

ENGLISH FOR WORK / SEPTEMBER 2026

Telecommunications English

Teacher's guide

Teach practical workplace communication with specific cases, clear language targets, and a repeatable feedback process.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For network operations staff, telecom engineers, field technicians, customer operations teams, product managers, regulatory staff, and telecom project leaders.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Your course at a glance

Use the lesson numbers to match this document with the website and the other guides.

01 Network Operations and Outage Bridges

Distinguish completed work from pending work and explain its impact.

02 Fiber Deployment and Construction Coordination

Give a handoff that the receiving person can confirm.

03 Wireless Capacity and Coverage

Explain a useful distinction in plain English.

04 Provisioning and Service Activation

Clarify missing information before responding.

05 Field Service and Dispatch

Make a request with a clear action, purpose, and realistic timing.

06 Regulatory and Emergency Services

Separate observations, assumptions, and conclusions.

07 Customer Churn and Service Recovery

Acknowledge a communication problem and give a corrected message.

08 Vendor and Equipment Lifecycle

Compare options using the same criteria and state the tradeoff.

Choose your pace

Quick practice: spend 15 minutes reading one case and saying a response. Full lesson: allow 45-60 minutes for language work, conversation, writing, and revision.

Level support

B1 learners can use the frames and a partner. B2 learners can try a response before reading the model. C1 learners can add the harder follow-up and reduce preparation time. These are teaching suggestions, not certified CEFR level ratings.

A 60-minute lesson that works

Prepare the case and the learner pages. Keep the model response hidden until learners have attempted their own. Choose two field terms that are important to understanding the case.

0-5 minutes | Activate experience

Ask learners to name a comparable situation without sharing confidential details. Introduce the communication goal.

5-12 minutes | Read and sort facts

Read the case. Learners identify confirmed facts, unknowns, the audience, and the immediate communication need.

12-22 minutes | Notice and practice language

Explain the workshop pattern. Work through the vocabulary and editing example, then discuss both language checks and the reasons behind the choices.

22-35 minutes | Speak and respond

Give two minutes of preparation. Run the partner exchange, switch roles, and add the follow-up challenge. Observe whether the listener can act on the message.

35-47 minutes | Write for a real reader

Learners write the short message using only case facts. Partners check clarity, certainty, and the requested next step.

47-55 minutes | Compare and revise

Reveal the model. Discuss alternative acceptable wording. Give one meaning correction and one language correction, then repeat.

55-60 minutes | Retrieve and transfer

Close the materials. Learners recall two expressions and identify one communication habit to use in another situation.

Adapt the session

For 45 minutes, shorten the first conversation and assign writing for follow-up. For 90 minutes, add 15 minutes for a second case and 15 minutes for the final challenge. More time should produce more meaningful practice, not longer explanations.

LESSON 01 / FACILITATOR NOTES

Network Operations and Outage Bridges

Distinguish completed work from pending work and explain its impact.

CASE

A network incident affects one service area. Fault isolation is ongoing, and no restoration estimate has been verified.

Teach this move

Lead with the current state, then the important change or open item. Use completed-action language only for completed work. Add a next update point when it is known; do not invent a date to make the message sound complete.

Vocabulary to check: NOC, outage, fault isolation, ETA.

Model response

The affected area is identified, and fault isolation is continuing. We do not yet have a verified restoration estimate. I'll state the next update time and revise the message when confirmed information is available.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision gives observable progress. A positive label alone does not tell the reader what is complete or still needed.

Second-round challenge

The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Language-check answers

1. C - The team has completed the review. 'Has completed' states that the action is finished.
2. B - Delivery is planned for Friday; the carrier has not confirmed it. This explicitly labels the date as planned and identifies the missing confirmation.

LESSON 02 / FACILITATOR NOTES

Fiber Deployment and Construction Coordination

Give a handoff that the receiving person can confirm.

CASE

A fiber installation team has completed physical work but an inspection is still pending. The next team assumes the route is ready.

Teach this move

State the current situation, relevant background, open task, and receiving role. Ask for acknowledgment or repeat-back of the critical item. Sending a message and transferring responsibility are not always the same thing.

Vocabulary to check: fiber, make-ready, splicing, permit.

Model response

Physical installation is complete; the inspection remains pending. Please confirm the approved status before scheduling the next activity, and record the outstanding item in the handoff.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revised sentence asks for an identifiable receiving team instead of leaving responsibility with an unspecified 'someone'.

Second-round challenge

The intended recipient cannot take ownership. Keep the status clear and identify the need for an authorized reassignment.

Language-check answers

1. B - Please confirm who will complete the outstanding check. It asks for an identifiable person or team responsible for the task.
2. A - So the result is pending and your team will follow up; is that correct? This repeats the status and responsibility and invites correction.

LESSON 03 / FACILITATOR NOTES

Wireless Capacity and Coverage

Explain a useful distinction in plain English.

CASE

Customers report slow service in a busy area even though the coverage map shows signal availability.

