

ENGLISH FOR WORK / SEPTEMBER 2026

Higher Education and Research English

Learner workbook

Work with realistic cases, develop your own response, and use the answer section after you have tried the tasks.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For faculty, postdoctoral researchers, graduate students, lab managers, research administrators, grant staff, ethics-board coordinators, and academic program leaders.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Your course at a glance

Use the lesson numbers to match this document with the website and the other guides.

01 Research Questions and Study Design

Clarify missing information before responding.

02 Grant Proposals and Specific Aims

Separate observations, assumptions, and conclusions.

03 Lab Meetings and Data Challenges

Make a request with a clear action, purpose, and realistic timing.

04 Research Ethics and Human Subjects

Clarify missing information before responding.

05 Authorship, Collaboration, and Credit

Include relevant voices and clarify the decision process.

06 Peer Review and Revision Responses

Acknowledge a communication problem and give a corrected message.

07 Data Management and Reproducibility

Make a request with a clear action, purpose, and realistic timing.

08 Academic Presentations and Conferences

Separate observations, assumptions, and conclusions.

Choose your pace

Quick practice: spend 15 minutes reading one case and saying a response. Full lesson: allow 45-60 minutes for language work, conversation, writing, and revision.

Level support

B1 learners can use the frames and a partner. B2 learners can try a response before reading the model. C1 learners can add the harder follow-up and reduce preparation time. These are teaching suggestions, not certified CEFR level ratings.

After practicing: open the AI prompt workshop, or use the prompts at the end of this guide.

LESSON 01 / READ AND NOTICE

Research Questions and Study Design

Clarify missing information before responding.

SITUATION

A research proposal asks whether a program "works" without specifying the outcome or population.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

research question - The specific question a study is designed to investigate.

hypothesis - A proposed explanation or prediction that can be examined using evidence.

methodology - The methods and reasoning used to conduct a study or analysis.

limitation - A condition that restricts what evidence, work, or a conclusion can establish.

3. Notice the language

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Improve this sentence: Could you explain what does this mean?

LESSON 01 / PRACTICE AND PRODUCE

Ask a precise question

4. Check the language

1. Which indirect question has the usual word order?
 - A. Could you confirm when the review starts?
 - B. Could you confirm when does the review start?
 - C. Could you confirm when starts the review?
2. Someone says the report is 'ready.' Which question best clarifies its approval status?
 - A. Can you send the report to me this afternoon?
 - B. Who will present the report at the meeting?
 - C. Has the report been approved, or is it ready for review?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 02 / READ AND NOTICE

Grant Proposals and Specific Aims

Separate observations, assumptions, and conclusions.

SITUATION

A grant draft promises to solve a broad scientific problem using a small pilot study.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

specific aims - The focused objectives a research proposal intends to achieve.

significance - The importance of a question or finding; statistical significance has a separate technical meaning.

innovation - A new or improved approach, product, or process intended to create value.

feasibility - Whether a proposed activity can reasonably be carried out under stated conditions.

3. Notice the language

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

The available evidence shows

This may indicate ..., but

We have not yet established whether

Improve this sentence: The pilot proves this will work everywhere.

LESSON 02 / PRACTICE AND PRODUCE

Match certainty to evidence

4. Check the language

1. Which sentence preserves uncertainty about an unconfirmed cause?
 - A. The change must have caused the delay.
 - B. The change definitely caused the delay.
 - C. The change may have contributed to the delay.
2. A result comes from a small pilot in one location. Which phrase accurately limits the claim?
 - A. Across the service, the observed result was ...
 - B. In this pilot, the observed result was ...
 - C. In similar locations, we can now expect the same result ...

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 03 / READ AND NOTICE

Lab Meetings and Data Challenges

Make a request with a clear action, purpose, and realistic timing.

SITUATION

A result differs from an earlier experiment, but the lab notes omit a protocol change.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

control - A process, approval, check, or technical safeguard designed to reduce risk.

replication - Repeating a study or test to examine whether a finding holds again.

protocol drift - A gradual or unnoticed departure from the planned study or working procedure.

analysis assumption - A condition treated as true for the purpose of an analysis.

