

ENGLISH FOR WORK / SEPTEMBER 2026

Telecommunications English

Teacher's guide

Teach practical workplace communication with specific cases, clear language targets, and a repeatable feedback process.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Study complete conversations. Find the right language, speak, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For network operations staff, telecom engineers, field technicians, customer operations teams, product managers, regulatory staff, and telecom project leaders.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Your course at a glance

Use the lesson numbers to match this document with the website and the other guides.

01 Network Operations and Outage Bridges

Distinguish completed work from pending work and explain its impact.

02 Fiber Deployment and Construction Coordination

Give a handoff that the receiving person can confirm.

03 Wireless Capacity and Coverage

Explain a useful distinction in plain English.

04 Provisioning and Service Activation

Clarify missing information before responding.

05 Field Service and Dispatch

Make a request with a clear action, purpose, and realistic timing.

06 Regulatory and Emergency Services

Separate observations, assumptions, and conclusions.

07 Customer Churn and Service Recovery

Acknowledge a communication problem and give a corrected message.

08 Vendor and Equipment Lifecycle

Compare options using the same criteria and state the tradeoff.

Choose your pace

Quick practice: spend 15 minutes reading one conversation and rehearsing one scenario. Full lesson: allow 45-60 minutes for language work, three conversations, two speaking scenarios, and feedback.

Level support

B1 learners can use the frames and a partner. B2 learners can try a response before reading the model. C1 learners can add the harder follow-up and reduce preparation time. These are teaching suggestions, not certified CEFR level ratings.

After practicing: open the AI prompt workshop, or use the prompts at the end of this guide.

A 60-minute lesson that works

Prepare the case and the learner pages. Keep the model response hidden until learners have attempted their own. Choose two field terms that are important to understanding the case.

0-5 minutes | Activate experience

Ask learners to name a comparable situation without sharing confidential details. Introduce the communication goal.

5-12 minutes | Read and sort facts

Read the case. Learners identify confirmed facts, unknowns, the audience, and the immediate communication need.

12-22 minutes | Notice and practice language

Explain the workshop pattern. Work through the vocabulary and editing example, then discuss both language checks and the reasons behind the choices.

22-35 minutes | 05 • Conversations

Read one ten-turn conversation aloud, notice a useful expression, then compare the other two. Identify each speaker's purpose and how the exchange ends.

35-47 minutes | 06 • Say it

Rehearse both speaking scenarios from the workbook. Give two minutes of preparation, switch roles, and use the success checks. Add the complication only after a successful first round.

47-55 minutes | Compare and revise

Reveal the model. Discuss alternative acceptable wording. Give one meaning correction and one language correction, then repeat.

55-60 minutes | Retrieve and transfer

Close the materials. Learners recall two expressions and identify one communication habit to use in another situation.

Adapt the session

For 45 minutes, study one complete conversation and rehearse one scenario; assign the others for oral follow-up. For 90 minutes, rehearse all three conversations and give both scenarios a second round. More time should produce more meaningful practice, not longer explanations.

LESSON 01 / FACILITATOR NOTES

Network Operations and Outage Bridges

Distinguish completed work from pending work and explain its impact.

CASE

A network incident affects one service area. Fault isolation is ongoing, and no restoration estimate has been verified.

Teach this move

Lead with the current state, then the important change or open item. Use completed-action language only for completed work. Add a next update point when it is known; do not invent a date to make the message sound complete.

Vocabulary to check: NOC, outage, fault isolation, ETA.

Model response

The affected area is identified, and fault isolation is continuing. We do not yet have a verified restoration estimate. I'll state the next update time and revise the message when confirmed information is available.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision gives observable progress. A positive label alone does not tell the reader what is complete or still needed.

Second-round challenge

The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Language-check answers

1. C - The team has completed the review. 'Has completed' states that the action is finished.
2. B - Delivery is planned for Friday; the carrier has not confirmed it. This explicitly labels the date as planned and identifies the missing confirmation.

05 • Conversations

1. No verified restoration estimate - The lesson's outage bridge covers one affected service area; fault isolation continues and no restoration estimate has been verified.
2. Alarms cleared, customer checks pending - Separate fictional case: alarms on a business-access node have cleared after a recovery action, but customer-level service checks have not finished.

3. A monitoring gap after maintenance - Separate fictional case: after planned maintenance, traffic counters are visible but latency telemetry is missing; no customer outage has been confirmed.

