the stated seat and preserve the shopper's place.

Role B: Shopper: want to keep your basket and hear when your turn arrives.

Possible opening: Could I sit down without losing my place?

Success checks

- Respond to the requested practical help.
- Keep the basket choice with the shopper.
- Confirm how the cashier will call the shopper.

Add a complication: A colleague starts asking personal health questions unrelated to arranging the seat.

LESSON 08 / 05 • CONVERSATIONS / 1 OF 3

A five-dollar difference needs checking

An outgoing cashier gives a shift-change report.

01 • Cashier: The first count is one-seventy-five against an expected one-eighty. The second check hasn't happened yet.

02 • Supervisor: That's a five-dollar cash discrepancy. Have we found an explanation, or does it still need checking?

03 • Cashier: Still unknown. I haven't attributed it to a sale, the till float, or any person.

04 • Supervisor: I'll take the second check through our cash-handling procedure. Is anything else waiting on this shift?

05 • Cashier: A customer price query for item P32 is open. The shelf label still needs confirmation.

06 • Supervisor: I'll take that separately. Please give me the item reference and the customer's stated price.

07 • Cashier: They expected twelve; the screen showed fourteen. No payment was taken while the query remained open.

08 • Supervisor: I've got it. I'll review the cash count and contact the floor colleague about P32.

09 • Cashier: Can you confirm both follow-ups are yours before I leave the counter?

10 • Supervisor: Confirmed. I'll record each result in the shift log rather than combine two unrelated issues.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 08 / 05 • CONVERSATIONS / 2 OF 3

The starting float is not sales revenue

A new cashier asks about a shift report.

01 • Cashier: The drawer started with forty dollars. Is everything in it now counted as sales?

02 • Supervisor: No. The till float is starting cash for change, so it isn't money from today's purchases.

03 • Cashier: I see the forty recorded here. I should keep that amount separate when describing the shift.

04 • Supervisor: Yes. Keep the float separate from sales on this report.

05 • Cashier: There's also a void for a mug. Does that entry mean the mug was returned after payment?

06 • Supervisor: No. This void cancelled the mug entry before the customer paid.

07 • Cashier: Then I'll refer to the recorded event as a void, not assume there was a refund.

08 • Supervisor: Correct. If a report line is unclear, ask about that transaction reference before changing its description.

09 • Cashier: I'll ask about reference V18 now. Its time overlaps with my break, so I didn't handle it.

10 • Supervisor: I'll check that reference with the colleague who did, and we'll leave its explanation open meanwhile.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 08 / 05 • CONVERSATIONS / 3 OF 3

An unfinished call needs a named owner

A cashier passes a callback request to the next shift.

01 • Cashier: A shopper called about receipt R82 and asked whether their exchange review had been completed.

02 • Incoming cashier: Do we have an answer, or am I taking over the task of checking it?

03 • Cashier: You're taking over the check. The supervisor hasn't recorded a decision in the shift log yet.

04 • Incoming cashier: I'll ask the supervisor, then update the customer through the store's usual contact channel.

05 • Cashier: Please don't say the exchange is approved just because the shopper has called twice.

06 • Incoming cashier: I won't. What response time was actually offered during the earlier call this afternoon?

07 • Cashier: They were promised an update by five, including if the review remained unfinished then.

08 • Incoming cashier: I've noted five as the update deadline. Is their preferred contact method already recorded?

09 • Cashier: Yes, in the customer record linked to R82; no need to repeat private details here.

10 • Incoming cashier: I'll handle that callback. You can mark the follow-up assigned to me, not resolved yet.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 08 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Handing over a till and an unfinished query

At shift change, the expected drawer balance is \$180 and the recorded count is \$175. A second check has not occurred, and the cause is unknown. A price query for item P32 also remains open. The incoming supervisor accepts both checks; do not accuse anyone or describe a loss as proved.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: Incoming supervisor: accept the second cash check and item P32 price query as separate tasks.

Second round: Someone blames the prior cashier before the check. Keep the report factual without suggesting an unrecorded cash adjustment.

Scenario 2 | A till transfer and a missing acknowledgment

A cashier transferred a price-query record to the service desk but has no acknowledgment. The customer is waiting at lane two. The desk colleague can accept it now.

Role A: Outgoing cashier: confirm actual acceptance before leaving.

Role B: Service colleague: accept the query for item J18 and tell the customer where to wait.

Possible opening: I sent the query earlier; can you confirm you're handling it?

Success checks

- Distinguish sending from acceptance.
- Name J18 and the waiting location.
- Confirm who will give the next update.

Add a complication: The sender initially treats a sent message as a completed customer response.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and switches roles and repeats the exchange. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All shops, transactions, stock records, policies, and incidents are fictional English practice. This course covers frontline interactions, not retail strategy, merchandising management, financial advice, or universal consumer-law rules. Follow the employer's actual payment, privacy, safety, and returns procedures; refer exceptions and restricted decisions to the responsible staff.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Guided message practice gives four choices with explained feedback. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-28. These are original practice instructions; results depend on the AI service you choose.

