

ENGLISH FOR WORK / SEPTEMBER 2026

Marketing English

Conversation lab

12 complete workplace dialogues, followed by eight additional role-play cases. Study the exchanges, then make the conversation your own.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For brand, product marketing, growth, content, SEO, lifecycle, demand generation, marketing operations, social, and agency teams.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Inside this conversation lab

Original fictional training conversations in professional English. These are realistic scripts, not transcripts of actual people. The professional roles are the speaker labels; all figures, incidents, and organizations are invented.

- 01 Campaign Brief: 'We Need Awareness'
- 02 Positioning Debate: Product Feature vs Customer Problem
- 03 Paid Search: ROAS Looks Good, Sales Quality Is Weak
- 04 Attribution Fight: Last Click vs Influenced Pipeline
- 05 Creative Review: Taste vs Brief
- 06 MQL Definition: Marketing and Sales Disagree
- 07 SEO and Legal Review: Claim Too Strong
- 08 Email Readout: Open Rate Is Up, Revenue Is Flat
- 09 Influencer Campaign: Disclosure and Authenticity
- 10 Agency Budget: More Spend or Better Brief?
- 11 A/B Test: Inconclusive Result
- 12 Social Backlash: Holding Statement

Then try eight independent role-play cases, followed by feedback criteria and references.

Read it. Hear it. Make it yours.

1. Read the setting. Identify the roles, the immediate problem, and what each speaker needs.
2. Read the whole conversation aloud with a partner. In a group, give a third person the observer role. For three-speaker scripts, assign each professional a separate voice.
3. Notice how the speakers ask a specific question, qualify a claim, disagree, explain a technical point, or agree on a next step. Underline language you would actually use.
4. Cover the script. Recreate the exchange using the situation and professional roles. Keep the meaning, but change the wording.
5. Switch roles and introduce a complication: a missing record, a different priority, an unavailable colleague, or a changed assumption. End with a clear outcome or unresolved question.

Register and terminology

These colleagues use concise professional language. In an internal technical meeting, familiar abbreviations can be natural. With a new colleague or a client, expand unfamiliar terms and check understanding. Keep disagreement directed at the evidence or proposal, and match the degree of certainty to what is known.

Independent study

Speak each role aloud. Pause before the reply and supply your own response before revealing the next line. Record a second version using invented details, then compare its clarity and tone with the script.

Professional context

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

FULL DIALOGUE 01 / 7 SPEAKING TURNS

Campaign Brief: 'We Need Awareness'

A VP asks for a campaign but cannot define the target audience or business outcome.

Roles: VP / Marketing lead / Marketing strategist

VP: We need a big awareness campaign next month.

Marketing lead: Awareness among whom, and what should they do after seeing it?

Marketing strategist: Before we brief creative, we need to define the audience, insight, message, channel, budget, and measurement. Awareness for executives is different from awareness for end users.

VP: Just make noise in the market.

Marketing strategist: We can create visibility, but to spend responsibly we need a specific audience and a signal of success, such as branded search lift, site visits from target accounts, or sales conversations.

VP: Start with target-account engagement; I will confirm the audience and budget with the team.

Marketing strategist: I will build the brief around that objective and explain which measures can and cannot demonstrate campaign impact.

Notice the professional language

Good marketers turn vague requests into strategic questions.

Awareness should still have audience, channel, and measurement discipline.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 02 / 7 SPEAKING TURNS

Positioning Debate: Product Feature vs Customer Problem

Product wants the homepage headline to lead with a technical feature.

Roles: Product manager / Content lead / Marketing strategist

Product manager: The headline should say 'AI-powered orchestration layer.' That is the feature.

Content lead: Customers may not know why that matters.

Marketing strategist: Can we lead with the customer problem and use the feature as proof? The buyer cares about reducing manual handoffs and missed approvals. 'AI-powered orchestration' supports the claim, but it should not be the whole message.

Product manager: But competitors say similar things.

Marketing strategist: Then the proof matters even more: workflow examples, time saved, integration depth, and customer evidence.

Product manager: I will gather specific workflow examples that the product can substantiate.

Marketing strategist: Then we can write a customer-centered headline and use the technical capability as supporting evidence.

Notice the professional language

Positioning should connect product capability to customer value.

A feature can be a proof point, not necessarily the main message.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 03 / 7 SPEAKING TURNS

Paid Search: ROAS Looks Good, Sales Quality Is Weak

Marketing reports strong ad-platform ROAS, but sales says leads are poor.

Roles: Performance marketer / Sales director / Marketing strategist

Performance marketer: Google Ads shows a 5.2 ROAS. We should scale budget.

