

ENGLISH FOR WORK / SEPTEMBER 2026

Consulting English

Conversation lab

8 complete workplace dialogues, followed by eight additional role-play cases. Study the exchanges, then make the conversation your own.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For management consultants, strategy consultants, implementation consultants, analysts, engagement managers, client partners, internal consultants, and advisory teams.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Inside this conversation lab

Original fictional training conversations in professional English. These are realistic scripts, not transcripts of actual people. The professional roles are the speaker labels; all figures, incidents, and organizations are invented.

01 Discovery discussion

02 Hypothesis review

03 A focused data request

04 Executive storyline

05 An additional workstream

06 Difficult client feedback

07 Implementation ownership

08 Final steering committee

Then try eight independent role-play cases, followed by feedback criteria and references.

Read it. Hear it. Make it yours.

1. Read the setting. Identify the roles, the immediate problem, and what each speaker needs.
2. Read the whole conversation aloud with a partner. In a group, give a third person the observer role. For three-speaker scripts, assign each professional a separate voice.
3. Notice how the speakers ask a specific question, qualify a claim, disagree, explain a technical point, or agree on a next step. Underline language you would actually use.
4. Cover the script. Recreate the exchange using the situation and professional roles. Keep the meaning, but change the wording.
5. Switch roles and introduce a complication: a missing record, a different priority, an unavailable colleague, or a changed assumption. End with a clear outcome or unresolved question.

Register and terminology

These colleagues use concise professional language. In an internal technical meeting, familiar abbreviations can be natural. With a new colleague or a client, expand unfamiliar terms and check understanding. Keep disagreement directed at the evidence or proposal, and match the degree of certainty to what is known.

Independent study

Speak each role aloud. Pause before the reply and supply your own response before revealing the next line. Record a second version using invented details, then compare its clarity and tone with the script.

Professional context

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

FULL DIALOGUE 01 / 6 SPEAKING TURNS

Discovery discussion

Consultants clarify a client's initial problem statement.

Roles: Engagement manager / Client operations director

Engagement manager: You described the problem as low productivity. Where does it show up in the workflow?

Client operations director: Orders wait between review and approval, but staff utilization looks high.

Engagement manager: Then we should examine queue time and rework, not assume people need to work faster.

Client operations director: We can provide process records and introduce the approval teams.

Engagement manager: I'll frame the diagnostic questions and agree on the scope of the first analysis.

Client operations director: Please distinguish what you know from the hypotheses you're testing in the kickoff materials.

Notice the professional language

Discuss this wording: "You described the problem as low productivity. Where does it show up in the workflow?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 02 / 6 SPEAKING TURNS

Hypothesis review

A consulting team tests an attractive explanation.

Roles: Partner / Consultant

Partner: Your slide says pricing is the reason for the sales decline. What evidence rules out other drivers?

Consultant: None yet. It's our working hypothesis, based on three customer interviews.

Partner: Then label it that way and test volume, mix, distribution, and competitor changes too.

Consultant: I'll update the issue tree and identify the data required for each branch.

Partner: Prioritize the questions that could change the recommendation.

Consultant: I'll bring a revised analysis plan with the assumptions and evidence gaps visible.

Notice the professional language

issue tree - A structured breakdown of a question into smaller issues for analysis.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 03 / 6 SPEAKING TURNS

A focused data request

A consultant reduces the burden on a client team.

Roles: Consultant / Client finance lead

Consultant: Our initial request was too broad. For the margin bridge, we need monthly product-level revenue, volume, and cost.

Client finance lead: That's manageable. Do you need customer names?

Consultant: No. An approved aggregate extract should be sufficient for this question.

Client finance lead: I'll confirm definitions and any reporting changes across the period.

Consultant: I'll send a field list and a sample layout for review.

Client finance lead: Good. We'll agree on the extract before asking the data team to build it.

Notice the professional language

Discuss this wording: "That's manageable. Do you need customer names?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 04 / 6 SPEAKING TURNS

Executive storyline

A consultant revises a dense presentation.

