

Banking Operations English

Instructor guide for advanced ESL learners working in banking operations

Audience: bank operations staff, branch managers, loan operations teams, KYC/AML analysts, fraud operations staff, payment operations teams, compliance staff, and banking leaders

Focus: A banking operations English curriculum for KYC, AML, loan operations, payment exceptions, fraud, customer complaints, audits, operational risk, and regulatory communication.

Designed for advanced ESL learners who already use professional English and need industry-specific terminology, realistic meetings, role-play pressure, careful pushback, and polished workplace outputs.

Teaching stance: this is language and workplace-communication training, not legal, medical, financial, safety, or regulatory advice. Instructors should connect every scenario to the learner's current company policies, local rules, and approved procedures.

Purpose and Course Logic

A banking operations English curriculum for KYC, AML, loan operations, payment exceptions, fraud, customer complaints, audits, operational risk, and regulatory communication.

Core language challenge

Advanced learners do not only need vocabulary. They need the ability to ask which standard applies, who owns the decision, what evidence is sufficient, what risk is being accepted, and how to disagree without sounding vague, defensive, or reckless.

Each module trains a realistic workplace pressure point with role-specific terms, decision language, pushback practice, and bounded decision activities learners can apply to their own work.

Course objectives

- Use banking operations terminology accurately in meetings, written updates, handoffs, escalations, reviews, and client or stakeholder conversations.
- Turn vague requests into specific questions about evidence, owner, deadline, constraint, risk, and decision rights.
- Push back on unsafe, unsupported, noncompliant, unrealistic, or poorly scoped proposals while preserving professional trust.
- Handle realistic dialogues from the field, including conflict, uncertainty, documentation gaps, customer or stakeholder pressure, and cross-functional disagreement.
- Select language that produces concise workplace outputs: briefing notes, escalation updates, meeting scripts, risk memos, decision records, and follow-up messages.

Instructor Module Plans

Module 1. Account Opening and KYC (90 minutes)

Ask for required information without sounding suspicious or intrusive.

Learners should be able to

- Use these terms accurately: KYC, CIP, beneficial owner, risk rating.
- Explain the workplace tension: KYC, customer identification, beneficial ownership, and risk rating must be complete.
- Respond professionally when a stakeholder says: Open the account to preserve the relationship.
- Select the evidence, tradeoff, owner, and decision required for a KYC explanation script.

Customized scenario

Workplace pressure

A customer resists providing beneficial ownership information.

Open the account to preserve the relationship.

KYC, customer identification, beneficial ownership, and risk rating must be complete.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.

- Decision artifact check: select the facts, caveat, owner, and next action that belong in a KYC explanation script.

Module 2. AML Monitoring and Suspicious Activity (90 minutes)

Escalate unusual activity carefully.

Learners should be able to

- Use these terms accurately: AML, structuring, SAR, tipping off.
- Explain the workplace tension: Tipping-off risk, investigation, documentation, and SAR process apply.
- Respond professionally when a stakeholder says: Tell the customer the bank is investigating them.
- Select the evidence, tradeoff, owner, and decision required for a AML escalation note.

Customized scenario

Workplace pressure

A series of cash deposits appears structured.

Tell the customer the bank is investigating them.

Tipping-off risk, investigation, documentation, and SAR process apply.

Classroom sequence

- Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
- Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
- Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
- Decision artifact check: select the facts, caveat, owner, and next action that belong in a AML escalation note.

Module 3. Loan Operations and Documentation (90 minutes)

Coordinate closing conditions and exceptions.

Learners should be able to

- Use these terms accurately: loan boarding, collateral, condition precedent, exception.
- Explain the workplace tension: Conditions precedent, collateral, authority, and exception approval must be reviewed.
- Respond professionally when a stakeholder says: Close now and collect documents later.
- Select the evidence, tradeoff, owner, and decision required for a loan closing exception memo.

Customized scenario

Workplace pressure

A commercial loan is scheduled to close but documents are incomplete.

Close now and collect documents later.

Conditions precedent, collateral, authority, and exception approval must be reviewed.

Classroom sequence

- Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
- Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.

3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a loan closing exception memo.

Module 4. Payment Operations and Exceptions (90 minutes)

Communicate payment delays with precise status language.

Learners should be able to

- Use these terms accurately: wire transfer, ACH, sanctions screening, exception queue.
- Explain the workplace tension: Screening, investigation status, release authority, and customer messaging must be controlled.
- Respond professionally when a stakeholder says: Tell the customer it is delayed for compliance.
- Select the evidence, tradeoff, owner, and decision required for a payment hold update.

Customized scenario

Workplace pressure

A wire transfer is held for sanctions screening.

Tell the customer it is delayed for compliance.