Sales director: The leads are not converting to qualified opportunities.

Marketing strategist: Platform ROAS is useful, but we need to reconcile it with CRM revenue, lead quality, and sales-cycle stage. Are these conversions high-intent demo requests or low-intent content downloads?

Performance marketer: Mostly webinar registrations.

Marketing strategist: Then I would not scale yet. Let's separate acquisition cost by conversion type and optimize toward qualified pipeline, not only form fills.

Performance marketer: I will check how conversion values were assigned to those registrations.

Marketing strategist: Good. A platform value isn't automatically realized revenue; reconcile it with the relevant CRM outcomes before scaling.

Notice the professional language

ROAS - Return on ad spend; revenue attributed to ads divided by ad spend.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 04 / 7 SPEAKING TURNS

Attribution Fight: Last Click vs Influenced Pipeline

The CFO questions whether marketing really created pipeline.

Roles: CFO / Marketing ops / Marketing strategist

CFO: Sales says they sourced this opportunity. Marketing says it influenced it. Which is true?

Marketing ops: Both can be true under different attribution models.

Marketing strategist: Last-click attribution shows the final touch before conversion. Influenced pipeline shows that marketing touched the account during the buying journey. Neither model alone proves causality.

CFO: So what should I trust?

Marketing strategist: Trust the model for the question it can answer. For budget decisions, we should combine attribution, incrementality tests, sales feedback, and pipeline quality.

CFO: Show the definitions beside both pipeline figures in the report.

Marketing strategist: I will also separate descriptive attribution from evidence about incremental impact so the budget discussion uses each measure appropriately.

Notice the professional language

Influenced pipeline - Pipeline where marketing touched the opportunity, depending on model.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 05 / 7 SPEAKING TURNS

Creative Review: Taste vs Brief

A senior stakeholder dislikes a social ad concept because it does not match their personal taste.

Roles: Stakeholder / Designer / Marketing strategist

Stakeholder: I do not like this. It feels too informal.

Designer: The brief asked for approachable and direct.

Marketing strategist: Can we evaluate it against the brief? The target audience is first-time managers, the objective is webinar registration, and the tone is meant to reduce intimidation. The question is whether this creative makes the next step feel accessible.

Stakeholder: But our brand is premium.

Marketing strategist: Agreed. We can preserve premium through layout and proof, while keeping the language human enough for the audience.

Stakeholder: Bring a revision that keeps the approachable language but strengthens the visual hierarchy.

Marketing strategist: We can compare both versions against the audience, action, and brand criteria in the approved brief.

Notice the professional language

Creative feedback should reference audience, brief, objective, and brand system.

Taste language is weaker than criteria-based feedback.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 06 / 7 SPEAKING TURNS

SQL Definition: Marketing and Sales Disagree

Sales rejects many leads that marketing counts as SQLs.

Roles: Sales manager / Demand gen / Marketing strategist

Sales manager: These SQLs are not ready. They downloaded one guide and never replied.

Demand gen: They meet the scoring threshold.

Marketing strategist: Then the score may be overweighting engagement and underweighting fit or buying intent. We should define SQL as fit plus behavior, and create a recycle path for leads that are interested but not sales-ready.

Sales manager: What changes?

Marketing strategist: Add firmographic fit, require stronger intent for handoff, and create feedback reasons when sales rejects a lead.

Sales manager: I will provide examples of accepted and rejected leads with reasons.

Marketing strategist: That feedback can help us review the scoring model and agree on a workable handoff definition.

Notice the professional language

SQL - Marketing-qualified lead based on agreed fit and engagement criteria.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 07 / 7 SPEAKING TURNS

SEO and Legal Review: Claim Too Strong

A content article uses a bold claim that legal says is unsupported.

Roles: SEO manager / Legal / Marketing strategist

SEO manager: This headline will rank and convert.

Legal: The claim 'cuts costs in half' needs substantiation.

Marketing strategist: Can we keep the search intent but adjust the claim? For example, 'ways to reduce support costs' is safer than promising a specific result unless we have evidence that result is typical.

SEO manager: Will that weaken the headline?

Marketing strategist: Maybe, but an unsupported claim creates regulatory and trust risk. We can strengthen the article with a case study, methodology, and clearer qualifiers.

SEO manager: I will revise the headline and include the evidence behind the case study.

Marketing strategist: We will review the exact claim and its context before treating the content as ready to publish.

Notice the professional language

Search intent - The likely goal behind a search query.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 08 / 7 SPEAKING TURNS

Email Readout: Open Rate Is Up, Revenue Is Flat

Lifecycle marketing reviews an email campaign with a high open rate but low revenue impact.

