Eight practical lessons. Eleven extended conversations.
Vocabulary, phrase banks, guided speaking, and explained answers.

Revised 2026 edition / Upper-intermediate to advanced

Your route through the book

01 Arrivals and family partnerships, page 4

Clarify conflicting arrival expectations with a parent while keeping the child's needs and responsible educator visible.

02 Play-based learning and useful prompts, page 15

Use neutral prompts and comparative language to support shared investigation without choosing a winner for the children.

03 Daily routines and supported transitions, page 27

Offer bounded choices and a predictable next step without turning a transition into an open-ended negotiation.

04 Co-regulation and peer disagreements, page 37

Describe a peer disagreement neutrally and model a concrete turn-taking sequence without assigning an unobserved motive.

05 Observation and family progress conversations, page 49

Share a specific learning observation warmly while rejecting unsupported developmental rankings and diagnoses.

06 Inclusive participation and home languages, page 60

Explain an allowed participation choice while distinguishing access, engagement, and evidence of spoken language.

07 Health records and factual incident handovers, page 73

Receive a parent health-plan update and make an accountable document handoff without inventing a care decision.

08 Collection, confidentiality, and safeguarding communication, page 84

Verify a collection request respectfully, protect private information, and distinguish a stated relationship from confirmed authority.

Professional communication notes, page 3

Three additional workplace cases, page 97

Answers and explanations, page 111

Phrase finder, page 167

Vocabulary index, page 169

References and publication notes, page 174

Suggested study range: B2-C1. This is an editorial study range, not a certified proficiency assessment.

Be specific, warm, and fair.

Early-years communication moves between brief child-facing phrases and detailed discussions with families and colleagues. Describe what happened, offer genuine choices, preserve the child perspective, and keep important care arrangements clear.

Describe before interpreting

A recorded action and a guessed motive are different. Name what you saw and heard without turning one moment into a fixed label for the child or a comparison unsupported by evidence.
"Eli sorted four buttons by color and said, These go together."

Make a choice real

Offer options that are genuinely available within the current plan. A choice between two ways to finish a transition is not permission to keep playing indefinitely. Keep the boundary calm and predictable.
"You can place the last block or ask for a permitted photograph before story time."

Recognize more than one way to join in

A child may participate through pointing, gesture, or speech when the activity and plan allow it. Describe the response accurately rather than treating silence as absence or claiming every format supplies identical evidence.
"Noor selected a picture by pointing; no spoken answer was recorded."

Name the responsible next step

A health-plan query or unverified collection arrangement needs an appropriate owner and the real center procedure. Respectful communication does not require improvising a safety decision or accusing a person without evidence.
"Rosa is checking the collection arrangement; authority is not yet verified."

Professional boundaries

All children, families, centers, and cases are fictional. This book teaches workplace English, not childcare licensing, clinical advice, developmental diagnosis, or safeguarding certification. Follow current local law, supervision requirements, individual plans, and center procedures. Do not delay urgent safeguarding or emergency action for a routine query. Materials and activities require age-appropriate risk assessment. England and US sources provide distinct contexts, not interchangeable legal rules.

A Read the situation

LESSON 01 / ARRIVALS AND FAMILY PARTNERSHIPS

Clarify conflicting arrival expectations with a parent while keeping the child's needs and responsible educator visible.

Agreeing on the goodbye

It is Mina's third morning at the center. Parent Daniel expected to stay for ten minutes, but the arrival note says a brief goodbye. Key educator Rosa is present and can clarify the settling-in plan with Daniel. Mina has a familiar cloth; using it must follow the center arrangements. No fixed departure time or guaranteed emotional response is established. Rosa must acknowledge the difference, avoid blaming Daniel or labeling Mina as difficult, and clarify the plan before giving inconsistent directions.

People: Daniel, Mina's parent; Rosa, Key educator.

Read the record

Choose one answer per question using the facts above.

1. What did Daniel expect?

A. To stay for ten minutes
B. To leave without speaking to anyone
C. A guaranteed distress-free arrival
D. A new collection arrangement

2. Who can clarify the plan?

A. Another parent without responsibility
B. Mina alone
C. An invented policy unrelated to the center
D. Rosa, Mina's key educator

3. What is not established?

A. A fixed departure time and guaranteed emotional response
B. That it is Mina's third morning
C. That Mina has a familiar cloth
D. That the arrival note says brief goodbye

Answers and explanations, page 111

B Vocabulary in use

CORE TERMS

settling-in plan
Agreed approach helping a child become familiar with a setting and its people.

clarify the settling-in plan

arrival routine
Usual sequence when a child enters the setting.

establish an arrival routine

handover
Transfer of relevant information and care responsibility between people.

complete the morning handover

familiar object
Known item that may offer continuity or comfort within permitted arrangements.

discuss a familiar object

separation
Period or event in which a child and familiar caregiver are apart.

support separation

attachment
Enduring emotional connection with a familiar caregiver or other significant person.

support attachment relationships

key educator
Staff member with particular responsibility for supporting a child and family.

speak with the key educator

family partnership
Working relationship in which families and educators share relevant knowledge.

build a family partnership

brief goodbye
Short departure exchange whose practical meaning needs agreement.

agree on a brief goodbye

comfort item
Object associated with reassurance, used under appropriate safety arrangements.

check comfort-item arrangements

reassurance
Supportive communication intended to reduce uncertainty or concern.

offer realistic reassurance

responsive care
Care that notices and responds appropriately to the child's cues.

provide responsive care

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

settling-in plan SETTLING-IN PLAN

clarify the settling-in plan

Keep the meaning precise: Agreed approach helping a child become familiar with a setting and its people.

brief goodbye BRIEF GOODBYE

agree on a brief goodbye

Keep the meaning precise: Short departure exchange whose practical meaning needs agreement.

B Precision and professional shorthand

EXTEND YOUR RANGE

child cue

Observable signal of a child's interest, need, or emotional state.

notice a child cue

consistency

Alignment of actions or messages across people or occasions.

maintain consistency

arrival note

Recorded information about the child's arrival or agreed approach.

review the arrival note

transition support

Help with moving between people, settings, or activities.

provide transition support

individual need

Requirement specific to a particular child rather than an assumed group norm.

respond to individual needs

contact preference

Preferred communication method where appropriate and authorized.

confirm contact preferences

predictability

Quality of an arrangement being understandable and reasonably consistent.

build predictability

parent expectation

What a parent believes will happen in the arrangement.

clarify the parent expectation

agreed wording

Language adults have decided to use consistently.

use agreed wording

emotional response

Feelings or reactions expressed in a situation.

observe the emotional response

update arrangement

Agreed method or time for sharing later information.

clarify the update arrangement

shared understanding

Agreement about what a plan or message means.

establish shared understanding

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

responsive care RESPONSIVE CARE

provide responsive care

Keep the meaning precise: Care that notices and responds appropriately to the child's cues.

arrival note ARRIVAL NOTE

review the arrival note

Keep the meaning precise: Recorded information about the child's arrival or agreed approach.

C Phrases that move the work forward

Acknowledge the expectation
You expected to stay for ten minutes.

Name the difference
Those expectations need to be clarified together.

Keep the child central
Let us keep our messages to Mina calm and consistent.

Reject a guarantee gently
I cannot promise exactly how Mina will respond.

Check the arrangement
Its use needs to follow our center arrangements.

Invite useful information
Please tell me what you expected the goodbye to involve.

Keep support concrete
Mina needs to know which adult is receiving her.

Clarify later contact
Any update arrangement should be agreed rather than assumed.

Read the note neutrally
The arrival note says a brief goodbye.

Identify the responsible adult
I am Mina's key educator, and we can clarify the plan.

Avoid blame
We do not need to decide who is at fault to clarify this.

Notice the familiar item
Mina has brought her familiar cloth.

Do not invent a deadline
We have not yet agreed on a departure time here.

Preserve the plan
We should record the clarified arrangement through our process.

Avoid a fixed label
One arrival does not define Mina as a difficult child.

Close together
Let us confirm the plan and use the same message with Mina.

Precision in real exchanges

Purpose: Identify the responsible adult
Useful wording: I am Mina's key educator, and we can clarify the plan.

Purpose: Keep the child central
Useful wording: Let us keep our messages to Mina calm and consistent.

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which opening is most useful?

A. A brief goodbye guarantees no tears.
B. You expected ten minutes; the note says brief goodbye. Let us clarify the plan together.
C. You are making Mina difficult by staying.
D. Ten minutes is mandatory in every center.

2. What should be said about the cloth?

A. Approval during arrival automatically extends to sleep.
B. A parent's usual home practice replaces the center's safety checks.
C. Keeping it nearby confirms Mina will not become upset.
D. Its use follows the center's actual arrangements.

3. A colleague needs the term for this meaning: Working relationship in which families and educators share relevant knowledge. Which term fits?

A. family partnership
B. consistency
C. individual need
D. separation

D Choose the response that fits / continued

4. Rebuild the exchange from "Agreeing on the goodbye". Daniel: "When staff say brief, do they mean a particular number of minutes? I cannot tell whether ten minutes fits that word or contradicts it." Rosa: [missing response] Daniel: "Yesterday I was told not to rush. This morning the note sounds different. I need to know what to do, and Mina is listening to us." Which response belongs in the gap?

A. Thank you for raising that. We need to clarify the settling-in plan together. The note and your expectation do not yet give us one agreed approach.

B. We should check the comfort item arrangements. Its familiarity is useful information, but I will not assume it can be used in every activity or setting.

C. We can clarify the update arrangement as part of the conversation. We should say what contact is genuinely agreed rather than leave you waiting for an assumed promise.

D. A brief goodbye needs a clear meaning in our arrangement. I should not treat that word as though we have already agreed on an exact departure time.

Answers and explanations, page 111

One useful distinction

Brief is not a universal number of minutes. Here it conflicts with Daniel expecting ten minutes, so the plan needs clarification. Do not convert either source into a finalized agreement before Rosa and Daniel resolve the practical meaning.

E Conversation

Agreeing on the goodbye

Agreeing on the goodbye

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

settling-in plan / comfort item / consistency / emotional response / update arrangement / key educator / arrival routine / family partnership / brief goodbye / shared understanding

01 **Daniel:** Rosa, I thought I could stay for ten minutes this morning, but the note says a brief goodbye. I do not want Mina hearing two different instructions.

02 **Rosa:** Thank you for raising that. We need to clarify the [1] _____ together. The note and your expectation do not yet give us one agreed approach.

03 **Daniel:** It is only her third morning, and I had prepared her for me staying a little while. I am worried about changing the message at the door.

04 **Rosa:** I am her [2] _____, so let us work through the difference calmly. We should not make Mina choose between what you expected and what the note appears to say.

05 **Daniel:** When staff say brief, do they mean a particular number of minutes? I cannot tell whether ten minutes fits that word or contradicts it.

06 **Rosa:** A [3] _____ needs a clear meaning in our arrangement. I should not treat that word as though we have already agreed on an exact departure time.

E Conversation / continued

07 **Daniel:** Yesterday I was told not to rush. This morning the note sounds different. I need to know what to do, and Mina is listening to us.

08 **Rosa:** This is about [4] _____, not blame. We can acknowledge what you understood and clarify the plan without labeling your choice as the cause of a reaction we have not observed.

09 **Daniel:** She has brought her familiar cloth. It helps her recognize something from home, but I do not know the center arrangements for using it.

10 **Rosa:** We should check the [5] _____ arrangements. Its familiarity is useful information, but I will not assume it can be used in every activity or setting.

Conversation continues on the next page.

Agreeing on the goodbye

CONVERSATION / CONTINUED

11 **Daniel:** Could you promise that she will be settled after I leave? I know that may be difficult to answer, but it would make leaving easier.

12 **Rosa:** I can offer honest support, not a guaranteed [6] _____. We will need to notice how Mina responds and follow the agreed approach rather than promise a particular feeling.

13 **Daniel:** Could you be the person she comes to after our goodbye? She knows you now, and I would like to tell her who will be with her.

14 **Rosa:** Agreed. A consistent [7] _____ should make the next step understandable. Let us clarify the practical handover and use the same message with her.

15 **Daniel:** Will tomorrow's staff see what we agree? I do not want to prepare Mina for one routine and be given a different instruction when we arrive.

16 **Rosa:** Yes. We should preserve the [8] _____ through our process. A clear record will help colleagues continue the arrangement without inventing a new version.

17 **Daniel:** And how will I hear how she gets on? I keep checking my phone, but I do not know when I should expect an update.

18 **Rosa:** We can clarify the [9] _____ as part of the conversation. We should say what contact is genuinely agreed rather than leave you waiting for an assumed promise.

19 **Daniel:** Thank you. My main concern is that Mina gets one calm message and that I understand the plan before being told to leave.

20 **Rosa:** That is why [10] _____ matters here. Let us resolve the expectation, confirm the handover, and keep the message to Mina clear and respectful.

CHECK THE GAPS

1. settling-in plan / **2.** key educator / **3.** brief goodbye / **4.** family partnership / **5.** comfort item / **6.** emotional response / **7.** arrival routine / **8.** shared understanding / **9.** update arrangement / **10.** consistency

Why these answers fit, page 112

F Check accuracy and scope

Agreeing on the goodbye

Return to the case

It is Mina's third morning at the center. Parent Daniel expected to stay for ten minutes, but the arrival note says a brief goodbye. Key educator Rosa is present and can clarify the settling-in plan with Daniel. Mina has a familiar cloth; using it must follow the center arrangements. No fixed departure time or guaranteed emotional response is established. Rosa must acknowledge the difference, avoid blaming Daniel or labeling Mina as difficult, and clarify the plan before giving inconsistent directions.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. Why should adults coordinate their wording?

A. To hide the parent expectation
B. To avoid ever recording a change
C. To make the child choose which adult is right
D. To give Mina a calm, consistent message about the clarified plan

2. Which statement overreaches?

A. Mina will definitely be calm as soon as Daniel leaves.
B. It is Mina's third morning.
C. Rosa is present.
D. The departure time is not yet agreed here.

Answers and explanations, page 114

Listen for the distinction

Switch roles. Repeat the handover and update questions, keeping every unconfirmed arrangement conditional.

A partnership starts with listening

Parents and staff may attach different meanings to a brief goodbye. Acknowledge the expectation without promising an arrangement before it is clarified. The child should hear calm, consistent language rather than adults correcting one another sharply at the door.

F Say it / transfer to a new case

Clarify another arrival mismatch

Parent Ellis expects a five-minute stay. The note says immediate handover. Key educator Noor is present. No revised agreement has been made.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

Noor / five-minute / immediate handover / confirmed

01 **Ellis:** I expected a [1] _____ stay.

02 **Noor:** The note says [2] _____.

03 **Ellis:** The key educator available is [3] _____.

04 **Noor:** The revised agreement is not yet [4] _____.

CHECK THE GAPS

1. five-minute / **2.** immediate handover / **3.** Noor / **4.** confirmed

Why these answers fit, page 114

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "Agreeing on the goodbye". Daniel: "Could you be the person she comes to after our goodbye? She knows you now, and I would like to tell her who will be with her." Rosa: [missing response] Daniel: "Will tomorrow's staff see what we agree? I do not want to prepare Mina for one routine and be given a different instruction when we arrive." Which response belongs in the gap?

A. Thank you for raising that. We need to clarify the settling-in plan together. The note and your expectation do not yet give us one agreed approach.

B. Yes. We should preserve the shared understanding through our process. A clear record will help colleagues continue the arrangement without inventing a new version.

C. Agreed. A consistent arrival routine should make the next step understandable. Let us clarify the practical handover and use the same message with her.

D. That is why consistency matters here. Let us resolve the expectation, confirm the handover, and keep the message to Mina clear and respectful.

Answers and explanations, page 115

A Read the situation

LESSON 02 / PLAY-BASED LEARNING AND USEFUL PROMPTS

Use neutral prompts and comparative language to support shared investigation without choosing a winner for the children.

Two bridge ideas

During fictional block play, Eva and Jo each want their bridge design used. Eva wants a wider bridge; Jo wants a taller opening underneath. Educators Maya and Ben discuss language that will invite both explanations and support trying two designs with the available blocks. No winner has been chosen, and no test outcome is supplied. The task is to model useful child-facing phrases inside an adult planning conversation. A prompt should leave room for the child idea without quietly supplying the answer or making the activity a competition.

People: Maya, Early-years educator; Ben, Colleague supporting block play.

Read the record

Choose one answer per question using the facts above.

1. What does Eva want?

A. A taller opening as her only stated aim
B. A chosen winner
C. A completed adult design
D. A wider bridge

2. What does Jo want?

A. Removal of all blocks
B. A fixed winning score
C. A guaranteed wider deck
D. A taller opening underneath

3. What can the educators suggest?

A. Declare Eva the winner immediately.
B. Claim both tests have already succeeded.
C. Supply unavailable materials as though they are present.
D. Try two designs using the available blocks.

Answers and explanations, page 116

B Vocabulary in use

CORE TERMS

play-based learning
Learning developed through purposeful opportunities for play and exploration.

support play-based learning

child-led idea
Proposal originating with the child rather than prescribed by an adult.

follow a child-led idea

adult scaffolding
Temporary support that helps a learner do more while retaining meaningful participation.

provide adult scaffolding

open prompt
Invitation allowing a range of relevant responses rather than supplying one answer.

use an open prompt

leading question
Question that steers the listener toward an implied preferred answer.

avoid a leading question

wait time
Deliberate pause allowing a child time to process and respond.

allow wait time

sustained shared thinking
Extended joint exploration of an idea or problem through interaction.

support sustained shared thinking

modeling
Demonstrating language or action that can support learning.

use language modeling

recasting
Restating a child's message with an adjusted grammatical form while preserving the intended meaning.

use a gentle recast

expansion
Adding useful language to a child's expressed idea while preserving its meaning.

offer a language expansion

comparative language
Words used to describe relative qualities such as wider or taller.

model comparative language

spatial language
Words describing position, direction, distance, or arrangement.

introduce spatial language

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

play-based learning PLAY-BASED LEARNING

support play-based learning

Keep the meaning precise: Learning developed through purposeful opportunities for play and exploration.

wait time WAIT TIME

allow wait time

Keep the meaning precise: Deliberate pause allowing a child time to process and respond.

B Precision and professional shorthand

EXTEND YOUR RANGE

width
Measurement across an object from side to side.
compare bridge width

height
Vertical measurement from a defined lower point to a higher point.
compare opening height

span
Distance bridged between supports.
compare the span

support
Part holding up or stabilizing a structure.
position the supports

stability
Ability of a structure to remain in position under relevant conditions.
explore stability

clearance
Space available between an object and a surrounding or overhead surface.
check the clearance

design intention
What the maker wants a design to do or achieve.
clarify the design intention

prediction
Statement about what someone expects to happen before trying it.
make a prediction

trial
Attempt used to explore how something works.
compare two trials

revision
Change made to a design or idea after further thinking or testing.
revise the design

collaborative play
Play involving coordination or shared activity with others.
support collaborative play

specific feedback
Response naming an observed action or feature rather than general praise alone.
give specific feedback

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

spatial language SPATIAL LANGUAGE

introduce spatial language

Keep the meaning precise: Words describing position, direction, distance, or arrangement.

stability STABILITY

explore stability

Keep the meaning precise: Ability of a structure to remain in position under relevant conditions.

C Phrases that move the work forward

Invite Eva's idea
Eva, show us what you mean by a wider bridge.

Invite Jo's idea
Jo, show us where you want the taller opening.

Name both priorities
Eva is exploring width, and Jo is exploring opening height.

Avoid a winner
We have two ideas to try, not a winner already chosen.

Offer a feasible trial
We can try two designs with these available blocks.

Model comparison
This opening is taller; this bridge is wider.

Ask without supplying
What do you want this part of the bridge to do?

Allow processing
I will pause so each child has time to respond.

Preserve the idea
I can expand the language without replacing the child's intention.

Separate prediction and result
That is what you expect; now we can see what happens.

Give specific feedback
You moved the supports farther apart.

Use spatial language
The opening is underneath the bridge.

Keep the activity shared
Let us hear both explanations before choosing what to try.

Avoid an unsupported claim
A wider design is not automatically the stronger one.

Invite a revision
You can change the design after seeing what happens.

Close with exploration
We can compare the two designs without ranking the children.

Precision in real exchanges

Purpose: Avoid a winner
Useful wording: We have two ideas to try, not a winner already chosen.

Purpose: Offer a feasible trial
Useful wording: We can try two designs with these available blocks.

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which prompt preserves Jo's idea?

A. You really mean a wider bridge, do you not?

B. Eva's idea is better, so copy it.

C. A tall opening always wins.

D. Show us where you want the taller opening.

2. Which sentence is a leading question?

A. Which feature are you describing?

B. Wouldn't it be better to use my wider design?

C. What do you want this part to do?

D. Show us where the opening would be.

3. A colleague needs the term for this meaning: Invitation allowing a range of relevant responses rather than supplying one answer. Which term fits?

A. trial

B. recasting

C. open prompt

D. span

D Choose the response that fits / continued

4. Rebuild the exchange from "Two bridge ideas". Ben: "For Jo, I could ask where the opening should be taller. I should not translate his request into another version of Eva's idea." Maya: [missing response] Ben: "I caught myself saying, "Wouldn't a wider bridge be better?" That was really my idea in question form. I need to give Jo's opening a fair hearing too." Which response belongs in the gap?

A. Exactly. Use spatial language such as underneath while keeping the idea his. Height of an opening and width of a bridge are different features.

B. A second trial gives us something to compare. We should not announce the result in advance or promise that a particular structure will work.

C. Yes. That is an open prompt. It supports her idea without putting our answer into her mouth or turning the exchange into a vocabulary test.

D. Yes. That supports collaborative play. We can compare features, invite a later revision, and keep the children's ideas at the center of the conversation.

Answers and explanations, page 116

> **One useful distinction**
>
> Wider and taller refer to different dimensions. A bridge can be wide without having a tall opening. Preserve each child design intention before suggesting a comparison, and do not change taller into better or wider into stronger without evidence.

E Conversation

Two bridge ideas

Two bridge ideas

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

Comparative language / design intention / spatial language / specific feedback / trial / leading question / expansion / wait time / open prompt / collaborative play

01 **Ben:** Eva and Jo both want their bridge idea used. Eva wants it wider, while Jo keeps showing me a taller opening underneath. I am tempted to choose one.

02 **Maya:** Let us clarify each [1] _____ first. We can ask Eva to show the width and Jo to show the opening, without deciding whose idea is better.

03 **Ben:** I could say, "Eva, show us what you mean by wider." That lets her point or demonstrate rather than requiring a long explanation.

04 **Maya:** Yes. That is an [2] _____. It supports her idea without putting our answer into her mouth or turning the exchange into a vocabulary test.

05 **Ben:** For Jo, I could ask where the opening should be taller. I should not translate his request into another version of Eva's idea.

06 **Maya:** Exactly. Use [3] _____ such as underneath while keeping the idea his. Height of an opening and width of a bridge are different features.

07 **Ben:** I caught myself saying, "Wouldn't a wider bridge be better?" That was really my idea in question form. I need to give Jo's opening a fair hearing too.

08 **Maya:** That is a [4] _____. It could make Jo feel that the decision is already made. We can invite explanations without hinting which child should agree with us.

09 **Ben:** We have blocks available for trying two designs. I could suggest that practical option instead of making the children compete for one approved plan.

10 **Maya:** A second [5] _____ gives us something to compare. We should not announce the result in advance or promise that a particular structure will work.

Conversation continues on the next page.

Two bridge ideas

CONVERSATION / CONTINUED

11 **Ben:** I keep saying good job, but it does not give them much to work with. What could I say about the supports they are moving?

12 **Maya:** Offer [6] _____ such as, "You moved the supports farther apart." That names an action and leaves room for the child to explain what they intended.

13 **Ben:** I can also model wider and taller while pointing to the appropriate dimension. I should not use taller as another word for better.

14 **Maya:** Right. [7] _____ helps describe the structures. It should not quietly become a ranking of the children or an unsupported claim about strength.

15 **Ben:** If Eva says, "More space here," I might say, "You want more space across the bridge," while checking that I have kept her meaning.

16 **Maya:** That is a useful [8] _____. We are adding language around her idea, not correcting her into a different design or requiring her to repeat our exact sentence.

17 **Ben:** I tend to fill the silence. Eva may be about to point when I jump in with another question. I will try leaving that space.

