

Healthcare Administration English Dialogue Lab

Realistic field-specific dialogues, role-play variations, and observer checklists

Audience: hospital administrators, clinic managers, practice administrators, care coordinators, patient-experience leaders, revenue-cycle staff, operations managers, and healthcare-adjacent professionals

Focus: A challenging professional English curriculum for healthcare administration teams who need precise language for access, patient flow, revenue cycle, quality, compliance, staffing, service recovery, care coordination, and executive reporting.

Designed for advanced ESL learners who already use professional English and need industry-specific terminology, realistic meetings, role-play pressure, careful pushback, and polished workplace outputs.

Teaching stance: this is language and workplace-communication training, not legal, medical, financial, safety, or regulatory advice. Instructors should connect every scenario to the learner's current company policies, local rules, and approved procedures.

Dialogue Practice Method

Read each exchange once for meaning, once for tone, and once for decision structure. Then complete the missing language by selecting one of four options and check the rationale at the end.

1. Patient Access, Scheduling, and Referrals

Setting

A clinic is losing referrals because patients wait too long for first appointments.

Speaker	Line
Practice director	Open more appointment slots immediately.
Scheduling lead	Provider capacity, eligibility checks, referral completeness, and no-show risk are unclear.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm referral, eligibility, the owner, and the evidence standard before we commit.
Practice director	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short access improvement memo. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: referral, eligibility.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects eligibility.

Option	Phrase
A	operating constraint
B	decision owner
C	eligibility
D	referral

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Open more appointment slots immediately.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	I understand the urgency. I need to verify referral and eligibility against the stated constraint before I recommend the next step.
B	decision owner
C	We should act now and resolve referral after the result is visible.

Option	Phrase
D	A access improvement memo is unnecessary; verbal assurance should be enough.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A clinic is losing referrals because patients wait too long for first appointments. - what should happen next?

Option	Phrase
A	operating constraint
B	Review the stated constraint with the accountable owner, then prepare the access improvement memo with the evidence, tradeoff, and requested decision.
C	evidence threshold
D	approval path

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

2. Revenue Cycle, Coding, and Denials

Setting

Denials have increased after a payer policy change.

Speaker	Line
Revenue-cycle manager	Tell billing to fix the claims faster.
Clinic manager	The root cause may involve documentation, coding, authorization, or payer rules.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm claim, coding, the owner, and the evidence standard before we commit.
Revenue-cycle manager	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short denial root-cause brief. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: claim, coding.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects coding.

Option	Phrase
A	clean claim
B	claim
C	coding
D	denial

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Tell billing to fix the claims faster.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	evidence threshold
B	I understand the urgency. I need to verify claim and coding against the stated constraint before I recommend the next step.
C	A denial root-cause brief is unnecessary; verbal assurance should be enough.
D	I disagree, but I cannot name the boundary or the decision the group needs to make.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - Denials have increased after a payer policy change. - what should happen next?

Option	Phrase
A	Review the stated constraint with the accountable owner, then prepare the denial root-cause brief with the evidence, tradeoff, and requested decision.
B	Accept the request immediately because the stakeholder has already expressed urgency.
C	Send every available detail to senior leaders without identifying the decision they need to make.
D	Wait for the problem to become visible before assigning an owner or evidence source.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

3. Patient Flow, Capacity, and Staffing

Setting

Emergency department boarding is delaying inpatient admissions.

Speaker	Line
Hospital operations lead	Move patients upstairs faster.
Nurse manager	Bed availability, discharge timing, acuity, transport, and nursing coverage all interact.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm census, bed management, the owner, and the evidence standard before we commit.

Speaker	Line
Hospital operations lead	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short capacity escalation update. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: census, bed management.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects bed management.

Option	Phrase
A	bed management
B	throughput
C	staffing ratio
D	census

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Move patients upstairs faster.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	decision owner
B	We should act now and resolve census after the result is visible.
C	I understand the urgency. I need to verify census and bed management against the stated constraint before I recommend the next step.
D	operating constraint

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - Emergency department boarding is delaying inpatient admissions. - what should happen next?

Option	Phrase
A	evidence threshold
B	approval path
C	operating constraint
D	Review the stated constraint with the accountable owner, then prepare the capacity escalation update with the evidence, tradeoff, and requested decision.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

4. Quality, Safety, and Accreditation

Setting

A wrong-patient near miss occurred during registration.

Speaker	Line
Quality director	Treat it as a training issue and move on.
Registration supervisor	Patient safety, process reliability, and documentation require a structured review.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm near miss, accreditation, the owner, and the evidence standard before we commit.
Quality director	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short quality event summary. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: near miss, accreditation.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects accreditation.

