

Supply Chain and Logistics English Dialogue Lab

Realistic field-specific dialogues, role-play variations, and observer checklists

Audience: supply-chain managers, planners, buyers, logistics coordinators, warehouse leaders, procurement teams, customs staff, and operations managers

Focus: A supply-chain English curriculum for forecasting, shortages, purchasing, inventory, warehouse operations, logistics delays, supplier performance, customs, risk, and crisis communication.

Designed for advanced ESL learners who already use professional English and need industry-specific terminology, realistic meetings, role-play pressure, careful pushback, and polished workplace outputs.

Teaching stance: this is language and workplace-communication training, not legal, medical, financial, safety, or regulatory advice. Instructors should connect every scenario to the learner's current company policies, local rules, and approved procedures.

Dialogue Practice Method

Read each exchange once for meaning, once for tone, and once for decision structure. Then complete the missing language by selecting one of four options and check the rationale at the end.

1. Demand Planning and Forecast Bias

Setting

Sales raises the forecast after a promotion begins.

Speaker	Line
Demand planner	Increase production commitments immediately.
Sales manager	Forecast bias, lead time, capacity, and inventory exposure need review.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm forecast, forecast bias, the owner, and the evidence standard before we commit.
Demand planner	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short demand-planning exception note. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: forecast, forecast bias.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects forecast bias.

Option	Phrase
A	forecast
B	forecast bias
C	demand signal
D	S&OP

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Increase production commitments immediately.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	A demand-planning exception note is unnecessary; verbal assurance should be enough.
B	I understand the urgency. I need to verify forecast and forecast bias against the stated constraint before I recommend the next step.
C	decision owner

Option	Phrase
D	We should act now and resolve forecast after the result is visible.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - Sales raises the forecast after a promotion begins. - what should happen next?

Option	Phrase
A	evidence threshold
B	approval path
C	Review the stated constraint with the accountable owner, then prepare the demand-planning exception note with the evidence, tradeoff, and requested decision.
D	Wait for the problem to become visible before assigning an owner or evidence source.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

2. Procurement and Supplier Performance

Setting

A supplier misses delivery but promises recovery next week.

Speaker	Line
Buyer	Accept the promise and update the plan.
Supplier account manager	Capacity, allocation, purchase order terms, and recovery evidence are unclear.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm purchase order, lead time, the owner, and the evidence standard before we commit.
Buyer	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short supplier recovery plan. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: purchase order, lead time.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects lead time.

Option	Phrase
A	purchase order

Option	Phrase
B	approval path
C	operating constraint
D	decision owner

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Accept the promise and update the plan.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	A supplier recovery plan is unnecessary; verbal assurance should be enough.
B	I disagree, but I cannot name the boundary or the decision the group needs to make.
C	evidence threshold
D	I understand the urgency. I need to verify purchase order and lead time against the stated constraint before I recommend the next step.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A supplier misses delivery but promises recovery next week. - what should happen next?

Option	Phrase
A	evidence threshold
B	approval path
C	Review the stated constraint with the accountable owner, then prepare the supplier recovery plan with the evidence, tradeoff, and requested decision.
D	Wait for the problem to become visible before assigning an owner or evidence source.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

3. Inventory, Safety Stock, and Service Levels

Setting

Finance wants to reduce inventory across all SKUs.

Speaker	Line
Supply-chain analyst	Cut safety stock by the same percentage.
Finance partner	Demand variability, lead time, margin, service level, and stockout risk differ by item.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm safety stock, stockout, the owner, and the evidence standard before we commit.

Speaker	Line
Supply-chain analyst	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short inventory segmentation memo. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: safety stock, stockout.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects stockout.

Option	Phrase
A	approval path
B	operating constraint
C	decision owner
D	safety stock

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Cut safety stock by the same percentage.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	A inventory segmentation memo is unnecessary; verbal assurance should be enough.
B	I disagree, but I cannot name the boundary or the decision the group needs to make.
C	evidence threshold
D	I understand the urgency. I need to verify safety stock and stockout against the stated constraint before I recommend the next step.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - Finance wants to reduce inventory across all SKUs. - what should happen next?

Option	Phrase
A	Accept the request immediately because the stakeholder has already expressed urgency.
B	Send every available detail to senior leaders without identifying the decision they need to make.
C	Review the stated constraint with the accountable owner, then prepare the inventory segmentation memo with the evidence, tradeoff, and requested decision.
D	decision owner

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

4. Warehousing and Fulfillment

Setting

Orders are late because pick accuracy is falling.

Speaker	Line
Warehouse manager	Add overtime until backlog clears.
Operations director	Slotting, labor, scanner data, training, and error types need diagnosis.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm pick rate, slotting, the owner, and the evidence standard before we commit.
Warehouse manager	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short fulfillment recovery update. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: pick rate, slotting.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects slotting.

