

ENGLISH FOR WORK / SEPTEMBER 2026

# Software Product Management English

## Conversation lab

8 complete workplace dialogues, followed by eight additional role-play cases. Study the exchanges, then make the conversation your own.

### PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For software product managers, product owners, UX leads, engineering managers, growth product teams, platform PMs, and product-operations staff.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

# Inside this conversation lab

Original fictional training conversations in professional English. These are realistic scripts, not transcripts of actual people. The professional roles are the speaker labels; all figures, incidents, and organizations are invented.

01 Discovery interview review

02 Roadmap commitment

03 Acceptance criteria

04 Prioritization tradeoff

05 Interpreting activation

06 Launch readiness

07 Experiment readout

08 Retiring a feature

Then try eight independent role-play cases, followed by feedback criteria and references.

# Read it. Hear it. Make it yours.

1. Read the setting. Identify the roles, the immediate problem, and what each speaker needs.
2. Read the whole conversation aloud with a partner. In a group, give a third person the observer role. For three-speaker scripts, assign each professional a separate voice.
3. Notice how the speakers ask a specific question, qualify a claim, disagree, explain a technical point, or agree on a next step. Underline language you would actually use.
4. Cover the script. Recreate the exchange using the situation and professional roles. Keep the meaning, but change the wording.
5. Switch roles and introduce a complication: a missing record, a different priority, an unavailable colleague, or a changed assumption. End with a clear outcome or unresolved question.

## Register and terminology

These colleagues use concise professional language. In an internal technical meeting, familiar abbreviations can be natural. With a new colleague or a client, expand unfamiliar terms and check understanding. Keep disagreement directed at the evidence or proposal, and match the degree of certainty to what is known.

## Independent study

Speak each role aloud. Pause before the reply and supply your own response before revealing the next line. Record a second version using invented details, then compare its clarity and tone with the script.

## Professional context

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

## FULL DIALOGUE 01 / 6 SPEAKING TURNS

# Discovery interview review

A product team interprets customer interviews.

Roles: Product manager / User researcher

**Product manager:** Five interviewees asked for exports. Does that make exports our top priority?

**User researcher:** First understand the job they're trying to do. Three wanted audit evidence; two wanted spreadsheet analysis.

**Product manager:** Those may require different solutions. What did they actually do when export wasn't available?

**User researcher:** They copied records manually. I have examples, but this small sample doesn't establish prevalence.

**Product manager:** I'll separate the needs and check support data before prioritizing.

**User researcher:** I'll recruit users from the missing segments so we can test those patterns further.

## Notice the professional language

Discuss this wording: "Five interviewees asked for exports. Does that make exports our top priority?" What does it help the other professional clarify?

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

## FULL DIALOGUE 02 / 6 SPEAKING TURNS

# Roadmap commitment

Sales asks product to promise a feature date.

Roles: Sales director / Product manager

**Sales director:** Can I tell the prospect advanced permissions will ship in October?

**Product manager:** It's a discovery item, not a committed delivery milestone. We haven't assessed the authorization changes yet.

**Sales director:** They need a timeline for their buying committee.

**Product manager:** Tell them we're evaluating the requirement and arrange a discussion about their access model.

**Sales director:** Could an existing role configuration meet the immediate need?

**Product manager:** Let's have the solutions engineer verify that. We shouldn't promise either a workaround or a release without evidence.

## Notice the professional language

Discuss this wording: "Can I tell the prospect advanced permissions will ship in October?" What does it help the other professional clarify?

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

---

**FULL DIALOGUE 03 / 6 SPEAKING TURNS**

# Acceptance criteria

A product owner and engineer refine a story.

Roles: Product owner / Software engineer

**Product owner:** The story says users can search orders. What should happen when no orders match?

**Software engineer:** We need an explicit empty state, plus rules for partial matches and access restrictions.

**Product owner:** Let's add examples to the acceptance criteria before estimating.

**Software engineer:** Include canceled orders and customer accounts with more than one organization.

**Product owner:** I'll confirm the intended behavior with support and design.

**Software engineer:** Then we can split any unresolved behavior into separate work instead of hiding it in the estimate.

## Notice the professional language

acceptance criteria - Specific conditions a deliverable must meet to be accepted.

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

---

## FULL DIALOGUE 04 / 6 SPEAKING TURNS

# Prioritization tradeoff

A team weighs reliability work against a new feature.

Roles: Product manager / Engineering lead

**Product manager:** The new integration scores well for potential revenue. Why prioritize retry handling first?

**Engineering lead:** Failed retries affect current customers and will also affect that integration. The reliability work is a dependency.

