

Sales and Business Development English

Instructor guide for advanced ESL learners working in sales and business development

Audience: account executives, business-development representatives, sales managers, partnership teams, solutions consultants, channel managers, and revenue leaders

Focus: A sales and business development English curriculum for discovery, qualification, objection handling, pricing, procurement, enterprise buying committees, negotiation, partnership language, and CRM discipline.

Designed for advanced ESL learners who already use professional English and need industry-specific terminology, realistic meetings, role-play pressure, careful pushback, and polished workplace outputs.

Teaching stance: this is language and workplace-communication training, not legal, medical, financial, safety, or regulatory advice. Instructors should connect every scenario to the learner's current company policies, local rules, and approved procedures.

Purpose and Course Logic

A sales and business development English curriculum for discovery, qualification, objection handling, pricing, procurement, enterprise buying committees, negotiation, partnership language, and CRM discipline.

Core language challenge

Advanced learners do not only need vocabulary. They need the ability to ask which standard applies, who owns the decision, what evidence is sufficient, what risk is being accepted, and how to disagree without sounding vague, defensive, or reckless.

Each module trains a realistic workplace pressure point with role-specific terms, decision language, pushback practice, and bounded decision activities learners can apply to their own work.

Course objectives

- Use sales and business development terminology accurately in meetings, written updates, handoffs, escalations, reviews, and client or stakeholder conversations.
- Turn vague requests into specific questions about evidence, owner, deadline, constraint, risk, and decision rights.
- Push back on unsafe, unsupported, noncompliant, unrealistic, or poorly scoped proposals while preserving professional trust.
- Handle realistic dialogues from the field, including conflict, uncertainty, documentation gaps, customer or stakeholder pressure, and cross-functional disagreement.
- Select language that produces concise workplace outputs: briefing notes, escalation updates, meeting scripts, risk memos, decision records, and follow-up messages.

Instructor Module Plans

Module 1. Discovery and Qualification (90 minutes)

Ask business questions before pitching features.

Learners should be able to

- Use these terms accurately: discovery, qualification, pain point, buying process.
- Explain the workplace tension: Pain, priority, authority, timeline, and business impact need qualification.
- Respond professionally when a stakeholder says: Show the full demo immediately.
- Select the evidence, tradeoff, owner, and decision required for a discovery call plan.

Customized scenario

Workplace pressure

A prospect asks for a demo before explaining their problem.

Show the full demo immediately.

Pain, priority, authority, timeline, and business impact need qualification.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.

4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a discovery call plan.

Module 2. Value Proposition and Use-Case Fit (90 minutes)

Connect product value to the buyer's actual workflow.

Learners should be able to

- Use these terms accurately: value proposition, use case, success metric, stakeholder.
- Explain the workplace tension: Use case, stakeholder value, success metric, and urgency need definition.
- Respond professionally when a stakeholder says: Push for next steps anyway.
- Select the evidence, tradeoff, owner, and decision required for a value mapping note.

Customized scenario

Workplace pressure

A prospect likes the product but cannot name a use case.

Push for next steps anyway.

Use case, stakeholder value, success metric, and urgency need definition.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a value mapping note.

Module 3. Objection Handling and Competitive Pressure (90 minutes)

Respond to objections without sounding defensive.

Learners should be able to

- Use these terms accurately: objection, competitor, differentiator, total cost.
- Explain the workplace tension: Total value, risk, scope, implementation, and commercial terms need comparison.
- Respond professionally when a stakeholder says: Discount immediately.
- Select the evidence, tradeoff, owner, and decision required for a competitive objection response.

Customized scenario

Workplace pressure

A prospect says a competitor is cheaper.

Discount immediately.

Total value, risk, scope, implementation, and commercial terms need comparison.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.

3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a competitive objection response.

Module 4. Pricing, Discounting, and Approval (90 minutes)

Negotiate price without eroding value.

Learners should be able to

- Use these terms accurately: discount, procurement, margin, approval path.
- Explain the workplace tension: Pricing policy, margin, term length, volume, and approval path must be reviewed.
- Respond professionally when a stakeholder says: Approve it to close the quarter.
- Select the evidence, tradeoff, owner, and decision required for a discount approval request.

Customized scenario

Workplace pressure

Procurement demands a last-minute discount.

Approve it to close the quarter.

Pricing policy, margin, term length, volume, and approval path must be reviewed.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a discount approval request.

Module 5. Enterprise Buying Committees (90 minutes)

Navigate multiple stakeholders and hidden blockers.