18 **Maya:** Allow [9] _____. Watch their responses, including gestures, and keep the exploration moving at a pace that allows both to participate.

19 **Ben:** Then our plan is to hear both intentions, offer two available-block trials, and describe what happens without choosing a winner beforehand.

20 **Maya:** Yes. That supports [10] _____. We can compare features, invite a later revision, and keep the children's ideas at the center of the conversation.

CHECK THE GAPS

1. design intention / **2.** open prompt / **3.** spatial language / **4.** leading question / **5.** trial / **6.** specific feedback / **7.** Comparative language / **8.** expansion / **9.** wait time / **10.** collaborative play

Why these answers fit, page 117

F Check accuracy and scope

Two bridge ideas

Return to the case

During fictional block play, Eva and Jo each want their bridge design used. Eva wants a wider bridge; Jo wants a taller opening underneath. Educators Maya and Ben discuss language that will invite both explanations and support trying two designs with the available blocks. No winner has been chosen, and no test outcome is supplied. The task is to model useful child-facing phrases inside an adult planning conversation. A prompt should leave room for the child idea without quietly supplying the answer or making the activity a competition.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. Which comparison is factual in principle?

A. This bridge is wider, while that opening is taller.
B. The child with the taller design is more intelligent.
C. The wider bridge is always strongest.
D. Both designs have already passed every test.

2. What is the proposed next action?

A. Promise that neither structure can fall.
B. Require a material that is not available.
C. Try two designs using available blocks.
D. Announce a winner before exploration.

Answers and explanations, page 119

Listen for the distinction

Switch roles. Read the exact child-facing prompts, pausing after each prompt instead of supplying a child's answer.

Curiosity can be precise

An educator can give language support without taking ownership of the design. Name width and height clearly, allow both ideas to be expressed, and avoid praise that makes one child the winner before the structures have been explored.

F Say it / transfer to a new case

Compare two tower intentions

Ari wants a wider tower base. Bea wants a taller tower. Available blocks allow two trials. No winner or result is established.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

wider / trials / winner / taller

01 **Educator:** Ari wants a [1] _____ base.

02 **Colleague:** Bea wants a [2] _____ tower.

03 **Educator:** We can offer two [3] _____.

04 **Colleague:** No [4] _____ has been chosen.

CHECK THE GAPS

1. wider / **2.** taller / **3.** trials / **4.** winner

Why these answers fit, page 119

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "Two bridge ideas". Ben: "I can also model wider and taller while pointing to the appropriate dimension. I should not use taller as another word for better." Maya: [missing response] Ben: "If Eva says, "More space here," I might say, "You want more space across the bridge," while checking that I have kept her meaning." Which response belongs in the gap?

A. Exactly. Use spatial language such as underneath while keeping the idea his. Height of an opening and width of a bridge are different features.

B. Right. Comparative language helps describe the structures. It should not quietly become a ranking of the children or an unsupported claim about strength.

C. A second trial gives us something to compare. We should not announce the result in advance or promise that a particular structure will work.

D. Yes. That supports collaborative play. We can compare features, invite a later revision, and keep the children's ideas at the center of the conversation.

Answers and explanations, page 120

Review 1 / Meaning and context

Use language from the lessons you have completed. Choose one answer per question.

> **Case file**
>
> Revisit "Arrivals and family partnerships" and "Play-based learning and useful prompts". Choose precise terminology, then reconstruct the missing responses using both neighboring turns. The final two questions also revisit earlier conversations.

1. A colleague needs the term for this meaning: Usual sequence when a child enters the setting. Which term fits?

A. emotional response
B. predictability
C. comfort item
D. arrival routine

2. A colleague needs the term for this meaning: Demonstrating language or action that can support learning. Which term fits?

A. play-based learning
B. width
C. modeling
D. design intention

3. Rebuild the exchange from "Agreeing on the goodbye". Daniel: "She has brought her familiar cloth. It helps her recognize something from home, but I do not know the center arrangements for using it." Rosa: [missing response] Daniel: "Could you promise that she will be settled after I leave? I know that may be difficult to answer, but it would make leaving easier." Which response belongs in the gap?

A. We should check the comfort item arrangements. Its familiarity is useful information, but I will not assume it can be used in every activity or setting.
B. Agreed. A consistent arrival routine should make the next step understandable. Let us clarify the practical handover and use the same message with her.
C. A brief goodbye needs a clear meaning in our arrangement. I should not treat that word as though we have already agreed on an exact departure time.
D. Thank you for raising that. We need to clarify the settling-in plan together. The note and your expectation do not yet give us one agreed approach.

Review 1 / Meaning and context / continued

4. Rebuild the exchange from "Two bridge ideas". Ben: "I tend to fill the silence. Eva may be about to point when I jump in with another question. I will try leaving that space." Maya: [missing response] Ben: "Then our plan is to hear both intentions, offer two available-block trials, and describe what happens without choosing a winner beforehand." Which response belongs in the gap?

A. Exactly. Use spatial language such as underneath while keeping the idea his. Height of an opening and width of a bridge are different features.

B. Allow wait time. Watch their responses, including gestures, and keep the exploration moving at a pace that allows both to participate.

C. Right. Comparative language helps describe the structures. It should not quietly become a ranking of the children or an unsupported claim about strength.

D. A second trial gives us something to compare. We should not announce the result in advance or promise that a particular structure will work.

Answers and explanations, page 151

A Read the situation

LESSON 03 / DAILY ROUTINES AND SUPPORTED TRANSITIONS

Offer bounded choices and a predictable next step without turning a transition into an open-ended negotiation.

> **Five minutes to story time**
>
> Luca is building when the room will move to story time in five minutes. The current center arrangement allows the structure to remain on the marked shelf. Luca can choose to place the last block or ask the educator for a photograph using the center permitted practice. Educators Nora and Ben discuss how to explain these options. They cannot extend play indefinitely, promise a return time that is not supplied, or use a personal device outside the approved photography arrangements. The choices concern how to finish, not whether story time happens.

People: Nora, Early-years educator; Ben, Colleague coordinating the transition.

Read the record

Choose one answer per question using the facts above.

1. Which timing statement is supplied by the arrangement?

A. Luca has five minutes after the group starts story time.
B. The photograph postpones the group transition.
C. Story time begins in five minutes.
D. Building resumes immediately after the story.

2. What can remain on the marked shelf?

A. An unapproved personal camera
B. A guaranteed future activity slot
C. Luca's structure under the current arrangement
D. Every object permanently

3. What do the two choices concern?

A. How Luca finishes before the transition
B. Whether the room ever moves to story time
C. A new permanent center rule
D. Unlimited building time

Answers and explanations, page 121

B Vocabulary in use

CORE TERMS

transition
Move from one activity, place, or part of the day to another.

support a transition

transition cue
Signal indicating an approaching or current change of activity.

use a transition cue

first-then language
Wording that makes a short sequence of actions explicit.

use first-then language

predictable routine
Repeated sequence that helps people anticipate what comes next.

maintain a predictable routine

last step
Final action before moving to the next part of a routine.

name the last step

marked shelf
Clearly identified storage or display location.

use the marked shelf

advance warning
Notice given before an expected change.

give advance warning

visual schedule
Sequence of activities represented through pictures or other visual supports.

refer to the visual schedule

bounded choice
Choice among genuinely available options within a clear limit.

offer a bounded choice

finishing point
Defined place at which an activity pauses or ends.

identify a finishing point

preserved work
Work kept rather than dismantled or discarded immediately.

protect preserved work

photography permission
Applicable consent and authority for taking or using images.

verify photography permission

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

transition TRANSITION

support a transition

Keep the meaning precise: Move from one activity, place, or part of the day to another.

bounded choice BOUNDED CHOICE

offer a bounded choice

Keep the meaning precise: Choice among genuinely available options within a clear limit.

B Precision and professional shorthand

EXTEND YOUR RANGE

approved device

Equipment permitted under the organization's actual arrangements.

use an approved device

return expectation

Belief about when a person can resume an activity.

clarify the return expectation

group movement

Coordinated move of children between places or activities.

support group movement

processing time

Time needed to understand and respond to information.

allow processing time

negotiable detail

Aspect of a plan that can genuinely be chosen or changed.

identify the negotiable detail

rushed instruction

Direction given too quickly or late for an effective response.

avoid a rushed instruction

image storage

Process and location for keeping photographs or other images.

follow image-storage rules

cleanup routine

Agreed process for putting away or arranging materials.

follow the cleanup routine

supervision continuity

Maintaining appropriate adult oversight throughout a change.

preserve supervision continuity

follow-through

Carrying out an agreed action or stated boundary.

provide calm follow-through

nonnegotiable boundary

Limit that is not offered as a choice in the current arrangement.

state the nonnegotiable boundary

consistent cue

Signal used in an aligned way across adults or occasions.

agree on a consistent cue

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

photography permission PHOTOGRAPHY PERMISSION

verify photography permission

Keep the meaning precise: Applicable consent and authority for taking or using images.

group movement GROUP MOVEMENT

support group movement

Keep the meaning precise: Coordinated move of children between places or activities.

C Phrases that move the work forward

Give advance notice

Story time begins in five minutes.

Name the boundary

We will move to story time after this finishing step.

Offer the two choices

You can add the last block, or I can take a photo using our center's camera.

Show the storage place

Your structure can stay on the marked shelf.

Keep the choice genuine

Both options are available under our current arrangement.

Avoid an open-ended promise

I cannot promise unlimited building time.

Use a short sequence

First we finish this step; then we move to story time.

Preserve the work

We do not need to dismantle the structure for this transition.

Clarify the photo condition

Any photograph must follow the center's permitted practice.

Avoid a false return time

We have not agreed on when the building will resume.

Allow a response

I will give Luca time to understand the two choices.

Keep adult cues aligned

Let us use the same transition message.

Do not make the child choose safety

Supervision remains our responsibility.

Respect the effort

You have been working on this structure.

Follow through calmly

The finishing choice does not change the move to story time.

Close the sequence

The work stays on the marked shelf, and the group moves to the story.

Precision in real exchanges

Purpose: Show the storage place
Useful wording: Your structure can stay on the marked shelf.

Purpose: Keep the choice genuine
Useful wording: Both options are available under our current arrangement.

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which child-facing message matches the arrangement?

A. Story time is in five minutes; choose the last block or a permitted photograph before we move.

B. Do you want to go to story time at all?

C. Build for as long as you like.

D. I guarantee you can return at a specific time not provided here.

2. Which statement about the structure is supported?

A. It can block any walkway.

B. It can remain on the marked shelf under the current arrangement.

C. It must be destroyed immediately.

D. It will remain forever.

3. A colleague needs the term for this meaning: Sequence of activities represented through pictures or other visual supports. Which term fits?

A. return expectation

B. last step

C. visual schedule

D. negotiable detail

D Choose the response that fits / continued

4. Rebuild the exchange from "Five minutes to story time". Ben: "I can say, "You can add the last block, or I can take a photo using our center's camera." I will check our photo arrangements first." Nora: [missing response] Ben: "I should avoid saying, "Do you want to go to story time?" if I am not actually offering the possibility of staying here instead." Which response belongs in the gap?

A. Use that first-then language with the actual options. It helps us keep the sequence clear without promising extra building time beyond the arrangement.

B. That gives us a consistent cue. We can acknowledge his work, follow through calmly, and keep the choice meaningful without changing the agreed boundary.

C. That is a bounded choice. Both options concern how to finish. Neither means the group waits indefinitely or that story time becomes optional.

D. Allow processing time. The wording can stay short and consistent, with the same boundary instead of a new offer every few seconds.

Answers and explanations, page 121

> **One useful distinction**
>
> You can choose the last block or a permitted photograph offers two available ways to finish. Do you want story time? suggests that declining the transition is allowed. Match the grammar of the choice to the actual options.

E Conversation

Five minutes to story time

Five minutes to story time

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

advance warning / photography permission / consistent cue / nonnegotiable boundary / preserved work / Supervision continuity / processing time / first-then language / return expectation / bounded choice

01 **Ben:** Luca is still building, and story time starts in five minutes. I want to help him finish without telling him the whole structure has to come down.

02 **Nora:** Start with [1] _____: "Story time begins in five minutes." Then explain that the current arrangement allows his structure to stay on the marked shelf.

03 **Ben:** That could help. He has put effort into it, so moving on does not need to sound as though the work is being thrown away.

04 **Nora:** Exactly. Name the [2] _____ and show where it will stay. We can respect the effort while keeping the transition clear.

05 **Ben:** I can say, "You can add the last block, or I can take a photo using our center's camera." I will check our photo arrangements first.

06 **Nora:** That is a [3] _____. Both options concern how to finish. Neither means the group waits indefinitely or that story time becomes optional.

07 **Ben:** I should avoid saying, "Do you want to go to story time?" if I am not actually offering the possibility of staying here instead.

08 **Nora:** Right. State the [4] _____ calmly, then offer the finishing choices. The question should not imply an option that disappears as soon as he chooses it.

09 **Ben:** I could say, "First the last step, then story time." That gives him a short sequence rather than several instructions in one breath.

10 **Nora:** Use that [5] _____ with the actual options. It helps us keep the sequence clear without promising extra building time beyond the arrangement.

Conversation continues on the next page.

Five minutes to story time

CONVERSATION / CONTINUED

11 **Ben:** The photo option needs a clear handoff between us. I do not want someone taking out a personal phone while we are moving the children.

12 **Nora:** The option still requires [6] _____ and the permitted device and storage practice. We should not treat the child-facing choice as permission to bypass those arrangements.

13 **Ben:** I will also avoid promising that Luca can return immediately after the story. We have permission to preserve the structure, not a supplied return slot.

14 **Nora:** Correct. Keep the [7] _____ accurate. We can explain what stays without inventing when the next building opportunity will happen.

15 **Ben:** If he is still looking at the tower, I will pause and keep the choices the same. Repeating them faster is not helping him finish.

16 **Nora:** Allow [8] _____. The wording can stay short and consistent, with the same boundary instead of a new offer every few seconds.

17 **Ben:** During the move, we still need to keep the group appropriately supervised. Offering Luca a choice does not make him responsible for everyone else.

18 **Nora:** Yes. [9] _____ stays with us. Coordinate the adults and materials through our actual routine, not through an assumption that the children will manage it.

19 **Ben:** Then the message is five minutes, one of the two finishing choices, structure on the marked shelf, and a clear move to story time.

20 **Nora:** That gives us a [10] _____. We can acknowledge his work, follow through calmly, and keep the choice meaningful without changing the agreed boundary.

CHECK THE GAPS

1. advance warning / **2.** preserved work / **3.** bounded choice / **4.** nonnegotiable boundary / **5.** first-then language / **6.** photography permission / **7.** return expectation / **8.** processing time / **9.** Supervision continuity / **10.** consistent cue

Why these answers fit, page 122

F Check accuracy and scope

Five minutes to story time

Return to the case

Luca is building when the room will move to story time in five minutes. The current center arrangement allows the structure to remain on the marked shelf. Luca can choose to place the last block or ask the educator for a photograph using the center permitted practice. Educators Nora and Ben discuss how to explain these options. They cannot extend play indefinitely, promise a return time that is not supplied, or use a personal device outside the approved photography arrangements. The choices concern how to finish, not whether story time happens.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. Which photography action is inappropriate?

A. Follow the center's permitted practice.
B. Check the applicable arrangements.
C. Keep the option conditional on permission.
D. Use an unapproved personal phone because the picture would help.

2. What should remain with the adults?

A. Permission to abandon the routine without explanation
B. Responsibility for supervision during the transition
C. A child's duty to supervise the group alone
D. A promise that every child will feel the same

Answers and explanations, page 124

Listen for the distinction

Switch roles. Repeat the first-then sentence with a calm boundary and the two printed choices; do not invent a return time.

A boundary and a choice can coexist

A genuine choice can help a child finish an activity without removing the next routine. State the shared boundary first, then offer the available options in simple language. Avoid asking a yes-or-no question when no is not an available outcome.

F Say it / transfer to a new case

Offer a different finishing choice

Drawing time ends in three minutes. The current arrangement allows the drawing to stay in the named tray. Ari can add one final line or ask the educator to label the work. The next activity is music.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

label / line / three / tray

01 **Educator:** Music begins in [1] _____ minutes.

02 **Ari:** My drawing can stay in the named [2] _____.

03 **Educator:** You can add one final [3] _____.

04 **Ari:** Or I can ask you to [4] _____ the work.

CHECK THE GAPS

1. three / **2.** tray / **3.** line / **4.** label

Why these answers fit, page 124

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "Five minutes to story time". Ben: "I will also avoid promising that Luca can return immediately after the story. We have permission to preserve the structure, not a supplied return slot." Nora: [missing response] Ben: "If he is still looking at the tower, I will pause and keep the choices the same. Repeating them faster is not helping him finish." Which response belongs in the gap?

A. Correct. Keep the return expectation accurate. We can explain what stays without inventing when the next building opportunity will happen.

B. That is a bounded choice. Both options concern how to finish. Neither means the group waits indefinitely or that story time becomes optional.

C. Exactly. Name the preserved work and show where it will stay. We can respect the effort while keeping the transition clear.

D. Allow processing time. The wording can stay short and consistent, with the same boundary instead of a new offer every few seconds.

Answers and explanations, page 125

A Read the situation

LESSON 04 / CO-REGULATION AND PEER DISAGREEMENTS

Describe a peer disagreement neutrally and model a concrete turn-taking sequence without assigning an unobserved motive.

One large scoop

Two children reach for the same large scoop. Educator Sora saw Ari holding it and then Bea reaching toward it; Sora does not know either child motive. Ari wants to finish one container. Bea wants the large scoop next. A smaller scoop is available. Sora and colleague Leon discuss language for supporting the disagreement. No injury or ongoing danger is stated. Staff must remain responsive to actual safety needs, preserve both requests, and avoid describing either child as selfish, manipulative, or deliberately aggressive based on this observation.

People: Sora, Educator who observed the interaction; Leon, Colleague supporting the play area.

Read the record

Choose one answer per question using the facts above.

1. What did Sora directly observe?

A. Ari holding the large scoop, then Bea reaching toward it
B. Bea deliberately trying to upset Ari
C. An injury requiring a supplied treatment
D. A completed agreement between both children

2. What does Ari want to finish?

A. A timed ten-minute task supplied in the case
B. One container
C. Every container indefinitely
D. The whole session alone

3. Which additional resource is available?

A. A new toy outside the room
B. A smaller scoop
C. A second large scoop
D. An invented timer agreement

Answers and explanations, page 126

B Vocabulary in use

CORE TERMS

co-regulation
Supportive interaction in which an adult helps a child manage responses and build regulation skills.

provide co-regulation

self-regulation
Developing ability to manage attention, feelings, and actions toward a goal.

support self-regulation

emotional validation
Acknowledgment of a person's feeling or wish without approving every action.

offer emotional validation

neutral description
Account of observable events without adding blame or guessed motive.

use a neutral description

observed sequence
Order of events actually seen or recorded.

preserve the observed sequence

inferred motive
Assumed reason for an action rather than a directly established fact.

avoid an inferred motive

turn-taking
Sharing access through an understandable sequence of use.

support turn-taking

current use
What a person is doing with an item at the relevant moment.

acknowledge current use

waiting option
Available activity or resource during a wait.

offer a waiting option

alternative resource
Different available item that may meet some of the same needs.

offer an alternative resource

finishing point
Defined end of a current action before a next step.

agree a finishing point

next turn
Opportunity to use something after the current user finishes the agreed step.

clarify the next turn

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

co-regulation CO-REGULATION

provide co-regulation

Keep the meaning precise: Supportive interaction in which an adult helps a child manage responses and build regulation skills.

inferred motive INFERRED MOTIVE

avoid an inferred motive

Keep the meaning precise: Assumed reason for an action rather than a directly established fact.

B Precision and professional shorthand

EXTEND YOUR RANGE

resource conflict

Disagreement involving access to an object, space, or material.

mediate a resource conflict

calm boundary

Clear limit expressed without shaming or escalating the exchange.

state a calm boundary

impulse

Immediate urge to act before reflection or regulation.

support impulse management

repair

Action that helps address a disruption or harm in a relationship or activity.

support an appropriate repair

reciprocity

Mutual responsiveness in an interaction.

encourage reciprocity

conflict resolution

Process of addressing a disagreement and its practical next steps.

support conflict resolution

peer interaction

Exchange or activity involving children with one another.

observe peer interaction

emotion vocabulary

Words that help describe feelings and their intensity.

model emotion vocabulary

adult modeling

Showing a response or language pattern through the adult's own behavior.

use adult modeling

forced apology

Required apology words without necessarily establishing understanding or repair.

distinguish repair from a forced apology

perspective-taking

Recognizing that another person may have a different view or intention.

support perspective-taking

agreement check

Confirmation that the proposed arrangement has been understood or accepted.

make an agreement check

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

next turn NEXT TURN

clarify the next turn

Keep the meaning precise: Opportunity to use something after the current user finishes the agreed step.

impulse IMPULSE

support impulse management

Keep the meaning precise: Immediate urge to act before reflection or regulation.

C Phrases that move the work forward

Describe what was seen

I saw Ari holding the large scoop and Bea reaching toward it.

Avoid a motive claim

I do not know why Bea reached at that moment.

Acknowledge both wishes

Both children want to use the large scoop.

Name current use

Ari is using the large scoop now.

Name the finishing point

Ari wants to finish one container.

Preserve the next request

Bea wants the large scoop next.

Offer the actual alternative

The smaller scoop is available while waiting.

Do not pretend equivalence

The smaller scoop is an option, not an identical replacement.

Model a short sequence

First Ari finishes this container; then it is Bea's turn.

Keep language neutral

Let us describe the action without labeling either child.

Validate without surrendering

You want the big scoop. Ari is using it now; you can have the next turn.

Check the proposal

We need to help both children understand the next step.

Keep adult support present

I will stay responsive to the interaction.

Avoid an invented time

No exact number of waiting minutes has been agreed.

Separate words and repair

An apology alone does not settle access to the scoop.

Close practically

Name the current turn, the finishing point, and the next turn clearly.

Precision in real exchanges

Purpose: Name current use
Useful wording: Ari is using the large scoop now.

Purpose: Name the finishing point
Useful wording: Ari wants to finish one container.

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which account avoids an unsupported motive?

A. Both children planned to disrupt the session.

B. Ari held the large scoop; Bea then reached toward it.

C. Bea deliberately wanted to upset Ari.

D. Ari is always selfish.

2. Which proposal uses the supplied facts?

A. Ari finishes one container, then Bea has the next supported turn; the smaller scoop is available meanwhile.

B. Bea must wait exactly ten minutes.

C. Ari keeps the scoop for the entire session.

D. A second large scoop is available.

3. A colleague needs the term for this meaning: Account of observable events without adding blame or guessed motive. Which term fits?

A. waiting option

B. reciprocity

C. calm boundary

D. neutral description

D Choose the response that fits / continued

4. Rebuild the exchange from "One large scoop". Leon: "What are they asking for now? If Ari has nearly finished something, we may be able to make the next turn clearer than just saying share." Sora: [missing response] Leon: "We could say, "Ari is using the large scoop now. Bea wants it next." That names the situation without saying one child is bad for wanting it." Which response belongs in the gap?

A. The observed sequence was Ari holding it, then Bea reaching toward it. I do not know the motive, and I should keep that uncertainty clear.

B. Exactly. It is an alternative resource, not an identical replacement. We can name what is available without denying that Bea specifically wants the larger one.

C. Ari wants to finish one container. Bea wants the large scoop next. That gives us a possible finishing point and a next-turn request to work with.

D. Yes. That would be an inferred motive. It can affect how colleagues treat the child later, so the record and conversation should not present it as fact.

Answers and explanations, page 126

> **One useful distinction**
>
> I saw Ari holding the scoop, then Bea reaching describes a sequence. Bea wanted to upset Ari assigns a motive that is not established. Keep observations and interpretations separate while responding appropriately to any actual safety concern.

E Conversation

One large scoop

One large scoop

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

neutral description / next turn / turn-taking / finishing point / agreement check / emotional validation / inferred motive / co-regulation / alternative resource / observed sequence

01 **Leon:** Sora, what happened with the large scoop? I heard a disagreement, but I did not see how it began and do not want to repeat the wrong story.

02 **Sora:** The [1] _____ was Ari holding it, then Bea reaching toward it. I do not know the motive, and I should keep that uncertainty clear.