Option	Phrase
A	pick rate
B	slotting
C	cycle count
D	backlog

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Add overtime until backlog clears.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	I understand the urgency. I need to verify pick rate and slotting against the stated constraint before I recommend the next step.
B	operating constraint
C	decision owner
D	We should act now and resolve pick rate after the result is visible.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - Orders are late because pick accuracy is falling. - what should happen next?

Option	Phrase
A	operating constraint
B	decision owner
C	Review the stated constraint with the accountable owner, then prepare the fulfillment recovery update with the evidence, tradeoff, and requested decision.
D	approval path

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

5. Freight, Routing, and Carrier Delays

Setting

A carrier misses pickup before a major customer shipment.

Speaker	Line
Logistics coordinator	Blame the carrier and wait.
Customer service manager	Mode, route, cutoff time, expedite cost, and customer promise need a decision.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm incoterms, carrier, the owner, and the evidence standard before we commit.
Logistics coordinator	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short freight escalation notice. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: incoterms, carrier.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects carrier.

Option	Phrase
A	decision owner
B	carrier
C	incoterms

Option	Phrase
D	operating constraint

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Blame the carrier and wait.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	operating constraint
B	decision owner
C	We should act now and resolve incoterms after the result is visible.
D	I understand the urgency. I need to verify incoterms and carrier against the stated constraint before I recommend the next step.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A carrier misses pickup before a major customer shipment. - what should happen next?

Option	Phrase
A	operating constraint
B	Review the stated constraint with the accountable owner, then prepare the freight escalation notice with the evidence, tradeoff, and requested decision.
C	evidence threshold
D	approval path

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

6. Customs, Trade Compliance, and Documentation

Setting

A shipment is held because the commercial invoice has inconsistent data.

Speaker	Line
Trade compliance lead	Ask customs to release it anyway.
Freight forwarder	Classification, country of origin, valuation, and document consistency matter.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm HS code, country of origin, the owner, and the evidence standard before we commit.
Trade compliance lead	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short customs hold response. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: HS code, country of origin.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects country of origin.

Option	Phrase
A	HS code
B	operating constraint
C	decision owner
D	country of origin

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Ask customs to release it anyway.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	I disagree, but I cannot name the boundary or the decision the group needs to make.
B	I understand the urgency. I need to verify HS code and country of origin against the stated constraint before I recommend the next step.
C	We should act now and resolve HS code after the result is visible.
D	A customs hold response is unnecessary; verbal assurance should be enough.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A shipment is held because the commercial invoice has inconsistent data. - what should happen next?

Option	Phrase
A	evidence threshold
B	Review the stated constraint with the accountable owner, then prepare the customs hold response with the evidence, tradeoff, and requested decision.
C	Send every available detail to senior leaders without identifying the decision they need to make.
D	Wait for the problem to become visible before assigning an owner or evidence source.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

7. Supply Risk and Business Continuity

Setting

A port strike threatens inbound components.

Speaker	Line
Supply-chain director	Promise no customer impact.
Sales operations	Allocation, alternate sources, inventory position, and customer priority need governance.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm business continuity, dual sourcing, the owner, and the evidence standard before we commit.
Supply-chain director	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short supply risk brief. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: business continuity, dual sourcing.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice**1. Complete the field language**

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects dual sourcing.

Option	Phrase
A	constraint
B	evidence threshold
C	approval path
D	business continuity

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Promise no customer impact.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	A supply risk brief is unnecessary; verbal assurance should be enough.
B	I disagree, but I cannot name the boundary or the decision the group needs to make.
C	I understand the urgency. I need to verify business continuity and dual sourcing against the stated constraint before I recommend the next step.
D	We should act now and resolve business continuity after the result is visible.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A port strike threatens inbound components. - what should happen next?

Option	Phrase
A	Review the stated constraint with the accountable owner, then prepare the supply risk brief with the evidence, tradeoff, and requested decision.
B	Accept the request immediately because the stakeholder has already expressed urgency.
C	Send every available detail to senior leaders without identifying the decision they need to make.
D	Wait for the problem to become visible before assigning an owner or evidence source.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

8. Executive S&OP Decisions

Setting

Sales, finance, and operations disagree on next quarter's plan.

Speaker	Line
Operations VP	Use the most optimistic demand view.
Demand planning lead	The executive team must agree on assumptions, risk, upside, and owners.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm S&OP, consensus plan, the owner, and the evidence standard before we commit.
Operations VP	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short S&OP decision summary. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: S&OP, consensus plan.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects consensus plan.

