Eight practical lessons. Eleven extended conversations.
Vocabulary, phrase banks, guided speaking, and explained answers.

Revised 2026 edition / Upper-intermediate to advanced

Your route through the book

01 Creative Briefs and Development Notes, page 4

Clarify creative adjectives through audience, references, observable choices, and delivery requirements.

02 Production Planning and Budget, page 14

Explain a scheduling dependency, quantify the immediate gap, and separate a revised estimate from spending approval.

03 Rights, Clearances, and Licensing, page 26

Compare intended music use with documented permission and explain a publication hold precisely.

04 Talent, Contracts, and Approvals, page 37

Coordinate version-specific talent approval and explain a schedule conflict without assuming silence means consent.

05 Distribution and Windowing, page 51

Compare distribution offers across fee, rights, territory, term, and exclusivity without inventing net value.

06 Audience Metrics and Performance, page 61

Give a balanced performance readout using distinct counts, rates, and campaign objectives.

07 Sponsorship, Brand Safety, and Integration, page 74

Respond to a sponsor change by separating scope, factual claims, disclosure, and approval.

08 Crisis Response and Public Statements, page 85

Prepare a concise holding statement that separates verified facts, open questions, and the next update.

Professional communication notes, page 3

Three additional workplace cases, page 99

Answers and explanations, page 112

Phrase finder, page 166

Vocabulary index, page 168

References and publication notes, page 173

Suggested study range: B2-C1. This is an editorial study range, not a certified proficiency assessment.

Be specific without flattening the creative idea

Creative work needs room for interpretation, but production commitments need precise language. These cases practice translating taste, deadlines, permissions, performance, and public claims into decisions that colleagues can act on.

Turn an adjective into an observable choice

Premium, energetic, and cinematic can suggest different things to different colleagues. Ask about audience, references, pace, framing, sound, and deliverables.
"Which part of that reference do you want us to follow: the pacing or the lighting?"

Separate a proposal from a cleared commitment

A schedule, music cue, talent appearance, or distribution deal may still depend on an approval. Name the actual dependency instead of saying everything is locked.
"The edit is ready for review; the music use is not yet cleared."

Compare the complete deal

Fees, territories, duration, exclusivity, platforms, and deliverables work together. A higher headline fee alone does not establish the better distribution outcome.
"The larger fee also restricts more rights for a longer period."

Preserve the boundary between fact and explanation

An incident can be confirmed before its cause is known. Public language should identify what is verified and what remains under review.
"Filming paused at 09:20; the cause has not yet been confirmed."

> ### Professional boundaries
>
> All productions, clients, performers, incidents, figures, and contract terms are fictional. This book teaches professional English, not legal advice or production-safety procedures. Rights, labor conditions, disclosures, and approvals depend on the actual agreements, uses, jurisdiction, and current requirements. No exercise authorizes publication, unsafe work, or use of uncleared material.

A Read the situation

LESSON 01 / CREATIVE BRIEFS AND DEVELOPMENT NOTES

Clarify creative adjectives through audience, references, observable choices, and delivery requirements.

> **What does premium and energetic actually mean?**
>
> Client Sora asks director Ellis for a video that feels premium and energetic. The request contains no target audience, reference examples, duration, aspect ratio, or release channel. In the meeting, Sora confirms adult first-time buyers, a 30-second main film for the brand website, and a 16:9 frame. She wants deliberate product close-ups and energetic editing, not flashing transitions. A shorter, 15-second vertical social cutdown is only a possible later request. Ellis must document the agreed direction without treating that possible extra version as included or fully priced.

People: Sora, Client brand lead; Ellis, Creative director.

Read the record

Choose one answer per question using the facts above.

1. Who is the confirmed audience?

A. Adult first-time buyers
B. Existing trade distributors only
C. Children under ten
D. Every possible viewer equally

2. Which deliverable is confirmed?

A. A series of six television spots
B. A 30-second 16:9 film for the brand website
C. A 90-second cinema trailer
D. A completed vertical social cutdown

3. What remains only a possible later request?

A. Product close-ups
B. Energetic editing
C. The 16:9 main frame
D. A vertical social cutdown

Answers and explanations, page 112

B Vocabulary in use

CORE TERMS

creative brief
A document setting the communication task and production requirements.

clarify the creative brief

target audience
The intended group of viewers.

define the target audience

single-minded proposition
The main message the communication should convey.

sharpen the single-minded proposition

creative territory
A distinct direction for developing an idea.

explore a creative territory

treatment
A written or visual account of the proposed creative approach.

develop a treatment

mood board
A collection of visual references expressing a direction.

review a mood board

reference film
An existing film used to explain a specific creative quality.

select a reference film

storyboard
A sequence of images planning the shots or story.

approve the storyboard

animatic
A timed sequence of storyboard images, often with sound.

review an animatic

shot list
A list of planned shots for production.

prepare the shot list

close-up
A shot framing a subject or detail tightly.

capture a product close-up

pacing
The perceived rhythm and speed of an edit or sequence.

adjust the pacing

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

creative brief CREATIVE BRIEF

clarify the creative brief

Keep the meaning precise: A document setting the communication task and production requirements.

mood board MOOD BOARD

review a mood board

Keep the meaning precise: A collection of visual references expressing a direction.

B Precision and professional shorthand

EXTEND YOUR RANGE

transition
The change from one shot or scene to another.
simplify the transition

tone of voice
The characteristic style of the spoken or written message.
define the tone of voice

deliverable
A specified item or version to be supplied.
confirm the deliverables

running time
The duration of a film or version.
confirm the running time

safe area
A defined frame area protecting essential content from cropping or overlays.
check the safe area

brand lockup
An approved arrangement of brand marks and related elements.
use the approved brand lockup

visual hierarchy
The ordering of visual elements by importance.
establish visual hierarchy

call to action
The action the audience is asked to take.
clarify the call to action

aspect ratio
The proportional relationship between frame width and height.
specify the aspect ratio

cutdown
A shorter version adapted from a longer piece.
scope a cutdown

supers
Text placed over the moving image.
review the supers

creative sign-off
Approval of a specified creative version or direction.
record creative sign-off

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

pacing PACING

adjust the pacing

Keep the meaning precise: The perceived rhythm and speed of an edit or sequence.

deliverable DELIVERABLE

confirm the deliverables

Keep the meaning precise: A specified item or version to be supplied.

C Phrases that move the work forward

Acknowledge the direction

I understand that you want it to feel premium and energetic.

Identify the viewer

Who needs to understand the product after watching?

Pin down the duration

Is thirty seconds the confirmed main running time?

Specify the frame

The confirmed aspect ratio is sixteen by nine.

Translate the adjective

We will use deliberate product close-ups and an energetic edit.

Separate possible scope

The vertical cutdown remains a possible later request.

Check the action

What should the viewer do after the final frame?

Avoid an unpriced commitment

I have not included a vertical version in this scope.

Request a concrete distinction

Do you mean faster pacing, more camera movement, or both?

Confirm the audience

We are addressing adult first-time buyers.

Name the delivery channel

The main film is for the brand website.

Limit the reference

Let us use the close-ups as a reference, not copy the entire film.

Record the exclusion

Flashing transitions are not part of this direction.

Ask about the message

What is the one product point the viewer must retain?

Confirm the review stage

The treatment will come back for creative sign-off.

Close with a read-back

I will circulate the audience, style, format, and outstanding questions.

Precision in real exchanges

Purpose: Confirm the audience
Useful wording: We are addressing adult first-time buyers.

Purpose: Pin down the duration
Useful wording: Is thirty seconds the confirmed main running time?

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which question best clarifies energetic?

A. Should we increase every shot's duration to match the reference exactly?
B. Can we add a vertical deliverable to demonstrate energy?
C. Do you mean faster pacing, camera movement, or flashing transitions?
D. Can we use premium as the final acceptance criterion without examples?

2. Which read-back preserves the agreement?

A. Every audience and every release channel are approved.
B. Thirty seconds, 16:9, website, adult first-time buyers; vertical cutdown unconfirmed.
C. Thirty seconds in every format at the same price.
D. Vertical social film only, with flashing transitions.

3. A colleague needs the term for this meaning: A distinct direction for developing an idea. Which term fits?

A. tone of voice
B. safe area
C. creative territory
D. animatic

D Choose the response that fits / continued

4. Rebuild the exchange from "What does premium and energetic actually mean?". Sora: "I like deliberate close shots of the product. I do not want the film to look cheap just because the edit is energetic." Ellis: [missing response] Sora: "Exactly. No flashing transitions. The rhythm should be lively, but the product should remain easy to inspect." Which response belongs in the gap?

A. I will prepare a treatment with the audience, visual direction, pacing references, and main format. It will also show the questions we still need to settle.

B. Then the cutdown stays outside the confirmed scope for now. Vertical reframing may affect the shots and text, so I will not describe it as automatically included.

C. We can use a close-up to show important details and let the edit supply momentum. Faster does not have to mean flashing transitions or constant camera movement.

D. I will record a thirty-second running time and a sixteen-by-nine frame. Those requirements help us judge how much explanation and product detail the edit can carry.

Answers and explanations, page 112

One useful distinction

Energetic can refer to pacing, movement, music, or transitions. Here it means energetic editing, not flashing transitions. A reference is useful only when the team states which feature is being borrowed as inspiration.

E Conversation

What does premium and energetic actually mean?

What does premium and energetic actually mean?

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

creative brief / reference film / creative sign-off / running time / call to action / target audience / cutdown / pacing / close-up / treatment

01 **Sora:** The last film looked polished, but it took too long to get going. Can this one feel premium without losing that first burst of energy?

02 **Ellis:** That helps. Let us sharpen the [1] _____ before we choose a style. Who should the film speak to, and what should they understand about the product by the end?

03 **Sora:** Adult first-time buyers. They will see it on our brand website, and they should quickly understand what the product is for.

04 **Ellis:** Then the [2] _____ needs a clear introduction. We should not rely on the product knowledge that an existing customer might already bring.

05 **Sora:** I like deliberate close shots of the product. I do not want the film to look cheap just because the edit is energetic.

06 **Ellis:** We can use a [3] _____ to show important details and let the edit supply momentum. Faster does not have to mean flashing transitions or constant camera movement.

07 **Sora:** Exactly. No flashing transitions. The rhythm should be lively, but the product should remain easy to inspect.

08 **Ellis:** That makes [4] _____ the main tool for energy. Do you have a reference where the rhythm feels right, even if the subject is different?

09 **Sora:** I can send one. I want the team to discuss the editing, not reproduce its entire visual style.

10 **Ellis:** Good. We will label it as a [5] _____ for rhythm only. That avoids turning one useful example into an instruction to imitate every shot, color, or music choice.

Conversation continues on the next page.

What does premium and energetic actually mean?

CONVERSATION / CONTINUED

11 **Sora:** The main film needs to be thirty seconds. It will appear in the normal wide player on the website.

12 **Ellis:** I will record a thirty-second [6] _____ and a sixteen-by-nine frame. Those requirements help us judge how much explanation and product detail the edit can carry.

13 **Sora:** We may want a shorter, fifteen-second vertical version for social later. Please do not include it as confirmed scope yet.

14 **Ellis:** Then the [7] _____ stays outside the confirmed scope for now. Vertical reframing may affect the shots and text, so I will not describe it as automatically included.

15 **Sora:** Please show us the approach before you organize a shoot.

16 **Ellis:** I will prepare a [8] _____ with the audience, visual direction, pacing references, and main format. It will also show the questions we still need to settle.

17 **Sora:** We should agree what viewers are meant to do after watching. The final message needs some work.

18 **Ellis:** Yes, the [9] _____ is still open. I will flag it instead of filling the end frame with a message that no one has approved.

19 **Sora:** So the confirmed direction is deliberate product detail, an energetic edit, no flashing transitions, and a thirty-second website film.

20 **Ellis:** Correct. We will seek [10] _____ on that treatment. The optional vertical version and final action message will remain clearly separate until they are decided.

CHECK THE GAPS

1. creative brief / **2.** target audience / **3.** close-up / **4.** pacing / **5.** reference film / **6.** running time / **7.** cutdown / **8.** treatment / **9.** call to action / **10.** creative sign-off

Why these answers fit, page 113

F Check accuracy and scope

What does premium and energetic actually mean?

Return to the case

Client Sora asks director Ellis for a video that feels premium and energetic. The request contains no target audience, reference examples, duration, aspect ratio, or release channel. In the meeting, Sora confirms adult first-time buyers, a 30-second main film for the brand website, and a 16:9 frame. She wants deliberate product close-ups and energetic editing, not flashing transitions. A shorter, 15-second vertical social cutdown is only a possible later request. Ellis must document the agreed direction without treating that possible extra version as included or fully priced.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. What is a useful reference-film instruction?

A. Treat every element as approved automatically.
B. Use the reference instead of specifying an audience.
C. Identify the particular pacing or framing feature to discuss.
D. Copy the entire reference without checking rights.

2. Which statement overcommits scope?

A. The website film has a 16:9 frame.
B. The treatment needs creative sign-off.
C. The vertical adaptation is included even though it is only a possible request.
D. We will scope the vertical version separately.

Answers and explanations, page 115

Listen for the distinction

Swap roles for turns 11-20; distinguish the main film from the shorter optional version.

Clarification is part of creative work

A direct request for examples can sound like resistance if it is detached from the client's aim. Acknowledge the desired impression, then offer a concrete distinction. Confirm the chosen interpretation so that later feedback has a shared reference point.

F Say it / transfer to a new case

Read back a second creative brief

A client confirms a 45-second film for returning subscribers, in a 1:1 frame, for an email-linked campaign page. A six-second teaser is only a possible later request.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

1:1 / 45 seconds / returning subscribers / six-second teaser

01 **Director:** The confirmed running time is [1] _____.

02 **Client:** The target audience is [2] _____.

03 **Director:** The confirmed aspect ratio is [3] _____.

04 **Client:** The unconfirmed later version is a [4] _____.

CHECK THE GAPS

1. 45 seconds / **2.** returning subscribers / **3.** 1:1 / **4.** six-second teaser

Why these answers fit, page 115

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "What does premium and energetic actually mean?". Sora: "We may want a shorter, fifteen-second vertical version for social later. Please do not include it as confirmed scope yet." Ellis: [missing response] Sora: "Please show us the approach before you organize a shoot." Which response belongs in the gap?

A. I will record a thirty-second running time and a sixteen-by-nine frame. Those requirements help us judge how much explanation and product detail the edit can carry.

B. Then the cutdown stays outside the confirmed scope for now. Vertical reframing may affect the shots and text, so I will not describe it as automatically included.

C. We can use a close-up to show important details and let the edit supply momentum. Faster does not have to mean flashing transitions or constant camera movement.

D. I will prepare a treatment with the audience, visual direction, pacing references, and main format. It will also show the questions we still need to settle.

Answers and explanations, page 116

A Read the situation

LESSON 02 / PRODUCTION PLANNING AND BUDGET

Explain a scheduling dependency, quantify the immediate gap, and separate a revised estimate from spending approval.

The location move does not fit the call sheet

A revised shoot plan ends work at Location A at 12:00 and starts filming at Location B at 12:30. The company move takes 35 minutes, followed by 45 minutes of setup; these tasks cannot overlap in this plan. The earliest filming start is therefore 13:20, before any extra delay. The approved budget is $25,000. New transport costs $750 and added equipment costs $250; possible overtime remains unpriced. Producer Leena and first assistant director Grant must revise the plan without cutting required breaks or treating the new costs as approved.

People: Leena, Producer; Grant, First assistant director.

Read the record

Choose one answer per question using the facts above.

1. What is the earliest filming start at B on the stated assumptions?

A. 13:20
B. 12:30
C. 12:35
D. 12:45

2. How much known additional cost has been identified?

A. $26,000
B. $1,000
C. $750
D. $250

3. Which cost remains unpriced?

A. The $750 transport
B. The $250 equipment
C. The original $25,000 budget
D. Possible overtime

Answers and explanations, page 117

B Vocabulary in use

CORE TERMS

call sheet
The daily production document listing timing, locations, and key information.

revise the call sheet

company move
Relocation of the production unit between locations.

schedule the company move

setup
Preparation of a location, equipment, and scene for filming.

allow setup time

first assistant director (first AD)
The role coordinating on-set scheduling and execution.

consult the first AD

line producer
The role managing practical production resources and costs.

brief the line producer

shooting schedule
The planned sequence and timing of filming work.

update the shooting schedule

stripboard
A visual scheduling arrangement of scenes or production work.

revise the stripboard

call time
The time a person or department is required to report.

confirm the call time

wrap time
The time filming or a person's scheduled work ends.

estimate the wrap time

turnaround
The interval between one work period's end and the next call.

protect required turnaround

meal break
A scheduled break for eating under applicable conditions.

preserve the meal break

overtime
Work beyond the relevant agreed or regulated hours.

estimate overtime exposure

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

call sheet CALL SHEET

revise the call sheet

Keep the meaning precise: The daily production document listing timing, locations, and key information.

shooting schedule SHOOTING SCHEDULE

update the shooting schedule

Keep the meaning precise: The planned sequence and timing of filming work.

B Precision and professional shorthand

EXTEND YOUR RANGE

contingency
A planned reserve for specified uncertainties.
review the contingency

cost report
A record of production spending, commitments, and forecasts.
update the cost report

committed cost
An amount already obligated under a relevant agreement.
record committed costs

actual cost
An amount incurred and recorded on the stated basis.
reconcile actual costs

forecast cost
An estimate of expected cost at a defined point or completion.
revise forecast costs

change order
A document recording an authorized change to agreed work.
obtain a change order

location permit
Required permission to use a location under applicable rules.
verify the location permit

location release
An agreement concerning filming or use of a location.
check the location release

technical scout
A site visit assessing practical production requirements.
arrange a technical scout

load-in
Bringing equipment into a production location.
coordinate load-in

strike
Dismantling and removing a set or equipment.
schedule the strike

critical dependency
A required condition or preceding task affecting the plan.
identify the critical dependency

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

overtime OVERTIME

estimate overtime exposure

Keep the meaning precise: Work beyond the relevant agreed or regulated hours.

forecast cost FORECAST COST

revise forecast costs

Keep the meaning precise: An estimate of expected cost at a defined point or completion.

C Phrases that move the work forward

Name the conflict

The twelve-thirty filming slot does not fit the location move.

Show the dependency

Setup begins only after the thirty-five-minute move.

Do the arithmetic

Thirty-five plus forty-five gives eighty minutes.

State the earliest start

The earliest filming start is thirteen twenty on these assumptions.

Quantify the shortfall

The current slot is fifty minutes too early.

Preserve the qualifications

That excludes any additional delay.

Separate the known costs

Transport adds $750 and equipment adds $250.

State the estimate

Known costs bring the estimate to at least $26,000.

Keep uncertainty visible

Possible overtime has not yet been priced.

Protect authorization

The approved budget remains $25,000 until the change is authorized.

Request a decision

We need an approved schedule and cost revision.

Avoid unsafe compression

Required breaks and safeguards cannot become our hidden buffer.

Offer a planning route

We can review the scene order with the first AD.

Check the location terms

Confirm access and permit conditions before changing the timing.

Update connected records

The call sheet and cost report must reflect the same decision.

Close with ownership

I will circulate the revised option for approval, not label it approved.

Precision in real exchanges

Purpose: State the earliest start
Useful wording: The earliest filming start is thirteen twenty on these assumptions.

Purpose: Quantify the shortfall
Useful wording: The current slot is fifty minutes too early.

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which timing statement is accurate?

A. Filming can start no earlier than 13:20 under the stated plan.
B. The 35-minute move fits inside the 30-minute gap.
C. Setup can be ignored because the camera is already hired.
D. The 12:30 start is confirmed by the old call sheet.

2. Which cost statement is supported?

A. Known additions total $1,000; overtime remains unpriced.
B. All added costs are exactly $1,000 with no uncertainty.
C. The approved budget automatically becomes $26,000.
D. Transport is free because it is required.

3. A colleague needs the term for this meaning: The role coordinating on-set scheduling and execution. Which term fits?

A. technical scout
B. wrap time
C. committed cost
D. first assistant director (first AD)

D Choose the response that fits / continued

4. Rebuild the exchange from "The location move does not fit the call sheet". Leena: "That makes the earliest filming start thirteen twenty, before any extra delay." Grant: [missing response] Leena: "I will ask about moving the interview. Meanwhile, should we flag the timing conflict before anyone distributes that call sheet?" Which response belongs in the gap?

A. Yes. The setup cannot disappear because the client prefers the earlier slot. We need to revise the scene order or timing with the people responsible for the work.

B. That shooting schedule does not fit the tasks. The move takes thirty-five minutes, and setup at B takes another forty-five. Those steps cannot overlap in this plan.

C. Route the proposed change order through the approval process. A client request explains why the change is being assessed, but it does not make every consequence approved.

D. Call that a forecast cost floor, not an approved budget. Known additions bring us to at least twenty-six thousand, and the possible overtime remains an open amount.

Answers and explanations, page 117

> **One useful distinction**
>
> The 35-minute move and 45-minute setup are consecutive in this plan: 80 minutes after 12:00 gives 13:20. The 12:30 filming slot is short by 50 minutes, even without additional delay.

