

ENGLISH FOR WORK / SEPTEMBER 2026

Medical Devices English

Learner workbook

Work with realistic cases, develop your own response, and use the answer section after you have tried the tasks.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For medical device engineers, product managers, quality and regulatory staff, clinical specialists, manufacturing teams, field-service teams, and device-company leaders.

Fictional language practice for professional communication. Clinical, safety, regulatory, and patient-care decisions follow qualified supervision and current local procedures.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Your course at a glance

Use the lesson numbers to match this document with the website and the other guides.

01 User Needs and Design Inputs

Clarify missing information before responding.

02 Risk Management and Hazard Analysis

Explain a useful distinction in plain English.

03 Verification, Validation, and Design Review

Compare options using the same criteria and state the tradeoff.

04 Usability and Human Factors

Separate observations, assumptions, and conclusions.

05 Regulatory Pathways and Submissions

Make a request with a clear action, purpose, and realistic timing.

06 Complaints, MDRs, and Postmarket Signals

Give a handoff that the receiving person can confirm.

07 Manufacturing, Suppliers, and Nonconformance

Distinguish completed work from pending work and explain its impact.

08 Clinical Training and Labeling Boundaries

State a concern respectfully and propose a practical route forward.

Choose your pace

Quick practice: spend 15 minutes reading one case and saying a response. Full lesson: allow 45-60 minutes for language work, conversation, writing, and revision.

Level support

B1 learners can use the frames and a partner. B2 learners can try a response before reading the model. C1 learners can add the harder follow-up and reduce preparation time. These are teaching suggestions, not certified CEFR level ratings.

After practicing: open the AI prompt workshop, or use the prompts at the end of this guide.

LESSON 01 / READ AND NOTICE

User Needs and Design Inputs

Clarify missing information before responding.

SITUATION

A design brief says the device should be "easy to use." It does not identify the intended users or use environment.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

user need - Something a user needs to accomplish in a particular context.

design input - A documented requirement that guides a product's design.

intended use - The purpose for which a product is designed and represented to be used.

traceability - The ability to follow an item's history, source, requirements, or records through documented links.

3. Notice the language

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Improve this sentence: Could you explain what does this mean?

LESSON 01 / PRACTICE AND PRODUCE

Ask a precise question

4. Check the language

1. Which indirect question has the usual word order?
 - A. Could you confirm when does the review start?
 - B. Could you confirm when starts the review?
 - C. Could you confirm when the review starts?
2. Someone says the report is 'ready.' Which question best clarifies its approval status?
 - A. Who will present the report at the meeting?
 - B. Has the report been approved, or is it ready for review?
 - C. Can you send the report to me this afternoon?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 02 / READ AND NOTICE

Risk Management and Hazard Analysis

Explain a useful distinction in plain English.

SITUATION

A risk discussion uses hazard and harm interchangeably. The team needs to describe the potential source of harm and the possible outcome separately.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

hazard - A potential source of harm.

harm - Injury, damage, or another adverse effect on people, property, or the environment.

FMEA - Failure mode and effects analysis, a structured method for identifying how a process or product can fail and prioritizing controls.

residual risk - The risk remaining after controls or other responses are applied.

3. Notice the language

Start with the reader's question. Explain one unfamiliar term with familiar words, then give a relevant example or contrast. Check understanding without asking only 'Do you understand?'.

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Improve this sentence: We need to operationalize the implementation.

LESSON 02 / PRACTICE AND PRODUCE

Make a complex point clear

4. Check the language

1. Which sentence explains 'backlog' rather than repeating it?
 - A. The backlog is the maximum work the team can finish in a period.
 - B. The backlog is the work still waiting to be completed.
 - C. The backlog is the work completed during the last period.
2. Which follow-up best checks whether your explanation was clear?
 - A. How would you describe the next step in your own words?
 - B. Would you like me to repeat the explanation?
 - C. Was the explanation detailed enough for you?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 03 / READ AND NOTICE

Verification, Validation, and Design Review

Compare options using the same criteria and state the tradeoff.

SITUATION

A device team has checked design outputs against specifications but has not yet completed the planned evaluation of intended user needs.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

verification - Checking whether specified requirements have been met.

validation - Confirming that an output or system meets needs for its intended use under defined conditions.

design review - A structured evaluation of a design at a defined stage.

acceptance criteria - Specific conditions a deliverable must meet to be accepted.

