

Telecommunications English Dialogue Lab

Realistic field-specific dialogues, role-play variations, and observer checklists

Audience: network operations staff, telecom engineers, field technicians, customer operations teams, product managers, regulatory staff, and telecom project leaders

Focus: A telecommunications English curriculum for network reliability, outages, fiber and wireless deployment, service provisioning, field operations, regulatory issues, customer escalations, and technical coordination.

Designed for advanced ESL learners who already use professional English and need industry-specific terminology, realistic meetings, role-play pressure, careful pushback, and polished workplace outputs.

Teaching stance: this is language and workplace-communication training, not legal, medical, financial, safety, or regulatory advice. Instructors should connect every scenario to the learner's current company policies, local rules, and approved procedures.

Dialogue Practice Method

Read each exchange once for meaning, once for tone, and once for decision structure. Then complete the missing language by selecting one of four options and check the rationale at the end.

1. Network Operations and Outage Bridges

Setting

A regional outage affects enterprise customers.

Speaker	Line
NOC manager	Give a restoration time before diagnosis is complete.
Enterprise support lead	Fault isolation, affected services, redundancy, field dispatch, and ETA confidence matter.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm NOC, outage, the owner, and the evidence standard before we commit.
NOC manager	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short outage bridge update. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: NOC, outage.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects outage.

Option	Phrase
A	decision owner
B	outage
C	NOC
D	operating constraint

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Give a restoration time before diagnosis is complete.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	A outage bridge update is unnecessary; verbal assurance should be enough.
B	I understand the urgency. I need to verify NOC and outage against the stated constraint before I recommend the next step.
C	decision owner

Option	Phrase
D	We should act now and resolve NOC after the result is visible.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A regional outage affects enterprise customers. - what should happen next?

Option	Phrase
A	Wait for the problem to become visible before assigning an owner or evidence source.
B	evidence threshold
C	approval path
D	Review the stated constraint with the accountable owner, then prepare the outage bridge update with the evidence, tradeoff, and requested decision.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

2. Fiber Deployment and Construction Coordination

Setting

A sales team promises service before fiber construction is complete.

Speaker	Line
Deployment manager	Keep the promise and push construction.
Sales director	Permits, pole access, make-ready, splicing, and testing affect timeline.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm fiber, make-ready, the owner, and the evidence standard before we commit.
Deployment manager	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short fiber deployment status. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: fiber, make-ready.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects make-ready.

Option	Phrase
A	fiber

Option	Phrase
B	make-ready
C	splicing
D	permit

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Keep the promise and push construction.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	operating constraint
B	I understand the urgency. I need to verify fiber and make-ready against the stated constraint before I recommend the next step.
C	evidence threshold
D	approval path

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A sales team promises service before fiber construction is complete. - what should happen next?

Option	Phrase
A	decision owner
B	Review the stated constraint with the accountable owner, then prepare the fiber deployment status with the evidence, tradeoff, and requested decision.
C	approval path
D	operating constraint

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

3. Wireless Capacity and Coverage

Setting

A customer complains that 5G coverage is unreliable indoors.

Speaker	Line
RF engineer	Say coverage maps show service.
Account manager	Spectrum, building penetration, congestion, device type, and site density matter.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm spectrum, coverage, the owner, and the evidence standard before we commit.

Speaker	Line
RF engineer	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short coverage explanation. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: spectrum, coverage.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects coverage.

Option	Phrase
A	evidence threshold
B	approval path
C	spectrum
D	congestion

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Say coverage maps show service.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	decision owner
B	I understand the urgency. I need to verify spectrum and coverage against the stated constraint before I recommend the next step.
C	approval path
D	operating constraint

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A customer complains that 5G coverage is unreliable indoors. - what should happen next?

Option	Phrase
A	Wait for the problem to become visible before assigning an owner or evidence source.
B	evidence threshold
C	Review the stated constraint with the accountable owner, then prepare the coverage explanation with the evidence, tradeoff, and requested decision.
D	Send every available detail to senior leaders without identifying the decision they need to make.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

4. Provisioning and Service Activation

Setting

A circuit is sold but not provisioned by the target date.

Speaker	Line
Provisioning coordinator	Tell the customer activation is pending.
Customer success manager	Order status, dependencies, testing, CPE, and carrier coordination need clarity.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm provisioning, CPE, the owner, and the evidence standard before we commit.
Provisioning coordinator	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short activation delay update. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: provisioning, CPE.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects CPE.

Option	Phrase
A	provisioning
B	approval path
C	operating constraint
D	decision owner

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Tell the customer activation is pending.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	decision owner
B	We should act now and resolve provisioning after the result is visible.
C	A activation delay update is unnecessary; verbal assurance should be enough.

Option	Phrase
D	I understand the urgency. I need to verify provisioning and CPE against the stated constraint before I recommend the next step.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A circuit is sold but not provisioned by the target date. - what should happen next?

Option	Phrase
A	Send every available detail to senior leaders without identifying the decision they need to make.
B	Wait for the problem to become visible before assigning an owner or evidence source.
C	Review the stated constraint with the accountable owner, then prepare the activation delay update with the evidence, tradeoff, and requested decision.
D	Accept the request immediately because the stakeholder has already expressed urgency.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

5. Field Service and Dispatch

Setting

A technician returns for a third visit to the same site.

