

Insurance English

Instructor guide for advanced ESL learners working in insurance

Audience: underwriters, claims adjusters, brokers, risk managers, actuarial analysts, policy-service teams, compliance staff, and insurance operations leaders

Focus: An insurance English curriculum for underwriting, claims, policy language, coverage disputes, actuarial assumptions, broker communication, fraud concerns, compliance, and customer escalation.

Designed for advanced ESL learners who already use professional English and need industry-specific terminology, realistic meetings, role-play pressure, careful pushback, and polished workplace outputs.

Teaching stance: this is language and workplace-communication training, not legal, medical, financial, safety, or regulatory advice. Instructors should connect every scenario to the learner's current company policies, local rules, and approved procedures.

Purpose and Course Logic

An insurance English curriculum for underwriting, claims, policy language, coverage disputes, actuarial assumptions, broker communication, fraud concerns, compliance, and customer escalation.

Core language challenge

Advanced learners do not only need vocabulary. They need the ability to ask which standard applies, who owns the decision, what evidence is sufficient, what risk is being accepted, and how to disagree without sounding vague, defensive, or reckless.

Each module trains a realistic workplace pressure point with role-specific terms, decision language, pushback practice, and bounded decision activities learners can apply to their own work.

Course objectives

- Use insurance terminology accurately in meetings, written updates, handoffs, escalations, reviews, and client or stakeholder conversations.
- Turn vague requests into specific questions about evidence, owner, deadline, constraint, risk, and decision rights.
- Push back on unsafe, unsupported, noncompliant, unrealistic, or poorly scoped proposals while preserving professional trust.
- Handle realistic dialogues from the field, including conflict, uncertainty, documentation gaps, customer or stakeholder pressure, and cross-functional disagreement.
- Select language that produces concise workplace outputs: briefing notes, escalation updates, meeting scripts, risk memos, decision records, and follow-up messages.

Instructor Module Plans

Module 1. Underwriting and Risk Selection (90 minutes)

Explain underwriting decisions without sounding arbitrary.

Learners should be able to

- Use these terms accurately: underwriting, risk appetite, exposure, loss history.
- Explain the workplace tension: Exposure, loss history, controls, appetite, and pricing adequacy need explanation.
- Respond professionally when a stakeholder says: Say the risk appetite changed.
- Select the evidence, tradeoff, owner, and decision required for a underwriting rationale.

Customized scenario

Workplace pressure

A broker asks why a profitable account received a restrictive quote.

Say the risk appetite changed.

Exposure, loss history, controls, appetite, and pricing adequacy need explanation.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.

4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a underwriting rationale.

Module 2. Policy Language and Coverage Interpretation (90 minutes)

Discuss coverage without giving casual assurances.

Learners should be able to

- Use these terms accurately: policy, endorsement, exclusion, coverage.
- Explain the workplace tension: Policy terms, exclusions, endorsements, facts, and claims review may control.
- Respond professionally when a stakeholder says: Say it should be covered.
- Select the evidence, tradeoff, owner, and decision required for a coverage caveat response.

Customized scenario

Workplace pressure

A client asks whether a new activity is covered.

Say it should be covered.

Policy terms, exclusions, endorsements, facts, and claims review may control.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a coverage caveat response.

Module 3. Claims Intake and Reserving (90 minutes)

Gather facts and set expectations after a loss.

Learners should be able to

- Use these terms accurately: claim, reserve, proof of loss, adjuster.
- Explain the workplace tension: Coverage, documentation, liability, damages, and reserve review are needed.
- Respond professionally when a stakeholder says: Promise payment this week.
- Select the evidence, tradeoff, owner, and decision required for a claims intake summary.

Customized scenario

Workplace pressure

A policyholder wants immediate payment after submitting photos.

Promise payment this week.

Coverage, documentation, liability, damages, and reserve review are needed.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.

3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a claims intake summary.

Module 4. Coverage Disputes and Denials (90 minutes)

Communicate adverse decisions with clarity and empathy.

Learners should be able to

- Use these terms accurately: denial, reservation of rights, appeal, coverage position.
- Explain the workplace tension: Facts, policy language, legal review, appeal rights, and tone matter.
- Respond professionally when a stakeholder says: Send a short denial letter.
- Select the evidence, tradeoff, owner, and decision required for a denial explanation draft.

Customized scenario

Workplace pressure

A claim appears excluded under the policy.

Send a short denial letter.

Facts, policy language, legal review, appeal rights, and tone matter.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a denial explanation draft.

Module 5. Broker and Client Renewal Meetings (90 minutes)

Discuss rate increases and terms under market pressure.

