

Legal Operations and Compliance English

Instructor guide for advanced ESL learners working in legal operations and compliance

Audience: legal operations staff, compliance managers, contract managers, policy owners, audit teams, investigation coordinators, privacy operations staff, and risk professionals

Focus: A legal operations and compliance English curriculum for contract workflow, policy implementation, audits, controls, investigations, privacy requests, training, third-party risk, and governance communication.

Designed for advanced ESL learners who already use professional English and need industry-specific terminology, realistic meetings, role-play pressure, careful pushback, and polished workplace outputs.

Teaching stance: this is language and workplace-communication training, not legal, medical, financial, safety, or regulatory advice. Instructors should connect every scenario to the learner's current company policies, local rules, and approved procedures.

Purpose and Course Logic

A legal operations and compliance English curriculum for contract workflow, policy implementation, audits, controls, investigations, privacy requests, training, third-party risk, and governance communication.

Core language challenge

Advanced learners do not only need vocabulary. They need the ability to ask which standard applies, who owns the decision, what evidence is sufficient, what risk is being accepted, and how to disagree without sounding vague, defensive, or reckless.

Each module trains a realistic workplace pressure point with role-specific terms, decision language, pushback practice, and bounded decision activities learners can apply to their own work.

Course objectives

- Use legal operations and compliance terminology accurately in meetings, written updates, handoffs, escalations, reviews, and client or stakeholder conversations.
- Turn vague requests into specific questions about evidence, owner, deadline, constraint, risk, and decision rights.
- Push back on unsafe, unsupported, noncompliant, unrealistic, or poorly scoped proposals while preserving professional trust.
- Handle realistic dialogues from the field, including conflict, uncertainty, documentation gaps, customer or stakeholder pressure, and cross-functional disagreement.
- Select language that produces concise workplace outputs: briefing notes, escalation updates, meeting scripts, risk memos, decision records, and follow-up messages.

Instructor Module Plans

Module 1. Contract Intake and Workflow (90 minutes)

Clarify legal requests before they become bottlenecks.

Learners should be able to

- Use these terms accurately: contract intake, template, approval path, triage.
- Explain the workplace tension: Risk, value, deadline, template deviation, and approval path should drive triage.
- Respond professionally when a stakeholder says: Prioritize by who is loudest.
- Select the evidence, tradeoff, owner, and decision required for a contract intake triage.

Customized scenario

Workplace pressure

A business team marks every contract urgent.

Prioritize by who is loudest.

Risk, value, deadline, template deviation, and approval path should drive triage.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.

4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a contract intake triage.

Module 2. Policy Implementation and Controls (90 minutes)

Turn policy language into operational behavior.

Learners should be able to

- Use these terms accurately: policy, control, monitoring, process owner.
- Explain the workplace tension: Process ownership, controls, training, monitoring, and escalation need design.
- Respond professionally when a stakeholder says: Send a reminder email.
- Select the evidence, tradeoff, owner, and decision required for a policy rollout plan.

Customized scenario

Workplace pressure

A new policy is published but teams do not follow it.

Send a reminder email.

Process ownership, controls, training, monitoring, and escalation need design.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a policy rollout plan.

Module 3. Compliance Audits and Evidence (90 minutes)

Respond to audits with evidence, not informal assurance.

Learners should be able to

- Use these terms accurately: audit, evidence, retention, sample.
- Explain the workplace tension: Evidence location, retention, sample quality, and control design must be shown.
- Respond professionally when a stakeholder says: Say approvals happen in email.
- Select the evidence, tradeoff, owner, and decision required for an audit evidence tracker.

Customized scenario

Workplace pressure

An auditor asks for proof of approval reviews.

Say approvals happen in email.

Evidence location, retention, sample quality, and control design must be shown.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.

3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a audit evidence tracker.

Module 4. Internal Investigations (90 minutes)

Coordinate investigations with neutrality and confidentiality.

