

ENGLISH FOR WORK / SEPTEMBER 2026

Insurance English

Conversation lab

8 complete workplace dialogues, followed by eight additional role-play cases. Study the exchanges, then make the conversation your own.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Study complete conversations. Find the right language, speak, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For underwriters, claims adjusters, brokers, risk managers, actuarial analysts, policy-service teams, compliance staff, and insurance operations leaders.

Fictional language practice. Legal, financial, and regulatory meanings depend on jurisdiction and context; use current documents and qualified review for actual decisions.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Inside this conversation lab

Original fictional training conversations in professional English. These are realistic scripts, not transcripts of actual people. The professional roles are the speaker labels; all figures, incidents, and organizations are invented.

01 Underwriting information

02 Coverage wording

03 Claims intake and reserve

04 A disputed decision

05 Renewal discussion

06 Fraud referral

07 Pricing assumptions

08 Complaint handling

Then try eight independent role-play cases, followed by feedback criteria and references.

Read it. Hear it. Make it yours.

1. Read the setting. Identify the roles, the immediate problem, and what each speaker needs.
2. Read the whole conversation aloud with a partner. In a group, give a third person the observer role. For three-speaker scripts, assign each professional a separate voice.
3. Notice how the speakers ask a specific question, qualify a claim, disagree, explain a technical point, or agree on a next step. Underline language you would actually use.
4. Cover the script. Recreate the exchange using the situation and professional roles. Keep the meaning, but change the wording.
5. Switch roles and introduce a complication: a missing record, a different priority, an unavailable colleague, or a changed assumption. End with a clear outcome or unresolved question.

Register and terminology

These colleagues use concise professional language. In an internal technical meeting, familiar abbreviations can be natural. With a new colleague or a client, expand unfamiliar terms and check understanding. Keep disagreement directed at the evidence or proposal, and match the degree of certainty to what is known.

Independent study

Speak each role aloud. Pause before the reply and supply your own response before revealing the next line. Record a second version using invented details, then compare its clarity and tone with the script.

Professional context

Fictional language practice. Legal, financial, and regulatory meanings depend on jurisdiction and context; use current documents and qualified review for actual decisions.

FULL DIALOGUE 01 / 6 SPEAKING TURNS

Underwriting information

An underwriter asks a broker about incomplete risk information.

Roles: Underwriter / Broker

Underwriter: The application lists a warehouse, but the survey mentions light manufacturing. What activities actually take place?

Broker: I'll confirm the operations and obtain an updated description from the client.

Underwriter: We need that before assessing the risk and proposing terms.

Broker: Should I tell them the current indication is still available?

Underwriter: Explain that it was based on the information supplied and remains subject to review.

Broker: I'll send the verified details and distinguish the request for terms from confirmed cover.

Notice the professional language

Discuss this wording: "The application lists a warehouse, but the survey mentions light manufacturing. What activities actually take place?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 02 / 6 SPEAKING TURNS

Coverage wording

A claims team reviews an ambiguous policy reference.

Roles: Claims handler / Coverage specialist

Claims handler: The claim summary says this loss is covered, but it doesn't identify the policy wording.

Coverage specialist: We need the applicable policy, endorsements, circumstances, and jurisdictional context before reaching that conclusion.

Claims handler: I'll gather the documents and separate reported facts from assumptions.

Coverage specialist: Note any unresolved questions and follow the authorized coverage-review process.

Claims handler: I'll tell the broker the assessment is pending rather than promise payment.

Coverage specialist: I'll provide the reviewed explanation and its basis when the decision is authorized.

Notice the professional language

Discuss this wording: "The claim summary says this loss is covered, but it doesn't identify the policy wording." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 03 / 6 SPEAKING TURNS

Claims intake and reserve

A handler discusses an early loss estimate.

Roles: Claims handler / Claims supervisor

Claims handler: The initial estimate is \$40,000, but we haven't received the contractor's breakdown.

Claims supervisor: Record it as preliminary and apply our reserving process using the available evidence.

Claims handler: The customer asked whether that figure is the settlement offer.

Claims supervisor: Explain that an internal estimate or reserve isn't an agreed settlement or coverage decision.

Claims handler: I'll request the missing supporting information and document the conversation.

Claims supervisor: Review the estimate when new evidence arrives and preserve the reason for any change.

Notice the professional language

Discuss this wording: "The initial estimate is \$40,000, but we haven't received the contractor's breakdown." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 04 / 6 SPEAKING TURNS

A disputed decision

A claims team prepares to explain a reviewed decision.

Roles: Claims supervisor / Customer relations specialist

Claims supervisor: The customer disputes the decision and says our letter didn't explain the relevant clause clearly.

Customer relations specialist: We should check the approved reasoning and explain it in plain language, with the applicable review route.

Claims supervisor: There may also be new evidence that wasn't included in the original assessment.

Customer relations specialist: Route that for proper review before repeating the earlier conclusion as final.

Claims supervisor: I'll acknowledge the concern and identify what is being reconsidered.

Customer relations specialist: I'll ensure the response follows the complaint process and accurately states the current status.

Notice the professional language

Discuss this wording: "The customer disputes the decision and says our letter didn't explain the relevant clause clearly." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 05 / 6 SPEAKING TURNS

Renewal discussion

A broker and underwriter review changed terms.

Roles: Broker / Underwriter

Broker: The renewal premium increased despite no reported claims this year. What are the main drivers?

Underwriter: The indication reflects the reviewed exposure and pricing factors, not claims experience alone.

Broker: Can you explain the specific changes and any differences in limits or deductibles?

Underwriter: I'll provide an accurate comparison of the proposed terms and the information used.

Broker: I'll review the client's updated needs and discuss the options without implying identical cover.

Underwriter: Confirm any revised information before we finalize terms through the normal binding process.

Notice the professional language

Discuss this wording: "The renewal premium increased despite no reported claims this year. What are the main drivers?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 06 / 6 SPEAKING TURNS

Fraud referral

A handler flags inconsistent information.

Roles: Claims handler / Special investigations liaison

Claims handler: The reported dates don't match the repair records. I don't know why.

Special investigations liaison: Document the discrepancy and refer it under our process without labeling the claimant dishonest.

Claims handler: Should I ask for clarification before making the referral?

Special investigations liaison: Follow the applicable handling instructions and preserve the original evidence.

Claims handler: I'll keep the factual timeline separate from possible explanations.

Special investigations liaison: I'll confirm the appropriate next steps and information-sharing limits for the review.

Notice the professional language

Discuss this wording: "Should I ask for clarification before making the referral?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 07 / 6 SPEAKING TURNS

Pricing assumptions

An actuarial team reviews a model update.

Roles: Actuarial analyst / Pricing manager

Actuarial analyst: The proposed rate change is sensitive to the loss-trend assumption.

