

ENGLISH FOR WORK / SEPTEMBER 2026

Aviation English

Conversation lab

8 complete workplace dialogues, followed by eight additional role-play cases. Study the exchanges, then make the conversation your own.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Study complete conversations. Find the right language, speak, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For aviation operations managers, airline staff, maintenance coordinators, safety teams, dispatchers, airport operations staff, ground handlers, and aviation-adjacent professionals.

Workplace coordination English. This course does not teach radiotelephony phraseology or certify aviation language proficiency; operational communication follows approved aviation procedures.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Inside this conversation lab

Original fictional training conversations in professional English. These are realistic scripts, not transcripts of actual people. The professional roles are the speaker labels; all figures, incidents, and organizations are invented.

01 A ramp safety concern

02 Operations control update

03 Maintenance status clarification

04 Passenger disruption update

05 Turnaround coordination

06 Restricted-area access

07 Incident report review

08 Audit readiness

Then try eight independent role-play cases, followed by feedback criteria and references.

Read it. Hear it. Make it yours.

1. Read the setting. Identify the roles, the immediate problem, and what each speaker needs.
2. Read the whole conversation aloud with a partner. In a group, give a third person the observer role. For three-speaker scripts, assign each professional a separate voice.
3. Notice how the speakers ask a specific question, qualify a claim, disagree, explain a technical point, or agree on a next step. Underline language you would actually use.
4. Cover the script. Recreate the exchange using the situation and professional roles. Keep the meaning, but change the wording.
5. Switch roles and introduce a complication: a missing record, a different priority, an unavailable colleague, or a changed assumption. End with a clear outcome or unresolved question.

Register and terminology

These colleagues use concise professional language. In an internal technical meeting, familiar abbreviations can be natural. With a new colleague or a client, expand unfamiliar terms and check understanding. Keep disagreement directed at the evidence or proposal, and match the degree of certainty to what is known.

Independent study

Speak each role aloud. Pause before the reply and supply your own response before revealing the next line. Record a second version using invented details, then compare its clarity and tone with the script.

Professional context

Workplace coordination English. This course does not teach radiotelephony phraseology or certify aviation language proficiency; operational communication follows approved aviation procedures.

FULL DIALOGUE 01 / 6 SPEAKING TURNS

A ramp safety concern

Ground staff raise a concern before turnaround work continues.

Roles: Ramp agent / Ramp supervisor

Ramp agent: The equipment is positioned inside the marked clearance area. I've stopped my task and raised the concern.

Ramp supervisor: Thank you. Keep the activity paused while we assess it through the approved ramp procedure.

Ramp agent: The departure is already late. Operations is asking us to recover time.

Ramp supervisor: I'll coordinate the delay impact. Schedule pressure doesn't remove the safety concern.

Ramp agent: I'll give you the equipment reference and the observed position.

Ramp supervisor: I'll arrange the authorized correction and confirm the conditions for resuming work.

Notice the professional language

Discuss this wording: "The equipment is positioned inside the marked clearance area. I've stopped my task and raised the concern." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 02 / 6 SPEAKING TURNS

Operations control update

Airline staff coordinate a delayed inbound aircraft.

Roles: Operations controller / Station manager

Operations controller: The inbound is delayed, and the current arrival estimate remains subject to change.

Station manager: Which onward services and ground resources should we review first?

Operations controller: The connecting passengers, crew availability, and turnaround resources. The responsible teams are checking the constraints.

Station manager: I'll confirm gate and handling availability rather than assume the original plan still works.

Operations controller: I'll keep the operating options separate from any decision still awaiting authorized approval.

Station manager: Send the next confirmed update so our passenger communication matches the actual operational status.

Notice the professional language

Discuss this wording: "Which onward services and ground resources should we review first?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 03 / 6 SPEAKING TURNS

Maintenance status clarification

Operations asks about an aircraft maintenance item.

Roles: Operations coordinator / Maintenance controller

Operations coordinator: The report mentions a possible deferral. Does that mean the aircraft is cleared to operate?

Maintenance controller: No. Applicability, conditions, and required actions must be assessed under the approved maintenance process.

Operations coordinator: I should keep the aircraft status pending rather than say the item is resolved.

Maintenance controller: Correct. The authorized maintenance personnel will communicate the recorded disposition.

Operations coordinator: I'll update operations with that distinction and avoid interpreting the MEL entry myself.

Maintenance controller: I'll provide the confirmed status and any operational coordination requirements through the established channel.

Notice the professional language

MEL - Minimum equipment list identifying aircraft equipment that may be inoperative under specified conditions while the aircraft remains dispatchable.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 04 / 6 SPEAKING TURNS

Passenger disruption update

An airport team prepares a delay announcement.

Roles: Gate supervisor / Customer service manager

Gate supervisor: Passengers are asking whether the flight will depart in thirty minutes. We don't have that confirmation.

Customer service manager: State the verified delay and give a time for the next update, not an invented departure time.

Gate supervisor: Some passengers may miss connections. Can we begin reviewing assistance options?

Customer service manager: Yes, through the applicable rebooking and assistance process, using their actual itineraries.

Gate supervisor: I'll coordinate the queue and keep individual details out of the public announcement.

Customer service manager: I'll arrange additional service support and brief the team on the current information.

Notice the professional language

Discuss this wording: "Some passengers may miss connections. Can we begin reviewing assistance options?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 05 / 6 SPEAKING TURNS

Turnaround coordination

A station team reviews a late turnaround task.

Roles: Turnaround coordinator / Ground handling lead

Turnaround coordinator: The cleaning task is complete, but the loading update hasn't been acknowledged.

Ground handling lead: I'll confirm the status with the authorized loading team. We shouldn't infer completion from an empty belt.

Turnaround coordinator: Please identify any outstanding task and its owner.

Ground handling lead: I will. The relevant records and checks must be completed through the approved process.

Turnaround coordinator: I'll update the turnaround plan using confirmed milestones.

Ground handling lead: I'll report back through the agreed channel so all teams work from the same status.

Notice the professional language

Discuss this wording: "The cleaning task is complete, but the loading update hasn't been acknowledged." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 06 / 6 SPEAKING TURNS

Restricted-area access

An airport contractor arrives without confirmed access authorization.

Roles: Airport operations officer / Contractor coordinator

Airport operations officer: The technician is here, but their access authorization isn't confirmed in our system.

Contractor coordinator: I'll contact the authorized access team. They shouldn't enter while that remains unresolved.

Airport operations officer: Can you verify the work order and the required escort arrangements too?

Contractor coordinator: Yes, through the airport's approved access process.

Airport operations officer: I'll explain the delay to the maintenance coordinator without bypassing the check.