3. Notice the language

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Improve this sentence: Please revert soonest with the necessary.

LESSON 03 / PRACTICE AND PRODUCE

Ask for an actionable next step

4. Check the language

1. What does 'Please send it by Thursday' normally mean?
 - A. Keep sending it regularly until Thursday.
 - B. Send it no later than Thursday.
 - C. Send it on Thursday, but not earlier.
2. Which request gives the recipient enough detail to act?
 - A. Could you confirm the document version needed for the review?
 - B. Could you confirm that the review is important?
 - C. Could you confirm that you received my earlier message?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 04 / READ AND NOTICE

Research Ethics and Human Subjects

Clarify missing information before responding.

SITUATION

A researcher wants to reuse participant data for a new question. The existing approval and consent materials have not been reviewed.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

IRB - Institutional review board: a body that reviews covered human-subjects research under applicable requirements.

informed consent - A process of providing relevant information and obtaining voluntary agreement under applicable requirements.

secondary use - Use of data or material for a purpose beyond the original collection or primary purpose.

human subjects - People whose participation or identifiable information is involved in research under the applicable definition.

3. Notice the language

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Improve this sentence: Could you explain what does this mean?

LESSON 04 / PRACTICE AND PRODUCE

Ask a precise question

4. Check the language

1. Which indirect question has the usual word order?
 - A. Could you confirm when the review starts?
 - B. Could you confirm when does the review start?
 - C. Could you confirm when starts the review?
2. Someone says the report is 'ready.' Which question best clarifies its approval status?
 - A. Can you send the report to me this afternoon?
 - B. Who will present the report at the meeting?
 - C. Has the report been approved, or is it ready for review?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 05 / READ AND NOTICE

Authorship, Collaboration, and Credit

Include relevant voices and clarify the decision process.

SITUATION

Collaborators disagree about authorship late in a project. Their contributions and expectations have not been discussed together.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

authorship - Recognized responsibility and credit for creating a scholarly or other written work.

contribution - A person's or activity's part in producing a shared result.

corresponding author - The author designated to coordinate communication about a scholarly publication.

acknowledgment - Recognition of another person's contribution or confirmation that a message was received.

3. Notice the language

Summarize the issue neutrally, invite missing perspectives, and distinguish discussion from decision. State who can decide and record any unresolved question. Do not assume silence means agreement.

Let's hear ... before we decide.

The point we still need to resolve is

Who will make this decision, and what do they need?

Improve this sentence: Nobody objected, so everyone agrees.

LESSON 05 / PRACTICE AND PRODUCE

Help a group reach a clear next step

4. Check the language

1. Which phrase invites a missing perspective?
 - A. The remote team has been quiet, so they must agree.
 - B. We can record their agreement without asking them.
 - C. We haven't heard from the remote team yet; what is your view?
2. Which closing statement records an unresolved decision accurately?
 - A. Everyone spoke, so the decision must be final.
 - B. Approval is pending; the sponsor will review the two options.
 - C. We discussed the options, so approval is complete.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You hold a relevant concern that has not been discussed. Raise it when invited and ask who will decide. Help the facilitator state one unresolved question accurately.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 06 / READ AND NOTICE

Peer Review and Revision Responses

Acknowledge a communication problem and give a corrected message.

SITUATION

A reviewer points out that a manuscript's claim goes beyond its sample. The authors agree that the wording needs revision.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

peer review - Evaluation of scholarly work by others with relevant expertise.

major revision - A publication decision requiring substantial changes before a manuscript is reconsidered.

response letter - A document replying to comments or questions and explaining the changes or reasoning.

scope - Defined boundary of work, responsibility, deliverables, assumptions, and exclusions.

3. Notice the language

Name what was unclear or wrong, acknowledge its effect, and correct it. A brief apology can help, followed by a practical next step. Avoid explaining away the other person's reaction or promising an outcome you cannot control.

My earlier message did not make ... clear.

I'm sorry for The correct information is

Let me check that the revised explanation addresses

Improve this sentence: I'm sorry if you failed to understand.