E Conversation

The location move does not fit the call sheet

The location move does not fit the call sheet

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

location permit / shooting schedule / setup / forecast cost / cost report / call sheet / meal break / change order / company move / critical dependency

01 **Leena:** Can you sanity-check the second-location plan? We wrap at A at noon, but the client has put the first interview at B at twelve thirty.

02 **Grant:** That [1] _____ does not fit the tasks. The move takes thirty-five minutes, and setup at B takes another forty-five. Those steps cannot overlap in this plan.

03 **Leena:** So the thirty-minute gap is not enough even for the move alone.

04 **Grant:** Correct. The [2] _____ finishes at twelve thirty-five at the earliest. Then we still need setup. We should show the full dependency instead of compressing it into a travel note.

05 **Leena:** That makes the earliest filming start thirteen twenty, before any extra delay.

06 **Grant:** Yes. The [3] _____ cannot disappear because the client prefers the earlier slot. We need to revise the scene order or timing with the people responsible for the work.

07 **Leena:** I will ask about moving the interview. Meanwhile, should we flag the timing conflict before anyone distributes that call sheet?

08 **Grant:** Revise the [4] _____ once the plan is agreed, and flag the current conflict clearly in the meantime. The crew should not receive an impossible time as though it were settled.

09 **Leena:** The transport quote adds seven hundred fifty dollars, and the extra equipment adds two hundred fifty.

10 **Grant:** Record those in the [5] _____. They total one thousand dollars. The timing change may also affect overtime, but we have not priced that exposure yet.

Conversation continues on the next page.

The location move does not fit the call sheet

CONVERSATION / CONTINUED

11 **Leena:** The current approved budget is twenty-five thousand. Can I say the revised budget is twenty-six thousand?

12 **Grant:** Call that a [6] _____ floor, not an approved budget. Known additions bring us to at least twenty-six thousand, and the possible overtime remains an open amount.

13 **Leena:** We also need to know whether Location B permits the later filming and exit times.

14 **Grant:** Check the [7] _____ and the relevant access agreement. Moving the interview may solve one conflict while creating another, so we should confirm the actual conditions.

15 **Leena:** Someone suggested using the crew's break to recover the lost time. I do not want that assumed in the plan.

16 **Grant:** Agreed. The [8] _____ and other required safeguards stay protected. We must solve the schedule within the relevant working conditions, not hide the gap in time the crew is entitled to.

17 **Leena:** I will present a revised timing option with the known costs and the overtime question.

18 **Grant:** Route the proposed [9] _____ through the approval process. A client request explains why the change is being assessed, but it does not make every consequence approved.

19 **Leena:** Once a decision is made, both the crew schedule and the financial record should reflect it.

20 **Grant:** Exactly. Keep the [10] _____ visible: move first, setup next, filming after that. Then the team can make a real production decision instead of inheriting an optimistic thirty-minute gap.

CHECK THE GAPS

1. shooting schedule / **2.** company move / **3.** setup / **4.** call sheet / **5.** cost report / **6.** forecast cost / **7.** location permit / **8.** meal break / **9.** change order / **10.** critical dependency

Why these answers fit, page 118

F Check accuracy and scope

The location move does not fit the call sheet

Return to the case

A revised shoot plan ends work at Location A at 12:00 and starts filming at Location B at 12:30. The company move takes 35 minutes, followed by 45 minutes of setup; these tasks cannot overlap in this plan. The earliest filming start is therefore 13:20, before any extra delay. The approved budget is $25,000. New transport costs $750 and added equipment costs $250; possible overtime remains unpriced. Producer Leena and first assistant director Grant must revise the plan without cutting required breaks or treating the new costs as approved.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. Which wording distinguishes estimate and authority?

A. Missing prices should be entered as approved zero costs.

B. The revised estimate needs approval before it becomes an authorized budget change.

C. An estimate is the same as permission to spend.

D. The client deadline approves every extra cost.

2. Which response preserves the stated safeguards?

A. Remove required breaks to recover the fifty minutes.

B. Hide the location move from the crew.

C. Mark overtime paid before it is priced or approved.

D. Revise scene order and timing while preserving required breaks and conditions.

Answers and explanations, page 120

Listen for the distinction

Swap roles for turns 11-20; distinguish known additions from unpriced overtime.

A precise no can preserve the shoot

Production teams may feel pressure to accept an optimistic schedule to keep a client happy. State the dependency and arithmetic, then offer a planning decision. Avoid making the crew absorb an impossible promise through skipped safeguards or undocumented overtime.

F Say it / transfer to a new case

Calculate a second location move

Filming at Site C ends at 10:00. A 25-minute move is followed by 35 minutes of setup, with no overlap. New transport costs $400 and equipment $150; both need approval.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

60 / 550 / approval / 11:00

01 **Producer:** The total move-and-setup time is [1] _____ minutes.

02 **First AD:** The earliest filming start is [2] _____.

03 **Producer:** The known additional cost is [3] _____ dollars.

04 **First AD:** Those additional costs still need [4] _____.

CHECK THE GAPS

1. 60 / **2.** 11:00 / **3.** 550 / **4.** approval

Why these answers fit, page 120

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "The location move does not fit the call sheet". Leena: "We also need to know whether Location B permits the later filming and exit times." Grant: [missing response] Leena: "Someone suggested using the crew's break to recover the lost time. I do not want that assumed in the plan." Which response belongs in the gap?

A. That shooting schedule does not fit the tasks. The move takes thirty-five minutes, and setup at B takes another forty-five. Those steps cannot overlap in this plan.

B. Check the location permit and the relevant access agreement. Moving the interview may solve one conflict while creating another, so we should confirm the actual conditions.

C. Record those in the cost report. They total one thousand dollars. The timing change may also affect overtime, but we have not priced that exposure yet.

D. Call that a forecast cost floor, not an approved budget. Known additions bring us to at least twenty-six thousand, and the possible overtime remains an open amount.

Answers and explanations, page 121

Review 1 / Meaning and context

Use language from the lessons you have completed. Choose one answer per question.

> **Case file**
>
> Revisit "Creative Briefs and Development Notes" and "Production Planning and Budget". Choose precise terminology, then reconstruct the missing responses using both neighboring turns. The final two questions also revisit earlier conversations.

1. A colleague needs the term for this meaning: The main message the communication should convey. Which term fits?

A. storyboard
B. single-minded proposition
C. cutdown
D. visual hierarchy

2. A colleague needs the term for this meaning: The time a person or department is required to report. Which term fits?

A. call sheet
B. location permit
C. call time
D. contingency

3. Rebuild the exchange from "What does premium and energetic actually mean?". Sora: "I can send one. I want the team to discuss the editing, not reproduce its entire visual style." Ellis: [missing response] Sora: "The main film needs to be thirty seconds. It will appear in the normal wide player on the website." Which response belongs in the gap?

A. That helps. Let us sharpen the creative brief before we choose a style. Who should the film speak to, and what should they understand about the product by the end?
B. Good. We will label it as a reference film for rhythm only. That avoids turning one useful example into an instruction to imitate every shot, color, or music choice.
C. Then the cutdown stays outside the confirmed scope for now. Vertical reframing may affect the shots and text, so I will not describe it as automatically included.
D. We can use a close-up to show important details and let the edit supply momentum. Faster does not have to mean flashing transitions or constant camera movement.

Review 1 / Meaning and context / continued

4. Rebuild the exchange from "The location move does not fit the call sheet". Leena: "I will present a revised timing option with the known costs and the overtime question." Grant: [missing response] Leena: "Once a decision is made, both the crew schedule and the financial record should reflect it." Which response belongs in the gap?

A. Call that a forecast cost floor, not an approved budget. Known additions bring us to at least twenty-six thousand, and the possible overtime remains an open amount.

B. That shooting schedule does not fit the tasks. The move takes thirty-five minutes, and setup at B takes another forty-five. Those steps cannot overlap in this plan.

C. Yes. The setup cannot disappear because the client prefers the earlier slot. We need to revise the scene order or timing with the people responsible for the work.

D. Route the proposed change order through the approval process. A client request explains why the change is being assessed, but it does not make every consequence approved.

Answers and explanations, page 152

A Read the situation

LESSON 03 / RIGHTS, CLEARANCES, AND LICENSING

Compare intended music use with documented permission and explain a publication hold precisely.

> **A music receipt is not the release clearance**
>
> Editor Ada has placed track M17 in a campaign video. A receipt is in the folder, but the available license document describes only organic use on the brand website in the United States from 1 June to 31 August. The planned campaign also includes paid social in the United States and Canada through 30 November. Clearance coordinator Ben has not verified the necessary composition and recording permissions for that expanded use. Under this production's release process, the video stays on hold until the required scope is confirmed or an appropriately cleared replacement is used.

People: Ada, Editor; Ben, Clearance coordinator.

Read the record

Choose one answer per question using the facts above.

1. Which use is described in the available document?

A. Worldwide paid advertising forever
B. Paid social in Canada through November
C. Any use merely because a receipt exists
D. Organic brand-website use in the United States, 1 June to 31 August

2. Which planned use extends beyond that description?

A. Paid social in Canada through 30 November
B. Organic brand-website use in the United States during June
C. The stated August website use
D. The documented United States territory alone

3. What is the local publication status?

A. On hold pending confirmed rights or an appropriately cleared replacement
B. Cleared because the editor likes the track
C. Cleared because there is a payment receipt
D. Automatically cleared if the track is shortened

Answers and explanations, page 122

B Vocabulary in use

CORE TERMS

clearance
Confirmation of permissions required for a particular use.

complete music clearance

musical composition
The underlying music and any lyrics.

identify the musical composition

synchronization license
Permission concerning music used in timed relation to visuals.

review the synchronization license

rights holder
The party controlling a relevant legal right.

identify the rights holder

record label
A company involved in recorded music and potentially controlling recording rights.

verify the record label's authority

territory
The geographical area covered by permission.

confirm the licensed territory

license scope
The boundaries of a granted permission.

verify the license scope

sound recording
A particular recorded performance or production of sound.

identify the sound recording

master-use permission
Permission to use a particular sound recording.

confirm master-use permission

music publisher
An entity administering relevant rights in musical works.

contact the music publisher

chain of title
Records showing ownership or transfer of relevant rights.

examine the chain of title

license term
The period during which the permitted use is authorized.

check the license term

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

clearance CLEARANCE

complete music clearance

Keep the meaning precise: Confirmation of permissions required for a particular use.

master-use permission MASTER-USE PERMISSION

confirm master-use permission

Keep the meaning precise: Permission to use a particular sound recording.

B Precision and professional shorthand

EXTEND YOUR RANGE

paid media

Placement or distribution supported by advertising spend.

clear paid-media use

organic use

Distribution without paid amplification in the specified context.

confirm organic-use rights

usage restriction

A condition limiting how material may be used.

identify usage restrictions

cue sheet

A record of music used in a production and relevant details.

prepare a cue sheet

temporary track

Music used provisionally while the final choice or clearance is pending.

replace the temporary track

library music

Music offered through a catalog under applicable licensing terms.

review library-music terms

royalty-free

A licensing description whose actual payment and use terms must be checked.

verify royalty-free terms

public domain

A status in which relevant copyright protection does not apply in the jurisdiction concerned.

assess public-domain status

release hold

A block on publication pending a required condition.

maintain the release hold

clearance log

A record of rights requests, documents, decisions, and gaps.

update the clearance log

rights extension

An agreed expansion of the period or scope of permission.

request a rights extension

replacement cue

A substitute music selection for a production.

assess a replacement cue

Say it in context

license term LICENSE TERM

check the license term

Keep the meaning precise: The period during which the permitted use is authorized.

temporary track TEMPORARY TRACK

replace the temporary track

Keep the meaning precise: Music used provisionally while the final choice or clearance is pending.

C Phrases that move the work forward

Identify the asset

We are reviewing music track M17.

Read the actual document

The document describes organic website use in the United States.

Compare the plan

The campaign also includes paid social and Canada through November.

Distinguish rights subjects

We need the relevant composition and recording permissions checked.

Protect publication

The video remains on hold under our release process.

Offer a viable route

We can seek the expanded rights or assess a cleared replacement.

Record the evidence

Link the license and scope decision in the clearance log.

Separate edit and release

The creative edit can be ready while public release remains blocked.

Separate payment and permission

The receipt does not establish the complete license scope.

State the documented term

The listed term runs from 1 June to 31 August.

Name the gaps

Channel, territory, and term all need confirmation.

Verify authority

Confirm that the licensor controls the rights it claims to grant.

Avoid a duration shortcut

A shorter extract does not automatically solve the clearance issue.

Keep an alternative conditional

The replacement also needs its intended uses verified.

Distinguish a usage record

A cue sheet documents the music; it does not grant the rights.

Close with a clear condition

Release follows confirmed scope, not an assumed meaning of royalty-free.

Precision in real exchanges

Purpose: State the documented term
Useful wording: The listed term runs from 1 June to 31 August.

Purpose: Compare the plan
Useful wording: The campaign also includes paid social and Canada through November.

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which sentence best identifies the mismatch?

A. The plan extends the documented channel, territory, and term.

B. The receipt proves worldwide perpetual advertising rights.

C. Canada is automatically included in United States-only wording.

D. Paid social is always the same as organic website use.

2. What must be distinguished when checking this recorded track?

A. The underlying composition and the particular recording

B. A cue-sheet entry and an export setting, as the two rights grants

C. The invoice amount and track length, as proof of complete permission

D. The platform upload license and the editor's subscription, without checking the rights holders

3. A colleague needs the term for this meaning: A particular recorded performance or production of sound. Which term fits?

A. sound recording

B. usage restriction

C. release hold

D. record label

D Choose the response that fits / continued

4. Rebuild the exchange from "A music receipt is not the release clearance". Ada: "We also planned to run the campaign in Canada. The music file itself does not mention countries." Ben: [missing response] Ada: "And our paid campaign continues through the end of November." Which response belongs in the gap?

A. Yes. A replacement cue is an alternative, not a shortcut around the review. Give the rights team the channels, countries, dates, and versions so it can assess the actual use.

B. The payment record does not establish the full license scope. The document we have describes organic brand-website use in the United States from June first through August thirty-first.

C. The relevant territory is in the license, not inferred from the file. The document names the United States only, so Canada needs to be addressed in the rights review.

D. A shorter extract does not establish clearance. The release hold stays in place under our process until the necessary scope is confirmed or an appropriately cleared replacement is used.

Answers and explanations, page 122

> **One useful distinction**
>
> The composition and the specific recording are distinct rights subjects. A single provider may administer both, but the team must verify its authority and the actual grant. Do not assume a receipt establishes every required permission.

E Conversation

A music receipt is not the release clearance

A music receipt is not the release clearance

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

license scope / master-use permission / cue sheet / license term / paid media / clearance log / replacement cue / musical composition / release hold / territory

01 **Ada:** M17 finally makes the edit work. I found the receipt, but can you check clearance before I mark the export ready for release?

02 **Ben:** The payment record does not establish the full [1] _____. The document we have describes organic brand-website use in the United States from June first through August thirty-first.

03 **Ada:** Our campaign includes paid social as well. Does that fall within the website permission?

04 **Ben:** We have not confirmed [2] _____ coverage. We need the actual grant checked against that plan. I cannot turn organic website wording into paid social permission just because the same video is involved.

05 **Ada:** We also planned to run the campaign in Canada. The music file itself does not mention countries.

06 **Ben:** The relevant [3] _____ is in the license, not inferred from the file. The document names the United States only, so Canada needs to be addressed in the rights review.

E Conversation / continued

07 **Ada:** And our paid campaign continues through the end of November.

08 **Ben:** That also exceeds the documented [4] _____. We have an August end date in the available document and a November end date in the plan. Those dates need an explicit resolution.

09 **Ada:** The provider said it was library music. Should we contact the composer or the performer?

10 **Ben:** First verify who controls the relevant [5] _____ and recording rights. One provider may administer both, but we need evidence of authority and scope rather than guess from the track label.

Conversation continues on the next page.

A music receipt is not the release clearance

CONVERSATION / CONTINUED

11 **Ada:** So permission for the song does not automatically tell us whether this exact recording is covered.

12 **Ben:** Correct. Check the applicable [6] _____ as well. We should map the intended audiovisual use to the permissions actually granted by the authorized parties.

13 **Ada:** The campaign team wants to keep the date. Would using a shorter extract change the clearance question, or would we still need the wider grant?

14 **Ben:** A shorter extract does not establish clearance. The [7] _____ stays in place under our process until the necessary scope is confirmed or an appropriately cleared replacement is used.

15 **Ada:** I can identify another cue, but I assume we must check that one too.

16 **Ben:** Yes. A [8] _____ is an alternative, not a shortcut around the review. Give the rights team the channels, countries, dates, and versions so it can assess the actual use.

17 **Ada:** I will keep the creative export separate from the publication approval and include the relevant documents.

18 **Ben:** Put the decision and remaining gaps in the [9] _____. That helps the next reviewer see why the edit can be finished while release is still pending.

19 **Ada:** We also need to prepare the music usage record for delivery.

20 **Ben:** Prepare the [10] _____, but keep its purpose clear. It records the cue used; it does not replace the rights grant or turn the unresolved campaign scope into an approval.

CHECK THE GAPS

1. license scope / **2.** paid media / **3.** territory / **4.** license term / **5.** musical composition / **6.** master-use permission / **7.** release hold / **8.** replacement cue / **9.** clearance log / **10.** cue sheet

Why these answers fit, page 123

F Check accuracy and scope

A music receipt is not the release clearance

Return to the case

Editor Ada has placed track M17 in a campaign video. A receipt is in the folder, but the available license document describes only organic use on the brand website in the United States from 1 June to 31 August. The planned campaign also includes paid social in the United States and Canada through 30 November. Clearance coordinator Ben has not verified the necessary composition and recording permissions for that expanded use. Under this production's release process, the video stays on hold until the required scope is confirmed or an appropriately cleared replacement is used.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. Which item is not itself a rights grant?

A. A verified license covering the actual use
B. An authorized extension with the relevant scope
C. Permission from the appropriate rights controller
D. A cue sheet listing the music used

2. Which next action respects the release process?

A. Publish first and ask only if challenged.
B. Shorten the extract and assume it is cleared.
C. Relabel the file royalty-free without reading terms.
D. Seek the expanded permissions or verify a replacement before release.

Answers and explanations, page 125

Listen for the distinction

Swap roles for turns 11-20; separate composition, recording, and usage documentation.

Separate creative preference from permission

A track can become emotionally attached to an edit, making a clearance objection feel like a creative rejection. Explain the missing permission dimensions and the available review routes. A temporary track is a production choice, not evidence of public-use rights.

F Say it / transfer to a new case

Identify a second music-use gap

A document for cue C8 covers organic website use in France through 30 September. The proposed use adds paid social in Germany through 31 December. Expanded permission is unconfirmed.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

31 December / 30 September / France / Germany

01 **Editor:** The documented territory is [1] _____.

02 **Coordinator:** The new territory needing review is [2] _____.

03 **Editor:** The documented end date is [3] _____.

04 **Coordinator:** The proposed end date is [4] _____.

CHECK THE GAPS

1. France / **2.** Germany / **3.** 30 September / **4.** 31 December

Why these answers fit, page 125

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "A music receipt is not the release clearance". Ada: "The campaign team wants to keep the date. Would using a shorter extract change the clearance question, or would we still need the wider grant?" Ben: [missing response] Ada: "I can identify another cue, but I assume we must check that one too." Which response belongs in the gap?

A. A shorter extract does not establish clearance. The release hold stays in place under our process until the necessary scope is confirmed or an appropriately cleared replacement is used.

B. Yes. A replacement cue is an alternative, not a shortcut around the review. Give the rights team the channels, countries, dates, and versions so it can assess the actual use.

C. The relevant territory is in the license, not inferred from the file. The document names the United States only, so Canada needs to be addressed in the rights review.

D. The payment record does not establish the full license scope. The document we have describes organic brand-website use in the United States from June first through August thirty-first.

Answers and explanations, page 126

A Read the situation

LESSON 04 / TALENT, CONTRACTS, AND APPROVALS

Coordinate version-specific talent approval and explain a schedule conflict without assuming silence means consent.

A delivery target arrives before the review window ends

For campaign F29, the fictional talent agreement allows 48 elapsed hours after confirmed receipt of the complete review package. The package includes the main film and vertical version. It is received Monday at 10:00, so the full window ends Wednesday at 10:00; all times use the same time zone. The delivery calendar targets Tuesday at 17:00. Approval may arrive earlier, but none has yet been received and silence is not deemed approval under the stated terms. Coordinator Mina must agree submission ownership and a realistic delivery message with producer Joel.

People: Mina, Talent coordinator; Joel, Producer.

Read the record

Choose one answer per question using the facts above.