Contractor coordinator: I'll confirm the permitted arrangements once the access team has reviewed the request.

Notice the professional language

Discuss this wording: "Can you verify the work order and the required escort arrangements too?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 07 / 6 SPEAKING TURNS

Incident report review

A safety team checks a factual occurrence report.

Roles: Safety analyst / Ground operations supervisor

Safety analyst: The draft says the driver was distracted. Is that observed or inferred?

Ground operations supervisor: Inferred. We observed the vehicle cross the line; we don't know why.

Safety analyst: Record the movement, time, location, and available evidence without assigning an unconfirmed cause.

Ground operations supervisor: I'll preserve the reports and route them through the occurrence-reporting process.

Safety analyst: Keep witness accounts distinguishable from the investigation's later findings.

Ground operations supervisor: I'll revise the wording and make sure the responsible safety team receives the complete factual record.

Notice the professional language

Discuss this wording: "The draft says the driver was distracted. Is that observed or inferred?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 08 / 6 SPEAKING TURNS

Audit readiness

An aviation team reviews missing training evidence.

Roles: Compliance coordinator / Operations manager

Compliance coordinator: The readiness checklist shows two training records we haven't verified.

Operations manager: The staff may have completed the sessions. Can we mark them complete provisionally?

Compliance coordinator: Mark the evidence status accurately and verify it through the approved records.

Operations manager: I'll contact the training team and identify any actual completion gaps.

Compliance coordinator: Record corrective actions with real dates; don't reconstruct attendance as if it were contemporaneous.

Operations manager: I'll track the actions and present the unresolved items openly at the readiness review.

Notice the professional language

Discuss this wording: "The staff may have completed the sessions. Can we mark them complete provisionally?"
What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

Eight more situations to make your own

The following cases are open role plays. They give you facts, contrasting roles, useful expressions, and a short model response. Use what you learned from the complete dialogues to create a longer exchange.

Preparation: two minutes. Conversation: three to five minutes. Feedback: one minute. Switch roles and repeat with the second-round challenge.

ROLE-PLAY CASE 01

Safety Culture and Stop-Work Authority

SHARED CASE

In a ground-operations language exercise, a team member sees a possible hazard near equipment. The local safety process applies.

Role A | Responding professional

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Useful expressions

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know ...

Cover this until after your first attempt

I see a possible hazard near the equipment. Please alert the responsible person and follow the local safety process. I'll state the location and observation clearly so the concern can be assessed.

Second round

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 02

Operations Control and Dispatch Coordination

SHARED CASE

An operations update has a provisional aircraft assignment and an unresolved crew-status question. A draft message calls the plan confirmed.

Role A | Responding professional

Distinguish completed work from pending work and explain its impact. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

Useful expressions

We have completed ...; ... remains open.

As of ..., the status is

The next update will cover

Cover this until after your first attempt

The aircraft assignment is provisional, and crew status still needs confirmation. I'll distinguish those open items from confirmed information in the operations update.

Second round

The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 03

Maintenance Deferrals and MEL Language

SHARED CASE

A maintenance coordination note mentions a deferral but omits the relevant reference and authorized status.

Role A | Responding professional

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Useful expressions

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Cover this until after your first attempt

Could you confirm the reference and current authorized status with maintenance control? I need accurate coordination information; I cannot infer airworthiness from an incomplete note.

Second round

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 04

Irregular Operations and Passenger Communication

SHARED CASE

Passengers receive conflicting messages about a delay. The next departure estimate has not been confirmed.

Role A | Responding professional

Acknowledge a communication problem and give a corrected message. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are frustrated because an earlier message created an expectation. Explain that expectation. Ask your partner to distinguish the correction from anything still uncertain.

Useful expressions

My earlier message did not make ... clear.

I'm sorry for The correct information is

Let me check that the revised explanation addresses

Cover this until after your first attempt

I'm sorry for the conflicting information. We are waiting for a confirmed update from the responsible team. I'll share the next verified information and explain the available assistance through our process.

Second round

The listener remains disappointed after the correction. Acknowledge the impact and restate the available next step calmly.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 05

Ground Handling and Turnaround Performance

SHARED CASE

A turnaround handoff identifies an open ground-service task but does not name who accepted it.

Role A | Responding professional

Give a handoff that the receiving person can confirm. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are taking over the work. Ask what remains open and repeat back the critical status or responsibility. Point out one detail that would be unsafe or misleading to assume.

Useful expressions

The current status is ...; the outstanding item is

The record shows

Please confirm who has accepted

Cover this until after your first attempt

This ground-service task is still open. Please confirm which team has accepted it and record the status in the agreed coordination channel before we describe the handoff as complete.

Second round

The intended recipient cannot take ownership. Keep the status clear and identify the need for an authorized reassignment.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 06

Security and Access Control

SHARED CASE

A visitor asks a staff member to bypass an access check because a meeting is running late.

Role A | Responding professional

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Useful expressions

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Cover this until after your first attempt

I understand the meeting is urgent, but access still needs to follow the approved process. Let me contact the authorized team to arrange the appropriate check and escort if required.

Second round

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 07

Incident Reporting and Investigation

SHARED CASE

An initial incident note says equipment damage was caused by a specific action, although the review is incomplete.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

The damage has been observed; its cause is still under review. I'll record the known sequence and distinguish witness reports from confirmed findings in the note.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 08

Regulatory Audits and Readiness

SHARED CASE

An audit preparation list has current records for most staff but three records still need verification.

Role A | Responding professional

Distinguish completed work from pending work and explain its impact. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

Useful expressions

We have completed ...; ... remains open.

As of ..., the status is

The next update will cover

Cover this until after your first attempt

Most records have been checked; three remain unverified. I'll list those items, their owners, and the follow-up status so the audit update shows the outstanding work clearly.

Second round

The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

Lesson conversations and speaking practice

The following sections match 05 and 06 on the industry webpage and in the learner workbook. Each lesson has three ten-turn conversations and two bounded speaking scenarios. These are original fictional teaching scripts, not transcripts of real people.

LESSON 01 / 05 • CONVERSATIONS / 1 OF 3

Request a hazard review near the cart

Fictional ground-operations language simulation, not operational phraseology: a worker observes loose material near a service cart; local safety procedures govern all actions.

01 • Ground services agent: I can see loose material beside the service cart. Please pause this task for a hazard review.

02 • Ground services supervisor: I hear your concern. Can you identify the location without approaching the equipment?

03 • Ground services agent: It's beside the cart marked C7. I haven't inspected it or established what it is.

04 • Ground services supervisor: Thank you. We'll use the local stop-work and reporting process, not make assumptions.