Learners should be able to

- Use these terms accurately: renewal, premium, deductible, reinsurance.
- Explain the workplace tension: Loss trends, exposure growth, reinsurance, capacity, and terms need explanation.
- Respond professionally when a stakeholder says: Blame the market.
- Select the evidence, tradeoff, owner, and decision required for a renewal meeting brief.

Customized scenario

Workplace pressure

Premiums increase despite no recent losses.

Blame the market.

Loss trends, exposure growth, reinsurance, capacity, and terms need explanation.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.

2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a renewal meeting brief.

Module 6. Fraud Indicators and SIU Referral (90 minutes)

Raise suspicious patterns without accusation.

Learners should be able to

- Use these terms accurately: fraud indicator, SIU, material misrepresentation, investigation.
- Explain the workplace tension: Evidence, investigation process, documentation, and legal boundaries matter.
- Respond professionally when a stakeholder says: Accuse the claimant of fraud.
- Select the evidence, tradeoff, owner, and decision required for a SIU referral note.

Customized scenario

Workplace pressure

A claim has inconsistent timing and documents.

Accuse the claimant of fraud.

Evidence, investigation process, documentation, and legal boundaries matter.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a SIU referral note.

Module 7. Actuarial Assumptions and Pricing (90 minutes)

Explain model outputs and uncertainty.

Learners should be able to

- Use these terms accurately: loss development, frequency, severity, reserve adequacy.
- Explain the workplace tension: Loss development, frequency, severity, assumptions, and confidence ranges need translation.
- Respond professionally when a stakeholder says: Say the model says so.
- Select the evidence, tradeoff, owner, and decision required for a actuarial assumption memo.

Customized scenario

Workplace pressure

Leadership wants a simple reason for reserve strengthening.

Say the model says so.

Loss development, frequency, severity, assumptions, and confidence ranges need translation.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a actuarial assumption memo.

Module 8. Compliance, Market Conduct, and Complaints (90 minutes)

Handle regulator and customer complaints precisely.

Learners should be able to

- Use these terms accurately: market conduct, complaint, timely communication, corrective action.
- Explain the workplace tension: Market-conduct rules, timelines, evidence, corrective action, and monitoring are needed.
- Respond professionally when a stakeholder says: Say delays were isolated.
- Select the evidence, tradeoff, owner, and decision required for a market-conduct response.

Customized scenario

Workplace pressure

A regulator asks about delayed claim communications.

Say delays were isolated.

Market-conduct rules, timelines, evidence, corrective action, and monitoring are needed.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a market-conduct response.

Nomenclature and Jargon

These are classroom working definitions. Learners should adapt wording to their organization's policies, systems, and local regulatory environment.

Underwriting and Risk Selection

Term	Working meaning	Collocations	Contrast and workplace line
underwriting	Evaluation of risk and terms used to decide whether and on what conditions to issue insurance, extend credit, or accept an investment exposure.	complete underwriting; price the underwriting risk	Contrast: Underwriting evaluates risk and terms; it is not a promise that coverage, credit, or funding has been approved. Example: The underwriter needs loss history and controls before pricing the account.

Term	Working meaning	Collocations	Contrast and workplace line
risk appetite	In insurance, risk appetite is a condition or event that can create harm, loss, noncompliance, delay, or unacceptable performance. Use it when teams need to explain underwriting decisions without sounding arbitrary.	assess risk appetite; mitigate risk appetite	Contrast: risk appetite identifies a possible or current exposure; it is not the same as accepting that exposure. Example: We need to assess risk appetite, name the owner, and agree on the trigger for escalation.
exposure	In insurance, exposure is a condition or event that can create harm, loss, noncompliance, delay, or unacceptable performance. Use it when teams need to explain underwriting decisions without sounding arbitrary.	assess exposure; mitigate exposure	Contrast: exposure identifies a possible or current exposure; it is not the same as accepting that exposure. Example: We need to assess exposure, name the owner, and agree on the trigger for escalation.
loss history	In insurance, loss history is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to explain underwriting decisions without sounding arbitrary.	clarify loss history; document loss history	Contrast: loss history should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify loss history and the evidence that supports it.