Roles: Lifecycle marketer / VP Marketing / Marketing strategist

Lifecycle marketer: Open rate increased by 12 percent after the new subject line.

VP Marketing: Did it produce more revenue?

Marketing strategist: Open rate is a weak success metric by itself, especially with privacy-related measurement noise. Click rate, conversion, unsubscribe rate, and downstream revenue tell us more about intent.

Lifecycle marketer: So was the test a failure?

Marketing strategist: Not necessarily, but a higher measured open rate doesn't establish increased attention or business value. Let's check measurement validity and downstream outcomes before interpreting the test.

Lifecycle marketer: I will check the tracking changes and compare downstream conversions.

Marketing strategist: Include unsubscribe behavior and the sample size so the readout explains more than a movement in measured opens.

Notice the professional language

Open rate - Percentage of delivered emails recorded as opened, with known measurement limitations.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 09 / 7 SPEAKING TURNS

Influencer Campaign: Disclosure and Authenticity

A brand manager wants an influencer to make the post feel organic.

Roles: Brand manager / Social lead / Marketing strategist

Brand manager: Can the creator avoid saying it is sponsored? It performs better if it feels natural.

Social lead: That creates disclosure risk.

Marketing strategist: If there is payment, free product, or another material connection, the audience needs a clear disclosure. We can still make the content authentic, but not hidden.

Brand manager: Will that hurt engagement?

Marketing strategist: Possibly, but undisclosed sponsorship creates legal and trust risk. Let's optimize the creative, not hide the relationship.

Brand manager: I will put the proposed disclosure into the creator brief.

Marketing strategist: Have the actual placement and wording reviewed under the applicable requirements; disclosure needs to work in the finished content.

Notice the professional language

Material connection - Relationship such as payment, employment, or free product that may require disclosure.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 10 / 7 SPEAKING TURNS

Agency Budget: More Spend or Better Brief?

An agency asks for more paid budget after campaign performance stalls.

Roles: Agency / Client / Marketing strategist

Agency: We are seeing diminishing returns. Additional budget will help us find new audiences.

Client: Why should we spend more if performance is worse?

Marketing strategist: Before increasing spend, let's diagnose the constraint: audience saturation, creative fatigue, landing page conversion, offer relevance, or targeting. More budget may amplify the same problem.

Agency: We can test new creative.

Marketing strategist: Good. Please bring a test plan with hypothesis, audience, budget, decision rule, and what we will pause if the test underperforms.

Agency: I will bring two creative hypotheses and a clearly bounded test budget.

Marketing strategist: Specify the comparison, success measure, and decision timing so we can assess what the test actually tells us.

Notice the professional language

Creative fatigue - Declining performance when the audience has seen the same creative too often.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 11 / 7 SPEAKING TURNS

A/B Test: Inconclusive Result

A landing-page test shows a small lift but insufficient sample size.

Roles: Growth marketer / Analyst / Marketing strategist

Growth marketer: Variant B is up 6 percent. Let's ship it.

Analyst: The sample is too small to call a winner.

Marketing strategist: The direction is promising, but the result is inconclusive. We can extend the test, combine it with qualitative review, or ship only if the implementation cost is low and downside risk is minimal.

Growth marketer: I need a decision today.

Marketing strategist: Then frame it as a business decision under uncertainty, not a proven test result.

Growth marketer: I will describe the result as inconclusive in the decision note.

Marketing strategist: Also record the cost and downside assumptions if the team chooses to act before stronger evidence is available.

Notice the professional language

A test readout should protect the difference between signal and proof.

Sometimes the decision is practical, but the evidence label must stay honest.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 12 / 7 SPEAKING TURNS

Social Backlash: Holding Statement

A campaign receives criticism for appearing insensitive.

Roles: Community manager / Comms lead / Marketing strategist / VP

Community manager: Negative comments are accelerating. Do we delete them?

Comms lead: Not unless they violate policy. We need a response path.

Marketing strategist: First, pause scheduled promotion, capture examples, confirm facts, and align with legal and customer support. The public holding statement should acknowledge concern without speculating or blaming.

VP: What can we say now?

Marketing strategist: We are listening to the feedback, reviewing the campaign, and will share an update when we have confirmed next steps. Internally, we need an owner for response timing and approval.

Community manager: I will name the response owner and check the scheduled content.

Marketing strategist: Make sure the published statement matches verified facts and that incoming questions reach the appropriate team.

Notice the professional language

Holding statement - Short approved response used while facts are still being confirmed.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

Eight more situations to make your own

The following cases are open role plays. They give you facts, contrasting roles, useful expressions, and a short model response. Use what you learned from the complete dialogues to create a longer exchange.