05 • Ground services agent: Could you confirm who will receive the report and coordinate the authorized assessment?

06 • Ground services supervisor: I'll receive it and contact the designated safety lead through our established process.

07 • Ground services agent: Should I describe the material as a confirmed equipment leak in the report?

08 • Ground services supervisor: No. Describe what you observed and keep the cause unconfirmed until assessed.

09 • Ground services agent: Understood. I'll report the location and observation, without claiming a technical diagnosis.

10 • Ground services supervisor: I'll confirm receipt. Speaking up with a specific concern supports our reporting culture.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 01 / 05 • CONVERSATIONS / 2 OF 3

A report needs an owner

Separate fictional safety-management exercise: a training report about poor lighting was submitted yesterday but has no assigned reviewer; no operational clearance is being discussed.

01 • Safety coordinator: Yesterday's lighting hazard report has a reference number, but no reviewer is assigned.

02 • Department manager: I saw it in the safety management system. Isn't submission enough to start follow-up?

03 • Safety coordinator: Submission records the concern. We still need an identified person to assess and respond.

04 • Department manager: What exactly are you asking me to arrange before the afternoon coordination meeting?

05 • Safety coordinator: Please identify the authorized reviewer and confirm who will update the person who reported it.

06 • Department manager: I can request that assignment now, but I can't promise the assessment will finish today.

07 • Safety coordinator: That's fine. The immediate request is ownership confirmation, not an unsupported completion deadline.

08 • Department manager: Should we close the report once a reviewer accepts it in the system?

09 • Safety coordinator: No. Acceptance and resolution are different; closure follows the applicable process and evidence.

10 • Department manager: I'll seek the assignment and report its status at the meeting, including anything still pending.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 01 / 05 • CONVERSATIONS / 3 OF 3

Make space for a contractor's concern

Separate fictional induction exercise: a contractor reports that a briefing diagram is unreadable; the team has not started the represented task.

01 • Contractor liaison: Our contractor cannot read the diagram in the task briefing. Please provide a legible approved copy.

02 • Training supervisor: Which part is unclear? I want the request to reach the correct document owner.

03 • Contractor liaison: The equipment labels blur when enlarged. We shouldn't ask the contractor to guess their meaning.

04 • Training supervisor: Agreed. I'll request the current readable version from document control before this exercise continues.

05 • Contractor liaison: Could you also confirm that asking for clarification won't be treated as poor preparation?

06 • Training supervisor: Yes. Our training discussion should support reporting concerns, not discourage questions about unclear information.

07 • Contractor liaison: Someone suggested using an old printed diagram because its labels are easier to read.

08 • Training supervisor: Readability alone doesn't establish that it's current. We need a verified version as well.

09 • Contractor liaison: I'll explain that the request concerns both legibility and version status, not just printing.

10 • Training supervisor: Good. We'll resume the language exercise with verified materials, without implying authorization for actual work.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 01 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Safety Culture and Stop-Work Authority

In a ground-operations language exercise, a team member sees a possible hazard near equipment. The local safety process applies.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Second round: The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Model for scenario 1: I see a possible hazard near the equipment. Please alert the responsible person and follow the local safety process. I'll state the location and observation clearly so the concern can be assessed.

Scenario 2 | A missing report acknowledgment

In a fictional safety exercise, a staff member submitted a hazard report this morning and received no acknowledgment. The hazard's assessment status is unknown. Ask the safety coordinator to confirm receipt and identify the follow-up owner.

Role A: Ground services employee: make a precise request without assuming the report was ignored.

Role B: Safety coordinator: agree to check receipt and ownership, without promising a technical outcome.

Possible opening: Could you check whether my hazard report was received and who is handling the follow-up?

Success checks

- Separate missing acknowledgment from confirmed inaction.
- Ask for receipt and ownership checks.
- Keep actual safety actions within the applicable local process.

Add a complication: A colleague suggests submitting the same report repeatedly until someone replies.

LESSON 02 / 05 • CONVERSATIONS / 1 OF 3

Aircraft assigned provisionally

Fictional operations-control briefing: aircraft routing is provisional and crew status remains unresolved; this is workplace English, not dispatch authorization.

01 • Operations coordinator: The draft says the plan is confirmed, but the aircraft assignment is still provisional.

02 • Dispatch liaison: You're right. We have completed the routing proposal, not the final assignment checks.

03 • Operations coordinator: What about crew status? The gate team is asking whether it can announce a settled plan.

04 • Dispatch liaison: That question remains with the authorized crew team. We cannot determine crew legality here.

05 • Operations coordinator: Then which completed action can I safely include in the coordination update this morning?

06 • Dispatch liaison: Say the routing proposal is prepared, while aircraft confirmation and crew-status verification remain pending.

07 • Operations coordinator: Does the proposed delay code establish why the flight will operate late today?

08 • Dispatch liaison: Not by itself. The draft code also needs verification before it's presented as final.

09 • Operations coordinator: I'll remove confirmed and list the unresolved checks with their responsible teams.

10 • Dispatch liaison: Good. Our next update should report verified changes, without converting planning work into authorization.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 02 / 05 • CONVERSATIONS / 2 OF 3

A revised route has not reached every team

Separate fictional coordination case: a revised aircraft-routing document is approved for internal planning, but station receipt is unconfirmed; no flight-release decision is involved.

01 • Network planner: The revised routing document is ready. Can I mark the station coordination task complete?

02 • Station coordinator: Not yet. You have approval for the planning document, but our receipt check remains open.

03 • Network planner: I sent it to the distribution list ten minutes ago. Doesn't that establish receipt?

04 • Station coordinator: It establishes sending, not that each relevant station has received and understood the revision.

05 • Network planner: What should I report to operations control while you check the station responses?

06 • Station coordinator: The document is issued for planning; acknowledgment from the affected stations is still pending.

07 • Network planner: Could a missing acknowledgment affect how the previous aircraft assignment is being discussed?

08 • Station coordinator: Yes, teams may still be working from the earlier proposal. We need confirmation, not speculation.

09 • Network planner: I'll keep distribution and acknowledgment as separate items in the dispatch coordination summary.

10 • Station coordinator: I'll gather the responses and flag any team that still needs the current planning version.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 02 / 05 • CONVERSATIONS / 3 OF 3

Separate the completed review from the open question

Separate fictional desk exercise: a delay summary's timestamps have been checked, but the reason classification remains under review.

01 • Operations analyst: I've checked all timestamps in the delay summary, so the report is ready for release.

02 • Duty coordinator: The timestamps are verified, but the delay code is still marked under review.

03 • Operations analyst: I overlooked that distinction. The timeline is complete; the reason classification remains unresolved.