03 **Leon:** Then describing Bea as deliberately upsetting Ari would add something we did not establish. We can describe the reach without attaching that explanation.

04 **Sora:** Yes. That would be an [2] _____. It can affect how colleagues treat the child later, so the record and conversation should not present it as fact.

05 **Leon:** What are they asking for now? If Ari has nearly finished something, we may be able to make the next turn clearer than just saying share.

06 **Sora:** Ari wants to finish one container. Bea wants the large scoop next. That gives us a possible [3] _____ and a next-turn request to work with.

07 **Leon:** We could say, "Ari is using the large scoop now. Bea wants it next." That names the situation without saying one child is bad for wanting it.

08 **Sora:** That is a [4] _____. It helps us respond to the actual resource issue while staying attentive to any safety concern.

09 **Leon:** I can offer the smaller scoop while Bea waits. I will say it is smaller; telling Bea it is just the same would ignore what she wants.

10 **Sora:** Exactly. It is an [5] _____, not an identical replacement. We can name what is available without denying that Bea specifically wants the larger one.

Conversation continues on the next page.

One large scoop

CONVERSATION / CONTINUED

11 **Leon:** How do we acknowledge the wish without suggesting that reaching for whatever you want always gets you immediate access?

12 **Sora:** Use [6] _____ alongside the boundary: "You want the scoop. Ari is finishing this container, and we can help with your turn next."

13 **Leon:** That is more useful than simply saying share over and over. It describes what happens now, what ends the current use, and what comes afterward.

14 **Sora:** A concrete [7] _____ sequence can help. We still need to support both children in understanding it rather than assume one sentence settles everything.

15 **Leon:** We should not add a ten-minute wait or an exact timer rule, because neither is part of the arrangement we have described.

16 **Sora:** Correct. The [8] _____ is linked to finishing that container. Keep the wording aligned with the actual proposal instead of introducing another condition halfway through.

17 **Leon:** And if one child remains upset, we stay responsive. A calm adult presence and clear language matter more than demanding the right apology words immediately.

18 **Sora:** That is part of [9] _____. We can model calm language and maintain the boundary without treating a forced phrase as proof that the practical conflict is resolved.

19 **Leon:** Then we describe the sequence, preserve both requests, offer the smaller scoop honestly, and help the children understand the proposed current and next turns.

20 **Sora:** Yes, with an [10] _____ and continued attention. We have a supported proposal, not evidence that the children have already agreed or that no further help will be needed.

CHECK THE GAPS

1. observed sequence / **2.** inferred motive / **3.** finishing point / **4.** neutral description / **5.** alternative resource / **6.** emotional validation / **7.** turn-taking / **8.** next turn / **9.** co-regulation / **10.** agreement check

Why these answers fit, page 127

F Check accuracy and scope

One large scoop

Return to the case

Two children reach for the same large scoop. Educator Sora saw Ari holding it and then Bea reaching toward it; Sora does not know either child motive. Ari wants to finish one container. Bea wants the large scoop next. A smaller scoop is available. Sora and colleague Leon discuss language for supporting the disagreement. No injury or ongoing danger is stated. Staff must remain responsive to actual safety needs, preserve both requests, and avoid describing either child as selfish, manipulative, or deliberately aggressive based on this observation.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. What does emotional validation mean here?

A. Allow any action because the wish is strong.
B. Deny that either child has a preference.
C. Diagnose the cause of every feeling.
D. Acknowledge wanting the scoop without approving every action used to obtain it.

2. What remains necessary after proposing the sequence?

A. Record a guaranteed permanent resolution.
B. Support understanding and remain responsive to the actual interaction.
C. Assume every child agreed without checking.
D. Leave all supervision to the children.

Answers and explanations, page 129

Listen for the distinction

Switch roles. Repeat the child-facing now-and-next lines with one container as the finishing point and the smaller scoop as the alternative.

Validate a wish without endorsing every action

A child can want an object without being entitled to take it immediately. Name the wish, describe the current use, and support a practical next step. Neutral language is not passive: adults can maintain safety and a clear boundary without claiming to know motives.

F Say it / transfer to a new case

Describe another resource disagreement

Noor is using the red truck and wants to finish one route. Eli wants it next. A blue truck is available. The educator observed Eli reaching but does not know the motive.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

blue / route / unknown / red

01 **Educator:** Noor is using the [1] _____ truck.

02 **Colleague:** The finishing point is one [2] _____.

03 **Educator:** A [3] _____ truck is available meanwhile.

04 **Colleague:** The motive for reaching is [4] _____.

CHECK THE GAPS

1. red / **2.** route / **3.** blue / **4.** unknown

Why these answers fit, page 129

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "One large scoop". Leon: "That is more useful than simply saying share over and over. It describes what happens now, what ends the current use, and what comes afterward." Sora: [missing response] Leon: "We should not add a ten-minute wait or an exact timer rule, because neither is part of the arrangement we have described." Which response belongs in the gap?

A. That is a neutral description. It helps us respond to the actual resource issue while staying attentive to any safety concern.

B. Use emotional validation alongside the boundary: "You want the scoop. Ari is finishing this container, and we can help with your turn next."

C. A concrete turn-taking sequence can help. We still need to support both children in understanding it rather than assume one sentence settles everything.

D. The observed sequence was Ari holding it, then Bea reaching toward it. I do not know the motive, and I should keep that uncertainty clear.

Answers and explanations, page 130

Review 2 / Meaning and context

Use language from the lessons you have completed. Choose one answer per question.

> **Case file**
>
> Revisit "Daily routines and supported transitions" and "Co-regulation and peer disagreements". Choose precise terminology, then reconstruct the missing responses using both neighboring turns. The final two questions also revisit earlier conversations.

1. A colleague needs the term for this meaning: Signal indicating an approaching or current change of activity. Which term fits?

A. follow-through
B. image storage
C. transition cue
D. finishing point

2. A colleague needs the term for this meaning: What a person is doing with an item at the relevant moment. Which term fits?

A. co-regulation
B. current use
C. resource conflict
D. repair

3. Rebuild the exchange from "Two bridge ideas". Ben: "We have blocks available for trying two designs. I could suggest that practical option instead of making the children compete for one approved plan." Maya: [missing response] Ben: "I keep saying good job, but it does not give them much to work with. What could I say about the supports they are moving?" Which response belongs in the gap?

A. Yes. That is an open prompt. It supports her idea without putting our answer into her mouth or turning the exchange into a vocabulary test.
B. Exactly. Use spatial language such as underneath while keeping the idea his. Height of an opening and width of a bridge are different features.
C. Yes. That supports collaborative play. We can compare features, invite a later revision, and keep the children's ideas at the center of the conversation.
D. A second trial gives us something to compare. We should not announce the result in advance or promise that a particular structure will work.

Review 2 / Meaning and context / continued

4. Rebuild the exchange from "One large scoop". Leon: "And if one child remains upset, we stay responsive. A calm adult presence and clear language matter more than demanding the right apology words immediately." Sora: [missing response] Leon: "Then we describe the sequence, preserve both requests, offer the smaller scoop honestly, and help the children understand the proposed current and next turns." Which response belongs in the gap?

A. That is part of co-regulation. We can model calm language and maintain the boundary without treating a forced phrase as proof that the practical conflict is resolved.

B. Yes. That would be an inferred motive. It can affect how colleagues treat the child later, so the record and conversation should not present it as fact.

C. The observed sequence was Ari holding it, then Bea reaching toward it. I do not know the motive, and I should keep that uncertainty clear.

D. Ari wants to finish one container. Bea wants the large scoop next. That gives us a possible finishing point and a next-turn request to work with.

Answers and explanations, page 153

A Read the situation

LESSON 05 / OBSERVATION AND FAMILY PROGRESS CONVERSATIONS

Share a specific learning observation warmly while rejecting unsupported developmental rankings and diagnoses.

Celebrate the observation

During a supervised activity today, educator Rosa saw Eli sort four buttons by color and heard Eli say, "These go together." Parent Andre asks whether this proves Eli is ahead of every child of the same age. No comparison data, developmental screening, or broader assessment is supplied. Rosa can describe the action, exact words, context, and date of observation, but cannot turn them into a universal ranking. The button activity is fictional and requires appropriate materials, age suitability, and supervision; it is not a recommendation to give small loose items to every child.

People: Andre, Eli's parent; Rosa, Early-years educator.

Read the record

Choose one answer per question using the facts above.

1. What did Rosa observe?

A. A diagnosis of exceptional ability
B. Eli sorting four buttons by color during a supervised activity
C. Eli outperforming every same-age child
D. A completed developmental screening

2. Which words belong inside quotation marks in Rosa's note?

A. I can sort all the colors.
B. These go together.
C. These four buttons are the same color.
D. I counted four matching buttons.

3. What evidence is missing for the parent's claim?

A. The fact that the activity was supervised
B. Appropriate comparison data and broader assessment
C. Any observation at all
D. The educator's identity

Answers and explanations, page 131

B Vocabulary in use

CORE TERMS

observation record
Account of what was noticed in a defined context.

create an observation record

anecdotal note
Brief factual account of a meaningful event or behavior.

write an anecdotal note

verbatim quotation
Exact words reproduced without changing their wording.

preserve a verbatim quotation

context
Circumstances in which an event or response occurred.

record the context

work sample
Example of a child's work used as one source of information.

collect a work sample

learning story
Narrative account connecting observed learning with its context and meaning.

develop a learning story

classification
Grouping items according to shared features.

observe classification

sorting criterion
Feature used to decide which items belong together.

identify the sorting criterion

attribute
Observable feature such as color, shape, or size.

name an attribute

one-to-one correspondence
Matching one item with one other item or one count word.

observe one-to-one correspondence

cardinality
Understanding that the final count word represents the number in a set.

explore cardinality

fine-motor skill
Coordinated use of small muscles, often in hand and finger activity.

observe fine-motor skills

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

observation record OBSERVATION RECORD

create an observation record

Keep the meaning precise: Account of what was noticed in a defined context.

learning story LEARNING STORY

develop a learning story

Keep the meaning precise: Narrative account connecting observed learning with its context and meaning.

B Precision and professional shorthand

EXTEND YOUR RANGE

developmental domain

Area of development such as language, physical, or social development.

distinguish developmental domains

developmental milestone

Skill or behavior associated with development, interpreted with appropriate variation and context.

discuss a developmental milestone

formative assessment

Information used during learning to guide support and next steps.

use formative assessment

summative assessment

Assessment of achievement at a defined endpoint.

distinguish summative assessment

developmental screening

Structured process identifying whether further developmental evaluation may be needed.

distinguish developmental screening

diagnostic assessment

Qualified evaluation used to establish a diagnosis or detailed explanation.

refer for diagnostic assessment

comparison group

Relevant group used as a basis for interpreting comparative results.

identify the comparison group

norm-referenced measure

Assessment interpreted in relation to an appropriate reference population.

interpret a norm-referenced measure

criterion-referenced measure

Assessment interpreted against specified criteria rather than a peer ranking alone.

use a criterion-referenced measure

reliability

Consistency of a measurement or assessment under relevant conditions.

examine reliability

B Precision and professional shorthand / continued

validity

Support for the intended interpretation and use of assessment information.

examine validity

strength-based description

Account that recognizes capabilities without exaggerating or ignoring support needs.

use a strength-based description

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

fine-motor skill FINE-MOTOR SKILL

observe fine-motor skills

Keep the meaning precise: Coordinated use of small muscles, often in hand and finger activity.

developmental screening DEVELOPMENTAL SCREENING

distinguish developmental screening

Keep the meaning precise: Structured process identifying whether further developmental evaluation may be needed.

C Phrases that move the work forward

Share the observation
Today I saw Eli sort four buttons by color.

Name the setting
This happened during the supervised activity.

Limit the comparison
This observation does not rank Eli against every child of the same age.

Separate skills
Sorting by color does not by itself establish counting skill.

Avoid a diagnosis
This was not a developmental diagnosis.

Invite factual family input
We can record relevant examples you have observed at home.

Avoid a fixed label
One moment does not define every aspect of Eli's development.

Explain a broader claim
A wider conclusion needs appropriate additional evidence.

Preserve the words
Eli said, "These go together."

Celebrate specifically
I wanted to share the way Eli grouped the colors.

Do not minimize
The observation is useful even without a comparative claim.

Identify the criterion
Color was the feature used to group the buttons.

Distinguish screening
No developmental screening result is supplied here.

Keep sources separate
A home report and my observation should each retain their source.

Use a precise record
Include the action, words, context, and observation date.

Close warmly
We can celebrate this moment and keep the description accurate.

Precision in real exchanges

Purpose: Celebrate specifically
Useful wording: I wanted to share the way Eli grouped the colors.

Purpose: Limit the comparison
Useful wording: This observation does not rank Eli against every child of the same age.

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which message is both warm and accurate?

A. Eli grouped four buttons by color and said, "These go together"; I wanted to share that moment.

B. Eli is definitely ahead of every peer.

C. The observation means nothing because it is not a test.

D. Eli has mastered all mathematics.

2. Which skill is not established just by the described sorting?

A. Participating in the supervised activity

B. Counting the four objects accurately

C. Grouping by color in this activity

D. Using the quoted words

3. A colleague needs the term for this meaning: Circumstances in which an event or response occurred. Which term fits?

A. formative assessment

B. context

C. attribute

D. criterion-referenced measure

D Choose the response that fits / continued

4. Rebuild the exchange from "Celebrate the observation". Andre: "He will be pleased you noticed. When I ask how his day went, I usually get one word. This gives me something specific to talk about with him." Rosa: [missing response] Andre: "Four buttons sounds like counting practice too. Did he actually count them aloud, or was he just putting matching colors together?" Which response belongs in the gap?

A. Exactly. A strength-based description can celebrate what happened without adding a ranking. I do not need to overstate it to say it was worth noticing.

B. I will preserve the verbatim quotation when quoting him. If I paraphrase elsewhere, I should make that clear rather than put new words into his mouth.

C. I can share a specific observation record. Today I saw Eli sort four buttons by color during a supervised activity, and I heard, "These go together."

D. Yes. A relevant comparison group and appropriate assessment evidence would matter. A single classroom moment does not establish that Eli is ahead of every same-age child.

Answers and explanations, page 131

> **One useful distinction**
>
> Sorting four objects by color does not establish counting to four, cardinality, or every other early mathematics skill. Name the feature actually observed. The number of objects in the activity is not automatically evidence that the child counted them.

E Conversation

Celebrate the observation

Celebrate the observation

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

observation record / Developmental screening / developmental domains / strength-based description / Classification / sorting criterion / comparison group / verbatim quotation / anecdotal note / context

01 **Andre:** Rosa, you mentioned that Eli sorted buttons today. Does that mean he is ahead of every other child his age? He seems very quick with things at home.

02 **Rosa:** I can share a specific [1] _____. Today I saw Eli sort four buttons by color during a supervised activity, and I heard, "These go together."

03 **Andre:** I am pleased to hear that. I do not want a technical report, but I would like to understand exactly what made you notice the moment.

04 **Rosa:** The [2] _____ was color. Eli grouped the items on that basis, and the words connected with the action. That is the specific moment I wanted to share.

05 **Andre:** He will be pleased you noticed. When I ask how his day went, I usually get one word. This gives me something specific to talk about with him.

06 **Rosa:** Exactly. A [3] _____ can celebrate what happened without adding a ranking. I do not need to overstate it to say it was worth noticing.

07 **Andre:** Four buttons sounds like counting practice too. Did he actually count them aloud, or was he just putting matching colors together?

08 **Rosa:** They are separate. [4] _____ by color does not prove he counted them. Four objects were present, but we should not add an unobserved counting action to the note.

09 **Andre:** I have also heard people mention a developmental check. Is this note part of a screening, or are you sharing something you noticed during play?

10 **Rosa:** [5] _____ has a different purpose and process. This conversation does not supply a screening result, and the observation is not a diagnosis.

Conversation continues on the next page.

Celebrate the observation

CONVERSATION / CONTINUED

11 **Andre:** I see. His cousin did something similar later, so I started comparing them. That is probably not enough to say where Eli stands with children his age.

12 **Rosa:** Yes. A relevant [6] _____ and appropriate assessment evidence would matter. A single classroom moment does not establish that Eli is ahead of every same-age child.

13 **Andre:** Did he really say, "These go together"? I would like to remember his own words. That sounds just like something he would say at home.

14 **Rosa:** I will preserve the [7] _____ when quoting him. If I paraphrase elsewhere, I should make that clear rather than put new words into his mouth.

15 **Andre:** At home I have seen him put similar objects together too. Is that useful to tell you, even if it is not a formal assessment?

16 **Rosa:** Yes, with the [8] _____ and source kept clear. Your home example and my observation can both inform a conversation without being recorded as the same event.

17 **Andre:** At home he sometimes loses interest halfway through. Does that mean today's success does not count, or can you see different things on different days?

18 **Rosa:** Different [9] _____ and settings can show different patterns. We should not turn this one observation into a fixed description of all his abilities.

19 **Andre:** That makes sense. I can enjoy hearing what he did without needing it to prove a rank. Please keep sharing these specific moments with me.

20 **Rosa:** I will. A useful [10] _____ includes what happened, what was said, and when and where it occurred. We can be enthusiastic and precise at the same time.

CHECK THE GAPS

1. observation record / **2.** sorting criterion / **3.** strength-based description / **4.** Classification / **5.** Developmental screening / **6.** comparison group / **7.** verbatim quotation / **8.** context / **9.** developmental domains / **10.** anecdotal note

Why these answers fit, page 132

F Check accuracy and scope

Celebrate the observation

Return to the case

During a supervised activity today, educator Rosa saw Eli sort four buttons by color and heard Eli say, "These go together." Parent Andre asks whether this proves Eli is ahead of every child of the same age. No comparison data, developmental screening, or broader assessment is supplied. Rosa can describe the action, exact words, context, and date of observation, but cannot turn them into a universal ranking. The button activity is fictional and requires appropriate materials, age suitability, and supervision; it is not a recommendation to give small loose items to every child.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. What would a precise note include?

A. A peer rank invented from one event
B. Action, exact words where quoted, context, and observation date
C. Only a label such as genius
D. A diagnosis with no evaluation

2. How should a home example be handled?

A. Record it as something Rosa personally saw.
B. Treat it as proof of every developmental domain.
C. Delete the original activity note.
D. Keep it attributed to the family and distinct from Rosa's observation.

Answers and explanations, page 134

Listen for the distinction

Switch roles. Repeat the explanation distinguishing sorting, counting, and screening while keeping the parent conversation warm.

Warmth does not require exaggeration

A parent may hear a cautious answer as a refusal to celebrate. Start with the actual achievement and explain why it is worth sharing. Then distinguish the observation from a comparison that has not been made, without sounding as though the child work is unimportant.

F Say it / transfer to a new case

Describe a shape-sorting observation

Educator Noor observed Ari sort three large shapes by shape during a supervised activity today. Ari said, "These are the same." No counting action or peer comparison is supplied.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

shape / same / three / comparison

01 **Noor:** The grouping feature was [1] _____.

02 **Parent:** There were [2] _____ large shapes.

03 **Noor:** Ari said, These are the [3] _____.

04 **Parent:** No peer [4] _____ is established.

CHECK THE GAPS

1. shape / **2.** three / **3.** same / **4.** comparison

Why these answers fit, page 134

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "Celebrate the observation". Andre: "Did he really say, "These go together"? I would like to remember his own words. That sounds just like something he would say at home." Rosa: [missing response] Andre: "At home I have seen him put similar objects together too. Is that useful to tell you, even if it is not a formal assessment?" Which response belongs in the gap?

A. I will preserve the verbatim quotation when quoting him. If I paraphrase elsewhere, I should make that clear rather than put new words into his mouth.

B. I can share a specific observation record. Today I saw Eli sort four buttons by color during a supervised activity, and I heard, "These go together."

C. Yes, with the context and source kept clear. Your home example and my observation can both inform a conversation without being recorded as the same event.

D. Yes. A relevant comparison group and appropriate assessment evidence would matter. A single classroom moment does not establish that Eli is ahead of every same-age child.

Answers and explanations, page 135

A Read the situation

LESSON 06 / INCLUSIVE PARTICIPATION AND HOME LANGUAGES

Explain an allowed participation choice while distinguishing access, engagement, and evidence of spoken language.

> **Pointing is a response**
>
> A small-group story activity allows picture choices or spoken answers under Noor's current inclusion plan. Noor prefers pointing today. Colleague Ben describes that as nonparticipation. Educator Amina must explain that pointing is an allowed response without claiming it supplies the same evidence as a spoken sentence. No reason for Noor's preference, diagnosis, or home-language profile is supplied. The team can use inclusive language, record the actual response format, and keep future support connected to the plan rather than requiring speech as an unannounced condition of belonging.

People: Amina, Early-years educator; Ben, Colleague observing the group.

Read the record

Choose one answer per question using the facts above.

1. Which response formats does the plan allow?

A. Picture choices or spoken answers
B. Spoken sentences only
C. No response of any kind
D. Only copying another child

2. What does Noor prefer today?

A. Leaving the group as an established fact
B. Pointing
C. A supplied spoken presentation
D. A new diagnosis

3. What should the team avoid claiming?

A. That pointing is allowed here
B. That the actual response format matters
C. That the plan should guide participation
D. That pointing supplies identical evidence to a spoken sentence

Answers and explanations, page 136

B Vocabulary in use

CORE TERMS

inclusion plan
Agreed support arrangements for meaningful access and participation.

follow the inclusion plan

engagement
Attention or involvement in an activity, described through relevant evidence.

observe engagement

picture choice
Selection among images used to express a response.

offer picture choices

spoken response
Answer communicated through speech.

record a spoken response

receptive language
Understanding of language received through listening, reading, or other input.

distinguish receptive language

visual support
Image or visual arrangement that helps understanding or expression.

use visual supports

participation
Taking part in an activity through an appropriate available form.

recognize participation

response mode
Way a person answers or communicates in an activity.

record the response mode

pointing response
Indication made by pointing rather than speaking.

acknowledge a pointing response

expressive language
Language used to convey meaning to others.

support expressive language

communication access
Opportunity and support needed to receive and convey meaning.

provide communication access

gesture
Movement used to communicate meaning.

notice a gesture

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

inclusion plan INCLUSION PLAN

follow the inclusion plan

Keep the meaning precise: Agreed support arrangements for meaningful access and participation.

pointing response POINTING RESPONSE

acknowledge a pointing response

Keep the meaning precise: Indication made by pointing rather than speaking.

B Precision and professional shorthand

EXTEND YOUR RANGE

augmentative communication

Methods that support existing speech or communication.

use appropriate augmentative communication

alternative communication

Methods used instead of speech for some or all communication.

support alternative communication

AAC

Augmentative and alternative communication: tools and strategies supporting communication.

follow the AAC plan

home language

Language used in the child's home or family life.

value the home language

dual language learner

Child learning two or more languages, including English alongside a home language.

support a dual language learner

language difference

Variation connected with languages used, distinct from an assumed disorder.

distinguish a language difference

language delay

Language skills developing more slowly than expected, assessed in context rather than inferred from one response or multilingualism.

refer a language-delay concern

multilingual repertoire

Languages and communication resources a person can draw on.

recognize a multilingual repertoire

family language information

Details families share about language use and communication.

gather family language information

access barrier

Feature that prevents or limits meaningful participation.

identify an access barrier

B Precision and professional shorthand / continued

equitable opportunity

Fair access that may require different supports rather than identical treatment.

provide equitable opportunity

evidence limit

Boundary on what an observation supports.

state the evidence limit

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

gesture GESTURE

notice a gesture

Keep the meaning precise: Movement used to communicate meaning.

dual language learner DUAL LANGUAGE LEARNER

support a dual language learner

Keep the meaning precise: Child learning two or more languages, including English alongside a home language.

C Phrases that move the work forward

Refer to the plan

Noor's current plan allows picture choices or spoken answers.

Recognize participation

Pointing is an allowed response in this activity.

Keep evidence precise

No spoken sentence was recorded in that response.

Separate the aims

Access to the story and evidence of spoken language are related but distinct.

Avoid a language assumption

We do not know Noor's home-language profile from this observation.

Use the available options

We can make both permitted response formats accessible.

Value family information

Family language information should retain its source and context.

Name the barrier

Requiring speech without changing the plan would remove an allowed route.