Learners should be able to

- Use these terms accurately: champion, economic buyer, buying committee, forecast category.
- Explain the workplace tension: Decision criteria, legal, security, finance, and executive sponsor status matter.
- Respond professionally when a stakeholder says: Forecast the deal as committed.
- Select the evidence, tradeoff, owner, and decision required for a deal-risk update.

Customized scenario

Workplace pressure

A champion says the deal is done but legal has not reviewed it.

Forecast the deal as committed.

Decision criteria, legal, security, finance, and executive sponsor status matter.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.

2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a deal-risk update.

Module 6. Negotiation and Contract Redlines (90 minutes)

Keep commercial momentum while respecting legal boundaries.

Learners should be able to

- Use these terms accurately: redline, liability, indemnity, commercial term.
- Explain the workplace tension: Risk allocation, legal approval, insurance, and business value need decision.
- Respond professionally when a stakeholder says: Agree because it is a strategic deal.
- Select the evidence, tradeoff, owner, and decision required for a redline escalation.

Customized scenario

Workplace pressure

A customer requests unlimited liability in the contract.

Agree because it is a strategic deal.

Risk allocation, legal approval, insurance, and business value need decision.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a redline escalation.

Module 7. Partnerships and Channel Development (90 minutes)

Define partnership value and responsibilities.

Learners should be able to

- Use these terms accurately: channel partner, exclusivity, pipeline, enablement.
- Explain the workplace tension: Territory, targets, enablement, economics, and performance gates need clarity.
- Respond professionally when a stakeholder says: Grant exclusivity to secure the relationship.
- Select the evidence, tradeoff, owner, and decision required for a partner term outline.

Customized scenario

Workplace pressure

A potential partner wants exclusivity before proving pipeline.

Grant exclusivity to secure the relationship.

Territory, targets, enablement, economics, and performance gates need clarity.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a partner term outline.

Module 8. CRM Hygiene and Pipeline Reviews (90 minutes)

Discuss pipeline honestly under target pressure.

Learners should be able to

- Use these terms accurately: CRM, pipeline, close date, commit, slippage.
- Explain the workplace tension: Next step, close date, buyer evidence, and risk should drive forecast accuracy.
- Respond professionally when a stakeholder says: Leave them because the pipeline looks stronger.
- Select the evidence, tradeoff, owner, and decision required for a pipeline inspection notes.

Customized scenario

Workplace pressure

A rep keeps stale opportunities in late stages.

Leave them because the pipeline looks stronger.

Next step, close date, buyer evidence, and risk should drive forecast accuracy.

Classroom sequence

1. Terminology selection: distinguish the term that names the decision variable from three plausible alternatives.
2. Risk triage: select the stakeholder, decision, evidence gap, operating constraint, and cost of being wrong from a bounded scenario set.
3. Pushback ladder: choose the strongest sequence from clarification to evidence-based objection to consequence to decision request.
4. Decision artifact check: select the facts, caveat, owner, and next action that belong in a pipeline inspection notes.

Nomenclature and Jargon

These are classroom working definitions. Learners should adapt wording to their organization's policies, systems, and local regulatory environment.

Discovery and Qualification

Term	Working meaning	Collocations	Contrast and workplace line
discovery	In sales and business development, discovery is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to ask business questions before pitching features.	clarify discovery; document discovery	Contrast: discovery should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify discovery and the evidence that supports it.

Term	Working meaning	Collocations	Contrast and workplace line
qualification	In sales and business development, qualification is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to ask business questions before pitching features.	clarify qualification; document qualification	Contrast: qualification should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify qualification and the evidence that supports it.
pain point	In sales and business development, pain point is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to ask business questions before pitching features.	clarify pain point; document pain point	Contrast: pain point should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify pain point and the evidence that supports it.
buying process	In sales and business development, buying process is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to ask business questions before pitching features.	clarify buying process; document buying process	Contrast: buying process should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify buying process and the evidence that supports it.

Value Proposition and Use-Case Fit

Term	Working meaning	Collocations	Contrast and workplace line
value proposition	In sales and business development, value proposition is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to connect product value to the buyer's actual workflow.	clarify value proposition; document value proposition	Contrast: value proposition should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify value proposition and the evidence that supports it.
use case	In sales and business development, use case is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to connect product value to the buyer's actual workflow.	clarify use case; document use case	Contrast: use case should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify use case and the evidence that supports it.
success metric	In sales and business development, success metric is a defined information asset or analytical construct used to measure, explain, or predict an outcome. Use it when teams need to connect product value to the buyer's actual workflow.	clarify success metric; document success metric	Contrast: success metric should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify success metric and the evidence that supports it.
stakeholder	Person or group with an interest, risk, authority, or dependency in the work.	clarify stakeholder; document stakeholder	Contrast: stakeholder should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify stakeholder and the evidence that supports it.