04 • Duty coordinator: Exactly. What effect does that have on the summary we give the station manager?

05 • Operations analyst: We can explain the recorded sequence, but shouldn't present the proposed cause as confirmed.

06 • Duty coordinator: Does the dispatch liaison have responsibility for obtaining the classification decision in this exercise?

07 • Operations analyst: Yes, that assignment is listed. Their response hasn't arrived, so I'll keep it pending.

08 • Duty coordinator: Please make the next update specific instead of saying everything is almost finished.

09 • Operations analyst: I'll report verified timestamps, the open delay code, and the liaison responsible for its review.

10 • Duty coordinator: That gives the manager a usable status without implying that the entire report has approval.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 02 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Operations Control and Dispatch Coordination

An operations update has a provisional aircraft assignment and an unresolved crew-status question. A draft message calls the plan confirmed.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

Second round: The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Model for scenario 1: The aircraft assignment is provisional, and crew status still needs confirmation. I'll distinguish those open items from confirmed information in the operations update.

Scenario 2 | An update with two versions

A fictional station has received routing plan version 4, while a coordination slide still displays version 3. Version 4 is a planning proposal; aircraft and crew confirmation remain open. Give a brief status correction.

Role A: Operations planner: state which document has been received and what remains provisional.

Role B: Station manager: ask what can be shared internally without implying a confirmed operation.

Possible opening: The station has received version 4, but the slide still shows version 3 and neither is flight authorization.

Success checks

- Identify the version discrepancy.
- Distinguish receipt from completed operational checks.
- Preserve the provisional aircraft and crew status.

Add a complication: A colleague calls document receipt proof that all coordination checks are complete.

LESSON 03 / 05 • CONVERSATIONS / 1 OF 3

Which deferral reference?

Fictional maintenance coordination exercise: a note says deferred but lacks a reference and authorized status; no equipment decision is made in this dialogue.

01 • Maintenance coordinator: This note says deferred, but it doesn't identify the supporting reference or authorized status.

02 • Operations liaison: I assumed that word meant the aircraft could be used under the minimum equipment list.

03 • Maintenance coordinator: We can't establish that from this note. Which logbook entry does it refer to?

04 • Operations liaison: The entry reference is missing from the message I received. I'll request the linked record.

05 • Maintenance coordinator: Please also ask who recorded the status and which approved documentation supports it.

06 • Operations liaison: Should I search for a similar MEL item and suggest that reference to the team?

07 • Maintenance coordinator: No. A similar description doesn't establish applicability; that requires the authorized maintenance process.

08 • Operations liaison: Then I'll describe it as a clarification request, not an airworthiness or dispatch conclusion.

09 • Maintenance coordinator: Correct. Repeat the exact missing information so the recipient can answer without guessing.

10 • Operations liaison: I'll request the logbook reference, supporting approved document, and verified authorized status of this entry.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 03 / 05 • CONVERSATIONS / 2 OF 3

Closed message, open logbook question

Separate fictional case: a coordination ticket says closed, but the linked logbook extract is incomplete. Staff must clarify record meaning, not decide airworthiness.

01 • Records clerk: The coordination ticket is closed. Should I tell the planning desk the maintenance item is resolved?

02 • Maintenance records lead: Could you clarify what closed means in that ticket system: message handled or technical item resolved?

03 • Records clerk: I don't know. The extract attached to it ends before the status field.

04 • Maintenance records lead: Then we need the complete authorized record before describing the technical status to planning.

05 • Records clerk: Would it be enough to say deferred maintenance completed, since the administrative ticket is closed?

06 • Maintenance records lead: No. That would connect two statuses we haven't shown to be equivalent in this case.

07 • Records clerk: I'll ask the record owner for the full entry and the meaning of that closure label.

08 • Maintenance records lead: Good. Include the ticket identifier so they can clarify this exact record, not a general example.

09 • Records clerk: Until then, I'll report the ticket closure separately from the unverified maintenance status.

10 • Maintenance records lead: That's the distinction we need. Only the applicable authorized process can establish the operational implications.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 03 / 05 • CONVERSATIONS / 3 OF 3

A date without a label

Separate fictional language case: a maintenance summary contains a date beside a deferral, but no field label or source reference.

01 • Planning liaison: There's a date beside this deferral. Can I call it the maintenance completion date?

02 • Maintenance planner: What does the field label say? It might describe something different, and we shouldn't guess.

03 • Planning liaison: The copied summary has no label. It also omits the source record's reference number.

04 • Maintenance planner: Please obtain both from the record owner. We need the date's meaning, not just its value.

05 • Planning liaison: The operations team wants an immediate answer. Could I describe it as a likely deadline?

06 • Maintenance planner: That would still be an unsupported interpretation. State that the date requires clarification.

07 • Planning liaison: Should the request ask whether it is an entry date, review date, or another defined field?

08 • Maintenance planner: Yes, while leaving the answer to the authorized source rather than choosing for them.

09 • Planning liaison: I'll request the original field label and reference, then repeat back their explanation.

10 • Maintenance planner: Good. Keep any MEL application or airworthiness decision outside this administrative language exchange.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 03 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Maintenance Deferrals and MEL Language

A maintenance coordination note mentions a deferral but omits the relevant reference and authorized status.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Second round: The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Model for scenario 1: Could you confirm the reference and current authorized status with maintenance control? I need accurate coordination information; I cannot infer airworthiness from an incomplete note.

Scenario 2 | Two summaries use different status words

In a fictional maintenance-record exercise, one summary says reviewed and another says deferred for the same entry. The original logbook and authorized status are unavailable. Ask the record owner to clarify the difference.

Role A: Operations liaison: identify both words and request the original supporting record.

Role B: Records coordinator: explain that you cannot infer operational permission from the summaries.

Possible opening: Could you clarify why the same entry is described as reviewed in one summary and deferred in the other?

Success checks

- Identify the precise terminology conflict.
- Request the original reference and authorized status.
- Avoid selecting a status for convenience or inferring airworthiness.

Add a complication: The liaison is asked to choose whichever description causes less disruption.

LESSON 04 / 05 • CONVERSATIONS / 1 OF 3

Correcting the unconfirmed departure estimate

Fictional irregular-operations case: gate and app messages conflict; the next departure estimate is unconfirmed. A gate supervisor briefs a tour representative.

01 • Tour representative: The app gives one departure time and the gate message gives another. Which is guaranteed?

02 • Gate supervisor: Neither new estimate is confirmed. I'm sorry our messages presented inconsistent information to your group.

03 • Tour representative: Several travelers are arranging connections based on those times. They need a clear correction.

04 • Gate supervisor: Please tell them the departure estimate is being verified; the earlier messages should not be treated as guarantees.