Policy Language and Coverage Interpretation

Term	Working meaning	Collocations	Contrast and workplace line
policy	Formal rule or standard that guides decisions and behavior.	apply the policy; comply with the policy	Contrast: policy is an approved rule or threshold, not an informal preference. Example: Please confirm which policy applies before we commit the team.
endorsement	In insurance, endorsement is a negotiated legal or commercial arrangement that allocates rights, obligations, remedies, or risk. Use it when teams need to discuss coverage without giving casual assurances.	clarify endorsement; document endorsement	Contrast: endorsement should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify endorsement and the evidence that supports it.
exclusion	In insurance, exclusion is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to discuss coverage without giving casual assurances.	clarify exclusion; document exclusion	Contrast: exclusion should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify exclusion and the evidence that supports it.
coverage	In insurance, coverage is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to discuss coverage without giving casual assurances.	clarify coverage; document coverage	Contrast: coverage should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify coverage and the evidence that supports it.

Claims Intake and Reserving

Term	Working meaning	Collocations	Contrast and workplace line
claim	A statement that may need evidence, approval, qualification, or disclosure before it is used externally.	clarify claim; document claim	Contrast: claim should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify claim and the evidence that supports it.

Term	Working meaning	Collocations	Contrast and workplace line
reserve	In insurance, reserve is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to gather facts and set expectations after a loss.	clarify reserve; document reserve	Contrast: reserve should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify reserve and the evidence that supports it.
proof of loss	In insurance, proof of loss is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to gather facts and set expectations after a loss.	clarify proof of loss; document proof of loss	Contrast: proof of loss should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify proof of loss and the evidence that supports it.
adjuster	In insurance, adjuster is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to gather facts and set expectations after a loss.	clarify adjuster; document adjuster	Contrast: adjuster should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify adjuster and the evidence that supports it.

Coverage Disputes and Denials

Term	Working meaning	Collocations	Contrast and workplace line
denial	Decision by an insurer, payer, regulator, or authority not to approve, pay, or grant a requested item or claim.	appeal a denial; analyze denial trends	Contrast: A denial is a payer or authority decision, not necessarily the final resolution of the claim. Example: The revenue-cycle team is analyzing denial trends after the policy change.
reservation of rights	In insurance, reservation of rights is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to communicate adverse decisions with clarity and empathy.	clarify reservation of rights; document reservation of rights	Contrast: reservation of rights should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify reservation of rights and the evidence that supports it.
appeal	In insurance, appeal is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to communicate adverse decisions with clarity and empathy.	clarify appeal; document appeal	Contrast: appeal should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify appeal and the evidence that supports it.
coverage position	In insurance, coverage position is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to communicate adverse decisions with clarity and empathy.	clarify coverage position; document coverage position	Contrast: coverage position should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify coverage position and the evidence that supports it.

Broker and Client Renewal Meetings

Term	Working meaning	Collocations	Contrast and workplace line
renewal	In insurance, renewal is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to discuss rate increases and terms under market pressure.	clarify renewal; document renewal	Contrast: renewal should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify renewal and the evidence that supports it.

Term	Working meaning	Collocations	Contrast and workplace line
premium	In insurance, premium is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to discuss rate increases and terms under market pressure.	clarify premium; document premium	Contrast: premium should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify premium and the evidence that supports it.
deductible	In insurance, deductible is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to discuss rate increases and terms under market pressure.	clarify deductible; document deductible	Contrast: deductible should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify deductible and the evidence that supports it.
reinsurance	In insurance, reinsurance is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to discuss rate increases and terms under market pressure.	clarify reinsurance; document reinsurance	Contrast: reinsurance should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify reinsurance and the evidence that supports it.

Fraud Indicators and SIU Referral

Term	Working meaning	Collocations	Contrast and workplace line
fraud indicator	In insurance, fraud indicator is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to raise suspicious patterns without accusation.	clarify fraud indicator; document fraud indicator	Contrast: fraud indicator should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify fraud indicator and the evidence that supports it.
SIU	In insurance, SIU is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to raise suspicious patterns without accusation.	clarify SIU; document SIU	Contrast: SIU should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify SIU and the evidence that supports it.
material misrepresentation	In insurance, material misrepresentation is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to raise suspicious patterns without accusation.	clarify material misrepresentation; document material misrepresentation	Contrast: material misrepresentation should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify material misrepresentation and the evidence that supports it.
investigation	In insurance, investigation is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to raise suspicious patterns without accusation.	clarify investigation; document investigation	Contrast: investigation should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify investigation and the evidence that supports it.

Actuarial Assumptions and Pricing

Term	Working meaning	Collocations	Contrast and workplace line
loss development	In insurance, loss development is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to explain model outputs and uncertainty.	clarify loss development; document loss development	Contrast: loss development should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify loss development and the evidence that supports it.