1. When does the full review window end?

A. Monday at 17:00
B. Wednesday at 10:00
C. Tuesday at 10:00
D. Tuesday at 17:00

2. What must the complete package include here?

A. The main film and vertical version
B. Only a thumbnail
C. Only the main film
D. A verbal summary without files

3. What does silence mean under these terms?

A. It is not deemed approval.
B. Automatic approval at Tuesday's target
C. Approval of every future version
D. Permission to remove the review requirement

Answers and explanations, page 127

B Vocabulary in use

CORE TERMS

talent agreement
A contract governing a performer's engagement and relevant uses.

review the talent agreement

review window
The time allowed for a specified assessment.

calculate the review window

receipt confirmation
Evidence that the relevant recipient received the materials.

obtain receipt confirmation

business days
Working days as defined by the relevant agreement or process.

define business days

version identifier
A label distinguishing one specific file or revision.

preserve the version identifier

consolidated notes
Feedback combined into a coordinated set.

request consolidated notes

approval right
A contractual right to review and approve specified material.

respect the approval right

complete submission
Delivery of all materials required to start the stated review.

confirm a complete submission

elapsed hours
Continuous hours passing from a stated starting point.

count elapsed hours

deemed approval
Approval treated as occurring under a specified contractual condition.

check deemed-approval wording

approval tracker
A record of submissions, recipients, deadlines, and decisions.

maintain an approval tracker

revision round
A defined cycle of feedback and changes.

schedule a revision round

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

talent agreement TALENT AGREEMENT

review the talent agreement

Keep the meaning precise: A contract governing a performer's engagement and relevant uses.

elapsed hours ELAPSED HOURS

count elapsed hours

Keep the meaning precise: Continuous hours passing from a stated starting point.

B Precision and professional shorthand

EXTEND YOUR RANGE

final cut

A specified completed edit, subject to the actual approval arrangement.

identify the final cut

talent representative

A person authorized to act for a performer in relevant matters.

contact the talent representative

residual

A payment for qualifying further use under applicable terms.

check residual obligations

likeness

A person's recognizable image or representation.

confirm likeness rights

digital replica

A digital representation of a person's likeness or voice.

assess digital-replica terms

pickup shot

Additional footage captured to complete or supplement an edit.

plan a pickup shot

picture lock

The stage at which picture editing is fixed for subsequent work.

confirm picture lock

usage buyout

A negotiated payment arrangement for specified usage rights.

define the usage buyout

exclusivity clause

A term restricting specified competing engagements or uses.

review the exclusivity clause

voice usage

The permitted use of a person's recorded or synthesized voice.

define voice usage

reshoot

Filming material again after the original shoot.

scope a reshoot

approval record

Evidence of the actual decision on specified material.

retain the approval record

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

revision round REVISION ROUND

schedule a revision round

Keep the meaning precise: A defined cycle of feedback and changes.

residual RESIDUAL

check residual obligations

Keep the meaning precise: A payment for qualifying further use under applicable terms.

C Phrases that move the work forward

Locate the governing term

The agreement allows forty-eight elapsed hours.

List the required versions

The package contains the main film and vertical version.

Identify the conflict

Tuesday's delivery target comes before that window ends.

Avoid assumed consent

Silence is not deemed approval under these terms.

Track the actual file

Record the version identifier with every approval.

Preserve the answer boundary

A request for acceleration is not acceptance of it.

Separate creative and contractual status

Picture lock does not itself establish talent approval.

Keep the client message accurate

We are awaiting the specified approval before final delivery.

Confirm the start event

The complete package was received Monday at 10:00.

Calculate the window

The full review period ends Wednesday at 10:00.

Keep an early response conditional

Approval may arrive earlier, but it has not arrived yet.

Name the submission owner

Mina will coordinate the package and receipt confirmation.

Request a faster review

Can the representative agree to an accelerated review?

Coordinate feedback

Please return one consolidated set of notes where the process permits.

Check a changed export

Confirm whether this revision requires a new review.

Close the record

Retain the decision, version, recipient, and timestamp together.

Precision in real exchanges

Purpose: Calculate the window
Useful wording: The full review period ends Wednesday at 10:00.

Purpose: Identify the conflict
Useful wording: Tuesday's delivery target comes before that window ends.

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which client update is accurate?

A. The representative's silence approves the files.

B. Approval of a thumbnail covers every export.

C. Approval is pending; the full window ends Wednesday at 10:00, after Tuesday's target.

D. Tuesday's target automatically shortens the review.

2. Which calculation follows the stated terms?

A. The clock starts whenever the editor opens the project.

B. Monday 10:00 plus 48 elapsed hours equals Wednesday 10:00.

C. Monday 10:00 plus 48 hours equals Tuesday 10:00.

D. Forty-eight elapsed hours always means two local business days.

3. A colleague needs the term for this meaning: Delivery of all materials required to start the stated review. Which term fits?

A. digital replica

B. version identifier

C. talent representative

D. complete submission

D Choose the response that fits / continued

4. Rebuild the exchange from "A delivery target arrives before the review window ends". Joel: "Forty-eight hours takes us to Wednesday at ten, using the same time zone." Mina: [missing response] Joel: "They might answer on Tuesday. I do not want to tell the client that Wednesday is certain if an earlier response is possible." Which response belongs in the gap?

A. Agreed. The review window ends Wednesday, but approval could arrive sooner. We should communicate the dependency without pretending either the early response or a delay is already decided.

B. Correct. Those are elapsed hours, not an assumed business-day calculation. The calendar needs to show that full window, even though our preferred delivery time is earlier.

C. I will contact the talent representative. I will distinguish our request from their answer and record any agreed change. Until then, the original window remains the planning basis.

D. I can request consolidated notes where the process permits. We will still preserve who gave the feedback and what it concerns, rather than merge away a substantive disagreement.

Answers and explanations, page 127

> **One useful distinction**
>
> Forty-eight elapsed hours is not the same as two business days unless the agreement makes them equivalent. This case expressly uses elapsed hours and one time zone. The full window ends Wednesday at 10:00.

E Conversation

A delivery target arrives before the review window ends

A delivery target arrives before the review window ends

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

review window / Picture lock / consolidated notes / elapsed hours / approval record / talent representative / complete submission / approval tracker / deemed approval / talent agreement

01 **Joel:** The client wants F29 Tuesday at five. I see Monday's submission in the tracker, but no decision. How much of the review window is still left?

02 **Mina:** Approval is still pending. The [1] _____ allows forty-eight elapsed hours after confirmed receipt of the complete package. We received confirmation for Monday at ten, but no approval decision.

03 **Joel:** Was that package complete, including the vertical version?

04 **Mina:** Yes. The [2] _____ contained the main film and vertical version. I will keep the file identifiers with the receipt so we know exactly what the representative is reviewing.

05 **Joel:** Forty-eight hours takes us to Wednesday at ten, using the same time zone.

06 **Mina:** Correct. Those are [3] _____, not an assumed business-day calculation. The calendar needs to show that full window, even though our preferred delivery time is earlier.

E Conversation / continued

07 **Joel:** They might answer on Tuesday. I do not want to tell the client that Wednesday is certain if an earlier response is possible.

08 **Mina:** Agreed. The [4] _____ ends Wednesday, but approval could arrive sooner. We should communicate the dependency without pretending either the early response or a delay is already decided.

09 **Joel:** Could we treat no response by Tuesday afternoon as consent?

10 **Mina:** No. The stated terms do not provide [5] _____. A deadline on our internal calendar does not create that mechanism. Silence cannot be turned into a positive decision here.

Conversation continues on the next page.

A delivery target arrives before the review window ends

CONVERSATION / CONTINUED

11 **Joel:** Then please ask whether the representative can accommodate an accelerated review.

12 **Mina:** I will contact the [6] _____. I will distinguish our request from their answer and record any agreed change. Until then, the original window remains the planning basis.

13 **Joel:** If we receive notes, I would like one coordinated list instead of conflicting messages from several people.

14 **Mina:** I can request [7] _____ where the process permits. We will still preserve who gave the feedback and what it concerns, rather than merge away a substantive disagreement.

15 **Joel:** The editor says picture is locked. Does that make the remaining review only a formality?

16 **Mina:** No. [8] _____ describes an editing stage. It does not cancel the approval right. If a requested change affects the edit, we must assess it under the actual agreement and schedule.

17 **Joel:** Can you own the submission and follow-up? I need one place to check which files were received and whether the decision covers them.

18 **Mina:** I will own the [9] _____. If a file changes, I will check whether it needs a new review and keep that separate from any decision on the previous version.

19 **Joel:** I will tell the client approval is pending, the full window ends Wednesday at ten, and we have requested an earlier response.

20 **Mina:** That is accurate. Once we have an [10] _____, we can update the delivery status. Until then, a requested acceleration and a locked edit must not be reported as completed approval.

CHECK THE GAPS

1. talent agreement / **2.** complete submission / **3.** elapsed hours / **4.** review window / **5.** deemed approval / **6.** talent representative / **7.** consolidated notes / **8.** Picture lock / **9.** approval tracker / **10.** approval record

Why these answers fit, page 128

F Check accuracy and scope

A delivery target arrives before the review window ends

Return to the case

For campaign F29, the fictional talent agreement allows 48 elapsed hours after confirmed receipt of the complete review package. The package includes the main film and vertical version. It is received Monday at 10:00, so the full window ends Wednesday at 10:00; all times use the same time zone. The delivery calendar targets Tuesday at 17:00. Approval may arrive earlier, but none has yet been received and silence is not deemed approval under the stated terms. Coordinator Mina must agree submission ownership and a realistic delivery message with producer Joel.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. Which action is supported?

A. Ask whether an accelerated review can be agreed without assuming acceptance.
B. Announce an accelerated window before anyone agrees.
C. Remove the vertical version from the recorded package after receipt.
D. Treat any positive informal comment as final approval.

2. What should the approval record identify?

A. The particular version, decision, recipient, and timestamp
B. Only the production's nickname
C. A guessed approval based on the deadline
D. Every future edit regardless of changes

Answers and explanations, page 130

Listen for the distinction

Swap roles for turns 11-20; request acceleration without reporting it as agreed.

Treat approval as a documented event

Creative teams often use casual phrases such as they seemed happy or we should be fine. Those impressions do not establish approval of a particular version. State who received what, when the review began, and what decision is still outstanding.

F Say it / transfer to a new case

Track a second review window

A fictional agreement allows 24 elapsed hours after complete receipt, with no deemed approval. The package is received Thursday at 14:00 in the same time zone used for all deadlines. The client target is Friday at 09:00; approval is pending.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

Friday at 09:00 / Friday at 14:00 / approval / Thursday at 14:00

01 **Coordinator:** Receipt was confirmed on [1] _____.

02 **Producer:** The full window ends on [2] _____.

03 **Coordinator:** The earlier client target is [3] _____.

04 **Producer:** Silence is not deemed [4] _____.

CHECK THE GAPS

1. Thursday at 14:00 / **2.** Friday at 14:00 / **3.** Friday at 09:00 / **4.** approval

Why these answers fit, page 130

F Say it / transfer to a new case / continued

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "A delivery target arrives before the review window ends". Joel: "If we receive notes, I would like one coordinated list instead of conflicting messages from several people." Mina: [missing response] Joel: "The editor says picture is locked. Does that make the remaining review only a formality?" Which response belongs in the gap?

A. Approval is still pending. The talent agreement allows forty-eight elapsed hours after confirmed receipt of the complete package. We received confirmation for Monday at ten, but no approval decision.

B. I will contact the talent representative. I will distinguish our request from their answer and record any agreed change. Until then, the original window remains the planning basis.

C. I can request consolidated notes where the process permits. We will still preserve who gave the feedback and what it concerns, rather than merge away a substantive disagreement.

D. Agreed. The review window ends Wednesday, but approval could arrive sooner. We should communicate the dependency without pretending either the early response or a delay is already decided.

Answers and explanations, page 131

Review 2 / Meaning and context

Use language from the lessons you have completed. Choose one answer per question.

> **Case file**
>
> Revisit "Rights, Clearances, and Licensing" and "Talent, Contracts, and Approvals". Choose precise terminology, then reconstruct the missing responses using both neighboring turns. The final two questions also revisit earlier conversations.

1. A colleague needs the term for this meaning: The underlying music and any lyrics. Which term fits?

A. musical composition

B. organic use

C. music publisher

D. public domain

2. A colleague needs the term for this meaning: Approval treated as occurring under a specified contractual condition. Which term fits?

A. deemed approval

B. final cut

C. likeness

D. talent agreement

3. Rebuild the exchange from "The location move does not fit the call sheet". Leena: "The transport quote adds seven hundred fifty dollars, and the extra equipment adds two hundred fifty." Grant: [missing response] Leena: "The current approved budget is twenty-five thousand. Can I say the revised budget is twenty-six thousand?" Which response belongs in the gap?

A. Check the location permit and the relevant access agreement. Moving the interview may solve one conflict while creating another, so we should confirm the actual conditions.

B. Call that a forecast cost floor, not an approved budget. Known additions bring us to at least twenty-six thousand, and the possible overtime remains an open amount.

C. That shooting schedule does not fit the tasks. The move takes thirty-five minutes, and setup at B takes another forty-five. Those steps cannot overlap in this plan.

D. Record those in the cost report. They total one thousand dollars. The timing change may also affect overtime, but we have not priced that exposure yet.

Review 2 / Meaning and context / continued

4. Rebuild the exchange from "A delivery target arrives before the review window ends". Joel: "Can you own the submission and follow-up? I need one place to check which files were received and whether the decision covers them." Mina: [missing response] Joel: "I will tell the client approval is pending, the full window ends Wednesday at ten, and we have requested an earlier response." Which response belongs in the gap?

A. I will own the approval tracker. If a file changes, I will check whether it needs a new review and keep that separate from any decision on the previous version.

B. Yes. The complete submission contained the main film and vertical version. I will keep the file identifiers with the receipt so we know exactly what the representative is reviewing.

C. Approval is still pending. The talent agreement allows forty-eight elapsed hours after confirmed receipt of the complete package. We received confirmation for Monday at ten, but no approval decision.

D. No. The stated terms do not provide deemed approval. A deadline on our internal calendar does not create that mechanism. Silence cannot be turned into a positive decision here.

Answers and explanations, page 154

A Read the situation

LESSON 05 / DISTRIBUTION AND WINDOWING

Compare distribution offers across fee, rights, territory, term, and exclusivity without inventing net value.

The larger fee also sells a broader restriction

For documentary North Line, Offer A proposes a flat $30,000 fee for exclusive worldwide video-on-demand rights for 24 months. Offer B proposes a flat $22,000 fee for nonexclusive advertising-supported video-on-demand rights in the United States for six months. Both proposed terms would begin on the same date, but neither deal is signed. Delivery costs, taxes, and other deductions are not supplied; available underlying rights still require verification. Sales lead Priya and producer Mason must compare the offers without choosing solely by fee or assuming both can be accepted unchanged.

People: Priya, Distribution sales lead; Mason, Producer.

Read the record

Choose one answer per question using the facts above.

1. Which offer has the larger headline fee?

A. Neither specifies a fee
B. A, at $30,000
C. B, at $22,000
D. Both are $30,000

2. Which offer is narrower in stated territory and duration?

A. A: worldwide, 24 months
B. Both are worldwide forever
C. Neither specifies a duration
D. B: United States, six months

3. Can both be accepted unchanged without examining overlap?

A. Yes; B's nonexclusivity overrides A automatically.
B. Yes; unsigned proposals have already granted both rights.
C. No; A's exclusive rights overlap B's proposed use.
D. Yes; different fees prevent overlap.

Answers and explanations, page 132

B Vocabulary in use

CORE TERMS

distribution window

A defined period or sequence for particular release rights.

plan a distribution window

territorial rights

Rights limited to specified geographic areas.

define territorial rights

exclusive license

Permission reserving the specified licensed use to the licensee under its terms.

negotiate an exclusive license

nonexclusive license

Permission that does not itself reserve the use to one licensee.

offer a nonexclusive license

video on demand (VOD)

Content available for viewing at a user's chosen time.

license VOD rights

advertising-supported VOD (AVOD)

On-demand viewing funded through advertising under the service model.

compare AVOD offers

subscription VOD (SVOD)

On-demand viewing under a subscription service model.

define SVOD rights

transactional VOD (TVOD)

On-demand viewing paid for per rental or purchase.

negotiate TVOD terms

free ad-supported streaming TV (FAST)

Scheduled streaming channels available without subscription and supported by ads.

evaluate FAST distribution

holdback

A contractual restriction delaying another release or use.

review the holdback

carve-out

An explicit exception to a broader rights restriction.

negotiate a carve-out

rights reversion

Return or expiration of granted rights under the agreement.

confirm rights reversion

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

distribution window DISTRIBUTION WINDOW

plan a distribution window

Keep the meaning precise: A defined period or sequence for particular release rights.

advertising-supported VOD (AVOD) ADVERTISING-SUPPORTED VOD (AVOD)

compare AVOD offers

Keep the meaning precise: On-demand viewing funded through advertising under the service model.

B Precision and professional shorthand

EXTEND YOUR RANGE

license fee
Payment for the specified permission.
compare license fees

revenue share
An agreed division of defined income.
calculate revenue share

distribution fee
An amount charged for distribution services under the agreement.
verify the distribution fee

localization
Adapting content for a language or market.
price localization

geoblocking
Restricting access based on geographic location.
verify geoblocking requirements

rights grid
A table mapping rights by territory, medium, and period.
maintain the rights grid

minimum guarantee
A contractually specified minimum payment, often linked to later accounting.
review the minimum guarantee

recoupment
Recovery of specified amounts from defined revenues.
examine recoupment terms

delivery specification
Technical and material requirements for supplied content.
check delivery specifications

caption file
A file carrying timed text for accessible or translated presentation.
deliver the caption file

avails
Information about the rights and periods available for licensing.
update the avails

net receipts
Income remaining after the deductions defined by the agreement.
define net receipts

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

rights reversion RIGHTS REVERSION

confirm rights reversion

Keep the meaning precise: Return or expiration of granted rights under the agreement.

distribution fee DISTRIBUTION FEE

verify the distribution fee

Keep the meaning precise: An amount charged for distribution services under the agreement.

C Phrases that move the work forward

Start with the headline

Offer A pays $30,000 and Offer B pays $22,000.

Add the missing context

The larger fee comes with broader exclusive rights.

State A's duration

A proposes twenty-four months.

State B's duration

B proposes six months.

Name the territorial difference

A is worldwide; B is United States only.

Separate the media scopes

A covers VOD broadly, while B specifies AVOD.

Preserve proposal status

Neither offer is signed.

Identify the overlap

A's exclusive scope overlaps B's proposed use.

Reject an automatic combination

We cannot simply accept both unchanged.

Explore a negotiated route

We could ask whether A will agree to an AVOD carve-out.

Keep the request conditional

A requested carve-out is not a granted exception.

Verify available rights

Check the underlying rights and existing commitments first.

Avoid a net-value claim

We do not yet have the delivery costs or deductions.

Make definitions explicit

Net receipts depend on the actual agreement.

Record the comparison

Put fee, term, territory, media, and exclusivity on one rights grid.

Close without premature selection

The fee comparison is clear; the full commercial decision is still open.

Precision in real exchanges

Purpose: State B's duration
Useful wording: B proposes six months.

Purpose: Name the territorial difference
Useful wording: A is worldwide; B is United States only.

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which comparison captures the main trade-off?

A. A pays more for broader, longer exclusive rights; B pays less for narrower, shorter nonexclusive rights.

B. A is automatically more profitable because its fee is larger.

C. B grants worldwide exclusive rights for 24 months.

D. Both offers grant identical rights.

2. Why does B's nonexclusive wording not solve the conflict?

A. Only territories matter, never media or time.

B. It does not override the exclusivity A would receive in the overlapping scope.

C. Nonexclusive always means no rights are granted.

D. B's smaller fee legally cancels A.

3. A colleague needs the term for this meaning: Permission that does not itself reserve the use to one licensee. Which term fits?

A. revenue share

B. geoblocking

C. nonexclusive license

D. free ad-supported streaming TV (FAST)

D Choose the response that fits / continued

4. Rebuild the exchange from "The larger fee also sells a broader restriction". Mason: "Could we take both fees? B is nonexclusive, so it sounds compatible with another service." Priya: [missing response] Mason: "Then accepting A unchanged would conflict with the proposed B grant." Which response belongs in the gap?

A. B's nonexclusive license does not cancel A's exclusivity. Both offers begin on the same date, and A's worldwide VOD scope includes the United States use that B wants.

B. Correct. An exclusive license has to be assessed across medium, territory, and time. We cannot avoid the overlap simply by putting the proposals on different lines in a spreadsheet.

C. Do not assume so. Advertising-supported VOD names its stated service model. A scheduled FAST channel is a different format that needs its own rights description in the agreement.

D. We could negotiate a carve-out. That is a possible negotiating route, not a term already granted. The exact AVOD scope and any other restrictions would need clear wording.

Answers and explanations, page 132

One useful distinction

The $8,000 fee difference does not establish an $8,000 difference in profit or overall value. A grants broader and longer exclusive rights. Costs, deductions, existing commitments, and future opportunities require their own review.

E Conversation

The larger fee also sells a broader restriction

The larger fee also sells a broader restriction

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

license fee / carve-out / delivery specification / nonexclusive license / exclusive license / rights grid / rights reversion / net receipts / distribution window / Advertising-supported VOD

01 **Mason:** A is eight thousand higher. Before I recommend it, what would we be giving up that is not obvious from the fee column?

02 **Priya:** The [1] _____ is larger, but the rights package is different. A wants worldwide exclusive VOD rights for twenty-four months. B wants United States AVOD rights for six months, nonexclusively.