05 • Tour representative: Can you promise their connecting flights will wait if this becomes a misconnect?

06 • Gate supervisor: No. We can refer connection concerns for review, but can't promise another flight's operation.

07 • Tour representative: Does that mean reaccommodation has already been arranged for everyone on the group booking?

08 • Gate supervisor: No arrangements are confirmed. Individual options need checking through the appropriate passenger-service team.

09 • Tour representative: I'll explain the uncertain timing and direct affected travelers to that team for their cases.

10 • Gate supervisor: Thank you. I'll seek a consistent verified update rather than repeat an unsupported departure time.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 04 / 05 • CONVERSATIONS / 2 OF 3

A hotel request was mistaken for a booking

Separate fictional IROP case: an agent told a travel coordinator that hotel accommodation was arranged, but the record shows only a submitted request.

01 • Travel coordinator: You said hotel rooms were arranged, but our group has received no accommodation confirmation.

02 • Passenger services agent: I checked the record. The request was submitted; I incorrectly described it as a confirmed booking.

03 • Travel coordinator: That distinction matters. People stopped looking for other arrangements because of your message.

04 • Passenger services agent: I'm sorry. I'll correct the status and contact the team reviewing the accommodation request.

05 • Travel coordinator: Can you now guarantee rooms at the property named in your earlier message?

06 • Passenger services agent: No availability is confirmed there. I shouldn't replace one unsupported promise with another.

07 • Travel coordinator: Please tell me what you can verify, including whether you have actually sent the request.

08 • Passenger services agent: Submission is recorded. Acceptance and room allocation remain open, and I'll ask for their status.

09 • Travel coordinator: I'll inform the group that accommodation is requested, not booked, while we await that response.

10 • Passenger services agent: I'll remain your contact for the correction and clearly identify any confirmed options when available.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 04 / 05 • CONVERSATIONS / 3 OF 3

Weather delay versus unknown cause

Separate fictional case: a customer-service draft attributes a delay to weather, but operations has confirmed only that a delay exists, not its cause.

01 • Customer communications lead: Your draft says weather delay, but the operations update doesn't confirm a reason yet.

02 • Station agent: I saw rain outside and assumed that explained the disruption. I already told a tour organizer.

03 • Customer communications lead: Then we need a correction. Observing rain doesn't establish the cause of this particular delay.

04 • Station agent: I'll say I gave an unverified explanation and that the confirmed information is the delay itself.

05 • Customer communications lead: Good. Acknowledge that the explanation may have influenced their plans without blaming their interpretation.

06 • Station agent: Should I mention an alternative cause so the correction sounds more useful to the organizer?

07 • Customer communications lead: No. A useful correction can clearly identify what remains unknown and who is checking it.

08 • Station agent: I'll contact operations for a verified reason and avoid giving a fresh departure estimate.

09 • Customer communications lead: Please also ensure the revised internal draft and the organizer's update use consistent wording.

10 • Station agent: I'll correct both and keep the cause unconfirmed until the responsible team provides verified information.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 04 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Irregular Operations and Passenger Communication

Passengers receive conflicting messages about a delay. The next departure estimate has not been confirmed.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are frustrated because an earlier message created an expectation. Explain that expectation. Ask your partner to distinguish the correction from anything still uncertain.

Second round: The listener remains disappointed after the correction. Acknowledge the impact and restate the available next step calmly.

Model for scenario 1: I'm sorry for the conflicting information. We are waiting for a confirmed update from the responsible team. I'll share the next verified information and explain the available assistance through our process.

Scenario 2 | A connection review is not a new ticket

A fictional service agent's message says rebooked, but the case record shows only that a connection review was opened. No alternative flight is confirmed. Correct the information in a call with a corporate travel arranger.

Role A: Passenger services supervisor: acknowledge the inaccurate status and give the verified review status.

Role B: Travel arranger: explain that a traveler expects a new ticket and ask what happens next.

Possible opening: Our earlier message said rebooked, but the record only confirms that a connection review has been opened.

Success checks

- Take responsibility for the status error.
- Distinguish a review from a confirmed ticket.
- Offer a status check without promising availability.

Add a complication: The arranger asks you to guarantee a seat on a named alternative flight without an availability check.

LESSON 05 / 05 • CONVERSATIONS / 1 OF 3

Who owns the open service task?

Fictional turnaround handoff: a cabin-service task is open with no receiving owner; the dialogue transfers coordination only, not aircraft-release authority.

01 • Outgoing turnaround coordinator: The cabin-service task remains open, and the handoff note doesn't name anyone who accepted it.

02 • Incoming turnaround coordinator: I'll take coordination follow-up. Has the service provider reported completion anywhere in the record?

03 • Outgoing turnaround coordinator: No completion report is attached. The last entry says the request was sent to ground handling.

04 • Incoming turnaround coordinator: Then I won't describe sending as acceptance. I'll contact the provider for a verified status.

05 • Outgoing turnaround coordinator: Please also confirm the person who accepts the task, so the next handoff isn't ambiguous.

06 • Incoming turnaround coordinator: Understood. Does this open item tell us anything about the load sheet's current approval status?

07 • Outgoing turnaround coordinator: No. That's a separate process and isn't established by the cabin-service record we're discussing.

08 • Incoming turnaround coordinator: I'll keep those items separate and avoid making any operational release statement during the update.

09 • Outgoing turnaround coordinator: Can you repeat what you're taking over before I finish my coordination shift?

10 • Incoming turnaround coordinator: Provider contact, task acceptance, and status follow-up; the service remains open until verified through the process.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 05 / 05 • CONVERSATIONS / 2 OF 3

A provider acknowledgment without completion

Separate fictional desk case: a ground-handling provider acknowledged a service request at 14:10; completion has not been reported.

01 • Ground handling liaison: The provider acknowledged our request at 14:10. I'm handing the follow-up to your shift.

02 • Turnaround supervisor: I accept the follow-up. To be clear, acknowledgment doesn't mean the requested service is complete.

03 • Ground handling liaison: Correct. There is no completion message in the record available to us at this handoff.

04 • Turnaround supervisor: Who is the contact listed against the request? I need a specific route for the status check.

05 • Ground handling liaison: The provider's duty desk is listed. No individual completion report has been received from it.

06 • Turnaround supervisor: I'll contact that desk and record who supplies the update, keeping the request reference attached.

07 • Ground handling liaison: The performance dashboard currently groups acknowledged and completed requests together. Please don't rely on that label.

08 • Turnaround supervisor: I'll flag the dashboard ambiguity separately. It doesn't change the actual open status of this task.

09 • Ground handling liaison: Thank you. Please confirm that the receiving shift owns the next provider contact.