Use the complete ten-turn scripts in the learner workbook and conversation lab. Read with roles, identify the decision or open question, then replay without reading.

06 · Say it: second scenario | A dashboard with stale timestamps

In a fictional operations center, a dashboard displays green status but its last update was forty minutes ago. A separate ticket reports connection failures at one branch. Give a status update without treating the dashboard as current evidence.

Role A: You are the NOC analyst. Explain the stale timestamp and outstanding verification.

Role B: You are the incident manager. Ask what is known about branch impact and who will check it.

Possible opening: The dashboard is green, but its data is forty minutes old, so current service status is not verified.

Success checks

- Distinguish displayed status from current verified status.
- Keep the reported branch failure separate from confirmed wider impact.
- Agree checks for both monitoring freshness and the branch report.

Add a complication: A colleague wants to dismiss the branch ticket because there is no red alarm.

AI extension: adapt this lesson for your learners and available time.

LESSON 02 / FACILITATOR NOTES

Fiber Deployment and Construction Coordination

Give a handoff that the receiving person can confirm.

CASE

A fiber installation team has completed physical work but an inspection is still pending. The next team assumes the route is ready.

Teach this move

State the current situation, relevant background, open task, and receiving role. Ask for acknowledgment or repeat-back of the critical item. Sending a message and transferring responsibility are not always the same thing.

Vocabulary to check: fiber, make-ready, splicing, permit.

Model response

Physical installation is complete; the inspection remains pending. Please confirm the approved status before scheduling the next activity, and record the outstanding item in the handoff.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revised sentence asks for an identifiable receiving team instead of leaving responsibility with an unspecified 'someone'.

Second-round challenge

The intended recipient cannot take ownership. Keep the status clear and identify the need for an authorized reassignment.

Language-check answers

1. B - Please confirm who will complete the outstanding check. It asks for an identifiable person or team responsible for the task.
2. A - So the result is pending and your team will follow up; is that correct? This repeats the status and responsibility and invites correction.

05 • Conversations

1. Physical completion is not inspection clearance - The lesson's fiber installation is physically complete but inspection remains pending; the receiving team assumes the route is ready.
2. Splice records and the wrong route label - Separate fictional case: a fiber handover package names route F12, while its splice diagram is labeled F21; neither team knows which label is correct.
3. Make-ready ownership at a shared site - Separate fictional case: a project uses make-ready to mean site preparation. The civil contractor has completed the duct inspection; the building-access confirmation remains with the property team.

Use the complete ten-turn scripts in the learner workbook and conversation lab. Read with roles, identify the decision or open question, then replay without reading.

06 • Say it: second scenario | An incomplete test attachment

A fictional fiber handover includes installation photographs and a test-results attachment that cannot be opened. The installation coordinator has the original file; the receiving engineer has not reviewed its results. Conduct a handoff and agree how to resolve the missing evidence.

Role A: You are the installation coordinator. Explain what was sent and arrange a readable replacement.

Role B: You are the receiving engineer. Confirm receipt of the photographs but not acceptance of unseen test results.

Possible opening: You have the installation photographs, but I understand the test attachment did not open.

Success checks

- Separate email receipt from technical acceptance.
- Assign responsibility for resending and reviewing the test record.
- Read back the outstanding acceptance dependency.

Add a complication: The project manager wants the handover marked accepted because the email was delivered.

AI extension: adapt this lesson for your learners and available time.

LESSON 03 / FACILITATOR NOTES

Wireless Capacity and Coverage

Explain a useful distinction in plain English.

CASE

Customers report slow service in a busy area even though the coverage map shows signal availability.

Teach this move

Start with the reader's question. Explain one unfamiliar term with familiar words, then give a relevant example or contrast. Check understanding without asking only 'Do you understand?'.

Vocabulary to check: spectrum, coverage, capacity, congestion.

Model response

Coverage and capacity describe different issues. A signal may be available while busy-period demand affects performance. I'll explain that distinction and report the observed conditions for investigation.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revised sentence names the action in familiar words. Specialist vocabulary is useful when it adds precision, but repeating abstract nouns can hide the meaning.

Second-round challenge

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Language-check answers

1. A - The backlog is the work still waiting to be completed. This gives the meaning in familiar words.
2. C - How would you describe the next step in your own words? An open request lets the listener show their understanding.

05 • Conversations

1. Signal on the map, slow service on the street - The lesson's customers report slow wireless service in a busy area despite mapped signal coverage.
2. An empty venue test is not an event test - Separate fictional case: a wireless demonstration worked in an empty exhibition hall; the organizer asks whether that proves performance during a crowded event.