03 **Mason:** So B leaves more future options open, at least under its own proposed restriction.

04 **Priya:** Yes, but we still need the [2] _____ and underlying permissions checked. We should not promise that every unmentioned right is freely available when we have not verified existing commitments.

05 **Mason:** Could we take both fees? B is nonexclusive, so it sounds compatible with another service.

06 **Priya:** B's [3] _____ does not cancel A's exclusivity. Both offers begin on the same date, and A's worldwide VOD scope includes the United States use that B wants.

07 **Mason:** Then accepting A unchanged would conflict with the proposed B grant.

08 **Priya:** Correct. An [4] _____ has to be assessed across medium, territory, and time. We cannot avoid the overlap simply by putting the proposals on different lines in a spreadsheet.

09 **Mason:** Could we ask A to leave advertising-supported viewing out of its exclusivity?

10 **Priya:** We could negotiate a [5] _____. That is a possible negotiating route, not a term already granted. The exact AVOD scope and any other restrictions would need clear wording.

Conversation continues on the next page.

The larger fee also sells a broader restriction

CONVERSATION / CONTINUED

11 **Mason:** I also want to know when we could offer the film elsewhere after A's period.

12 **Priya:** Check [6] _____ and any holdbacks in the actual draft. A headline twenty-four-month term does not tell us every end-of-term obligation or permitted next release.

13 **Mason:** The summary labels the thirty thousand net income, but delivery and localization are still unpriced. Can we fix that label before it reaches the producer?

14 **Priya:** Then it should not label that [7] _____. We only have the flat headline fee here. Delivery costs, taxes, and other deductions are not supplied, so the net comparison is incomplete.

15 **Mason:** B specifically wants advertising-supported on-demand rights. Does that automatically include scheduled free streaming channels?

16 **Priya:** Do not assume so. [8] _____ names its stated service model. A scheduled FAST channel is a different format that needs its own rights description in the agreement.

17 **Mason:** We should ask each buyer for its technical package before estimating delivery effort.

18 **Priya:** Yes. The [9] _____ may include versions, captions, and localization. Those requirements affect cost and readiness even when the headline fee is fixed.

19 **Mason:** I will keep both offers unsigned in the comparison and show their actual restrictions, not just the money.

20 **Priya:** Good. Then we can assess the [10] _____ and negotiate from a complete picture. A's higher fee is established; its overall superiority is not established by that number alone.

CHECK THE GAPS

1. license fee / **2.** rights grid / **3.** nonexclusive license / **4.** exclusive license / **5.** carve-out / **6.** rights reversion / **7.** net receipts / **8.** Advertising-supported VOD / **9.** delivery specification / **10.** distribution window

Why these answers fit, page 133

F Check accuracy and scope

The larger fee also sells a broader restriction

Return to the case

For documentary North Line, Offer A proposes a flat $30,000 fee for exclusive worldwide video-on-demand rights for 24 months. Offer B proposes a flat $22,000 fee for nonexclusive advertising-supported video-on-demand rights in the United States for six months. Both proposed terms would begin on the same date, but neither deal is signed. Delivery costs, taxes, and other deductions are not supplied; available underlying rights still require verification. Sales lead Priya and producer Mason must compare the offers without choosing solely by fee or assuming both can be accepted unchanged.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. Which statement is unsupported?

A. Neither proposal is signed.
B. Net receipts are exactly $30,000 under A.
C. A's headline fee is $30,000.
D. B's term is six months.

2. Which next step is a proposal rather than an agreement?

A. Publish a worldwide availability claim without checking underlying rights.
B. Ask A to consider a defined AVOD carve-out.
C. State that A has already accepted the carve-out.
D. Mark both deals signed without signatures.

Answers and explanations, page 135

Listen for the distinction

Swap roles for turns 11-20; distinguish a requested carve-out from an agreed one.

Describe the restriction as part of the price

A headline fee can dominate a fast sales conversation. Put the rights granted beside the money received. Questions about exclusivity are not necessarily resistance to a deal; they identify which future choices the offer would remove.

F Say it / transfer to a new case

Compare another pair of offers

Offer C pays $12,000 for exclusive UK SVOD rights for 12 months. Offer D pays $9,000 for nonexclusive French AVOD rights for three months. Neither is signed; no cost figures are supplied.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

12,000 / 12 / France / three

01 **Producer:** C's headline fee is [1] _____ dollars.

02 **Sales lead:** D's territory is [2] _____.

03 **Producer:** C's proposed term is [3] _____ months.

04 **Sales lead:** D's proposed term is [4] _____ months.

CHECK THE GAPS

1. 12,000 / **2.** France / **3.** 12 / **4.** three

Why these answers fit, page 135

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "The larger fee also sells a broader restriction". Mason: "The summary labels the thirty thousand net income, but delivery and localization are still unpriced. Can we fix that label before it reaches the producer?" Priya: [missing response] Mason: "B specifically wants advertising-supported on-demand rights. Does that automatically include scheduled free streaming channels?" Which response belongs in the gap?

A. The license fee is larger, but the rights package is different. A wants worldwide exclusive VOD rights for twenty-four months. B wants United States AVOD rights for six months, nonexclusively.

B. Correct. An exclusive license has to be assessed across medium, territory, and time. We cannot avoid the overlap simply by putting the proposals on different lines in a spreadsheet.

C. Yes, but we still need the rights grid and underlying permissions checked. We should not promise that every unmentioned right is freely available when we have not verified existing commitments.

D. Then it should not label that net receipts. We only have the flat headline fee here. Delivery costs, taxes, and other deductions are not supplied, so the net comparison is incomplete.

Answers and explanations, page 136

A Read the situation

LESSON 06 / AUDIENCE METRICS AND PERFORMANCE

Give a balanced performance readout using distinct counts, rates, and campaign objectives.

More completed plays, but a lower completion rate

Two comparable reporting periods cover the same 30-second video on one platform. Period A records 1,000 eligible starts, 800 complete plays, and estimated reach of 900 accounts. Period B records 2,000 eligible starts, 1,200 complete plays, and estimated reach of 1,500 accounts. A complete play reaches the end; completion rate is complete plays divided by eligible starts. Reach and starts are different measures. Spend and business-outcome data are not supplied. Analyst Felix and account director Dana must replace an unqualified success claim with a precise account of the gains and decline.

People: Dana, Account director; Felix, Audience analyst.

Read the record

Choose one answer per question using the facts above.

1. What is Period B's completion rate?

A. 120%
B. 60%
C. 80%
D. 75%

2. What happened to complete-play count?

A. It rose from 800 to 1,200.
B. It fell from 1,200 to 800.
C. It stayed at 800.
D. It became identical to estimated reach.

3. What is not supplied?

A. Both eligible-start counts
B. Both complete-play counts
C. The video's duration
D. Spend and business-outcome data

Answers and explanations, page 137

B Vocabulary in use

CORE TERMS

reach
The estimated or measured distinct audience under a stated method.

report estimated reach

impression
A recorded presentation of content under the platform's definition.

count impressions

eligible start
A video start included under the report's specified rules.

define eligible starts

complete play
A playback reaching the specified end point.

count complete plays

completion rate
Complete plays divided by the defined eligible-start base.

calculate completion rate

view threshold
The condition a platform uses to count a view.

check the view threshold

watch time
The total time spent viewing content under the specified method.

analyze watch time

average view duration
Viewing time divided by the relevant view count.

compare average view duration

retention curve
A display of audience continuation across a video's timeline.

inspect the retention curve

drop-off
Loss of viewers at a stage or time in playback.

locate the drop-off

frequency
Average exposures per reached audience member on the stated basis.

monitor exposure frequency

unique viewer
A distinct viewer estimated or counted under the measurement method.

estimate unique viewers

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

reach REACH

report estimated reach

Keep the meaning precise: The estimated or measured distinct audience under a stated method.

view threshold VIEW THRESHOLD

check the view threshold

Keep the meaning precise: The condition a platform uses to count a view.

B Precision and professional shorthand

EXTEND YOUR RANGE

repeat play

An additional playback rather than necessarily a new viewer.

distinguish repeat plays

engagement

A defined audience interaction such as a reaction, comment, or share.

define engagement

engagement rate

Defined interactions divided by a specified audience or exposure base.

specify the engagement-rate denominator

click-through rate (CTR)

Clicks divided by the defined impression base.

calculate click-through rate

cost per thousand (CPM)

Cost for one thousand impressions on the stated basis.

compare CPM

cost per view (CPV)

Cost divided by the relevant counted views.

define cost per view

cost per completed view

Cost divided by completed views under the specified rules.

calculate cost per completed view

brand lift

A measured change in a brand-related outcome under a study design.

assess brand lift

attribution window

The time interval used to connect an outcome to an exposure or action.

specify the attribution window

measurement methodology

The rules and process used to produce a metric.

document measurement methodology

benchmark

A defined reference used to interpret performance.

choose a relevant benchmark

business outcome

A commercial result beyond the media exposure itself.

measure business outcomes

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

unique viewer UNIQUE VIEWER

estimate unique viewers

Keep the meaning precise: A distinct viewer estimated or counted under the measurement method.

cost per thousand (CPM) COST PER THOUSAND (CPM)

compare CPM

Keep the meaning precise: Cost for one thousand impressions on the stated basis.

C Phrases that move the work forward

Lead with both results

Complete plays increased, while completion rate declined.

State the rate change

The rate fell from eighty to sixty percent.

Show the denominator

The later period had two thousand eligible starts.

Avoid a viewer claim

Twelve hundred complete plays does not necessarily mean twelve hundred different people.

Request a useful diagnostic

Let us inspect where viewers drop off.

Limit the commercial conclusion

These figures do not establish sales impact.

Avoid a platform shortcut

Confirm the view threshold before comparing another service.

Ask for the right benchmark

Which agreed objective should the result be compared against?

State the count gain

Completions rose from eight hundred to twelve hundred.

Use the correct unit

That is a decline of twenty percentage points.

Keep reach separate

Estimated reach rose from nine hundred to fifteen hundred accounts.

Name the measurement rule

Here, a completion means playback reached the end.

Preserve objective differences

A reach goal and a completion-rate goal are not the same target.

Name the missing cost

Spend is not included in this report.

Make the summary balanced

We reached more accounts and recorded more completions, but fewer starts finished proportionally.

Close with an evidence gap

Cost efficiency and business outcomes still need separate data.

Precision in real exchanges

Purpose: Use the correct unit
Useful wording: That is a decline of twenty percentage points.

Purpose: Show the denominator
Useful wording: The later period had two thousand eligible starts.

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which summary is accurate?

A. Every measure proves an unqualified success.

B. Complete plays rose 50%, but completion rate fell 20 percentage points.

C. Completion rate rose because completion count rose.

D. Reach and complete plays are identical measures.

2. Which denominator produces the stated Period B completion rate?

A. 1,200 complete plays

B. 900 reached accounts from Period A

C. 2,000 eligible starts

D. 1,500 reached accounts

3. A colleague needs the term for this meaning: A playback reaching the specified end point. Which term fits?

A. retention curve

B. attribution window

C. complete play

D. engagement rate

D Choose the response that fits / continued

4. Rebuild the exchange from "More completed plays, but a lower completion rate". Dana: "That is twenty percentage points lower. The complete-play count itself is fifty percent higher." Felix: [missing response] Dana: "Reach rose from nine hundred to fifteen hundred accounts. Can I call those fifteen hundred viewers?" Which response belongs in the gap?

A. Exactly. The completion rate moved from eighty percent to sixty percent. Two thousand starts produced twelve hundred completions, while the earlier thousand starts produced eight hundred.

B. Correct. Keep the eligible start denominator visible. If we quietly switch to reached accounts, we are no longer calculating the completion rate defined in this report.

C. Yes. A repeat play can add another completion without adding a distinct account. Event counts and audience counts are useful, but they answer different questions.

D. Preserve the report's reach definition: estimated accounts. We should not strengthen an account estimate into a verified people count. That qualification matters when the client compares audience numbers.

Answers and explanations, page 137

One useful distinction

Complete plays increased by 400, or 50%, while completion rate fell from 80% to 60%, a decline of 20 percentage points. A larger audience can produce more completions even when a smaller share finishes.

E Conversation

More completed plays, but a lower completion rate

More completed plays, but a lower completion rate

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

eligible start / benchmark / reach / measurement methodology / business outcome / cost per completed view / repeat play / completion rate / retention curve / complete play

01 **Dana:** I have led with the larger reach and more finished plays. Before I send the success summary, is there anything in the retention figures I should bring forward?

02 **Felix:** We should qualify that. The [1] _____ count rose from eight hundred to twelve hundred, but the proportion of eligible starts that finished fell. Both results belong in the summary.

03 **Dana:** The later period had twice as many starts, so the larger completion count does not mean the same rate.

04 **Felix:** Exactly. The [2] _____ moved from eighty percent to sixty percent. Two thousand starts produced twelve hundred completions, while the earlier thousand starts produced eight hundred.

05 **Dana:** That is twenty percentage points lower. The complete-play count itself is fifty percent higher.

06 **Felix:** Correct. Keep the [3] _____ denominator visible. If we quietly switch to reached accounts, we are no longer calculating the completion rate defined in this report.

E Conversation / continued

07 **Dana:** Reach rose from nine hundred to fifteen hundred accounts. Can I call those fifteen hundred viewers?

08 **Felix:** Preserve the report's [4] _____ definition: estimated accounts. We should not strengthen an account estimate into a verified people count. That qualification matters when the client compares audience numbers.

09 **Dana:** And twelve hundred finished plays may include someone watching more than once.

10 **Felix:** Yes. A [5] _____ can add another completion without adding a distinct account. Event counts and audience counts are useful, but they answer different questions.

Conversation continues on the next page.

More completed plays, but a lower completion rate

CONVERSATION / CONTINUED

11 **Dana:** What should we examine to understand the lower proportion finishing?

12 **Felix:** Inspect the [6] _____. It can show where playback drops off. We should not invent the cause from the aggregate rate, but we can identify a useful place to investigate.

13 **Dana:** The video is thirty seconds in both periods, so we are not comparing different lengths.

14 **Felix:** Good. Preserve that and the [7] _____ in the readout. If we later compare another platform, we must check its view and completion definitions before treating the figures as equivalent.

15 **Dana:** The client will ask what each completed view cost. Have we received the spend figures, or is that still a gap in the report?

16 **Felix:** We cannot calculate [8] _____ without spend. More completions alone do not establish better cost efficiency. The answer should identify the missing cost data rather than assume it improved.

17 **Dana:** They may also want to know whether the campaign increased sales.

18 **Felix:** That [9] _____ needs separate evidence and an appropriate attribution approach. Neither the reach increase nor the completion change proves a sales effect.

19 **Dana:** I will report more reached accounts and more complete plays, alongside the lower completion rate and the missing cost and sales data.

20 **Felix:** Then compare those results with the agreed [10] _____. A reach objective and a retention objective may receive different answers. We can be positive about the gains without claiming every objective was met.

CHECK THE GAPS

1. complete play / **2.** completion rate / **3.** eligible start / **4.** reach / **5.** repeat play / **6.** retention curve / **7.** measurement methodology / **8.** cost per completed view / **9.** business outcome / **10.** benchmark

Why these answers fit, page 138

F Check accuracy and scope

More completed plays, but a lower completion rate

Return to the case

Two comparable reporting periods cover the same 30-second video on one platform. Period A records 1,000 eligible starts, 800 complete plays, and estimated reach of 900 accounts. Period B records 2,000 eligible starts, 1,200 complete plays, and estimated reach of 1,500 accounts. A complete play reaches the end; completion rate is complete plays divided by eligible starts. Reach and starts are different measures. Spend and business-outcome data are not supplied. Analyst Felix and account director Dana must replace an unqualified success claim with a precise account of the gains and decline.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. Which claim requires additional evidence?

A. Cost per completed view improved.
B. Period B had more complete plays.
C. Period A's completion rate was 80%.
D. Estimated reach increased.

2. Which diagnostic addresses retention?

A. Treat every repeated play as a new person.
B. Infer sales from reach alone.
C. Inspect the playback retention curve for drop-off points.
D. Replace the denominator with whichever count gives the best rate.

Answers and explanations, page 140

Listen for the distinction

Swap roles for turns 11-20; name what cost and sales claims still require.

Do not make the meeting choose one flattering number

A client may want a simple success story while an analyst sees mixed evidence. Lead with the relevant gains and the important limitation in the same sentence. This avoids both selective praise and an equally selective claim that everything failed.

F Say it / transfer to a new case

Explain another mixed audience result

Period C has 500 eligible starts and 350 complete plays. Period D has 800 eligible starts and 480 complete plays. Use completions divided by starts.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

70% / 130 / ten percentage points / 60%

01 **Director:** C's completion rate is [1] _____.

02 **Analyst:** D's completion rate is [2] _____.

03 **Director:** The completion count rose by [3] _____.

04 **Analyst:** The rate fell by [4] _____.

CHECK THE GAPS

1. 70% / **2.** 60% / **3.** 130 / **4.** ten percentage points

Why these answers fit, page 140

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "More completed plays, but a lower completion rate". Dana: "The video is thirty seconds in both periods, so we are not comparing different lengths." Felix: [missing response] Dana: "The client will ask what each completed view cost. Have we received the spend figures, or is that still a gap in the report?" Which response belongs in the gap?

A. Good. Preserve that and the measurement methodology in the readout. If we later compare another platform, we must check its view and completion definitions before treating the figures as equivalent.

B. We cannot calculate cost per completed view without spend. More completions alone do not establish better cost efficiency. The answer should identify the missing cost data rather than assume it improved.

C. Inspect the retention curve. It can show where playback drops off. We should not invent the cause from the aggregate rate, but we can identify a useful place to investigate.

D. We should qualify that. The complete play count rose from eight hundred to twelve hundred, but the proportion of eligible starts that finished fell. Both results belong in the summary.

Answers and explanations, page 141

Review 3 / Meaning and context

Use language from the lessons you have completed. Choose one answer per question.

> **Case file**
>
> Revisit "Distribution and Windowing" and "Audience Metrics and Performance". Choose precise terminology, then reconstruct the missing responses using both neighboring turns. The final two questions also revisit earlier conversations.

1. A colleague needs the term for this meaning: Permission reserving the specified licensed use to the licensee under its terms. Which term fits?

A. minimum guarantee

B. exclusive license

C. caption file

D. transactional VOD (TVOD)

2. A colleague needs the term for this meaning: Viewing time divided by the relevant view count. Which term fits?

A. cost per completed view

B. reach

C. average view duration

D. repeat play

3. Rebuild the exchange from "A delivery target arrives before the review window ends". Joel: "Could we treat no response by Tuesday afternoon as consent?" Mina: [missing response] Joel: "Then please ask whether the representative can accommodate an accelerated review." Which response belongs in the gap?

A. Agreed. The review window ends Wednesday, but approval could arrive sooner. We should communicate the dependency without pretending either the early response or a delay is already decided.

B. No. The stated terms do not provide deemed approval. A deadline on our internal calendar does not create that mechanism. Silence cannot be turned into a positive decision here.

C. Yes. The complete submission contained the main film and vertical version. I will keep the file identifiers with the receipt so we know exactly what the representative is reviewing.

D. Approval is still pending. The talent agreement allows forty-eight elapsed hours after confirmed receipt of the complete package. We received confirmation for Monday at ten, but no approval decision.

Review 3 / Meaning and context / continued

4. Rebuild the exchange from "More completed plays, but a lower completion rate". Dana: "They may also want to know whether the campaign increased sales." Felix: [missing response] Dana: "I will report more reached accounts and more complete plays, alongside the lower completion rate and the missing cost and sales data." Which response belongs in the gap?

A. Yes. A repeat play can add another completion without adding a distinct account. Event counts and audience counts are useful, but they answer different questions.

B. That business outcome needs separate evidence and an appropriate attribution approach. Neither the reach increase nor the completion change proves a sales effect.

C. Exactly. The completion rate moved from eighty percent to sixty percent. Two thousand starts produced twelve hundred completions, while the earlier thousand starts produced eight hundred.

D. Correct. Keep the eligible start denominator visible. If we quietly switch to reached accounts, we are no longer calculating the completion rate defined in this report.

Answers and explanations, page 156

A Read the situation

LESSON 07 / SPONSORSHIP, BRAND SAFETY, AND INTEGRATION

Respond to a sponsor change by separating scope, factual claims, disclosure, and approval.

> **One extra mention changes more than the running time**
>
> A sponsor has approved one ten-second product mention in a program. It now requests a second fifteen-second mention and proposes the line, "This product works for everyone." No evidence supporting that universal claim is supplied. The sponsor also asks to keep the sponsorship disclosure only in the video description. Account lead Carmen and producer Noel must review the added scope, editorial fit, truthful wording, and clear in-video disclosure for the endorsement. The extra mention, revised script, cost, and timing are not yet approved; the original mention alone does not approve the new request.

People: Carmen, Sponsorship account lead; Noel, Producer.

Read the record

Choose one answer per question using the facts above.

1. What is already approved?

A. Two mentions totaling twenty-five seconds
B. The universal product claim
C. A description-only disclosure for this endorsement
D. One ten-second product mention

2. What is wrong with the proposed universal claim?

A. No supporting evidence is supplied.
B. It is automatically true because the sponsor proposed it.
C. It is a verified customer testimonial.
D. It has already passed a completed claims review.