10 • Turnaround supervisor: Confirmed. I own that contact and will communicate verified progress without declaring the turnaround complete.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 05 / 05 • CONVERSATIONS / 3 OF 3

A document check passes to another shift

Separate fictional ground-handling exercise: two load-sheet document versions are present; an authorized document check is pending. Staff discuss ownership, not loading instructions.

01 • Document coordinator: Two load-sheet versions are attached to the coordination record, and the authorized version check remains pending.

02 • Ground operations lead: I'm taking over the coordination desk. Has either version been identified as current by the responsible team?

03 • Document coordinator: Not in the messages we have. I requested clarification but haven't received their response.

04 • Ground operations lead: I'll accept follow-up with that team. Please leave both references visible so the conflict is clear.

05 • Document coordinator: Would you prefer me to delete the older-looking attachment before the handoff to reduce confusion?

06 • Ground operations lead: No. Appearance doesn't establish status, and we need the records preserved under the applicable process.

07 • Document coordinator: Understood. I'll mark the unresolved version question clearly, without making a loading or release decision.

08 • Ground operations lead: I'll obtain the authorized status and confirm it to the receiving coordination team.

09 • Document coordinator: So the open task is document clarification, and you own the next contact with the responsible team?

10 • Ground operations lead: Exactly. Our handoff transfers follow-up responsibility, not authority to resolve the technical discrepancy ourselves.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 05 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Ground Handling and Turnaround Performance

A turnaround handoff identifies an open ground-service task but does not name who accepted it.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are taking over the work. Ask what remains open and repeat back the critical status or responsibility. Point out one detail that would be unsafe or misleading to assume.

Second round: The intended recipient cannot take ownership. Keep the status clear and identify the need for an authorized reassignment.

Model for scenario 1: This ground-service task is still open. Please confirm which team has accepted it and record the status in the agreed coordination channel before we describe the handoff as complete.

Scenario 2 | The receiving coordinator cannot accept

In a fictional turnaround exercise, an equipment-service request is open. The intended receiving coordinator is assigned elsewhere and cannot accept follow-up. The outgoing coordinator must request an authorized reassignment and keep ownership explicit.

Role A: Outgoing coordinator: state the open task and ask who can accept it.

Role B: Duty supervisor: acknowledge the gap and agree to seek an authorized receiving person.

Possible opening: The equipment-service request is still open, and the intended recipient cannot take the follow-up.

Success checks

- State that acceptance is missing.
- Keep current responsibility explicit until reassignment is confirmed.
- Avoid equating message delivery with an accepted handoff.

Add a complication: Someone suggests marking the handoff complete because the message was sent.

LESSON 06 / 05 • CONVERSATIONS / 1 OF 3

A late meeting does not bypass access checks

Fictional landside reception exercise: a contractor asks to bypass a secure-area access check because a meeting is late; no access procedure details are taught.

01 • Contractor representative: Our meeting has started. Could you let us through now and check the paperwork afterward?

02 • Access coordinator: Please remain at reception while we complete the applicable access process. I can't bypass that check.

03 • Contractor representative: Our host knows us and said an escort would be available when we arrived.

04 • Access coordinator: I'll contact the host to confirm the escort arrangements, but that doesn't replace the required checks.

05 • Contractor representative: What information do you need from me so this request reaches the correct person?

06 • Access coordinator: Please provide the meeting host's name through this reception process, and I'll request their confirmation.

07 • Contractor representative: Can you promise we'll enter the secure area within five minutes if the host answers?

08 • Access coordinator: I can't promise completion time. I'll explain the status and ask the host to adjust the meeting.

09 • Contractor representative: Understood. I'll wait here and tell my colleagues not to follow another group through.

10 • Access coordinator: Thank you. We'll use the established badge and escort process without making an exception for lateness.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 06 / 05 • CONVERSATIONS / 2 OF 3

An unreadable badge needs the proper check

Separate fictional reception case: a visiting technician's badge cannot be read by reception; access has not been authorized.

01 • Visiting technician: My badge isn't reading. Can you use my colleague's badge to get us both inside?

02 • Security receptionist: No. Please stay at reception while I contact the authorized access team about your badge.

03 • Visiting technician: I'm due at an equipment meeting. What should I tell the manager waiting for me?

04 • Security receptionist: Tell them the access check is unresolved. I can request that they contact reception about the delay.

05 • Visiting technician: Could you confirm whether the problem means my permission has been withdrawn by security?

06 • Security receptionist: We haven't established the reason. An unreadable badge alone doesn't tell me your authorization status.

07 • Visiting technician: Then please ask the access team to check the status rather than guessing the cause.

08 • Security receptionist: I will. I'll also keep any identifying details within the approved reception and access channels.

09 • Visiting technician: I'll wait for the verified result and won't borrow another person's badge for entry.

10 • Security receptionist: Thank you. The immediate request is a proper status check, not an alternative route into the secure area.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 06 / 05 • CONVERSATIONS / 3 OF 3

Request the access audit evidence securely

Separate fictional administrative case: an internal audit needs access-check records for a defined training sample; no personal records are shared in the dialogue.

01 • Access audit coordinator: Could you provide the approved access-check records for the training sample through our restricted review channel?

02 • Reception supervisor: Do you need every visitor record, or only those listed in the audit request?

03 • Access audit coordinator: Only the listed sample. We need evidence of the checks without collecting unrelated personal details.

04 • Reception supervisor: The request mentions escort confirmation too. Should I include those linked records where they exist?

05 • Access audit coordinator: Yes, for the same sample, and clearly identify missing evidence rather than reconstructing an event.

06 • Reception supervisor: Can I send the bundle to the whole station mailing list so nobody misses it?

07 • Access audit coordinator: Please don't. Use the authorized review channel and recipient list specified for this exercise.

08 • Reception supervisor: I'll check which records are available and tell you if retrieval needs more time.

09 • Access audit coordinator: That works. Please confirm an achievable delivery point after checking, not an assumed deadline.

10 • Reception supervisor: I'll respond with the available sample records, any gaps, and the timing for outstanding retrieval.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 06 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Security and Access Control

A visitor asks a staff member to bypass an access check because a meeting is running late.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Second round: The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Model for scenario 1: I understand the meeting is urgent, but access still needs to follow the approved process. Let me contact the authorized team to arrange the appropriate check and escort if required.

Scenario 2 | An escort arrangement is only proposed

A fictional meeting host has requested an escort for a visitor, but no escort has accepted. The visitor is waiting outside the secure area. Ask the host for a confirmed arrangement while preserving the applicable access process.

Role A: Reception officer: request escort confirmation and explain the current waiting status.