LESSON 06 / PRACTICE AND PRODUCE

Repair a misunderstanding

4. Check the language

1. Which apology takes responsibility for unclear wording?
 - A. I'm sorry we could not meet the original date.
 - B. I'm sorry my earlier wording was unclear.
 - C. I'm sorry the process took longer than expected.
2. What should follow an apology for an incorrect date?
 - A. The corrected date and the current confirmation status.
 - B. A longer explanation that never states the correct date.
 - C. A new guaranteed date even if it is unverified.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are frustrated because an earlier message created an expectation. Explain that expectation. Ask your partner to distinguish the correction from anything still uncertain.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 07 / READ AND NOTICE

Data Management and Reproducibility

Make a request with a clear action, purpose, and realistic timing.

SITUATION

A shared dataset has variable names but no description of units, missing values, or collection dates.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

metadata - Information describing data, such as its source, units, dates, and structure.

repository - A managed location for storing and accessing data, documents, or code.

provenance - The documented origin and history of data or an item.

reproducibility - Obtaining consistent results using the same data and methods; conventions vary by research field.

3. Notice the language

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Improve this sentence: Please revert soonest with the necessary.

LESSON 07 / PRACTICE AND PRODUCE

Ask for an actionable next step

4. Check the language

1. What does 'Please send it by Thursday' normally mean?
 - A. Send it no later than Thursday.
 - B. Send it on Thursday, but not earlier.
 - C. Keep sending it regularly until Thursday.
2. Which request gives the recipient enough detail to act?
 - A. Could you confirm that the review is important?
 - B. Could you confirm that you received my earlier message?
 - C. Could you confirm the document version needed for the review?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 08 / READ AND NOTICE

Academic Presentations and Conferences

Separate observations, assumptions, and conclusions.

SITUATION

An audience member asks whether a small study proves a general theory. The presenter needs a concise answer.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

generalizability - The extent to which findings may apply beyond the people or conditions studied.

limitation - A condition that restricts what evidence, work, or a conclusion can establish.

future work - Further questions or activities proposed after the current study or project.

conference Q&A - The question-and-answer discussion associated with a conference presentation.

3. Notice the language

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

The available evidence shows

This may indicate ..., but

We have not yet established whether

Improve this sentence: The pilot proves this will work everywhere.

LESSON 08 / PRACTICE AND PRODUCE

Match certainty to evidence

4. Check the language

1. Which sentence preserves uncertainty about an unconfirmed cause?
 - A. The change must have caused the delay.
 - B. The change definitely caused the delay.
 - C. The change may have contributed to the delay.
2. A result comes from a small pilot in one location. Which phrase accurately limits the claim?
 - A. Across the service, the observed result was ...
 - B. In this pilot, the observed result was ...
 - C. In similar locations, we can now expect the same result ...

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

Answer workshop

Try the tasks first. The model is one acceptable response, not a script to memorize. Your written version needs a subject line, an opening, and appropriate context. Assess it using the four criteria at the end.

01 | Research Questions and Study Design

Editing example: Could you explain what this means?

After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: what this means.

Check 1: A - Could you confirm when the review starts?

A: The embedded question uses subject then verb: the review starts.

B: Remove 'does' and use statement word order after 'confirm'.

C: Place the subject 'the review' before 'starts'.

Check 2: C - Has the report been approved, or is it ready for review?

A: This asks about delivery timing, not whether approval has happened.

B: This asks about the presenter, not the report's approval status.

C: This question distinguishes two meanings of 'ready' that affect the next action.

Model response: What outcome would count as improvement, for whom, and over what period?

A clearer research question will help us choose an appropriate design and describe its limits.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

02 | Grant Proposals and Specific Aims

Editing example: The pilot worked in the tested setting; performance elsewhere remains untested.

The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Check 1: C - The change may have contributed to the delay.

A: 'Must have' expresses a strong inference that the evidence may not support.

B: 'Definitely' presents the cause as certain.

C: 'May have contributed' presents a possibility without claiming the cause is established.

Check 2: B - In this pilot, the observed result was ...

A: A pilot in one location does not establish a service-wide observation.

B: This locates the finding in the setting actually studied.

C: Similarity alone does not establish that the result will transfer.