Preparation: two minutes. Conversation: three to five minutes. Feedback: one minute. Switch roles and repeat with the second-round challenge.

ROLE-PLAY CASE 01

Marketing Strategy: Audience, Insight, Problem, Outcome

SHARED CASE

A campaign brief targets "everyone who works in an office." The product is a scheduling tool, but the buyer and daily user may differ.

Role A | Responding professional

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Useful expressions

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Cover this until after your first attempt

Who decides to buy the tool, and who uses it each day? Let's define a specific audience and the problem we are solving before choosing the campaign message.

Second round

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 02

Positioning, Messaging, Brand Voice, and Proof

SHARED CASE

A draft advertisement says "the fastest tool on the market." The only evidence is an internal test against one earlier version.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

The test supports a comparison with our earlier version, not the whole market. Could we use a narrower claim that accurately describes what we measured and send it for review?

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 03

Campaign Briefs, GTM Planning, and Cross-Functional Alignment

SHARED CASE

A launch brief has a date and channel list but no audience, approved message, or measure of success.

Role A | Responding professional

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Useful expressions

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Cover this until after your first attempt

Could you add the primary audience, approved message, and success measure before Thursday's review? Those details will help the content and channel teams work toward the same outcome.

Second round

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 04

Content, SEO, Thought Leadership, and Editorial Judgment

SHARED CASE

A proposed article targets a popular keyword, but searchers appear to want instructions while the draft is a product announcement.

Role A | Responding professional

Explain a useful distinction in plain English. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

Useful expressions

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Cover this until after your first attempt

The search intent appears to be instructional. Our draft announces a product instead. We could create a useful how-to article and include the product only where it helps answer the question.

Second round

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 05

Paid Media, Performance Marketing, and Attribution

SHARED CASE

Paid conversions rose after a campaign change, but a discount began in the same week. A slide credits the campaign with the entire increase.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

Conversions rose after the campaign change, but the discount is another possible influence. I'll describe the timing accurately and avoid claiming that the campaign caused the entire increase.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 06

Lifecycle, CRM, Email, Marketing Ops, and Sales Handoff

SHARED CASE

A lead list is ready for sales. It contains contact details but no explanation of which contacts requested a conversation.

Role A | Responding professional

Give a handoff that the receiving person can confirm. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are taking over the work. Ask what remains open and repeat back the critical status or responsibility. Point out one detail that would be unsafe or misleading to assume.

Useful expressions

The current status is ...; the outstanding item is

The record shows

Please confirm who has accepted

Cover this until after your first attempt

The handoff needs the agreed qualification fields and contact permissions. I'll distinguish conversation requests from other activity so sales can choose an appropriate follow-up under our process.

Second round

The intended recipient cannot take ownership. Keep the status clear and identify the need for an authorized reassignment.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 07

Analytics, Experimentation, Funnel Reporting, and Executive Readouts

SHARED CASE

An email experiment records 120 clicks from 2,000 delivered messages in version A and 140 from 2,000 in version B. No significance analysis is complete.

Role A | Responding professional

Distinguish completed work from pending work and explain its impact. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

Useful expressions

We have completed ...; ... remains open.

As of ..., the status is

The next update will cover

Cover this until after your first attempt

The observed click rates are 6% and 7%. Version B is higher in this sample, but we have not established whether the difference is reliable. Let's complete the planned analysis before naming a winner.

Second round

The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 08

Compliance, Privacy, Claims, Influencers, Brand Safety, and Crisis Response

SHARED CASE

A scheduled post includes a claim that reviewers have asked to revise. The post has not yet been published.

Role A | Responding professional

Acknowledge a communication problem and give a corrected message. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are frustrated because an earlier message created an expectation. Explain that expectation. Ask your partner to distinguish the correction from anything still uncertain.

Useful expressions

My earlier message did not make ... clear.

I'm sorry for The correct information is

Let me check that the revised explanation addresses

Cover this until after your first attempt

The scheduled wording differs from the reviewed claim. I'll pause publication through our process and send the revised copy for approval. Please confirm which version should replace it.

Second round

The listener remains disappointed after the correction. Acknowledge the impact and restate the available next step calmly.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Digital.gov: plain-language guidance

<https://digital.gov/guides/plain-language>

Council of Europe: CEFR descriptors

<https://www.coe.int/en/web/common-european-framework-reference-languages/cefr-descriptors>

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

Rehearse with an AI colleague

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Marketing English

Professional audience: brand, product marketing, growth, content, SEO, lifecycle, demand generation, marketing operations, social, and agency teams

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Dialogue 01: Campaign Brief: 'We Need Awareness'

Original fictional setting: A VP asks for a campaign but cannot define the target audience or business outcome.

