

ENGLISH FOR WORK / SEPTEMBER 2026

Insurance English

Conversation lab

8 complete workplace dialogues, followed by eight additional role-play cases. Study the exchanges, then make the conversation your own.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For underwriters, claims adjusters, brokers, risk managers, actuarial analysts, policy-service teams, compliance staff, and insurance operations leaders.

Fictional language practice. Legal, financial, and regulatory meanings depend on jurisdiction and context; use current documents and qualified review for actual decisions.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Inside this conversation lab

Original fictional training conversations in professional English. These are realistic scripts, not transcripts of actual people. The professional roles are the speaker labels; all figures, incidents, and organizations are invented.

01 Underwriting information

02 Coverage wording

03 Claims intake and reserve

04 A disputed decision

05 Renewal discussion

06 Fraud referral

07 Pricing assumptions

08 Complaint handling

Then try eight independent role-play cases, followed by feedback criteria and references.

Read it. Hear it. Make it yours.

1. Read the setting. Identify the roles, the immediate problem, and what each speaker needs.
2. Read the whole conversation aloud with a partner. In a group, give a third person the observer role. For three-speaker scripts, assign each professional a separate voice.
3. Notice how the speakers ask a specific question, qualify a claim, disagree, explain a technical point, or agree on a next step. Underline language you would actually use.
4. Cover the script. Recreate the exchange using the situation and professional roles. Keep the meaning, but change the wording.
5. Switch roles and introduce a complication: a missing record, a different priority, an unavailable colleague, or a changed assumption. End with a clear outcome or unresolved question.

Register and terminology

These colleagues use concise professional language. In an internal technical meeting, familiar abbreviations can be natural. With a new colleague or a client, expand unfamiliar terms and check understanding. Keep disagreement directed at the evidence or proposal, and match the degree of certainty to what is known.

Independent study

Speak each role aloud. Pause before the reply and supply your own response before revealing the next line. Record a second version using invented details, then compare its clarity and tone with the script.

Professional context

Fictional language practice. Legal, financial, and regulatory meanings depend on jurisdiction and context; use current documents and qualified review for actual decisions.

FULL DIALOGUE 01 / 6 SPEAKING TURNS

Underwriting information

An underwriter asks a broker about incomplete risk information.

Roles: Underwriter / Broker

Underwriter: The application lists a warehouse, but the survey mentions light manufacturing. What activities actually take place?

Broker: I'll confirm the operations and obtain an updated description from the client.

Underwriter: We need that before assessing the risk and proposing terms.

Broker: Should I tell them the current indication is still available?

Underwriter: Explain that it was based on the information supplied and remains subject to review.

Broker: I'll send the verified details and distinguish the request for terms from confirmed cover.

Notice the professional language

Discuss this wording: "The application lists a warehouse, but the survey mentions light manufacturing. What activities actually take place?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 02 / 6 SPEAKING TURNS

Coverage wording

A claims team reviews an ambiguous policy reference.

Roles: Claims handler / Coverage specialist

Claims handler: The claim summary says this loss is covered, but it doesn't identify the policy wording.

Coverage specialist: We need the applicable policy, endorsements, circumstances, and jurisdictional context before reaching that conclusion.

Claims handler: I'll gather the documents and separate reported facts from assumptions.

Coverage specialist: Note any unresolved questions and follow the authorized coverage-review process.

Claims handler: I'll tell the broker the assessment is pending rather than promise payment.

Coverage specialist: I'll provide the reviewed explanation and its basis when the decision is authorized.

Notice the professional language

Discuss this wording: "The claim summary says this loss is covered, but it doesn't identify the policy wording." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 03 / 6 SPEAKING TURNS

Claims intake and reserve

A handler discusses an early loss estimate.

Roles: Claims handler / Claims supervisor

Claims handler: The initial estimate is \$40,000, but we haven't received the contractor's breakdown.

Claims supervisor: Record it as preliminary and apply our reserving process using the available evidence.

Claims handler: The customer asked whether that figure is the settlement offer.