3. Where should the endorsement disclosure be addressed in this case?

A. Only behind an optional link
B. Only in a file name
C. Nowhere because the sponsor paid
D. Clearly in the video, not only in its description

Answers and explanations, page 142

B Vocabulary in use

CORE TERMS

sponsorship
Commercial support linked to agreed exposure or association.

disclose the sponsorship

brand integration
Incorporation of a brand or product into content.

review the brand integration

product placement
Display or inclusion of a product within content.

agree product placement

host-read
A promotional message delivered by the program's host.

approve the host-read

endorsement
A message audiences are likely to understand as another party's opinion or experience.

review the endorsement

material connection
A relationship that may affect how an audience evaluates an endorsement.

disclose a material connection

disclosure
Information making a relevant commercial relationship clear.

provide a clear disclosure

clear and conspicuous
Readily noticeable and understandable in the relevant context.

make the disclosure clear and conspicuous

substantiation
Evidence supporting a factual claim.

require claim substantiation

objective claim
A factual assertion capable of being assessed against evidence.

verify an objective claim

universal claim
An assertion extending to every member of a stated group.

challenge a universal claim

testimonial
A statement describing a person's experience or view.

verify a testimonial

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

sponsorship SPONSORSHIP

disclose the sponsorship

Keep the meaning precise: Commercial support linked to agreed exposure or association.

material connection MATERIAL CONNECTION

disclose a material connection

Keep the meaning precise: A relationship that may affect how an audience evaluates an endorsement.

B Precision and professional shorthand

EXTEND YOUR RANGE

editorial fit

Compatibility with the content's purpose, tone, and audience.

assess editorial fit

brand suitability

Compatibility with a particular brand's preferences and context.

define brand suitability

sponsor deliverable

A specified item or exposure owed under the sponsorship agreement.

confirm sponsor deliverables

makegood

Replacement value or exposure offered for a missed agreed delivery.

negotiate a makegood

script revision

A change to the wording of a production script.

submit the script revision

commercial break

A designated interval containing advertising.

schedule the commercial break

brand safety

Avoiding specified harmful or unsuitable brand associations.

review brand-safety conditions

integration plan

The agreed arrangement for incorporating sponsored material.

revise the integration plan

category exclusivity

A restriction on competing sponsors within a defined category.

check category exclusivity

approval chain

The sequence of authorized content or commercial reviews.

confirm the approval chain

scope change

A change to the work or output originally agreed.

document the scope change

audience trust

The audience's confidence in the content's honesty and reliability.

protect audience trust

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

testimonial TESTIMONIAL

verify a testimonial

Keep the meaning precise: A statement describing a person's experience or view.

sponsor deliverable SPONSOR DELIVERABLE

confirm sponsor deliverables

Keep the meaning precise: A specified item or exposure owed under the sponsorship agreement.

C Phrases that move the work forward

Acknowledge the request

The sponsor wants a second fifteen-second mention.

Quantify the change

The proposed mentions would total twenty-five seconds.

Separate the reviews

Timing, cost, editorial fit, claims, and disclosure all need review.

Avoid a universal promise

We cannot present that line as established without support.

Keep disclosure in the content

The endorsement needs a clear disclosure in the video itself.

Preserve review status

The revised script has not been approved.

Confirm the decision-makers

Route the revision through the agreed approval chain.

Separate clarity and persuasion

A visible sponsorship disclosure does not excuse an unsupported claim.

State the existing agreement

The current plan approves one ten-second mention.

Keep the scope visible

This is an additional deliverable, not an already approved adjustment.

Challenge the wording

What evidence supports the claim that it works for everyone?

Protect truthful experience

Do not script a personal experience the host has not actually had.

Reject an inadequate shortcut

A description-only disclosure can be missed.

Check the impact

Which content would the extra fifteen seconds displace?

Keep the price conditional

We need to price the added work before promising it.

Close with a bounded offer

I can submit a revised proposal, but I cannot confirm the new integration today.

Precision in real exchanges

Purpose: Keep the scope visible
Useful wording: This is an additional deliverable, not an already approved adjustment.

Purpose: Separate the reviews
Useful wording: Timing, cost, editorial fit, claims, and disclosure all need review.

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which statement describes the time change accurately?

A. The whole program must now be exactly twenty-five seconds long.

B. No time is added because the sponsor requested it.

C. The original ten-second mention automatically includes every later request.

D. The proposed mentions total twenty-five seconds, fifteen more than approved.

2. What does a clear disclosure not accomplish by itself?

A. It identifies a relevant commercial relationship.

B. It helps viewers recognize sponsorship.

C. It can make the paid nature of content clearer.

D. It does not substantiate the universal product claim.

3. A colleague needs the term for this meaning: A promotional message delivered by the program's host. Which term fits?

A. substantiation

B. script revision

C. brand suitability

D. host-read

D Choose the response that fits / continued

4. Rebuild the exchange from "One extra mention changes more than the running time". Carmen: "Their suggested line is that the product works for everyone. They have not sent any evidence." Noel: [missing response] Carmen: "Could the host say it is what they personally experienced instead?" Which response belongs in the gap?

A. Our integration plan includes one ten-second mention. The request would bring mention time to twenty-five seconds, so we need to assess what changes in the edit and the agreement.

B. Route it through the approval chain. We still need the relevant decisions on the script, cost, timing, and integration. A proposal sent for review is not permission to publish.

C. That universal claim cannot be presented as established on this record. We need supporting evidence and an appropriate claims review, not simply a more confident delivery by the host.

D. It is a scope change. Let us review timing, cost, and editorial fit before promising it. The fact that the original mention is approved does not authorize the second one.

Answers and explanations, page 142

> **One useful distinction**
>
> The new request adds fifteen seconds of mention time, bringing proposed mention time to twenty-five seconds. That arithmetic does not establish the final program length, cost, editorial acceptability, or approval of the new wording.

E Conversation

One extra mention changes more than the running time

One extra mention changes more than the running time

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

clear and conspicuous / Substantiation / testimonial / disclosure / audience trust / universal claim / approval chain / editorial fit / integration plan / scope change

01 **Carmen:** The sponsor wants another fifteen seconds after the agreed mention. They are calling it a small adjustment. Can we work out the actual impact before I answer?

02 **Noel:** Our [1] _____ includes one ten-second mention. The request would bring mention time to twenty-five seconds, so we need to assess what changes in the edit and the agreement.

03 **Carmen:** They describe it as a small adjustment, but I can see it may displace something.

04 **Noel:** It is a [2] _____. Let us review timing, cost, and editorial fit before promising it. The fact that the original mention is approved does not authorize the second one.

05 **Carmen:** Their suggested line is that the product works for everyone. They have not sent any evidence.

06 **Noel:** That [3] _____ cannot be presented as established on this record. We need supporting evidence and an appropriate claims review, not simply a more confident delivery by the host.

E Conversation / continued

07 **Carmen:** Could the host say it is what they personally experienced instead?

08 **Noel:** Only if the [4] _____ is truthful. We should not manufacture personal experience to make an unsupported general statement sound acceptable. The wording needs to reflect what can genuinely be said.

09 **Carmen:** The sponsor also asked to keep the sponsorship note in the description so that it does not interrupt the program.

10 **Noel:** The [5] _____ needs to work in the video itself. Viewers may never open the description. We should assess how they actually encounter the endorsement, not just whether a note exists somewhere.

Conversation continues on the next page.

One extra mention changes more than the running time

CONVERSATION / CONTINUED

11 **Carmen:** We can explain that a readable disclosure belongs in the viewing experience, not in an optional extra page.

12 **Noel:** Yes, it must be [6] _____ in context. The final approach needs review with the actual video. A barely visible label or a platform setting should not be assumed sufficient on its own.

13 **Carmen:** If we fix the disclosure, the words works for everyone still need evidence, correct? I do not want the sponsor to think that one fix clears both issues.

14 **Noel:** Correct. [7] _____ and disclosure address different questions. We need truthful content and a clear commercial relationship, not a choice between them.

15 **Carmen:** The extra segment may also feel repetitive after the host has already mentioned the product.

16 **Noel:** That is an [8] _____ question. We can evaluate placement and repetition, but the commercial request should not silently overrule the program's purpose or the audience's experience.

17 **Carmen:** I will send the sponsor a proposal showing the added work, the revised wording route, and the disclosure requirement.

18 **Noel:** Route it through the [9] _____. We still need the relevant decisions on the script, cost, timing, and integration. A proposal sent for review is not permission to publish.

19 **Carmen:** I can keep the response constructive: we will assess the request, but we cannot confirm the new segment today.

20 **Noel:** Exactly. That protects [10] _____ and gives the sponsor a usable next step. We can work toward an effective integration without disguising paid content or making a claim the evidence does not support.

CHECK THE GAPS

1. integration plan / **2.** scope change / **3.** universal claim / **4.** testimonial / **5.** disclosure / **6.** clear and conspicuous / **7.** Substantiation / **8.** editorial fit / **9.** approval chain / **10.** audience trust

Why these answers fit, page 143

F Check accuracy and scope

One extra mention changes more than the running time

Return to the case

A sponsor has approved one ten-second product mention in a program. It now requests a second fifteen-second mention and proposes the line, "This product works for everyone." No evidence supporting that universal claim is supplied. The sponsor also asks to keep the sponsorship disclosure only in the video description. Account lead Carmen and producer Noel must review the added scope, editorial fit, truthful wording, and clear in-video disclosure for the endorsement. The extra mention, revised script, cost, and timing are not yet approved; the original mention alone does not approve the new request.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. Which response respects both the relationship and the review?

A. We will publish the sponsor's line unchanged without evidence.

B. We will hide the disclosure in the description to preserve the edit.

C. The host will claim an experience regardless of whether it occurred.

D. We can assess the extra mention, but the wording, disclosure, cost, and timing need approval.

2. Which disclosure approach fits the stated video endorsement?

A. A clear description disclosure without an in-video disclosure

B. An in-video label made too brief to read so it does not interrupt the edit

C. A platform sponsorship setting assumed sufficient without checking the viewing experience

D. A clear disclosure within the video, reviewed in context

Answers and explanations, page 145

Listen for the distinction

Swap roles for turns 11-20; distinguish clear disclosure from claim substantiation.

Separate the client relationship from the content decision

An extra sponsor line can sound too small to challenge. Explain its concrete effects on time, editorial flow, claims, and approval. A constructive response offers a review path without allowing the commercial relationship to substitute for truthful, clearly identified content.

F Say it / transfer to a new case

Clarify another integration request

An approved plan contains one eight-second mention. A sponsor requests another twelve-second mention. The additional work and a new factual claim are unapproved; no supporting evidence is supplied.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

substantiation / twenty / eight / twelve

01 **Account lead:** The approved mention is [1] _____ seconds.

02 **Producer:** The requested addition is [2] _____ seconds.

03 **Account lead:** The proposed mention time would total [3] _____ seconds.

04 **Producer:** The new factual claim still needs [4] _____.

CHECK THE GAPS

1. eight / **2.** twelve / **3.** twenty / **4.** substantiation

Why these answers fit, page 145

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "One extra mention changes more than the running time". Carmen: "If we fix the disclosure, the words works for everyone still need evidence, correct? I do not want the sponsor to think that one fix clears both issues." Noel: [missing response] Carmen: "The extra segment may also feel repetitive after the host has already mentioned the product." Which response belongs in the gap?

A. That universal claim cannot be presented as established on this record. We need supporting evidence and an appropriate claims review, not simply a more confident delivery by the host.

B. Correct. Substantiation and disclosure address different questions. We need truthful content and a clear commercial relationship, not a choice between them.

C. Our integration plan includes one ten-second mention. The request would bring mention time to twenty-five seconds, so we need to assess what changes in the edit and the agreement.

D. That is an editorial fit question. We can evaluate placement and repetition, but the commercial request should not silently overrule the program's purpose or the audience's experience.

Answers and explanations, page 146

A Read the situation

LESSON 08 / CRISIS RESPONSE AND PUBLIC STATEMENTS

Prepare a concise holding statement that separates verified facts, open questions, and the next update.

Confirm the production pause, not an unverified cause

Filming at Studio C paused at 09:20 following a technical interruption. That pause and time are verified. The cause remains under investigation, injury reports are unverified, and no restart time is confirmed. A draft statement blames a contractor and says nobody was hurt; neither claim is supported. Communications manager Farah and executive producer Luis must remove those claims. They can state the verified pause, say the situation is being assessed, and commit to an update at 11:00. Only the designated spokesperson may release the approved statement under the local process.

People: Farah, Communications manager; Luis, Executive producer.

Read the record

Choose one answer per question using the facts above.

1. Which fact is verified?

A. Filming at Studio C paused at 09:20.
B. A contractor caused the incident.
C. Nobody was hurt.
D. Filming will restart at 11:00.

2. Which claims must be removed from the draft?

A. Contractor blame and the unsupported no-injury claim
B. The verified pause time
C. The commitment to an 11:00 update
D. The fact that assessment is ongoing

3. What does 11:00 represent?

A. Guaranteed production restart
B. A confirmed medical finding
C. The time the cause becomes certain
D. The next public update

Answers and explanations, page 147

B Vocabulary in use

CORE TERMS

holding statement
A brief initial statement using verified information while further facts are checked.

prepare a holding statement

unverified report
Information received but not yet confirmed.

label an unverified report

corroboration
Supporting confirmation from additional relevant evidence.

seek corroboration

designated spokesperson
The person authorized to speak publicly for the organization.

brief the designated spokesperson

public statement
An authorized communication intended for a public audience.

approve the public statement

off the record
A source-use arrangement requiring explicit mutual understanding.

agree off-the-record terms

verified fact
Information confirmed through an adequate evidential basis.

separate verified facts

source attribution
Identifying where information came from.

preserve source attribution

incident timeline
A chronological record of relevant events.

establish the incident timeline

media inquiry
A request for information from a journalist or outlet.

log a media inquiry

on the record
Information provided for attributable publication under agreed ground rules.

Information about affected people's condition or support, within verified and authorized limits.

verify a welfare update

privacy boundary

A limit on sharing personal information.

respect privacy boundaries

operational pause

A temporary stop in activity.

confirm the operational pause

restart authorization

Permission to resume activity under the relevant process.

verify restart authorization

stakeholder briefing

An update to people with a relevant interest or responsibility.

coordinate a stakeholder briefing

message consistency

Agreement among communications on the verified facts and status.

maintain message consistency

B Precision and professional shorthand / continued

approval version

The specific statement text cleared for release.

identify the approval version

update cadence

The planned rhythm or schedule of further communications.

establish an update cadence

Say it in context

Stress the highlighted expression. Keep the surrounding words connected; pause at the end of the phrase.

embargo EMBARGO

confirm the embargo

Keep the meaning precise: An agreed restriction on publication until a stated time or condition.

welfare update WELFARE UPDATE

verify a welfare update

Keep the meaning precise: Information about affected people's condition or support, within verified and authorized limits.

C Phrases that move the work forward

Lead with the verified event
Filming at Studio C paused at 09:20.

Describe the known context
The pause followed a technical interruption.

Limit the explanation
The cause has not yet been confirmed.

Remove unsupported blame
We do not have a verified basis for naming a responsible party.

Keep welfare information accurate
Injury reports have not yet been verified.

Avoid an unsupported reassurance
We cannot state that nobody was hurt on this record.

State the ongoing action
The situation is being assessed.

Commit to the next contact
We will provide an update at 11:00.

Separate time promises
That is an update time, not a confirmed restart.

Protect personal information
Release only verified and authorized personal details.

Name the release route
The designated spokesperson will issue the approved statement.

Preserve the evidence
Keep source and timestamp information with each factual claim.

Align internal messages
Brief the team on the same verified facts and open questions.

Handle a media question
I cannot confirm that explanation; we will update the verified position.

Correct an actual error
If published information is wrong, acknowledge and correct it visibly.

Close the draft review
Remove the unsupported claims and retain the factual pause and update commitment.

Precision in real exchanges

Purpose: Remove unsupported blame
Useful wording: We do not have a verified basis for naming a responsible party.

Purpose: Keep welfare information accurate
Useful wording: Injury reports have not yet been verified.

D Choose the response that fits

Choose one response for each situation. Preserve the facts, the decision boundary, and the purpose of the exchange.

1. Which holding statement fits the facts?

A. Unverified reports prove the incident did not occur.

B. Filming at Studio C paused at 09:20 following a technical interruption. We are assessing the situation and will update at 11:00.

C. Contractor error caused the pause and nobody was hurt.

D. Filming restarts at 11:00 without further assessment.

2. What does unverified injury information justify saying?

A. Nobody was injured.

B. Every reported injury is confirmed.

C. Injury information is irrelevant to any later update.

D. Injury reports have not yet been verified.

3. A colleague needs the term for this meaning: Identifying where information came from. Which term fits?

A. source attribution

B. public statement

C. speculation

D. stakeholder briefing

D Choose the response that fits / continued

4. Rebuild the exchange from "Confirm the production pause, not an unverified cause". Luis: "Someone on the crew says the contractor was working near the equipment. Does that justify naming them?" Farah: [missing response] Luis: "I have also seen social posts about injuries. We cannot confirm them yet." Which response belongs in the gap?

A. Treat each as an unverified report. That does not mean the report is false, and it does not justify saying nobody was hurt. We must preserve the actual verification status.

B. Maintain the incident timeline with source information. That will help us update accurately as evidence develops and avoid confusing the time of a report with the time of the event.

C. That is not enough for a causal claim. Being nearby does not establish responsibility. We need an adequate verified basis before asserting a cause or naming a party as responsible.

D. The designated spokesperson will issue the approved text. We should brief the department leads on the same facts and route inquiries through the agreed process rather than improvise separate explanations.

Answers and explanations, page 147

> **One useful distinction**
>
> Not confirmed is not the same as false, and unverified injury reports do not establish either injury or no injury. State the verification boundary instead of choosing the more reassuring conclusion.

E Conversation

Confirm the production pause, not an unverified cause

Confirm the production pause, not an unverified cause

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

approval version / designated spokesperson / welfare update / correction / holding statement / causal claim / verified fact / incident timeline / restart authorization / unverified report

01 **Luis:** Who supplied the contractor-error and no-injury lines? They are in the draft, but I cannot trace either one to a confirmed source.

02 **Farah:** Then neither belongs in the [1] _____. We have confirmed that filming at Studio C paused at nine twenty following a technical interruption. The cause and injury reports are still being checked.

03 **Luis:** We should acknowledge concern without presenting the draft's explanation as fact.

04 **Farah:** Exactly. Separate each [2] _____ from the open questions. We can say the situation is being assessed and that we will provide an update at eleven.

05 **Luis:** Someone on the crew says the contractor was working near the equipment. Does that justify naming them?

06 **Farah:** That is not enough for a [3] _____. Being nearby does not establish responsibility. We need an adequate verified basis before asserting a cause or naming a party as responsible.

07 **Luis:** I have also seen social posts about injuries. We cannot confirm them yet.

08 **Farah:** Treat each as an [4] _____. That does not mean the report is false, and it does not justify saying nobody was hurt. We must preserve the actual verification status.

09 **Luis:** We can ask the appropriate people for confirmed information without releasing private details in the meantime.

10 **Farah:** Yes. A [5] _____ needs both accuracy and the proper disclosure basis. Concern for people should not become a reason to circulate names or conditions we are not authorized to share.

Conversation continues on the next page.

Confirm the production pause, not an unverified cause

CONVERSATION / CONTINUED

11 **Luis:** Please make the eleven-o'clock line explicitly an update. I do not want crews or reporters reading it as a restart time.

12 **Farah:** Then distinguish it from [6] _____. Eleven is the next communication time. We do not have a confirmed restart time, and the statement must not imply one.

13 **Luis:** Who should send the public version? Several department leads are receiving media questions.

14 **Farah:** The [7] _____ will issue the approved text. We should brief the department leads on the same facts and route inquiries through the agreed process rather than improvise separate explanations.

15 **Luis:** Let us also keep track of when each fact was confirmed and by whom.

16 **Farah:** Maintain the [8] _____ with source information. That will help us update accurately as evidence develops and avoid confusing the time of a report with the time of the event.

17 **Luis:** If something we publish later proves wrong, we should not just quietly replace the text.

18 **Farah:** Correct. Issue a visible [9] _____ through the authorized process. A clarification can explain wording, but it should not be used to disguise a substantive error in what we said.

19 **Luis:** I will remove the blame and no-injury sentence. The remaining statement will give the pause, ongoing assessment, and eleven-o'clock update.

20 **Farah:** I will identify that [10] _____ for review and release. The public should receive the verified position, not the most reassuring draft. We can be clear, humane, and precise while questions remain open.

CHECK THE GAPS

1. holding statement / **2.** verified fact / **3.** causal claim / **4.** unverified report / **5.** welfare update / **6.** restart authorization / **7.** designated spokesperson / **8.** incident timeline / **9.** correction / **10.** approval version

Why these answers fit, page 148

F Check accuracy and scope

Confirm the production pause, not an unverified cause

Return to the case

Filming at Studio C paused at 09:20 following a technical interruption. That pause and time are verified. The cause remains under investigation, injury reports are unverified, and no restart time is confirmed. A draft statement blames a contractor and says nobody was hurt; neither claim is supported. Communications manager Farah and executive producer Luis must remove those claims. They can state the verified pause, say the situation is being assessed, and commit to an update at 11:00. Only the designated spokesperson may release the approved statement under the local process.