Learners should be able to

- Use these terms accurately: hotline, non-retaliation, confidentiality, evidence.
- Explain the workplace tension: Confidentiality, non-retaliation, evidence, and investigative independence matter.
- Respond professionally when a stakeholder says: Share the name privately.
- Select the evidence, tradeoff, owner, and decision required for a investigation boundary response.

Customized scenario

Workplace pressure

A manager wants to know who made a hotline complaint.

Share the name privately.

Confidentiality, non-retaliation, evidence, and investigative independence matter.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a investigation boundary response.

Module 5. Privacy Operations and Data Requests (90 minutes)

Handle data requests with process discipline.

Learners should be able to

- Use these terms accurately: data subject request, personal data, verification, exception.
- Explain the workplace tension: Identity verification, system inventory, exceptions, and response timelines matter.
- Respond professionally when a stakeholder says: Delete the visible profile only.
- Select the evidence, tradeoff, owner, and decision required for a privacy request plan.

Customized scenario

Workplace pressure

A customer asks for deletion of personal data across systems.

Delete the visible profile only.

Identity verification, system inventory, exceptions, and response timelines matter.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.

2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a privacy request plan.

Module 6. Third-Party Risk and Due Diligence (90 minutes)

Explain vendor risk without blocking business unnecessarily.

Learners should be able to

- Use these terms accurately: third-party risk, due diligence, data processing, vendor questionnaire.
- Explain the workplace tension: Security, privacy, contract terms, data location, and monitoring need review.
- Respond professionally when a stakeholder says: Approve after a quick demo.
- Select the evidence, tradeoff, owner, and decision required for a vendor risk assessment.

Customized scenario

Workplace pressure

A team wants to onboard a vendor that processes sensitive data.

Approve after a quick demo.

Security, privacy, contract terms, data location, and monitoring need review.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a vendor risk assessment.

Module 7. Training, Attestations, and Culture (90 minutes)

Make compliance training practical, not ceremonial.

Learners should be able to

- Use these terms accurately: attestation, role-based training, culture, reinforcement.
- Explain the workplace tension: Role-based examples, manager reinforcement, attestations, and controls should be aligned.
- Respond professionally when a stakeholder says: Require another training module.
- Select the evidence, tradeoff, owner, and decision required for a training improvement memo.

Customized scenario

Workplace pressure

Employees complete training but keep asking basic policy questions.

Require another training module.

Role-based examples, manager reinforcement, attestations, and controls should be aligned.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a training improvement memo.

Module 8. Governance, Reporting, and Risk Committees (90 minutes)

Present compliance risk with decisions and owners.

Learners should be able to

- Use these terms accurately: governance, risk committee, risk acceptance, remediation.
- Explain the workplace tension: Severity, trend, root cause, owner, deadline, and risk acceptance should drive governance.
- Respond professionally when a stakeholder says: Review every item in order.
- Select the evidence, tradeoff, owner, and decision required for a risk committee update.

Customized scenario

Workplace pressure

A committee receives a long list of issues with no prioritization.

Review every item in order.

Severity, trend, root cause, owner, deadline, and risk acceptance should drive governance.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a risk committee update.

Nomenclature and Jargon

These are classroom working definitions. Learners should adapt wording to their organization's policies, systems, and local regulatory environment.

Contract Intake and Workflow

Term	Working meaning	Collocations	Contrast and workplace line
contract intake	In legal operations and compliance, contract intake is a formal intake or routing mechanism that starts work, seeks a decision, or transfers responsibility. Use it when teams need to clarify legal requests before they become bottlenecks.	clarify contract intake; document contract intake	Contrast: contract intake should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify contract intake and the evidence that supports it.