Roles: Engagement manager / Consultant

Engagement manager: What's the decision this deck asks the executive team to make?

Consultant: Whether to pilot a different approval process in two regions.

Engagement manager: Lead with that recommendation, then the evidence, cost, risks, and pilot criteria.

Consultant: I'll move detailed interview notes into the appendix and retain the limitations in the main story.

Engagement manager: Make the implementation owner and decision timing explicit.

Consultant: I'll revise the opening so the audience can understand the proposal before reading the supporting analysis.

Notice the professional language

Discuss this wording: "What's the decision this deck asks the executive team to make?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 05 / 6 SPEAKING TURNS

An additional workstream

A client requests work beyond the agreed engagement.

Roles: Client sponsor / Engagement manager

Client sponsor: Could you also redesign our incentive scheme before the final readout?

Engagement manager: That would add a distinct workstream. Let's assess the effort and implications for the agreed scope.

Client sponsor: Could we replace one of the current deliverables?

Engagement manager: Yes, we can compare that option with an extension and bring the tradeoffs for approval.

Client sponsor: I'll explain which outcome now has priority.

Engagement manager: I'll prepare a written change proposal before assigning the additional work.

Notice the professional language

Discuss this wording: "Could you also redesign our incentive scheme before the final readout?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 06 / 6 SPEAKING TURNS

Difficult client feedback

A consultant responds to criticism of an interim finding.

Roles: Client director / Consultant

Client director: Your analysis misses how our local teams actually operate.

Consultant: Please show me where the process description differs from practice. I want to correct that before drawing conclusions.

Client director: Approval authority varies by region, but your chart assumes one model.

Consultant: That's material. I'll separate the regional models and test whether the comparison still holds.

Client director: Include regional leads in the validation discussion.

Consultant: I will. The next version will state what changed and how it affects the finding.

Notice the professional language

Discuss this wording: "Your analysis misses how our local teams actually operate." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 07 / 6 SPEAKING TURNS

Implementation ownership

A consulting team prepares to transfer a plan.

Roles: Implementation consultant / Client workstream lead

Implementation consultant: Which team will own the process after the pilot ends?

Client workstream lead: Operations, but we haven't confirmed capacity for the new review step.

Implementation consultant: Then ownership is proposed, not accepted. Let's resolve responsibilities and workload before handover.

Client workstream lead: I'll bring the operating model to the department heads.

Implementation consultant: I'll provide the process documentation, training plan, and unresolved decisions.

Client workstream lead: We'll confirm acceptance criteria and record any support needed during the transition.

Notice the professional language

operating model - How work is organized across people, process, technology, governance, and metrics.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 08 / 6 SPEAKING TURNS

Final steering committee

A consultant clarifies what a pilot established.

Roles: Project sponsor / Consulting lead

Project sponsor: Can the final report say the pilot proves the new model will work company-wide?

Consulting lead: It supports the model in the tested locations. Broader rollout still carries assumptions about volume and local processes.

Project sponsor: What decision can we reasonably make now?

Consulting lead: Whether to expand in stages with defined measures and review points.

Project sponsor: Show the evidence for that recommendation and the conditions that would change it.

Consulting lead: I'll include the limitations, resource needs, and a clear decision request in the final readout.

Notice the professional language

Discuss this wording: "Can the final report say the pilot proves the new model will work company-wide?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

Eight more situations to make your own

The following cases are open role plays. They give you facts, contrasting roles, useful expressions, and a short model response. Use what you learned from the complete dialogues to create a longer exchange.

Preparation: two minutes. Conversation: three to five minutes. Feedback: one minute. Switch roles and repeat with the second-round challenge.

ROLE-PLAY CASE 01

Client Discovery and Problem Definition

SHARED CASE

A client requests a benchmarking study but actually needs to decide whether to centralize a service.

Role A | Responding professional

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Useful expressions

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Cover this until after your first attempt

What decision will the benchmark help you make? If the question is centralization, we should examine the criteria and constraints first, then decide which external comparisons would be useful.