Objection Handling and Competitive Pressure

Term	Working meaning	Collocations	Contrast and workplace line
objection	In sales and business development, objection is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to respond to objections without sounding defensive.	clarify objection; document objection	Contrast: objection should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify objection and the evidence that supports it.
competitor	In sales and business development, competitor is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to respond to objections without sounding defensive.	clarify competitor; document competitor	Contrast: competitor should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify competitor and the evidence that supports it.
differentiator	In sales and business development, differentiator is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to respond to objections without sounding defensive.	clarify differentiator; document differentiator	Contrast: differentiator should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify differentiator and the evidence that supports it.
total cost	In sales and business development, total cost is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to respond to objections without sounding defensive.	clarify total cost; document total cost	Contrast: total cost should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify total cost and the evidence that supports it.

Pricing, Discounting, and Approval

Term	Working meaning	Collocations	Contrast and workplace line
discount	In sales and business development, discount is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to negotiate price without eroding value.	clarify discount; document discount	Contrast: discount should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify discount and the evidence that supports it.
procurement	In sales and business development, procurement is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to negotiate price without eroding value.	clarify procurement; document procurement	Contrast: procurement should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify procurement and the evidence that supports it.
margin	In sales and business development, margin is a measurable indicator used to quantify performance, exposure, capacity, quality, or change over time. Use it when teams need to negotiate price without eroding value.	track margin; explain a change in margin	Contrast: margin measures a result or condition; it does not, by itself, prove the cause. Example: Before we act, let us track margin by segment and explain what changed.
approval path	In sales and business development, approval path is a decision-accountability mechanism that clarifies who recommends, approves, performs, and accepts risk. Use it when teams need to negotiate price without eroding value.	clarify approval path; document approval path	Contrast: approval path should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify approval path and the evidence that supports it.

Enterprise Buying Committees

Term	Working meaning	Collocations	Contrast and workplace line
champion	In sales and business development, champion is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to navigate multiple stakeholders and hidden blockers.	clarify champion; document champion	Contrast: champion should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify champion and the evidence that supports it.
economic buyer	In sales and business development, economic buyer is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to navigate multiple stakeholders and hidden blockers.	clarify economic buyer; document economic buyer	Contrast: economic buyer should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify economic buyer and the evidence that supports it.
buying committee	In sales and business development, buying committee is a decision-accountability mechanism that clarifies who recommends, approves, performs, and accepts risk. Use it when teams need to navigate multiple stakeholders and hidden blockers.	clarify buying committee; document buying committee	Contrast: buying committee should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify buying committee and the evidence that supports it.
forecast category	In sales and business development, forecast category is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to navigate multiple stakeholders and hidden blockers.	clarify forecast category; document forecast category	Contrast: forecast category should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify forecast category and the evidence that supports it.

Negotiation and Contract Redlines

Term	Working meaning	Collocations	Contrast and workplace line
redline	In sales and business development, redline is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to keep commercial momentum while respecting legal boundaries.	clarify redline; document redline	Contrast: redline should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify redline and the evidence that supports it.
liability	In sales and business development, liability is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to keep commercial momentum while respecting legal boundaries.	clarify liability; document liability	Contrast: liability should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify liability and the evidence that supports it.
indemnity	In sales and business development, indemnity is a negotiated legal or commercial arrangement that allocates rights, obligations, remedies, or risk. Use it when teams need to keep commercial momentum while respecting legal boundaries.	clarify indemnity; document indemnity	Contrast: indemnity should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify indemnity and the evidence that supports it.
commercial term	In sales and business development, commercial term is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to keep commercial momentum while respecting legal boundaries.	clarify commercial term; document commercial term	Contrast: commercial term should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify commercial term and the evidence that supports it.

Partnerships and Channel Development

Term	Working meaning	Collocations	Contrast and workplace line
channel partner	In sales and business development, channel partner is a stakeholder category whose needs, eligibility, experience, or obligations affect the decision. Use it when teams need to define partnership value and responsibilities.	clarify channel partner; document channel partner	Contrast: channel partner should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify channel partner and the evidence that supports it.
exclusivity	In sales and business development, exclusivity is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to define partnership value and responsibilities.	clarify exclusivity; document exclusivity	Contrast: exclusivity should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify exclusivity and the evidence that supports it.
pipeline	In sales and business development, pipeline is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to define partnership value and responsibilities.	clarify pipeline; document pipeline	Contrast: pipeline should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify pipeline and the evidence that supports it.
enablement	In sales and business development, enablement is a capability or authorization process used to prepare, verify, or document that a person can perform a role. Use it when teams need to define partnership value and responsibilities.	clarify enablement; document enablement	Contrast: enablement should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify enablement and the evidence that supports it.