Term	Working meaning	Collocations	Contrast and workplace line
template	In legal operations and compliance, template is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to clarify legal requests before they become bottlenecks.	clarify template; document template	Contrast: template should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify template and the evidence that supports it.
approval path	In legal operations and compliance, approval path is a decision-accountability mechanism that clarifies who recommends, approves, performs, and accepts risk. Use it when teams need to clarify legal requests before they become bottlenecks.	clarify approval path; document approval path	Contrast: approval path should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify approval path and the evidence that supports it.
triage	Sorting issues by urgency, severity, risk, owner, and next action.	clarify triage; document triage	Contrast: triage should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify triage and the evidence that supports it.

Policy Implementation and Controls

Term	Working meaning	Collocations	Contrast and workplace line
policy	Formal rule or standard that guides decisions and behavior.	apply the policy; comply with the policy	Contrast: policy is an approved rule or threshold, not an informal preference. Example: Please confirm which policy applies before we commit the team.
control	A process, approval, check, or technical safeguard designed to reduce risk.	clarify control; document control	Contrast: control should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify control and the evidence that supports it.
monitoring	In legal operations and compliance, monitoring is a repeatable control mechanism used to prevent, detect, or confirm conditions before work proceeds. Use it when teams need to turn policy language into operational behavior.	clarify monitoring; document monitoring	Contrast: monitoring should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify monitoring and the evidence that supports it.
process owner	In legal operations and compliance, process owner is a decision-accountability mechanism that clarifies who recommends, approves, performs, and accepts risk. Use it when teams need to turn policy language into operational behavior.	clarify process owner; document process owner	Contrast: process owner should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify process owner and the evidence that supports it.

Compliance Audits and Evidence

Term	Working meaning	Collocations	Contrast and workplace line
audit	In legal operations and compliance, audit is a structured examination of evidence, process, or results used to reach a defensible conclusion. Use it when teams need to respond to audits with evidence, not informal assurance.	conduct a audit; document the audit	Contrast: audit is a structured examination of evidence; it is not a conclusion reached before the evidence is checked. Example: The team will conduct a audit before it recommends a corrective action.

Term	Working meaning	Collocations	Contrast and workplace line
evidence	In legal operations and compliance, evidence is information that can be checked to support a claim, decision, investigation, or compliance conclusion. Use it when teams need to respond to audits with evidence, not informal assurance.	clarify evidence; document evidence	Contrast: evidence should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify evidence and the evidence that supports it.
retention	In legal operations and compliance, retention is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to respond to audits with evidence, not informal assurance.	clarify retention; document retention	Contrast: retention should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify retention and the evidence that supports it.
sample	In legal operations and compliance, sample is a defined information asset or analytical construct used to measure, explain, or predict an outcome. Use it when teams need to respond to audits with evidence, not informal assurance.	clarify sample; document sample	Contrast: sample should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify sample and the evidence that supports it.

Internal Investigations

Term	Working meaning	Collocations	Contrast and workplace line
hotline	In legal operations and compliance, hotline is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to coordinate investigations with neutrality and confidentiality.	clarify hotline; document hotline	Contrast: hotline should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify hotline and the evidence that supports it.
non-retaliation	Requirement that people are not punished or disadvantaged for making a good-faith report, complaint, or participation in an investigation.	clarify non-retaliation; document non-retaliation	Contrast: non-retaliation should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify non-retaliation and the evidence that supports it.
confidentiality	In legal operations and compliance, confidentiality is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to coordinate investigations with neutrality and confidentiality.	clarify confidentiality; document confidentiality	Contrast: confidentiality should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify confidentiality and the evidence that supports it.
evidence	In legal operations and compliance, evidence is information that can be checked to support a claim, decision, investigation, or compliance conclusion. Use it when teams need to coordinate investigations with neutrality and confidentiality.	clarify evidence; document evidence	Contrast: evidence should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify evidence and the evidence that supports it.