Claims supervisor: Explain that an internal estimate or reserve isn't an agreed settlement or coverage decision.

Claims handler: I'll request the missing supporting information and document the conversation.

Claims supervisor: Review the estimate when new evidence arrives and preserve the reason for any change.

Notice the professional language

Discuss this wording: "The initial estimate is \$40,000, but we haven't received the contractor's breakdown." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 04 / 6 SPEAKING TURNS

A disputed decision

A claims team prepares to explain a reviewed decision.

Roles: Claims supervisor / Customer relations specialist

Claims supervisor: The customer disputes the decision and says our letter didn't explain the relevant clause clearly.

Customer relations specialist: We should check the approved reasoning and explain it in plain language, with the applicable review route.

Claims supervisor: There may also be new evidence that wasn't included in the original assessment.

Customer relations specialist: Route that for proper review before repeating the earlier conclusion as final.

Claims supervisor: I'll acknowledge the concern and identify what is being reconsidered.

Customer relations specialist: I'll ensure the response follows the complaint process and accurately states the current status.

Notice the professional language

Discuss this wording: "The customer disputes the decision and says our letter didn't explain the relevant clause clearly." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 05 / 6 SPEAKING TURNS

Renewal discussion

A broker and underwriter review changed terms.

Roles: Broker / Underwriter

Broker: The renewal premium increased despite no reported claims this year. What are the main drivers?

Underwriter: The indication reflects the reviewed exposure and pricing factors, not claims experience alone.

Broker: Can you explain the specific changes and any differences in limits or deductibles?

Underwriter: I'll provide an accurate comparison of the proposed terms and the information used.

Broker: I'll review the client's updated needs and discuss the options without implying identical cover.

Underwriter: Confirm any revised information before we finalize terms through the normal binding process.

Notice the professional language

Discuss this wording: "The renewal premium increased despite no reported claims this year. What are the main drivers?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 06 / 6 SPEAKING TURNS

Fraud referral

A handler flags inconsistent information.

Roles: Claims handler / Special investigations liaison

Claims handler: The reported dates don't match the repair records. I don't know why.

Special investigations liaison: Document the discrepancy and refer it under our process without labeling the claimant dishonest.

Claims handler: Should I ask for clarification before making the referral?

Special investigations liaison: Follow the applicable handling instructions and preserve the original evidence.

Claims handler: I'll keep the factual timeline separate from possible explanations.

Special investigations liaison: I'll confirm the appropriate next steps and information-sharing limits for the review.

Notice the professional language

Discuss this wording: "Should I ask for clarification before making the referral?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 07 / 6 SPEAKING TURNS

Pricing assumptions

An actuarial team reviews a model update.

Roles: Actuarial analyst / Pricing manager

Actuarial analyst: The proposed rate change is sensitive to the loss-trend assumption.

Pricing manager: Show the sensitivity range and explain which experience periods informed the assumption.

Actuarial analyst: The recent period is sparse, so the estimate has substantial uncertainty.

Pricing manager: Make that visible. Don't let a single point estimate imply more precision than the data support.

Actuarial analyst: I'll document the model version, exclusions, and review questions.

Pricing manager: We'll assess the proposal through the appropriate actuarial and pricing governance before any implementation.

Notice the professional language

Discuss this wording: "The proposed rate change is sensitive to the loss-trend assumption." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 08 / 6 SPEAKING TURNS

Complaint handling

A service team reviews a delayed response.

Roles: Complaints officer / Policy-service manager

Complaints officer: The customer's complaint was acknowledged, but nobody recorded ownership of the investigation.

Policy-service manager: I'll identify the responsible handler and verify the applicable response requirements.

Complaints officer: They also report receiving two contradictory explanations of the policy change.

Policy-service manager: We'll retrieve those communications and review them against the actual policy records.

Complaints officer: I'll give an accurate update and explain the next step through the complaint process.

Policy-service manager: I'll make sure the final response addresses both the substantive issue and the communication failure.