Speaker	Line
Field supervisor	Send another tech without deeper review.
Support agent	Root cause, equipment, signal levels, inside wiring, and dispatch notes need analysis.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm truck roll, signal level, the owner, and the evidence standard before we commit.
Field supervisor	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short repeat-dispatch review. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: truck roll, signal level.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects signal level.

Option	Phrase
A	dispatch

Option	Phrase
B	inside wiring
C	truck roll
D	signal level

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Send another tech without deeper review.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	I understand the urgency. I need to verify truck roll and signal level against the stated constraint before I recommend the next step.
B	We should act now and resolve truck roll after the result is visible.
C	A repeat-dispatch review is unnecessary; verbal assurance should be enough.
D	I disagree, but I cannot name the boundary or the decision the group needs to make.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A technician returns for a third visit to the same site. - what should happen next?

Option	Phrase
A	Accept the request immediately because the stakeholder has already expressed urgency.
B	Send every available detail to senior leaders without identifying the decision they need to make.
C	Wait for the problem to become visible before assigning an owner or evidence source.
D	Review the stated constraint with the accountable owner, then prepare the repeat-dispatch review with the evidence, tradeoff, and requested decision.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

6. Regulatory and Emergency Services

Setting

A product change may affect emergency call routing.

Speaker	Line
Regulatory manager	Launch and monitor issues.
Product manager	Testing, regulatory obligations, customer notice, and risk review are required.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm E911, lawful intercept, the owner, and the evidence standard before we commit.

Speaker	Line
Regulatory manager	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short regulatory readiness note. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: E911, lawful intercept.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects lawful intercept.

Option	Phrase
A	E911
B	evidence threshold
C	approval path
D	operating constraint

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Launch and monitor issues.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	We should act now and resolve E911 after the result is visible.
B	A regulatory readiness note is unnecessary; verbal assurance should be enough.
C	I disagree, but I cannot name the boundary or the decision the group needs to make.
D	I understand the urgency. I need to verify E911 and lawful intercept against the stated constraint before I recommend the next step.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A product change may affect emergency call routing. - what should happen next?

Option	Phrase
A	operating constraint
B	decision owner
C	Accept the request immediately because the stakeholder has already expressed urgency.
D	Review the stated constraint with the accountable owner, then prepare the regulatory readiness note with the evidence, tradeoff, and requested decision.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

7. Customer Churn and Service Recovery

Setting

A major account threatens to leave after repeated outages.

Speaker	Line
Account director	Offer a discount immediately.
Network operations	SLA credits, root cause, reliability plan, account trust, and executive ownership matter.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm churn, SLA credit, the owner, and the evidence standard before we commit.
Account director	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short retention recovery plan. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: churn, SLA credit.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects SLA credit.

Option	Phrase
A	approval path
B	operating constraint
C	decision owner
D	churn

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Offer a discount immediately.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	decision owner
B	We should act now and resolve churn after the result is visible.
C	A retention recovery plan is unnecessary; verbal assurance should be enough.
D	I understand the urgency. I need to verify churn and SLA credit against the stated constraint before I recommend the next step.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A major account threatens to leave after repeated outages. - what should happen next?

Option	Phrase
A	Accept the request immediately because the stakeholder has already expressed urgency.
B	Send every available detail to senior leaders without identifying the decision they need to make.
C	Review the stated constraint with the accountable owner, then prepare the retention recovery plan with the evidence, tradeoff, and requested decision.
D	decision owner

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

8. Vendor and Equipment Lifecycle

Setting

A vendor announces end of support for core equipment.

Speaker	Line
Network architect	Delay replacement until failure.
Procurement lead	Lifecycle risk, spares, maintenance, interoperability, and capital planning need review.
ESL learner	I understand the goal, but we need to separate urgency from control. For this decision, I need to confirm end of support, interoperability, the owner, and the evidence standard before we commit.
Network architect	What would let us move forward without slowing everything down?
ESL learner	Let's document the assumption, define the risk trigger, and create a short equipment lifecycle brief. Then we can decide whether to proceed, escalate, or revise the plan.

Language notes

- The learner names the field-specific control point instead of giving a vague no: end of support, interoperability.
- The response preserves the business goal while adding evidence, owner, and next-step discipline.

Three-step decision practice

1. Complete the field language

Choose the term that belongs in this decision point.

Before we act, I need to confirm the _____ and how it affects interoperability.

Option	Phrase
A	spares
B	capital plan
C	end of support

Option	Phrase
D	interoperability

2. Choose the strongest professional response

Select the response that preserves the relationship while setting an evidence-based boundary.

A stakeholder says, 'Delay replacement until failure.' Which response gives a useful, professional form of pushback?

Option	Phrase
A	A equipment lifecycle brief is unnecessary; verbal assurance should be enough.
B	I disagree, but I cannot name the boundary or the decision the group needs to make.
C	I understand the urgency. I need to verify end of support and interoperability against the stated constraint before I recommend the next step.
D	We should act now and resolve end of support after the result is visible.

