

ENGLISH FOR WORK / SEPTEMBER 2026

Supply Chain and Logistics English

Teacher's guide

Teach practical workplace communication with specific cases, clear language targets, and a repeatable feedback process.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For supply-chain managers, planners, buyers, logistics coordinators, warehouse leaders, procurement teams, customs staff, and operations managers.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

Your course at a glance

Use the lesson numbers to match this document with the website and the other guides.

01 Demand Planning and Forecast Bias

Separate observations, assumptions, and conclusions.

02 Procurement and Supplier Performance

Make a request with a clear action, purpose, and realistic timing.

03 Inventory, Safety Stock, and Service Levels

Explain a useful distinction in plain English.

04 Warehousing and Fulfillment

Distinguish completed work from pending work and explain its impact.

05 Freight, Routing, and Carrier Delays

Separate observations, assumptions, and conclusions.

06 Customs, Trade Compliance, and Documentation

Clarify missing information before responding.

07 Supply Risk and Business Continuity

Compare options using the same criteria and state the tradeoff.

08 Executive S&OP Decisions

Include relevant voices and clarify the decision process.

Choose your pace

Quick practice: spend 15 minutes reading one case and saying a response. Full lesson: allow 45-60 minutes for language work, conversation, writing, and revision.

Level support

B1 learners can use the frames and a partner. B2 learners can try a response before reading the model. C1 learners can add the harder follow-up and reduce preparation time. These are teaching suggestions, not certified CEFR level ratings.

A 60-minute lesson that works

Prepare the case and the learner pages. Keep the model response hidden until learners have attempted their own. Choose two field terms that are important to understanding the case.

0-5 minutes | Activate experience

Ask learners to name a comparable situation without sharing confidential details. Introduce the communication goal.

5-12 minutes | Read and sort facts

Read the case. Learners identify confirmed facts, unknowns, the audience, and the immediate communication need.

12-22 minutes | Notice and practice language

Explain the workshop pattern. Work through the vocabulary and editing example, then discuss both language checks and the reasons behind the choices.

22-35 minutes | Speak and respond

Give two minutes of preparation. Run the partner exchange, switch roles, and add the follow-up challenge. Observe whether the listener can act on the message.

35-47 minutes | Write for a real reader

Learners write the short message using only case facts. Partners check clarity, certainty, and the requested next step.

47-55 minutes | Compare and revise

Reveal the model. Discuss alternative acceptable wording. Give one meaning correction and one language correction, then repeat.

55-60 minutes | Retrieve and transfer

Close the materials. Learners recall two expressions and identify one communication habit to use in another situation.

Adapt the session

For 45 minutes, shorten the first conversation and assign writing for follow-up. For 90 minutes, add 15 minutes for a second case and 15 minutes for the final challenge. More time should produce more meaningful practice, not longer explanations.

LESSON 01 / FACILITATOR NOTES

Demand Planning and Forecast Bias

Separate observations, assumptions, and conclusions.

CASE

A forecast exceeds actual demand for three months. Sales expects a new promotion to improve demand but has no order evidence yet.

Teach this move

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

Vocabulary to check: forecast, forecast bias, demand signal, S&OP.

Model response

The forecast has been above actual demand for three months. The promotion may change that pattern, but it is still an assumption. I'll separate confirmed orders from the promotional estimate.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Second-round challenge

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Language-check answers

1. A - The change may have contributed to the delay. 'May have contributed' presents a possibility without claiming the cause is established.
2. C - In this pilot, the observed result was ... This locates the finding in the setting actually studied.

LESSON 02 / FACILITATOR NOTES

Procurement and Supplier Performance

Make a request with a clear action, purpose, and realistic timing.

CASE

A supplier acknowledges an order but gives no shipping date. The planning team needs a date to update its schedule.

Teach this move

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Vocabulary to check: purchase order, lead time, OTIF, allocation.

Model response

Could you confirm the planned ship date and any quantity that will remain outstanding? Please distinguish a confirmed commitment from a provisional estimate so we can update the schedule accurately.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

Second-round challenge

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Language-check answers

1. C - Send it no later than Thursday. 'By' sets the latest point, while 'after' refers to a later time.
2. B - Could you confirm the document version needed for the review? The requested action and information are explicit.

LESSON 03 / FACILITATOR NOTES

Inventory, Safety Stock, and Service Levels

Explain a useful distinction in plain English.

CASE

A warehouse has high total inventory but repeated stockouts of two important items. A manager asks why the headline total looks healthy.

Teach this move

Start with the reader's question. Explain one unfamiliar term with familiar words, then give a relevant example or contrast. Check understanding without asking only 'Do you understand?'.

Vocabulary to check: safety stock, stockout, service level, SKU.

Model response

The total inventory value hides differences between items. We have stock in some products but shortages in two others. Let's review availability by item and expected demand.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revised sentence names the action in familiar words. Specialist vocabulary is useful when it adds precision, but repeating abstract nouns can hide the meaning.