Option	Phrase
A	near miss
B	audit trail
C	corrective action
D	evidence threshold

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Treat it as a training issue and move on.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	evidence threshold
B	approval path
C	I understand the urgency. I need to verify near miss and accreditation against the stated constraint before I recommend the next step.
D	I disagree, but I cannot name the boundary or the decision the group needs to make.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A wrong-patient near miss occurred during registration. - what should happen next?

Option	Phrase
A	Wait for the problem to become visible before assigning an owner or evidence source.
B	evidence threshold
C	approval path
D	Review the stated constraint with the accountable owner, then prepare the quality event summary with the evidence, tradeoff, and requested decision.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

5. HIPAA, Privacy, and Information Governance

Setting

A manager wants patient lists emailed to a vendor for outreach.

Speaker	Line
Operations manager	Send the spreadsheet today.
Privacy officer	Minimum necessary use, vendor agreements, and secure transmission must be confirmed.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm HIPAA, protected health information, the owner, and the evidence standard before we commit.
Operations manager	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short privacy-safe vendor response. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: HIPAA, protected health information.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects protected health information.

Option	Phrase
A	minimum necessary
B	business associate
C	evidence threshold

Option	Phrase
D	HIPAA

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Send the spreadsheet today.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	I understand the urgency. I need to verify HIPAA and protected health information against the stated constraint before I recommend the next step.
B	We should act now and resolve HIPAA after the result is visible.
C	A privacy-safe vendor response is unnecessary; verbal assurance should be enough.
D	I disagree, but I cannot name the boundary or the decision the group needs to make.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A manager wants patient lists emailed to a vendor for outreach. - what should happen next?

Option	Phrase
A	Accept the request immediately because the stakeholder has already expressed urgency.
B	Send every available detail to senior leaders without identifying the decision they need to make.
C	Wait for the problem to become visible before assigning an owner or evidence source.
D	Review the stated constraint with the accountable owner, then prepare the privacy-safe vendor response with the evidence, tradeoff, and requested decision.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

6. Patient Experience and Service Recovery

Setting

A family complains about poor communication during discharge.

Speaker	Line
Patient-experience lead	Apologize and promise it will never happen again.
Unit manager	The organization needs empathy, review, realistic commitment, and documented follow-up.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm grievance, service recovery, the owner, and the evidence standard before we commit.
Patient-experience lead	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short service recovery script. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: grievance, service recovery.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects service recovery.

Option	Phrase
A	grievance
B	service recovery
C	HCAHPS
D	patient experience

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Apologize and promise it will never happen again.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	evidence threshold
B	approval path
C	I understand the urgency. I need to verify grievance and service recovery against the stated constraint before I recommend the next step.
D	I disagree, but I cannot name the boundary or the decision the group needs to make.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A family complains about poor communication during discharge. - what should happen next?

Option	Phrase
A	decision owner
B	Review the stated constraint with the accountable owner, then prepare the service recovery script with the evidence, tradeoff, and requested decision.
C	approval path
D	operating constraint

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

7. Population Health and Care Coordination

Setting

A payer flags high readmissions for heart-failure patients.

Speaker	Line
Population health lead	Call every patient and tell them to comply.
Care coordinator	Social needs, discharge instructions, medication access, and follow-up timing affect outcomes.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm care gap, readmission, the owner, and the evidence standard before we commit.
Population health lead	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short care coordination plan. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: care gap, readmission.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice**1. Complete the field language**

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects readmission.

Option	Phrase
A	social determinants
B	care gap
C	readmission
D	discharge planning

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Call every patient and tell them to comply.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	decision owner
B	We should act now and resolve care gap after the result is visible.
C	I understand the urgency. I need to verify care gap and readmission against the stated constraint before I recommend the next step.
D	operating constraint

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A payer flags high readmissions for heart-failure patients. - what should happen next?

Option	Phrase
A	Send every available detail to senior leaders without identifying the decision they need to make.
B	Review the stated constraint with the accountable owner, then prepare the care coordination plan with the evidence, tradeoff, and requested decision.
C	decision owner
D	Accept the request immediately because the stakeholder has already expressed urgency.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

8. Executive Dashboards and Board Updates

Setting

The board asks why wait times improved but patient satisfaction fell.

Speaker	Line
Chief operating officer	Show more charts.
Service-line manager	Metrics need interpretation, tradeoffs, assumptions, and action owners.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm dashboard, KPI, the owner, and the evidence standard before we commit.
Chief operating officer	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short board-ready operations update. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: dashboard, KPI.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects KPI.