Screening, investigation status, release authority, and customer messaging must be controlled.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a payment hold update.

Module 5. Fraud Operations and Customer Escalation (90 minutes)

Balance customer empathy with fraud controls.

Learners should be able to

- Use these terms accurately: fraud claim, provisional credit, chargeback, dispute.
- Explain the workplace tension: Provisional credit, investigation timelines, evidence, and regulatory rights matter.
- Respond professionally when a stakeholder says: Refund it to calm the customer.
- Select the evidence, tradeoff, owner, and decision required for a fraud dispute script.

Customized scenario

Workplace pressure

A customer insists a disputed debit should be refunded immediately.

Refund it to calm the customer.

Provisional credit, investigation timelines, evidence, and regulatory rights matter.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.

2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a fraud dispute script.

Module 6. Operational Risk and Controls (90 minutes)

Discuss control failures without hiding exposure.

Learners should be able to

- Use these terms accurately: operational risk, control, reconciliation, remediation.
- Explain the workplace tension: Impact assessment, root cause, control redesign, and evidence are required.
- Respond professionally when a stakeholder says: Mark it remediated after one correction.
- Select the evidence, tradeoff, owner, and decision required for a control-gap remediation.

Customized scenario

Workplace pressure

A reconciliation control was missed for two months.

Mark it remediated after one correction.

Impact assessment, root cause, control redesign, and evidence are required.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a control-gap remediation.

Module 7. Audit and Regulatory Exams (90 minutes)

Answer exam questions with evidence and ownership.

Learners should be able to

- Use these terms accurately: examiner, audit evidence, finding, management response.
- Explain the workplace tension: Documentation, sample evidence, timing, owner, and corrective action must be ready.
- Respond professionally when a stakeholder says: Say the process exists.
- Select the evidence, tradeoff, owner, and decision required for a exam response tracker.

Customized scenario

Workplace pressure

An examiner requests proof of complaint handling.

Say the process exists.

Documentation, sample evidence, timing, owner, and corrective action must be ready.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a exam response tracker.

Module 8. Customer Complaints and Fair Treatment (90 minutes)

Resolve complaints without unauthorized promises.

Learners should be able to

- Use these terms accurately: complaint, fee disclosure, error resolution, fair treatment.
- Explain the workplace tension: Fee schedule, disclosures, error resolution, fairness, and escalation path need review.
- Respond professionally when a stakeholder says: Waive all fees immediately.
- Select the evidence, tradeoff, owner, and decision required for a complaint resolution summary.

Customized scenario

Workplace pressure

A customer alleges unfair fees.

Waive all fees immediately.

Fee schedule, disclosures, error resolution, fairness, and escalation path need review.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a complaint resolution summary.

Nomenclature and Jargon

These are classroom working definitions. Learners should adapt wording to their organization's policies, systems, and local regulatory environment.

Account Opening and KYC

Term	Working meaning	Collocations	Contrast and workplace line
KYC	Know-your-customer process used to verify a customer's identity, ownership, and risk profile.	complete KYC; refresh KYC records	Contrast: KYC verifies identity and risk information; it is not satisfied by a customer name alone. Example: The onboarding team cannot activate the account until KYC checks are complete.
CIP	In banking operations, CIP is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to ask for required information without sounding suspicious or intrusive.	clarify CIP; document CIP	Contrast: CIP should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify CIP and the evidence that supports it.

Term	Working meaning	Collocations	Contrast and workplace line
beneficial owner	Natural person who ultimately owns or controls an entity or receives its economic benefit.	clarify beneficial owner; document beneficial owner	Contrast: beneficial owner should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify beneficial owner and the evidence that supports it.
risk rating	In banking operations, risk rating is a condition or event that can create harm, loss, noncompliance, delay, or unacceptable performance. Use it when teams need to ask for required information without sounding suspicious or intrusive.	assess risk rating; mitigate risk rating	Contrast: risk rating identifies a possible or current exposure; it is not the same as accepting that exposure. Example: We need to assess risk rating, name the owner, and agree on the trigger for escalation.

AML Monitoring and Suspicious Activity

Term	Working meaning	Collocations	Contrast and workplace line
AML	Anti-money laundering controls used to detect, investigate, and report suspicious financial activity.	perform AML screening; escalate an AML alert	Contrast: AML is a financial-crime control framework, not a conclusion that a customer has committed wrongdoing. Example: The analyst will escalate the AML alert after reviewing the transaction pattern.
structuring	In banking operations, structuring is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to escalate unusual activity carefully.	clarify structuring; document structuring	Contrast: structuring should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify structuring and the evidence that supports it.
SAR	In banking operations, SAR is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to escalate unusual activity carefully.	clarify SAR; document SAR	Contrast: SAR should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify SAR and the evidence that supports it.
tipping off	In banking operations, tipping off is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to escalate unusual activity carefully.	clarify tipping off; document tipping off	Contrast: tipping off should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify tipping off and the evidence that supports it.