Name today's choice

Noor prefers pointing today.

State the observation

Noor selected a picture by pointing.

Avoid an all-or-nothing label

A nonspeaking response is not automatically nonparticipation.

Reject a guessed diagnosis

This response alone does not establish a language delay.

Keep support planned

Any change in support should follow the appropriate planning process.

Respect today's preference

We should not remove the allowed choice because speech is more noticeable.

Avoid false equivalence

The two response modes do not provide identical evidence.

Close accurately

Noor participated by pointing; that is the response we should record.

Precision in real exchanges

Purpose: State the observation
Useful wording: Noor selected a picture by pointing.

Purpose: Keep evidence precise
Useful wording: No spoken sentence was recorded in that response.

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which note is most accurate?

A. Noor has a confirmed language delay.

B. Noor participated by selecting a picture through pointing; no spoken sentence was recorded.

C. Noor did not participate because there was no speech.

D. Noor produced a complete spoken sentence.

2. Which action conflicts with the current plan?

A. Record whether the response was spoken.

B. Require spoken answers as the only way to count participation.

C. Offer picture choices.

D. Accept a pointing response.

3. A colleague needs the term for this meaning: Way a person answers or communicates in an activity. Which term fits?

A. AAC

B. receptive language

C. family language information

D. response mode

D Choose the response that fits / continued

4. Rebuild the exchange from "Pointing is a response". Ben: "Does that mean we should describe pointing as exactly the same evidence as a spoken answer? I do not want our notes to lose the difference." Amina: [missing response] Ben: "I will change my note from no response to selected a picture by pointing. That is what I saw; I did not hear a sentence." Which response belongs in the gap?

A. No. The response mode matters. We can write that Noor selected a picture by pointing and that no spoken sentence was recorded in that response.

B. The inclusion plan allows picture choices or spoken answers. Noor preferred pointing today and selected a picture, which is an allowed response in this activity.

C. That would create an access barrier. We can support the activity through its available options rather than change the participation rule without the appropriate process.

D. Neither follows from this moment. A language difference or concern needs appropriate information, not an inference from one pointing response or from the child's name.

Answers and explanations, page 136

One useful distinction

A permitted pointing response can be participation without being a spoken sentence. Record what Noor selected and how the response was made. Do not convert pointing into either no participation or evidence of a spoken-language performance that did not occur.

E Conversation

Pointing is a response

Pointing is a response

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

response mode / equitable opportunity / evidence limit / access barrier / visual support / expressive language / language difference / participation / Family language information / inclusion plan

01 **Ben:** Noor did not give a spoken answer in the story group. I was going to mark that as not participating, but you seem to have recorded a response.

02 **Amina:** The [1] _____ allows picture choices or spoken answers. Noor preferred pointing today and selected a picture, which is an allowed response in this activity.

03 **Ben:** I saw the pointing, but I was listening for a sentence. I may have treated the response I expected as the only response that counted.

04 **Amina:** That confuses [2] _____ with one particular format. We should recognize the actual response while staying precise about what it demonstrates.

05 **Ben:** Does that mean we should describe pointing as exactly the same evidence as a spoken answer? I do not want our notes to lose the difference.

06 **Amina:** No. The [3] _____ matters. We can write that Noor selected a picture by pointing and that no spoken sentence was recorded in that response.

07 **Ben:** I will change my note from no response to selected a picture by pointing. That is what I saw; I did not hear a sentence.

08 **Amina:** Exactly. The [4] _____ stays visible. A meaningful contribution does not need to be exaggerated into evidence of a different kind of performance.

09 **Ben:** Could the preference mean a language delay, or tell us which language Noor uses at home? I have heard colleagues make those assumptions.

10 **Amina:** Neither follows from this moment. A [5] _____ or concern needs appropriate information, not an inference from one pointing response or from the child's name.

Conversation continues on the next page.

Pointing is a response

CONVERSATION / CONTINUED

11 **Ben:** So we should not record a particular home language unless we actually have that information through the proper family and record process.

12 **Amina:** Correct. [6] _____ should be gathered respectfully and attributed accurately. We should not create a language profile to explain an observation we have not investigated.

13 **Ben:** If I insist on a spoken sentence before Noor can count as taking part, I would be removing one of the routes the plan currently allows.

14 **Amina:** That would create an [7] _____. We can support the activity through its available options rather than change the participation rule without the appropriate process.

15 **Ben:** We still need to notice how children use language over time. Recognizing pointing should not mean we stop describing the language we actually hear.

16 **Amina:** Agreed. Evidence of [8] _____ should identify the actual form and context. Precise observation and inclusive participation are compatible, not opposing goals.

17 **Ben:** Before the next group, let us put the picture choices where Noor can reach them. They are not much help if they stay behind my chair.

18 **Amina:** Yes. The [9] _____ needs to be accessible through the planned arrangement. We should check the environment rather than interpret a missing opportunity as a child failure.

19 **Ben:** I will change my note to describe the pointing response and its limits. I will not label it nonparticipation or infer a diagnosis or home language.

20 **Amina:** That supports [10] _____. Noor used an allowed option today, and we can keep both the participation and the response difference clear.

CHECK THE GAPS

1. inclusion plan / **2.** participation / **3.** response mode / **4.** evidence limit / **5.** language difference / **6.** Family language information / **7.** access barrier / **8.** expressive language / **9.** visual support / **10.** equitable opportunity

Why these answers fit, page 137

F Check accuracy and scope

Pointing is a response

Return to the case

A small-group story activity allows picture choices or spoken answers under Noor's current inclusion plan. Noor prefers pointing today. Colleague Ben describes that as nonparticipation. Educator Amina must explain that pointing is an allowed response without claiming it supplies the same evidence as a spoken sentence. No reason for Noor's preference, diagnosis, or home-language profile is supplied. The team can use inclusive language, record the actual response format, and keep future support connected to the plan rather than requiring speech as an unannounced condition of belonging.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. What can be inferred about the home language?

A. It must be English

B. It must be a particular language based on the name Noor

C. There is no language used at home

D. Nothing specific from the supplied pointing preference alone

2. Which distinction matters?

A. Inclusion means never documenting response differences.

B. Participation can be valid while evidence of spoken-language production remains limited.

C. Every response mode proves identical language skills.

D. Pointing always proves noncomprehension.

Answers and explanations, page 139

Listen for the distinction

Switch roles. Repeat the exchange about making the picture choices physically accessible under the current plan.

Participation is broader than one response format

A quiet response may be easy to overlook in a busy group. Identify what the child actually did and whether it fits the activity plan. Respect a permitted communication choice without pretending that pointing and speaking demonstrate exactly the same language skills.

F Say it / transfer to a new case

Record another permitted response mode

Ari's current story plan permits a spoken answer or a picture selection. Ari selects a picture today. No spoken answer or home-language information is supplied.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

picture / plan / unspecified / recorded

01 **Educator:** The selected response used a [1] _____.

02 **Colleague:** A spoken answer was not [2] _____.

03 **Educator:** The choice was allowed by the current [3] _____.

04 **Colleague:** The home-language profile remains [4] _____.

CHECK THE GAPS

1. picture / **2.** recorded / **3.** plan / **4.** unspecified

Why these answers fit, page 139

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "Pointing is a response". Ben: "If I insist on a spoken sentence before Noor can count as taking part, I would be removing one of the routes the plan currently allows." Amina: [missing response] Ben: "We still need to notice how children use language over time. Recognizing pointing should not mean we stop describing the language we actually hear." Which response belongs in the gap?

A. That would create an access barrier. We can support the activity through its available options rather than change the participation rule without the appropriate process.

B. No. The response mode matters. We can write that Noor selected a picture by pointing and that no spoken sentence was recorded in that response.

C. The inclusion plan allows picture choices or spoken answers. Noor preferred pointing today and selected a picture, which is an allowed response in this activity.

D. Neither follows from this moment. A language difference or concern needs appropriate information, not an inference from one pointing response or from the child's name.

Answers and explanations, page 140

Review 3 / Meaning and context

Use language from the lessons you have completed. Choose one answer per question.

> **Case file**
>
> Revisit "Observation and family progress conversations" and "Inclusive participation and home languages". Choose precise terminology, then reconstruct the missing responses using both neighboring turns. The final two questions also revisit earlier conversations.

1. A colleague needs the term for this meaning: Exact words reproduced without changing their wording. Which term fits?

A. norm-referenced measure

B. verbatim quotation

C. sorting criterion

D. developmental milestone

2. A colleague needs the term for this meaning: Language used to convey meaning to others. Which term fits?

A. expressive language

B. augmentative communication

C. inclusion plan

D. language delay

3. Rebuild the exchange from "One large scoop". Leon: "I can offer the smaller scoop while Bea waits. I will say it is smaller; telling Bea it is just the same would ignore what she wants." Sora: [missing response] Leon: "How do we acknowledge the wish without suggesting that reaching for whatever you want always gets you immediate access?" Which response belongs in the gap?

A. Ari wants to finish one container. Bea wants the large scoop next. That gives us a possible finishing point and a next-turn request to work with.

B. Exactly. It is an alternative resource, not an identical replacement. We can name what is available without denying that Bea specifically wants the larger one.

C. The observed sequence was Ari holding it, then Bea reaching toward it. I do not know the motive, and I should keep that uncertainty clear.

D. Correct. The next turn is linked to finishing that container. Keep the wording aligned with the actual proposal instead of introducing another condition halfway through.

Review 3 / Meaning and context / continued

4. Rebuild the exchange from "Pointing is a response". Ben: "Before the next group, let us put the picture choices where Noor can reach them. They are not much help if they stay behind my chair." Amina: [missing response] Ben: "I will change my note to describe the pointing response and its limits. I will not label it nonparticipation or infer a diagnosis or home language." Which response belongs in the gap?

A. No. The response mode matters. We can write that Noor selected a picture by pointing and that no spoken sentence was recorded in that response.

B. Yes. The visual support needs to be accessible through the planned arrangement. We should check the environment rather than interpret a missing opportunity as a child failure.

C. The inclusion plan allows picture choices or spoken answers. Noor preferred pointing today and selected a picture, which is an allowed response in this activity.

D. Correct. Family language information should be gathered respectfully and attributed accurately. We should not create a language profile to explain an observation we have not investigated.

Answers and explanations, page 156

A Read the situation

LESSON 07 / HEALTH RECORDS AND FACTUAL INCIDENT HANDOVERS

Receive a parent health-plan update and make an accountable document handoff without inventing a care decision.

A reported allergy-plan change

Theo's parent, Morgan, tells educator Rosa that the allergy plan may have changed. The center still holds the earlier plan, and no revised document is available in this conversation. Health coordinator Amira is present and accepts the document query. No food decision, exposure, symptoms, or emergency is part of this case. Rosa must take the report seriously, preserve the difference between a reported change and a verified revision, and connect Morgan with Amira promptly. The exercise does not authorize changing treatment, relaxing controls, or ignoring a reported safety concern.

People: Morgan, Theo's parent; Rosa, Early-years educator.

Read the record

Choose one answer per question using the facts above.

1. What does Morgan report?

A. A food exposure occurred in this case.
B. An emergency treatment decision is supplied.
C. The allergy plan may have changed.
D. A verified revision has already reached every staff member.

2. Which status is established when Amira accepts the document query?

A. The revised allergy instructions are confirmed.
B. The earlier plan has been formally superseded.
C. Every educator has received the updated instructions.
D. The question has a named receiving owner.

3. What remains unavailable?

A. The parent's report
B. The name of the receiving coordinator
C. The revised document
D. The fact that an earlier plan is held

Answers and explanations, page 141

B Vocabulary in use

CORE TERMS

allergy action plan
Individualized document specifying management of a known allergy under appropriate guidance.

verify the allergy action plan

healthcare plan
Agreed information and arrangements for a person's relevant health needs.

review the healthcare plan

reported change
Update described by a source but not necessarily verified.

record a reported change

verified revision
Updated version confirmed through the appropriate process.

obtain a verified revision

current version
Document version established as applicable for use.

confirm the current version

superseded version
Earlier document replaced through the appropriate process.

identify a superseded version

document control
Process for managing document versions, approval, access, and changes.

follow document control

health coordinator
Person responsible for coordinating specified health-information processes.

contact the health coordinator

parent report
Information attributed to a child's parent or carer.

preserve the parent report

source document
Original or authoritative record supporting an instruction or fact.

request the source document

care instruction
Direction governing an aspect of care from the appropriate source.

clarify a care instruction

emergency action plan
Defined arrangements for responding to an emergency.

follow the emergency action plan

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

allergy action plan ALLERGY ACTION PLAN

verify the allergy action plan

Keep the meaning precise: Individualized document specifying management of a known allergy under appropriate guidance.

superseded version SUPERSEDED VERSION

identify a superseded version

Keep the meaning precise: Earlier document replaced through the appropriate process.

B Precision and professional shorthand

EXTEND YOUR RANGE

allergen

Substance capable of triggering an allergic reaction in a susceptible person.

identify the relevant allergen

allergic reaction

Immune response to an allergen that may require appropriate medical action.

recognize an allergic reaction

exposure

Contact with a substance or situation relevant to the concern.

record a reported exposure

medication authorization

Required permission or authority for medicine-related action under applicable rules.

verify medication authorization

staff briefing

Sharing of relevant information with staff through an appropriate process.

document the staff briefing

handoff acknowledgment

Confirmation that the receiving person accepted the query or information.

obtain handoff acknowledgment

food intolerance

Adverse food response distinct from an immune-mediated food allergy.

distinguish food intolerance

anaphylaxis

Serious allergic reaction requiring immediate emergency response.

follow anaphylaxis procedures

cross-contact

Unintended transfer of an allergen from one food or surface to another.

prevent allergen cross-contact

training record

Documentation of completed relevant staff training.

check the training record

incident record

Factual account of a relevant event, actions, and outcomes.

complete an incident record

unresolved query

Question that still requires an appropriate answer or action.

track the unresolved query

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

emergency action plan EMERGENCY ACTION PLAN

follow the emergency action plan

Keep the meaning precise: Defined arrangements for responding to an emergency.

exposure EXPOSURE

record a reported exposure

Keep the meaning precise: Contact with a substance or situation relevant to the concern.

C Phrases that move the work forward

Acknowledge the report

Thank you for telling me the plan may have changed.

Name the missing document

The revised document is not available here.

Name the receiving owner

Amira has accepted the document query.

Avoid inventing the revision

I cannot state the new instructions without the appropriate verification.

Keep decisions separate

This conversation does not establish a food or treatment decision.

Check actual receipt

Amira's acceptance gives the query an owner.

Keep staff updates factual

Do not record a staff briefing before it has occurred.

Keep emergency priorities

Actual urgent concerns must follow the appropriate emergency or health route.

State the held record

We still hold the earlier plan.

Preserve uncertainty

I will record this as a reported possible change.

Make the next step immediate

Let us connect you with Amira now.

Do not dismiss the report

The missing document does not mean we should ignore what you have told us.

Protect sensitive information

We should handle the health information through the appropriate private process.

Avoid false completion

The plan has not been confirmed as revised yet.

Preserve version history

The document process should show which version is applicable.

Close accurately

Possible change reported, earlier plan held, revision unavailable, query accepted by Amira.

Precision in real exchanges

Purpose: Preserve uncertainty
Useful wording: I will record this as a reported possible change.

Purpose: Name the receiving owner
Useful wording: Amira has accepted the document query.

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which handoff is accurate?

A. New instructions verified and every staff member trained.

B. Theo had a reaction during this conversation.

C. The report can be ignored until next month.

D. Parent reports a possible plan change; earlier plan held; revision unavailable; Amira accepts the query.

2. What does Amira accepting the query establish?

A. The document question has a receiving owner.

B. The revised plan is verified.

C. A new food decision is authorized.

D. Every required staff briefing has occurred.

3. A colleague needs the term for this meaning: Updated version confirmed through the appropriate process. Which term fits?

A. allergic reaction

B. verified revision

C. staff briefing

D. parent report

D Choose the response that fits / continued

4. Rebuild the exchange from "A reported allergy-plan change". Morgan: "I need to check the new paperwork myself. Please do not take what I am saying as a complete set of replacement instructions." Rosa: [missing response] Morgan: "Who will check which version should apply? I need to know this has reached someone responsible, rather than become a general note no one owns." Which response belongs in the gap?

A. Thank you for telling me. I will record the reported change and connect you with health coordinator Amira, who is here and has accepted the document query.

B. I will preserve that parent report accurately. The record should not turn may have changed into a completed update or a treatment instruction you did not provide.

C. We need to address the unresolved query through our actual health process. Holding an earlier plan does not justify ignoring your report or guessing the new instructions.

D. Amira is the health coordinator receiving the query. Let us connect you with her now so the discrepancy and its practical implications are handled through the appropriate process.

Answers and explanations, page 141

> **One useful distinction**
>
> May have changed identifies a reported uncertainty. It is neither proof that the earlier plan remains suitable nor permission to invent a replacement. Escalate promptly through the real health process so the responsible people address the discrepancy and any immediate implications.

E Conversation

A reported allergy-plan change

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

document control / verified revision / health coordinator / incident record / allergy action plan / parent report / staff briefing / handoff acknowledgment / reported change / unresolved query

01 **Morgan:** Rosa, I need to tell you that Theo's allergy plan may have changed. I do not have the revised document with me, but I do not want this overlooked.

02 **Rosa:** Thank you for telling me. I will record the [1] _____ and connect you with health coordinator Amira, who is here and has accepted the document query.

03 **Morgan:** Does the fact that you still have the old document mean staff will simply assume nothing has changed? That is what I am concerned about.

04 **Rosa:** We need to address the [2] _____ through our actual health process. Holding an earlier plan does not justify ignoring your report or guessing the new instructions.

05 **Morgan:** I need to check the new paperwork myself. Please do not take what I am saying as a complete set of replacement instructions.

06 **Rosa:** I will preserve that [3] _____ accurately. The record should not turn may have changed into a completed update or a treatment instruction you did not provide.

E Conversation / continued

07 **Morgan:** Who will check which version should apply? I need to know this has reached someone responsible, rather than become a general note no one owns.

08 **Rosa:** Amira is the [4] _____ receiving the query. Let us connect you with her now so the discrepancy and its practical implications are handled through the appropriate process.

09 **Morgan:** I am calling about the paperwork, not to report a reaction today. I do not want anyone to think I have described an incident that did not happen.

10 **Rosa:** I will not add an [5] _____ that invents such an event. The information we have is your possible-plan-change report and the missing revised document.

Conversation continues on the next page.

A reported allergy-plan change

CONVERSATION / CONTINUED

11 **Morgan:** I am worried another member of staff will see a note saying updated and assume you already have the new document. You do not have it yet.

12 **Rosa:** That is why [6] _____ matters. The earlier plan is held, the revised document is unavailable here, and the applicable version needs the appropriate confirmation.

13 **Morgan:** I can try to get the document through the approved route. Until then, I would rather the team ask Amira than piece together instructions from my memory.

14 **Rosa:** Agreed. A [7] _____ cannot be created by guessing. We must use the real source and authorization process, including any required communication to the people who need it.

15 **Morgan:** Once I speak with Amira, will she confirm what still needs doing? I do not want to leave believing the plan has been checked if it has not.

16 **Rosa:** No. The [8] _____ confirms ownership. It does not establish a completed verification, new care decision, or finished staff briefing.

17 **Morgan:** That distinction helps. Please keep the information private while making sure it reaches the appropriate staff through the actual process.

18 **Rosa:** Yes. Any [9] _____ must be appropriate and recorded accurately. We should not claim that everyone has received new instructions before that has happened.

19 **Morgan:** Then my report is taken seriously, but no one is pretending I supplied a complete new plan today. I will speak with Amira now.

20 **Rosa:** Correct. The [10] _____ question is with Amira. We will preserve the source, the missing revision, and the actual next actions without inventing a food or treatment decision.

CHECK THE GAPS

1. reported change / **2.** unresolved query / **3.** parent report / **4.** health coordinator / **5.** incident record / **6.** document control / **7.** verified revision / **8.** handoff acknowledgment / **9.** staff briefing / **10.** allergy action plan

Why these answers fit, page 142

F Check accuracy and scope

A reported allergy-plan change

Return to the case

Theo's parent, Morgan, tells educator Rosa that the allergy plan may have changed. The center still holds the earlier plan, and no revised document is available in this conversation. Health coordinator Amira is present and accepts the document query. No food decision, exposure, symptoms, or emergency is part of this case. Rosa must take the report seriously, preserve the difference between a reported change and a verified revision, and connect Morgan with Amira promptly. The exercise does not authorize changing treatment, relaxing controls, or ignoring a reported safety concern.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. Which statement is unsafe as a general inference?

A. The possible change needs appropriate follow-up.
B. The exact revision is not supplied.
C. Emergency procedures take precedence when applicable.
D. No revised paper means the reported concern can be ignored.

2. What should not be added to the incident record for this case?

A. An invented exposure, symptom, or treatment
B. The attributed parent report
C. The fact that Amira accepted the query
D. The document discrepancy

Answers and explanations, page 144

Listen for the distinction

Switch roles. Repeat the immediate handoff without turning the parent report into new food or treatment instructions.

Take an update seriously without guessing its content

A missing revised document does not make a parent report unimportant. Acknowledge the concern and give it a receiving owner. At the same time, do not invent the revision, alter a treatment instruction, or announce that every relevant staff member has been updated before that happens.

F Say it / transfer to a new case

Hand off another health-document query

Parent Ellis reports that a care plan may have changed. The earlier document is held, and the revised version is unavailable. Health coordinator Noor accepts the query. No symptoms are reported.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

symptoms / Noor / unavailable / held

01 **Educator:** The revised document is [1] _____.

02 **Parent:** The earlier document is still [2] _____.

03 **Educator:** The receiving coordinator is [3] _____.

04 **Parent:** No [4] _____ were reported in this conversation.

CHECK THE GAPS

1. unavailable / **2.** held / **3.** Noor / **4.** symptoms

Why these answers fit, page 144

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "A reported allergy-plan change". Morgan: "I can try to get the document through the approved route. Until then, I would rather the team ask Amira than piece together instructions from my memory." Rosa: [missing response] Morgan: "Once I speak with Amira, will she confirm what still needs doing? I do not want to leave believing the plan has been checked if it has not." Which response belongs in the gap?

A. Amira is the health coordinator receiving the query. Let us connect you with her now so the discrepancy and its practical implications are handled through the appropriate process.

B. We need to address the unresolved query through our actual health process. Holding an earlier plan does not justify ignoring your report or guessing the new instructions.

C. Thank you for telling me. I will record the reported change and connect you with health coordinator Amira, who is here and has accepted the document query.

D. Agreed. A verified revision cannot be created by guessing. We must use the real source and authorization process, including any required communication to the people who need it.

Answers and explanations, page 145

A Read the situation

LESSON 08 / COLLECTION, CONFIDENTIALITY, AND SAFEGUARDING COMMUNICATION

Verify a collection request respectfully, protect private information, and distinguish a stated relationship from confirmed authority.

A collection request to verify

An unfamiliar adult, Owen, tells educator Lea that he is Nia's uncle and has come instead of the usual collector. Today's collection authority has not been verified. Lead educator Rosa is available to check the arrangement, and Nia has not been released. Owen's statement does not establish his identity, family relationship, legal status, or authority for today. Lea needs to explain the verification step calmly, maintain the actual supervision arrangements, and avoid disclosing private contact details. The scenario does not supply a completed check or permission to release Nia.

People: Owen, Adult requesting collection; Lea, Early-years educator.

Read the record

Choose one answer per question using the facts above.

1. What does Owen state?

A. He is Nia's uncle and has come to collect her.
B. A verified court order names him.
C. Rosa has approved the collection.
D. He has already completed the required checks.

2. What is Nia's current status?

A. She left with Owen.
B. She is waiting unsupervised outside.
C. She has authorized her own release.
D. She has not been released.