Option	Phrase
A	decision owner
B	KPI
C	dashboard
D	operating constraint

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Show more charts.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	I understand the urgency. I need to verify dashboard and KPI against the stated constraint before I recommend the next step.
B	We should act now and resolve dashboard after the result is visible.
C	A board-ready operations update is unnecessary; verbal assurance should be enough.
D	I disagree, but I cannot name the boundary or the decision the group needs to make.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - The board asks why wait times improved but patient satisfaction fell. - what should happen next?

Option	Phrase
A	decision owner
B	Accept the request immediately because the stakeholder has already expressed urgency.
C	Send every available detail to senior leaders without identifying the decision they need to make.
D	Review the stated constraint with the accountable owner, then prepare the board-ready operations update with the evidence, tradeoff, and requested decision.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

Answer Key and Rationale

Check each stage after completing the practice sequence. The rationale explains the decision skill the strongest response demonstrates.

Patient Access, Scheduling, and Referrals - 1. Complete the field language

Correct answer	Why it fits
D. referral	'referral' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Patient Access, Scheduling, and Referrals - 2. Choose the strongest professional response

Correct answer	Why it fits
A. I understand the urgency. I need to verify referral and eligibility against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Patient Access, Scheduling, and Referrals - 3. Select the next decision move

Correct answer	Why it fits
B. Review the stated constraint with the accountable owner, then prepare the access improvement memo with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Revenue Cycle, Coding, and Denials - 1. Complete the field language

Correct answer	Why it fits
B. claim	'claim' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Revenue Cycle, Coding, and Denials - 2. Choose the strongest professional response

Correct answer	Why it fits
B. I understand the urgency. I need to verify claim and coding against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Revenue Cycle, Coding, and Denials - 3. Select the next decision move

Correct answer	Why it fits
A. Review the stated constraint with the accountable owner, then prepare the denial root-cause brief with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Patient Flow, Capacity, and Staffing - 1. Complete the field language

Correct answer	Why it fits
D. census	'census' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Patient Flow, Capacity, and Staffing - 2. Choose the strongest professional response

Correct answer	Why it fits
C. I understand the urgency. I need to verify census and bed management against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Patient Flow, Capacity, and Staffing - 3. Select the next decision move

Correct answer	Why it fits
D. Review the stated constraint with the accountable owner, then prepare the capacity escalation update with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Quality, Safety, and Accreditation - 1. Complete the field language

Correct answer	Why it fits
A. near miss	'near miss' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Quality, Safety, and Accreditation - 2. Choose the strongest professional response

Correct answer	Why it fits
C. I understand the urgency. I need to verify near miss and accreditation against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Quality, Safety, and Accreditation - 3. Select the next decision move

Correct answer	Why it fits
D. Review the stated constraint with the accountable owner, then prepare the quality event summary with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

HIPAA, Privacy, and Information Governance - 1. Complete the field language

Correct answer	Why it fits
D. HIPAA	'HIPAA' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

HIPAA, Privacy, and Information Governance - 2. Choose the strongest professional response

Correct answer	Why it fits
A. I understand the urgency. I need to verify HIPAA and protected health information against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

HIPAA, Privacy, and Information Governance - 3. Select the next decision move

Correct answer	Why it fits
D. Review the stated constraint with the accountable owner, then prepare the privacy-safe vendor response with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Patient Experience and Service Recovery - 1. Complete the field language

Correct answer	Why it fits
A. grievance	'grievance' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Patient Experience and Service Recovery - 2. Choose the strongest professional response

Correct answer	Why it fits
C. I understand the urgency. I need to verify grievance and service recovery against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Patient Experience and Service Recovery - 3. Select the next decision move

Correct answer	Why it fits
B. Review the stated constraint with the accountable owner, then prepare the service recovery script with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Population Health and Care Coordination - 1. Complete the field language

Correct answer	Why it fits
B. care gap	'care gap' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Population Health and Care Coordination - 2. Choose the strongest professional response

Correct answer	Why it fits
C. I understand the urgency. I need to verify care gap and readmission against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Population Health and Care Coordination - 3. Select the next decision move

Correct answer	Why it fits
B. Review the stated constraint with the accountable owner, then prepare the care coordination plan with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Executive Dashboards and Board Updates - 1. Complete the field language

Correct answer	Why it fits
C. dashboard	'dashboard' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Executive Dashboards and Board Updates - 2. Choose the strongest professional response

Correct answer	Why it fits
A. I understand the urgency. I need to verify dashboard and KPI against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Executive Dashboards and Board Updates - 3. Select the next decision move

Correct answer	Why it fits
D. Review the stated constraint with the accountable owner, then prepare the board-ready operations update with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.