Second-round challenge

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Language-check answers

1. B - The backlog is the work still waiting to be completed. This gives the meaning in familiar words.
2. A - How would you describe the next step in your own words? An open request lets the listener show their understanding.

LESSON 04 / FACILITATOR NOTES

Warehousing and Fulfillment

Distinguish completed work from pending work and explain its impact.

CASE

A fulfillment team starts with 300 open orders and ships 220. Fifty new orders arrive during the shift.

Teach this move

Lead with the current state, then the important change or open item. Use completed-action language only for completed work. Add a next update point when it is known; do not invent a date to make the message sound complete.

Vocabulary to check: pick rate, slotting, cycle count, backlog.

Model response

We shipped 220 orders, and 50 new orders arrived. The backlog is now 130 orders. I'll include both completed work and incoming demand so the change is clear.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision gives observable progress. A positive label alone does not tell the reader what is complete or still needed.

Second-round challenge

The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Language-check answers

1. A - The team has completed the review. 'Has completed' states that the action is finished.
2. C - Delivery is planned for Friday; the carrier has not confirmed it. This explicitly labels the date as planned and identifies the missing confirmation.

LESSON 05 / FACILITATOR NOTES

Freight, Routing, and Carrier Delays

Separate observations, assumptions, and conclusions.

CASE

A carrier estimates delivery on Wednesday but has not confirmed departure. A customer asks for a guaranteed arrival time.

Teach this move

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

Vocabulary to check: incoterms, carrier, expedite, ETA.

Model response

Wednesday is the carrier's current estimate, not a confirmed arrival. Departure is still pending. I'll send the next update when the carrier confirms the shipment status.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Second-round challenge

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Language-check answers

1. C - The change may have contributed to the delay. 'May have contributed' presents a possibility without claiming the cause is established.
2. B - In this pilot, the observed result was ... This locates the finding in the setting actually studied.

LESSON 06 / FACILITATOR NOTES

Customs, Trade Compliance, and Documentation

Clarify missing information before responding.

CASE

A shipment file contains different product descriptions on the invoice and packing list. The broker requests clarification.

Teach this move

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

Vocabulary to check: HS code, country of origin, commercial invoice, broker.

Model response

The descriptions do not match across the documents. Could the responsible team confirm the correct product details and provide consistent records for the broker's review?

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: what this means.

Second-round challenge

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Language-check answers

1. B - Could you confirm when the review starts? The embedded question uses subject then verb: the review starts.
2. A - Has the report been approved, or is it ready for review? This question distinguishes two meanings of 'ready' that affect the next action.

LESSON 07 / FACILITATOR NOTES

Supply Risk and Business Continuity

Compare options using the same criteria and state the tradeoff.

CASE

One supplier has a shorter lead time; a second has available backup capacity. The team is considering supply continuity options.

Teach this move

Use the same time period, scope, and measurement basis for both options. Explain a difference with 'whereas' or 'while'. State what improves and what is given up; do not hide the weaker side of a recommendation.

Vocabulary to check: business continuity, dual sourcing, allocation, constraint.

Model response

The first supplier offers speed, while the second may provide backup capacity. Let's compare availability, qualification status, and switching constraints before treating either option as a complete continuity solution.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. 'Better' already has comparative meaning, so it does not need 'more'. Naming the criterion and tradeoff makes the comparison useful.

Second-round challenge

Your listener focuses only on the lowest price or fastest date. Explain one other relevant comparison criterion.

Language-check answers

1. A - Option A is faster, whereas option B costs less. 'Whereas' marks a contrast between two options.
2. C - An increase of one percentage point. Subtracting 6% from 7% gives one percentage point. The relative increase is about 16.7%.

LESSON 08 / FACILITATOR NOTES

Executive S&OP Decisions

Include relevant voices and clarify the decision process.

CASE

Sales and operations propose different monthly plans. The meeting has ten minutes left and no agreed assumption about the promotion.

Teach this move

Summarize the issue neutrally, invite missing perspectives, and distinguish discussion from decision. State who can decide and record any unresolved question. Do not assume silence means agreement.

Vocabulary to check: S&OP, consensus plan, scenario, owner.

Model response

The unresolved assumption is promotional demand. Could we compare the two plans using the same assumption, then record the chosen plan, its owner, and the condition that would trigger a review?

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revised question gives people a way to raise a concern. Silence can have several meanings, especially in unfamiliar or unequal-power situations.

Second-round challenge

A participant interrupts or the meeting is running out of time. Protect a turn to speak and close with an accurate decision record.

Language-check answers

1. C - We haven't heard from the remote team yet; what is your view? It invites participation without interpreting silence as consent.
2. B - Approval is pending; the sponsor will review the two options. This distinguishes discussion from approval and identifies the next reviewer.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.