3. Who is available to check the arrangement?

A. An unidentified person tomorrow
B. Nia acting alone
C. Owen through his own statement
D. Lead educator Rosa

Answers and explanations, page 146

B Vocabulary in use

CORE TERMS

collection authority
Permission established through the applicable process for someone to collect a child.

verify collection authority

authorized collector
Person whose permission to collect has been confirmed as applicable.

confirm the authorized collector

relationship claim
Statement about a relationship that may still require verification.

distinguish a relationship claim

identity verification
Process of checking that someone is who they say they are.

complete identity verification

parental responsibility
Legal responsibilities and rights whose meaning depends on the applicable jurisdiction.

clarify parental responsibility

collection arrangement
Agreed details governing a child's collection.

check the collection arrangement

usual collector
Person who ordinarily collects the child.

contact the usual collector appropriately

substitute collector
Person proposed to collect instead of the usual person.

verify a substitute collector

release
Transfer of a child into the care of an appropriately authorized person.

authorize release

supervision
Active oversight appropriate to the child and setting.

maintain supervision

sign-out record
Record of a child's departure and relevant collection details.

complete the sign-out record

confidential information CONFIDENTIAL INFORMATION

protect confidential information

Keep the meaning precise: Information that requires controlled access and appropriate handling.

C Phrases that move the work forward

Welcome without authorizing

Hello. Let me check the collection arrangement with our lead educator.

Name the remaining check

Today's collection authority has not been verified yet.

Name the available lead

Rosa is available to check the arrangement.

Avoid an accusation

I am explaining the required check, not accusing you of wrongdoing.

Protect contact details

I cannot read private contact details out at the collection point.

Avoid invented legal conclusions

I cannot infer legal authority from a stated family relationship.

Limit the record to facts

I will record what was stated and what has actually been checked.

Keep escalation available

Any concern must follow our actual safeguarding and escalation arrangements.

Acknowledge the statement

You have told me you are Nia's uncle.

Explain the boundary

We need to complete the applicable check before any release.

Keep supervision clear

Nia will remain under our supervision while we follow the process.

Separate identity and authority

Confirming identity is not the same as confirming permission for today.

Use the proper contact route

We will use the appropriate verified contact route.

Keep the outcome open

The check has not produced a confirmed decision yet.

Avoid false release records

No handover has occurred, so we should not record one.

Close calmly

Rosa will check the arrangement; Nia has not been released.

Precision in real exchanges

Purpose: Explain the boundary
Useful wording: We need to complete the applicable check before any release.

Purpose: Name the available lead
Useful wording: Rosa is available to check the arrangement.

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which opening is respectful and accurate?

A. Hello. Let me check today's collection arrangement with Rosa.
B. Nia recognizes you, so the family relationship is enough.
C. Please sign out first; Rosa can confirm permission afterward.
D. Once your identity is checked, today's permission is automatic.

2. What would confirming identity alone establish?

A. Permission to collect in every circumstance
B. A court's decision on parental responsibility
C. That a handover has already occurred
D. Who the person is, not necessarily today's collection authority

3. A colleague needs the term for this meaning: Process of checking that someone is who they say they are. Which term fits?

A. release
B. legal restriction
C. designated lead
D. identity verification

D Choose the response that fits / continued

4. Rebuild the exchange from "A collection request to verify". Owen: "I have told you I am her uncle. Surely that explains why I am here, even if you have not seen me at collection before." Lea: [missing response] Owen: "I have identification with me. Would showing that be enough, or do you also need to confirm that I am collecting today?" Which response belongs in the gap?

A. Hello. Let me check the collection arrangement with Rosa, our lead educator. She is available, and we have not verified today's collection authority yet.

B. I will record that relationship claim accurately. A stated family relationship does not, by itself, confirm identity or permission for today's collection.

C. Yes. No release has occurred. Rosa is available to check, and we will keep the verification, supervision, and record clear while that happens.

D. Identity verification concerns who you are. The applicable collection permission is a separate question, and we must follow our actual process for both.

Answers and explanations, page 146

> **One useful distinction**
>
> Identity, relationship, and collection authority are different questions. Knowing who someone is does not automatically establish permission for this collection. A child recognizing an adult is not a substitute for the applicable authorization process. Do not infer legal status from a family title.

E Conversation

A collection request to verify

A collection request to verify

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

release / factual record / confidential information / escalation route / collection arrangement / relationship claim / collection authority / authorized collector / supervision / Identity verification

01 **Owen:** Hello. I am Nia's uncle. I have come instead of the person who usually collects her, and I would like to take her home.

02 **Lea:** Hello. Let me check the [1] _____ with Rosa, our lead educator. She is available, and we have not verified today's collection authority yet.

03 **Owen:** I understand that you have not met me before. Does being unfamiliar mean you have already decided I am not allowed to collect her?

04 **Lea:** No. We need to verify the [2] _____. I am explaining the check, not making an accusation or announcing a decision before the process is complete.

05 **Owen:** I have told you I am her uncle. Surely that explains why I am here, even if you have not seen me at collection before.

06 **Lea:** I will record that [3] _____ accurately. A stated family relationship does not, by itself, confirm identity or permission for today's collection.

07 **Owen:** I have identification with me. Would showing that be enough, or do you also need to confirm that I am collecting today?

08 **Lea:** [4] _____ concerns who you are. The applicable collection permission is a separate question, and we must follow our actual process for both.

09 **Owen:** Could you read out the family contact details so I can tell you which person to call? That might make this quicker.

10 **Lea:** I cannot disclose [5] _____ at the collection point. We will use the appropriate verified contact route and involve Rosa without sharing private details unnecessarily.

Conversation continues on the next page.

A collection request to verify

CONVERSATION / CONTINUED

11 **Owen:** Can Nia wait outside with me while that happens? I am asking because I do not know how long the check will take.

12 **Lea:** Nia needs to remain under our [6] _____ while we follow the process. We have not authorized a release, and I cannot give a completion time that has not been confirmed.

13 **Owen:** I understand Nia needs to stay with you. I do not want this written up as though I tried to take her without asking.

14 **Lea:** That is how the [7] _____ should read. It will distinguish your statement, the unverified authority, and the actions actually taken, rather than infer a legal conclusion.

15 **Owen:** Has Rosa actually seen the arrangement yet? I heard her name and thought perhaps she had already agreed that I could collect Nia.

16 **Lea:** Correct. Her availability does not make you an [8] _____ for today. The check still needs to establish the applicable permission, and we should not announce its outcome in advance.

17 **Owen:** If there is a question that you cannot resolve at the collection point, who handles it? I would prefer a clear next step.

18 **Lea:** Rosa will use the appropriate [9] _____ if needed. Any actual safeguarding concern must follow our procedures, while we keep the information accurate and the child supervised.

19 **Owen:** All right. Please ask Rosa to check. I will wait where you direct me while Nia stays with the staff; tell me what information you need.

20 **Lea:** Yes. No [10] _____ has occurred. Rosa is available to check, and we will keep the verification, supervision, and record clear while that happens.

CHECK THE GAPS

1. collection arrangement / **2.** collection authority / **3.** relationship claim / **4.** Identity verification / **5.** confidential information / **6.** supervision / **7.** factual record / **8.** authorized collector / **9.** escalation route / **10.** release

Why these answers fit, page 147

F Check accuracy and scope

A collection request to verify

Return to the case

An unfamiliar adult, Owen, tells educator Lea that he is Nia's uncle and has come instead of the usual collector. Today's collection authority has not been verified. Lead educator Rosa is available to check the arrangement, and Nia has not been released. Owen's statement does not establish his identity, family relationship, legal status, or authority for today. Lea needs to explain the verification step calmly, maintain the actual supervision arrangements, and avoid disclosing private contact details. The scenario does not supply a completed check or permission to release Nia.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. Which information should not be casually read aloud to Owen?

A. The fact that a check is needed
B. The fact that no release has occurred
C. Private family contact details
D. The fact that Rosa is available

2. Which final record fits the supplied facts?

A. Owen's legal authority confirmed and Nia released.
B. Owen committed an offense.
C. Nia approved the collection and waived all checks.
D. Owen stated he was Nia's uncle; authority unverified; Rosa available; no release.

Answers and explanations, page 149

Listen for the distinction

Switch roles. Repeat the identity-check and confidential-contact exchanges without promising release or alleging wrongdoing.

A check is not an accusation

A calm explanation of the process can protect dignity without weakening the boundary. Unfamiliarity alone is not proof of wrongdoing, and a friendly relationship claim is not verified collection authority. Keep the child supervised and use the actual local checking and escalation arrangements.

F Say it / transfer to a new case

Separate a family claim from collection permission

An unfamiliar adult says she is Mia's aunt. Today's collection authority is unverified. Lead educator Noor is available to check. Mia has not been released. No legal document is supplied.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

Noor / unverified / aunt / release

01 **Educator:** The stated relationship is [1] _____.

02 **Colleague:** Today's collection authority is [2] _____.

03 **Educator:** The available lead is [3] _____.

04 **Colleague:** No [4] _____ has occurred.

CHECK THE GAPS

1. aunt / **2.** unverified / **3.** Noor / **4.** release

Why these answers fit, page 149

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "A collection request to verify". Owen: "I understand Nia needs to stay with you. I do not want this written up as though I tried to take her without asking." Lea: [missing response] Owen: "Has Rosa actually seen the arrangement yet? I heard her name and thought perhaps she had already agreed that I could collect Nia." Which response belongs in the gap?

A. That is how the factual record should read. It will distinguish your statement, the unverified authority, and the actions actually taken, rather than infer a legal conclusion.

B. No. We need to verify the collection authority. I am explaining the check, not making an accusation or announcing a decision before the process is complete.

C. Rosa will use the appropriate escalation route if needed. Any actual safeguarding concern must follow our procedures, while we keep the information accurate and the child supervised.

D. I cannot disclose confidential information at the collection point. We will use the appropriate verified contact route and involve Rosa without sharing private details unnecessarily.

Answers and explanations, page 150

Review 4 / Meaning and context

Use language from the lessons you have completed. Choose one answer per question.

> **Case file**
>
> Revisit "Health records and factual incident handovers" and "Collection, confidentiality, and safeguarding communication". Choose precise terminology, then reconstruct the missing responses using both neighboring turns. The final two questions also revisit earlier conversations.

1. A colleague needs the term for this meaning: Update described by a source but not necessarily verified. Which term fits?

A. food intolerance

B. reported change

C. training record

D. health coordinator

2. A colleague needs the term for this meaning: Person proposed to collect instead of the usual person. Which term fits?

A. collection authority

B. access control

C. verified contact route

D. substitute collector

3. Rebuild the exchange from "Pointing is a response". Ben: "Could the preference mean a language delay, or tell us which language Noor uses at home? I have heard colleagues make those assumptions." Amina: [missing response] Ben: "So we should not record a particular home language unless we actually have that information through the proper family and record process." Which response belongs in the gap?

A. Neither follows from this moment. A language difference or concern needs appropriate information, not an inference from one pointing response or from the child's name.

B. No. The response mode matters. We can write that Noor selected a picture by pointing and that no spoken sentence was recorded in that response.

C. That would create an access barrier. We can support the activity through its available options rather than change the participation rule without the appropriate process.

D. The inclusion plan allows picture choices or spoken answers. Noor preferred pointing today and selected a picture, which is an allowed response in this activity.

Review 4 / Meaning and context / continued

4. Rebuild the exchange from "A collection request to verify". Owen: "If there is a question that you cannot resolve at the collection point, who handles it? I would prefer a clear next step." Lea: [missing response] Owen: "All right. Please ask Rosa to check. I will wait where you direct me while Nia stays with the staff; tell me what information you need." Which response belongs in the gap?

A. That is how the factual record should read. It will distinguish your statement, the unverified authority, and the actions actually taken, rather than infer a legal conclusion.

B. I cannot disclose confidential information at the collection point. We will use the appropriate verified contact route and involve Rosa without sharing private details unnecessarily.

C. Rosa will use the appropriate escalation route if needed. Any actual safeguarding concern must follow our procedures, while we keep the information accurate and the child supervised.

D. No. We need to verify the collection authority. I am explaining the check, not making an accusation or announcing a decision before the process is complete.

Answers and explanations, page 158

Language for the next case

Count children, confirm names

headcount

The headcount is eleven in the gathered group, while twelve children are attending; the difference must be reconciled through actual named information.

Ben: Yes. The headcount tells us how many are here, but not whether the right children are here. I will check names against faces while we maintain supervision.

named handover

The handover identifies Tomas and Leena, with direct confirmation of current responsibility; a vague assumption that someone took a child would not establish this.

Ben: Leena has confirmed that Tomas is with her. That is a named handover, not a guess that somebody probably took him inside.

location

Tomas is currently with Leena, not in the eleven-child group; the record must preserve where each child actually is.

Ben: Exactly. Keep location and responsibility accurate. No child is unaccounted for on these confirmed facts, but that does not mean every child has already moved with this group.

supervision plan

The approved supervision plan allocates adult attention and positions during the transition; paperwork and a correct total do not replace that continuous oversight.

Ben: Thank you. Our supervision plan still applies. Before changing the staffing plan, we need to check the required ratios, staff qualifications, and each child's support arrangements.

name-to-face check

A name-to-face check visually matches each child with the relevant name; hearing a reply or reaching the expected total alone is not equivalent.

Ben: That is the name-to-face check we need. Two different children could leave a total unchanged, so the number alone is not a sufficient identity check.

return handover

The return handover establishes that Tomas has actually rejoined the group; the earlier record of Leena taking responsibility did not prove his return.

Ben: Record the return handover as a separate event. Do not prefill it from the earlier bathroom arrangement or assume return because enough time has passed.

Read the phrases aloud. Then complete the conversation on the following pages using the word bank.

Conversation

Count children, confirm names

Fictional transition under the center's approved staffing arrangements: twelve children are attending. Eleven are with Maya and Ben; Tomas is with educator Leena after a documented bathroom handover. Leena confirms his location directly. The group stays supervised while the adults check. Tomas later returns through a confirmed handover. These numbers do not establish a staffing ratio.

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

headcount / supervision plan / location / name-to-face check / return handover / named handover

01 **Maya:** Ben, I have eleven children with the group. Today's attendance list shows twelve. Before we move inside, let us reconcile the names and the separate handover.

02 **Ben:** Yes. The [1] _____ tells us how many are here, but not whether the right children are here. I will check names against faces while we maintain supervision.

03 **Maya:** Tomas is the name not in our gathered group. The handover record says Leena took responsibility for him for the bathroom visit. I need her direct confirmation of his current location.

04 **Ben:** Leena has confirmed that Tomas is with her. That is a [2] _____, not a guess that somebody probably took him inside.

05 **Maya:** So eleven with us and one with Leena accounts for the twelve attending. We should not tick Tomas as standing here just to make our column total twelve.

06 **Ben:** Exactly. Keep [3] _____ and responsibility accurate. No child is unaccounted for on these confirmed facts, but that does not mean every child has already moved with this group.

Conversation / continued

07 **Maya:** While you check the transition record, I will stay positioned with the children as agreed. I will not leave the group to go looking for paperwork.

08 **Ben:** Thank you. Our [4] _____ still applies. Before changing the staffing plan, we need to check the required ratios, staff qualifications, and each child's support arrangements.

09 **Maya:** I can see each child in our group. I will confirm each name with the actual child rather than rely on a child calling out for someone else.

10 **Ben:** That is the [5] _____ we need. Two different children could leave a total unchanged, so the number alone is not a sufficient identity check.

Conversation continues on the next page.

Count children, confirm names

CONVERSATION / CONTINUED

11 **Maya:** For the move, we will use our agreed positions and keep track of the children along the route. The check before departure is not the last check of the transition.

12 **Ben:** Right. We also verify the group at the destination and follow the center's procedure for checking the area left behind. None of that should leave the children without the required oversight.

13 **Maya:** If Leena had not confirmed Tomas's location, we would not simply deduct one and continue because the arithmetic looked tidy.

14 **Ben:** Correct. An unresolved discrepancy needs the immediate center response while supervision is maintained. We would not wait until the end of this conversation or ask the children to search independently.

15 **Maya:** Leena has now completed the return handover. I have matched Tomas by name and face and confirmed that he has rejoined us. We now have all twelve with the group.

16 **Ben:** Record the [6] _____ as a separate event. Do not prefill it from the earlier bathroom arrangement or assume return because enough time has passed.

17 **Maya:** I will update the location record with the actual handover details. The earlier eleven-plus-one arrangement remains part of the sequence, rather than disappearing from the record.

18 **Ben:** Good. Our current group count is twelve, and the names have been matched. We still keep watching, listening, and responding; an accurate record does not supervise the children for us.

19 **Maya:** My read-back: initially eleven with us, Tomas confirmed with Leena; now twelve reunited through the completed return handover. Current supervision responsibilities remain as agreed.

20 **Ben:** Confirmed. We can continue through the actual transition procedure, keeping each child's whereabouts and the receiving adult clear at every change.

CHECK THE GAPS

1. headcount / **2.** named handover / **3.** location / **4.** supervision plan / **5.** name-to-face check / **6.** return handover

Why these answers fit, page 161

A split group is not an assumed absence

Nine children are attending under approved staffing arrangements. Seven are gathered with educators; Leena directly confirms that named children Ava and Ivo are with her in the adjoining care area. Their return handover has not occurred. The group remains supervised.

Complete the exchange using each phrase once. Read both roles, then switch roles and repeat with the bank covered.

WORD AND PHRASE BANK

seven / two / nine / occurred

01 **Educator:** The gathered group contains [1] _____ children.

02 **Colleague:** Leena has confirmed responsibility for [2] _____ children.

03 **Educator:** The two groups account for [3] _____ attending children.

04 **Colleague:** The return handover has not yet [4] _____ .

CHECK THE GAPS

1. seven / **2.** two / **3.** nine / **4.** occurred

Why these answers fit, page 161

> **Keep the distinction audible**
>
> Use a named handover to reconcile a group count without losing continuous supervision.

Language for the next case

Build on the language at home

home language

Urdu is the language Samira reports using with Rafi at home; supporting English does not require abandoning that family language.

Anna: Please keep using your home language in the conversations and stories you enjoy. We can support English here without asking you to replace the language you share naturally.

code-switching

Code-switching means moving between languages within communication; the mixed-language example alone does not establish confusion or a disorder.

Anna: Using languages within the same exchange is often called code-switching. That example alone does not show a disorder. We need to understand the whole language picture, not judge one mixed sentence.

family report

Samira's account supplies information about Urdu use at home; Anna should attribute it to the family rather than record it as her own classroom observation.

Anna: That family report is valuable. I will attribute it to you alongside my classroom observations, not claim I personally heard the Urdu stories.

expressive language

Expressive language conveys meaning; Anna's observed English examples should be recorded specifically rather than replaced by the broad label quiet or a claim of fluent sentences.

Anna: I heard water and more water, and saw him use gestures. Those are specific examples of expressive language in English. They do not describe everything he can understand or communicate across both languages.

expansion

An expansion adds language while preserving the child's meaning; modeling more water does not require withholding the drink until Rafi repeats a prescribed sentence.

Anna: A short expansion can model language without a demand to repeat. For example, more water when that matches his request. Respond to the need rather than withhold the drink for a performance.

review date

Next Friday is the agreed check-in date to review observations and supports, not a deadline by which Rafi must achieve a specified level of English.

Anna: Share the familiar story and check the useful words with us. I will use the supports and record specific responses. Our review date is next Friday, not a fluency deadline.

Read the phrases aloud. Then complete the conversation on the following pages using the word bank.

Conversation

Build on the language at home

Rafi joined the English-speaking preschool three weeks ago. Parent Samira reports sentences and stories in Urdu at home. Educator Anna heard him say water and more water in English and saw him use gestures. No assessment or diagnosis is supplied. They agree familiar-story support and a check-in next Friday, without withholding access to drinks or help.

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

code-switching / expansion / expressive language / family report / review date / home language

01 **Samira:** At home Rafi tells us long stories in Urdu, but I hear he is quiet here. Should we stop using Urdu so he has to practice English?

02 **Anna:** Please keep using your [1] _____ in the conversations and stories you enjoy. We can support English here without asking you to replace the language you share naturally.

03 **Samira:** Sometimes he puts an English word into an Urdu sentence. My relative says that means he is confused. I do not know what to tell them.

04 **Anna:** Using languages within the same exchange is often called [2] _____. That example alone does not show a disorder. We need to understand the whole language picture, not judge one mixed sentence.

05 **Samira:** He retells a familiar story and asks his grandmother questions in Urdu. I do not want that part of his communication missed.

06 **Anna:** That [3] _____ is valuable. I will attribute it to you alongside my classroom observations, not claim I personally heard the Urdu stories.

Conversation / continued

07 **Samira:** What have you actually heard in English? Quiet makes me imagine he has not said anything all day.

08 **Anna:** I heard water and more water, and saw him use gestures. Those are specific examples of [4] _____ in English. They do not describe everything he can understand or communicate across both languages.

09 **Samira:** Could I bring the title of a story he already knows? He might have more to show you if he recognizes what is happening.

10 **Anna:** Yes. Let us use a familiar story and pictures within our activity plan. You can help us check the names and useful Urdu words rather than leave us guessing their meaning or pronunciation.

Conversation continues on the next page.

Build on the language at home

CONVERSATION / CONTINUED

11 **Samira:** I can show you his words for asking for help too. I want him to communicate his needs before he knows a full English sentence.

12 **Anna:** We will accept his available ways of communicating and model useful English. He does not have to produce a sentence to get water or assistance.

13 **Samira:** When he says water, should I make him repeat I would like some water, please, every time? I do not want to turn asking for a drink into a test.

14 **Anna:** A short [5] _____ can model language without a demand to repeat. For example, more water when that matches his request. Respond to the need rather than withhold the drink for a performance.

15 **Samira:** And if you have a real concern about his communication, please tell me specifically. I do not want everything dismissed as just learning English either.

16 **Anna:** Agreed. We will discuss the actual observations, including the languages and situations involved, and use the appropriate assessment or specialist route when needed. Learning English neither proves nor rules out a support need.

17 **Samira:** What should we each do before the next conversation? I want a manageable plan, not a promise that he will speak by a deadline.

18 **Anna:** Share the familiar story and check the useful words with us. I will use the supports and record specific responses. Our [6] _____ is next Friday, not a fluency deadline.

19 **Samira:** That sounds manageable. We will keep enjoying Urdu at home, and I will bring the story details. Please tell me what he communicates, not only how much English he speaks.

20 **Anna:** I will. At the check-in we can compare the specific examples and adjust support together, without turning three weeks in a new setting into a diagnosis or a prediction.

CHECK THE GAPS

1. home language / **2.** code-switching / **3.** family report / **4.** expressive language / **5.** expansion / **6.** review date

Why these answers fit, page 163

Keep two sources visible

Parent Luc reports that Amelie tells stories in French at home. Educator Jo has heard help and my turn in English at preschool. They agree to share a familiar song and review the support on Tuesday. No diagnosis or fluency deadline is supplied.

Complete the exchange using each phrase once. Read both roles, then switch roles and repeat with the bank covered.

WORD AND PHRASE BANK

English / song / French / Tuesday

01 **Parent:** My home-language examples are in [1] _____ .

02 **Educator:** My recorded preschool speech examples are in [2] _____ .

03 **Parent:** We will share a familiar [3] _____ .

04 **Educator:** Our check-in is on [4] _____ .

CHECK THE GAPS

1. French / **2.** English / **3.** song / **4.** Tuesday

Why these answers fit, page 163

Keep the distinction audible

Agree concrete language-support steps with a family while separating observed English from reported home-language skills.

Language for the next case

Preserve the child's words

verbatim quotation

The quotation preserves Kit's actual words; replacing someone with a guessed person's name would add information Kit did not supply.

Ravi: The safeguarding response has begun. Keep that verbatim quotation separate from interpretation. Do not replace someone with a guessed name.

promise of secrecy

A promise of secrecy would conflict with necessary protective information sharing; Nora instead explained that an appropriate person needed to help.

Ravi: That avoids a promise of secrecy. Support the child without guaranteeing outcomes. The incomplete account still needs action.

safeguarding concern

Kit's words raise a safeguarding concern requiring the actual protective response; an incomplete account is not a reason to postpone action until more proof is collected.

Ravi: Keep the safeguarding concern central. Required external notification and emergency action must not wait for a polished form or this conversation.

leading questions

A question suggesting a named person or expected event can shape the account; Nora should not conduct an investigation or supply missing details.

Ravi: Avoid leading questions. Listen, report, and record accurately; do not conduct an investigation or supply missing details yourself.

chronology

Chronology distinguishes when Kit spoke, when Nora alerted Ravi, and when the note was made; those separate events should not be collapsed into one invented timestamp.

Ravi: Yes. The chronology should show the sequence. If a detail is uncertain, identify that uncertainty rather than make the record appear more exact than your knowledge allows.