Pricing manager: Show the sensitivity range and explain which experience periods informed the assumption.

Actuarial analyst: The recent period is sparse, so the estimate has substantial uncertainty.

Pricing manager: Make that visible. Don't let a single point estimate imply more precision than the data support.

Actuarial analyst: I'll document the model version, exclusions, and review questions.

Pricing manager: We'll assess the proposal through the appropriate actuarial and pricing governance before any implementation.

Notice the professional language

Discuss this wording: "The proposed rate change is sensitive to the loss-trend assumption." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 08 / 6 SPEAKING TURNS

Complaint handling

A service team reviews a delayed response.

Roles: Complaints officer / Policy-service manager

Complaints officer: The customer's complaint was acknowledged, but nobody recorded ownership of the investigation.

Policy-service manager: I'll identify the responsible handler and verify the applicable response requirements.

Complaints officer: They also report receiving two contradictory explanations of the policy change.

Policy-service manager: We'll retrieve those communications and review them against the actual policy records.

Complaints officer: I'll give an accurate update and explain the next step through the complaint process.

Policy-service manager: I'll make sure the final response addresses both the substantive issue and the communication failure.

Notice the professional language

Discuss this wording: "The customer's complaint was acknowledged, but nobody recorded ownership of the investigation." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

Eight more situations to make your own

The following cases are open role plays. They give you facts, contrasting roles, useful expressions, and a short model response. Use what you learned from the complete dialogues to create a longer exchange.

Preparation: two minutes. Conversation: three to five minutes. Feedback: one minute. Switch roles and repeat with the second-round challenge.

ROLE-PLAY CASE 01

Underwriting and Risk Selection

SHARED CASE

An underwriting submission describes a business activity broadly but omits its operating locations and loss history.

Role A | Responding professional

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Useful expressions

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Cover this until after your first attempt

Could you confirm the activities, locations, and requested loss-history information? Those details will help the underwriting team assess the submission without relying on assumptions about the business.

Second round

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 02

Policy Language and Coverage Interpretation

SHARED CASE

A client sees a policy summary and assumes it includes every term of coverage. The full policy has endorsements and exclusions.

Role A | Responding professional

Explain a useful distinction in plain English. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

Useful expressions

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Cover this until after your first attempt

The summary is an overview. The actual policy wording, including endorsements and exclusions, needs to be reviewed for the coverage question. Let's identify the relevant documents and ask the appropriate specialist to clarify them.

Second round

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 03

Claims Intake and Reserving

SHARED CASE

A claim report lacks the event date and supporting documents. The intake team needs a clear follow-up request.

Role A | Responding professional

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Useful expressions

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Cover this until after your first attempt

Could you provide the event date and the requested supporting records through the secure channel? If an item is unavailable, please tell us so the claim team can explain the next step.

Second round

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 04

Coverage Disputes and Denials

SHARED CASE

A client asks whether a reported loss is definitely covered. The claim review is still underway.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows ...

This may indicate ..., but ...

We have not yet established whether ...

Cover this until after your first attempt

The coverage review is still underway, so I cannot confirm the outcome. I can explain what information has been received, what remains outstanding, and how the team will communicate its decision.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 05

Broker and Client Renewal Meetings

SHARED CASE

A renewal quote has a lower premium but a higher deductible. The client asks whether it is the same protection for less money.

Role A | Responding professional

Compare options using the same criteria and state the tradeoff. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You favor one option but have not checked whether the scope is comparable. Ask about one difference, then explain the tradeoff you are willing to accept.

Useful expressions

Both options ..., but

Option A ..., whereas option B

The comparison depends on

Cover this until after your first attempt

The premium is lower, but the deductible has changed. We should compare the coverage terms and other differences as well before describing the options as equivalent.

Second round

Your listener focuses only on the lowest price or fastest date. Explain one other relevant comparison criterion.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 06

Fraud Indicators and SIU Referral

SHARED CASE

An unusual claim pattern prompts concern. A note calls the customer fraudulent before an investigation has established the facts.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

The pattern is an indicator for review, not proof of fraud. I'll describe the observed facts neutrally and route the concern through the appropriate investigation process.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 07

Actuarial Assumptions and Pricing

SHARED CASE

An actuarial update shows claim costs rising because both the number of claims and average cost per claim increased.

Role A | Responding professional

Explain a useful distinction in plain English. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

Useful expressions

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Cover this until after your first attempt

Both frequency and severity contributed to the increase. I'll show the number of claims separately from their average cost so the audience can understand the two drivers.

Second round

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 08

Compliance, Market Conduct, and Complaints

SHARED CASE

A policyholder's complaint received a generic reply that did not address a specific fee question.

Role A | Responding professional

Acknowledge a communication problem and give a corrected message. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are frustrated because an earlier message created an expectation. Explain that expectation. Ask your partner to distinguish the correction from anything still uncertain.

Useful expressions

My earlier message did not make ... clear.

I'm sorry for The correct information is

Let me check that the revised explanation addresses

Cover this until after your first attempt

Our earlier reply did not answer your fee question. I'm sorry. I'll record that point for review and explain the next step and expected update under our complaints process.

Second round

The listener remains disappointed after the correction. Acknowledge the impact and restate the available next step calmly.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

Lesson conversations and speaking practice

The following sections match 05 and 06 on the industry webpage and in the learner workbook. Each lesson has three ten-turn conversations and two bounded speaking scenarios. These are original fictional teaching scripts, not transcripts of real people.

LESSON 01 / 05 • CONVERSATIONS / 1 OF 3

Which operations and locations are included?

Fictional underwriting intake: a submission says business services but omits operating locations and loss history. No coverage or acceptance decision is made.

01 • Underwriting assistant: The submission says business services. Could you clarify the activities and operating locations included?

02 • Broker account manager: The description is broad, and I haven't obtained the location schedule or loss history yet.

03 • Underwriting assistant: Those gaps affect the exposure information available for review. Who can provide the verified details?

04 • Broker account manager: I'll ask the client's authorized contact rather than assume all work happens at the registered address.

05 • Underwriting assistant: Thank you. Please distinguish current operations from any planned activities when obtaining the description.

06 • Broker account manager: Does requesting those details mean the risk already fits your underwriting appetite?

07 • Underwriting assistant: No. An information request isn't acceptance, a quote, or a coverage decision.

08 • Broker account manager: I'll keep that clear with the client and ask what loss-history records are available.

09 • Underwriting assistant: If any period is missing, identify it explicitly instead of describing the history as claim-free.

10 • Broker account manager: I'll return the verified activity and location details with any remaining gaps clearly marked for review.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 01 / 05 • CONVERSATIONS / 2 OF 3

Storage or manufacturing?

Separate fictional submission: a facility is described as a warehouse, but an attachment mentions assembly work; the extent of that activity is unspecified.