3. Select the next decision move

Choose the action that turns the discussion into a controlled workplace decision.

Given this situation - A vendor announces end of support for core equipment. - what should happen next?

Option	Phrase
A	Send every available detail to senior leaders without identifying the decision they need to make.
B	Wait for the problem to become visible before assigning an owner or evidence source.
C	Review the stated constraint with the accountable owner, then prepare the equipment lifecycle brief with the evidence, tradeoff, and requested decision.
D	Accept the request immediately because the stakeholder has already expressed urgency.

Observer checklist

- Did the learner name the decision and the risk?
- Did the learner use at least two industry terms accurately?
- Did the learner give a concrete next step without overpromising?

Answer Key and Rationale

Check each stage after completing the practice sequence. The rationale explains the decision skill the strongest response demonstrates.

Network Operations and Outage Bridges - 1. Complete the field language

Correct answer	Why it fits
C. NOC	'NOC' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Network Operations and Outage Bridges - 2. Choose the strongest professional response

Correct answer	Why it fits
B. I understand the urgency. I need to verify NOC and outage against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Network Operations and Outage Bridges - 3. Select the next decision move

Correct answer	Why it fits
D. Review the stated constraint with the accountable owner, then prepare the outage bridge update with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Fiber Deployment and Construction Coordination - 1. Complete the field language

Correct answer	Why it fits
A. fiber	'fiber' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Fiber Deployment and Construction Coordination - 2. Choose the strongest professional response

Correct answer	Why it fits
B. I understand the urgency. I need to verify fiber and make-ready against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Fiber Deployment and Construction Coordination - 3. Select the next decision move

Correct answer	Why it fits
B. Review the stated constraint with the accountable owner, then prepare the fiber deployment status with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Wireless Capacity and Coverage - 1. Complete the field language

Correct answer	Why it fits
C. spectrum	'spectrum' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Wireless Capacity and Coverage - 2. Choose the strongest professional response

Correct answer	Why it fits
B. I understand the urgency. I need to verify spectrum and coverage against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Wireless Capacity and Coverage - 3. Select the next decision move

Correct answer	Why it fits
C. Review the stated constraint with the accountable owner, then prepare the coverage explanation with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Provisioning and Service Activation - 1. Complete the field language

Correct answer	Why it fits
A. provisioning	'provisioning' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Provisioning and Service Activation - 2. Choose the strongest professional response

Correct answer	Why it fits
D. I understand the urgency. I need to verify provisioning and CPE against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Provisioning and Service Activation - 3. Select the next decision move

Correct answer	Why it fits
C. Review the stated constraint with the accountable owner, then prepare the activation delay update with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Field Service and Dispatch - 1. Complete the field language

Correct answer	Why it fits
C. truck roll	'truck roll' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Field Service and Dispatch - 2. Choose the strongest professional response

Correct answer	Why it fits
A. I understand the urgency. I need to verify truck roll and signal level against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Field Service and Dispatch - 3. Select the next decision move

Correct answer	Why it fits
D. Review the stated constraint with the accountable owner, then prepare the repeat-dispatch review with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Regulatory and Emergency Services - 1. Complete the field language

Correct answer	Why it fits
A. E911	'E911' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Regulatory and Emergency Services - 2. Choose the strongest professional response

Correct answer	Why it fits
D. I understand the urgency. I need to verify E911 and lawful intercept against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Regulatory and Emergency Services - 3. Select the next decision move

Correct answer	Why it fits
D. Review the stated constraint with the accountable owner, then prepare the regulatory readiness note with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Customer Churn and Service Recovery - 1. Complete the field language

Correct answer	Why it fits
D. churn	'churn' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Customer Churn and Service Recovery - 2. Choose the strongest professional response

Correct answer	Why it fits
D. I understand the urgency. I need to verify churn and SLA credit against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Customer Churn and Service Recovery - 3. Select the next decision move

Correct answer	Why it fits
C. Review the stated constraint with the accountable owner, then prepare the retention recovery plan with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.

Vendor and Equipment Lifecycle - 1. Complete the field language

Correct answer	Why it fits
C. end of support	'end of support' is the field-specific variable that must be checked before the team can proceed responsibly. This is the decision variable the learner must confirm before the team acts.

Vendor and Equipment Lifecycle - 2. Choose the strongest professional response

Correct answer	Why it fits
C. I understand the urgency. I need to verify end of support and interoperability against the stated constraint before I recommend the next step.	The strongest response names the field terms, the constraint, and the condition for a recommendation without sounding defensive or passive. This response is specific, respectful, and appropriately conditional. It converts pressure into a controlled decision.

Vendor and Equipment Lifecycle - 3. Select the next decision move

Correct answer	Why it fits
C. Review the stated constraint with the accountable owner, then prepare the equipment lifecycle brief with the evidence, tradeoff, and requested decision.	The best next move makes the evidence, tradeoff, owner, and requested decision visible in a concise workplace artifact. This sequence creates a concise, decision-ready artifact with a clear owner and evidence boundary.