External reporting

External reporting involves the required notification beyond the setting; Ravi receiving Nora's internal alert does not itself establish that this separate action has occurred.

Ravi: Correct. External reporting must be carried out promptly under the applicable requirements, with the actual action recorded. No internal process overrides a person's own reporting duties.

Read the phrases aloud. Then complete the conversation on the following pages using the word bank.

Conversation

Preserve the child's words

Fictional England setting: Kit reports harm at 14:05. Educator Nora immediately alerts designated safeguarding lead Ravi, who begins the response. Kit stays supported and supervised. This later record review must not delay protective action or required external notification. Kit's exact words follow below.

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

chronology / promise of secrecy / leading questions / verbatim quotation / safeguarding concern / External reporting

01 **Nora:** Following my immediate alert, here is Kit's exact wording at fourteen oh five: I do not want to go home. Someone hurt me.

02 **Ravi:** The safeguarding response has begun. Keep that [1] _____ separate from interpretation. Do not replace someone with a guessed name.

03 **Nora:** I listened, thanked Kit for telling me, and explained that I needed to tell someone who could help. I did not promise secrecy.

04 **Ravi:** That avoids a [2] _____. Support the child without guaranteeing outcomes. The incomplete account still needs action.

05 **Nora:** Kit is supervised by the assigned educator while I report this. I have not left the child alone or asked other children for their versions.

06 **Ravi:** Keep the [3] _____ central. Required external notification and emergency action must not wait for a polished form or this conversation.

Conversation / continued

07 **Nora:** I did not ask, Did your parent do it? Kit had not named anyone. I kept the child's words without trying to establish the full story myself.

08 **Ravi:** Avoid [4] _____. Listen, report, and record accurately; do not conduct an investigation or supply missing details yourself.

09 **Nora:** Should I call the family myself? I normally share the day's events at collection, but this is not a routine update.

10 **Ravi:** Do not independently confront anyone or share details in a way that increases risk. Contact decisions follow the safeguarding response and relevant agency advice.

Conversation continues on the next page.

Preserve the child's words

CONVERSATION / CONTINUED

11 **Nora:** For the time fields, fourteen oh five is when the child spoke. I will record the actual alert time and the later note time separately, without inventing a minute I cannot verify.

12 **Ravi:** Yes. The [5] _____ should show the sequence. If a detail is uncertain, identify that uncertainty rather than make the record appear more exact than your knowledge allows.

13 **Nora:** I will include the words I used in response and the actions I actually took. I will not turn my note into a diagnosis, a finding of guilt, or an explanation of motive.

14 **Ravi:** Exactly. Taking the child seriously and acting promptly does not require you to invent findings. Keep the factual information available to the people responsible for the protective response.

15 **Nora:** The room team needs to know the arrangements that affect care and supervision. Does every colleague need the child's full account in the group message?

16 **Ravi:** No. Use the approved secure route and share with those who need the information for protection and care. Necessary safeguarding sharing is different from circulating private details widely.

17 **Nora:** Your acceptance confirms that you received my concern. It does not, by itself, prove a social-care notification or any other required report has already been completed.

18 **Ravi:** Correct. [6] _____ must be carried out promptly under the applicable requirements, with the actual action recorded. No internal process overrides a person's own reporting duties.

19 **Nora:** If I remain worried that the concern has not been acted on, I should use the appropriate escalation route rather than assume silence means it has been resolved.

20 **Ravi:** Yes. Follow the actual safeguarding and escalation procedures. Keep the child supported, preserve the factual record, and do not delay necessary protective action while waiting for an internal acknowledgement.

CHECK THE GAPS

1. verbatim quotation / **2.** promise of secrecy / **3.** safeguarding concern / **4.** leading questions / **5.** chronology / **6.** External reporting

Why these answers fit, page 165

Separate the report from its interpretation

At 10:12, Jo hears child Ari say, I am scared to go back. Jo immediately alerts safeguarding lead Leena. No person or place is identified by Ari. External notification is not confirmed in the supplied facts; protective action must not wait for this exercise.

Complete the exchange using each phrase once. Read both roles, then switch roles and repeat with the bank covered.

WORD AND PHRASE BANK

exact / confirmed / 10:12 / Leena

01 **Educator:** The child's statement was heard at [1] _____ .

02 **Lead:** Keep the child's [2] _____ wording in the secure record.

03 **Educator:** The named lead who received the alert is [3] _____ .

04 **Lead:** External notification is not yet [4] _____ by these facts.

CHECK THE GAPS

1. 10:12 / **2.** exact / **3.** Leena / **4.** confirmed

Why these answers fit, page 165

Keep the distinction audible

Give an immediate, factual safeguarding report without investigating, promising secrecy, or mistaking an internal handoff for completed external reporting.

01 / Answers and explanations

A / Read the situation

A1. What did Daniel expect?

A. To stay for ten minutes

Daniel expected ten minutes, while the arrival note describes a brief goodbye.

Return to the exercise, page 4

A2. Who can clarify the plan?

D. Rosa, Mina's key educator

Rosa is present and identified as the educator who can clarify the settling-in plan.

Return to the exercise, page 4

A3. What is not established?

A. A fixed departure time and guaranteed emotional response

The case supplies conflicting expectations but not a completed agreement or guaranteed reaction.

Return to the exercise, page 4

D / Response choices

D1. Which opening is most useful?

B. You expected ten minutes; the note says brief goodbye. Let us clarify the plan together.

The opening preserves both sources and invites a practical agreement without blame or a false guarantee.

Return to the exercise, page 8

D2. What should be said about the cloth?

D. Its use follows the center's actual arrangements.

Arrival comfort, sleep safety, and the child's response are separate questions; familiarity does not settle all three.

Return to the exercise, page 8

01 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: Working relationship in which families and educators share relevant knowledge. Which term fits?

A. family partnership

A Correct. family partnership: Working relationship in which families and educators share relevant knowledge. The usual combination is "build a family partnership".

B Not here. consistency: Alignment of actions or messages across people or occasions. The usual combination is "maintain consistency".

C Not here. individual need: Requirement specific to a particular child rather than an assumed group norm. The usual combination is "respond to individual needs".

D Not here. separation: Period or event in which a child and familiar caregiver are apart. The usual combination is "support separation".

Return to the exercise, page 8

D4. Rebuild the exchange from "Agreeing on the goodbye". Daniel: "When staff say brief, do they mean a particular number of minutes? I cannot tell whether ten minutes fits that word or contradicts it." Rosa: [missing response] Daniel: "Yesterday I was told not to rush. This morning the note sounds different. I need to know what to do, and Mina is listening to us." Which response belongs in the gap?

D. A brief goodbye needs a clear meaning in our arrangement. I should not treat that word as though we have already agreed on an exact departure time.

A Not here. This line belongs to turn 2, after Daniel says: "Rosa, I thought I could stay for ten minutes this morning, but the note says a brief goodbye. I do not want Mina hearing two different instructions." It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 10, after Daniel says: "She has brought her familiar cloth. It helps her recognize something from home, but I do not know the center arrangements for using it." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 18, after Daniel says: "And how will I hear how she gets on? I keep checking my phone, but I do not know when I should expect an update." It addresses that point, not the missing turn in the supplied exchange.

D Correct. This is Rosa's response in turn 6. It connects Daniel's preceding point with Daniel's follow-up. A brief goodbye needs a shared practical meaning here; the word alone does not specify a universal number of minutes.

Return to the exercise, page 8

E / Conversation

1. settling-in plan

Turn 2. The settling-in plan is the arrangement being clarified, not a universal rule that automatically resolves the two different expectations.

01 / Answers and explanations / continued

2. key educator

Turn 4. The key educator is Rosa, the present staff member identified to clarify the plan with Daniel and support Mina.

3. brief goodbye

Turn 6. A brief goodbye needs a shared practical meaning here; the word alone does not specify a universal number of minutes.

4. family partnership

Turn 8. Family partnership treats Daniel's information as part of the clarification rather than assigning blame for an unresolved arrival arrangement.

5. comfort item

Turn 10. The comfort item is the familiar cloth; its use depends on actual center and safety arrangements, not an automatic permission for every situation.

6. emotional response

Turn 12. An emotional response cannot be promised in advance; Rosa can support Mina without guaranteeing a specific reaction to separation.

7. arrival routine

Turn 14. The arrival routine is the understandable sequence adults clarify for Mina, not a promise that every morning will feel identical.

8. shared understanding

Turn 16. Shared understanding means the practical agreement is clear to the adults, rather than relying on the unresolved word brief.

9. update arrangement

Turn 18. An update arrangement specifies actual later communication; it must be agreed rather than assumed or offered as an unsupported timing guarantee.

10. consistency

Turn 20. Consistency aligns the adults' messages after clarification, helping Mina receive one coherent plan without an invented departure deadline.

Return to the conversation, page 10

01 / Answers and explanations / continued

F / Accuracy and scope

F1. Why should adults coordinate their wording?

D. To give Mina a calm, consistent message about the clarified plan

Consistent communication supports a clearer transition without making the child resolve an adult disagreement.

Return to the exercise, page 13

F2. Which statement overreaches?

A. Mina will definitely be calm as soon as Daniel leaves.

The facts do not establish or guarantee Mina's future emotional response.

Return to the exercise, page 13

F / Guided speaking

1. five-minute

Ellis: I expected a five-minute stay.

Turn 1. The parent expectation is a five-minute stay, not an agreed revision.

2. immediate handover

Noor: The note says immediate handover.

Turn 2. Immediate handover is the wording in the existing note.

3. Noor

Ellis: The key educator available is Noor.

Turn 3. Noor is the present educator identified to clarify the arrangement.

4. confirmed

Noor: The revised agreement is not yet confirmed.

Turn 4. No revised arrangement has been agreed in the supplied facts.

Return to the conversation, page 14

01 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "Agreeing on the goodbye". Daniel: "Could you be the person she comes to after our goodbye? She knows you now, and I would like to tell her who will be with her." Rosa: [missing response] Daniel: "Will tomorrow's staff see what we agree? I do not want to prepare Mina for one routine and be given a different instruction when we arrive." Which response belongs in the gap?

C. Agreed. A consistent arrival routine should make the next step understandable. Let us clarify the practical handover and use the same message with her.

A Not here. This line belongs to turn 2, after Daniel says: "Rosa, I thought I could stay for ten minutes this morning, but the note says a brief goodbye. I do not want Mina hearing two different instructions." It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 16, after Daniel says: "Will tomorrow's staff see what we agree? I do not want to prepare Mina for one routine and be given a different instruction when we arrive." It addresses that point, not the missing turn in the supplied exchange.

C Correct. This is Rosa's response in turn 14. It connects Daniel's preceding point with Daniel's follow-up. The arrival routine is the understandable sequence adults clarify for Mina, not a promise that every morning will feel identical.

D Not here. This line belongs to turn 20, after Daniel says: "Thank you. My main concern is that Mina gets one calm message and that I understand the plan before being told to leave." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 14

02 / Answers and explanations

A / Read the situation

A1. What does Eva want?

D. A wider bridge

Eva's stated priority is the width of the bridge.

Return to the exercise, page 15

A2. What does Jo want?

D. A taller opening underneath

Jo's stated priority is the height of the opening underneath.

Return to the exercise, page 15

A3. What can the educators suggest?

D. Try two designs using the available blocks.

The brief allows two designs with available blocks but supplies no winner or outcome.

Return to the exercise, page 15

D / Response choices

D1. Which prompt preserves Jo's idea?

D. Show us where you want the taller opening.

The prompt preserves opening height as Jo's priority without supplying a design or ranking.

Return to the exercise, page 19

D2. Which sentence is a leading question?

B. Wouldn't it be better to use my wider design?

The question embeds the adult preferred answer instead of inviting the child's own explanation.

Return to the exercise, page 19

02 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: Invitation allowing a range of relevant responses rather than supplying one answer. Which term fits?

C. open prompt

A Not here. trial: Attempt used to explore how something works. The usual combination is "compare two trials".

B Not here. recasting: Restating a child's message with an adjusted grammatical form while preserving the intended meaning. The usual combination is "use a gentle recast".

C Correct. open prompt: Invitation allowing a range of relevant responses rather than supplying one answer. The usual combination is "use an open prompt".

D Not here. span: Distance bridged between supports. The usual combination is "compare the span".

Return to the exercise, page 19

D4. Rebuild the exchange from "Two bridge ideas". Ben: "For Jo, I could ask where the opening should be taller. I should not translate his request into another version of Eva's idea." Maya: [missing response] Ben: "I caught myself saying, "Wouldn't a wider bridge be better?" That was really my idea in question form. I need to give Jo's opening a fair hearing too." Which response belongs in the gap?

A. Exactly. Use spatial language such as underneath while keeping the idea his. Height of an opening and width of a bridge are different features.

A Correct. This is Maya's response in turn 6. It connects Ben's preceding point with Ben's follow-up. Spatial language identifies the opening underneath the bridge and helps preserve the location relevant to Jo's proposal.

B Not here. This line belongs to turn 10, after Ben says: "We have blocks available for trying two designs. I could suggest that practical option instead of making the children compete for one approved plan." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 4, after Ben says: "I could say, "Eva, show us what you mean by wider." That lets her point or demonstrate rather than requiring a long explanation." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 20, after Ben says: "Then our plan is to hear both intentions, offer two available-block trials, and describe what happens without choosing a winner beforehand." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 19

E / Conversation

1. design intention

Turn 2. Design intention identifies what each child wants the structure to achieve, so the two different priorities can be heard before choosing a trial.

02 / Answers and explanations / continued

2. open prompt

Turn 4. An open prompt invites Eva's meaning through words or demonstration instead of supplying the adult's preferred design.

3. spatial language

Turn 6. Spatial language identifies the opening underneath the bridge and helps preserve the location relevant to Jo's proposal.

4. leading question

Turn 8. A leading question contains an implied preferred answer, here favoring the wider design before the children's ideas are explored.

5. trial

Turn 10. A trial is an attempt to explore a design; proposing two trials does not establish either outcome or a winner.

6. specific feedback

Turn 12. Specific feedback names an observed action or feature, giving useful language without replacing the child's idea with general praise or ranking.

7. Comparative language

Turn 14. Comparative language describes relative qualities such as width and height, not an automatic judgment that one child or design is better.

8. expansion

Turn 16. Expansion adds language to the child's expressed meaning while preserving the intention rather than substituting an adult idea.

9. wait time

Turn 18. Wait time leaves room for processing and response; answering immediately for the children would remove that opportunity.

10. collaborative play

Turn 20. Collaborative play involves shared exploration and coordination, which the two-design comparison supports without a predetermined winner.

Return to the conversation, page 21

02 / Answers and explanations / continued

F / Accuracy and scope

F1. Which comparison is factual in principle?

A. This bridge is wider, while that opening is taller.

Width and opening height can be described separately without ranking children or inventing results.

Return to the exercise, page 23

F2. What is the proposed next action?

C. Try two designs using available blocks.

The stated opportunity is a feasible comparison, not a guaranteed result or predetermined competition.

Return to the exercise, page 23

F / Guided speaking

1. wider

Educator: Ari wants a wider base.

Turn 1. Ari's stated intention concerns the width of the base.

2. taller

Colleague: Bea wants a taller tower.

Turn 2. Bea's stated intention concerns the height of the tower.

3. trials

Educator: We can offer two trials.

Turn 3. The available blocks allow two exploratory trials of the ideas.

4. winner

Colleague: No winner has been chosen.

Turn 4. The facts do not establish a winner before exploration.

Return to the conversation, page 24

02 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "Two bridge ideas". Ben: "I can also model wider and taller while pointing to the appropriate dimension. I should not use taller as another word for better." Maya: [missing response] Ben: "If Eva says, "More space here," I might say, "You want more space across the bridge," while checking that I have kept her meaning." Which response belongs in the gap?

B. Right. Comparative language helps describe the structures. It should not quietly become a ranking of the children or an unsupported claim about strength.

A Not here. This line belongs to turn 6, after Ben says: "For Jo, I could ask where the opening should be taller. I should not translate his request into another version of Eva's idea." It addresses that point, not the missing turn in the supplied exchange.

B Correct. This is Maya's response in turn 14. It connects Ben's preceding point with Ben's follow-up. Comparative language describes relative qualities such as width and height, not an automatic judgment that one child or design is better.

C Not here. This line belongs to turn 10, after Ben says: "We have blocks available for trying two designs. I could suggest that practical option instead of making the children compete for one approved plan." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 20, after Ben says: "Then our plan is to hear both intentions, offer two available-block trials, and describe what happens without choosing a winner beforehand." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 24

03 / Answers and explanations

A / Read the situation

A1. Which timing statement is supplied by the arrangement?

C. Story time begins in five minutes.

Five minutes is the warning before story time, not a return promise or an extension triggered by the finishing choice.

Return to the exercise, page 27

A2. What can remain on the marked shelf?

C. Luca's structure under the current arrangement

The current arrangement specifically permits the structure to remain on the marked shelf.

Return to the exercise, page 27

A3. What do the two choices concern?

A. How Luca finishes before the transition

The last block or permitted photograph supports finishing within the existing boundary.

Return to the exercise, page 27

D / Response choices

D1. Which child-facing message matches the arrangement?

A. Story time is in five minutes; choose the last block or a permitted photograph before we move.

The message combines the supplied warning, available finishing choices, and actual transition boundary.

Return to the exercise, page 31

D2. Which statement about the structure is supported?

B. It can remain on the marked shelf under the current arrangement.

The brief permits the marked shelf but does not create unlimited storage or safety permission.

Return to the exercise, page 31

03 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: Sequence of activities represented through pictures or other visual supports. Which term fits?

C. visual schedule

A Not here. return expectation: Belief about when a person can resume an activity. The usual combination is "clarify the return expectation".

B Not here. last step: Final action before moving to the next part of a routine. The usual combination is "name the last step".

C Correct. visual schedule: Sequence of activities represented through pictures or other visual supports. The usual combination is "refer to the visual schedule".

D Not here. negotiable detail: Aspect of a plan that can genuinely be chosen or changed. The usual combination is "identify the negotiable detail".

Return to the exercise, page 31

D4. Rebuild the exchange from "Five minutes to story time". Ben: "I can say, "You can add the last block, or I can take a photo using our center's camera." I will check our photo arrangements first." Nora: [missing response] Ben: "I should avoid saying, "Do you want to go to story time?" if I am not actually offering the possibility of staying here instead." Which response belongs in the gap?

C. That is a bounded choice. Both options concern how to finish. Neither means the group waits indefinitely or that story time becomes optional.

A Not here. This line belongs to turn 10, after Ben says: "I could say, "First the last step, then story time." That gives him a short sequence rather than several instructions in one breath." It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 20, after Ben says: "Then the message is five minutes, one of the two finishing choices, structure on the marked shelf, and a clear move to story time." It addresses that point, not the missing turn in the supplied exchange.

C Correct. This is Nora's response in turn 6. It connects Ben's preceding point with Ben's follow-up. A bounded choice offers two genuinely available ways to finish while the move to story time remains fixed.

D Not here. This line belongs to turn 16, after Ben says: "If he is still looking at the tower, I will pause and keep the choices the same. Repeating them faster is not helping him finish." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 31

E / Conversation

1. advance warning

Turn 2. Advance warning tells Luca about the five-minute change before it occurs, supporting preparation rather than a sudden instruction.

03 / Answers and explanations / continued

2. preserved work

Turn 4. Preserved work means the structure can remain under the current arrangement; it does not imply unlimited play or a promised return time.

3. bounded choice

Turn 6. A bounded choice offers two genuinely available ways to finish while the move to story time remains fixed.

4. nonnegotiable boundary

Turn 8. The nonnegotiable boundary is the move to story time, distinct from Luca's available choice of a finishing action.

5. first-then language

Turn 10. First-then language makes the sequence explicit: the finishing step precedes the move to the next activity.

6. photography permission

Turn 12. Photography permission and the center's actual arrangements govern the image; a helpful transition idea does not authorize any device or use.

7. return expectation

Turn 14. The return expectation must not include an invented time; preserving the structure does not establish when building will resume.

8. processing time

Turn 16. Processing time lets Luca understand and respond to the available choices rather than face a changing or rushed instruction.

9. Supervision continuity

Turn 18. Supervision continuity keeps appropriate adult oversight in place through the transition; the child does not assume that responsibility.

10. consistent cue

Turn 20. A consistent cue aligns the adults' transition message so Luca hears the same sequence and available choices.

Return to the conversation, page 33

03 / Answers and explanations / continued

F / Accuracy and scope

F1. Which photography action is inappropriate?

D. Use an unapproved personal phone because the picture would help.

A transition benefit does not authorize an unapproved device or override image-handling requirements.

Return to the exercise, page 35

F2. What should remain with the adults?

B. Responsibility for supervision during the transition

Giving choices does not transfer supervision responsibility from staff to the child.

Return to the exercise, page 35

F / Guided speaking

1. three

Educator: Music begins in three minutes.

Turn 1. The scenario gives a three-minute warning before music begins.

2. tray

Ari: My drawing can stay in the named tray.

Turn 2. The permitted storage location is the named tray.

3. line

Educator: You can add one final line.

Turn 3. Adding one final line is one of the available finishing choices.

4. label

Ari: Or I can ask you to label the work.

Turn 4. Asking the educator to label the work is the second supplied choice.

Return to the conversation, page 36

03 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "Five minutes to story time". Ben: "I will also avoid promising that Luca can return immediately after the story. We have permission to preserve the structure, not a supplied return slot." Nora: [missing response] Ben: "If he is still looking at the tower, I will pause and keep the choices the same. Repeating them faster is not helping him finish." Which response belongs in the gap?

A. Correct. Keep the return expectation accurate. We can explain what stays without inventing when the next building opportunity will happen.

A Correct. This is Nora's response in turn 14. It connects Ben's preceding point with Ben's follow-up. The return expectation must not include an invented time; preserving the structure does not establish when building will resume.

B Not here. This line belongs to turn 6, after Ben says: "I can say, "You can add the last block, or I can take a photo using our center's camera." I will check our photo arrangements first." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 4, after Ben says: "That could help. He has put effort into it, so moving on does not need to sound as though the work is being thrown away." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 16, after Ben says: "If he is still looking at the tower, I will pause and keep the choices the same. Repeating them faster is not helping him finish." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 36

04 / Answers and explanations

A / Read the situation

A1. What did Sora directly observe?

A. Ari holding the large scoop, then Bea reaching toward it

Only the holding and reaching sequence is observed; motives and outcomes are not established.

Return to the exercise, page 37

A2. What does Ari want to finish?

B. One container

Ari's stated finishing point is one container, not an unlimited period.

Return to the exercise, page 37

A3. Which additional resource is available?

B. A smaller scoop

The brief provides a smaller scoop, which may be offered without pretending it is identical.

Return to the exercise, page 37

D / Response choices

D1. Which account avoids an unsupported motive?

B. Ari held the large scoop; Bea then reached toward it.

The correct account preserves the observed sequence without adding intention or a fixed label.

Return to the exercise, page 41

D2. Which proposal uses the supplied facts?

A. Ari finishes one container, then Bea has the next supported turn; the smaller scoop is available meanwhile.

The proposal uses the stated finishing point, next-turn request, and actual alternative without inventing resources or timing.

Return to the exercise, page 41

04 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: Account of observable events without adding blame or guessed motive. Which term fits?

D. neutral description

A Not here. waiting option: Available activity or resource during a wait. The usual combination is "offer a waiting option".

B Not here. reciprocity: Mutual responsiveness in an interaction. The usual combination is "encourage reciprocity".

C Not here. calm boundary: Clear limit expressed without shaming or escalating the exchange. The usual combination is "state a calm boundary".

D Correct. neutral description: Account of observable events without adding blame or guessed motive. The usual combination is "use a neutral description".

Return to the exercise, page 41

D4. Rebuild the exchange from "One large scoop". Leon: "What are they asking for now? If Ari has nearly finished something, we may be able to make the next turn clearer than just saying share." Sora: [missing response] Leon: "We could say, "Ari is using the large scoop now. Bea wants it next." That names the situation without saying one child is bad for wanting it." Which response belongs in the gap?

C. Ari wants to finish one container. Bea wants the large scoop next. That gives us a possible finishing point and a next-turn request to work with.