Choose one answer per question. Use the case facts and keep any uncertainty or limits intact.

1. Who may release the statement under the local process?

A. A department lead treating internal circulation as public approval
B. The communications writer before the text has completed review
C. The designated spokesperson, using the approved version
D. The executive producer using the unsupported earlier draft

2. If a published factual claim proves wrong, what is appropriate?

A. Silently change it and deny any earlier error.
B. Keep repeating it to preserve consistency.
C. Call every factual error merely a stylistic preference.
D. Acknowledge and correct the error visibly through the authorized process.

Answers and explanations, page 150

Listen for the distinction

Swap roles for turns 11-20; distinguish the update appointment from permission to restart.

Precision is not indifference

A careful holding statement can acknowledge concern without asserting a cause, injury status, or restart time that has not been verified. Avoid defensive certainty. Clear limits and a reliable next update are more credible than a complete-sounding explanation assembled from rumor.

F Say it / transfer to a new case

Prepare a second factual update

Recording at Studio D paused at 15:10. The cause and restart time are unconfirmed. The next approved status update is 16:00, to be delivered by spokesperson Rina.

Complete the four gaps. With a partner, read alternate roles, then switch. Studying alone, read both roles and pause before each response.

WORD AND PHRASE BANK

16:00 / unconfirmed / 15:10 / Rina

01 **Producer:** The confirmed pause time is [1] _____.

02 **Communications lead:** The cause remains [2] _____.

03 **Producer:** The next status update is at [3] _____.

04 **Communications lead:** The designated spokesperson is [4] _____.

CHECK THE GAPS

1. 15:10 / **2.** unconfirmed / **3.** 16:00 / **4.** Rina

Why these answers fit, page 150

Rebuild the exchange

Choose the missing response. Read the completed three-turn exchange aloud, changing roles on the second reading.

1. Rebuild the exchange from "Confirm the production pause, not an unverified cause". Luis: "Who should send the public version? Several department leads are receiving media questions." Farah: [missing response] Luis: "Let us also keep track of when each fact was confirmed and by whom." Which response belongs in the gap?

A. Maintain the incident timeline with source information. That will help us update accurately as evidence develops and avoid confusing the time of a report with the time of the event.

B. That is not enough for a causal claim. Being nearby does not establish responsibility. We need an adequate verified basis before asserting a cause or naming a party as responsible.

C. Treat each as an unverified report. That does not mean the report is false, and it does not justify saying nobody was hurt. We must preserve the actual verification status.

D. The designated spokesperson will issue the approved text. We should brief the department leads on the same facts and route inquiries through the agreed process rather than improvise separate explanations.

Answers and explanations, page 151

Review 4 / Meaning and context

Use language from the lessons you have completed. Choose one answer per question.

> **Case file**
>
> Revisit "Sponsorship, Brand Safety, and Integration" and "Crisis Response and Public Statements". Choose precise terminology, then reconstruct the missing responses using both neighboring turns. The final two questions also revisit earlier conversations.

1. A colleague needs the term for this meaning: Display or inclusion of a product within content. Which term fits?

A. approval chain
B. brand safety
C. clear and conspicuous
D. product placement

2. A colleague needs the term for this meaning: A request for information from a journalist or outlet. Which term fits?

A. media inquiry
B. correction
C. holding statement
D. operational pause

3. Rebuild the exchange from "More completed plays, but a lower completion rate". Dana: "And twelve hundred finished plays may include someone watching more than once." Felix: [missing response] Dana: "What should we examine to understand the lower proportion finishing?" Which response belongs in the gap?

A. Correct. Keep the eligible start denominator visible. If we quietly switch to reached accounts, we are no longer calculating the completion rate defined in this report.
B. That business outcome needs separate evidence and an appropriate attribution approach. Neither the reach increase nor the completion change proves a sales effect.
C. Exactly. The completion rate moved from eighty percent to sixty percent. Two thousand starts produced twelve hundred completions, while the earlier thousand starts produced eight hundred.
D. Yes. A repeat play can add another completion without adding a distinct account. Event counts and audience counts are useful, but they answer different questions.

Review 4 / Meaning and context / continued

4. Rebuild the exchange from "Confirm the production pause, not an unverified cause". Luis: "If something we publish later proves wrong, we should not just quietly replace the text." Farah: [missing response] Luis: "I will remove the blame and no-injury sentence. The remaining statement will give the pause, ongoing assessment, and eleven-o'clock update." Which response belongs in the gap?

A. Correct. Issue a visible correction through the authorized process. A clarification can explain wording, but it should not be used to disguise a substantive error in what we said.

B. Treat each as an unverified report. That does not mean the report is false, and it does not justify saying nobody was hurt. We must preserve the actual verification status.

C. The designated spokesperson will issue the approved text. We should brief the department leads on the same facts and route inquiries through the agreed process rather than improvise separate explanations.

D. That is not enough for a causal claim. Being nearby does not establish responsibility. We need an adequate verified basis before asserting a cause or naming a party as responsible.

Answers and explanations, page 158

Language for the next case

Loudness is not the peak reading

integrated loudness

Integrated loudness measures the program over the relevant duration in LUFS; the supplied -19 reading is four loudness units above this delivery's -23 target.

Marta: They measure different things. The integrated loudness is four units above the target. The peak reading also exceeds the separate permitted maximum.

true peak

True peak is measured in dBTP and addresses peak level rather than average program loudness; -0.2 dBTP exceeds the stipulated -1 dBTP ceiling by 0.8 dB.

Marta: Right. The true peak is zero point eight decibels above the ceiling. Do not relabel that reading as the program's loudness.

attenuation

Attenuation reduces the signal level; a uniform four-decibel reduction predicts a four-unit loudness decrease and a four-decibel peak decrease before final remeasurement.

Marta: Yes. Uniform attenuation should bring the loudness near minus twenty-three and predict a peak of minus four point two, if nothing else changes.

headroom

Headroom is the remaining level margin below the applicable limit; a predicted -4.2 dBTP is 3.2 dB below this -1 dBTP ceiling.

Marta: Then start with gain, not a new compression treatment. We have predicted headroom below the peak ceiling after that reduction. Listen and measure before deciding whether further processing is needed.

channel mapping

Channel mapping assigns the intended audio to delivery channels; a loudness pass does not prove that left, right, or other required tracks are correctly assigned.

Marta: Also verify the channel mapping. A passing loudness number would not reveal that someone exported the wrong track pair.

QC report

The quality-control report records the tested file, measurements, specification, and remaining findings; results for an earlier version do not establish the delivered version's status.

Marta: I will attach the QC report to that exact export. If either measurement still misses the requirement, we investigate before submitting again.

Read the phrases aloud. Then complete the conversation on the following pages using the word bank.

Conversation

Loudness is not the peak reading

Fictional stereo delivery requires integrated loudness -23 LUFS and maximum true peak no higher than -1 dBTP. The complete exported program measures -19 LUFS and -0.2 dBTP. The team considers a uniform 4 dB reduction with no other processing change. Predicted readings must be checked on the final export; these are this delivery's requirements, not every outlet's.

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

integrated loudness / headroom / attenuation / channel mapping / QC report / true peak

01 **Ravi:** The delivery failed audio review. The note says minus nineteen LUFS and minus zero point two dBTP. Which of those should we fix first?

02 **Marta:** They measure different things. The [1] _____ is four units above the target. The peak reading also exceeds the separate permitted maximum.

03 **Ravi:** Minus zero point two is higher than minus one, even though the number looks smaller without its sign. That explains the second flag.

04 **Marta:** Right. The [2] _____ is zero point eight decibels above the ceiling. Do not relabel that reading as the program's loudness.

05 **Ravi:** Would reducing the entire mix by four decibels be a reasonable first pass, without changing the balance between speech and music?

06 **Marta:** Yes. Uniform [3] _____ should bring the loudness near minus twenty-three and predict a peak of minus four point two, if nothing else changes.

Conversation / continued

07 **Ravi:** That predicted peak is below the minus-one ceiling. We do not need to push it back up merely to touch the limit.

08 **Marta:** Exactly. A maximum is not a target we must hit. Raising the whole signal again would also raise loudness and could undo the correction.

09 **Ravi:** The current mix sounds balanced creatively. I would prefer not to squash the dynamics just because the delivery was rejected.

10 **Marta:** Then start with gain, not a new compression treatment. We have predicted [4] _____ below the peak ceiling after that reduction. Listen and measure before deciding whether further processing is needed.

Conversation continues on the next page.

Loudness is not the peak reading

CONVERSATION / CONTINUED

11 **Ravi:** Will the final encoded file necessarily have exactly the same peak as the mix export? Delivery will create another file.

12 **Marta:** Not necessarily. Export or encoding can affect the measured result. The prediction helps select a correction; it does not replace checking the actual delivered file.

13 **Ravi:** The first report covered the entire program, not only the loud introduction. I will make sure the new measurement uses the same intended content.

14 **Marta:** Also verify the [5] _____. A passing loudness number would not reveal that someone exported the wrong track pair.

15 **Ravi:** The requested version is stereo. I will compare the file identifier and delivery manifest so we do not measure the commentary mix by mistake.

16 **Marta:** Good. I will listen for dialogue intelligibility, clipping, and unexpected changes as well. Two passing numbers cannot certify every aspect of the soundtrack.

17 **Ravi:** Please keep the original failure report and the corrected file's results together. The distributor needs to know which version was rechecked.

18 **Marta:** I will attach the [6] _____ to that exact export. If either measurement still misses the requirement, we investigate before submitting again.

19 **Ravi:** Our proposed correction is four decibels down, preserving the mix balance, then a complete measurement and listening pass on the delivery file.

20 **Marta:** Agreed. Report the measured result, not the predicted one. That gives the distributor a traceable correction and keeps the creative and technical decisions separate.

CHECK THE GAPS

1. integrated loudness / **2.** true peak / **3.** attenuation / **4.** headroom / **5.** channel mapping / **6.** QC report

Why these answers fit, page 160

Keep the signs and units

Fictional file: -20 LUFS integrated, -1 dBTP true peak. Required integrated target -23 LUFS; peak ceiling -2 dBTP. Consider only uniform gain reduction, with no other processing change. Predict first, then remeasure the final file.

Complete the exchange using each phrase once. Read both roles, then switch roles and repeat with the bank covered.

WORD AND PHRASE BANK

3 / -4 / 2 / remeasure

01 **Supervisor:** The initial gain reduction to target is [1] _____ decibels.

02 **Mixer:** That predicts a true peak of [2] _____ dBTP.

03 **Supervisor:** The predicted peak is [3] _____ decibels below the ceiling.

04 **Mixer:** Before delivery, we must [4] _____ the final export.

CHECK THE GAPS

1. 3 / **2.** -4 / **3.** 2 / **4.** remeasure

Why these answers fit, page 160

Keep the distinction audible

Discuss an audio rejection using the correct measurements and agree a testable delivery correction.

Language for the next case

Captions that preserve the meaning

reference master

The reference master is the identified picture and sound version used for caption review; using an earlier edit could produce incorrect timing and content judgments.

Omar: V7 is the approved reference master. I have it open now at twenty-five frames per second. Let us compare the same export before changing anything.

constant offset

A constant offset is the same timing difference at checked points; three matching observations suggest it but do not prove the entire file shares it.

Omar: That suggests a constant offset at those points. It does not yet prove that one shift will fix the whole file; another section could drift or contain an edit.

frame rate

The frame rate converts the observed frame difference into time: eight frames divided by twenty-five frames per second equals 0.32 seconds.

Omar: Correct. Keep the frame rate with that calculation. Eight frames is not eight hundredths of a second, and another frame rate would change the conversion.

negation

Negation is the negative meaning carried here by 'not'; omitting it reverses the speaker's statement rather than merely shortening the sentence.

Omar: Restore the negation. That missing word reverses the meaning. We cannot treat it as an acceptable shortening just because the line is easier to fit.

speaker identification

Speaker identification tells the viewer who speaks when that is not clear from the image and context; it should use established information without inventing or prematurely revealing identity.

Lin: I will add appropriate speaker identification using what the scene establishes. I will not introduce a character name before the story reveals it.

sound cue

A sound cue represents relevant non-speech audio such as the audible doorbell driving the character's reaction; captions need more than spoken words when sound carries meaning.

Lin: That needs a concise sound cue. I will identify the audible doorbell, not add a theory about who is outside or what will happen next.

Read the phrases aloud. Then complete the conversation on the following pages using the word bank.

Conversation

Captions that preserve the meaning

Fictional review of approved master V7 at 25 frames per second. Three checked caption cues appear eight frames early; the rest of the file is not yet checked. One caption omits 'not' from the spoken sentence 'We did not approve the sale.' An off-screen speaker is unclear, and an audible doorbell relevant to the scene is omitted. Correct text must follow the actual soundtrack.

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

constant offset / speaker identification / negation / frame rate / sound cue / reference master

01 **Lin:** The captions imported, but I found a meaning error and a timing problem. Which picture version did you use for the final check?

02 **Omar:** V7 is the approved [1] _____. I have it open now at twenty-five frames per second. Let us compare the same export before changing anything.

03 **Lin:** At three checked cues, the text appears eight frames before the corresponding speech. I have logged each cue number and its first spoken word.

04 **Omar:** That suggests a [2] _____ at those points. It does not yet prove that one shift will fix the whole file; another section could drift or contain an edit.

05 **Lin:** At twenty-five frames per second, eight frames is zero point three two seconds. The checked captions would need to move later, not earlier.

06 **Omar:** Correct. Keep the [3] _____ with that calculation. Eight frames is not eight hundredths of a second, and another frame rate would change the conversion.

Conversation / continued

07 **Lin:** I will check the remaining cues before proposing a file-wide shift. Moving the whole video to match a caption file would change the approved master.

08 **Omar:** Agreed. The caption timing is what we are investigating. We should not alter the picture or audio synchronization to make an unchecked text file fit.

09 **Lin:** The more serious text error is in the sale discussion. The soundtrack says we did not approve the sale, but the caption says we did approve it.

10 **Omar:** Restore the [4] _____. That missing word reverses the meaning. We cannot treat it as an acceptable shortening just because the line is easier to fit.

Conversation continues on the next page.

Captions that preserve the meaning

CONVERSATION / CONTINUED

11 **Lin:** I will preserve the spoken meaning and adjust the timing or line break within the delivery guidelines. The dialogue must not become a different claim.

12 **Omar:** There is also a reply from off screen. The current caption gives the words but leaves it unclear who is speaking in that exchange.

13 **Lin:** I will add appropriate [5] _____ using what the scene establishes. I will not introduce a character name before the story reveals it.

14 **Omar:** Good. And the doorbell is what makes the character turn toward the entrance. A viewer without the audio currently loses that reason.

15 **Lin:** That needs a concise [6] _____. I will identify the audible doorbell, not add a theory about who is outside or what will happen next.

16 **Omar:** Once the text is corrected, can we review it in the actual player? A valid file can still display badly against the picture.

17 **Lin:** Yes. I will check readability, placement, cue timing, and whether text covers important on-screen information. Successful import is only the start of that review.

18 **Omar:** I will keep V7 fixed and give the corrected caption file its own revision identifier. The old file will not remain the default attachment.

19 **Lin:** Then we can record which cues were checked and any remaining issues, instead of claiming the entire file passed after three timing samples.

20 **Omar:** Agreed. We will verify the whole corrected track against V7, including the negative sentence, off-screen reply, and doorbell, before sending the final package.

CHECK THE GAPS

1. reference master / **2.** constant offset / **3.** frame rate / **4.** negation / **5.** speaker identification / **6.** sound cue

Why these answers fit, page 162

A late cue and a missing word

At 24 frames per second, a checked caption appears six frames LATE. The soundtrack says 'The permit has not expired,' but the caption omits 'not.' Other cues remain unchecked.

Complete the exchange using each phrase once. Read both roles, then switch roles and repeat with the bank covered.

WORD AND PHRASE BANK

earlier / not / 0.25 / synchronization

01 **Editor:** Six frames at this rate equal [1] _____ seconds.

02 **Reviewer:** This checked caption needs to move [2] _____.

03 **Editor:** Restore the missing word [3] _____.

04 **Reviewer:** A single checked cue does not establish whole-file [4] _____.

CHECK THE GAPS

1. 0.25 / **2.** earlier / **3.** not / **4.** synchronization

Why these answers fit, page 162

Keep the distinction audible

Give precise caption corrections for synchronization, speaker identity, and information lost from the soundtrack.

Language for the next case

A live rundown that fits

hard out

The hard out is the fixed 20:10 ending in this plan; at 20:07 it leaves 180 seconds, not enough for the current 240-second sequence.

Anton: The hard out remains twenty ten. We need to remove sixty seconds from the remaining sequence, not hope the presenter reads faster.

rundown

The rundown lists the ordered program items and durations; changing the interview from 120 to 90 seconds removes thirty seconds from its current total.

Anton: Then the rundown needs ninety seconds for that interview. We still need another thirty seconds; the package and close have not changed yet.

cutdown

The cutdown is the approved shorter package, sixty seconds instead of ninety; selecting it removes the remaining thirty seconds without inventing a live edit.

Anton: Use that cutdown. Confirm its asset identifier, though. The same final shot does not mean the two files have the same duration.

out cue

The out cue is the identifiable ending used to coordinate the next item; it must match the selected package rather than be guessed from its file name.

Anton: And retain the out cue. Playback and the presenter need the correct ending so we can move cleanly into the close.

read-back

A read-back repeats the critical instruction so the sender can check understanding; here it should confirm the short package identifier and the revised item durations.

Bea: Please give me a read-back before I circulate it. We changed two items, and I do not want someone applying only one of the changes.

stand by

Stand by instructs the operator to prepare, not to start playback; a separate execution cue is needed under the agreed control-room procedure.

Anton: Good. And when you call stand by for the package, make it clear that playback prepares but does not roll until the agreed execution cue.

Read the phrases aloud. Then complete the conversation on the following pages using the word bank.

Conversation

A live rundown that fits

Fictional pre-transmission review: at the planned 20:07 checkpoint, 180 seconds remain before a fixed 20:10 end. Remaining items currently total 240 seconds: interview 120, package 90, close 30. An approved 60-second package exists. The producer may shorten the interview to 90 seconds while retaining the essential question. No further links or transitions sit outside these durations.

Complete the numbered gaps. Use each bank entry once; some entries contain several words.

WORD AND PHRASE BANK

read-back / rundown / out cue / hard out / cutdown / stand by

01 **Bea:** At the seven-minute checkpoint, this version of the show still has four minutes left to run. We only have three before the fixed end.

02 **Anton:** The [1] _____ remains twenty ten. We need to remove sixty seconds from the remaining sequence, not hope the presenter reads faster.

03 **Bea:** I can take thirty seconds from the interview by dropping the optional follow-up. The essential question and answer must stay intelligible.

04 **Anton:** Then the [2] _____ needs ninety seconds for that interview. We still need another thirty seconds; the package and close have not changed yet.

05 **Bea:** We have an approved sixty-second version of the package. It carries the same essential story and ends on the same shot.

06 **Anton:** Use that [3] _____. Confirm its asset identifier, though. The same final shot does not mean the two files have the same duration.

07 **Bea:** The identifier is RIVER-60. RIVER-90 is the longer original. I will put the short identifier and duration into the revised item.

08 **Anton:** And retain the [4] _____. Playback and the presenter need the correct ending so we can move cleanly into the close.

09 **Bea:** With ninety for the interview, sixty for the package, and thirty for the close, we have exactly one hundred eighty seconds.

10 **Anton:** Correct. From twenty oh seven, the package starts at twenty oh eight thirty and the close at twenty oh nine thirty. The hard out stays twenty ten.

Conversation continues on the next page.

A live rundown that fits

CONVERSATION / CONTINUED

11 **Bea:** Please give me a [5] _____ before I circulate it. We changed two items, and I do not want someone applying only one of the changes.

12 **Anton:** Interview ninety; RIVER-60 for sixty; close thirty. Package at twenty oh eight thirty, close at twenty oh nine thirty, out at twenty ten.

13 **Bea:** That matches. I will update the presenter notes to remove only the optional follow-up, not shorten the essential answer into a misleading fragment.

14 **Anton:** The closing script also needs to fit its allocated thirty seconds. We cannot discover during the show that it contains an extra uncounted link.

15 **Bea:** All links and transitions are included in these supplied durations. I will still check the revised script against that assumption before the show.

16 **Anton:** Good. And when you call [6] _____ for the package, make it clear that playback prepares but does not roll until the agreed execution cue.

17 **Bea:** Understood. I will use our established cue sequence and keep the production talkback separate from anything the audience should hear.

18 **Anton:** We also need confirmation that playback has actually loaded RIVER-60. A corrected rundown row alone does not prove the right file is cued.

19 **Bea:** I will collect that confirmation and brief the presenter on the shorter interview. Any later timing change comes back through this same coordinated update.

20 **Anton:** Then we have a workable plan: both approved reductions applied, the essential story retained, and every department working from the same durations and identifiers.