3. Indoor reception and shared capacity - Separate fictional case: office users report weak reception in a basement and slow downloads at lunchtime upstairs; neither symptom has been diagnosed.

Use the complete ten-turn scripts in the learner workbook and conversation lab. Read with roles, identify the decision or open question, then replay without reading.

06 · Say it: second scenario | More bars after a handset change

In a fictional office, one employee's new handset shows more signal bars, but no controlled speed or call-quality comparison has been made. Discuss what the observation does and does not establish.

Role A: You are the support supervisor. Ask whether the handset proves the network has gained capacity.

Role B: You are the radio analyst. Explain indicator readings versus measured service performance in ordinary language.

Possible opening: More signal bars on one handset do not establish that the network now has more capacity.

Success checks

- Distinguish an indicator from a controlled service measurement.
- Avoid diagnosing the handset or network from one observation.
- Agree a comparable test before making a wider recommendation.

Add a complication: The supervisor wants to recommend replacing every handset based on this observation.

AI extension: adapt this lesson for your learners and available time.

LESSON 04 / FACILITATOR NOTES

Provisioning and Service Activation

Clarify missing information before responding.

CASE

A service-activation request has a customer address but no circuit reference or requested activation date.

Teach this move

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

Vocabulary to check: provisioning, CPE, circuit, service activation.

Model response

Could you confirm the circuit reference and target activation date? We need to match the request to the correct service and distinguish the requested date from a confirmed appointment.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: "what this means".

Second-round challenge

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Language-check answers

1. C - Could you confirm when the review starts? The embedded question uses subject then verb: "the review starts".
2. B - Has the report been approved, or is it ready for review? This question distinguishes two meanings of 'ready' that affect the next action.

05 • Conversations

1. An address does not identify the circuit - The lesson's service-activation request includes an address but lacks a circuit reference and requested activation date.
2. Replacing equipment or adding service? - Separate fictional case: an order says upgrade at branch B7 and names an existing circuit; it does not say whether the customer wants new premises equipment or a service change.

3. Which date is the requested date? - Separate fictional case: a provisioning form shows delivery on the tenth and activation on the twelfth; the customer's email asks for service on the tenth.

Use the complete ten-turn scripts in the learner workbook and conversation lab. Read with roles, identify the decision or open question, then replay without reading.

06 · Say it: second scenario | Two suites at one address

A fictional activation request identifies a building containing suites 2A and 2B, but gives no suite number. The customer leases both, and only one needs the new circuit. Clarify the destination before provisioning proceeds.

Role A: You are the provisioning coordinator. Ask which suite and service reference the request concerns.

Role B: You are the customer's office manager. You know both suites exist but must check the destination with the IT owner.

Possible opening: Could you confirm which suite needs the new circuit? The building address identifies two possible locations.

Success checks

- Ask for the exact destination without guessing.
- Identify the customer owner who can confirm it.
- Keep service planning conditional on the correct location and reference.

Add a complication: A colleague suggests choosing 2A because that suite appears first in the customer record.

AI extension: adapt this lesson for your learners and available time.

LESSON 05 / FACILITATOR NOTES

Field Service and Dispatch

Make a request with a clear action, purpose, and realistic timing.

CASE

A field technician receives a ticket that says only "internet bad." The customer is available for a clarification call.

Teach this move

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Vocabulary to check: truck roll, signal level, dispatch, inside wiring.

Model response

Could you describe what happens, when it occurs, and which devices are affected? Those details will help the field team prepare for the visit and avoid assumptions about the cause.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

Second-round challenge

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Language-check answers

1. B - Send it no later than Thursday. 'By' sets the latest point, while 'after' refers to a later time.
2. A - Could you confirm the document version needed for the review? The requested action and information are explicit.

05 • Conversations

1. Turn internet bad into a usable dispatch request - The lesson's field ticket says only internet bad; the customer is available for a clarification call.
2. Site access before a truck roll - Separate fictional case: a technician is assigned to a locked equipment room, but the dispatch ticket has no authorized site contact.

3. A repeat visit needs the earlier evidence - Separate fictional case: a second technician is assigned to intermittent connection drops; the first visit's signal readings are mentioned in a ticket but not attached.

Use the complete ten-turn scripts in the learner workbook and conversation lab. Read with roles, identify the decision or open question, then replay without reading.