A Not here. This line belongs to turn 2, after Leon says: "Sora, what happened with the large scoop? I heard a disagreement, but I did not see how it began and do not want to repeat the wrong story." It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 10, after Leon says: "I can offer the smaller scoop while Bea waits. I will say it is smaller; telling Bea it is just the same would ignore what she wants." It addresses that point, not the missing turn in the supplied exchange.

C Correct. This is Sora's response in turn 6. It connects Leon's preceding point with Leon's follow-up. The finishing point is one container, a specific stated limit rather than unlimited use or an invented number of minutes.

D Not here. This line belongs to turn 4, after Leon says: "Then describing Bea as deliberately upsetting Ari would add something we did not establish. We can describe the reach without attaching that explanation." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 41

E / Conversation

1. observed sequence

Turn 2. The observed sequence is Ari holding the large scoop followed by Bea reaching toward it; it does not establish a motive.

04 / Answers and explanations / continued

2. inferred motive

Turn 4. An inferred motive is an assumed reason for the behavior, unlike the directly observed holding and reaching.

3. finishing point

Turn 6. The finishing point is one container, a specific stated limit rather than unlimited use or an invented number of minutes.

4. neutral description

Turn 8. A neutral description names current use and the next request without judging the children or claiming to know their intentions.

5. alternative resource

Turn 10. The alternative resource is the smaller scoop, which can be offered honestly without claiming it is an identical replacement.

6. emotional validation

Turn 12. Emotional validation acknowledges the wish or feeling while allowing adults to maintain a clear boundary and support appropriate access.

7. turn-taking

Turn 14. Turn-taking organizes access through an understandable sequence rather than a vague instruction to share or an unlimited possession claim.

8. next turn

Turn 16. The next turn follows the supplied finishing point, not an invented time limit or a guaranteed immediate transfer.

9. co-regulation

Turn 18. Co-regulation combines supportive adult interaction and clear structure while the child develops ways to manage the disagreement.

10. agreement check

Turn 20. An agreement check establishes whether the proposed sequence has been understood or accepted rather than assuming completion from an adult announcement.

Return to the conversation, page 43

04 / Answers and explanations / continued

F / Accuracy and scope

F1. What does emotional validation mean here?

D. Acknowledge wanting the scoop without approving every action used to obtain it.

Acknowledging the wish can coexist with boundaries and practical support for access.

Return to the exercise, page 45

F2. What remains necessary after proposing the sequence?

B. Support understanding and remain responsive to the actual interaction.

A proposed sequence does not prove acceptance or remove the need for adult support.

Return to the exercise, page 45

F / Guided speaking

1. red

Educator: Noor is using the red truck.

Turn 1. The red truck is the object currently being used.

2. route

Colleague: The finishing point is one route.

Turn 2. Noor's stated finishing point is one route, not unlimited time.

3. blue

Educator: A blue truck is available meanwhile.

Turn 3. The available alternative is a blue truck, not another red one.

4. unknown

Colleague: The motive for reaching is unknown.

Turn 4. The observation establishes reaching but not the reason for it.

Return to the conversation, page 46

04 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "One large scoop". Leon: "That is more useful than simply saying share over and over. It describes what happens now, what ends the current use, and what comes afterward." Sora: [missing response] Leon: "We should not add a ten-minute wait or an exact timer rule, because neither is part of the arrangement we have described." Which response belongs in the gap?

C. A concrete turn-taking sequence can help. We still need to support both children in understanding it rather than assume one sentence settles everything.

A Not here. This line belongs to turn 8, after Leon says: "We could say, "Ari is using the large scoop now. Bea wants it next." That names the situation without saying one child is bad for wanting it." It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 12, after Leon says: "How do we acknowledge the wish without suggesting that reaching for whatever you want always gets you immediate access?" It addresses that point, not the missing turn in the supplied exchange.

C Correct. This is Sora's response in turn 14. It connects Leon's preceding point with Leon's follow-up. Turn-taking organizes access through an understandable sequence rather than a vague instruction to share or an unlimited possession claim.

D Not here. This line belongs to turn 2, after Leon says: "Sora, what happened with the large scoop? I heard a disagreement, but I did not see how it began and do not want to repeat the wrong story." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 46

05 / Answers and explanations

A / Read the situation

A1. What did Rosa observe?

B. Eli sorting four buttons by color during a supervised activity

The observed action involves four buttons and color sorting, not a comparative assessment.

Return to the exercise, page 49

A2. Which words belong inside quotation marks in Rosa's note?

B. These go together.

Only These go together was heard; the other sentences add wording or skills that Rosa did not record.

Return to the exercise, page 49

A3. What evidence is missing for the parent's claim?

B. Appropriate comparison data and broader assessment

A universal age-peer ranking requires evidence that this single observation does not provide.

Return to the exercise, page 49

D / Response choices

D1. Which message is both warm and accurate?

A. Eli grouped four buttons by color and said, "These go together"; I wanted to share that moment.

The message celebrates the specific observed action and quotation without a broader unsupported ranking.

Return to the exercise, page 54

D2. Which skill is not established just by the described sorting?

B. Counting the four objects accurately

Four objects being present does not prove that Eli counted them or understood cardinality.

Return to the exercise, page 54

05 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: Circumstances in which an event or response occurred. Which term fits?

B. context

A Not here. formative assessment: Information used during learning to guide support and next steps. The usual combination is "use formative assessment".

B Correct. context: Circumstances in which an event or response occurred. The usual combination is "record the context".

C Not here. attribute: Observable feature such as color, shape, or size. The usual combination is "name an attribute".

D Not here. criterion-referenced measure: Assessment interpreted against specified criteria rather than a peer ranking alone. The usual combination is "use a criterion-referenced measure".

Return to the exercise, page 54

D4. Rebuild the exchange from "Celebrate the observation". Andre: "He will be pleased you noticed. When I ask how his day went, I usually get one word. This gives me something specific to talk about with him." Rosa: [missing response] Andre: "Four buttons sounds like counting practice too. Did he actually count them aloud, or was he just putting matching colors together?" Which response belongs in the gap?

A. Exactly. A strength-based description can celebrate what happened without adding a ranking. I do not need to overstate it to say it was worth noticing.

A Correct. This is Rosa's response in turn 6. It connects Andre's preceding point with Andre's follow-up. A strength-based description recognizes Eli's observed capability without exaggerating it into an unsupported peer comparison.

B Not here. This line belongs to turn 14, after Andre says: "Did he really say, "These go together"? I would like to remember his own words. That sounds just like something he would say at home." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 2, after Andre says: "Rosa, you mentioned that Eli sorted buttons today. Does that mean he is ahead of every other child his age? He seems very quick with things at home." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 12, after Andre says: "I see. His cousin did something similar later, so I started comparing them. That is probably not enough to say where Eli stands with children his age." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 54

E / Conversation

1. observation record

Turn 2. The observation record describes today's event, not Eli's rank among all same-age children.

05 / Answers and explanations / continued

2. sorting criterion

Turn 4. The sorting criterion was color, the feature Eli used to group the buttons in the observed activity.

3. strength-based description

Turn 6. A strength-based description recognizes Eli's observed capability without exaggerating it into an unsupported peer comparison.

4. Classification

Turn 8. Classification groups items by a shared feature; it does not establish counting or understanding quantity.

5. Developmental screening

Turn 10. Developmental screening identifies possible evaluation needs through a structured process, unlike this single observation.

6. comparison group

Turn 12. A comparison group provides a basis for comparative interpretation, which is absent from the parent's universal ranking claim.

7. verbatim quotation

Turn 14. A verbatim quotation retains Eli's exact words, not a more elaborate invented statement.

8. context

Turn 16. Context preserves each event's setting; the family's home report remains distinct from Rosa's observation.

9. developmental domains

Turn 18. Developmental domains concern different areas of development; one sorting observation cannot establish performance across them.

10. anecdotal note

Turn 20. An anecdotal note preserves an event's action, words, and context without claiming a full developmental assessment.

Return to the conversation, page 56

05 / Answers and explanations / continued

F / Accuracy and scope

F1. What would a precise note include?

B. Action, exact words where quoted, context, and observation date

These details preserve the evidence so it can be understood in its actual context.

Return to the exercise, page 58

F2. How should a home example be handled?

D. Keep it attributed to the family and distinct from Rosa's observation.

Family information can be useful while its source remains accurately identified.

Return to the exercise, page 58

F / Guided speaking

1. shape

Noor: The grouping feature was shape.

Turn 1. The observed grouping criterion is shape rather than color.

2. three

Parent: There were three large shapes.

Turn 2. Three is the number of objects supplied in the activity.

3. same

Noor: Ari said, These are the same.

Turn 3. Same completes the exact quotation supplied in the brief.

4. comparison

Parent: No peer comparison is established.

Turn 4. The observation supplies no evidence for a peer ranking.

Return to the conversation, page 59

05 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "Celebrate the observation". Andre: "Did he really say, "These go together"? I would like to remember his own words. That sounds just like something he would say at home." Rosa: [missing response] Andre: "At home I have seen him put similar objects together too. Is that useful to tell you, even if it is not a formal assessment?" Which response belongs in the gap?

A. I will preserve the verbatim quotation when quoting him. If I paraphrase elsewhere, I should make that clear rather than put new words into his mouth.

A Correct. This is Rosa's response in turn 14. It connects Andre's preceding point with Andre's follow-up. A verbatim quotation retains Eli's exact words, not a more elaborate invented statement.

B Not here. This line belongs to turn 2, after Andre says: "Rosa, you mentioned that Eli sorted buttons today. Does that mean he is ahead of every other child his age? He seems very quick with things at home." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 16, after Andre says: "At home I have seen him put similar objects together too. Is that useful to tell you, even if it is not a formal assessment?" It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 12, after Andre says: "I see. His cousin did something similar later, so I started comparing them. That is probably not enough to say where Eli stands with children his age." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 59

06 / Answers and explanations

A / Read the situation

A1. Which response formats does the plan allow?

A. Picture choices or spoken answers

Noor's current plan explicitly allows both picture choices and spoken answers.

Return to the exercise, page 60

A2. What does Noor prefer today?

B. Pointing

The stated preference is pointing, not an inferred reason or diagnosis.

Return to the exercise, page 60

A3. What should the team avoid claiming?

D. That pointing supplies identical evidence to a spoken sentence

Different formats can support participation while providing different evidence of expressive spoken language.

Return to the exercise, page 60

D / Response choices

D1. Which note is most accurate?

B. Noor participated by selecting a picture through pointing; no spoken sentence was recorded.

The note preserves the permitted participation and the actual response mode without inventing speech or diagnosis.

Return to the exercise, page 65

D2. Which action conflicts with the current plan?

B. Require spoken answers as the only way to count participation.

The plan allows picture choices, so an unannounced speech-only rule removes a permitted route.

Return to the exercise, page 65

06 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: Way a person answers or communicates in an activity. Which term fits?

D. response mode

A Not here. AAC: Augmentative and alternative communication: tools and strategies supporting communication. The usual combination is "follow the AAC plan".

B Not here. receptive language: Understanding of language received through listening, reading, or other input. The usual combination is "distinguish receptive language".

C Not here. family language information: Details families share about language use and communication. The usual combination is "gather family language information".

D Correct. response mode: Way a person answers or communicates in an activity. The usual combination is "record the response mode".

Return to the exercise, page 65

D4. Rebuild the exchange from "Pointing is a response". Ben: "Does that mean we should describe pointing as exactly the same evidence as a spoken answer? I do not want our notes to lose the difference." Amina: [missing response] Ben: "I will change my note from no response to selected a picture by pointing. That is what I saw; I did not hear a sentence." Which response belongs in the gap?

A. No. The response mode matters. We can write that Noor selected a picture by pointing and that no spoken sentence was recorded in that response.

A Correct. This is Amina's response in turn 6. It connects Ben's preceding point with Ben's follow-up. The response mode records how Noor answered, preserving pointing as distinct from a spoken sentence.

B Not here. This line belongs to turn 2, after Ben says: "Noor did not give a spoken answer in the story group. I was going to mark that as not participating, but you seem to have recorded a response." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 14, after Ben says: "If I insist on a spoken sentence before Noor can count as taking part, I would be removing one of the routes the plan currently allows." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 10, after Ben says: "Could the preference mean a language delay, or tell us which language Noor uses at home? I have heard colleagues make those assumptions." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 65

E / Conversation

1. inclusion plan

Turn 2. The inclusion plan explicitly permits picture choices or spoken answers, so speech is not the only allowed participation route.

06 / Answers and explanations / continued

2. participation

Turn 4. Participation means taking part through an appropriate available form; here a permitted pointing response can count without spoken language.

3. response mode

Turn 6. The response mode records how Noor answered, preserving pointing as distinct from a spoken sentence.

4. evidence limit

Turn 8. The evidence limit prevents an allowed pointing response from being treated as proof of spoken-language production that did not occur.

5. language difference

Turn 10. A language difference and a developmental concern require appropriate contextual information; Noor's single pointing preference establishes neither.

6. Family language information

Turn 12. Family language information comes from appropriate sources and retains its context; it cannot be invented from a response preference or name.

7. access barrier

Turn 14. An access barrier would arise from excluding the picture-choice route that Noor's plan currently permits for this activity.

8. expressive language

Turn 16. Expressive language concerns conveying meaning; the record must identify the actual form rather than invent a spoken sentence or erase other communication.

9. visual support

Turn 18. Visual support must be usable within the activity; merely listing picture choices in a plan does not make them practically accessible.

10. equitable opportunity

Turn 20. Equitable opportunity can involve different supports while preserving accurate evidence about how each child participated.

Return to the conversation, page 67

06 / Answers and explanations / continued

F / Accuracy and scope

F1. What can be inferred about the home language?

D. Nothing specific from the supplied pointing preference alone

The case supplies no home-language profile, and a single response does not establish one.

Return to the exercise, page 69

F2. Which distinction matters?

B. Participation can be valid while evidence of spoken-language production remains limited.

Inclusive access and precise assessment can coexist without false equivalence between response modes.

Return to the exercise, page 69

F / Guided speaking

1. picture

Educator: The selected response used a picture.

Turn 1. Ari selected a picture under the current permitted arrangement.

2. recorded

Colleague: A spoken answer was not recorded.

Turn 2. No spoken answer is supplied in this observation.

3. plan

Educator: The choice was allowed by the current plan.

Turn 3. The plan permits either the spoken or picture response.

4. unspecified

Colleague: The home-language profile remains unspecified.

Turn 4. No home-language information is supplied by this particular observation.

Return to the conversation, page 70

06 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "Pointing is a response". Ben: "If I insist on a spoken sentence before Noor can count as taking part, I would be removing one of the routes the plan currently allows." Amina: [missing response] Ben: "We still need to notice how children use language over time. Recognizing pointing should not mean we stop describing the language we actually hear." Which response belongs in the gap?

A. That would create an access barrier. We can support the activity through its available options rather than change the participation rule without the appropriate process.

A Correct. This is Amina's response in turn 14. It connects Ben's preceding point with Ben's follow-up. An access barrier would arise from excluding the picture-choice route that Noor's plan currently permits for this activity.

B Not here. This line belongs to turn 6, after Ben says: "Does that mean we should describe pointing as exactly the same evidence as a spoken answer? I do not want our notes to lose the difference." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 2, after Ben says: "Noor did not give a spoken answer in the story group. I was going to mark that as not participating, but you seem to have recorded a response." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 10, after Ben says: "Could the preference mean a language delay, or tell us which language Noor uses at home? I have heard colleagues make those assumptions." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 70

07 / Answers and explanations

A / Read the situation

A1. What does Morgan report?

C. The allergy plan may have changed.

The report concerns a possible plan change, not a completed revision or an exposure.

Return to the exercise, page 73

A2. Which status is established when Amira accepts the document query?

D. The question has a named receiving owner.

Amira accepts ownership of the query; verification, version replacement, and staff communication are not yet established.

Return to the exercise, page 73

A3. What remains unavailable?

C. The revised document

No revised document is supplied, so its contents cannot be treated as verified.

Return to the exercise, page 73

D / Response choices

D1. Which handoff is accurate?

D. Parent reports a possible plan change; earlier plan held; revision unavailable; Amira accepts the query.

The handoff preserves the report, document gap, and receiving owner without inventing a care event or completion.

Return to the exercise, page 77

D2. What does Amira accepting the query establish?

A. The document question has a receiving owner.

Acceptance assigns the query but does not complete all subsequent verification and communication.

Return to the exercise, page 77

07 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: Updated version confirmed through the appropriate process. Which term fits?

B. verified revision

A Not here. allergic reaction: Immune response to an allergen that may require appropriate medical action. The usual combination is "recognize an allergic reaction".

B Correct. verified revision: Updated version confirmed through the appropriate process. The usual combination is "obtain a verified revision".

C Not here. staff briefing: Sharing of relevant information with staff through an appropriate process. The usual combination is "document the staff briefing".

D Not here. parent report: Information attributed to a child's parent or carer. The usual combination is "preserve the parent report".

Return to the exercise, page 77

D4. Rebuild the exchange from "A reported allergy-plan change". Morgan: "I need to check the new paperwork myself. Please do not take what I am saying as a complete set of replacement instructions." Rosa: [missing response] Morgan: "Who will check which version should apply? I need to know this has reached someone responsible, rather than become a general note no one owns." Which response belongs in the gap?

B. I will preserve that parent report accurately. The record should not turn may have changed into a completed update or a treatment instruction you did not provide.

A Not here. This line belongs to turn 2, after Morgan says: "Rosa, I need to tell you that Theo's allergy plan may have changed. I do not have the revised document with me, but I do not want this overlooked." It addresses that point, not the missing turn in the supplied exchange.

B Correct. This is Rosa's response in turn 6. It connects Morgan's preceding point with Morgan's follow-up. The parent report must retain Morgan's wording and uncertainty rather than become a confirmed new clinical instruction.

C Not here. This line belongs to turn 4, after Morgan says: "Does the fact that you still have the old document mean staff will simply assume nothing has changed? That is what I am concerned about." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 8, after Morgan says: "Who will check which version should apply? I need to know this has reached someone responsible, rather than become a general note no one owns." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 77

E / Conversation

1. reported change

Turn 2. The reported change preserves Morgan's information as a possible update, not as a verified revision or an irrelevant comment.

07 / Answers and explanations / continued

2. unresolved query

Turn 4. The unresolved query concerns the possible change and missing revision; holding an earlier document does not settle its implications.

3. parent report

Turn 6. The parent report must retain Morgan's wording and uncertainty rather than become a confirmed new clinical instruction.

4. health coordinator

Turn 8. The health coordinator is the named receiving owner who is present and has accepted this document question.

5. incident record

Turn 10. An incident record must contain actual reported or observed events; this conversation does not supply an exposure, reaction, or treatment.

6. document control

Turn 12. Document control preserves the status and version of the available plan and the unresolved revision, rather than silently substituting an assumed update.

7. verified revision

Turn 14. A verified revision requires the appropriate source and process; rewriting from memory would not establish an authorized update.

8. handoff acknowledgment

Turn 16. Handoff acknowledgment confirms Amira accepted the question, not that the revised plan or staff communication is complete.

9. staff briefing

Turn 18. A staff briefing must actually occur through the appropriate process before being recorded as completed; it is not implied by the first handoff.

10. allergy action plan

Turn 20. The allergy action plan requires appropriate verification of its applicable instructions; this conversation establishes the query and handoff, not a replacement plan.

Return to the conversation, page 79

07 / Answers and explanations / continued

F / Accuracy and scope

F1. Which statement is unsafe as a general inference?

D. No revised paper means the reported concern can be ignored.

A missing document does not remove the need to address a reported health concern through the appropriate process.

Return to the exercise, page 82

F2. What should not be added to the incident record for this case?

A. An invented exposure, symptom, or treatment

The case explicitly supplies no exposure, symptoms, or treatment event, so recording one would be false.

Return to the exercise, page 82

F / Guided speaking

1. unavailable

Educator: The revised document is unavailable.

Turn 1. The revised version has not been supplied in this scenario.

2. held

Parent: The earlier document is still held.

Turn 2. The center still holds the earlier document, not a verified replacement.

3. Noor

Educator: The receiving coordinator is Noor.

Turn 3. Noor explicitly accepts this document query as the receiving owner.

4. symptoms

Parent: No symptoms were reported in this conversation.

Turn 4. The scenario supplies no symptom report and none should be invented.

Return to the conversation, page 83

07 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "A reported allergy-plan change". Morgan: "I can try to get the document through the approved route. Until then, I would rather the team ask Amira than piece together instructions from my memory." Rosa: [missing response] Morgan: "Once I speak with Amira, will she confirm what still needs doing? I do not want to leave believing the plan has been checked if it has not." Which response belongs in the gap?

D. Agreed. A verified revision cannot be created by guessing. We must use the real source and authorization process, including any required communication to the people who need it.

A Not here. This line belongs to turn 8, after Morgan says: "Who will check which version should apply? I need to know this has reached someone responsible, rather than become a general note no one owns." It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 4, after Morgan says: "Does the fact that you still have the old document mean staff will simply assume nothing has changed? That is what I am concerned about." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 2, after Morgan says: "Rosa, I need to tell you that Theo's allergy plan may have changed. I do not have the revised document with me, but I do not want this overlooked." It addresses that point, not the missing turn in the supplied exchange.

D Correct. This is Rosa's response in turn 14. It connects Morgan's preceding point with Morgan's follow-up. A verified revision requires the appropriate source and process; rewriting from memory would not establish an authorized update.

Return to the exercise, page 83

08 / Answers and explanations

A / Read the situation

A1. What does Owen state?

A. He is Nia's uncle and has come to collect her.

Owen states a relationship and purpose, but neither has been verified in this conversation.

Return to the exercise, page 84

A2. What is Nia's current status?

D. She has not been released.

The brief explicitly says Nia has not been released.

Return to the exercise, page 84

A3. Who is available to check the arrangement?

D. Lead educator Rosa

Rosa is the available lead educator for checking the arrangement.

Return to the exercise, page 84

D / Response choices

D1. Which opening is respectful and accurate?

A. Hello. Let me check today's collection arrangement with Rosa.

The opening preserves today's authorization check; recognition, identity, and a sign-out entry cannot replace it.

Return to the exercise, page 88

D2. What would confirming identity alone establish?

D. Who the person is, not necessarily today's collection authority

Identity verification does not by itself establish the separate authorization or legal questions.

Return to the exercise, page 88

08 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: Process of checking that someone is who they say they are. Which term fits?

D. identity verification

A Not here. release: Transfer of a child into the care of an appropriately authorized person. The usual combination is "authorize release".

B Not here. legal restriction: Applicable legal limit that must be checked through the proper process. The usual combination is "verify a legal restriction".

C Not here. designated lead: Named person with responsibility for a specified area or process. The usual combination is "consult the designated lead".

D Correct. identity verification: Process of checking that someone is who they say they are. The usual combination is "complete identity verification".

Return to the exercise, page 88

D4. Rebuild the exchange from "A collection request to verify". Owen: "I have told you I am her uncle. Surely that explains why I am here, even if you have not seen me at collection before." Lea: [missing response] Owen: "I have identification with me. Would showing that be enough, or do you also need to confirm that I am collecting today?" Which response belongs in the gap?

B. I will record that relationship claim accurately. A stated family relationship does not, by itself, confirm identity or permission for today's collection.

A Not here. This line belongs to turn 2, after Owen says: "Hello. I am Nia's uncle. I have come instead of the person who usually collects her, and I would like to take her home." It addresses that point, not the missing turn in the supplied exchange.

B Correct. This is Lea's response in turn 6. It connects Owen's preceding point with Owen's follow-up. The relationship claim is attributed to Owen; it does not independently verify identity, legal status, or permission to collect.

C Not here. This line belongs to turn 20, after Owen says: "All right. Please ask Rosa to check. I will wait where you direct me while Nia stays with the staff; tell me what information you need." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 8, after Owen says: "I have identification with me. Would showing that be enough, or do you also need to confirm that I am collecting today?" It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 88

E / Conversation

1. collection arrangement

Turn 2. The collection arrangement must be checked through the actual process; Owen's stated relationship does not establish today's permission.

08 / Answers and explanations / continued

2. collection authority

Turn 4. Collection authority concerns permission for this collection; unfamiliarity is not itself a completed decision or accusation.

3. relationship claim

Turn 6. The relationship claim is attributed to Owen; it does not independently verify identity, legal status, or permission to collect.