01 • Commercial underwriter: The form says warehouse, while the attachment mentions assembly. What activity actually occurs at the facility?

02 • Broker placement specialist: I need to clarify that with the client. The attachment doesn't describe the assembly process.

03 • Commercial underwriter: Please ask whether it's a current operation and which location the description concerns.

04 • Broker placement specialist: Would calling it minor assembly be enough to keep the exposure summary brief?

05 • Commercial underwriter: Not unless the client supplies facts supporting that description. Minor is too vague by itself.

06 • Broker placement specialist: I'll request a factual activity description and avoid choosing a label based on expected risk appetite.

07 • Commercial underwriter: Good. We need accurate information before considering how the submission fits our review criteria.

08 • Broker placement specialist: Should I tell the client that clarifying the activity guarantees a more favorable underwriting outcome?

09 • Commercial underwriter: No outcome is guaranteed. The purpose is a complete, accurate submission for assessment.

10 • Broker placement specialist: I'll explain that distinction and return with confirmed operations rather than an unsupported risk characterization.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 01 / 05 • CONVERSATIONS / 3 OF 3

A blank loss field is not a clean history

Separate fictional renewal submission: the loss-history field is blank; the broker has not established whether records are unavailable or no losses were reported.

01 • Underwriting coordinator: The loss-history field is blank. Does that mean no reported losses, or information not yet supplied?

02 • Broker service lead: We haven't established which. The client returned the form without completing that section.

03 • Underwriting coordinator: Please clarify the status and the period covered before we use it in the underwriting review.

04 • Broker service lead: Could I enter none temporarily so the application moves through the intake screen?

05 • Underwriting coordinator: No. That would turn missing information into a factual claim about the client's loss history.

06 • Broker service lead: I'll request the relevant records and identify any period the client cannot currently document.

07 • Underwriting coordinator: Thank you. Also avoid assuming a blank field establishes low exposure or automatic eligibility.

08 • Broker service lead: Understood. Is the immediate goal clarification, rather than asking the client to predict our decision?

09 • Underwriting coordinator: Exactly. We need evidence and an accurate status, not assurances about the eventual underwriting outcome.

10 • Broker service lead: I'll return a verified answer or explicitly state what remains missing for the review.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 01 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Underwriting and Risk Selection

An underwriting submission describes a business activity broadly but omits its operating locations and loss history.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Second round: The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Model for scenario 1: Could you confirm the activities, locations, and requested loss-history information? Those details will help the underwriting team assess the submission without relying on assumptions about the business.

Scenario 2 | Is the third site operating or planned?

A fictional submission lists three operating sites, but a separate note calls one site planned for next year. Its current operating status is unverified. Clarify the location schedule before underwriting review.

Role A: Underwriting analyst: ask whether the third site is current or proposed.

Role B: Broker coordinator: agree to obtain the client's verified status without removing the site on assumption.

Possible opening: Could you clarify whether the third location is operating now or is only planned?

Success checks

- Distinguish current operations from plans.
- Preserve the unresolved site information.
- Avoid promising an underwriting outcome.

Add a complication: The broker asks whether excluding it would guarantee acceptance.

LESSON 02 / 05 • CONVERSATIONS / 1 OF 3

A summary does not contain every policy term

Fictional policy-document discussion: a summary is available alongside a full policy with endorsements and exclusions; no specific loss is interpreted.

01 • Broker account executive: The client thinks this one-page summary contains every term governing their coverage.

02 • Policy service specialist: We should explain that it summarizes information, while the full policy includes additional wording and documents.

03 • Broker account executive: How would you explain an endorsement without giving a legal interpretation of this client's policy?

04 • Policy service specialist: It's a document that changes policy terms; the actual wording must be reviewed with the policy.

05 • Broker account executive: Then the absence of an exclusion from the summary doesn't prove that exclusion is absent entirely.

06 • Policy service specialist: Correct. We need the complete applicable documents before a qualified reviewer addresses a specific coverage question.

07 • Broker account executive: Can I reassure the client that the summary overrides any conflicting detail in the full documents?

08 • Policy service specialist: No. We shouldn't invent a rule of precedence or determine their legal position here.

09 • Broker account executive: I'll explain the summary's limits and help identify the full document set for review.

10 • Policy service specialist: Good. That clarifies the document distinction without promising coverage or interpreting a particular disputed term.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 02 / 05 • CONVERSATIONS / 2 OF 3

A certificate is not the whole contract

Separate fictional document-coordination case: a client provides a certificate as proof of detailed coverage terms, but the applicable policy wording has not been reviewed.

01 • Client insurance coordinator: The certificate lists an insurance limit. Does that tell us every condition for a future claim?

02 • Broker documentation specialist: No. A certificate isn't the complete policy wording, and the stated limit alone doesn't settle coverage.

03 • Client insurance coordinator: Could you explain the difference in plain language for our contract-management meeting today?

04 • Broker documentation specialist: One document provides selected insurance information; the policy and relevant endorsements contain the terms needing review.

05 • Client insurance coordinator: So a number on the certificate shouldn't be described as a guaranteed payment amount.

06 • Broker documentation specialist: Correct. A particular claim depends on the applicable documents and facts assessed through the proper process.

07 • Client insurance coordinator: Should we ask for the full relevant wording instead of trying to infer exclusions from the certificate?

08 • Broker documentation specialist: Yes, using the authorized document-sharing channel and an appropriately qualified reviewer for interpretation.

09 • Client insurance coordinator: I'll describe the certificate as limited information and keep the contract's insurance questions open.

10 • Broker documentation specialist: That is clearer than treating one document as a substitute for the complete coverage review.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 02 / 05 • CONVERSATIONS / 3 OF 3

A requested endorsement has not been issued

Separate fictional policy-service case: a broker requested a location endorsement, but no issued endorsement or confirmed effective date is available.

01 • Broker service manager: We requested the location endorsement. Can I tell the client the policy has already changed?

02 • Policy administrator: Not from the request alone. We haven't received an issued endorsement or confirmed effective date.

03 • Broker service manager: I thought endorsement request and endorsement were interchangeable because they refer to the same change.

04 • Policy administrator: The request asks for a change; an issued document records a change subject to its actual terms.

05 • Broker service manager: Then our status should distinguish requested wording from confirmed policy documentation for the client.

06 • Policy administrator: Exactly. Don't infer coverage for that location while the relevant status remains unverified.

07 • Broker service manager: Could I use the date we submitted the request as the effective date in our summary?

08 • Policy administrator: No. Submission timing doesn't establish the effective date of an approved change.

09 • Broker service manager: I'll ask for the authorized status and tell the client the endorsement remains requested.