Privacy Operations and Data Requests

Term	Working meaning	Collocations	Contrast and workplace line
data subject request	Request from an individual to access, correct, delete, restrict, or otherwise exercise rights over personal data.	clarify data subject request; document data subject request	Contrast: data subject request should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify data subject request and the evidence that supports it.
personal data	In legal operations and compliance, personal data is a defined information asset or analytical construct used to measure, explain, or predict an outcome. Use it when teams need to handle data requests with process discipline.	clarify personal data; document personal data	Contrast: personal data should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify personal data and the evidence that supports it.
verification	In legal operations and compliance, verification is a repeatable control mechanism used to prevent, detect, or confirm conditions before work proceeds. Use it when teams need to handle data requests with process discipline.	clarify verification; document verification	Contrast: verification should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify verification and the evidence that supports it.
exception	In legal operations and compliance, exception is a condition or event that can create harm, loss, noncompliance, delay, or unacceptable performance. Use it when teams need to handle data requests with process discipline.	clarify exception; document exception	Contrast: exception should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify exception and the evidence that supports it.

Third-Party Risk and Due Diligence

Term	Working meaning	Collocations	Contrast and workplace line
third-party risk	In legal operations and compliance, third-party risk is a condition or event that can create harm, loss, noncompliance, delay, or unacceptable performance. Use it when teams need to explain vendor risk without blocking business unnecessarily.	assess third-party risk; mitigate third-party risk	Contrast: third-party risk identifies a possible or current exposure; it is not the same as accepting that exposure. Example: We need to assess third-party risk, name the owner, and agree on the trigger for escalation.
due diligence	Structured review of facts, risks, obligations, and evidence before a transaction, onboarding, investment, or decision.	conduct due diligence; complete due diligence	Contrast: Due diligence tests facts and risks before commitment; it is not a ceremonial step after the decision is made. Example: The team will complete due diligence on data practices before onboarding the vendor.
data processing	In legal operations and compliance, data processing is a defined information asset or analytical construct used to measure, explain, or predict an outcome. Use it when teams need to explain vendor risk without blocking business unnecessarily.	clarify data processing; document data processing	Contrast: data processing should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify data processing and the evidence that supports it.
vendor questionnaire	In legal operations and compliance, vendor questionnaire is a stakeholder category whose needs, eligibility, experience, or obligations affect the decision. Use it when teams need to explain vendor risk without blocking business unnecessarily.	clarify vendor questionnaire; document vendor questionnaire	Contrast: vendor questionnaire should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify vendor questionnaire and the evidence that supports it.

Training, Attestations, and Culture

Term	Working meaning	Collocations	Contrast and workplace line
attestation	In legal operations and compliance, attestation is a capability or authorization process used to prepare, verify, or document that a person can perform a role. Use it when teams need to make compliance training practical, not ceremonial.	clarify attestation; document attestation	Contrast: attestation should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify attestation and the evidence that supports it.
role-based training	In legal operations and compliance, role-based training is a capability or authorization process used to prepare, verify, or document that a person can perform a role. Use it when teams need to make compliance training practical, not ceremonial.	clarify role-based training; document role-based training	Contrast: role-based training should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify role-based training and the evidence that supports it.
culture	In legal operations and compliance, culture is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to make compliance training practical, not ceremonial.	clarify culture; document culture	Contrast: culture should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify culture and the evidence that supports it.
reinforcement	In legal operations and compliance, reinforcement is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to make compliance training practical, not ceremonial.	clarify reinforcement; document reinforcement	Contrast: reinforcement should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify reinforcement and the evidence that supports it.