CRM Hygiene and Pipeline Reviews

Term	Working meaning	Collocations	Contrast and workplace line
CRM	In sales and business development, CRM is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to discuss pipeline honestly under target pressure.	clarify CRM; document CRM	Contrast: CRM should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify CRM and the evidence that supports it.
pipeline	In sales and business development, pipeline is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to discuss pipeline honestly under target pressure.	clarify pipeline; document pipeline	Contrast: pipeline should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify pipeline and the evidence that supports it.
close date	In sales and business development, close date is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to discuss pipeline honestly under target pressure.	clarify close date; document close date	Contrast: close date should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify close date and the evidence that supports it.
commit	In sales and business development, commit is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to discuss pipeline honestly under target pressure.	clarify commit; document commit	Contrast: commit should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify commit and the evidence that supports it.

Term	Working meaning	Collocations	Contrast and workplace line
slippage	In sales and business development, slippage is a field-specific concept used to locate the relevant fact, boundary, or decision variable. Use it when teams need to discuss pipeline honestly under target pressure.	clarify slippage; document slippage	Contrast: slippage should be defined against the relevant evidence and decision boundary, rather than used as a vague label. Example: Before we proceed, please clarify slippage and the evidence that supports it.

Industry-Specific Meeting Moves

Situation	Useful language
Discovery and Qualification	Before we commit, I want to confirm discovery, qualification, the owner, and the evidence behind the decision. If pain, priority, authority, timeline, and business impact need qualification., I recommend we document the risk and agree on the next step.
Value Proposition and Use-Case Fit	Before we commit, I want to confirm value proposition, use case, the owner, and the evidence behind the decision. If use case, stakeholder value, success metric, and urgency need definition., I recommend we document the risk and agree on the next step.
Objection Handling and Competitive Pressure	Before we commit, I want to confirm objection, competitor, the owner, and the evidence behind the decision. If total value, risk, scope, implementation, and commercial terms need comparison., I recommend we document the risk and agree on the next step.
Pricing, Discounting, and Approval	Before we commit, I want to confirm discount, procurement, the owner, and the evidence behind the decision. If pricing policy, margin, term length, volume, and approval path must be reviewed., I recommend we document the risk and agree on the next step.
Enterprise Buying Committees	Before we commit, I want to confirm champion, economic buyer, the owner, and the evidence behind the decision. If decision criteria, legal, security, finance, and executive sponsor status matter., I recommend we document the risk and agree on the next step.
Negotiation and Contract Redlines	Before we commit, I want to confirm redline, liability, the owner, and the evidence behind the decision. If risk allocation, legal approval, insurance, and business value need decision., I recommend we document the risk and agree on the next step.
Partnerships and Channel Development	Before we commit, I want to confirm channel partner, exclusivity, the owner, and the evidence behind the decision. If territory, targets, enablement, economics, and performance gates need clarity., I recommend we document the risk and agree on the next step.
CRM Hygiene and Pipeline Reviews	Before we commit, I want to confirm CRM, pipeline, the owner, and the evidence behind the decision. If next step, close date, buyer evidence, and risk should drive forecast accuracy., I recommend we document the risk and agree on the next step.

High-pressure pushback frames

- I understand the urgency. The risk is that we move faster than the evidence or process supports.
- I am not blocking the goal. I am naming the condition we need before the decision is safe and credible.
- If we accept this risk, we should name the owner, document the assumption, and define the trigger for escalation.
- That may be possible, but not under the current scope, timeline, or approval path.
- Let's separate what we know, what we assume, and what still needs confirmation.

Assessment and Coaching

Performance rubric

Skill	Developing	Proficient	Strong
Terminology	Recognizes terms but uses them loosely.	Uses field terms accurately in context.	Defines terms, connects them to evidence, and explains decision impact.
Pushback	Disagrees vaguely or avoids disagreement.	Names concern with evidence and next step.	Balances urgency, relationship, risk, owner, and decision rights.
Scenario judgment	Focuses on one stakeholder's preference.	Identifies constraint, risk, and process.	Guides the group toward a documented, realistic decision.
Decision communication	Selects language without linking it to the decision.	Chooses language that names facts, owner, and next step.	Distinguishes evidence, tradeoff, authority, and escalation in a decision-ready response.

Source orientation

- Company sales process, approval matrix, and pricing policy.
- Contract review and procurement procedures.
- CRM definitions and forecast governance.
- The learner's own company policies, SOPs, contracts, systems, templates, and approved communication standards.