Term	Working meaning	Collocations	Contrast and workplace line
frequency	In insurance, frequency is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to explain model outputs and uncertainty.	clarify frequency; document frequency	Contrast: frequency should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify frequency and the evidence that supports it.
severity	In insurance, severity is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to explain model outputs and uncertainty.	clarify severity; document severity	Contrast: severity should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify severity and the evidence that supports it.
reserve adequacy	In insurance, reserve adequacy is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to explain model outputs and uncertainty.	clarify reserve adequacy; document reserve adequacy	Contrast: reserve adequacy should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify reserve adequacy and the evidence that supports it.

Compliance, Market Conduct, and Complaints

Term	Working meaning	Collocations	Contrast and workplace line
market conduct	In insurance, market conduct is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to handle regulator and customer complaints precisely.	clarify market conduct; document market conduct	Contrast: market conduct should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify market conduct and the evidence that supports it.
complaint	In insurance, complaint is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to handle regulator and customer complaints precisely.	clarify complaint; document complaint	Contrast: complaint should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify complaint and the evidence that supports it.
timely communication	In insurance, timely communication is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to handle regulator and customer complaints precisely.	clarify timely communication; document timely communication	Contrast: timely communication should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify timely communication and the evidence that supports it.
corrective action	Action taken to fix a current problem and prevent recurrence.	clarify corrective action; document corrective action	Contrast: corrective action should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify corrective action and the evidence that supports it.

Industry-Specific Meeting Moves

Situation	Useful language
Underwriting and Risk Selection	Before we commit, I want to confirm underwriting, risk appetite, the owner, and the evidence behind the decision. If exposure, loss history, controls, appetite, and pricing adequacy need explanation., I recommend we document the risk and agree on the next step.

Situation	Useful language
Policy Language and Coverage Interpretation	Before we commit, I want to confirm policy, endorsement, the owner, and the evidence behind the decision. If policy terms, exclusions, endorsements, facts, and claims review may control., I recommend we document the risk and agree on the next step.
Claims Intake and Reserving	Before we commit, I want to confirm claim, reserve, the owner, and the evidence behind the decision. If coverage, documentation, liability, damages, and reserve review are needed., I recommend we document the risk and agree on the next step.
Coverage Disputes and Denials	Before we commit, I want to confirm denial, reservation of rights, the owner, and the evidence behind the decision. If facts, policy language, legal review, appeal rights, and tone matter., I recommend we document the risk and agree on the next step.
Broker and Client Renewal Meetings	Before we commit, I want to confirm renewal, premium, the owner, and the evidence behind the decision. If loss trends, exposure growth, reinsurance, capacity, and terms need explanation., I recommend we document the risk and agree on the next step.
Fraud Indicators and SIU Referral	Before we commit, I want to confirm fraud indicator, SIU, the owner, and the evidence behind the decision. If evidence, investigation process, documentation, and legal boundaries matter., I recommend we document the risk and agree on the next step.
Actuarial Assumptions and Pricing	Before we commit, I want to confirm loss development, frequency, the owner, and the evidence behind the decision. If loss development, frequency, severity, assumptions, and confidence ranges need translation., I recommend we document the risk and agree on the next step.
Compliance, Market Conduct, and Complaints	Before we commit, I want to confirm market conduct, complaint, the owner, and the evidence behind the decision. If market-conduct rules, timelines, evidence, corrective action, and monitoring are needed., I recommend we document the risk and agree on the next step.

High-pressure pushback frames

- I understand the urgency. The risk is that we move faster than the evidence or process supports.
- I am not blocking the goal. I am naming the condition we need before the decision is safe and credible.
- If we accept this risk, we should name the owner, document the assumption, and define the trigger for escalation.
- That may be possible, but not under the current scope, timeline, or approval path.
- Let's separate what we know, what we assume, and what still needs confirmation.

Assessment and Coaching

Performance rubric

Skill	Developing	Proficient	Strong
Terminology	Recognizes terms but uses them loosely.	Uses field terms accurately in context.	Defines terms, connects them to evidence, and explains decision impact.
Pushback	Disagrees vaguely or avoids disagreement.	Names concern with evidence and next step.	Balances urgency, relationship, risk, owner, and decision rights.
Scenario judgment	Focuses on one stakeholder's preference.	Identifies constraint, risk, and process.	Guides the group toward a documented, realistic decision.
Decision communication	Selects language without linking it to the decision.	Chooses language that names facts, owner, and next step.	Distinguishes evidence, tradeoff, authority, and escalation in a decision-ready response.

Source orientation

- Policy forms, endorsements, and state insurance rules.

- Company underwriting and claims procedures.
- Compliance and legal review for coverage positions.
- The learner's own company policies, SOPs, contracts, systems, templates, and approved communication standards.