Governance, Reporting, and Risk Committees

Term	Working meaning	Collocations	Contrast and workplace line
governance	Decision structure defining roles, rights, approvals, controls, and accountability.	clarify governance; document governance	Contrast: governance should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify governance and the evidence that supports it.
risk committee	In legal operations and compliance, risk committee is a condition or event that can create harm, loss, noncompliance, delay, or unacceptable performance. Use it when teams need to present compliance risk with decisions and owners.	assess risk committee; mitigate risk committee	Contrast: risk committee identifies a possible or current exposure; it is not the same as accepting that exposure. Example: We need to assess risk committee, name the owner, and agree on the trigger for escalation.
risk acceptance	In legal operations and compliance, risk acceptance is a condition or event that can create harm, loss, noncompliance, delay, or unacceptable performance. Use it when teams need to present compliance risk with decisions and owners.	assess risk acceptance; mitigate risk acceptance	Contrast: risk acceptance identifies a possible or current exposure; it is not the same as accepting that exposure. Example: We need to assess risk acceptance, name the owner, and agree on the trigger for escalation.
remediation	In legal operations and compliance, remediation is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to present compliance risk with decisions and owners.	clarify remediation; document remediation	Contrast: remediation should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify remediation and the evidence that supports it.

Industry-Specific Meeting Moves

Situation	Useful language
Contract Intake and Workflow	Before we commit, I want to confirm contract intake, template, the owner, and the evidence behind the decision. If risk, value, deadline, template deviation, and approval path should drive triage., I recommend we document the risk and agree on the next step.
Policy Implementation and Controls	Before we commit, I want to confirm policy, control, the owner, and the evidence behind the decision. If process ownership, controls, training, monitoring, and escalation need design., I recommend we document the risk and agree on the next step.
Compliance Audits and Evidence	Before we commit, I want to confirm audit, evidence, the owner, and the evidence behind the decision. If evidence location, retention, sample quality, and control design must be shown., I recommend we document the risk and agree on the next step.
Internal Investigations	Before we commit, I want to confirm hotline, non-retaliation, the owner, and the evidence behind the decision. If confidentiality, non-retaliation, evidence, and investigative independence matter., I recommend we document the risk and agree on the next step.
Privacy Operations and Data Requests	Before we commit, I want to confirm data subject request, personal data, the owner, and the evidence behind the decision. If identity verification, system inventory, exceptions, and response timelines matter., I recommend we document the risk and agree on the next step.
Third-Party Risk and Due Diligence	Before we commit, I want to confirm third-party risk, due diligence, the owner, and the evidence behind the decision. If security, privacy, contract terms, data location, and monitoring need review., I recommend we document the risk and agree on the next step.
Training, Attestations, and Culture	Before we commit, I want to confirm attestation, role-based training, the owner, and the evidence behind the decision. If role-based examples, manager reinforcement, attestations, and controls should be aligned., I recommend we document the risk and agree on the next step.
Governance, Reporting, and Risk Committees	Before we commit, I want to confirm governance, risk committee, the owner, and the evidence behind the decision. If severity, trend, root cause, owner, deadline, and risk acceptance should drive governance., I recommend we document the risk and agree on the next step.

High-pressure pushback frames

- I understand the urgency. The risk is that we move faster than the evidence or process supports.
- I am not blocking the goal. I am naming the condition we need before the decision is safe and credible.
- If we accept this risk, we should name the owner, document the assumption, and define the trigger for escalation.
- That may be possible, but not under the current scope, timeline, or approval path.
- Let's separate what we know, what we assume, and what still needs confirmation.

Assessment and Coaching

Performance rubric

Skill	Developing	Proficient	Strong
Terminology	Recognizes terms but uses them loosely.	Uses field terms accurately in context.	Defines terms, connects them to evidence, and explains decision impact.
Pushback	Disagrees vaguely or avoids disagreement.	Names concern with evidence and next step.	Balances urgency, relationship, risk, owner, and decision rights.
Scenario judgment	Focuses on one stakeholder's preference.	Identifies constraint, risk, and process.	Guides the group toward a documented, realistic decision.

Skill	Developing	Proficient	Strong
Decision communication	Selects language without linking it to the decision.	Chooses language that names facts, owner, and next step.	Distinguishes evidence, tradeoff, authority, and escalation in a decision-ready response.

Source orientation

- Company legal, compliance, privacy, and contract procedures.
- Current legal counsel guidance for regulated activities.
- Audit, investigation, and third-party-risk frameworks.
- The learner's own company policies, SOPs, contracts, systems, templates, and approved communication standards.