Teach this move

Start with the reader's question. Explain one unfamiliar term with familiar words, then give a relevant example or contrast. Check understanding without asking only 'Do you understand?'.

Vocabulary to check: spectrum, coverage, capacity, congestion.

Model response

Coverage and capacity describe different issues. A signal may be available while busy-period demand affects performance. I'll explain that distinction and report the observed conditions for investigation.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revised sentence names the action in familiar words. Specialist vocabulary is useful when it adds precision, but repeating abstract nouns can hide the meaning.

Second-round challenge

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Language-check answers

1. A - The backlog is the work still waiting to be completed. This gives the meaning in familiar words.
2. C - How would you describe the next step in your own words? An open request lets the listener show their understanding.

LESSON 04 / FACILITATOR NOTES

Provisioning and Service Activation

Clarify missing information before responding.

CASE

A service-activation request has a customer address but no circuit reference or requested activation date.

Teach this move

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

Vocabulary to check: provisioning, CPE, circuit, service activation.

Model response

Could you confirm the circuit reference and target activation date? We need to match the request to the correct service and distinguish the requested date from a confirmed appointment.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: what this means.

Second-round challenge

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Language-check answers

1. C - Could you confirm when the review starts? The embedded question uses subject then verb: the review starts.
2. B - Has the report been approved, or is it ready for review? This question distinguishes two meanings of 'ready' that affect the next action.

LESSON 05 / FACILITATOR NOTES

Field Service and Dispatch

Make a request with a clear action, purpose, and realistic timing.

CASE

A field technician receives a ticket that says only "internet bad." The customer is available for a clarification call.

Teach this move

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Vocabulary to check: truck roll, signal level, dispatch, inside wiring.

Model response

Could you describe what happens, when it occurs, and which devices are affected? Those details will help the field team prepare for the visit and avoid assumptions about the cause.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

Second-round challenge

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Language-check answers

1. B - Send it no later than Thursday. 'By' sets the latest point, while 'after' refers to a later time.
2. A - Could you confirm the document version needed for the review? The requested action and information are explicit.

LESSON 06 / FACILITATOR NOTES

Regulatory and Emergency Services

Separate observations, assumptions, and conclusions.

CASE

A customer notice describes a regulatory requirement without citing the current approved wording. The responsible team has not reviewed it.

Teach this move

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

Vocabulary to check: E911, lawful intercept, regulatory filing, customer notice.

Model response

The notice needs review against the current applicable requirement and approved language. I'll identify the disputed wording and route it to the responsible team before release.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Second-round challenge

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Language-check answers

1. A - The change may have contributed to the delay. 'May have contributed' presents a possibility without claiming the cause is established.
2. C - In this pilot, the observed result was ... This locates the finding in the setting actually studied.

LESSON 07 / FACILITATOR NOTES

Customer Churn and Service Recovery

Acknowledge a communication problem and give a corrected message.

CASE

A customer asks for an update after repeated service interruptions. The investigation has no confirmed root cause.

Teach this move

Name what was unclear or wrong, acknowledge its effect, and correct it. A brief apology can help, followed by a practical next step. Avoid explaining away the other person's reaction or promising an outcome you cannot control.

Vocabulary to check: churn, SLA credit, root cause, service assurance.

Model response

I'm sorry the interruptions have continued. The cause is still under investigation. I'll summarize the verified service history and confirm the next update rather than repeat an unverified explanation.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision takes responsibility for the message without blaming the listener. It identifies what needs to be corrected.

Second-round challenge

The listener remains disappointed after the correction. Acknowledge the impact and restate the available next step calmly.

Language-check answers

1. C - I'm sorry my earlier wording was unclear. This acknowledges the speaker's contribution to the problem.
2. B - The corrected date and the current confirmation status. A repair needs usable corrected information, including any uncertainty.

LESSON 08 / FACILITATOR NOTES

Vendor and Equipment Lifecycle

Compare options using the same criteria and state the tradeoff.

CASE

One equipment proposal has a lower purchase price but an earlier end-of-support date. The replacement plan extends beyond that date.

Teach this move

Use the same time period, scope, and measurement basis for both options. Explain a difference with 'whereas' or 'while'. State what improves and what is given up; do not hide the weaker side of a recommendation.

Vocabulary to check: end of support, interoperability, spares, capital plan.

Model response

The lower price comes with a shorter support period. Let's compare the expected service life, support needs, and replacement timing before making the investment recommendation.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. 'Better' already has comparative meaning, so it does not need 'more'. Naming the criterion and tradeoff makes the comparison useful.

Second-round challenge

Your listener focuses only on the lowest price or fastest date. Explain one other relevant comparison criterion.

Language-check answers

1. B - Option A is faster, whereas option B costs less. 'Whereas' marks a contrast between two options.
2. A - An increase of one percentage point. Subtracting 6% from 7% gives one percentage point. The relative increase is about 16.7%.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.
