**Concept #32** ▶ **"Even if" vs "Even though"**

Compare the two styles below

| Hypothetical, unreal, imaginary scenarios.                          | Real-life, actual, non-imaginary situations.                             |
|---------------------------------------------------------------------|--------------------------------------------------------------------------|
| 1. <u>Even if</u> I were sick, I would still go to work. 🤔          | 1. <u>Even though</u> I am sick, I'm still going to work. 🤒              |
| 2. <u>Even if</u> I were rich, I would not buy a car. 🤔             | 2. <u>Even though</u> I am rich, I will not buy a car. 🤔                 |
| 3. <u>Even if</u> they leave now, they'd still be late to school. 🤔 | 3. <u>Even though</u> they've already left, they'll be late to school. 🤒 |
| 4. <u>Even if</u> he had won, he wouldn't have been satisfied. 🤔    | 4. <u>Even though</u> he won, he's not satisfied. 🤒                      |
| 5. <u>Even if</u> the city were smaller, I would still get lost. 🤔  | 5. <u>Even though</u> the city is small, I still get lost. 🤒             |

We need either "if" or "though" in a context in which there is Y in spite of X such as the contexts seen above. In the quite different situation in which you say *'Even I will go'* you are saying you will go also, contrary to expectations.

|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Warm-up</b>          | Display the concept image and ask learners to predict the rule behind <b>"Even if" vs. "Even though"</b> before reading the explanation.           |
| <b>Model</b>            | Walk through the Core Idea and the sections on Key Points, Conclusion. Pause after each part so students can restate the pattern in plain English. |
| <b>Guided practice</b>  | Project two or three examples from the concept sheet and ask pairs to explain why each choice works, not just what the answer is.                  |
| <b>Independent work</b> | Assign the 24 practice items for quiet work, partner checking, and final feedback.                                                                 |
| <b>Closure</b>          | Ask students to create one new sentence or mini-example of their own that follows the same pattern.                                                |

## Likely Learner Errors

- Learners may overgeneralize the first pattern they notice. Keep returning to **Key Points, Conclusion** and ask students to explain what changes from one example to the next.
- Long explanations can hide the signal word or structure. Have students underline the exact phrase that tells them which form, pattern, or response is needed.
- If students can choose an answer but cannot explain it, ask them to justify their choice using words taken directly from the concept sheet.

## Differentiation and Delivery Notes

- Support: teach one section at a time, then send students back to **the examples** or the practice set so they can apply the same rule immediately.
- Pair work: let students compare answers aloud before you reveal the key. The explanation step is as important as the final answer.
- Extension: ask stronger students to write two fresh examples or a short dialogue that uses the same target language accurately.

## Model Language from the Concept Sheet

- "Even if I were sick, I would still go to work." Explanation: The speaker is considering the possibility of being sick (which may not be true)....
- "Even if I were rich, I would not buy a car." Explanation: The speaker is not rich, but they are considering a hypothetical scenario....
- "Even if they leave now, they'd still be late to school." Explanation: The possibility of leaving now is presented as a hypothetical scenario....
- "Even though I am sick, I'm still going to work." Explanation: The speaker is actually sick....
- "Even though I am rich, I will not buy a car." Explanation: The speaker is indeed rich, but despite this fact, they choose not to buy a car....
- "Even though they've already left, they'll be late to school." Explanation: The people have actually left, but despite this, they will still be late....

## Feedback Cues

- Item 01: Explanation: "Even if" is used for hypothetical situations. Option B is incorrect because "even though" is used for real situations, and "were rich" is hypothetical.
- Item 02: Explanation: "Even though" is used for real situations. Option B is incorrect because "even if" is used for hypothetical scenarios, which doesn't fit this context.
- Item 03: Explanation: "Even if" is used for hypothetical scenarios. Option B is incorrect because "even though" implies that the situation is real.
- Item 04: Explanation: "Even though" is used to describe a real situation, while "even if" is hypothetical. Option B incorrectly suggests that the situation is hypothetical.
- Item 05: Explanation: "Even if" is appropriate for hypothetical situations, while "even though" is for real ones. Option B incorrectly uses "even though" for a hypothetical scenario.
- Item 06: Explanation: "Even though" is used for real situations. Option B incorrectly uses "even if," which is for hypothetical scenarios.