3. Notice the language

Use the same time period, scope, and measurement basis for both options. Explain a difference with 'whereas' or 'while'. State what improves and what is given up; do not hide the weaker side of a recommendation.

Both options ..., but

Option A ..., whereas option B

The comparison depends on

Improve this sentence: This option is more better.

LESSON 03 / PRACTICE AND PRODUCE

Explain a fair comparison

4. Check the language

1. Which sentence expresses a clear contrast?
 - A. Option A is faster, whereas option B costs less.
 - B. Option A is faster because option B costs less.
 - C. Option A is faster, so option B costs less.
2. A rate increases from 6% to 7%. What is the absolute difference?
 - A. An increase of one percent relative to the original rate.
 - B. An increase of seven percentage points.
 - C. An increase of one percentage point.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You favor one option but have not checked whether the scope is comparable. Ask about one difference, then explain the tradeoff you are willing to accept.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 04 / READ AND NOTICE

Usability and Human Factors

Separate observations, assumptions, and conclusions.

SITUATION

Several participants misread a label in a formative usability study. A draft report describes them as careless.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

human factors - The study and application of knowledge about how people interact with products, tasks, and environments.

use error - An action or omission during use that leads to a different result from the intended one; context and design matter.

formative study - An evaluation used during development to identify problems and improve a design.

summative study - An evaluation conducted to assess performance against defined requirements after development work.

3. Notice the language

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

The available evidence shows

This may indicate ..., but

We have not yet established whether

Improve this sentence: The pilot proves this will work everywhere.

LESSON 04 / PRACTICE AND PRODUCE

Match certainty to evidence

4. Check the language

1. Which sentence preserves uncertainty about an unconfirmed cause?
 - A. The change must have caused the delay.
 - B. The change definitely caused the delay.
 - C. The change may have contributed to the delay.
2. A result comes from a small pilot in one location. Which phrase accurately limits the claim?
 - A. Across the service, the observed result was ...
 - B. In this pilot, the observed result was ...
 - C. In similar locations, we can now expect the same result ...

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 05 / READ AND NOTICE

Regulatory Pathways and Submissions

Make a request with a clear action, purpose, and realistic timing.

SITUATION

A presentation refers to a proposed device pathway as settled, although the regulatory team is still evaluating options.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

510(k) - US FDA premarket submission that typically demonstrates substantial equivalence to a legally marketed predicate device.

De Novo - A US FDA classification process for certain novel devices without a legally marketed predicate.

PMA - Premarket approval: the US FDA review pathway for certain high-risk medical devices.

predicate device - A legally marketed device used as a comparison in an applicable US FDA submission.

3. Notice the language

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Improve this sentence: Please revert soonest with the necessary.

LESSON 05 / PRACTICE AND PRODUCE

Ask for an actionable next step

4. Check the language

1. What does 'Please send it by Thursday' normally mean?
 - A. Keep sending it regularly until Thursday.
 - B. Send it no later than Thursday.
 - C. Send it on Thursday, but not earlier.
2. Which request gives the recipient enough detail to act?
 - A. Could you confirm the document version needed for the review?
 - B. Could you confirm that the review is important?
 - C. Could you confirm that you received my earlier message?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 06 / READ AND NOTICE

Complaints, MDRs, and Postmarket Signals

Give a handoff that the receiving person can confirm.

SITUATION

A complaint report describes a malfunction but lacks the device identifier and event date. The complaint-handling team needs the available facts promptly.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

complaint - An expression of dissatisfaction requiring attention under a relevant process.

MDR - Medical Device Reporting; the US FDA system for specified device-event reports; elsewhere the acronym may refer to a regulation.

malfunction - A failure of a product or system to operate as intended.

postmarket surveillance - Collecting and evaluating information about a product after it enters the market.

3. Notice the language

State the current situation, relevant background, open task, and receiving role. Ask for acknowledgment or repeat-back of the critical item. Sending a message and transferring responsibility are not always the same thing.

The current status is ...; the outstanding item is

The record shows

Please confirm who has accepted

Improve this sentence: Someone should follow up on this.

