

Success, succeed, successful, successfully

Teaching guide

Use the correct member of a word family.

Understand the distinction

Success is a noun: The event was a success. Succeed is a verb: We succeeded. Successful is an adjective: The event was successful. Successfully is an adverb: We completed it successfully.

Use succeed in + -ing for achieving an action: succeed in finding a solution. Not every noun use needs an article: hard work can contribute to success. Describe what the success means instead of relying only on a positive label.

Compare the patterns

NOUN

The event was a success.

A success names a successful event.

VERB

We succeeded in finding a room.

In is followed by an -ing form.

ADVERB

We booked the room successfully.

Successfully modifies booked.

Read each example. Explain what the highlighted choice means in context. Then cover the example and say a similar sentence.

Check your understanding

Write before looking at the answers. The guide gives a model answer and explains the choice. Other wording can be correct.

1. Complete: The project was ____ . (success / successful)

2. Complete: We succeeded in ____ the problem. (solve)

3. Choose the adverb: success / successful / successfully

Use it in your own life

Describe an achievement using two members of this word family.

Self-check

Does your sentence express your intended meaning? Does its form follow the relevant pattern? Can a reader understand the context?

Try again

After checking the explanation, revise your sentence. Say it aloud or use it in a short conversation.

Answers and explanation

1. successful

An adjective describes the project.

2. solving

Use -ing after in.

3. successfully

The adverb can describe how an action was completed.

One possible response

We successfully organized the meeting. It was a success because everyone could join.

This is a model, not the only acceptable answer. Assess meaning, grammar, and context together.

A practical teaching sequence

1. Notice (2 minutes)

Ask learners to explain the differences between the comparison examples before reading the rules. Use their answers to identify the point that needs attention.

2. Explain and check (4 minutes)

Read the short explanation together. Keep its qualifications: a common pattern is not necessarily a rule for every context. Ask learners to give a counterexample where the lesson mentions an exception.

3. Apply (5 minutes)

Describe an achievement using two members of this word family.

Have learners work alone, then compare with a partner. Ask the partner to restate the intended meaning before suggesting a correction.

4. Review (3 minutes)

Use the answer explanations to review the three checks. Accept natural alternatives that preserve the intended meaning. Ask each learner to revise one sentence and identify the change.

Extension

Change the person, time, place, or purpose in a comparison example. Ask whether the original pattern still fits and why. Revisit one example in the next lesson.

Feedback criteria

Meaning: the message is understandable. Form: the target pattern fits the context. Transfer: the learner can use it in a fresh example. This short activity is not a proficiency certification.