06 · Say it: second scenario | The symptom disappears before the visit

A fictional customer reports that intermittent calls are working again before a scheduled visit. No cause has been found and no cancellation has been agreed. Discuss what observations to request and who should decide the dispatch status.

Role A: You are the service coordinator. Request the latest symptom timing and customer availability.

Role B: You are the field supervisor. Explain what information you need before reviewing the visit plan.

Possible opening: Could you confirm when the calls started working again and whether any interruptions have happened since?

Success checks

- Request specific observations rather than declare the fault resolved.
- Distinguish a successful call from an established repair.
- Agree who will review the dispatch decision under the normal process.

Add a complication: Someone wants to cancel the visit automatically because the latest call succeeded.

AI extension: adapt this lesson for your learners and available time.

LESSON 06 / FACILITATOR NOTES

Regulatory and Emergency Services

Separate observations, assumptions, and conclusions.

CASE

A customer notice describes a regulatory requirement without citing the current approved wording. The responsible team has not reviewed it.

Teach this move

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

Vocabulary to check: E911, lawful intercept, regulatory filing, customer notice.

Model response

The notice needs review against the current applicable requirement and approved language. I'll identify the disputed wording and route it to the responsible team before release.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Second-round challenge

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Language-check answers

1. A - The change may have contributed to the delay. 'May have contributed' presents a possibility without claiming the cause is established.
2. C - In this pilot, the observed result was ... This locates the finding in the setting actually studied.

05 · Conversations

1. Unreviewed wording in a customer notice - The lesson's customer notice describes a regulatory requirement without current approved wording or review by the responsible team.
2. A filed document is not a confirmed approval - Separate fictional case: a project tracker shows a regulatory filing submitted; no response from the reviewing body has been recorded.

3. A sensitive inquiry is not a validated instruction - Separate fictional case: a sales inbox receives a message labeled lawful intercept inquiry; the sender's authority and the request's applicability have not been verified.

Use the complete ten-turn scripts in the learner workbook and conversation lab. Read with roles, identify the decision or open question, then replay without reading.

06 · Say it: second scenario | An old emergency-service slide

A fictional sales deck contains an emergency-service slide copied from an older product. The current product and customer location differ, and no specialist review has occurred. Discuss how to qualify the deck's readiness without giving emergency-service guidance.

Role A: You are the sales enablement lead. Identify the unverified claims before the presentation.

Role B: You are the regulatory liaison. Request review against the current product and applicable context.

Possible opening: This slide comes from another product, so its emergency-service claims are not yet verified for this presentation.

Success checks

- Distinguish prior use from current applicability.
- Avoid asserting a regulatory requirement or service capability.
- Agree to obtain authorized wording before using the claims.

Add a complication: A presenter says the slide has been used before and therefore must be safe to reuse.

AI extension: adapt this lesson for your learners and available time.

LESSON 07 / FACILITATOR NOTES

Customer Churn and Service Recovery

Acknowledge a communication problem and give a corrected message.

CASE

A customer asks for an update after repeated service interruptions. The investigation has no confirmed root cause.

Teach this move

Name what was unclear or wrong, acknowledge its effect, and correct it. A brief apology can help, followed by a practical next step. Avoid explaining away the other person's reaction or promising an outcome you cannot control.

Vocabulary to check: churn, SLA credit, root cause, service assurance.

Model response

I'm sorry the interruptions have continued. The cause is still under investigation. I'll summarize the verified service history and confirm the next update rather than repeat an unverified explanation.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision takes responsibility for the message without blaming the listener. It identifies what needs to be corrected.

Second-round challenge

The listener remains disappointed after the correction. Acknowledge the impact and restate the available next step calmly.

Language-check answers

1. C - I'm sorry my earlier wording was unclear. This acknowledges the speaker's contribution to the problem.
2. B - The corrected date and the current confirmation status. A repair needs usable corrected information, including any uncertainty.

05 • Conversations

1. Correcting a premature root-cause message - The lesson's customer asks about repeated service interruptions; the investigation has no confirmed root cause.
2. An update time was mistaken for a repair time - Separate fictional case: a support email promised an update at three; its subject line said service restored at three, but no restoration time is confirmed.

3. A ticket closure did not resolve the complaint - Separate fictional case: a service ticket was administratively closed while the customer's recurring dropouts remained under a separate investigation; the closure message implied resolution.

Use the complete ten-turn scripts in the learner workbook and conversation lab. Read with roles, identify the decision or open question, then replay without reading.