Loan Operations and Documentation

Term	Working meaning	Collocations	Contrast and workplace line
loan boarding	In banking operations, loan boarding is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to coordinate closing conditions and exceptions.	clarify loan boarding; document loan boarding	Contrast: loan boarding should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify loan boarding and the evidence that supports it.
collateral	In banking operations, collateral is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to coordinate closing conditions and exceptions.	clarify collateral; document collateral	Contrast: collateral should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify collateral and the evidence that supports it.

Term	Working meaning	Collocations	Contrast and workplace line
condition precedent	In banking operations, condition precedent is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to coordinate closing conditions and exceptions.	clarify condition precedent; document condition precedent	Contrast: condition precedent should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify condition precedent and the evidence that supports it.
exception	In banking operations, exception is a condition or event that can create harm, loss, noncompliance, delay, or unacceptable performance. Use it when teams need to coordinate closing conditions and exceptions.	clarify exception; document exception	Contrast: exception should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify exception and the evidence that supports it.

Payment Operations and Exceptions

Term	Working meaning	Collocations	Contrast and workplace line
wire transfer	Electronic movement of funds between financial institutions, usually with irreversible settlement characteristics once released.	clarify wire transfer; document wire transfer	Contrast: wire transfer should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify wire transfer and the evidence that supports it.
ACH	US electronic bank-transfer network used for direct deposits, bill payments, and account-to-account transfers.	clarify ACH; document ACH	Contrast: ACH should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify ACH and the evidence that supports it.
sanctions screening	In banking operations, sanctions screening is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to communicate payment delays with precise status language.	clarify sanctions screening; document sanctions screening	Contrast: sanctions screening should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify sanctions screening and the evidence that supports it.
exception queue	In banking operations, exception queue is a condition or event that can create harm, loss, noncompliance, delay, or unacceptable performance. Use it when teams need to communicate payment delays with precise status language.	clarify exception queue; document exception queue	Contrast: exception queue should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify exception queue and the evidence that supports it.

Fraud Operations and Customer Escalation

Term	Working meaning	Collocations	Contrast and workplace line
fraud claim	In banking operations, fraud claim is a communication or market-facing element that must match evidence, audience, channel, and approval boundaries. Use it when teams need to balance customer empathy with fraud controls.	clarify fraud claim; document fraud claim	Contrast: fraud claim should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify fraud claim and the evidence that supports it.
provisional credit	In banking operations, provisional credit is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to balance customer empathy with fraud controls.	clarify provisional credit; document provisional credit	Contrast: provisional credit should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify provisional credit and the evidence that supports it.

Term	Working meaning	Collocations	Contrast and workplace line
chargeback	In banking operations, chargeback is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to balance customer empathy with fraud controls.	clarify chargeback; document chargeback	Contrast: chargeback should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify chargeback and the evidence that supports it.
dispute	In banking operations, dispute is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to balance customer empathy with fraud controls.	clarify dispute; document dispute	Contrast: dispute should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify dispute and the evidence that supports it.

Operational Risk and Controls

Term	Working meaning	Collocations	Contrast and workplace line
operational risk	In banking operations, operational risk is a measurable indicator used to quantify performance, exposure, capacity, quality, or change over time. Use it when teams need to discuss control failures without hiding exposure.	track operational risk; explain a change in operational risk	Contrast: operational risk measures a result or condition; it does not, by itself, prove the cause. Example: Before we act, let us track operational risk by segment and explain what changed.
control	A process, approval, check, or technical safeguard designed to reduce risk.	clarify control; document control	Contrast: control should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify control and the evidence that supports it.
reconciliation	In banking operations, reconciliation is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to discuss control failures without hiding exposure.	clarify reconciliation; document reconciliation	Contrast: reconciliation should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify reconciliation and the evidence that supports it.
remediation	In banking operations, remediation is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to discuss control failures without hiding exposure.	clarify remediation; document remediation	Contrast: remediation should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify remediation and the evidence that supports it.

Audit and Regulatory Exams

Term	Working meaning	Collocations	Contrast and workplace line
examiner	In banking operations, examiner is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to answer exam questions with evidence and ownership.	clarify examiner; document examiner	Contrast: examiner should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify examiner and the evidence that supports it.
audit evidence	In banking operations, audit evidence is a structured examination of evidence, process, or results used to reach a defensible conclusion. Use it when teams need to answer exam questions with evidence and ownership.	conduct a audit evidence; document the audit evidence	Contrast: audit evidence is a structured examination of evidence; it is not a conclusion reached before the evidence is checked. Example: The team will conduct a audit evidence before it recommends a corrective action.