10 • Policy administrator: Good. Once the documents arrive, the relevant wording and timing can be reviewed appropriately.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 02 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Policy Language and Coverage Interpretation

A client sees a policy summary and assumes it includes every term of coverage. The full policy has endorsements and exclusions.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

Second round: Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Model for scenario 1: The summary is an overview. The actual policy wording, including endorsements and exclusions, needs to be reviewed for the coverage question. Let's identify the relevant documents and ask the appropriate specialist to clarify them.

Scenario 2 | Two policy years in one folder

A fictional client folder contains a current-year summary and a prior-year endorsement. No current-year equivalent has been confirmed. Explain why the documents cannot simply be combined into one coverage description.

Role A: Policy documentation specialist: distinguish the periods and request the applicable current documents.

Role B: Client insurance manager: paraphrase the issue and ask what remains unknown.

Possible opening: These documents concern different policy years, so we need the applicable current set before describing coverage.

Success checks

- Identify the policy-period mismatch.
- Avoid assuming continuity of terms.
- Agree a document request and qualified review.

Add a complication: The client assumes last year's endorsement automatically applies unchanged.

LESSON 03 / 05 • CONVERSATIONS / 1 OF 3

Request the event date and supporting documents

Fictional claims intake: an initial report lacks an event date and supporting documents; no coverage or payment outcome is known.

01 • Claims intake specialist: Could you provide the event date and available supporting documents for this claim through our approved channel?

02 • Broker claims coordinator: The client has not confirmed the date yet. Should I estimate it from the notification email?

03 • Claims intake specialist: No. The notification date may differ from the event date; please identify the uncertainty explicitly.

04 • Broker claims coordinator: I'll ask the client for their verified account and explain which documents are currently available.

05 • Claims intake specialist: Thank you. That helps the adjuster assess the report without filling factual gaps by assumption.

06 • Broker claims coordinator: Does receiving the documents mean the insurer accepts the proof of loss and will pay?

07 • Claims intake specialist: No. Intake and review are separate from a coverage or payment decision.

08 • Broker claims coordinator: Should we tell the client any reserve amount as though it were an offered settlement?

09 • Claims intake specialist: No. A reserve isn't an offer, and case communications must follow the authorized process.

10 • Broker claims coordinator: I'll make the specific information request and confirm realistic availability without promising a claim outcome.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 03 / 05 • CONVERSATIONS / 2 OF 3

A document list needs a realistic response point

Separate fictional claim-coordination case: an adjuster requests an invoice and photographs; the broker has the photographs but must retrieve the invoice.

01 • Adjuster liaison: Could you provide the invoice and existing photographs so the adjuster can continue the claim review?

02 • Broker claims handler: The photographs are available, but invoice retrieval depends on the client's accounts team.

03 • Adjuster liaison: Please send the available material through the approved channel and identify the invoice as outstanding.

04 • Broker claims handler: Would you prefer that I wait until everything is available before acknowledging the request?

05 • Adjuster liaison: No. A clear partial response helps us understand progress and what still needs follow-up.

06 • Broker claims handler: I can ask accounts for an achievable retrieval time, but I can't promise delivery today.

07 • Adjuster liaison: That's appropriate. Please confirm their response rather than invent a deadline they haven't accepted.

08 • Broker claims handler: Does sending the photographs establish that the claimed amount is already accepted by the adjuster?

09 • Adjuster liaison: No. It supplies evidence for review; it doesn't determine the value or coverage outcome.

10 • Broker claims handler: I'll provide the photographs, flag the missing invoice, and return with a verified retrieval update.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 03 / 05 • CONVERSATIONS / 3 OF 3

Clarify whose estimate is attached

Separate fictional intake case: a repair estimate is attached without identifying its preparer or assessment date; no amount is approved.

01 • Claims administrator: Could you identify who prepared this repair estimate and when it was assessed?

02 • Broker support officer: The attachment doesn't say. The client forwarded it without the original covering message.

03 • Claims administrator: Please request the source and date so the adjuster can understand the document's basis.

04 • Broker support officer: Can we label it independent assessment because it looks like a professional estimate?

05 • Claims administrator: No. Appearance doesn't establish authorship or independence, and we shouldn't add unsupported credentials.

06 • Broker support officer: I'll seek the original document and preserve the current attachment without editing its missing details.

07 • Claims administrator: Thank you. Please also distinguish this estimate from any proof-of-loss requirements specified for the actual case.

08 • Broker support officer: Understood. Should I tell the client that the estimate sets the final reserve or payment?

09 • Claims administrator: No. Those decisions aren't established by this attachment or this request for information.

10 • Broker support officer: I'll explain the purpose of the request and confirm what the source can provide and when.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 03 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Claims Intake and Reserving

A claim report lacks the event date and supporting documents. The intake team needs a clear follow-up request.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Second round: The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Model for scenario 1: Could you provide the event date and the requested supporting records through the secure channel? If an item is unavailable, please tell us so the claim team can explain the next step.

Scenario 2 | Two dates need their own labels

A fictional claim form lists March 4 and March 9 without labels. The event date and reporting date are both required, but their mapping is unknown. Ask the broker to obtain a verified clarification.

Role A: Claims intake coordinator: request the meaning of each date and explain why guessing is inappropriate.

Role B: Broker claims representative: agree to ask the client and return a factual answer.

Possible opening: Could you confirm which date describes the event and which describes reporting, rather than choosing from their order?

Success checks

- Keep both date meanings unconfirmed.
- Request verification from the appropriate source.
- Avoid inferring coverage or a deadline from the unlabeled dates.

Add a complication: The broker wants to select the earlier date automatically.

LESSON 04 / 05 • CONVERSATIONS / 1 OF 3

Review underway is not confirmed coverage

Fictional claims discussion: a reported loss remains under review; no coverage position has been finalized.

01 • Broker claims advocate: The client wants to know whether this loss is definitely covered before arranging their next steps.

02 • Claims liaison: The review is still underway, so we don't have a finalized coverage position to communicate.

03 • Broker claims advocate: The claim number was issued. Doesn't that indicate the insurer has accepted the claim?

04 • Claims liaison: It confirms a case record exists, not that coverage or payment has been accepted.

05 • Broker claims advocate: Then I should explain the confirmed registration and keep the coverage conclusion explicitly pending.

06 • Claims liaison: Yes. We can request a status update from the authorized claims team without predicting their decision.

07 • Broker claims advocate: Would pending mean the client should assume a denial and begin describing the matter as an appeal?

08 • Claims liaison: No. The supplied status establishes neither a denial nor the applicable next-stage process.

09 • Broker claims advocate: I'll avoid both reassurance and a negative prediction while asking what information remains under review.

10 • Claims liaison: Good. The client deserves a precise status, not certainty that the current evidence doesn't support.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 04 / 05 • CONVERSATIONS / 2 OF 3

A reservation letter is not necessarily a final denial

Separate fictional case: a file contains a reservation-of-rights letter, but the team's summary calls the claim denied; the full case position needs authorized review.