CHECK THE GAPS

1. hard out / **2.** rundown / **3.** cutdown / **4.** out cue / **5.** read-back / **6.** stand by

Why these answers fit, page 164

Backtime a shorter sequence

Fictional plan: at 18:28, 120 seconds remain before an 18:30 hard out. The approved sequence is a 45-second interview, a 50-second package, and a 25-second close. All links are included; no extra time is available.

Complete the exchange using each phrase once. Read both roles, then switch roles and repeat with the bank covered.

WORD AND PHRASE BANK

18:28:45 / start / 120 / 18:29:35

01 **Producer:** The three durations total [1] _____ seconds.

02 **Director:** The package begins at [2] _____.

03 **Producer:** The close begins at [3] _____.

04 **Director:** Stand by means prepare, not [4] _____ playback.

CHECK THE GAPS

1. 120 / **2.** 18:28:45 / **3.** 18:29:35 / **4.** start

Why these answers fit, page 164

Keep the distinction audible

Negotiate a shorter live rundown and use concise read-backs to prevent the wrong package or timing from reaching air.

01 / Answers and explanations

A / Read the situation

A1. Who is the confirmed audience?

A. Adult first-time buyers

Sora explicitly identifies adult first-time buyers as the target audience in the meeting.

Return to the exercise, page 4

A2. Which deliverable is confirmed?

B. A 30-second 16:9 film for the brand website

The confirmed duration, frame, and channel belong to the main website film only.

Return to the exercise, page 4

A3. What remains only a possible later request?

D. A vertical social cutdown

The vertical version is not yet included, approved, or fully priced.

Return to the exercise, page 4

D / Response choices

D1. Which question best clarifies energetic?

C. Do you mean faster pacing, camera movement, or flashing transitions?

The correct question offers observable creative dimensions relevant to the ambiguous adjective.

Return to the exercise, page 8

D2. Which read-back preserves the agreement?

B. Thirty seconds, 16:9, website, adult first-time buyers; vertical cutdown unconfirmed.

The accurate read-back retains the confirmed requirements and leaves the possible extra version unresolved.

Return to the exercise, page 8

01 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: A distinct direction for developing an idea. Which term fits?

C. creative territory

A Not here. tone of voice: The characteristic style of the spoken or written message. The usual combination is "define the tone of voice".

B Not here. safe area: A defined frame area protecting essential content from cropping or overlays. The usual combination is "check the safe area".

C Correct. creative territory: A distinct direction for developing an idea. The usual combination is "explore a creative territory".

D Not here. animatic: A timed sequence of storyboard images, often with sound. The usual combination is "review an animatic".

Return to the exercise, page 8

D4. Rebuild the exchange from "What does premium and energetic actually mean?". Sora: "I like deliberate close shots of the product. I do not want the film to look cheap just because the edit is energetic." Ellis: [missing response] Sora: "Exactly. No flashing transitions. The rhythm should be lively, but the product should remain easy to inspect." Which response belongs in the gap?

C. We can use a close-up to show important details and let the edit supply momentum. Faster does not have to mean flashing transitions or constant camera movement.

A Not here. This line belongs to turn 16, after Sora says: "Please show us the approach before you organize a shoot." It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 14, after Sora says: "We may want a shorter, fifteen-second vertical version for social later. Please do not include it as confirmed scope yet." It addresses that point, not the missing turn in the supplied exchange.

C Correct. This is Ellis's response in turn 6. It connects Sora's preceding point with Sora's follow-up. Close-up is a tight shot of the product or a detail, matching the client's specific visual preference.

D Not here. This line belongs to turn 12, after Sora says: "The main film needs to be thirty seconds. It will appear in the normal wide player on the website." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 8

E / Conversation

1. creative brief

Turn 2. Creative brief turns the desired impression into a shared communication task with specific production requirements.

01 / Answers and explanations / continued

2. target audience

Turn 4. Target audience identifies the intended adult first-time buyers, guiding explanation and creative choices rather than assuming existing product knowledge.

3. close-up

Turn 6. Close-up is a tight shot of the product or a detail, matching the client's specific visual preference.

4. pacing

Turn 8. Pacing describes the perceived rhythm and speed; energetic editing can supply it without the excluded flashing transitions.

5. reference film

Turn 10. Reference film provides an example of a named quality; it does not authorize copying or adopt every creative element.

6. running time

Turn 12. Running time specifies the duration of the main film, which the client confirms as thirty seconds.

7. cutdown

Turn 14. Cutdown is a shorter adapted version; the possible vertical version remains a separate scope question rather than an included deliverable.

8. treatment

Turn 16. Treatment presents the proposed creative approach for review before the production team commits to executing it.

9. call to action

Turn 18. Call to action identifies the requested viewer response; it remains a message decision rather than an assumed element.

10. creative sign-off

Turn 20. Creative sign-off approves a specified direction or version; this review should preserve the agreed requirements and outstanding decisions.

Return to the conversation, page 10

01 / Answers and explanations / continued

F / Accuracy and scope

F1. What is a useful reference-film instruction?

C. Identify the particular pacing or framing feature to discuss.

A named feature makes the reference actionable without replacing the brief or authorizing copying.

Return to the exercise, page 12

F2. Which statement overcommits scope?

C. The vertical adaptation is included even though it is only a possible request.

The possible later cutdown has not been included or fully priced in the stated scope.

Return to the exercise, page 12

F / Guided speaking

1. 45 seconds

Director: The confirmed running time is 45 seconds.

Turn 1. Forty-five seconds is the duration explicitly agreed for the main film.

2. returning subscribers

Client: The target audience is returning subscribers.

Turn 2. The briefing names returning subscribers rather than first-time buyers as the intended viewers.

3. 1:1

Director: The confirmed aspect ratio is 1:1.

Turn 3. One to one is the square frame specified for this main version.

4. six-second teaser

Client: The unconfirmed later version is a six-second teaser.

Turn 4. The teaser remains a possible later request and must not be treated as included scope.

Return to the conversation, page 13

01 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "What does premium and energetic actually mean?". Sora: "We may want a shorter, fifteen-second vertical version for social later. Please do not include it as confirmed scope yet." Ellis: [missing response] Sora: "Please show us the approach before you organize a shoot." Which response belongs in the gap?

B. Then the cutdown stays outside the confirmed scope for now. Vertical reframing may affect the shots and text, so I will not describe it as automatically included.

A Not here. This line belongs to turn 12, after Sora says: "The main film needs to be thirty seconds. It will appear in the normal wide player on the website." It addresses that point, not the missing turn in the supplied exchange.

B Correct. This is Ellis's response in turn 14. It connects Sora's preceding point with Sora's follow-up. Cutdown is a shorter adapted version; the possible vertical version remains a separate scope question rather than an included deliverable.

C Not here. This line belongs to turn 6, after Sora says: "I like deliberate close shots of the product. I do not want the film to look cheap just because the edit is energetic." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 16, after Sora says: "Please show us the approach before you organize a shoot." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 13

02 / Answers and explanations

A / Read the situation

A1. What is the earliest filming start at B on the stated assumptions?

A. 13:20

Thirty-five minutes of movement plus forty-five minutes of setup after noon gives thirteen twenty.

Return to the exercise, page 14

A2. How much known additional cost has been identified?

B. $1,000

Transport of $750 plus equipment of $250 totals $1,000 in identified additions.

Return to the exercise, page 14

A3. Which cost remains unpriced?

D. Possible overtime

The briefing explicitly leaves possible overtime unpriced rather than assuming it costs nothing.

Return to the exercise, page 14

D / Response choices

D1. Which timing statement is accurate?

A. Filming can start no earlier than 13:20 under the stated plan.

Consecutive movement and setup require eighty minutes after noon, making thirteen twenty the earliest stated start.

Return to the exercise, page 18

D2. Which cost statement is supported?

A. Known additions total $1,000; overtime remains unpriced.

The two priced additions total one thousand dollars, while possible overtime is explicitly unresolved.

Return to the exercise, page 18

02 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: The role coordinating on-set scheduling and execution. Which term fits?

D. first assistant director (first AD)

A Not here. technical scout: A site visit assessing practical production requirements. The usual combination is "arrange a technical scout".

B Not here. wrap time: The time filming or a person's scheduled work ends. The usual combination is "estimate the wrap time".

C Not here. committed cost: An amount already obligated under a relevant agreement. The usual combination is "record committed costs".

D Correct. first assistant director (first AD): The role coordinating on-set scheduling and execution. The usual combination is "consult the first AD".

Return to the exercise, page 18

D4. Rebuild the exchange from "The location move does not fit the call sheet". Leena: "That makes the earliest filming start thirteen twenty, before any extra delay." Grant: [missing response] Leena: "I will ask about moving the interview. Meanwhile, should we flag the timing conflict before anyone distributes that call sheet?" Which response belongs in the gap?

A. Yes. The setup cannot disappear because the client prefers the earlier slot. We need to revise the scene order or timing with the people responsible for the work.

A Correct. This is Grant's response in turn 6. It connects Leena's preceding point with Leena's follow-up. Setup requires forty-five additional minutes after arrival, producing the thirteen-twenty earliest filming time.

B Not here. This line belongs to turn 2, after Leena says: "Can you sanity-check the second-location plan? We wrap at A at noon, but the client has put the first interview at B at twelve thirty." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 18, after Leena says: "I will present a revised timing option with the known costs and the overtime question." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 12, after Leena says: "The current approved budget is twenty-five thousand. Can I say the revised budget is twenty-six thousand?" It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 18

E / Conversation

1. shooting schedule

Turn 2. Shooting schedule sets the planned filming sequence and times; the proposed slot conflicts with the stated move and setup.

02 / Answers and explanations / continued

2. company move

Turn 4. Company move is the thirty-five-minute relocation between sites, preceding the separate forty-five-minute setup in this plan.

3. setup

Turn 6. Setup requires forty-five additional minutes after arrival, producing the thirteen-twenty earliest filming time.

4. call sheet

Turn 8. Call sheet communicates the operational day's timing and locations; it must reflect the authorized workable plan.

5. cost report

Turn 10. Cost report tracks spending, commitments, and forecasts; the two known additions need visibility without implying approval.

6. forecast cost

Turn 12. Forecast cost is an estimate; twenty-six thousand includes the known additions but excludes still-unpriced overtime.

7. location permit

Turn 14. Location permit contains applicable permission conditions; a scheduling proposal does not establish permission for changed hours.

8. meal break

Turn 16. Meal break is a required or agreed rest period under the applicable conditions, not an unapproved scheduling buffer.

9. change order

Turn 18. Change order records an authorized alteration to agreed work; the proposed timing and cost revision still needs that decision.

10. critical dependency

Turn 20. Critical dependency identifies the required move-then-setup sequence that must remain visible in any revised production plan.

Return to the conversation, page 20

02 / Answers and explanations / continued

F / Accuracy and scope

F1. Which wording distinguishes estimate and authority?

B. The revised estimate needs approval before it becomes an authorized budget change.

Estimating the cost does not supply the separate authorization required for changing the budget.

Return to the exercise, page 22

F2. Which response preserves the stated safeguards?

D. Revise scene order and timing while preserving required breaks and conditions.

A schedule revision must address the real dependency without relying on skipped safeguards or invented approvals.

Return to the exercise, page 22

F / Guided speaking

1. 60

Producer: The total move-and-setup time is 60 minutes.

Turn 1. Twenty-five minutes of movement plus thirty-five minutes of setup totals sixty minutes.

2. 11:00

First AD: The earliest filming start is 11:00.

Turn 2. Sixty consecutive minutes after ten o'clock gives an earliest start of eleven.

3. 550

Producer: The known additional cost is 550 dollars.

Turn 3. Four hundred dollars of transport plus one hundred fifty of equipment totals five hundred fifty.

4. approval

First AD: Those additional costs still need approval.

Turn 4. The briefing expressly states that the priced additions have not yet been authorized.

Return to the conversation, page 23

02 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "The location move does not fit the call sheet". Leena: "We also need to know whether Location B permits the later filming and exit times." Grant: [missing response] Leena: "Someone suggested using the crew's break to recover the lost time. I do not want that assumed in the plan." Which response belongs in the gap?

B. Check the location permit and the relevant access agreement. Moving the interview may solve one conflict while creating another, so we should confirm the actual conditions.

A Not here. This line belongs to turn 2, after Leena says: "Can you sanity-check the second-location plan? We wrap at A at noon, but the client has put the first interview at B at twelve thirty." It addresses that point, not the missing turn in the supplied exchange.

B Correct. This is Grant's response in turn 14. It connects Leena's preceding point with Leena's follow-up. Location permit contains applicable permission conditions; a scheduling proposal does not establish permission for changed hours.

C Not here. This line belongs to turn 10, after Leena says: "The transport quote adds seven hundred fifty dollars, and the extra equipment adds two hundred fifty." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 12, after Leena says: "The current approved budget is twenty-five thousand. Can I say the revised budget is twenty-six thousand?" It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 23

03 / Answers and explanations

A / Read the situation

A1. Which use is described in the available document?

D. Organic brand-website use in the United States, 1 June to 31 August

The available document states a limited channel, territory, and term that do not match the whole planned campaign.

Return to the exercise, page 26

A2. Which planned use extends beyond that description?

A. Paid social in Canada through 30 November

Paid social, Canada, and the later end date exceed the available document's stated scope.

Return to the exercise, page 26

A3. What is the local publication status?

A. On hold pending confirmed rights or an appropriately cleared replacement

The release process requires confirmed scope or a cleared replacement rather than assumptions based on payment or duration.

Return to the exercise, page 26

D / Response choices

D1. Which sentence best identifies the mismatch?

A. The plan extends the documented channel, territory, and term.

The planned paid social, Canadian territory, and November end date exceed the described grant.

Return to the exercise, page 30

D2. What must be distinguished when checking this recorded track?

A. The underlying composition and the particular recording

The musical work and its recorded performance can involve distinct permissions and controlling parties.

Return to the exercise, page 30

03 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: A particular recorded performance or production of sound. Which term fits?

A. sound recording

A Correct. sound recording: A particular recorded performance or production of sound. The usual combination is "identify the sound recording".

B Not here. usage restriction: A condition limiting how material may be used. The usual combination is "identify usage restrictions".

C Not here. release hold: A block on publication pending a required condition. The usual combination is "maintain the release hold".

D Not here. record label: A company involved in recorded music and potentially controlling recording rights. The usual combination is "verify the record label's authority".

Return to the exercise, page 30

D4. Rebuild the exchange from "A music receipt is not the release clearance". Ada: "We also planned to run the campaign in Canada. The music file itself does not mention countries." Ben: [missing response] Ada: "And our paid campaign continues through the end of November." Which response belongs in the gap?

C. The relevant territory is in the license, not inferred from the file. The document names the United States only, so Canada needs to be addressed in the rights review.

A Not here. This line belongs to turn 16, after Ada says: "I can identify another cue, but I assume we must check that one too." It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 2, after Ada says: "M17 finally makes the edit work. I found the receipt, but can you check clearance before I mark the export ready for release?" It addresses that point, not the missing turn in the supplied exchange.

C Correct. This is Ben's response in turn 6. It connects Ada's preceding point with Ada's follow-up. Territory specifies the geographic permission boundary; the document names the United States, while the plan also includes Canada.

D Not here. This line belongs to turn 14, after Ada says: "The campaign team wants to keep the date. Would using a shorter extract change the clearance question, or would we still need the wider grant?" It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 30

E / Conversation

1. license scope

Turn 2. License scope defines permitted uses; a receipt alone does not show the required channel, territory, term, and rights coverage.

03 / Answers and explanations / continued

2. paid media

Turn 4. Paid media involves purchased advertising placement or amplification, which is additional to the organic website use described in the document.

3. territory

Turn 6. Territory specifies the geographic permission boundary; the document names the United States, while the plan also includes Canada.

4. license term

Turn 8. License term is the authorized period; the available August end date does not establish permission through November.

5. musical composition

Turn 10. Musical composition is the underlying work, distinct from the specific sound recording used in the edit.

6. master-use permission

Turn 12. Master-use permission concerns the particular recording, so composition permission alone cannot be assumed to cover that recording.

7. release hold

Turn 14. Release hold blocks publication under this production's process while the intended-use permissions remain unconfirmed.

8. replacement cue

Turn 16. Replacement cue is an alternative selection; it still needs permissions matching the actual planned use before release.

9. clearance log

Turn 18. Clearance log preserves documents, scope decisions, and unresolved questions so the release team can trace the actual permission basis.

10. cue sheet

Turn 20. Cue sheet records music use and details; it supports documentation but is not itself the permission to use the music.

Return to the conversation, page 32

03 / Answers and explanations / continued

F / Accuracy and scope

F1. Which item is not itself a rights grant?

D. A cue sheet listing the music used

A cue sheet records use and details, but listing the track does not itself grant permission.

Return to the exercise, page 35

F2. Which next action respects the release process?

D. Seek the expanded permissions or verify a replacement before release.

The stated process requires actual clearance of the intended use rather than a labeling or duration shortcut.

Return to the exercise, page 35

F / Guided speaking

1. France

Editor: The documented territory is France.

Turn 1. France is the territory explicitly described in the available document.

2. Germany

Coordinator: The new territory needing review is Germany.

Turn 2. Germany is added by the proposed use and is not established by the French territory description.

3. 30 September

Editor: The documented end date is 30 September.

Turn 3. Thirty September is the available permission's end date, not the proposed later date.

4. 31 December

Coordinator: The proposed end date is 31 December.

Turn 4. Thirty-one December is the intended campaign end, which needs rights review beyond the documented term.

Return to the conversation, page 36

03 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "A music receipt is not the release clearance". Ada: "The campaign team wants to keep the date. Would using a shorter extract change the clearance question, or would we still need the wider grant?" Ben: [missing response] Ada: "I can identify another cue, but I assume we must check that one too." Which response belongs in the gap?

A. A shorter extract does not establish clearance. The release hold stays in place under our process until the necessary scope is confirmed or an appropriately cleared replacement is used.

A Correct. This is Ben's response in turn 14. It connects Ada's preceding point with Ada's follow-up. Release hold blocks publication under this production's process while the intended-use permissions remain unconfirmed.

B Not here. This line belongs to turn 16, after Ada says: "I can identify another cue, but I assume we must check that one too." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 6, after Ada says: "We also planned to run the campaign in Canada. The music file itself does not mention countries." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 2, after Ada says: "M17 finally makes the edit work. I found the receipt, but can you check clearance before I mark the export ready for release?" It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 36

04 / Answers and explanations

A / Read the situation

A1. When does the full review window end?

B. Wednesday at 10:00

Forty-eight elapsed hours after Monday at ten ends Wednesday at ten in the same time zone.

Return to the exercise, page 37

A2. What must the complete package include here?

A. The main film and vertical version

The fictional terms explicitly require both versions in the complete review package.

Return to the exercise, page 37

A3. What does silence mean under these terms?

A. It is not deemed approval.

The briefing expressly states that silence is not deemed approval under this agreement.

Return to the exercise, page 37

D / Response choices

D1. Which client update is accurate?

C. Approval is pending; the full window ends Wednesday at 10:00, after Tuesday's target.

The actual window and pending decision must remain visible despite the earlier delivery target.

Return to the exercise, page 41

D2. Which calculation follows the stated terms?

B. Monday 10:00 plus 48 elapsed hours equals Wednesday 10:00.

The case defines continuous elapsed hours starting from confirmed complete-package receipt.

Return to the exercise, page 41

04 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: Delivery of all materials required to start the stated review. Which term fits?

D. complete submission

A Not here. digital replica: A digital representation of a person's likeness or voice. The usual combination is "assess digital-replica terms".

B Not here. version identifier: A label distinguishing one specific file or revision. The usual combination is "preserve the version identifier".

C Not here. talent representative: A person authorized to act for a performer in relevant matters. The usual combination is "contact the talent representative".

D Correct. complete submission: Delivery of all materials required to start the stated review. The usual combination is "confirm a complete submission".

Return to the exercise, page 41

D4. Rebuild the exchange from "A delivery target arrives before the review window ends". Joel: "Forty-eight hours takes us to Wednesday at ten, using the same time zone." Mina: [missing response] Joel: "They might answer on Tuesday. I do not want to tell the client that Wednesday is certain if an earlier response is possible." Which response belongs in the gap?

B. Correct. Those are elapsed hours, not an assumed business-day calculation. The calendar needs to show that full window, even though our preferred delivery time is earlier.

A Not here. This line belongs to turn 8, after Joel says: "They might answer on Tuesday. I do not want to tell the client that Wednesday is certain if an earlier response is possible." It addresses that point, not the missing turn in the supplied exchange.

B Correct. This is Mina's response in turn 6. It connects Joel's preceding point with Joel's follow-up. Elapsed hours run continuously from Monday at ten to Wednesday at ten under the fictional agreement.

C Not here. This line belongs to turn 12, after Joel says: "Then please ask whether the representative can accommodate an accelerated review." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 14, after Joel says: "If we receive notes, I would like one coordinated list instead of conflicting messages from several people." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 41

E / Conversation

1. talent agreement

Turn 2. Talent agreement supplies the actual review terms; the delivery target does not replace those terms or establish approval.