**Product manager:** Can we quantify the frequency and customer impact?

**Engineering lead:** I'll bring failure rates, support volume, and the affected workflows, with the measurement period.

**Product manager:** I'll compare that evidence with the integration's opportunity assumptions.

**Engineering lead:** Let's make the dependency visible so the prioritization discussion isn't just a contest between two scores.

## Notice the professional language

Discuss this wording: "The new integration scores well for potential revenue. Why prioritize retry handling first?" What does it help the other professional clarify?

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

**FULL DIALOGUE 05 / 6 SPEAKING TURNS**

# Interpreting activation

A product analyst questions an apparent improvement.

Roles: Product analyst / Product manager

**Product analyst:** Activation rose from 30 to 38 percent, but the event definition changed last week.

**Product manager:** Then we can't attribute the increase to onboarding yet. Can we reconstruct a comparable series?

**Product analyst:** I can apply the old definition to the new cohort if the underlying events are complete.

**Product manager:** Show both definitions and any tracking gaps.

**Product analyst:** I'll also separate new accounts from existing users returning to the flow.

**Product manager:** Good. We'll hold the success claim until we have a consistent comparison.

## Notice the professional language

Discuss this wording: "Then we can't attribute the increase to onboarding yet. Can we reconstruct a comparable series?" What does it help the other professional clarify?

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

**FULL DIALOGUE 06 / 6 SPEAKING TURNS**

# Launch readiness

Product and support review a release checklist.

Roles: Product manager / Support lead

**Product manager:** Engineering is ready to deploy. What remains for customer readiness?

**Support lead:** The help article is drafted, but our team hasn't tested the escalation workflow.

**Product manager:** Is that a launch blocker or can it follow the release?

**Support lead:** For this billing change, we need the workflow and training in place before customers use it.

**Product manager:** I'll add those acceptance items and owners to the launch checklist.

**Support lead:** I'll confirm support readiness after the rehearsal, including how we identify and escalate incorrect charges.

## Notice the professional language

Discuss this wording: "Engineering is ready to deploy. What remains for customer readiness?" What does it help the other professional clarify?

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

## FULL DIALOGUE 07 / 6 SPEAKING TURNS

# Experiment readout

A team reviews a checkout experiment.

Roles: Experiment analyst / Product manager

**Experiment analyst:** Variant B increased checkout starts, but completed purchases didn't improve.

**Product manager:** Did we agree that purchases were the primary metric before the test?

**Experiment analyst:** Yes. Starts were secondary, and error rate was a guardrail.

**Product manager:** Then the readout should say the primary outcome didn't improve, with uncertainty shown.

**Experiment analyst:** I'll include sample sizes, the analysis window, and the error-rate results.

**Product manager:** Let's investigate the drop-off before deciding whether to revise the variant or stop work on it.

## Notice the professional language

Discuss this wording: "Did we agree that purchases were the primary metric before the test?" What does it help the other professional clarify?

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

**FULL DIALOGUE 08 / 6 SPEAKING TURNS**

# Retiring a feature

Product and account management plan a feature retirement.

Roles: Product manager / Account manager

**Product manager:** We want to retire the legacy export. Which customers still depend on it?

**Account manager:** Usage is low, but two large accounts use it for a monthly reporting process.

**Product manager:** A low daily count may hide important periodic use. Can we understand their migration needs?

**Account manager:** I'll arrange calls and check the contractual commitments with the relevant team.

**Product manager:** We'll prepare alternatives and a support plan before setting a retirement date.

**Account manager:** Then I can communicate the actual transition steps and escalate any unresolved customer requirement.

## Notice the professional language

Discuss this wording: "We want to retire the legacy export. Which customers still depend on it?" What does it help the other professional clarify?

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

## Eight more situations to make your own

The following cases are open role plays. They give you facts, contrasting roles, useful expressions, and a short model response. Use what you learned from the complete dialogues to create a longer exchange.

Preparation: two minutes. Conversation: three to five minutes. Feedback: one minute. Switch roles and repeat with the second-round challenge.

**ROLE-PLAY CASE 01**

# Product Discovery and Problem Framing

**SHARED CASE**

A stakeholder requests a new button without explaining the user problem. Support notes mention difficulty finding an existing action.

**Role A | Responding professional**

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

**Useful expressions**

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is ... . Is that right?

**Cover this until after your first attempt**

What is the user trying to achieve, and where do they get stuck? Let's examine that problem before deciding whether a new button is the right solution.

**Second round**

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

**ROLE-PLAY CASE 02**

# Roadmaps and Prioritization

**SHARED CASE**

A roadmap has three large features and capacity for two. All three sponsors describe their request as urgent.