Second round

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 02

Hypotheses and Issue Trees

SHARED CASE

A team believes customer churn is caused by price but has not examined service experience or competitor changes.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

Price is one hypothesis, not an established explanation. I'll structure the work around the main alternatives and identify the evidence that would support or weaken each one.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 03

Data Requests and Client Burden

SHARED CASE

A client receives a 40-item data request with one deadline. Only six items are needed for the first analysis.

Role A | Responding professional

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Useful expressions

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Cover this until after your first attempt

Could we prioritize the six items needed for the first analysis and agree on their owners? I'll explain their purpose and propose later dates for the remaining requests to reduce unnecessary burden.

Second round

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 04

Slide Storylines and Executive Synthesis

SHARED CASE

A presentation has twelve charts and no clear recommendation. The audience must decide whether to pilot a new process.

Role A | Responding professional

Explain a useful distinction in plain English. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

Useful expressions

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Cover this until after your first attempt

I'll lead with the pilot recommendation and the decision required, then use the strongest evidence and its limitations to support it. The remaining charts can answer follow-up questions.

Second round

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 05

Scope Management and Change Requests

SHARED CASE

A client requests a second market study halfway through an engagement. The existing schedule covers only the original market.

Role A | Responding professional

Negotiate scope or timing while making conditions explicit. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You want the preferred outcome but can accept one tradeoff. Ask for two options, then state which condition you can accept and which still needs approval.

Useful expressions

We can ..., provided that

Would you prefer ... or ...?

I can take that proposal for review; I cannot yet confirm

Cover this until after your first attempt

We can assess the additional market as a scope change. Would you prefer to extend the schedule, add resources, or reprioritize the original work? I'll prepare the implications for discussion.

Second round

The preferred option is unavailable. Offer an alternative and clearly state any approval still needed.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 06

Difficult Client Feedback

SHARED CASE

A client says a recommendation ignores a staffing constraint that the team missed in discovery.

Role A | Responding professional

Acknowledge a communication problem and give a corrected message. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are frustrated because an earlier message created an expectation. Explain that expectation. Ask your partner to distinguish the correction from anything still uncertain.

Useful expressions

My earlier message did not make ... clear.

I'm sorry for The correct information is

Let me check that the revised explanation addresses

Cover this until after your first attempt

You're right that the recommendation does not account for that staffing constraint. Let's confirm its effect and revise the options. I'll make the changed assumption explicit in the next version.

Second round

The listener remains disappointed after the correction. Acknowledge the impact and restate the available next step calmly.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 07

Implementation and Change Management

SHARED CASE

Managers are expected to adopt a new process but have not received training or time to practice.

Role A | Responding professional

Describe observed behavior, its effect, and a useful next step. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You can explain a practical obstacle affecting the work. Share it after your partner asks for your perspective, then agree on one observable change.

Useful expressions

In [specific situation], I noticed ...

The effect was ... What was happening from your perspective?

Could we agree to ... and review it ...?

Cover this until after your first attempt

The rollout asks managers to change their work without enough preparation. Could we add role-specific training and a short practice period, then check where adoption is difficult?

Second round

The recipient disagrees with your interpretation. Return to the observed example, listen, and revise an unsupported assumption.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 08

Steering Committees and Final Readouts

SHARED CASE

A steering group agrees on the problem but is split between two options. The presentation time is almost over.

Role A | Responding professional

Include relevant voices and clarify the decision process. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You hold a relevant concern that has not been discussed. Raise it when invited and ask who will decide. Help the facilitator state one unresolved question accurately.

Useful expressions

Let's hear ... before we decide.

The point we still need to resolve is

Who will make this decision, and what do they need?

Cover this until after your first attempt

Let's pause the slides and compare the two options against the agreed criteria. Then we can record the decision, or the precise unresolved question and who will resolve it by when.