Rehearse with an AI colleague

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

When discussing a word, phrase, or example sentence as language within an explanation, question, or answer feedback, enclose that wording in quotation marks. For example: What does "about" mean in "about twenty people"? Use "on" with a named day. Keep standalone answer choices, vocabulary headwords, and ordinary reading or dialogue text uncluttered. Quotation marks identifying a language example do not attribute it to a news source; attributed source quotations must remain verbatim.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Retail Associate and Cashier English

Professional audience: Retail sales associates, cashiers, fitting-room attendants, and shop-floor customer service staff

Scope: All shops, transactions, stock records, policies, and incidents are fictional English practice. This course covers frontline interactions, not retail strategy, merchandising management, financial advice, or universal consumer-law rules. Follow the employer's actual payment, privacy, safety, and returns procedures; refer exceptions and restricted decisions to the responsible staff.

Dialogue 01: The online photograph includes an accessory

Original fictional setting: An associate checks which part of a product image the shopper wants. Fictional final prices are thirty dollars for the bag and eight for the pouch, with no additional charges.

Professional roles: Associate / Shopper

Published dialogue (reference script, not my own performance):

Associate: The photograph shows a bag and pouch. Are you looking for both, or just the bag?

Shopper: Both, if they are sold together. I couldn't tell whether the pouch was part of the pictured product.

Associate: Let's check the description. Product photographs sometimes include accessories sold separately.

Shopper: The description says shoulder bag B72, but the smaller pouch doesn't have a visible label in the picture.

Associate: This product listing identifies the bag only. The pouch has a separate code, P16, on our display here.

Shopper: Then I shouldn't assume the advertised bag price includes the pouch just because they appear together online.

Associate: Correct. Would you like the bag alone, or would you like me to check the pouch's separate price?

Shopper: Please check both prices. I'm choosing a gift and need the total before deciding whether to include it.

Associate: The bag is thirty dollars; the pouch is eight. Both together would be thirty-eight dollars.

Shopper: I'll take the bag alone. Could you make sure the pouch isn't included in the items sent to checkout?

Associate: Certainly. I'll send only bag B72 to checkout and leave the pouch here.

Shopper: Thanks. I'll take the bag on its own and leave the pouch today.

END REFERENCE

TASK: Interactive workplace role-play

1. Use the supplied case or dialogue as the starting situation. Give a two-sentence briefing and offer two relevant professional roles for me to choose from. For a supplied dialogue, use its actual roles. Ask which role I want, then stop and wait. Do not write my replies.
 2. After I choose, identify who you will play and the immediate communication goal. Play the other professional; where a meeting requires a third person, label each of your speakers clearly. Start with one natural workplace turn and wait for my reply. Keep most turns to one to three sentences and ask no more than one question at a time.
 3. Let the exchange develop across six to ten learner turns, or end earlier if I type "feedback". Respond to what I actually say. Include a plausible clarification, disagreement or tradeoff without silently changing the starting facts. Mark any added constraint as a fictional second-round variation. Do not resolve approvals, evidence or commitments that remain uncertain.
 4. Stay in role during the exchange. If my meaning is unclear, ask for clarification naturally. Give a hint only if I ask or cannot proceed. Do not deliver a model conversation in advance.
 5. At the debrief, quote two of my phrases: one successful choice and one worth improving. Check factual accuracy, language, register and whether the next step was clear. Give up to three focused suggestions. Ask me to retry the weakest turn; wait. Only then offer an alternative wording and a harder replay.
- Use voice replies when available. If I prefer selections, offer four plausible spoken replies and explain my choice before continuing. Do not require written compositions.

END REFERENCE

TASK: Extend the conversation library

1. Propose six distinct, common scenarios in this field beyond the supplied case or script. For each, name the setting, two or more professional roles, the communication problem and one useful terminology focus. Include routine coordination, clarification, a complication, disagreement, handoff and follow-up where relevant. Choose scenarios that fit this profession, rather than forcing unsuitable situations into it.
2. Ask me to choose one scenario, or request all six in sequence. Stop and wait. Do not write all the scripts before I choose.
3. For the selected scenario, write an original fictional dialogue of 12-18 substantial speaking turns between two or three professionals. Name each role, establish an actual work problem, and let the exchange progress through questions, clarification, competing constraints and a credible next step or explicitly unresolved issue. Use the occupation's natural nomenclature and register. Avoid an interview between a teacher and a learner, generic small talk, and inserting a glossary definition into every reply. Explain specialist terms outside the dialogue instead.
4. After the script, explain five useful expressions in context, identify two grammar or register choices and ask three questions about the speakers' reasoning. Withhold the answers until I attempt them. Add one role-switch challenge.
5. Before presenting a script, check names, numbers, chronology, roles and terminology for consistency. Label invented facts and acknowledge uncertain specialist usage. If I requested all six, deliver one complete script at a time and wait for "next". Make each scenario materially different.