**Role A | Responding professional**

Negotiate scope or timing while making conditions explicit. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You want the preferred outcome but can accept one tradeoff. Ask for two options, then state which condition you can accept and which still needs approval.

**Useful expressions**

We can ..., provided that ... .

Would you prefer ... or ...?

I can take that proposal for review; I cannot yet confirm ... .

**Cover this until after your first attempt**

We have capacity for two features in this period. Could we compare the expected outcomes and dependencies, then agree which item moves? Calling all three urgent does not resolve the capacity choice.

**Second round**

The preferred option is unavailable. Offer an alternative and clearly state any approval still needed.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

**ROLE-PLAY CASE 03**

# User Stories and Acceptance Criteria

**SHARED CASE**

A user story says the page should load "quickly." The team needs a testable completion condition.

**Role A | Responding professional**

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

**Useful expressions**

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know ... .

**Cover this until after your first attempt**

Could we define the relevant user journey, measurement conditions, and acceptable response time? That will make the acceptance criteria clear enough for development and testing.

**Second round**

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

**ROLE-PLAY CASE 04**

# Metrics, Funnels, and Product Analytics

**SHARED CASE**

A product dashboard shows more sign-ups but fewer users completing setup. A stakeholder calls the acquisition campaign a complete success.

**Role A | Responding professional**

Explain a useful distinction in plain English. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

**Useful expressions**

In this context, ... means ... .

The difference is that ... .

How would you explain that distinction to a colleague?

**Cover this until after your first attempt**

Sign-ups increased, but setup completion fell. These metrics describe different stages of the funnel. Let's examine the full journey before concluding that the change improved the intended user outcome.

**Second round**

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

**ROLE-PLAY CASE 05**

# Experimentation and A/B Testing

**SHARED CASE**

An A/B test shows a higher conversion rate in one version after one day. The planned test duration has not elapsed.

**Role A | Responding professional**

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

**Useful expressions**

The available evidence shows ... .

This may indicate ..., but ... .

We have not yet established whether ... .

**Cover this until after your first attempt**

The early observed rate is higher, but the planned test is incomplete. I'll report it as an interim result and check the agreed analysis and guardrail measures before recommending a decision.

**Second round**

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

**ROLE-PLAY CASE 06**

# Release Readiness and Go-to-Market

**SHARED CASE**

A release is ready for review, but the support team has not received migration notes. The launch checklist lists them as required.

**Role A | Responding professional**

Give a handoff that the receiving person can confirm. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You are taking over the work. Ask what remains open and repeat back the critical status or responsibility. Point out one detail that would be unsafe or misleading to assume.

**Useful expressions**

The current status is ...; the outstanding item is ... .

The record shows ... .

Please confirm who has accepted ... .

**Cover this until after your first attempt**

The product checks are ready for review; support preparation is still open. I'll send the migration notes and ask the support owner to confirm readiness before the launch decision.

**Second round**

The intended recipient cannot take ownership. Keep the status clear and identify the need for an authorized reassignment.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

**ROLE-PLAY CASE 07**

# Platform, APIs, and Technical Debt

**SHARED CASE**

A team can add a requested feature quickly using a workaround or spend longer improving the underlying interface.

**Role A | Responding professional**

Compare options using the same criteria and state the tradeoff. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You favor one option but have not checked whether the scope is comparable. Ask about one difference, then explain the tradeoff you are willing to accept.

**Useful expressions**

Both options ..., but ... .

Option A ..., whereas option B ... .

The comparison depends on ... .

**Cover this until after your first attempt**

The workaround is faster initially, while the interface change may reduce future maintenance. Let's compare delivery time, reliability, and ongoing cost instead of considering only the first release date.

**Second round**

Your listener focuses only on the lowest price or fastest date. Explain one other relevant comparison criterion.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

## ROLE-PLAY CASE 08

# Stakeholder Pushback and Executive Narrative

**SHARED CASE**

Two executives disagree about a product decision. The meeting has competing opinions but no shared criterion.

**Role A | Responding professional**

Include relevant voices and clarify the decision process. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You hold a relevant concern that has not been discussed. Raise it when invited and ask who will decide. Help the facilitator state one unresolved question accurately.

**Useful expressions**

Let's hear ... before we decide.

The point we still need to resolve is ... .

Who will make this decision, and what do they need?

**Cover this until after your first attempt**

Could we agree on the outcome and decision criteria first? Then we can compare the options against them, record the tradeoff, and confirm who will make the final decision.