Model response: The pilot can test feasibility and provide preliminary evidence. It cannot resolve the entire problem. I'll narrow the aim so the proposed work and the claim match.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

03 | Lab Meetings and Data Challenges

Editing example: Could you send the missing document and confirm when it will be available?

The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

Check 1: B - Send it no later than Thursday.

A: This interprets a deadline as a continuing activity, which would use until.

B: 'By' sets the latest point, while 'after' refers to a later time.

C: By Thursday permits earlier delivery; it is not restricted to that day.

Check 2: A - Could you confirm the document version needed for the review?

A: The requested action and information are explicit.

B: This checks importance rather than identifying the needed document version.

C: This checks receipt, not which version is required for the review.

Model response: Could we compare the protocol versions and recorded conditions? Please add the missing change to the record so the team can assess possible explanations for the difference.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

04 | Research Ethics and Human Subjects

Editing example: Could you explain what this means?

After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: what this means.

Check 1: A - Could you confirm when the review starts?

A: The embedded question uses subject then verb: the review starts.

B: Remove 'does' and use statement word order after 'confirm'.

C: Place the subject 'the review' before 'starts'.

Check 2: C - Has the report been approved, or is it ready for review?

A: This asks about delivery timing, not whether approval has happened.

B: This asks about the presenter, not the report's approval status.

C: This question distinguishes two meanings of 'ready' that affect the next action.

Model response: Does the proposed use fall within the relevant approval and consent arrangements? Let's check with the appropriate ethics and data-governance processes before assuming reuse is permitted.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

05 | Authorship, Collaboration, and Credit

Editing example: Before I record agreement, does anyone have a concern or need more time?

The revised question gives people a way to raise a concern. Silence can have several meanings, especially in unfamiliar or unequal-power situations.

Check 1: C - We haven't heard from the remote team yet; what is your view?

A: Silence does not establish agreement.

B: Recording agreement without checking may misrepresent the team's view.

C: It invites participation without interpreting silence as consent.

Check 2: B - Approval is pending; the sponsor will review the two options.

A: Participation alone does not establish a decision.

B: This distinguishes discussion from approval and identifies the next reviewer.

C: Discussion does not itself constitute approval.

Model response: Could we document each contribution and review the applicable authorship criteria as a group? That will give us a clearer basis for the discussion than relying on assumptions about rank or effort.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

06 | Peer Review and Revision Responses

Editing example: I'm sorry my message did not explain the timing clearly.

The revision takes responsibility for the message without blaming the listener. It identifies what needs to be corrected.

Check 1: B - I'm sorry my earlier wording was unclear.

A: This acknowledges a missed date, not the communication problem in the question.

B: This acknowledges the speaker's contribution to the problem.

C: This acknowledges duration, but does not take responsibility for the unclear wording.

Check 2: A - The corrected date and the current confirmation status.

A: A repair needs usable corrected information, including any uncertainty.

B: The reader still lacks the information they need.

C: An unsupported new promise can create a second misunderstanding.

Model response: Thank you for identifying this limitation. We have narrowed the claim to the studied sample and added a discussion of generalizability. The response should point the reviewer to the revised passage.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

07 | Data Management and Reproducibility

Editing example: Could you send the missing document and confirm when it will be available?

The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

Check 1: A - Send it no later than Thursday.

A: 'By' sets the latest point, while 'after' refers to a later time.

B: By Thursday permits earlier delivery; it is not restricted to that day.

C: This interprets a deadline as a continuing activity, which would use until.

Check 2: C - Could you confirm the document version needed for the review?

A: This checks importance rather than identifying the needed document version.

B: This checks receipt, not which version is required for the review.

C: The requested action and information are explicit.

Model response: Could you add a data dictionary covering units, missing-value codes, and collection dates? Those details will help another researcher interpret and reuse the data correctly.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

08 | Academic Presentations and Conferences

Editing example: The pilot worked in the tested setting; performance elsewhere remains untested.

The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Check 1: C - The change may have contributed to the delay.

A: 'Must have' expresses a strong inference that the evidence may not support.

B: 'Definitely' presents the cause as certain.