01 • Claims coordination manager: The summary says denied, but the document is titled reservation of rights. Are those the same status?

02 • Coverage review liaison: We shouldn't treat them as interchangeable. The actual letter and case position need qualified review.

03 • Claims coordination manager: Could the summary simply say a letter was issued while we verify its specific implications?

04 • Coverage review liaison: Yes. Identify the document accurately without assigning a final denial that hasn't been established here.

05 • Claims coordination manager: The broker asks whether an appeal deadline has started. Can we answer from the title alone?

06 • Coverage review liaison: No. Applicable processes and timing require the actual documents, facts, and authorized guidance.

07 • Claims coordination manager: I'll request clarification of the current coverage position and avoid giving an invented procedural deadline.

08 • Coverage review liaison: Good. Keep the letter's existence separate from your interpretation of what it means.

09 • Claims coordination manager: I'll correct the summary and explain that the final position isn't confirmed by our current information.

10 • Coverage review liaison: That preserves the uncertainty and directs the substantive coverage question to the appropriate reviewer.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 04 / 05 • CONVERSATIONS / 3 OF 3

A similar paid claim does not settle this loss

Separate fictional broker meeting: a client cites a previous paid claim, but the present loss's facts and applicable wording are still being assessed.

01 • Broker account manager: The client says a similar claim was paid last year, so this one must be covered.

02 • Claims review specialist: That history doesn't establish this case's outcome. We still need its facts and applicable policy wording.

03 • Broker account manager: Can I acknowledge the earlier payment without suggesting it guarantees the same coverage position now?

04 • Claims review specialist: Yes. Explain that the current review remains open and similarity hasn't been established in all relevant respects.

05 • Broker account manager: Would the prior payment at least prove there can be no exclusion affecting this claim?

06 • Claims review specialist: No. We cannot infer that from the payment alone or replace review of the current documents.

07 • Broker account manager: I'll ask the client for the prior reference as potentially relevant context, not decisive proof.

08 • Claims review specialist: Good. Keep any authorized comparison separate from your initial status communication to the client.

09 • Broker account manager: I'll say the earlier outcome is noted, while this loss's coverage position remains under assessment.

10 • Claims review specialist: That responds to the client's concern without promising payment or predicting a denial before review.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 04 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Coverage Disputes and Denials

A client asks whether a reported loss is definitely covered. The claim review is still underway.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Second round: Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Model for scenario 1: The coverage review is still underway, so I cannot confirm the outcome. I can explain what information has been received, what remains outstanding, and how the team will communicate its decision.

Scenario 2 | A document request is called a denial

A fictional claimant receives a request for additional evidence and tells the broker the claim has been denied. The case record says review pending, with no final position supplied. Explain the current status and request clarification of the outstanding evidence.

Role A: Broker claims coordinator: distinguish the information request from a finalized decision.

Role B: Claims liaison: confirm the recorded pending status and offer an authorized status check.

Possible opening: The record shows a request for more evidence, not a confirmed denial in the information we have.

Success checks

- Separate an evidence request from a final coverage decision.
- Preserve the pending outcome.
- Avoid guaranteeing approval or inventing appeal advice.

Add a complication: The broker asks you to promise approval as soon as the evidence arrives.

LESSON 05 / 05 • CONVERSATIONS / 1 OF 3

Lower premium, higher deductible

Fictional renewal comparison: A has a premium of 900 units and deductible of 200; B has a premium of 800 and deductible of 500. Other terms remain unreviewed.

01 • Client insurance manager: Quote B costs one hundred less. Is it the same protection at a lower price?

02 • Broker renewal specialist: Its deductible is five hundred rather than two hundred, and we haven't compared all other terms.

03 • Client insurance manager: So the lower premium comes with a higher stated deductible, not a verified equivalent policy.

04 • Broker renewal specialist: Correct. We should compare coverage wording, limits, exclusions, and deductible terms on the same basis.

05 • Client insurance manager: Can we calculate my exact cost for any future claim from those two numbers alone?

06 • Broker renewal specialist: No. The applicable terms and facts matter; this comparison doesn't determine a particular claim payment.

07 • Client insurance manager: Then I'll present the premium saving alongside the increased deductible instead of declaring B better.

08 • Broker renewal specialist: Good. We also need the same policy period and exposure assumptions in the comparison.

09 • Client insurance manager: I'll request the complete quotations and take the tradeoff to our authorized decision maker.

10 • Broker renewal specialist: I'll identify the verified differences and unresolved terms without recommending coverage from price alone.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 05 / 05 • CONVERSATIONS / 2 OF 3

A shorter quote period distorts the saving

Separate fictional renewal case: one quotation covers twelve months and another nine months; the scope and other terms have not been matched.

01 • Finance coordinator: The second renewal quote is cheaper. Can we report an annual premium saving to management?

02 • Broker placement adviser: The second quote covers nine months, while the first covers twelve. They aren't annual equivalents.

03 • Finance coordinator: Could I multiply the nine-month price to create a guaranteed twelve-month quotation for comparison?

04 • Broker placement adviser: That would be an illustration, not a supplier quote, and might ignore different terms or pricing conditions.

05 • Finance coordinator: Then we should request quotations for the same period before presenting a confirmed saving.

06 • Broker placement adviser: Yes. Use matching exposures, limits, deductibles, and relevant wording as well as time periods.

07 • Finance coordinator: The shorter term may suit our planned review date, but that's a different tradeoff from lower annual cost.

08 • Broker placement adviser: Exactly. State that scheduling preference explicitly without calling the protection or price equivalent.

09 • Finance coordinator: I'll ask for the matched information and keep the nine-month option clearly labeled in the renewal pack.

10 • Broker placement adviser: Good. That lets the decision maker compare real differences rather than a misleading headline discount.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 05 / 05 • CONVERSATIONS / 3 OF 3

An additional service is not automatically broader coverage

Separate fictional renewal comparison: quote A includes a risk-review visit; quote B does not. Policy wording and the visit's scope remain unreviewed.

01 • Client risk coordinator: Quote A includes a risk-review visit. Does that mean its insurance coverage is broader than B's?

02 • Broker relationship manager: Not necessarily. A service feature and the policy's coverage terms are different comparison categories.

03 • Client risk coordinator: Then we should compare the visit separately from limits, exclusions, premium, and deductible details.

04 • Broker relationship manager: Yes. We also need the visit's actual scope before describing its value to your team.

05 • Client risk coordinator: Someone mentioned reinsurance support in the marketing material. Does that guarantee a better claim outcome?

06 • Broker relationship manager: We shouldn't make that inference. Marketing references don't replace the applicable policy and claims review.

07 • Client risk coordinator: I'll list the included service as a verified feature, with its scope still awaiting clarification.

