

**ENGLISH FOR WORK / SEPTEMBER 2026**

# Energy and Utilities English

## Teacher's guide

Teach practical workplace communication with specific cases, clear language targets, and a repeatable feedback process.

### **PRACTICE THAT TRANSFERS TO WORK**

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For utility operations staff, energy project managers, grid planners, field supervisors, regulatory affairs teams, renewable-energy developers, customer operations teams, and infrastructure leaders.

These cases practice communication. Actual equipment, construction, and safety work follows approved procedures and authorized specialist decisions.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

# Your course at a glance

Use the lesson numbers to match this document with the website and the other guides.

## 01 Grid Reliability and Outage Response

Distinguish completed work from pending work and explain its impact.

## 02 Safety, Field Work, and Switching

Clarify missing information before responding.

## 03 Regulatory Affairs and Rate Cases

Explain a useful distinction in plain English.

## 04 Renewables Integration and Interconnection

Separate observations, assumptions, and conclusions.

## 05 Asset Management and Maintenance

Compare options using the same criteria and state the tradeoff.

## 06 Emergency Preparedness and Storm Response

Give a handoff that the receiving person can confirm.

## 07 Customer Programs and Energy Efficiency

Separate observations, assumptions, and conclusions.

## 08 Executive Reliability and Investment Updates

Explain a useful distinction in plain English.

## Choose your pace

Quick practice: spend 15 minutes reading one case and saying a response. Full lesson: allow 45-60 minutes for language work, conversation, writing, and revision.

## Level support

B1 learners can use the frames and a partner. B2 learners can try a response before reading the model. C1 learners can add the harder follow-up and reduce preparation time. These are teaching suggestions, not certified CEFR level ratings.

# A 60-minute lesson that works

Prepare the case and the learner pages. Keep the model response hidden until learners have attempted their own. Choose two field terms that are important to understanding the case.

## **0-5 minutes | Activate experience**

Ask learners to name a comparable situation without sharing confidential details. Introduce the communication goal.

## **5-12 minutes | Read and sort facts**

Read the case. Learners identify confirmed facts, unknowns, the audience, and the immediate communication need.

## **12-22 minutes | Notice and practice language**

Explain the workshop pattern. Work through the vocabulary and editing example, then discuss both language checks and the reasons behind the choices.

## **22-35 minutes | Speak and respond**

Give two minutes of preparation. Run the partner exchange, switch roles, and add the follow-up challenge. Observe whether the listener can act on the message.

## **35-47 minutes | Write for a real reader**

Learners write the short message using only case facts. Partners check clarity, certainty, and the requested next step.

## **47-55 minutes | Compare and revise**

Reveal the model. Discuss alternative acceptable wording. Give one meaning correction and one language correction, then repeat.

## **55-60 minutes | Retrieve and transfer**

Close the materials. Learners recall two expressions and identify one communication habit to use in another situation.

## **Adapt the session**

For 45 minutes, shorten the first conversation and assign writing for follow-up. For 90 minutes, add 15 minutes for a second case and 15 minutes for the final challenge. More time should produce more meaningful practice, not longer explanations.

**LESSON 01 / FACILITATOR NOTES**

# Grid Reliability and Outage Response

Distinguish completed work from pending work and explain its impact.

**CASE**

An outage update lists an affected area but the restoration estimate is still under assessment. A draft message gives a firm time.

## Teach this move

Lead with the current state, then the important change or open item. Use completed-action language only for completed work. Add a next update point when it is known; do not invent a date to make the message sound complete.

Vocabulary to check: reliability, feeder, restoration, critical customer.

## Model response

The affected area is identified, but restoration timing is still being assessed. I'll state what is confirmed and when customers should expect the next update rather than promise an unverified time.

## Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision gives observable progress. A positive label alone does not tell the reader what is complete or still needed.

## Second-round challenge

The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

## Language-check answers

1. C - The team has completed the review. 'Has completed' states that the action is finished.
2. B - Delivery is planned for Friday; the carrier has not confirmed it. This explicitly labels the date as planned and identifies the missing confirmation.

**LESSON 02 / FACILITATOR NOTES**

# Safety, Field Work, and Switching

Clarify missing information before responding.

**CASE**

During a language simulation, two documents use different equipment identifiers for a field task. Only authorized procedures govern the actual work.

## Teach this move

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

Vocabulary to check: switching order, lockout, clearance, energize.

## Model response

The equipment identifiers do not match. Please have the authorized team resolve the discrepancy using the approved procedure. I will repeat the identifiers clearly to confirm that we are discussing the same equipment.

## Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: what this means.

## Second-round challenge

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

## Language-check answers

1. B - Could you confirm when the review starts? The embedded question uses subject then verb: the review starts.
2. A - Has the report been approved, or is it ready for review? This question distinguishes two meanings of 'ready' that affect the next action.

**LESSON 03 / FACILITATOR NOTES**

# Regulatory Affairs and Rate Cases

Explain a useful distinction in plain English.

**CASE**

A customer sees a proposed rate adjustment and assumes it is already in effect. The notice describes a proposal under review.

## Teach this move

Start with the reader's question. Explain one unfamiliar term with familiar words, then give a relevant example or contrast. Check understanding without asking only 'Do you understand?'.

Vocabulary to check: rate case, tariff, prudence, customer impact.

## Model response

The notice describes a proposed adjustment, not a change already in effect. Let me show you the stated review process and where to find the current applicable tariff information.

## Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revised sentence names the action in familiar words. Specialist vocabulary is useful when it adds precision, but repeating abstract nouns can hide the meaning.

## Second-round challenge

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

## Language-check answers

1. A - The backlog is the work still waiting to be completed. This gives the meaning in familiar words.
2. C - How would you describe the next step in your own words? An open request lets the listener show their understanding.

**LESSON 04 / FACILITATOR NOTES**

# Renewables Integration and Interconnection

Separate observations, assumptions, and conclusions.

**CASE**

A project team describes an interconnection application as an approved connection. Technical and administrative reviews are still open.

## Teach this move

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

Vocabulary to check: interconnection, capacity, curtailment, queue.

## Model response

The application has been submitted, but the reviews are still open. I'll describe the current stage and remaining steps without implying that connection has already been authorized.

## Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

## Second-round challenge

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

## Language-check answers

1. C - The change may have contributed to the delay. 'May have contributed' presents a possibility without claiming the cause is established.
2. B - In this pilot, the observed result was ... This locates the finding in the setting actually studied.

## LESSON 05 / FACILITATOR NOTES

# Asset Management and Maintenance

Compare options using the same criteria and state the tradeoff.

**CASE**

Two asset options have different purchase prices and maintenance needs. A budget slide compares only the purchase price.

**Teach this move**

Use the same time period, scope, and measurement basis for both options. Explain a difference with 'whereas' or 'while'. State what improves and what is given up; do not hide the weaker side of a recommendation.

Vocabulary to check: asset management, condition assessment, lifecycle cost, failure rate.

**Model response**

The initial price is only one part of the comparison. Let's show the assumed maintenance, expected service period, and other relevant lifecycle costs so the decision reflects the full basis of the estimate.

**Listen for, then coach**

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. 'Better' already has comparative meaning, so it does not need 'more'. Naming the criterion and tradeoff makes the comparison useful.

**Second-round challenge**

Your listener focuses only on the lowest price or fastest date. Explain one other relevant comparison criterion.

**Language-check answers**

1. B - Option A is faster, whereas option B costs less. 'Whereas' marks a contrast between two options.
2. A - An increase of one percentage point. Subtracting 6% from 7% gives one percentage point. The relative increase is about 16.7%.

## LESSON 06 / FACILITATOR NOTES

# Emergency Preparedness and Storm Response

Give a handoff that the receiving person can confirm.

**CASE**

A storm-response coordination shift has several requested resources but only some confirmed. The next coordinator needs the distinction.

**Teach this move**

State the current situation, relevant background, open task, and receiving role. Ask for acknowledgment or repeat-back of the critical item. Sending a message and transferring responsibility are not always the same thing.

Vocabulary to check: mutual aid, crew staging, restoration priority, emergency response.

**Model response**

These resources are confirmed; the others are still requested. I've separated their status and contact points in the handoff. Please confirm receipt and update the record when an assignment changes.

**Listen for, then coach**

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revised sentence asks for an identifiable receiving team instead of leaving responsibility with an unspecified 'someone'.

**Second-round challenge**

The intended recipient cannot take ownership. Keep the status clear and identify the need for an authorized reassignment.

**Language-check answers**

1. A - Please confirm who will complete the outstanding check. It asks for an identifiable person or team responsible for the task.
2. C - So the result is pending and your team will follow up; is that correct? This repeats the status and responsibility and invites correction.

## LESSON 07 / FACILITATOR NOTES

# Customer Programs and Energy Efficiency

Separate observations, assumptions, and conclusions.

**CASE**

An efficiency program reports lower energy use after installation, but weather and occupancy also changed.

**Teach this move**

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

Vocabulary to check: incentive, baseline, demand response, measurement and verification.

**Model response**

Energy use fell after installation, but weather and occupancy changed too. I'll describe the measurement basis and remaining uncertainty before attributing the entire reduction to the program.

**Listen for, then coach**

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

**Second-round challenge**

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

**Language-check answers**

1. C - The change may have contributed to the delay. 'May have contributed' presents a possibility without claiming the cause is established.
2. B - In this pilot, the observed result was ... This locates the finding in the setting actually studied.

## LESSON 08 / FACILITATOR NOTES

# Executive Reliability and Investment Updates

Explain a useful distinction in plain English.

**CASE**

A reliability presentation lists SAIDI and SAIFI without explanations. Community representatives need to understand the distinction.

**Teach this move**

Start with the reader's question. Explain one unfamiliar term with familiar words, then give a relevant example or contrast. Check understanding without asking only 'Do you understand?'.

Vocabulary to check: SAIDI, SAIFI, vegetation management, capital plan.

**Model response**

One measure summarizes average interruption duration and the other interruption frequency for the defined customer group. I'll explain both, state the reporting basis, and show what changed over the period.

**Listen for, then coach**

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revised sentence names the action in familiar words. Specialist vocabulary is useful when it adds precision, but repeating abstract nouns can hide the meaning.

**Second-round challenge**

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

**Language-check answers**

1. B - The backlog is the work still waiting to be completed. This gives the meaning in familiar words.
2. A - How would you describe the next step in your own words? An open request lets the listener show their understanding.

# Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

## Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

## Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

## Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

## Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

## Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

## Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

## Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

# Use the language responsibly

These cases practice communication. Actual equipment, construction, and safety work follows approved procedures and authorized specialist decisions.

## Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

## Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

## Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.