Second round

A participant interrupts or the meeting is running out of time. Protect a turn to speak and close with an accurate decision record.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Digital.gov: plain-language guidance

<https://digital.gov/guides/plain-language>

Council of Europe: CEFR descriptors

<https://www.coe.int/en/web/common-european-framework-reference-languages/cefr-descriptors>

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

Rehearse with an AI colleague

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Consulting English

Professional audience: management consultants, strategy consultants, implementation consultants, analysts, engagement managers, client partners, internal consultants, and advisory teams

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Dialogue 01: Discovery discussion

Original fictional setting: Consultants clarify a client's initial problem statement.

Professional roles: Engagement manager / Client operations director

Published dialogue (reference script, not my own performance):

Engagement manager: You described the problem as low productivity. Where does it show up in the workflow?

Client operations director: Orders wait between review and approval, but staff utilization looks high.

Engagement manager: Then we should examine queue time and rework, not assume people need to work faster.

Client operations director: We can provide process records and introduce the approval teams.

Engagement manager: I'll frame the diagnostic questions and agree on the scope of the first analysis.

Client operations director: Please distinguish what you know from the hypotheses you're testing in the kickoff materials.

Vocabulary in this exchange: scope: Defined boundary of work, responsibility, deliverables, assumptions, and exclusions.

END REFERENCE

TASK: Interactive workplace role-play

1. Use the supplied case or dialogue as the starting situation. Give a two-sentence briefing and offer two relevant professional roles for me to choose from. For a supplied dialogue, use its actual roles. Ask which role I want, then stop and wait. Do not write my replies.
2. After I choose, identify who you will play and the immediate communication goal. Play the other professional; where a meeting requires a third person, label each of your speakers clearly. Start with one natural workplace turn and wait for my reply. Keep most turns to one to three sentences and ask no more than one question at a time.
3. Let the exchange develop across six to ten learner turns, or end earlier if I type "feedback". Respond to what I actually say. Include a plausible clarification, disagreement or tradeoff without silently changing the starting facts. Mark any added constraint as a fictional second-round variation. Do not resolve approvals, evidence or commitments that remain uncertain.
4. Stay in role during the exchange. If my meaning is unclear, ask for clarification naturally. Give a hint only if I ask or cannot proceed. Do not deliver a model conversation in advance.
5. At the debrief, quote two of my phrases: one successful choice and one worth improving. Check factual accuracy, language, register and whether the next step was clear. Give up to three focused suggestions. Ask me to retry the weakest turn; wait. Only then offer an alternative wording and a harder replay.

Client operations director: Please distinguish what you know from the hypotheses you're testing in the kickoff materials.

Vocabulary in this exchange: scope: Defined boundary of work, responsibility, deliverables, assumptions, and exclusions.

END REFERENCE

TASK: Extend the conversation library

1. Propose six distinct, common scenarios in this field beyond the supplied case or script. For each, name the setting, two or more professional roles, the communication problem and one useful terminology focus. Include routine coordination, clarification, a complication, disagreement, handoff and follow-up where relevant. Choose scenarios that fit this profession, rather than forcing unsuitable situations into it.
2. Ask me to choose one scenario, or request all six in sequence. Stop and wait. Do not write all the scripts before I choose.
3. For the selected scenario, write an original fictional dialogue of 12-18 substantial speaking turns between two or three professionals. Name each role, establish an actual work problem, and let the exchange progress through questions, clarification, competing constraints and a credible next step or explicitly unresolved issue. Use the occupation's natural nomenclature and register. Avoid an interview between a teacher and a learner, generic small talk, and inserting a glossary definition into every reply. Explain specialist terms outside the dialogue instead.
4. After the script, explain five useful expressions in context, identify two grammar or register choices and ask three questions about the speakers' reasoning. Withhold the answers until I attempt them. Add one role-switch challenge.
5. Before presenting a script, check names, numbers, chronology, roles and terminology for consistency. Label invented facts and acknowledge uncertain specialist usage. If I requested all six, deliver one complete script at a time and wait for "next". Make each scenario materially different.