08 • Broker relationship manager: Good. Ask for comparable policy documents before treating either option as more comprehensive protection.

09 • Client risk coordinator: Our decision discussion will separate service convenience from the financial and coverage terms needing review.

10 • Broker relationship manager: That gives the client a fair renewal comparison without an unsupported recommendation based on one feature.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 05 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Broker and Client Renewal Meetings

A renewal quote has a lower premium but a higher deductible. The client asks whether it is the same protection for less money.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You favor one option but have not checked whether the scope is comparable. Ask about one difference, then explain the tradeoff you are willing to accept.

Second round: Your listener focuses only on the lowest price or fastest date. Explain one other relevant comparison criterion.

Model for scenario 1: The premium is lower, but the deductible has changed. We should compare the coverage terms and other differences as well before describing the options as equivalent.

Scenario 2 | Two quotes use different insured values

Two fictional renewal quotations show different premiums, but one uses an insured value of 100,000 units and the other 80,000. Deductibles and detailed terms remain unreviewed. Discuss the mismatched basis and request a comparable quotation.

Role A: Broker renewal analyst: explain why the lower premium isn't yet an equivalent-price comparison.

Role B: Client finance manager: ask for matching assumptions and identify who will review the terms.

Possible opening: These quotes use different insured values, so the premium difference isn't a like-for-like saving yet.

Success checks

- Identify the differing insured values.
- Avoid recommending unsupported or inaccurate values.
- Request matched assumptions and qualified review.

Add a complication: The manager wants to use the lower value solely to obtain the cheaper quote.

LESSON 06 / 05 • CONVERSATIONS / 1 OF 3

An unusual pattern is not established fraud

Fictional internal referral: a claim pattern is unusual, but investigation has not established fraud; sensitive details remain in the approved internal channel.

01 • Claims analyst: The referral draft calls the customer fraudulent because the claim pattern looks unusual.

02 • Investigation supervisor: That conclusion isn't established. Describe the observed pattern as a potential fraud indicator for review.

03 • Claims analyst: Should I explain which records prompted the concern rather than label the customer's character?

04 • Investigation supervisor: Yes. Keep facts, discrepancies, and interpretations distinct when referring to the special investigation unit, or SIU.

05 • Claims analyst: Does referral mean the SIU has already confirmed material misrepresentation in the submission?

06 • Investigation supervisor: No. Referral requests assessment; it doesn't establish intent, misrepresentation, or an investigation outcome.

07 • Claims analyst: I'll remove the accusation and preserve the original supporting records through the approved restricted process.

08 • Investigation supervisor: Good. Don't share sensitive case details in general team discussions or contact the customer outside authorization.

09 • Claims analyst: The revised note will identify the concern and unanswered questions without asserting guilt.

10 • Investigation supervisor: That supports a fair investigation while keeping the language proportionate to the evidence actually available.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 06 / 05 • CONVERSATIONS / 2 OF 3

Two matching amounts need context

Separate fictional internal review: two claims contain identical estimate amounts; preparers and underlying circumstances have not been compared.

01 • Claims review officer: These two estimates have identical amounts. Is that enough to say the documents were fabricated?

02 • SIU liaison: No. Matching amounts are an observation; fabrication is a conclusion requiring additional evidence and investigation.

03 • Claims review officer: We haven't compared the preparers or underlying circumstances, so several explanations remain open.

04 • SIU liaison: Exactly. Record the similarity accurately and identify the context that hasn't been established.

05 • Claims review officer: Should I describe the match as a possible fraud indicator in the authorized referral?

06 • SIU liaison: You can identify the concern neutrally, following the internal referral process rather than making an accusation.

07 • Claims review officer: Could we alter the case label to confirmed fraud so it receives a faster review?

08 • SIU liaison: No. Urgency doesn't justify a false status or prejudging the people involved.

09 • Claims review officer: I'll preserve the estimates and request review of the matching amounts with their source details.

10 • SIU liaison: Good. A precise observation gives investigators something to assess without substituting suspicion for a finding.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 06 / 05 • CONVERSATIONS / 3 OF 3

A corrected answer does not establish intent

Separate fictional submission review: a customer corrects an earlier answer about an event; the reason for the difference has not been established.

01 • Claims coordinator: The customer changed an answer. Can the referral say they intentionally misrepresented the event?

02 • Investigation reviewer: The changed answer is documented, but intention hasn't been established from that difference alone.

03 • Claims coordinator: Then I should preserve both versions and state exactly what changed without choosing a motive.

04 • Investigation reviewer: Yes. The authorized investigation can examine the context and any relevant supporting evidence.

05 • Claims coordinator: Would calling it material misrepresentation merely summarize the discrepancy in more professional language?

06 • Investigation reviewer: No. That term carries a substantive conclusion we shouldn't assert without the appropriate basis and review.

07 • Claims coordinator: I'll use a neutral description and identify the unanswered question about why the answer changed.

08 • Investigation reviewer: Good. Keep the referral and any customer contact within the approved process for this case.

09 • Claims coordinator: I'll avoid promising either an adverse finding or exoneration while the facts are still assessed.

10 • Investigation reviewer: That preserves fairness and gives the reviewer a reliable account of what the evidence actually shows.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 06 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Fraud Indicators and SIU Referral

An unusual claim pattern prompts concern. A note calls the customer fraudulent before an investigation has established the facts.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Second round: Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Model for scenario 1: The pattern is an indicator for review, not proof of fraud. I'll describe the observed facts neutrally and route the concern through the appropriate investigation process.

Scenario 2 | A shared address prompts an unsupported accusation

Two fictional claims list the same business mailing address. The relationship between the claimants is unverified. An internal draft calls this coordinated fraud. Discuss a neutral referral without seeking sensitive details outside authorized channels.

Role A: Claims analyst: describe the shared address and unknown relationship.

Role B: Investigation liaison: challenge the conclusion and request an evidence-based internal summary.

Possible opening: The records share a mailing address, but that alone doesn't establish coordinated fraud.

Success checks

- Separate the shared address from an unproven allegation.
- Keep evidence and referral within authorized channels.
- Identify the relationship as unknown rather than inventing it.

Add a complication: A colleague suggests contacting unrelated people publicly to investigate the address.

LESSON 07 / 05 • CONVERSATIONS / 1 OF 3

More claims and costlier claims

Fictional actuarial explanation: comparable exposure periods show both increased claim frequency and increased average claim severity; no pricing decision is supplied.

01 • Portfolio manager: Claim costs increased. Can you explain how both frequency and severity contributed in this report?

02 • Actuarial analyst: Frequency concerns how often claims occur relative to the exposure basis; severity concerns average cost per claim.

03 • Portfolio manager: So more claims and more expensive claims are different drivers, even when total costs rise together.