Notice the professional language

Discuss this wording: "The customer's complaint was acknowledged, but nobody recorded ownership of the investigation." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

Eight more situations to make your own

The following cases are open role plays. They give you facts, contrasting roles, useful expressions, and a short model response. Use what you learned from the complete dialogues to create a longer exchange.

Preparation: two minutes. Conversation: three to five minutes. Feedback: one minute. Switch roles and repeat with the second-round challenge.

ROLE-PLAY CASE 01

Underwriting and Risk Selection

SHARED CASE

An underwriting submission describes a business activity broadly but omits its operating locations and loss history.

Role A | Responding professional

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Useful expressions

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Cover this until after your first attempt

Could you confirm the activities, locations, and requested loss-history information? Those details will help the underwriting team assess the submission without relying on assumptions about the business.

Second round

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 02

Policy Language and Coverage Interpretation

SHARED CASE

A client sees a policy summary and assumes it includes every term of coverage. The full policy has endorsements and exclusions.

Role A | Responding professional

Explain a useful distinction in plain English. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

Useful expressions

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Cover this until after your first attempt

The summary is an overview. The actual policy wording, including endorsements and exclusions, needs to be reviewed for the coverage question. Let's identify the relevant documents and ask the appropriate specialist to clarify them.

Second round

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 03

Claims Intake and Reserving

SHARED CASE

A claim report lacks the event date and supporting documents. The intake team needs a clear follow-up request.

Role A | Responding professional

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Useful expressions

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Cover this until after your first attempt

Could you provide the event date and the requested supporting records through the secure channel? If an item is unavailable, please tell us so the claim team can explain the next step.

Second round

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 04

Coverage Disputes and Denials

SHARED CASE

A client asks whether a reported loss is definitely covered. The claim review is still underway.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

The coverage review is still underway, so I cannot confirm the outcome. I can explain what information has been received, what remains outstanding, and how the team will communicate its decision.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 05

Broker and Client Renewal Meetings

SHARED CASE

A renewal quote has a lower premium but a higher deductible. The client asks whether it is the same protection for less money.

Role A | Responding professional

Compare options using the same criteria and state the tradeoff. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You favor one option but have not checked whether the scope is comparable. Ask about one difference, then explain the tradeoff you are willing to accept.

Useful expressions

Both options ..., but

Option A ..., whereas option B

The comparison depends on

Cover this until after your first attempt

The premium is lower, but the deductible has changed. We should compare the coverage terms and other differences as well before describing the options as equivalent.

Second round

Your listener focuses only on the lowest price or fastest date. Explain one other relevant comparison criterion.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 06

Fraud Indicators and SIU Referral

SHARED CASE

An unusual claim pattern prompts concern. A note calls the customer fraudulent before an investigation has established the facts.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

The pattern is an indicator for review, not proof of fraud. I'll describe the observed facts neutrally and route the concern through the appropriate investigation process.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 07

Actuarial Assumptions and Pricing

SHARED CASE

An actuarial update shows claim costs rising because both the number of claims and average cost per claim increased.

Role A | Responding professional

Explain a useful distinction in plain English. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

Useful expressions

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Cover this until after your first attempt

Both frequency and severity contributed to the increase. I'll show the number of claims separately from their average cost so the audience can understand the two drivers.

Second round

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 08

Compliance, Market Conduct, and Complaints

SHARED CASE

A policyholder's complaint received a generic reply that did not address a specific fee question.

Role A | Responding professional

Acknowledge a communication problem and give a corrected message. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are frustrated because an earlier message created an expectation. Explain that expectation. Ask your partner to distinguish the correction from anything still uncertain.

Useful expressions

My earlier message did not make ... clear.

I'm sorry for The correct information is

Let me check that the revised explanation addresses

Cover this until after your first attempt

Our earlier reply did not answer your fee question. I'm sorry. I'll record that point for review and explain the next step and expected update under our complaints process.