Professional roles: VP / Marketing lead / Marketing strategist

Published dialogue (reference script, not my own performance):

VP: We need a big awareness campaign next month.

Marketing lead: Awareness among whom, and what should they do after seeing it?

Marketing strategist: Before we brief creative, we need to define the audience, insight, message, channel, budget, and measurement. Awareness for executives is different from awareness for end users.

VP: Just make noise in the market.

Marketing strategist: We can create visibility, but to spend responsibly we need a specific audience and a signal of success, such as branded search lift, site visits from target accounts, or sales conversations.

VP: Start with target-account engagement; I will confirm the audience and budget with the team.

Marketing strategist: I will build the brief around that objective and explain which measures can and cannot demonstrate campaign impact.

Vocabulary in this exchange: Insight: A non-obvious customer truth or tension that can guide strategy or creative work.

END REFERENCE

TASK: Interactive workplace role-play

1. Use the supplied case or dialogue as the starting situation. Give a two-sentence briefing and offer two relevant professional roles for me to choose from. For a supplied dialogue, use its actual roles. Ask which role I want, then stop and wait. Do not write my replies.
2. After I choose, identify who you will play and the immediate communication goal. Play the other professional; where a meeting requires a third person, label each of your speakers clearly. Start with one natural workplace turn and wait for my reply. Keep most turns to one to three sentences and ask no more than one question at a time.
3. Let the exchange develop across six to ten learner turns, or end earlier if I type "feedback". Respond to what I actually say. Include a plausible clarification, disagreement or tradeoff without silently changing the starting facts. Mark any added constraint as a fictional second-round variation. Do not resolve approvals, evidence or commitments that remain uncertain.
4. Stay in role during the exchange. If my meaning is unclear, ask for clarification naturally. Give a hint only if I ask or cannot proceed. Do not deliver a model conversation in advance.
5. At the debrief, quote two of my phrases: one successful choice and one worth improving. Check factual accuracy, language, register and whether the next step was clear. Give up to three focused suggestions. Ask me to retry the weakest turn; wait. Only then offer an alternative wording and a harder replay.

Create more scenario dialogues

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Marketing English

Professional audience: brand, product marketing, growth, content, SEO, lifecycle, demand generation, marketing operations, social, and agency teams

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Dialogue 01: Campaign Brief: 'We Need Awareness'

Original fictional setting: A VP asks for a campaign but cannot define the target audience or business outcome.

Professional roles: VP / Marketing lead / Marketing strategist

Published dialogue (reference script, not my own performance):

VP: We need a big awareness campaign next month.

Marketing lead: Awareness among whom, and what should they do after seeing it?

Marketing strategist: Before we brief creative, we need to define the audience, insight, message, channel, budget, and measurement. Awareness for executives is different from awareness for end users.

VP: Just make noise in the market.

Marketing strategist: We can create visibility, but to spend responsibly we need a specific audience and a signal of success, such as branded search lift, site visits from target accounts, or sales conversations.

VP: Start with target-account engagement; I will confirm the audience and budget with the team.

Marketing strategist: I will build the brief around that objective and explain which measures can and cannot demonstrate campaign impact.

Vocabulary in this exchange: Insight: A non-obvious customer truth or tension that can guide strategy or creative work.

END REFERENCE

TASK: Extend the conversation library

1. Propose six distinct, common scenarios in this field beyond the supplied case or script. For each, name the setting, two or more professional roles, the communication problem and one useful terminology focus. Include routine coordination, clarification, a complication, disagreement, handoff and follow-up where relevant. Choose scenarios that fit this profession, rather than forcing unsuitable situations into it.
2. Ask me to choose one scenario, or request all six in sequence. Stop and wait. Do not write all the scripts before I choose.
3. For the selected scenario, write an original fictional dialogue of 12-18 substantial speaking turns between two or three professionals. Name each role, establish an actual work problem, and let the exchange progress through questions, clarification, competing constraints and a credible next step or explicitly unresolved issue. Use the occupation's natural nomenclature and register. Avoid an interview between a teacher and a learner, generic small talk, and inserting a glossary definition into every reply. Explain specialist terms outside the dialogue instead.
4. After the script, explain five useful expressions in context, identify two grammar or register choices and ask three questions about the speakers' reasoning. Withhold the answers until I attempt them. Add one role-switch challenge.
5. Before presenting a script, check names, numbers, chronology, roles and terminology for consistency. Label invented facts and acknowledge uncertain specialist usage. If I requested all six, deliver one complete script at a time and wait for "next". Make each scenario materially different.