04 • Actuarial analyst: Exactly. The report says both increased on its comparable basis, rather than attributing everything to one driver.

05 • Portfolio manager: Does higher severity mean every individual claim became more expensive than every claim last year?

06 • Actuarial analyst: No. An average doesn't describe each claim, and the mix can affect that summary.

07 • Portfolio manager: I'll explain the two drivers separately and include the comparison period and exposure basis.

08 • Actuarial analyst: Good. Keep any pricing recommendation separate from this descriptive explanation of the observed claim experience.

09 • Portfolio manager: Should reserve adequacy be declared from those two increases alone during the meeting?

10 • Actuarial analyst: No. Reserve assessment requires its own analysis and assumptions, including relevant loss-development information.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 07 / 05 • CONVERSATIONS / 2 OF 3

Paid so far is not the final claim cost

Separate fictional actuarial briefing: a recent claim cohort has paid amounts recorded, but some claims remain open and development assumptions need review.

01 • Finance reporting manager: The paid total is available. Why doesn't the actuarial report call it the final cost?

02 • Reserving analyst: Some claims remain open, so amounts paid so far don't establish their eventual total cost.

03 • Finance reporting manager: Is loss development the way reported claim costs change as more information becomes available?

04 • Reserving analyst: Yes, broadly. The specific analysis and assumptions need to be explained for this cohort.

05 • Finance reporting manager: Then a current payment total is an observation, while an ultimate-cost estimate includes assessed future development.

06 • Reserving analyst: Correct. We should label those figures separately instead of presenting an estimate as settled fact.

07 • Finance reporting manager: Could the lower paid total for recent claims prove their severity is lower than older claims?

08 • Reserving analyst: Not without accounting for maturity and comparable definitions. Recent claims have had less time to develop.

09 • Finance reporting manager: I'll request the matched comparison and preserve the estimate's assumptions in the briefing.

10 • Reserving analyst: Good. That clarifies why paid amounts alone don't determine final cost or reserve adequacy.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 07 / 05 • CONVERSATIONS / 3 OF 3

Claim counts need an exposure denominator

Separate fictional portfolio comparison: A records 20 claims across 1,000 policy-years; B records 30 across 3,000 policy-years, with comparable definitions assumed for this exercise.

01 • Pricing trainee: Portfolio B has thirty claims and A has twenty. Is B's frequency higher?

02 • Actuarial tutor: Not on this exposure basis. A has one thousand policy-years; B has three thousand.

03 • Pricing trainee: So we compare claims per policy-year, rather than only the raw number of claims.

04 • Actuarial tutor: Exactly. These figures give twenty per thousand for A and ten per thousand for B.

05 • Pricing trainee: B has more claims in total but a lower frequency relative to the supplied exposure.

06 • Actuarial tutor: Correct. That distinction matters whenever portfolio sizes differ in an actuarial comparison.

07 • Pricing trainee: Does the lower frequency also establish lower severity or a lower appropriate premium for B?

08 • Actuarial tutor: No. We haven't supplied claim amounts or the other information needed for pricing analysis.

09 • Pricing trainee: I'll state the frequency result only, using the same denominator and clearly defined period.

10 • Actuarial tutor: Good. Keep frequency, severity, and any reserve or pricing conclusions distinct instead of extending one calculation.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 07 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Actuarial Assumptions and Pricing

An actuarial update shows claim costs rising because both the number of claims and average cost per claim increased.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

Second round: Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Model for scenario 1: Both frequency and severity contributed to the increase. I'll show the number of claims separately from their average cost so the audience can understand the two drivers.

Scenario 2 | An average is changed by one large claim

A fictional portfolio's average claim cost increased, and one unusually large claim is present. The analyst has not assessed how much it explains or whether frequency changed. Explain the difference between severity and a portfolio-wide claim trend.

Role A: Actuarial analyst: explain the average and the unassessed influence of the large claim.

Role B: Portfolio manager: ask which comparison would clarify the driver without discarding valid data.

Possible opening: Average severity rose, but we haven't measured how much the large claim explains or whether frequency changed.

Success checks

- Distinguish average severity from frequency.
- Preserve the claim in the evidence.
- Request transparent analysis rather than claim an established cause.

Add a complication: The manager suggests deleting the large claim solely to make the trend look better.

LESSON 08 / 05 • CONVERSATIONS / 1 OF 3

The generic reply missed the fee question

Fictional complaint review: a policyholder asked about a fee and received a generic response; the fee's case-specific basis has not been checked.

01 • Broker complaints liaison: The policyholder asked why a fee was charged, but the response only thanked them for contacting us.

02 • Complaints supervisor: You're right. Our reply didn't address the specific question, and we need to acknowledge that omission.

03 • Broker complaints liaison: Can you now confirm the charge was wrong so the policyholder receives a definite answer?

04 • Complaints supervisor: Not before reviewing the relevant records. Correcting our communication doesn't establish the fee's validity.

05 • Broker complaints liaison: Then the apology should explain what was missing and identify the next case-specific check.

06 • Complaints supervisor: Yes. I'll say we failed to answer the fee question and are seeking its documented basis.

07 • Broker complaints liaison: Please avoid repeating a general fee description as though it settles this particular transaction.

08 • Complaints supervisor: Agreed. Timely communication should give an accurate review status, not an unsupported conclusion.

09 • Broker complaints liaison: I'll relay that correction and ask who will provide the authorized explanation to the policyholder.

10 • Complaints supervisor: I'll own the follow-up and record the communication corrective action separately from the unresolved fee assessment.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 08 / 05 • CONVERSATIONS / 2 OF 3

A complaint was acknowledged, not resolved

Separate fictional case: an automated message calls a complaint resolved when the record shows acknowledgment only; substantive review remains open.

01 • Client service coordinator: The automated message says resolved, but the complaint record shows only acknowledgment so far.

02 • Market conduct reviewer: We need to correct that status. Acknowledging receipt is not resolution of the policyholder's concern.

03 • Client service coordinator: What should I say about the misleading message without blaming the policyholder for believing it?

04 • Market conduct reviewer: Say our message overstated progress, apologize, and explain that the substantive review remains open.

05 • Client service coordinator: Should I promise the complaint will be resolved tomorrow to repair the disappointment?

06 • Market conduct reviewer: No timing is confirmed. Ask the responsible team for an achievable update rather than invent a deadline.

07 • Client service coordinator: I'm sorry our message called your complaint resolved. We have acknowledged it, but the substantive review remains open.

08 • Market conduct reviewer: Good. The automated wording also needs a separate corrective-action review to prevent repeated confusion.

09 • Client service coordinator: I'll keep that communication fix distinct from deciding whether the policyholder's complaint is upheld.