06 · Say it: second scenario | A credit described as approved too early

A fictional support agent told a customer that an SLA credit was approved, but the record shows only a submitted review request. No amount or decision is confirmed. Correct the message and agree the next communication step.

Role A: You are the account service manager. Acknowledge the mistaken approval claim and explain the actual status.

Role B: You are the customer's finance coordinator. Ask whether you should adjust an internal invoice forecast.

Possible opening: I need to correct our earlier message: the credit was requested for review, not approved.

Success checks

- Acknowledge the communication error directly.
- Avoid inventing eligibility, approval, or an amount.
- Agree how the reviewed decision will be communicated.

Add a complication: The customer asks you to confirm a minimum credit amount immediately.

AI extension: adapt this lesson for your learners and available time.

LESSON 08 / FACILITATOR NOTES

Vendor and Equipment Lifecycle

Compare options using the same criteria and state the tradeoff.

CASE

One equipment proposal has a lower purchase price but an earlier end-of-support date. The replacement plan extends beyond that date.

Teach this move

Use the same time period, scope, and measurement basis for both options. Explain a difference with 'whereas' or 'while'. State what improves and what is given up; do not hide the weaker side of a recommendation.

Vocabulary to check: end of support, interoperability, spares, capital plan.

Model response

The lower price comes with a shorter support period. Let's compare the expected service life, support needs, and replacement timing before making the investment recommendation.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. 'Better' already has comparative meaning, so it does not need 'more'. Naming the criterion and tradeoff makes the comparison useful.

Second-round challenge

Your listener focuses only on the lowest price or fastest date. Explain one other relevant comparison criterion.

Language-check answers

1. B - Option A is faster, whereas option B costs less. 'Whereas' marks a contrast between two options.
2. A - An increase of one percentage point. Subtracting 6% from 7% gives one percentage point. The relative increase is about 16.7%.

05 · Conversations

1. Purchase price versus the support horizon - The lesson's cheaper equipment proposal reaches end of support before the replacement plan ends; exact dates and prices are not supplied.
2. New versus refurbished spares - Separate fictional case: a team compares new replacement units with refurbished units; refurbished units cost less, but compatibility testing and warranty terms remain unchecked.

3. A phased replacement or one coordinated change - Separate fictional case: a capital plan considers replacing twenty access devices together or in four groups of five; mixed-version interoperability has not been tested.

Use the complete ten-turn scripts in the learner workbook and conversation lab. Read with roles, identify the decision or open question, then replay without reading.

06 · Say it: second scenario | Support renewal or accelerated replacement

A fictional vendor offers one more year of support for existing equipment. Replacement equipment is available, but migration effort is not estimated. Compare renewal with replacement across the same one-year horizon without claiming either is cheaper overall.

Role A: You are the lifecycle manager. Explain the known support offer and missing migration information.

Role B: You are the capital planning lead. Ask about cost, operational effort, and what each option postpones or changes.

Possible opening: The support extension covers one year, but we need the migration estimate before comparing total costs.

Success checks

- Use the same one-year comparison period.
- Distinguish known fees from unestimated migration costs.
- State the tradeoff and identify the evidence needed for a decision.

Add a complication: A colleague treats the support fee as wasted money without considering replacement work.

AI extension: adapt this lesson for your learners and available time.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Digital.gov: plain-language guidance

<https://digital.gov/guides/plain-language>

Council of Europe: CEFR descriptors

<https://www.coe.int/en/web/common-european-framework-reference-languages/cefr-descriptors>

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

Adapt a partner or class activity

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

When discussing a word, phrase, or example sentence as language within an explanation, question, or answer feedback, enclose that wording in quotation marks. For example: What does "about" mean in "about twenty people"? Use "on" with a named day. Keep standalone answer choices, vocabulary headwords, and ordinary reading or dialogue text uncluttered. Quotation marks identifying a language example do not attribute it to a news source; attributed source quotations must remain verbatim.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Telecommunications English

Professional audience: network operations staff, telecom engineers, field technicians, customer operations teams, product managers, regulatory staff, and telecom project leaders

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Lesson 01: Network Operations and Outage Bridges

Original fictional case: A network incident affects one service area. Fault isolation is ongoing, and no restoration estimate has been verified.

Language workshop: Give a useful status update

Communication goal: Distinguish completed work from pending work and explain its impact.

Language guidance: Lead with the current state, then the important change or open item. Use completed-action language only for completed work. Add a next update point when it is known; do not invent a date to make the message sound complete.