Term	Working meaning	Collocations	Contrast and workplace line
finding	In banking operations, finding is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to answer exam questions with evidence and ownership.	clarify finding; document finding	Contrast: finding should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify finding and the evidence that supports it.
management response	In banking operations, management response is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to answer exam questions with evidence and ownership.	clarify management response; document management response	Contrast: management response should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify management response and the evidence that supports it.

Customer Complaints and Fair Treatment

Term	Working meaning	Collocations	Contrast and workplace line
complaint	In banking operations, complaint is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to resolve complaints without unauthorized promises.	clarify complaint; document complaint	Contrast: complaint should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify complaint and the evidence that supports it.
fee disclosure	In banking operations, fee disclosure is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to resolve complaints without unauthorized promises.	clarify fee disclosure; document fee disclosure	Contrast: fee disclosure should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify fee disclosure and the evidence that supports it.
error resolution	In banking operations, error resolution is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to resolve complaints without unauthorized promises.	clarify error resolution; document error resolution	Contrast: error resolution should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify error resolution and the evidence that supports it.
fair treatment	In banking operations, fair treatment is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to resolve complaints without unauthorized promises.	clarify fair treatment; document fair treatment	Contrast: fair treatment should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify fair treatment and the evidence that supports it.

Industry-Specific Meeting Moves

Situation	Useful language
Account Opening and KYC	Before we commit, I want to confirm KYC, CIP, the owner, and the evidence behind the decision. If kyc, customer identification, beneficial ownership, and risk rating must be complete., I recommend we document the risk and agree on the next step.
AML Monitoring and Suspicious Activity	Before we commit, I want to confirm AML, structuring, the owner, and the evidence behind the decision. If tipping-off risk, investigation, documentation, and sar process apply., I recommend we document the risk and agree on the next step.
Loan Operations and Documentation	Before we commit, I want to confirm loan boarding, collateral, the owner, and the evidence behind the decision. If conditions precedent, collateral, authority, and exception approval must be reviewed., I recommend we document the risk and agree on the next step.

Situation	Useful language
Payment Operations and Exceptions	Before we commit, I want to confirm wire transfer, ACH, the owner, and the evidence behind the decision. If screening, investigation status, release authority, and customer messaging must be controlled., I recommend we document the risk and agree on the next step.
Fraud Operations and Customer Escalation	Before we commit, I want to confirm fraud claim, provisional credit, the owner, and the evidence behind the decision. If provisional credit, investigation timelines, evidence, and regulatory rights matter., I recommend we document the risk and agree on the next step.
Operational Risk and Controls	Before we commit, I want to confirm operational risk, control, the owner, and the evidence behind the decision. If impact assessment, root cause, control redesign, and evidence are required., I recommend we document the risk and agree on the next step.
Audit and Regulatory Exams	Before we commit, I want to confirm examiner, audit evidence, the owner, and the evidence behind the decision. If documentation, sample evidence, timing, owner, and corrective action must be ready., I recommend we document the risk and agree on the next step.
Customer Complaints and Fair Treatment	Before we commit, I want to confirm complaint, fee disclosure, the owner, and the evidence behind the decision. If fee schedule, disclosures, error resolution, fairness, and escalation path need review., I recommend we document the risk and agree on the next step.

High-pressure pushback frames

- I understand the urgency. The risk is that we move faster than the evidence or process supports.
- I am not blocking the goal. I am naming the condition we need before the decision is safe and credible.
- If we accept this risk, we should name the owner, document the assumption, and define the trigger for escalation.
- That may be possible, but not under the current scope, timeline, or approval path.
- Let's separate what we know, what we assume, and what still needs confirmation.

Assessment and Coaching

Performance rubric

Skill	Developing	Proficient	Strong
Terminology	Recognizes terms but uses them loosely.	Uses field terms accurately in context.	Defines terms, connects them to evidence, and explains decision impact.
Pushback	Disagrees vaguely or avoids disagreement.	Names concern with evidence and next step.	Balances urgency, relationship, risk, owner, and decision rights.
Scenario judgment	Focuses on one stakeholder's preference.	Identifies constraint, risk, and process.	Guides the group toward a documented, realistic decision.
Decision communication	Selects language without linking it to the decision.	Chooses language that names facts, owner, and next step.	Distinguishes evidence, tradeoff, authority, and escalation in a decision-ready response.

Source orientation

- Bank policies, KYC/AML procedures, and regulator guidance.
- Payment rules and sanctions-screening procedures.
- Audit, complaint, and operational-risk frameworks.
- The learner's own company policies, SOPs, contracts, systems, templates, and approved communication standards.