10 • Market conduct reviewer: Exactly. Both issues matter, but correcting a status message doesn't determine the underlying case outcome.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 08 / 05 • CONVERSATIONS / 3 OF 3

A promised callback was not an agreed decision date

Separate fictional complaints case: an agent promised a decision during Friday's callback, although only a status update had been arranged with the review team.

01 • Broker service liaison: You promised a complaint decision on Friday, but the review team only agreed a status update.

02 • Complaints case manager: I'm sorry. I described the callback too strongly and created an expectation they hadn't authorized.

03 • Broker service liaison: The client has arranged time to discuss the outcome. How will you correct that expectation?

04 • Complaints case manager: I'll explain that Friday's call remains a status update, with no final decision date confirmed.

05 • Broker service liaison: Could you say the result is likely favorable to make the correction less disappointing?

06 • Complaints case manager: No. We don't have evidence for that prediction, and it would create another unsupported expectation.

07 • Broker service liaison: Please acknowledge the inconvenience directly and explain what information the scheduled call can provide.

08 • Complaints case manager: I'll cover verified progress, open questions, and the responsible review contact, without promising an outcome.

09 • Broker service liaison: I'll ensure our own client note uses that corrected description of the callback.

10 • Complaints case manager: Thank you. I'll record the wording correction as part of our complaint-handling follow-up.

Notice, then rehearse

Name each speaker's purpose. Identify one useful expression and the next step or unresolved question. Read the roles aloud, then switch roles.

LESSON 08 / 06 • SAY IT

Two scenarios to practice

Use only the supplied facts. Prepare for two minutes, speak for one minute, then respond to a follow-up. Switch roles and repeat. For solo study, speak both roles aloud.

Scenario 1 | Compliance, Market Conduct, and Complaints

A policyholder's complaint received a generic reply that did not address a specific fee question.

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are frustrated because an earlier message created an expectation. Explain that expectation. Ask your partner to distinguish the correction from anything still uncertain.

Second round: The listener remains disappointed after the correction. Acknowledge the impact and restate the available next step calmly.

Model for scenario 1: Our earlier reply did not answer your fee question. I'm sorry. I'll record that point for review and explain the next step and expected update under our complaints process.

Scenario 2 | The reply names the wrong complaint

A fictional policyholder complained about a delayed document, but the reply discusses a payment dispute. Neither issue has been reviewed in this case. Correct the mismatch and agree a check of the actual document request.

Role A: Complaints supervisor: acknowledge that the response addressed the wrong subject.

Role B: Broker service coordinator: explain the policyholder's actual concern and ask who will check the document status.

Possible opening: Our reply addressed a payment dispute, but your client's complaint concerns a delayed document.

Success checks

- Correct the subject without blaming the policyholder.
- Keep document delivery timing unconfirmed.
- Assign the document-status follow-up.

Add a complication: The coordinator asks for a guaranteed delivery date before the document team responds.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

Fictional language practice. Legal, financial, and regulatory meanings depend on jurisdiction and context; use current documents and qualified review for actual decisions.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

Rehearse with an AI colleague

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

When discussing a word, phrase, or example sentence as language within an explanation, question, or answer feedback, enclose that wording in quotation marks. For example: What does "about" mean in "about twenty people"? Use "on" with a named day. Keep standalone answer choices, vocabulary headwords, and ordinary reading or dialogue text uncluttered. Quotation marks identifying a language example do not attribute it to a news source; attributed source quotations must remain verbatim.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Insurance English

Professional audience: underwriters, claims adjusters, brokers, risk managers, actuarial analysts, policy-service teams, compliance staff, and insurance operations leaders

Scope: Fictional language practice. Legal, financial, and regulatory meanings depend on jurisdiction and context; use current documents and qualified review for actual decisions.

Dialogue 01: Underwriting information

Original fictional setting: An underwriter asks a broker about incomplete risk information.

Professional roles: Underwriter / Broker

Published dialogue (reference script, not my own performance):

Underwriter: The application lists a warehouse, but the survey mentions light manufacturing. What activities actually take place?

Broker: I'll confirm the operations and obtain an updated description from the client.

Underwriter: We need that before assessing the risk and proposing terms.

Broker: Should I tell them the current indication is still available?

Underwriter: Explain that it was based on the information supplied and remains subject to review.

Broker: I'll send the verified details and distinguish the request for terms from confirmed cover.

END REFERENCE

TASK: Interactive workplace role-play

1. Use the supplied case or dialogue as the starting situation. Give a two-sentence briefing and offer two relevant professional roles for me to choose from. For a supplied dialogue, use its actual roles. Ask which role I want, then stop and wait. Do not write my replies.
2. After I choose, identify who you will play and the immediate communication goal. Play the other professional; where a meeting requires a third person, label each of your speakers clearly. Start with one natural workplace turn and wait for my reply. Keep most turns to one to three sentences and ask no more than one question at a time.
3. Let the exchange develop across six to ten learner turns, or end earlier if I type "feedback". Respond to what I actually say. Include a plausible clarification, disagreement or tradeoff without silently changing the starting facts. Mark any added constraint as a fictional second-round variation. Do not resolve approvals, evidence or commitments that remain uncertain.
4. Stay in role during the exchange. If my meaning is unclear, ask for clarification naturally. Give a hint only if I ask or cannot proceed. Do not deliver a model conversation in advance.
5. At the debrief, quote two of my phrases: one successful choice and one worth improving. Check factual accuracy, language, register and whether the next step was clear. Give up to three focused suggestions. Ask me to retry the weakest turn; wait. Only then offer an alternative wording and a harder replay.

END REFERENCE

TASK: Extend the conversation library

1. Propose six distinct, common scenarios in this field beyond the supplied case or script. For each, name the setting, two or more professional roles, the communication problem and one useful terminology focus. Include routine coordination, clarification, a complication, disagreement, handoff and follow-up where relevant. Choose scenarios that fit this profession, rather than forcing unsuitable situations into it.
2. Ask me to choose one scenario, or request all six in sequence. Stop and wait. Do not write all the scripts before I choose.
3. For the selected scenario, write an original fictional dialogue of 12-18 substantial speaking turns between two or three professionals. Name each role, establish an actual work problem, and let the exchange progress through questions, clarification, competing constraints and a credible next step or explicitly unresolved issue. Use the occupation's natural nomenclature and register. Avoid an interview between a teacher and a learner, generic small talk, and inserting a glossary definition into every reply. Explain specialist terms outside the dialogue instead.
4. After the script, explain five useful expressions in context, identify two grammar or register choices and ask three questions about the speakers' reasoning. Withhold the answers until I attempt them. Add one role-switch challenge.
5. Before presenting a script, check names, numbers, chronology, roles and terminology for consistency. Label invented facts and acknowledge uncertain specialist usage. If I requested all six, deliver one complete script at a time and wait for "next". Make each scenario materially different.