Role B: Meeting host: acknowledge that requesting an escort is not confirmation and contact the authorized coordinator.

Possible opening: Could you confirm who has accepted the escort request? The visitor is still waiting at reception.

Success checks

- State that the escort is not confirmed.
- Reject bypassing the access process clearly.
- Agree who will obtain an authorized arrangement.

Add a complication: The host asks the visitor to enter behind an arriving employee.

LESSON 07 / 05 • CONVERSATIONS / 1 OF 3

A dent does not establish its cause

Fictional incident-review exercise: equipment damage is observed, but the investigation has not established the action that caused it.

01 • Incident coordinator: The draft says the cart operator caused the dent, but the review is still incomplete.

02 • Ground services manager: The dent was noticed after the cart visit. I thought that sequence supported the wording.

03 • Incident coordinator: It supports a timeline observation, not a confirmed root cause or attribution to one person.

04 • Ground services manager: Then should the incident report say damage was observed after the visit, with cause undetermined?

05 • Incident coordinator: Yes, provided that sequence is supported by the records. Keep the damage assessment separate.

06 • Ground services manager: Can we still propose a corrective action before the investigation establishes exactly what happened?

07 • Incident coordinator: We can refer concerns through the authorized process, but shouldn't call a proposal proof of cause.

08 • Ground services manager: I'll remove the accusation and identify which timestamps and observations actually support the initial account.

09 • Incident coordinator: Good. Preserve the evidence and label any witness interpretation as an account, not an established finding.

10 • Ground services manager: The revised report will distinguish observed damage, recorded sequence, and questions still awaiting investigation.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 07 / 05 • CONVERSATIONS / 2 OF 3

Two witness accounts are not one finding

Separate fictional investigation case: two witnesses describe a vehicle's position differently; neither account has been reconciled with available records.

01 • Investigation assistant: One witness says the vehicle was stationary, while another says it was moving during the event.

02 • Safety reviewer: Have those accounts been checked against timestamps or other evidence in the incident report?

03 • Investigation assistant: Not yet. I was going to choose the account from the more senior colleague.

04 • Safety reviewer: Seniority doesn't establish accuracy. Record each account and identify the unresolved difference for review.

05 • Investigation assistant: Should I combine them into a neutral sentence saying the vehicle probably moved briefly?

06 • Safety reviewer: That invents a sequence neither account establishes. Keep the disagreement visible instead of smoothing it away.

07 • Investigation assistant: I'll attribute each observation and ask the review team what evidence can clarify the position.

08 • Safety reviewer: Good. The damage assessment may contribute information, but don't assume it will resolve every disagreement.

09 • Investigation assistant: Then our update says the accounts differ and root cause remains under investigation.

10 • Safety reviewer: Exactly. A careful uncertainty statement is more useful than a tidy but unsupported conclusion.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 07 / 05 • CONVERSATIONS / 3 OF 3

No further reports is not proof of effectiveness

Separate fictional follow-up case: a corrective briefing was delivered last week and no similar incident reports have arrived; effectiveness has not been evaluated.

01 • Safety program manager: No similar reports arrived this week, so our corrective action has eliminated the problem.

02 • Investigation lead: We know the briefing was delivered and no new reports arrived. Elimination is a stronger claim.

03 • Safety program manager: What else could explain the quiet period if the corrective briefing didn't solve it?

04 • Investigation lead: We haven't checked activity levels or reporting completeness, so the comparison may be limited.

05 • Safety program manager: Then I should say the action is implemented, but its effectiveness hasn't been established.

06 • Investigation lead: Yes. Also keep the original root-cause findings distinct from our evaluation of the response.

07 • Safety program manager: Could we ask the safety management team to agree what evidence would show improvement?

08 • Investigation lead: That is a useful next step. They can define the review period and relevant measures.

09 • Safety program manager: I'll revise the update and avoid treating the absence of reports as conclusive evidence.

10 • Investigation lead: Good. The report can recognize completed work while remaining honest about what we still need to assess.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 07 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Incident Reporting and Investigation

An initial incident note says equipment damage was caused by a specific action, although the review is incomplete.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Second round: Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Model for scenario 1: The damage has been observed; its cause is still under review. I'll record the known sequence and distinguish witness reports from confirmed findings in the note.

Scenario 2 | A photograph lacks timing

A fictional incident review includes a photograph showing equipment damage, but the capture time is unverified. A manager wants to say it proves the damage existed before the shift. Discuss a more accurate statement and the next evidence check.

Role A: Investigation coordinator: describe what the photograph shows and what it cannot establish yet.

Role B: Operations manager: ask which record could help verify the timing.

Possible opening: The photograph shows damage, but its unverified timing does not establish when that damage occurred.

Success checks

- Separate visible damage from unknown timing.
- Preserve the original evidence without inventing metadata.
- Agree a verification request without assigning blame.

Add a complication: Someone offers to label the photograph with the assumed time for convenience.

LESSON 08 / 05 • CONVERSATIONS / 1 OF 3

Three training records remain unverified

Fictional audit-readiness meeting: most staff records are current in the preparation list, but three training records still need verification.

01 • Audit coordinator: Most training records are current in the preparation list, but three still require verification.

02 • Department head: Can I tell the auditor our training-record review is complete except for minor administration?

03 • Audit coordinator: Not complete. The three unresolved checks are part of the review, not an established administrative formality.

04 • Department head: Do missing verification results mean those three staff members definitely lack the required training?

05 • Audit coordinator: No. They mean we haven't verified the records; the underlying training status needs checking.

06 • Department head: What should the readiness update emphasize so the remaining work is clear to management?

07 • Audit coordinator: State the verified records separately and identify the three open checks with their owners.

08 • Department head: I'll ask the records team to confirm retrieval status rather than promise closure today.

09 • Audit coordinator: Good. Any corrective action should reflect the actual finding once those records are reviewed.

10 • Department head: I'll report the review as in progress and keep unverified evidence distinct from confirmed noncompliance.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 08 / 05 • CONVERSATIONS / 2 OF 3

An uploaded procedure is not a completed evidence review

Separate fictional audit case: a revised procedure is uploaded; staff acknowledgment evidence remains incomplete. The dialogue does not establish regulatory compliance.

01 • Compliance administrator: The revised procedure is uploaded, so I marked the audit preparation item green this morning.

02 • Audit lead: The document upload is complete, but the checklist also asks for staff acknowledgment evidence.

03 • Compliance administrator: That collection is still open. I treated uploading as completion of the whole item.

04 • Audit lead: Please split the status. We need to show completed document control and pending acknowledgment review.

05 • Compliance administrator: Does an outstanding acknowledgment establish that the staff member hasn't read the procedure?