4. Identity verification

Turn 8. Identity verification establishes who someone is through the appropriate process, not every separate question of collection authorization.

5. confidential information

Turn 10. Confidential information must be protected; an unverified collection request does not justify reading private family contacts aloud.

6. supervision

Turn 12. Supervision remains with the setting while the collection authority is unverified; waiting outside with Owen would bypass that boundary.

7. factual record

Turn 14. The factual record distinguishes Owen's statement, unverified authority, and actual actions without inventing a release or wrongdoing.

8. authorized collector

Turn 16. An authorized collector has applicable permission confirmed through the proper process; the lead educator's availability alone establishes no approval.

9. escalation route

Turn 18. The escalation route sends an unresolved concern to the responsible people under the setting's actual procedures, not an invented universal rule.

10. release

Turn 20. Release means the authorized transfer of the child; none has occurred while today's collection authority remains unverified.

Return to the conversation, page 90

08 / Answers and explanations / continued

F / Accuracy and scope

F1. Which information should not be casually read aloud to Owen?

C. Private family contact details

The request does not authorize unnecessary disclosure of confidential family contact information.

Return to the exercise, page 92

F2. Which final record fits the supplied facts?

D. Owen stated he was Nia's uncle; authority unverified; Rosa available; no release.

The factual record preserves the attributed statement and actual status without inventing approval, wrongdoing, or release.

Return to the exercise, page 92

F / Guided speaking

1. aunt

Educator: The stated relationship is aunt.

Turn 1. The adult claims to be Mia's aunt, but this remains an attributed statement.

2. unverified

Colleague: Today's collection authority is unverified.

Turn 2. The supplied facts do not establish confirmed authority for this collection.

3. Noor

Educator: The available lead is Noor.

Turn 3. Noor is explicitly named as available to check the arrangement.

4. release

Colleague: No release has occurred.

Turn 4. Mia has not been released under the facts supplied here.

Return to the conversation, page 93

08 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "A collection request to verify". Owen: "I understand Nia needs to stay with you. I do not want this written up as though I tried to take her without asking." Lea: [missing response] Owen: "Has Rosa actually seen the arrangement yet? I heard her name and thought perhaps she had already agreed that I could collect Nia." Which response belongs in the gap?

A. That is how the factual record should read. It will distinguish your statement, the unverified authority, and the actions actually taken, rather than infer a legal conclusion.

A Correct. This is Lea's response in turn 14. It connects Owen's preceding point with Owen's follow-up. The factual record distinguishes Owen's statement, unverified authority, and actual actions without inventing a release or wrongdoing.

B Not here. This line belongs to turn 4, after Owen says: "I understand that you have not met me before. Does being unfamiliar mean you have already decided I am not allowed to collect her?" It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 18, after Owen says: "If there is a question that you cannot resolve at the collection point, who handles it? I would prefer a clear next step." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 10, after Owen says: "Could you read out the family contact details so I can tell you which person to call? That might make this quicker." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 93

Review 1 / Explanations

Cumulative review

1. A colleague needs the term for this meaning: Usual sequence when a child enters the setting. Which term fits?

D. arrival routine

A Not here. emotional response: Feelings or reactions expressed in a situation. The usual combination is "observe the emotional response".

B Not here. predictability: Quality of an arrangement being understandable and reasonably consistent. The usual combination is "build predictability".

C Not here. comfort item: Object associated with reassurance, used under appropriate safety arrangements. The usual combination is "check comfort-item arrangements".

D Correct. arrival routine: Usual sequence when a child enters the setting. The usual combination is "establish an arrival routine".

Return to the exercise, page 25

2. A colleague needs the term for this meaning: Demonstrating language or action that can support learning. Which term fits?

C. modeling

A Not here. play-based learning: Learning developed through purposeful opportunities for play and exploration. The usual combination is "support play-based learning".

B Not here. width: Measurement across an object from side to side. The usual combination is "compare bridge width".

C Correct. modeling: Demonstrating language or action that can support learning. The usual combination is "use language modeling".

D Not here. design intention: What the maker wants a design to do or achieve. The usual combination is "clarify the design intention".

Return to the exercise, page 25

Review 1 / Explanations / continued

3. Rebuild the exchange from "Agreeing on the goodbye". Daniel: "She has brought her familiar cloth. It helps her recognize something from home, but I do not know the center arrangements for using it." Rosa: [missing response] Daniel: "Could you promise that she will be settled after I leave? I know that may be difficult to answer, but it would make leaving easier." Which response belongs in the gap?

A. We should check the comfort item arrangements. Its familiarity is useful information, but I will not assume it can be used in every activity or setting.

A Correct. This is Rosa's response in turn 10. It connects Daniel's preceding point with Daniel's follow-up. The comfort item is the familiar cloth; its use depends on actual center and safety arrangements, not an automatic permission for every situation.

B Not here. This line belongs to turn 14, after Daniel says: "Could you be the person she comes to after our goodbye? She knows you now, and I would like to tell her who will be with her." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 6, after Daniel says: "When staff say brief, do they mean a particular number of minutes? I cannot tell whether ten minutes fits that word or contradicts it." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 2, after Daniel says: "Rosa, I thought I could stay for ten minutes this morning, but the note says a brief goodbye. I do not want Mina hearing two different instructions." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 25

4. Rebuild the exchange from "Two bridge ideas". Ben: "I tend to fill the silence. Eva may be about to point when I jump in with another question. I will try leaving that space." Maya: [missing response] Ben: "Then our plan is to hear both intentions, offer two available-block trials, and describe what happens without choosing a winner beforehand." Which response belongs in the gap?

B. Allow wait time. Watch their responses, including gestures, and keep the exploration moving at a pace that allows both to participate.

A Not here. This line belongs to turn 6, after Ben says: "For Jo, I could ask where the opening should be taller. I should not translate his request into another version of Eva's idea." It addresses that point, not the missing turn in the supplied exchange.

B Correct. This is Maya's response in turn 18. It connects Ben's preceding point with Ben's follow-up. Wait time leaves room for processing and response; answering immediately for the children would remove that opportunity.

C Not here. This line belongs to turn 14, after Ben says: "I can also model wider and taller while pointing to the appropriate dimension. I should not use taller as another word for better." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 10, after Ben says: "We have blocks available for trying two designs. I could suggest that practical option instead of making the children compete for one approved plan." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 25

Review 2 / Explanations

Cumulative review

1. A colleague needs the term for this meaning: Signal indicating an approaching or current change of activity. Which term fits?

C. transition cue

A Not here. follow-through: Carrying out an agreed action or stated boundary. The usual combination is "provide calm follow-through".

B Not here. image storage: Process and location for keeping photographs or other images. The usual combination is "follow image-storage rules".

C Correct. transition cue: Signal indicating an approaching or current change of activity. The usual combination is "use a transition cue".

D Not here. finishing point: Defined place at which an activity pauses or ends. The usual combination is "identify a finishing point".

Return to the exercise, page 47

2. A colleague needs the term for this meaning: What a person is doing with an item at the relevant moment. Which term fits?

B. current use

A Not here. co-regulation: Supportive interaction in which an adult helps a child manage responses and build regulation skills. The usual combination is "provide co-regulation".

B Correct. current use: What a person is doing with an item at the relevant moment. The usual combination is "acknowledge current use".

C Not here. resource conflict: Disagreement involving access to an object, space, or material. The usual combination is "mediate a resource conflict".

D Not here. repair: Action that helps address a disruption or harm in a relationship or activity. The usual combination is "support an appropriate repair".

Return to the exercise, page 47

Review 2 / Explanations / continued

3. Rebuild the exchange from "Two bridge ideas". Ben: "We have blocks available for trying two designs. I could suggest that practical option instead of making the children compete for one approved plan." Maya: [missing response] Ben: "I keep saying good job, but it does not give them much to work with. What could I say about the supports they are moving?" Which response belongs in the gap?

D. A second trial gives us something to compare. We should not announce the result in advance or promise that a particular structure will work.

A Not here. This line belongs to turn 4, after Ben says: "I could say, "Eva, show us what you mean by wider." That lets her point or demonstrate rather than requiring a long explanation." It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 6, after Ben says: "For Jo, I could ask where the opening should be taller. I should not translate his request into another version of Eva's idea." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 20, after Ben says: "Then our plan is to hear both intentions, offer two available-block trials, and describe what happens without choosing a winner beforehand." It addresses that point, not the missing turn in the supplied exchange.

D Correct. This is Maya's response in turn 10. It connects Ben's preceding point with Ben's follow-up. A trial is an attempt to explore a design; proposing two trials does not establish either outcome or a winner.

Return to the exercise, page 47

Review 2 / Explanations / continued

4. Rebuild the exchange from "One large scoop". Leon: "And if one child remains upset, we stay responsive. A calm adult presence and clear language matter more than demanding the right apology words immediately." Sora: [missing response] Leon: "Then we describe the sequence, preserve both requests, offer the smaller scoop honestly, and help the children understand the proposed current and next turns." Which response belongs in the gap?

A. That is part of co-regulation. We can model calm language and maintain the boundary without treating a forced phrase as proof that the practical conflict is resolved.

A Correct. This is Sora's response in turn 18. It connects Leon's preceding point with Leon's follow-up. Co-regulation combines supportive adult interaction and clear structure while the child develops ways to manage the disagreement.

B Not here. This line belongs to turn 4, after Leon says: "Then describing Bea as deliberately upsetting Ari would add something we did not establish. We can describe the reach without attaching that explanation." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 2, after Leon says: "Sora, what happened with the large scoop? I heard a disagreement, but I did not see how it began and do not want to repeat the wrong story." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 6, after Leon says: "What are they asking for now? If Ari has nearly finished something, we may be able to make the next turn clearer than just saying share." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 47

Review 3 / Explanations

Cumulative review

1. A colleague needs the term for this meaning: Exact words reproduced without changing their wording. Which term fits?

B. verbatim quotation

A Not here. norm-referenced measure: Assessment interpreted in relation to an appropriate reference population. The usual combination is "interpret a norm-referenced measure".

B Correct. verbatim quotation: Exact words reproduced without changing their wording. The usual combination is "preserve a verbatim quotation".

C Not here. sorting criterion: Feature used to decide which items belong together. The usual combination is "identify the sorting criterion".

D Not here. developmental milestone: Skill or behavior associated with development, interpreted with appropriate variation and context. The usual combination is "discuss a developmental milestone".

Return to the exercise, page 71

2. A colleague needs the term for this meaning: Language used to convey meaning to others. Which term fits?

A. expressive language

A Correct. expressive language: Language used to convey meaning to others. The usual combination is "support expressive language".

B Not here. augmentative communication: Methods that support existing speech or communication. The usual combination is "use appropriate augmentative communication".

C Not here. inclusion plan: Agreed support arrangements for meaningful access and participation. The usual combination is "follow the inclusion plan".

D Not here. language delay: Language skills developing more slowly than expected, assessed in context rather than inferred from one response or multilingualism. The usual combination is "refer a language-delay concern".

Return to the exercise, page 71

Review 3 / Explanations / continued

3. Rebuild the exchange from "One large scoop". Leon: "I can offer the smaller scoop while Bea waits. I will say it is smaller; telling Bea it is just the same would ignore what she wants." Sora: [missing response] Leon: "How do we acknowledge the wish without suggesting that reaching for whatever you want always gets you immediate access?" Which response belongs in the gap?

B. Exactly. It is an alternative resource, not an identical replacement. We can name what is available without denying that Bea specifically wants the larger one.

A Not here. This line belongs to turn 6, after Leon says: "What are they asking for now? If Ari has nearly finished something, we may be able to make the next turn clearer than just saying share." It addresses that point, not the missing turn in the supplied exchange.

B Correct. This is Sora's response in turn 10. It connects Leon's preceding point with Leon's follow-up. The alternative resource is the smaller scoop, which can be offered honestly without claiming it is an identical replacement.

C Not here. This line belongs to turn 2, after Leon says: "Sora, what happened with the large scoop? I heard a disagreement, but I did not see how it began and do not want to repeat the wrong story." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 16, after Leon says: "We should not add a ten-minute wait or an exact timer rule, because neither is part of the arrangement we have described." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 71

4. Rebuild the exchange from "Pointing is a response". Ben: "Before the next group, let us put the picture choices where Noor can reach them. They are not much help if they stay behind my chair." Amina: [missing response] Ben: "I will change my note to describe the pointing response and its limits. I will not label it nonparticipation or infer a diagnosis or home language." Which response belongs in the gap?

B. Yes. The visual support needs to be accessible through the planned arrangement. We should check the environment rather than interpret a missing opportunity as a child failure.

A Not here. This line belongs to turn 6, after Ben says: "Does that mean we should describe pointing as exactly the same evidence as a spoken answer? I do not want our notes to lose the difference." It addresses that point, not the missing turn in the supplied exchange.

B Correct. This is Amina's response in turn 18. It connects Ben's preceding point with Ben's follow-up. Visual support must be usable within the activity; merely listing picture choices in a plan does not make them practically accessible.

C Not here. This line belongs to turn 2, after Ben says: "Noor did not give a spoken answer in the story group. I was going to mark that as not participating, but you seem to have recorded a response." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 12, after Ben says: "So we should not record a particular home language unless we actually have that information through the proper family and record process." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 71

Review 4 / Explanations

Cumulative review

1. A colleague needs the term for this meaning: Update described by a source but not necessarily verified. Which term fits?

B. reported change

A Not here. food intolerance: Adverse food response distinct from an immune-mediated food allergy. The usual combination is "distinguish food intolerance".

B Correct. reported change: Update described by a source but not necessarily verified. The usual combination is "record a reported change".

C Not here. training record: Documentation of completed relevant staff training. The usual combination is "check the training record".

D Not here. health coordinator: Person responsible for coordinating specified health-information processes. The usual combination is "contact the health coordinator".

Return to the exercise, page 94

2. A colleague needs the term for this meaning: Person proposed to collect instead of the usual person. Which term fits?

D. substitute collector

A Not here. collection authority: Permission established through the applicable process for someone to collect a child. The usual combination is "verify collection authority".

B Not here. access control: Arrangements restricting entry to authorized people or areas. The usual combination is "maintain access control".

C Not here. verified contact route: Communication channel confirmed as appropriate for contacting the relevant person. The usual combination is "use a verified contact route".

D Correct. substitute collector: Person proposed to collect instead of the usual person. The usual combination is "verify a substitute collector".

Return to the exercise, page 94

Review 4 / Explanations / continued

3. Rebuild the exchange from "Pointing is a response". Ben: "Could the preference mean a language delay, or tell us which language Noor uses at home? I have heard colleagues make those assumptions." Amina: [missing response] Ben: "So we should not record a particular home language unless we actually have that information through the proper family and record process." Which response belongs in the gap?

A. Neither follows from this moment. A language difference or concern needs appropriate information, not an inference from one pointing response or from the child's name.

A Correct. This is Amina's response in turn 10. It connects Ben's preceding point with Ben's follow-up. A language difference and a developmental concern require appropriate contextual information; Noor's single pointing preference establishes neither.

B Not here. This line belongs to turn 6, after Ben says: "Does that mean we should describe pointing as exactly the same evidence as a spoken answer? I do not want our notes to lose the difference." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 14, after Ben says: "If I insist on a spoken sentence before Noor can count as taking part, I would be removing one of the routes the plan currently allows." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 2, after Ben says: "Noor did not give a spoken answer in the story group. I was going to mark that as not participating, but you seem to have recorded a response." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 94

Review 4 / Explanations / continued

4. Rebuild the exchange from "A collection request to verify". Owen: "If there is a question that you cannot resolve at the collection point, who handles it? I would prefer a clear next step." Lea: [missing response] Owen: "All right. Please ask Rosa to check. I will wait where you direct me while Nia stays with the staff; tell me what information you need." Which response belongs in the gap?

C. Rosa will use the appropriate escalation route if needed. Any actual safeguarding concern must follow our procedures, while we keep the information accurate and the child supervised.

A Not here. This line belongs to turn 14, after Owen says: "I understand Nia needs to stay with you. I do not want this written up as though I tried to take her without asking." It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 10, after Owen says: "Could you read out the family contact details so I can tell you which person to call? That might make this quicker." It addresses that point, not the missing turn in the supplied exchange.

C Correct. This is Lea's response in turn 18. It connects Owen's preceding point with Owen's follow-up. The escalation route sends an unresolved concern to the responsible people under the setting's actual procedures, not an invented universal rule.

D Not here. This line belongs to turn 4, after Owen says: "I understand that you have not met me before. Does being unfamiliar mean you have already decided I am not allowed to collect her?" It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 94

Additional case 1 / Explanations

Extended conversation

1. headcount

Turn 2. The headcount is eleven in the gathered group, while twelve children are attending; the difference must be reconciled through actual named information.

2. named handover

Turn 4. The handover identifies Tomas and Leena, with direct confirmation of current responsibility; a vague assumption that someone took a child would not establish this.

3. location

Turn 6. Tomas is currently with Leena, not in the eleven-child group; the record must preserve where each child actually is.

4. supervision plan

Turn 8. The approved supervision plan allocates adult attention and positions during the transition; paperwork and a correct total do not replace that continuous oversight.

5. name-to-face check

Turn 10. A name-to-face check visually matches each child with the relevant name; hearing a reply or reaching the expected total alone is not equivalent.

6. return handover

Turn 16. The return handover establishes that Tomas has actually rejoined the group; the earlier record of Leena taking responsibility did not prove his return.

Return to the conversation, page 97

Transfer exchange

1. seven

Educator: The gathered group contains seven children.

Turn 1. Seven children are physically in the gathered group; the total attendance of nine is a different count.

Additional case 1 / Explanations / continued

2. two

Colleague: Leena has confirmed responsibility for two children.

Turn 2. Ava and Ivo are two named children whose separate location and adult responsibility have been directly confirmed.

3. nine

Educator: The two groups account for nine attending children.

Turn 3. Seven gathered children plus the two confirmed with Leena equals all nine attending children.

4. occurred

Colleague: The return handover has not yet occurred .

Turn 4. The facts confirm the separate care arrangement, not a completed return to the gathered group.

Return to the conversation, page 100

Additional case 2 / Explanations

Extended conversation

1. home language

Turn 2. Urdu is the language Samira reports using with Rafi at home; supporting English does not require abandoning that family language.

2. code-switching

Turn 4. Code-switching means moving between languages within communication; the mixed-language example alone does not establish confusion or a disorder.

3. family report

Turn 6. Samira's account supplies information about Urdu use at home; Anna should attribute it to the family rather than record it as her own classroom observation.

4. expressive language

Turn 8. Expressive language conveys meaning; Anna's observed English examples should be recorded specifically rather than replaced by the broad label quiet or a claim of fluent sentences.

5. expansion

Turn 14. An expansion adds language while preserving the child's meaning; modeling more water does not require withholding the drink until Rafi repeats a prescribed sentence.

6. review date

Turn 18. Next Friday is the agreed check-in date to review observations and supports, not a deadline by which Rafi must achieve a specified level of English.

Return to the conversation, page 102

Transfer exchange

1. French

Parent: My home-language examples are in French .

Turn 1. Luc reports French storytelling at home; that information should not be relabeled as observed English at preschool.

Additional case 2 / Explanations / continued

2. English

Educator: My recorded preschool speech examples are in English .

Turn 2. Jo heard help and my turn in English; those observations are distinct from Luc's home report.

3. song

Parent: We will share a familiar song .

Turn 3. The agreed support is a familiar song, not an invented assessment score or treatment.

4. Tuesday

Educator: Our check-in is on Tuesday .

Turn 4. Tuesday is the review date for support, not a promise that Amelie will become fluent by then.

Return to the conversation, page 105

Additional case 3 / Explanations

Extended conversation

1. verbatim quotation

Turn 2. The quotation preserves Kit's actual words; replacing someone with a guessed person's name would add information Kit did not supply.

2. promise of secrecy

Turn 4. A promise of secrecy would conflict with necessary protective information sharing; Nora instead explained that an appropriate person needed to help.

3. safeguarding concern

Turn 6. Kit's words raise a safeguarding concern requiring the actual protective response; an incomplete account is not a reason to postpone action until more proof is collected.

4. leading questions

Turn 8. A question suggesting a named person or expected event can shape the account; Nora should not conduct an investigation or supply missing details.

5. chronology

Turn 12. Chronology distinguishes when Kit spoke, when Nora alerted Ravi, and when the note was made; those separate events should not be collapsed into one invented timestamp.

6. External reporting

Turn 18. External reporting involves the required notification beyond the setting; Ravi receiving Nora's internal alert does not itself establish that this separate action has occurred.

Return to the conversation, page 107

Transfer exchange

1. 10:12

Educator: The child's statement was heard at 10:12 .

Turn 1. 10:12 is the stated time of Ari's words, not an invented time for every later action.

Additional case 3 / Explanations / continued

2. exact

Lead: Keep the child's exact wording in the secure record.

Turn 2. Exact wording preserves I am scared to go back without supplying a person or place Ari did not identify.

3. Leena

Educator: The named lead who received the alert is Leena .

Turn 3. Leena is the explicitly identified safeguarding lead, distinct from an unnamed external recipient.

4. confirmed

Lead: External notification is not yet confirmed by these facts.

Turn 4. An internal alert establishes receipt within the setting, not completion of a separate required external notification.

Return to the conversation, page 110

Find a phrase by purpose

Arrivals and family partnerships

Acknowledge the expectation: You expected to stay for ten minutes.

Read the note neutrally: The arrival note says a brief goodbye.

Name the difference: Those expectations need to be clarified together.

Full phrase bank, page 7

Play-based learning and useful prompts

Invite Eva's idea: Eva, show us what you mean by a wider bridge.

Invite Jo's idea: Jo, show us where you want the taller opening.

Name both priorities: Eva is exploring width, and Jo is exploring opening height.

Full phrase bank, page 18

Daily routines and supported transitions

Give advance notice: Story time begins in five minutes.

Name the boundary: We will move to story time after this finishing step.

Offer the two choices: You can add the last block, or I can take a photo using our center's camera.

Full phrase bank, page 30

Co-regulation and peer disagreements

Describe what was seen: I saw Ari holding the large scoop and Bea reaching toward it.

Avoid a motive claim: I do not know why Bea reached at that moment.

Acknowledge both wishes: Both children want to use the large scoop.

Full phrase bank, page 40

Find a phrase by purpose / continued

Observation and family progress conversations

Share the observation: Today I saw Eli sort four buttons by color.

Preserve the words: Eli said, "These go together."

Name the setting: This happened during the supervised activity.

Full phrase bank, page 53

Inclusive participation and home languages

Refer to the plan: Noor's current plan allows picture choices or spoken answers.

Name today's choice: Noor prefers pointing today.

Recognize participation: Pointing is an allowed response in this activity.

Full phrase bank, page 64

Health records and factual incident handovers

Acknowledge the report: Thank you for telling me the plan may have changed.

State the held record: We still hold the earlier plan.

Name the missing document: The revised document is not available here.

Full phrase bank, page 76

Collection, confidentiality, and safeguarding communication

Welcome without authorizing: Hello. Let me check the collection arrangement with our lead educator.

Acknowledge the statement: You have told me you are Nia's uncle.

Name the remaining check: Today's collection authority has not been verified yet.

Companion course

The website offers the eight-lesson course and related practice. This book can be used independently. No audio access or external account is needed for its exercises.

https://englishladder.com/efsp-childcare-early-education.html

Warm communication. Clear care.

Eight early-years cases: arrivals, shared play, transitions, peer disagreements, learning observations, inclusive participation, health plans, and collection checks.

Arrivals and family partnerships

Brief is not a universal number of minutes. Here it conflicts with Daniel expecting ten minutes, so the plan needs clarification. Do not convert either source into a finalized agreement before Rosa and Daniel resolve the practical meaning.

Play-based learning and useful prompts

Wider and taller refer to different dimensions. A bridge can be wide without having a tall opening. Preserve each child design intention before suggesting a comparison, and do not change taller into better or wider into stronger without evidence.

Daily routines and supported transitions

You can choose the last block or a permitted photograph offers two available ways to finish. Do you want story time? suggests that declining the transition is allowed. Match the grammar of the choice to the actual options.

Co-regulation and peer disagreements

I saw Ari holding the scoop, then Bea reaching describes a sequence. Bea wanted to upset Ari assigns a motive that is not established. Keep observations and interpretations separate while responding appropriately to any actual safety concern.