C: 'May have contributed' presents a possibility without claiming the cause is established.

Check 2: B - In this pilot, the observed result was ...

A: A pilot in one location does not establish a service-wide observation.

B: This locates the finding in the setting actually studied.

C: Similarity alone does not establish that the result will transfer.

Model response: The study offers evidence relevant to the theory under these conditions. It does not establish the theory in every setting. A useful next step would test whether the finding holds in a broader sample.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Digital.gov: plain-language guidance

<https://digital.gov/guides/plain-language>

Council of Europe: CEFR descriptors

<https://www.coe.int/en/web/common-european-framework-reference-languages/cefr-descriptors>

US Department of Education: FERPA

<https://studentprivacy.ed.gov/ferpa>

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

Practice grammar in context

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Higher Education and Research English

Professional audience: faculty, postdoctoral researchers, graduate students, lab managers, research administrators, grant staff, ethics-board coordinators, and academic program leaders

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Lesson 01: Research Questions and Study Design

Original fictional case: A research proposal asks whether a program "works" without specifying the outcome or population.

Language workshop: Ask a precise question

Communication goal: Clarify missing information before responding.

Language guidance: Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

Useful frames (complete the gaps with case facts): When you say ..., do you mean ...? / Could you clarify which ...? / So, my understanding is Is that right?

Vocabulary: research question: The specific question a study is designed to investigate. / hypothesis: A proposed explanation or prediction that can be examined using evidence. / methodology: The methods and reasoning used to conduct a study or analysis. / limitation: A condition that restricts what evidence, work, or a conclusion can establish.

Speaking task: Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Writing task: Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and

an appropriate opening. Do not invent a deadline, finding, or approval.

Optional second-round challenge: The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Model for comparison AFTER my attempt, not a response to give me first: What outcome would count as improvement, for whom, and over what period? A clearer research question will help us choose an appropriate design and describe its limits.

END REFERENCE

TASK: Grammar that changes the meaning

1. For a lesson, use its language workshop as the focus. For a dialogue, quote one actual sentence and select one useful grammar feature from it, such as question word order, tense, modality, conditionals or clause linking. Explain in no more than 90 words how this feature helps the speakers do their work. Keep the grammar target narrow.
2. Give two short contrasting sentences using this workplace context. Explain the difference in time, certainty, condition or politeness. Label invented examples and preserve the distinction between possible, planned and confirmed events. Describe context-dependent choices as choices, not universal rules.
3. Give me one editing or sentence-building task using a known case fact. Do not copy the supplied editing example or reveal its answer. Ask me to explain my intended meaning. Stop and wait.
4. After I answer, quote my wording, identify at most two issues, and give a brief explanation and one hint. Ask me to revise before offering a full corrected version. Then accept any accurate, natural alternative that serves the purpose.
5. Continue with two new tasks, one at a time: first guided, then an original response without a sentence frame. End with a two-sentence workplace message using the target feature and a compact self-check. Do not replace this sequence with a worksheet and answer key.

END REFERENCE

TASK: Coach my workplace writing

1. Ask me to paste my own fictional or anonymized draft and identify its reader and purpose. If the reference gives a writing task, mention that task as the default. If it is a dialogue, suggest a brief follow-up message that records its outcome and open questions. Stop and wait. Do not write the message for me first.
2. Once I supply the draft, check it against the reference. If an ambiguity changes the meaning, ask one focused question before rewriting. Do not assume that the draft is correct evidence for a new deadline, approval, diagnosis, cost or commitment.
3. Give feedback in three parts: one effective phrase with a reason; up to three priority improvements, quoting my words; and one short revision task for me. Prioritize incorrect facts or unclear action before minor grammar. For each language correction, explain why it matters to this reader. Label optional stylistic alternatives separately and preserve my level of certainty and intended politeness.
4. Stop and wait for my revision. Then compare the two attempts, identify an improvement and offer one edited version that preserves my voice and purpose. Keep the requested length; if none is specified, use 70-110 words. Explain any meaningful change rather than silently making the message stronger or more certain.
5. Close with one phrase worth reusing and a short transfer task for a different fictional reader. Wait for my attempt before providing another model.