06 • Audit lead: Not necessarily. It establishes an evidence gap in the records currently available to this review.

07 • Compliance administrator: I'll ask the training-record owner to check the missing evidence and confirm what remains unavailable.

08 • Audit lead: Include that owner in the next update, along with the exact part of the checklist still open.

09 • Compliance administrator: I'll remove the overall complete label without undoing the verified document-upload status.

10 • Audit lead: That gives management an accurate readiness picture instead of a color that hides unfinished work.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 08 / 05 • CONVERSATIONS / 3 OF 3

Implemented corrective action awaits verification

Separate fictional audit follow-up: a corrective action has been implemented, but the assigned verification review is not finished.

01 • Corrective action owner: We've implemented the new records check. Can the audit finding now be reported as closed?

02 • Quality assurance reviewer: Implementation is recorded, but the planned verification review hasn't finished, so closure isn't established.

03 • Corrective action owner: The manager wants a positive update. I don't want the completed work to disappear.

04 • Quality assurance reviewer: It won't. Say the action is implemented and verification remains pending with our review team.

05 • Corrective action owner: Should I give a completion date for verification, even though the team hasn't agreed one?

06 • Quality assurance reviewer: No. Request a realistic review update and preserve the unknown timing in the report.

07 • Corrective action owner: I'll provide the implementation evidence and ask whether the reviewer needs any further supporting records.

08 • Quality assurance reviewer: That will help. Keep the evidence linked to the specific finding rather than a general compliance claim.

09 • Corrective action owner: My update will distinguish implementation, verification, and closure as separate statuses for this case.

10 • Quality assurance reviewer: Exactly. That recognizes progress while avoiding a premature claim that the audit finding is resolved.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 08 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Regulatory Audits and Readiness

An audit preparation list has current records for most staff but three records still need verification.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

Second round: The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Model for scenario 1: Most records have been checked; three remain unverified. I'll list those items, their owners, and the follow-up status so the audit update shows the outstanding work clearly.

Scenario 2 | The sample period is incomplete

A fictional audit request covers April through June. April and May training-check records have been verified; June records are retrieved but not reviewed. Give a readiness update and agree ownership of the remaining review.

Role A: Records coordinator: state the completed months and the precise June status.

Role B: Audit manager: ask what is missing before describing the sample as verified.

Possible opening: April and May are verified; June records are available, but their review is still open.

Success checks

- Distinguish retrieval from verification.
- Identify June as the open portion.
- Agree review ownership without inventing a completion date.

Add a complication: A colleague wants to call all three months complete because the files are in the folder.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

Workplace coordination English. This course does not teach radiotelephony phraseology or certify aviation language proficiency; operational communication follows approved aviation procedures.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

Rehearse with an AI colleague

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

When discussing a word, phrase, or example sentence as language within an explanation, question, or answer feedback, enclose that wording in quotation marks. For example: What does "about" mean in "about twenty people"? Use "on" with a named day. Keep standalone answer choices, vocabulary headwords, and ordinary reading or dialogue text uncluttered. Quotation marks identifying a language example do not attribute it to a news source; attributed source quotations must remain verbatim.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Aviation English

Professional audience: aviation operations managers, airline staff, maintenance coordinators, safety teams, dispatchers, airport operations staff, ground handlers, and aviation-adjacent professionals

Scope: Workplace coordination English. This course does not teach radiotelephony phraseology or certify aviation language proficiency; operational communication follows approved aviation procedures.

Dialogue 01: A ramp safety concern

Original fictional setting: Ground staff raise a concern before turnaround work continues.

Professional roles: Ramp agent / Ramp supervisor

Published dialogue (reference script, not my own performance):

Ramp agent: The equipment is positioned inside the marked clearance area. I've stopped my task and raised the concern.

Ramp supervisor: Thank you. Keep the activity paused while we assess it through the approved ramp procedure.

Ramp agent: The departure is already late. Operations is asking us to recover time.

Ramp supervisor: I'll coordinate the delay impact. Schedule pressure doesn't remove the safety concern.

Ramp agent: I'll give you the equipment reference and the observed position.

Ramp supervisor: I'll arrange the authorized correction and confirm the conditions for resuming work.

END REFERENCE

TASK: Interactive workplace role-play

1. Use the supplied case or dialogue as the starting situation. Give a two-sentence briefing and offer two relevant professional roles for me to choose from. For a supplied dialogue, use its actual roles. Ask which role I want, then stop and wait. Do not write my replies.
2. After I choose, identify who you will play and the immediate communication goal. Play the other professional; where a meeting requires a third person, label each of your speakers clearly. Start with one natural workplace turn and wait for my reply. Keep most turns to one to three sentences and ask no more than one question at a time.
3. Let the exchange develop across six to ten learner turns, or end earlier if I type "feedback". Respond to what I actually say. Include a plausible clarification, disagreement or tradeoff without silently changing the starting facts. Mark any added constraint as a fictional second-round variation. Do not resolve approvals, evidence or commitments that remain uncertain.
4. Stay in role during the exchange. If my meaning is unclear, ask for clarification naturally. Give a hint only if I ask or cannot proceed. Do not deliver a model conversation in advance.
5. At the debrief, quote two of my phrases: one successful choice and one worth improving. Check factual accuracy, language, register and whether the next step was clear. Give up to three focused suggestions. Ask me to retry the weakest turn; wait. Only then offer an alternative wording and a harder replay.

END REFERENCE

TASK: Extend the conversation library

1. Propose six distinct, common scenarios in this field beyond the supplied case or script. For each, name the setting, two or more professional roles, the communication problem and one useful terminology focus. Include routine coordination, clarification, a complication, disagreement, handoff and follow-up where relevant. Choose scenarios that fit this profession, rather than forcing unsuitable situations into it.
2. Ask me to choose one scenario, or request all six in sequence. Stop and wait. Do not write all the scripts before I choose.
3. For the selected scenario, write an original fictional dialogue of 12-18 substantial speaking turns between two or three professionals. Name each role, establish an actual work problem, and let the exchange progress through questions, clarification, competing constraints and a credible next step or explicitly unresolved issue. Use the occupation's natural nomenclature and register. Avoid an interview between a teacher and a learner, generic small talk, and inserting a glossary definition into every reply. Explain specialist terms outside the dialogue instead.
4. After the script, explain five useful expressions in context, identify two grammar or register choices and ask three questions about the speakers' reasoning. Withhold the answers until I attempt them. Add one role-switch challenge.
5. Before presenting a script, check names, numbers, chronology, roles and terminology for consistency. Label invented facts and acknowledge uncertain specialist usage. If I requested all six, deliver one complete script at a time and wait for "next". Make each scenario materially different.