LESSON 06 / PRACTICE AND PRODUCE

Transfer information and responsibility

4. Check the language

1. Which sentence checks that responsibility has been accepted?
 - A. Please confirm who will complete the outstanding check.
 - B. I mentioned the check in my earlier email.
 - C. The check appears somewhere in the notes.
2. Which response best checks a critical handoff detail?
 - A. I assume all results are final, so we can finish.
 - B. I saw the message, so no clarification is needed.
 - C. So the result is pending and your team will follow up; is that correct?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are taking over the work. Ask what remains open and repeat back the critical status or responsibility. Point out one detail that would be unsafe or misleading to assume.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 07 / READ AND NOTICE

Manufacturing, Suppliers, and Nonconformance

Distinguish completed work from pending work and explain its impact.

SITUATION

An incoming-material review has identified two nonconforming lots. The investigation is open and disposition has not been authorized.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

nonconformance - Failure to meet a requirement, specification, contract, standard, or approved procedure.

supplier CAPA - A supplier's corrective and preventive action process for addressing identified quality problems and recurrence risks.

process validation - Documented evidence that a process can consistently produce results meeting specified requirements.

lot traceability - Ability to follow a production lot through materials, process steps, tools, inspections, and downstream customers or products.

3. Notice the language

Lead with the current state, then the important change or open item. Use completed-action language only for completed work. Add a next update point when it is known; do not invent a date to make the message sound complete.

We have completed ...; ... remains open.

As of ..., the status is

The next update will cover

Improve this sentence: Everything is progressing well.

LESSON 07 / PRACTICE AND PRODUCE

Give a useful status update

4. Check the language

1. Which sentence says a review is finished?
 - A. The team is completing the review.
 - B. The team plans to complete the review.
 - C. The team has completed the review.
2. Which update distinguishes a plan from a confirmed fact?
 - A. The delivery plan proves that arrival will be Friday.
 - B. Delivery is planned for Friday; the carrier has not confirmed it.
 - C. Delivery is confirmed for Friday because we planned it.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 08 / READ AND NOTICE

Clinical Training and Labeling Boundaries

State a concern respectfully and propose a practical route forward.

SITUATION

A trainer is asked to demonstrate a use beyond the materials approved for the session.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

labeling - The information supplied with or about a regulated product, as defined by applicable rules.

instructions for use - The manufacturer's information explaining the intended use and operation of a device.

off-label - A use outside a regulated product's approved or cleared labeling, as applicable to that product and jurisdiction.

clinical evidence - Information from clinical evaluation or research relevant to a health-related question.

3. Notice the language

Acknowledge the goal without pretending agreement. Name the specific problem and its implication, then ask a focused question or propose a next step. Be direct when a safety or ethical boundary requires it.

I understand the goal. My concern is

That statement goes beyond

Could we ... before confirming ...?

Improve this sentence: That idea is ridiculous.

LESSON 08 / PRACTICE AND PRODUCE

Disagree with a useful reason

4. Check the language

1. Which response identifies a specific assumption and evidence against it?
 - A. I would like another discussion before we proceed with the proposal.
 - B. The proposal assumes the review is complete; the record shows it is still open.
 - C. The proposal appears optimistic, and I would prefer a slower approach.
2. Which follow-up makes disagreement actionable?
 - A. Could we resolve the missing approval before confirming the plan?
 - B. Could we confirm the plan and discuss the missing approval later?
 - C. Could we ask for general feedback before sending the next update?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You want to move quickly and initially overlook a relevant condition. Ask why it matters, then consider a practical route forward that respects the real constraint.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

Answer workshop

Try the tasks first. The model is one acceptable response, not a script to memorize. Your written version needs a subject line, an opening, and appropriate context. Assess it using the four criteria at the end.

01 | User Needs and Design Inputs

Editing example: Could you explain what this means?

After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: what this means.

Check 1: C - Could you confirm when the review starts?

A: Remove 'does' and use statement word order after 'confirm'.

B: Place the subject 'the review' before 'starts'.

C: The embedded question uses subject then verb: the review starts.

Check 2: B - Has the report been approved, or is it ready for review?

A: This asks about the presenter, not the report's approval status.

B: This question distinguishes two meanings of 'ready' that affect the next action.

C: This asks about delivery timing, not whether approval has happened.

Model response: Who will use it, for which task, and in what environment? Let's turn "easy to use" into specific user needs and requirements that the team can review.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

02 | Risk Management and Hazard Analysis

Editing example: We need to put the plan into practice.

The revised sentence names the action in familiar words. Specialist vocabulary is useful when it adds precision, but repeating abstract nouns can hide the meaning.

Check 1: B - The backlog is the work still waiting to be completed.

A: This describes capacity, not the work waiting to be completed.

B: This gives the meaning in familiar words.