**Second round**

A participant interrupts or the meeting is running out of time. Protect a turn to speak and close with an accurate decision record.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

# Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

## Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

## Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

## Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

## Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

## Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

## Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

## Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

# Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

## Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

## Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

### Digital.gov: plain-language guidance

<https://digital.gov/guides/plain-language>

### Council of Europe: CEFR descriptors

<https://www.coe.int/en/web/common-european-framework-reference-languages/cefr-descriptors>

## Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

# Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

## Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

## Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

## Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

## Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

# Rehearse with an AI colleague

## START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

## REFERENCE

Course: Software Product Management English

Professional audience: software product managers, product owners, UX leads, engineering managers, growth product teams, platform PMs, and product-operations staff

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Dialogue 01: Discovery interview review

Original fictional setting: A product team interprets customer interviews.

Professional roles: Product manager / User researcher

Published dialogue (reference script, not my own performance):

Product manager: Five interviewees asked for exports. Does that make exports our top priority?

User researcher: First understand the job they're trying to do. Three wanted audit evidence; two wanted spreadsheet analysis.

Product manager: Those may require different solutions. What did they actually do when export wasn't available?

User researcher: They copied records manually. I have examples, but this small sample doesn't establish prevalence.

Product manager: I'll separate the needs and check support data before prioritizing.

User researcher: I'll recruit users from the missing segments so we can test those patterns further.

## END REFERENCE

TASK: Interactive workplace role-play

1. Use the supplied case or dialogue as the starting situation. Give a two-sentence briefing and offer two relevant professional roles for me to choose from. For a supplied dialogue, use its actual roles. Ask which role I want, then stop and wait. Do not write my replies.

2. After I choose, identify who you will play and the immediate communication goal. Play the other professional; where a meeting requires a third person, label each of your speakers clearly. Start with one natural workplace turn and wait for my reply. Keep most turns to one to three sentences and ask no more than one question at a time.
3. Let the exchange develop across six to ten learner turns, or end earlier if I type "feedback". Respond to what I actually say. Include a plausible clarification, disagreement or tradeoff without silently changing the starting facts. Mark any added constraint as a fictional second-round variation. Do not resolve approvals, evidence or commitments that remain uncertain.
4. Stay in role during the exchange. If my meaning is unclear, ask for clarification naturally. Give a hint only if I ask or cannot proceed. Do not deliver a model conversation in advance.
5. At the debrief, quote two of my phrases: one successful choice and one worth improving. Check factual accuracy, language, register and whether the next step was clear. Give up to three focused suggestions. Ask me to retry the weakest turn; wait. Only then offer an alternative wording and a harder replay.

**END PROMPT**

Copy this prompt online or choose another lesson and support level

# Create more scenario dialogues

## START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

## REFERENCE

Course: Software Product Management English

Professional audience: software product managers, product owners, UX leads, engineering managers, growth product teams, platform PMs, and product-operations staff

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Dialogue 01: Discovery interview review

Original fictional setting: A product team interprets customer interviews.

Professional roles: Product manager / User researcher

Published dialogue (reference script, not my own performance):

Product manager: Five interviewees asked for exports. Does that make exports our top priority?

User researcher: First understand the job they're trying to do. Three wanted audit evidence; two wanted spreadsheet analysis.

Product manager: Those may require different solutions. What did they actually do when export wasn't available?

User researcher: They copied records manually. I have examples, but this small sample doesn't establish prevalence.

Product manager: I'll separate the needs and check support data before prioritizing.

User researcher: I'll recruit users from the missing segments so we can test those patterns further.

## END REFERENCE

TASK: Extend the conversation library

1. Propose six distinct, common scenarios in this field beyond the supplied case or script. For each, name the setting, two or more professional roles, the communication problem and one useful terminology focus.

Include routine coordination, clarification, a complication, disagreement, handoff and follow-up where relevant. Choose scenarios that fit this profession, rather than forcing unsuitable situations into it.

2. Ask me to choose one scenario, or request all six in sequence. Stop and wait. Do not write all the scripts before I choose.

3. For the selected scenario, write an original fictional dialogue of 12-18 substantial speaking turns between two or three professionals. Name each role, establish an actual work problem, and let the exchange progress through questions, clarification, competing constraints and a credible next step or explicitly unresolved issue. Use the occupation's natural nomenclature and register. Avoid an interview between a teacher and a learner, generic small talk, and inserting a glossary definition into every reply. Explain specialist terms outside the dialogue instead.

4. After the script, explain five useful expressions in context, identify two grammar or register choices and ask three questions about the speakers' reasoning. Withhold the answers until I attempt them. Add one role-switch challenge.

5. Before presenting a script, check names, numbers, chronology, roles and terminology for consistency. Label invented facts and acknowledge uncertain specialist usage. If I requested all six, deliver one complete script at a time and wait for "next". Make each scenario materially different.

**END PROMPT**

Copy this prompt online or choose another lesson and support level
