

ENGLISH FOR WORK / SEPTEMBER 2026

Customer Success English

Teacher's guide

Teach practical workplace communication with specific cases, clear language targets, and a repeatable feedback process.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For customer success managers, account managers, onboarding specialists, support escalation leads, renewals managers, implementation teams, and post-sale revenue leaders.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

Your course at a glance

Use the lesson numbers to match this document with the website and the other guides.

01 Onboarding and Implementation Expectations

Clarify missing information before responding.

02 Adoption Metrics and Health Scores

Explain a useful distinction in plain English.

03 Support Escalations and Incident Communication

Distinguish completed work from pending work and explain its impact.

04 QBRs and Business Outcomes

Separate observations, assumptions, and conclusions.

05 Renewals and Churn Risk

Make a request with a clear action, purpose, and realistic timing.

06 Expansion and Upsell Ethics

Compare options using the same criteria and state the tradeoff.

07 Product Feedback and Feature Requests

Clarify missing information before responding.

08 Difficult Customers and Boundary Setting

Acknowledge a communication problem and give a corrected message.

Choose your pace

Quick practice: spend 15 minutes reading one case and saying a response. Full lesson: allow 45-60 minutes for language work, conversation, writing, and revision.

Level support

B1 learners can use the frames and a partner. B2 learners can try a response before reading the model. C1 learners can add the harder follow-up and reduce preparation time. These are teaching suggestions, not certified CEFR level ratings.

A 60-minute lesson that works

Prepare the case and the learner pages. Keep the model response hidden until learners have attempted their own. Choose two field terms that are important to understanding the case.

0-5 minutes | Activate experience

Ask learners to name a comparable situation without sharing confidential details. Introduce the communication goal.

5-12 minutes | Read and sort facts

Read the case. Learners identify confirmed facts, unknowns, the audience, and the immediate communication need.

12-22 minutes | Notice and practice language

Explain the workshop pattern. Work through the vocabulary and editing example, then discuss both language checks and the reasons behind the choices.

22-35 minutes | Speak and respond

Give two minutes of preparation. Run the partner exchange, switch roles, and add the follow-up challenge. Observe whether the listener can act on the message.

35-47 minutes | Write for a real reader

Learners write the short message using only case facts. Partners check clarity, certainty, and the requested next step.

47-55 minutes | Compare and revise

Reveal the model. Discuss alternative acceptable wording. Give one meaning correction and one language correction, then repeat.

55-60 minutes | Retrieve and transfer

Close the materials. Learners recall two expressions and identify one communication habit to use in another situation.

Adapt the session

For 45 minutes, shorten the first conversation and assign writing for follow-up. For 90 minutes, add 15 minutes for a second case and 15 minutes for the final challenge. More time should produce more meaningful practice, not longer explanations.

LESSON 01 / FACILITATOR NOTES

Onboarding and Implementation Expectations

Clarify missing information before responding.

CASE

A customer expects to go live next Friday, but data migration responsibilities and training dates are still unassigned.

Teach this move

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

Vocabulary to check: onboarding, go-live, implementation, customer owner.

Model response

What needs to be complete for you to consider the launch ready? Let's confirm the migration owner and training dates before treating next Friday as a committed go-live date.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: what this means.

Second-round challenge

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Language-check answers

1. A - Could you confirm when the review starts? The embedded question uses subject then verb: the review starts.
2. C - Has the report been approved, or is it ready for review? This question distinguishes two meanings of 'ready' that affect the next action.

LESSON 02 / FACILITATOR NOTES

Adoption Metrics and Health Scores

Explain a useful distinction in plain English.

CASE

An account has many logins but little use of the workflow it purchased the product to improve.

Teach this move

Start with the reader's question. Explain one unfamiliar term with familiar words, then give a relevant example or contrast. Check understanding without asking only 'Do you understand?'.

Vocabulary to check: adoption, health score, stakeholder engagement, usage.

Model response

Logins show activity, but they do not tell us whether the intended workflow is being adopted. Let's review the relevant usage and ask the customer about the outcome they are trying to achieve.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revised sentence names the action in familiar words. Specialist vocabulary is useful when it adds precision, but repeating abstract nouns can hide the meaning.

Second-round challenge

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Language-check answers

1. C - The backlog is the work still waiting to be completed. This gives the meaning in familiar words.
2. B - How would you describe the next step in your own words? An open request lets the listener show their understanding.

LESSON 03 / FACILITATOR NOTES

Support Escalations and Incident Communication

Distinguish completed work from pending work and explain its impact.

CASE

A customer issue has a verified workaround but no confirmed permanent-fix date. A draft update promises a fix tomorrow.

Teach this move

Lead with the current state, then the important change or open item. Use completed-action language only for completed work. Add a next update point when it is known; do not invent a date to make the message sound complete.