C: Completed work is different from work still waiting.

Check 2: A - How would you describe the next step in your own words?

A: An open request lets the listener show their understanding.

B: Offering repetition may help, but it does not show how the listener understood the next step.

C: This invites an opinion on detail, not a demonstration of understanding.

Model response: Let's distinguish the hazard from the harm that could result. That will help us describe the sequence clearly and discuss the controls without treating the two terms as synonyms.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

03 | Verification, Validation, and Design Review

Editing example: This option is better on cost, but slower to deliver.

'Better' already has comparative meaning, so it does not need 'more'. Naming the criterion and tradeoff makes the comparison useful.

Check 1: A - Option A is faster, whereas option B costs less.

A: 'Whereas' marks a contrast between two options.

B: 'Because' claims a causal connection that is not given.

C: 'So' implies one fact causes the other.

Check 2: C - An increase of one percentage point.

A: A one-percent relative increase on 6% would be 6.06%, not 7%.

B: The new rate is 7%; the difference between the rates is one percentage point.

C: Subtracting 6% from 7% gives one percentage point. The relative increase is about 16.7%.

Model response: The specification checks address verification. They do not by themselves answer every validation question about intended use. I'll report those activities separately and identify what remains open.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

04 | Usability and Human Factors

Editing example: The pilot worked in the tested setting; performance elsewhere remains untested.

The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Check 1: C - The change may have contributed to the delay.

A: 'Must have' expresses a strong inference that the evidence may not support.

B: 'Definitely' presents the cause as certain.

C: 'May have contributed' presents a possibility without claiming the cause is established.

Check 2: B - In this pilot, the observed result was ...

A: A pilot in one location does not establish a service-wide observation.

B: This locates the finding in the setting actually studied.

C: Similarity alone does not establish that the result will transfer.

Model response: The observed difficulty was reading the label correctly in this study. Let's describe the task, design, and use conditions, then investigate contributing factors without assuming carelessness.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

05 | Regulatory Pathways and Submissions

Editing example: Could you send the missing document and confirm when it will be available?

The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

Check 1: B - Send it no later than Thursday.

A: This interprets a deadline as a continuing activity, which would use until.

B: 'By' sets the latest point, while 'after' refers to a later time.

C: By Thursday permits earlier delivery; it is not restricted to that day.

Check 2: A - Could you confirm the document version needed for the review?

A: The requested action and information are explicit.

B: This checks importance rather than identifying the needed document version.

C: This checks receipt, not which version is required for the review.

Model response: Please label the pathway as under evaluation and identify the questions for the regulatory team. We should distinguish a proposed approach from a confirmed regulatory conclusion.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

06 | Complaints, MDRs, and Postmarket Signals

Editing example: Please confirm which team has accepted the follow-up task.

The revised sentence asks for an identifiable receiving team instead of leaving responsibility with an unspecified 'someone'.

Check 1: A - Please confirm who will complete the outstanding check.

A: It asks for an identifiable person or team responsible for the task.

B: Mentioning a task does not show that anyone accepted it.

C: A written record alone does not identify who will act.

Check 2: C - So the result is pending and your team will follow up; is that correct?

A: It changes pending information into a final result.

B: Receiving a message is not the same as confirming its meaning.

C: This repeats the status and responsibility and invites correction.

Model response: Here is the reported malfunction and the information currently available. The device identifier and event date are missing. Please confirm receipt and handle follow-up through the complaint process.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

07 | Manufacturing, Suppliers, and Nonconformance

Editing example: Three checks are complete; two remain open and are being reviewed.

The revision gives observable progress. A positive label alone does not tell the reader what is complete or still needed.

Check 1: C - The team has completed the review.

A: 'Is completing' presents the work as in progress.

B: 'Plans to complete' describes an intention, not completion.

C: 'Has completed' states that the action is finished.

Check 2: B - Delivery is planned for Friday; the carrier has not confirmed it.

A: A plan cannot prove a future arrival time.

B: This explicitly labels the date as planned and identifies the missing confirmation.

C: A plan does not establish carrier confirmation.

Model response: Two lots have open nonconformance records. The investigation and disposition are still pending. I'll report their status without implying that release or rejection has already been approved.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

08 | Clinical Training and Labeling Boundaries

Editing example: My concern is that the proposal assumes capacity we have not confirmed.

The revised sentence identifies a testable concern about the proposal. It leaves room for a constructive response.