Second round

The listener remains disappointed after the correction. Acknowledge the impact and restate the available next step calmly.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

Fictional language practice. Legal, financial, and regulatory meanings depend on jurisdiction and context; use current documents and qualified review for actual decisions.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Digital.gov: plain-language guidance

<https://digital.gov/guides/plain-language>

Council of Europe: CEFR descriptors

<https://www.coe.int/en/web/common-european-framework-reference-languages/cefr-descriptors>

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

Rehearse with an AI colleague

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Insurance English

Professional audience: underwriters, claims adjusters, brokers, risk managers, actuarial analysts, policy-service teams, compliance staff, and insurance operations leaders

Scope: Fictional language practice. Legal, financial, and regulatory meanings depend on jurisdiction and context; use current documents and qualified review for actual decisions.

Dialogue 01: Underwriting information

Original fictional setting: An underwriter asks a broker about incomplete risk information.

Professional roles: Underwriter / Broker

Published dialogue (reference script, not my own performance):

Underwriter: The application lists a warehouse, but the survey mentions light manufacturing. What activities actually take place?

Broker: I'll confirm the operations and obtain an updated description from the client.

Underwriter: We need that before assessing the risk and proposing terms.

Broker: Should I tell them the current indication is still available?

Underwriter: Explain that it was based on the information supplied and remains subject to review.

Broker: I'll send the verified details and distinguish the request for terms from confirmed cover.

END REFERENCE

TASK: Interactive workplace role-play

1. Use the supplied case or dialogue as the starting situation. Give a two-sentence briefing and offer two relevant professional roles for me to choose from. For a supplied dialogue, use its actual roles. Ask which role I want, then stop and wait. Do not write my replies.

2. After I choose, identify who you will play and the immediate communication goal. Play the other professional; where a meeting requires a third person, label each of your speakers clearly. Start with one natural workplace turn and wait for my reply. Keep most turns to one to three sentences and ask no more than one question at a time.
3. Let the exchange develop across six to ten learner turns, or end earlier if I type "feedback". Respond to what I actually say. Include a plausible clarification, disagreement or tradeoff without silently changing the starting facts. Mark any added constraint as a fictional second-round variation. Do not resolve approvals, evidence or commitments that remain uncertain.
4. Stay in role during the exchange. If my meaning is unclear, ask for clarification naturally. Give a hint only if I ask or cannot proceed. Do not deliver a model conversation in advance.
5. At the debrief, quote two of my phrases: one successful choice and one worth improving. Check factual accuracy, language, register and whether the next step was clear. Give up to three focused suggestions. Ask me to retry the weakest turn; wait. Only then offer an alternative wording and a harder replay.

Broker: Should I tell them the current indication is still available?

Underwriter: Explain that it was based on the information supplied and remains subject to review.

Broker: I'll send the verified details and distinguish the request for terms from confirmed cover.

END REFERENCE

TASK: Extend the conversation library

1. Propose six distinct, common scenarios in this field beyond the supplied case or script. For each, name the setting, two or more professional roles, the communication problem and one useful terminology focus. Include routine coordination, clarification, a complication, disagreement, handoff and follow-up where relevant. Choose scenarios that fit this profession, rather than forcing unsuitable situations into it.

2. Ask me to choose one scenario, or request all six in sequence. Stop and wait. Do not write all the scripts before I choose.
3. For the selected scenario, write an original fictional dialogue of 12-18 substantial speaking turns between two or three professionals. Name each role, establish an actual work problem, and let the exchange progress through questions, clarification, competing constraints and a credible next step or explicitly unresolved issue. Use the occupation's natural nomenclature and register. Avoid an interview between a teacher and a learner, generic small talk, and inserting a glossary definition into every reply. Explain specialist terms outside the dialogue instead.
4. After the script, explain five useful expressions in context, identify two grammar or register choices and ask three questions about the speakers' reasoning. Withhold the answers until I attempt them. Add one role-switch challenge.
5. Before presenting a script, check names, numbers, chronology, roles and terminology for consistency. Label invented facts and acknowledge uncertain specialist usage. If I requested all six, deliver one complete script at a time and wait for "next". Make each scenario materially different.