Useful frames (complete the gaps with case facts): We have completed ...; ... remains open. / As of ..., the status is / The next update will cover

Vocabulary: NOC: Network operations center: a team or location coordinating network monitoring and operational response. / outage: A period during which a service is unavailable. / fault isolation: Narrowing down where a technical problem originates. / ETA: Estimated time of arrival; an estimate should be distinguished from a confirmed time.

Speaking task: Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

Writing task: Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Optional second-round challenge: The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Model for comparison AFTER my attempt, not a response to give me first: The affected area is identified, and fault isolation is continuing. We do not yet have a verified restoration estimate. I'll state the next update time and revise the message when confirmed information is available.

END REFERENCE

TASK: Adapt this material for a teaching session

1. Ask me one brief planning question covering learner support needs, group size and available time. Offer a default of two B2 learners and 20 minutes. Stop and wait; use the default only if I choose it.
2. Create a timed plan using the supplied case or dialogue, its actual terminology and one narrow language goal. Include an individual first attempt, partner exchange, focused feedback and a retry. Keep the total within the time I choose. State what the learner should be able to communicate at the end.
3. Provide separate role cards for two or three professional speakers. Each card needs an objective, known information and one question to resolve. Label any invented private information as a variation; do not contradict shared facts. Do not place the model answer on the learner cards.
4. Add a B1 support option with useful frames, a B2 independent task and a C1 extension involving a plausible competing constraint. Maintain the same professional meaning across levels. Explain unfamiliar terms without removing the field's normal language. Include a workable solo alternative.
5. Put teacher notes and suggested responses in a clearly separate section after the learner material. Include likely misunderstandings and a short observation checklist for facts, clarity, tone and next step. Accept multiple successful formulations. Finish with one exit question and a delayed-recall task; identify what the teacher should check before use.

Adjust tone and register

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

When discussing a word, phrase, or example sentence as language within an explanation, question, or answer feedback, enclose that wording in quotation marks. For example: What does "about" mean in "about twenty people"? Use "on" with a named day. Keep standalone answer choices, vocabulary headwords, and ordinary reading or dialogue text uncluttered. Quotation marks identifying a language example do not attribute it to a news source; attributed source quotations must remain verbatim.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Telecommunications English

Professional audience: network operations staff, telecom engineers, field technicians, customer operations teams, product managers, regulatory staff, and telecom project leaders

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Lesson 01: Network Operations and Outage Bridges

Original fictional case: A network incident affects one service area. Fault isolation is ongoing, and no restoration estimate has been verified.

Language workshop: Give a useful status update

Communication goal: Distinguish completed work from pending work and explain its impact.

Language guidance: Lead with the current state, then the important change or open item. Use completed-action language only for completed work. Add a next update point when it is known; do not invent a date to make the message sound complete.

Useful frames (complete the gaps with case facts): We have completed ...; ... remains open. / As of ..., the status is / The next update will cover

Vocabulary: NOC: Network operations center: a team or location coordinating network monitoring and operational response. / outage: A period during which a service is unavailable. / fault isolation: Narrowing down where a technical problem originates. / ETA: Estimated time of arrival; an estimate should be distinguished from a confirmed time.

Speaking task: Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

Writing task: Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Optional second-round challenge: The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Model for comparison AFTER my attempt, not a response to give me first: The affected area is identified, and fault isolation is continuing. We do not yet have a verified restoration estimate. I'll state the next update time and revise the message when confirmed information is available.

END REFERENCE

TASK: Match the language to the listener

1. Choose a short message or utterance from the reference and quote it exactly. Identify its purpose and likely audience. Ask me to choose a new audience: a close colleague, a decision-maker, or an external reader who may not know the jargon. Stop and wait.
2. Ask me to adapt that message for the chosen reader, keeping its facts and degree of certainty unchanged. Offer a short frame only if I request help. Wait for my attempt before showing alternatives.
3. Discuss at most three choices in my version: directness, specialist vocabulary and interpersonal tone. Explain when a direct request is clearer than extra politeness, and when an unfamiliar abbreviation needs expansion. Avoid cultural stereotypes or claims that one nationality always communicates a certain way.
4. Show two natural alternatives, such as a concise spoken version and a more explicit written version. Explain the tradeoff in each. Do not turn a request into an order, a possibility into a promise, or a pending decision into approval.
5. Ask me to respond to one realistic follow-up from the new reader, then wait. Finish by asking me to adapt the message for a second audience without losing its core meaning. Give feedback only after the attempt.