Check 1: B - The proposal assumes the review is complete; the record shows it is still open.

A: This requests discussion without stating the specific assumption or evidence.

B: It connects the concern to a specific assumption and record.

C: This expresses a preference, but does not identify the assumption or the record that contradicts it.

Check 2: A - Could we resolve the missing approval before confirming the plan?

A: It names the unresolved condition and a practical next step.

B: This confirms the plan before resolving the stated approval condition.

C: General feedback does not directly address the missing approval.

Model response: That request goes beyond the approved training material for this session. I can cover the authorized instructions and route the additional question to the appropriate team for review.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

Fictional language practice for professional communication. Clinical, safety, regulatory, and patient-care decisions follow qualified supervision and current local procedures.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

Practice grammar in context

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Medical Devices English

Professional audience: medical device engineers, product managers, quality and regulatory staff, clinical specialists, manufacturing teams, field-service teams, and device-company leaders

Scope: Fictional language practice for professional communication. Clinical, safety, regulatory, and patient-care decisions follow qualified supervision and current local procedures.

Lesson 01: User Needs and Design Inputs

Original fictional case: A design brief says the device should be "easy to use." It does not identify the intended users or use environment.

Language workshop: Ask a precise question

Communication goal: Clarify missing information before responding.

Language guidance: Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

Useful frames (complete the gaps with case facts): When you say ..., do you mean ...? / Could you clarify which ...? / So, my understanding is Is that right?

Vocabulary: user need: Something a user needs to accomplish in a particular context. / design input: A documented requirement that guides a product's design. / intended use: The purpose for which a product is designed and represented to be used. / traceability: The ability to follow an item's history, source, requirements, or records through documented links.

Speaking task: Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Writing task: Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and

an appropriate opening. Do not invent a deadline, finding, or approval.

Optional second-round challenge: The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Model for comparison AFTER my attempt, not a response to give me first: Who will use it, for which task, and in what environment? Let's turn "easy to use" into specific user needs and requirements that the team can review.

END REFERENCE

TASK: Grammar that changes the meaning

1. For a lesson, use its language workshop as the focus. For a dialogue, quote one actual sentence and select one useful grammar feature from it, such as question word order, tense, modality, conditionals or clause linking. Explain in no more than 90 words how this feature helps the speakers do their work. Keep the grammar target narrow.
2. Give two short contrasting sentences using this workplace context. Explain the difference in time, certainty, condition or politeness. Label invented examples and preserve the distinction between possible, planned and confirmed events. Describe context-dependent choices as choices, not universal rules.
3. Give me one editing or sentence-building task using a known case fact. Do not copy the supplied editing example or reveal its answer. Ask me to explain my intended meaning. Stop and wait.
4. After I answer, quote my wording, identify at most two issues, and give a brief explanation and one hint. Ask me to revise before offering a full corrected version. Then accept any accurate, natural alternative that serves the purpose.
5. Continue with two new tasks, one at a time: first guided, then an original response without a sentence frame. End with a two-sentence workplace message using the target feature and a compact self-check. Do not replace this sequence with a worksheet and answer key.

Model for comparison AFTER my attempt, not a response to give me first: Who will use it, for which task, and in what environment? Let's turn "easy to use" into specific user needs and requirements that the team can review.

END REFERENCE

TASK: Coach my workplace writing

1. Ask me to paste my own fictional or anonymized draft and identify its reader and purpose. If the reference gives a writing task, mention that task as the default. If it is a dialogue, suggest a brief follow-up message that records its outcome and open questions. Stop and wait. Do not write the message for me first.
2. Once I supply the draft, check it against the reference. If an ambiguity changes the meaning, ask one focused question before rewriting. Do not assume that the draft is correct evidence for a new deadline, approval, diagnosis, cost or commitment.
3. Give feedback in three parts: one effective phrase with a reason; up to three priority improvements, quoting my words; and one short revision task for me. Prioritize incorrect facts or unclear action before minor grammar. For each language correction, explain why it matters to this reader. Label optional stylistic alternatives separately and preserve my level of certainty and intended politeness.
4. Stop and wait for my revision. Then compare the two attempts, identify an improvement and offer one edited version that preserves my voice and purpose. Keep the requested length; if none is specified, use 70-110 words. Explain any meaningful change rather than silently making the message stronger or more certain.
5. Close with one phrase worth reusing and a short transfer task for a different fictional reader. Wait for my attempt before providing another model.