Vocabulary to check: escalation, severity, workaround, SLA.

Model response

We have a verified workaround, but the permanent-fix date is not confirmed. I'll explain the workaround and state the next update time without promising an unverified resolution date.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision gives observable progress. A positive label alone does not tell the reader what is complete or still needed.

Second-round challenge

The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Language-check answers

1. B - The team has completed the review. 'Has completed' states that the action is finished.
2. A - Delivery is planned for Friday; the carrier has not confirmed it. This explicitly labels the date as planned and identifies the missing confirmation.

LESSON 04 / FACILITATOR NOTES

QBRs and Business Outcomes

Separate observations, assumptions, and conclusions.

CASE

A business review claims a large return on investment using estimated time savings that the customer has not validated.

Teach this move

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

Vocabulary to check: QBR, business outcome, ROI, executive sponsor.

Model response

The return estimate depends on unverified time-saving assumptions. Let's review those assumptions with the customer and label the result as an estimate rather than a demonstrated outcome.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Second-round challenge

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Language-check answers

1. A - The change may have contributed to the delay. 'May have contributed' presents a possibility without claiming the cause is established.
2. C - In this pilot, the observed result was ... This locates the finding in the setting actually studied.

LESSON 05 / FACILITATOR NOTES

Renewals and Churn Risk

Make a request with a clear action, purpose, and realistic timing.

CASE

An account renews in six weeks. The main contact has changed, and the team has not confirmed current priorities.

Teach this move

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Vocabulary to check: renewal, churn risk, commercial term, value gap.

Model response

Could we arrange a review with the current decision makers to confirm priorities and unresolved issues? That will help us understand the renewal discussion before assuming the previous plan still fits.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

Second-round challenge

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Language-check answers

1. C - Send it no later than Thursday. 'By' sets the latest point, while 'after' refers to a later time.
2. B - Could you confirm the document version needed for the review? The requested action and information are explicit.

LESSON 06 / FACILITATOR NOTES

Expansion and Upsell Ethics

Compare options using the same criteria and state the tradeoff.

CASE

A customer is considering more licenses while many existing users have not completed onboarding.

Teach this move

Use the same time period, scope, and measurement basis for both options. Explain a difference with 'whereas' or 'while'. State what improves and what is given up; do not hide the weaker side of a recommendation.

Vocabulary to check: upsell, expansion, use case, readiness.

Model response

Additional licenses may be useful, but adoption of the current ones is still incomplete. Let's compare expansion with improving onboarding against the customer's immediate goals before recommending the next purchase.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. 'Better' already has comparative meaning, so it does not need 'more'. Naming the criterion and tradeoff makes the comparison useful.

Second-round challenge

Your listener focuses only on the lowest price or fastest date. Explain one other relevant comparison criterion.

Language-check answers

1. B - Option A is faster, whereas option B costs less. 'Whereas' marks a contrast between two options.
2. A - An increase of one percentage point. Subtracting 6% from 7% gives one percentage point. The relative increase is about 16.7%.

LESSON 07 / FACILITATOR NOTES

Product Feedback and Feature Requests

Clarify missing information before responding.

CASE

A customer asks for a specific feature, but the product team needs to understand the underlying workflow and current obstacle.

Teach this move

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

Vocabulary to check: feature request, roadmap, workaround, product feedback.

Model response

What task are you trying to complete, and what prevents you from doing it today? I'll record the workflow and impact so the product team can evaluate the request without treating a proposed feature as the only solution.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: what this means.

Second-round challenge

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Language-check answers

1. A - Could you confirm when the review starts? The embedded question uses subject then verb: the review starts.
2. C - Has the report been approved, or is it ready for review? This question distinguishes two meanings of 'ready' that affect the next action.

LESSON 08 / FACILITATOR NOTES

Difficult Customers and Boundary Setting

Acknowledge a communication problem and give a corrected message.

CASE

A frustrated customer says a feature was promised for this month. The record contains an estimate, not a confirmed commitment.

Teach this move

Name what was unclear or wrong, acknowledge its effect, and correct it. A brief apology can help, followed by a practical next step. Avoid explaining away the other person's reaction or promising an outcome you cannot control.

Vocabulary to check: boundary, executive escalation, commitment, expectation setting.

Model response

I understand why you expected it this month. The earlier wording did not clearly distinguish an estimate from a commitment. I'll clarify the current status and discuss the available options with the responsible team.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision takes responsibility for the message without blaming the listener. It identifies what needs to be corrected.

Second-round challenge

The listener remains disappointed after the correction. Acknowledge the impact and restate the available next step calmly.

Language-check answers

1. C - I'm sorry my earlier wording was unclear. This acknowledges the speaker's contribution to the problem.
2. B - The corrected date and the current confirmation status. A repair needs usable corrected information, including any uncertainty.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.