Option	Phrase
A	approval path
B	S&OP
C	owner
D	evidence threshold

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Use the most optimistic demand view.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	A S&OP decision summary is unnecessary; verbal assurance should be enough.
B	I disagree, but I cannot name the boundary or the decision the group needs to make.
C	evidence threshold
D	I understand the urgency. I need to verify S&OP and consensus plan against the stated constraint before I recommend the next step.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - Sales, finance, and operations disagree on next quarter's plan. - what should happen next?

Option	Phrase
A	Review the stated constraint with the accountable owner, then prepare the S&OP decision summary with the evidence, tradeoff, and requested decision.
B	decision owner
C	Accept the request immediately because the stakeholder has already expressed urgency.
D	Send every available detail to senior leaders without identifying the decision they need to make.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

Answer Key and Rationale

Check each stage after completing the practice sequence. The rationale explains the decision skill the strongest response demonstrates.

Demand Planning and Forecast Bias - 1. Complete the field language

Correct answer	Why it fits
A. forecast	'forecast' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Demand Planning and Forecast Bias - 2. Choose the strongest professional response

Correct answer	Why it fits
B. I understand the urgency. I need to verify forecast and forecast bias against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Demand Planning and Forecast Bias - 3. Select the next decision move

Correct answer	Why it fits
C. Review the stated constraint with the accountable owner, then prepare the demand-planning exception note with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Procurement and Supplier Performance - 1. Complete the field language

Correct answer	Why it fits
A. purchase order	'purchase order' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Procurement and Supplier Performance - 2. Choose the strongest professional response

Correct answer	Why it fits
D. I understand the urgency. I need to verify purchase order and lead time against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Procurement and Supplier Performance - 3. Select the next decision move

Correct answer	Why it fits
C. Review the stated constraint with the accountable owner, then prepare the supplier recovery plan with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Inventory, Safety Stock, and Service Levels - 1. Complete the field language

Correct answer	Why it fits
D. safety stock	'safety stock' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Inventory, Safety Stock, and Service Levels - 2. Choose the strongest professional response

Correct answer	Why it fits
D. I understand the urgency. I need to verify safety stock and stockout against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Inventory, Safety Stock, and Service Levels - 3. Select the next decision move

Correct answer	Why it fits
C. Review the stated constraint with the accountable owner, then prepare the inventory segmentation memo with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Warehousing and Fulfillment - 1. Complete the field language

Correct answer	Why it fits
A. pick rate	'pick rate' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Warehousing and Fulfillment - 2. Choose the strongest professional response

Correct answer	Why it fits
A. I understand the urgency. I need to verify pick rate and slotting against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Warehousing and Fulfillment - 3. Select the next decision move

Correct answer	Why it fits
C. Review the stated constraint with the accountable owner, then prepare the fulfillment recovery update with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Freight, Routing, and Carrier Delays - 1. Complete the field language

Correct answer	Why it fits
C. incoterms	'incoterms' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Freight, Routing, and Carrier Delays - 2. Choose the strongest professional response

Correct answer	Why it fits
D. I understand the urgency. I need to verify incoterms and carrier against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Freight, Routing, and Carrier Delays - 3. Select the next decision move

Correct answer	Why it fits
B. Review the stated constraint with the accountable owner, then prepare the freight escalation notice with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Customs, Trade Compliance, and Documentation - 1. Complete the field language

Correct answer	Why it fits
A. HS code	'HS code' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Customs, Trade Compliance, and Documentation - 2. Choose the strongest professional response

Correct answer	Why it fits
B. I understand the urgency. I need to verify HS code and country of origin against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Customs, Trade Compliance, and Documentation - 3. Select the next decision move

Correct answer	Why it fits
B. Review the stated constraint with the accountable owner, then prepare the customs hold response with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Supply Risk and Business Continuity - 1. Complete the field language

Correct answer	Why it fits
D. business continuity	'business continuity' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Supply Risk and Business Continuity - 2. Choose the strongest professional response

Correct answer	Why it fits
C. I understand the urgency. I need to verify business continuity and dual sourcing against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Supply Risk and Business Continuity - 3. Select the next decision move

Correct answer	Why it fits
A. Review the stated constraint with the accountable owner, then prepare the supply risk brief with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Executive S&OP Decisions - 1. Complete the field language

Correct answer	Why it fits
B. S&OP	'S&OP' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Executive S&OP Decisions - 2. Choose the strongest professional response

Correct answer	Why it fits
D. I understand the urgency. I need to verify S&OP and consensus plan against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Executive S&OP Decisions - 3. Select the next decision move

Correct answer	Why it fits
A. Review the stated constraint with the accountable owner, then prepare the S&OP decision summary with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.