04 / Answers and explanations / continued

2. complete submission

Turn 4. Complete submission includes both the main film and vertical version, satisfying the stated package requirement for starting this review.

3. elapsed hours

Turn 6. Elapsed hours run continuously from Monday at ten to Wednesday at ten under the fictional agreement.

4. review window

Turn 8. Review window is the allowed assessment period; it does not prevent an earlier response, but no early approval is guaranteed.

5. deemed approval

Turn 10. Deemed approval would arise only under specified terms; this agreement expressly does not treat silence as approval.

6. talent representative

Turn 12. Talent representative is the appropriate contact for the review request; asking for acceleration does not establish its acceptance.

7. consolidated notes

Turn 14. Consolidated notes combine feedback into a coordinated set, helping the team plan a revision without inventing approval.

8. Picture lock

Turn 16. Picture lock fixes the picture-editing stage for subsequent work; it does not itself satisfy the separate talent approval requirement.

9. approval tracker

Turn 18. Approval tracker records submissions, versions, recipients, timing, and decisions so responsibility remains clear throughout the process.

10. approval record

Turn 20. Approval record documents the actual decision on identified material; it replaces speculation based on deadlines or informal impressions.

Return to the conversation, page 43

04 / Answers and explanations / continued

F / Accuracy and scope

F1. Which action is supported?

A. Ask whether an accelerated review can be agreed without assuming acceptance.

An acceleration request is legitimate, but the requested change requires an actual agreement or decision.

Return to the exercise, page 46

F2. What should the approval record identify?

A. The particular version, decision, recipient, and timestamp

Version-specific evidence prevents approval of one submission from being applied indiscriminately to another.

Return to the exercise, page 46

F / Guided speaking

1. Thursday at 14:00

Coordinator: Receipt was confirmed on Thursday at 14:00.

Turn 1. Thursday at fourteen hundred is the stated event that starts the review clock.

2. Friday at 14:00

Producer: The full window ends on Friday at 14:00.

Turn 2. Twenty-four elapsed hours after Thursday at fourteen hundred ends Friday at fourteen hundred.

3. Friday at 09:00

Coordinator: The earlier client target is Friday at 09:00.

Turn 3. Friday at nine is the desired delivery target, not the end of the agreed review window.

4. approval

Producer: Silence is not deemed approval.

Turn 4. The supplied terms expressly exclude treating silence as an approval decision.

Return to the conversation, page 47

04 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "A delivery target arrives before the review window ends". Joel: "If we receive notes, I would like one coordinated list instead of conflicting messages from several people." Mina: [missing response] Joel: "The editor says picture is locked. Does that make the remaining review only a formality?" Which response belongs in the gap?

C. I can request consolidated notes where the process permits. We will still preserve who gave the feedback and what it concerns, rather than merge away a substantive disagreement.

A Not here. This line belongs to turn 2, after Joel says: "The client wants F29 Tuesday at five. I see Monday's submission in the tracker, but no decision. How much of the review window is still left?" It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 12, after Joel says: "Then please ask whether the representative can accommodate an accelerated review." It addresses that point, not the missing turn in the supplied exchange.

C Correct. This is Mina's response in turn 14. It connects Joel's preceding point with Joel's follow-up. Consolidated notes combine feedback into a coordinated set, helping the team plan a revision without inventing approval.

D Not here. This line belongs to turn 8, after Joel says: "They might answer on Tuesday. I do not want to tell the client that Wednesday is certain if an earlier response is possible." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 47

05 / Answers and explanations

A / Read the situation

A1. Which offer has the larger headline fee?

B. A, at $30,000

Offer A explicitly states thirty thousand dollars, exceeding B's twenty-two thousand.

Return to the exercise, page 51

A2. Which offer is narrower in stated territory and duration?

D. B: United States, six months

Offer B is limited to the United States and six months under the supplied terms.

Return to the exercise, page 51

A3. Can both be accepted unchanged without examining overlap?

C. No; A's exclusive rights overlap B's proposed use.

A's worldwide exclusive video-on-demand scope includes the United States advertising-supported use proposed by B.

Return to the exercise, page 51

D / Response choices

D1. Which comparison captures the main trade-off?

A. A pays more for broader, longer exclusive rights; B pays less for narrower, shorter nonexclusive rights.

The complete comparison includes scope, duration, and exclusivity alongside the headline fee.

Return to the exercise, page 55

D2. Why does B's nonexclusive wording not solve the conflict?

B. It does not override the exclusivity A would receive in the overlapping scope.

A separate nonexclusive grant cannot by itself defeat an overlapping exclusive commitment to another party.

Return to the exercise, page 55

05 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: Permission that does not itself reserve the use to one licensee. Which term fits?

C. nonexclusive license

A Not here. revenue share: An agreed division of defined income. The usual combination is "calculate revenue share".

B Not here. geoblocking: Restricting access based on geographic location. The usual combination is "verify geoblocking requirements".

C Correct. nonexclusive license: Permission that does not itself reserve the use to one licensee. The usual combination is "offer a nonexclusive license".

D Not here. free ad-supported streaming TV (FAST): Scheduled streaming channels available without subscription and supported by ads. The usual combination is "evaluate FAST distribution".

Return to the exercise, page 55

D4. Rebuild the exchange from "The larger fee also sells a broader restriction". Mason: "Could we take both fees? B is nonexclusive, so it sounds compatible with another service." Priya: [missing response] Mason: "Then accepting A unchanged would conflict with the proposed B grant." Which response belongs in the gap?

A. B's nonexclusive license does not cancel A's exclusivity. Both offers begin on the same date, and A's worldwide VOD scope includes the United States use that B wants.

A Correct. This is Priya's response in turn 6. It connects Mason's preceding point with Mason's follow-up. Nonexclusive license does not demand sole use for B, but it cannot override exclusive rights granted separately to A.

B Not here. This line belongs to turn 8, after Mason says: "Then accepting A unchanged would conflict with the proposed B grant." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 16, after Mason says: "B specifically wants advertising-supported on-demand rights. Does that automatically include scheduled free streaming channels?" It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 10, after Mason says: "Could we ask A to leave advertising-supported viewing out of its exclusivity?" It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 55

E / Conversation

1. license fee

Turn 2. License fee is the payment for defined permission; the larger amount must be read beside the rights requested.

05 / Answers and explanations / continued

2. rights grid

Turn 4. Rights grid maps medium, territory, period, and exclusivity, making both the proposed grants and existing limitations visible.

3. nonexclusive license

Turn 6. Nonexclusive license does not demand sole use for B, but it cannot override exclusive rights granted separately to A.

4. exclusive license

Turn 8. Exclusive license reserves its specified use under the agreement, creating the overlap problem with B's proposed simultaneous grant.

5. carve-out

Turn 10. Carve-out is an explicit exception to a broader restriction; it would need A's actual agreement rather than an internal assumption.

6. rights reversion

Turn 12. Rights reversion concerns when granted rights return or expire under the actual agreement, which must be verified rather than assumed.

7. net receipts

Turn 14. Net receipts require the agreement's defined deductions and relevant costs; the headline fee alone does not establish that amount.

8. Advertising-supported VOD

Turn 16. Advertising-supported VOD refers to on-demand viewing funded by advertising and should not be silently expanded to every ad-supported distribution format.

9. delivery specification

Turn 18. Delivery specification defines required materials and technical formats, allowing the team to assess work rather than assume equal delivery burdens.

10. distribution window

Turn 20. Distribution window organizes the period and sequence of permitted releases, connecting the deal to future exploitation choices.

Return to the conversation, page 57

05 / Answers and explanations / continued

F / Accuracy and scope

F1. Which statement is unsupported?

B. Net receipts are exactly $30,000 under A.

The missing deductions and delivery costs prevent treating the headline fee as established net receipts.

Return to the exercise, page 59

F2. Which next step is a proposal rather than an agreement?

B. Ask A to consider a defined AVOD carve-out.

Asking for a carve-out starts a negotiation but does not establish acceptance or available rights.

Return to the exercise, page 59

F / Guided speaking

1. 12,000

Producer: C's headline fee is 12,000 dollars.

Turn 1. Twelve thousand dollars is the proposed fee, not an established net-income figure.

2. France

Sales lead: D's territory is France.

Turn 2. France is the stated geographic scope of the second offer.

3. 12

Producer: C's proposed term is 12 months.

Turn 3. Twelve months is the duration of the UK SVOD proposal.

4. three

Sales lead: D's proposed term is three months.

Turn 4. Three months is the duration of the French AVOD proposal, distinct from C's longer term.

Return to the conversation, page 60

05 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "The larger fee also sells a broader restriction". Mason: "The summary labels the thirty thousand net income, but delivery and localization are still unpriced. Can we fix that label before it reaches the producer?" Priya: [missing response] Mason: "B specifically wants advertising-supported on-demand rights. Does that automatically include scheduled free streaming channels?" Which response belongs in the gap?

D. Then it should not label that net receipts. We only have the flat headline fee here. Delivery costs, taxes, and other deductions are not supplied, so the net comparison is incomplete.

A Not here. This line belongs to turn 2, after Mason says: "A is eight thousand higher. Before I recommend it, what would we be giving up that is not obvious from the fee column?" It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 8, after Mason says: "Then accepting A unchanged would conflict with the proposed B grant." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 4, after Mason says: "So B leaves more future options open, at least under its own proposed restriction." It addresses that point, not the missing turn in the supplied exchange.

D Correct. This is Priya's response in turn 14. It connects Mason's preceding point with Mason's follow-up. Net receipts require the agreement's defined deductions and relevant costs; the headline fee alone does not establish that amount.

Return to the exercise, page 60

06 / Answers and explanations

A / Read the situation

A1. What is Period B's completion rate?

B. 60%

Twelve hundred complete plays divided by two thousand eligible starts equals sixty percent.

Return to the exercise, page 61

A2. What happened to complete-play count?

A. It rose from 800 to 1,200.

The briefing supplies eight hundred complete plays in A and twelve hundred in B.

Return to the exercise, page 61

A3. What is not supplied?

D. Spend and business-outcome data

The record explicitly leaves spending and business outcomes outside the available figures.

Return to the exercise, page 61

D / Response choices

D1. Which summary is accurate?

B. Complete plays rose 50%, but completion rate fell 20 percentage points.

Complete plays rose from 800 to 1,200, while the rate fell from 80% to 60%.

Return to the exercise, page 65

D2. Which denominator produces the stated Period B completion rate?

C. 2,000 eligible starts

This report explicitly divides complete plays by eligible starts, not by reach.

Return to the exercise, page 65

06 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: A playback reaching the specified end point. Which term fits?

C. complete play

A Not here. retention curve: A display of audience continuation across a video's timeline. The usual combination is "inspect the retention curve".

B Not here. attribution window: The time interval used to connect an outcome to an exposure or action. The usual combination is "specify the attribution window".

C Correct. complete play: A playback reaching the specified end point. The usual combination is "count complete plays".

D Not here. engagement rate: Defined interactions divided by a specified audience or exposure base. The usual combination is "specify the engagement-rate denominator".

Return to the exercise, page 65

D4. Rebuild the exchange from "More completed plays, but a lower completion rate". Dana: "That is twenty percentage points lower. The complete-play count itself is fifty percent higher." Felix: [missing response] Dana: "Reach rose from nine hundred to fifteen hundred accounts. Can I call those fifteen hundred viewers?" Which response belongs in the gap?

B. Correct. Keep the eligible start denominator visible. If we quietly switch to reached accounts, we are no longer calculating the completion rate defined in this report.

A Not here. This line belongs to turn 4, after Dana says: "The later period had twice as many starts, so the larger completion count does not mean the same rate." It addresses that point, not the missing turn in the supplied exchange.

B Correct. This is Felix's response in turn 6. It connects Dana's preceding point with Dana's follow-up. Eligible start is the defined playback-event base for this rate; changing that base would change the measure.

C Not here. This line belongs to turn 10, after Dana says: "And twelve hundred finished plays may include someone watching more than once." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 8, after Dana says: "Reach rose from nine hundred to fifteen hundred accounts. Can I call those fifteen hundred viewers?" It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 65

E / Conversation

1. complete play

Turn 2. Complete play is a playback reaching the end; its count rose from eight hundred to twelve hundred.

06 / Answers and explanations / continued

2. completion rate

Turn 4. Completion rate divides complete plays by eligible starts, giving eighty percent before and sixty percent afterward.

3. eligible start

Turn 6. Eligible start is the defined playback-event base for this rate; changing that base would change the measure.

4. reach

Turn 8. Reach is estimated distinct accounts here; it should not be silently relabeled as verified individual human viewers.

5. repeat play

Turn 10. Repeat play is another playback event and does not necessarily add a new distinct audience member.

6. retention curve

Turn 12. Retention curve shows continuation through the video timeline and can reveal where viewing falls away.

7. measurement methodology

Turn 14. Measurement methodology defines how the metrics were produced, supporting comparable interpretation across periods rather than assumed equivalence.

8. cost per completed view

Turn 16. Cost per completed view needs spend as well as completions; the provided data contains no spending figure.

9. business outcome

Turn 18. Business outcome concerns a commercial result beyond exposure; the audience figures alone do not establish sales impact.

10. benchmark

Turn 20. Benchmark is the defined reference or objective for judging performance; different goals may lead to different interpretations of the mixed results.

Return to the conversation, page 67

06 / Answers and explanations / continued

F / Accuracy and scope

F1. Which claim requires additional evidence?

A. Cost per completed view improved.

Cost per completed view requires spend data, which the briefing does not supply.

Return to the exercise, page 70

F2. Which diagnostic addresses retention?

C. Inspect the playback retention curve for drop-off points.

A retention curve shows how viewing continues across the timeline and can locate drop-off patterns.

Return to the exercise, page 70

F / Guided speaking

1. 70%

Director: C's completion rate is 70%.

Turn 1. Three hundred fifty completions divided by five hundred starts equals seventy percent.

2. 60%

Analyst: D's completion rate is 60%.

Turn 2. Four hundred eighty completions divided by eight hundred starts equals sixty percent.

3. 130

Director: The completion count rose by 130.

Turn 3. Four hundred eighty minus three hundred fifty equals one hundred thirty additional complete plays.

4. ten percentage points

Analyst: The rate fell by ten percentage points.

Turn 4. Seventy percent minus sixty percent is an absolute ten-percentage-point decline.

Return to the conversation, page 71

06 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "More completed plays, but a lower completion rate". Dana: "The video is thirty seconds in both periods, so we are not comparing different lengths." Felix: [missing response] Dana: "The client will ask what each completed view cost. Have we received the spend figures, or is that still a gap in the report?" Which response belongs in the gap?

A. Good. Preserve that and the measurement methodology in the readout. If we later compare another platform, we must check its view and completion definitions before treating the figures as equivalent.

A Correct. This is Felix's response in turn 14. It connects Dana's preceding point with Dana's follow-up. Measurement methodology defines how the metrics were produced, supporting comparable interpretation across periods rather than assumed equivalence.

B Not here. This line belongs to turn 16, after Dana says: "The client will ask what each completed view cost. Have we received the spend figures, or is that still a gap in the report?" It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 12, after Dana says: "What should we examine to understand the lower proportion finishing?" It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 2, after Dana says: "I have led with the larger reach and more finished plays. Before I send the success summary, is there anything in the retention figures I should bring forward?" It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 71

07 / Answers and explanations

A / Read the situation

A1. What is already approved?

D. One ten-second product mention

The briefing approves only the original ten-second mention, leaving the new request unresolved.

Return to the exercise, page 74

A2. What is wrong with the proposed universal claim?

A. No supporting evidence is supplied.

The supplied facts do not support the assertion that the product works for everyone.

Return to the exercise, page 74

A3. Where should the endorsement disclosure be addressed in this case?

D. Clearly in the video, not only in its description

The scenario requires clear in-video disclosure; a description-only approach can be missed by viewers.

Return to the exercise, page 74

D / Response choices

D1. Which statement describes the time change accurately?

D. The proposed mentions total twenty-five seconds, fifteen more than approved.

Ten plus fifteen equals twenty-five seconds of mentions, not the entire program or an approved revision.

Return to the exercise, page 78

D2. What does a clear disclosure not accomplish by itself?

D. It does not substantiate the universal product claim.

Disclosure addresses the relationship, while a factual product claim still needs its own supporting evidence.

Return to the exercise, page 78

07 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: A promotional message delivered by the program's host. Which term fits?

D. host-read

A Not here. substantiation: Evidence supporting a factual claim. The usual combination is "require claim substantiation".

B Not here. script revision: A change to the wording of a production script. The usual combination is "submit the script revision".

C Not here. brand suitability: Compatibility with a particular brand's preferences and context. The usual combination is "define brand suitability".

D Correct. host-read: A promotional message delivered by the program's host. The usual combination is "approve the host-read".

Return to the exercise, page 78

D4. Rebuild the exchange from "One extra mention changes more than the running time". Carmen: "Their suggested line is that the product works for everyone. They have not sent any evidence." Noel: [missing response] Carmen: "Could the host say it is what they personally experienced instead?" Which response belongs in the gap?

C. That universal claim cannot be presented as established on this record. We need supporting evidence and an appropriate claims review, not simply a more confident delivery by the host.

A Not here. This line belongs to turn 2, after Carmen says: "The sponsor wants another fifteen seconds after the agreed mention. They are calling it a small adjustment. Can we work out the actual impact before I answer?" It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 18, after Carmen says: "I will send the sponsor a proposal showing the added work, the revised wording route, and the disclosure requirement." It addresses that point, not the missing turn in the supplied exchange.

C Correct. This is Noel's response in turn 6. It connects Carmen's preceding point with Carmen's follow-up. Universal claim extends the assertion to everyone, a breadth not supported by any evidence supplied in this scenario.

D Not here. This line belongs to turn 4, after Carmen says: "They describe it as a small adjustment, but I can see it may displace something." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 78

E / Conversation

1. integration plan

Turn 2. Integration plan defines the original sponsored arrangement; it currently includes one ten-second mention, not the proposed additional segment.

07 / Answers and explanations / continued

2. scope change

Turn 4. Scope change adds work or output beyond the existing agreement; the extra mention cannot be treated as already approved.

3. universal claim

Turn 6. Universal claim extends the assertion to everyone, a breadth not supported by any evidence supplied in this scenario.

4. testimonial

Turn 8. Testimonial represents an actual person's experience or view; changing the grammar must not invent an experience the host did not have.

5. disclosure

Turn 10. Disclosure identifies the relevant commercial relationship; it needs to be clear in the video endorsement rather than solely in the description.

6. clear and conspicuous

Turn 12. Clear and conspicuous means readily noticeable and understandable in context, not hidden, fleeting, or dependent on opening a description.

7. Substantiation

Turn 14. Substantiation is the evidence supporting a factual claim; disclosing sponsorship does not supply that evidence.

8. editorial fit

Turn 16. Editorial fit assesses how the extra mention works with the program's purpose, tone, and audience rather than only its paid duration.

9. approval chain

Turn 18. Approval chain identifies the authorized reviews needed for the new script and commercial arrangement before commitment.

10. audience trust

Turn 20. Audience trust depends on truthful, identifiable commercial content; careful review supports both the production and the sponsor relationship.

Return to the conversation, page 80

07 / Answers and explanations / continued

F / Accuracy and scope

F1. Which response respects both the relationship and the review?

D. We can assess the extra mention, but the wording, disclosure, cost, and timing need approval.

The bounded response offers a path forward without inventing approval or accepting an unsupported claim.

Return to the exercise, page 83

F2. Which disclosure approach fits the stated video endorsement?

D. A clear disclosure within the video, reviewed in context

Viewers need to encounter an understandable disclosure with the endorsement, not merely in internal or easily missed material.

Return to the exercise, page 83

F / Guided speaking

1. eight

Account lead: The approved mention is eight seconds.

Turn 1. Eight seconds is the existing approved mention, not the requested addition.

2. twelve

Producer: The requested addition is twelve seconds.

Turn 2. Twelve seconds is the duration of the new, still-unapproved request.

3. twenty

Account lead: The proposed mention time would total twenty seconds.

Turn 3. Eight approved seconds plus twelve requested seconds totals twenty proposed seconds.

4. substantiation

Producer: The new factual claim still needs substantiation.

Turn 4. The briefing supplies no supporting evidence, so the claim requires substantiation rather than confident repetition.

Return to the conversation, page 84

07 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "One extra mention changes more than the running time". Carmen: "If we fix the disclosure, the words works for everyone still need evidence, correct? I do not want the sponsor to think that one fix clears both issues." Noel: [missing response] Carmen: "The extra segment may also feel repetitive after the host has already mentioned the product." Which response belongs in the gap?

B. Correct. Substantiation and disclosure address different questions. We need truthful content and a clear commercial relationship, not a choice between them.

A Not here. This line belongs to turn 6, after Carmen says: "Their suggested line is that the product works for everyone. They have not sent any evidence." It addresses that point, not the missing turn in the supplied exchange.

B Correct. This is Noel's response in turn 14. It connects Carmen's preceding point with Carmen's follow-up. Substantiation is the evidence supporting a factual claim; disclosing sponsorship does not supply that evidence.

C Not here. This line belongs to turn 2, after Carmen says: "The sponsor wants another fifteen seconds after the agreed mention. They are calling it a small adjustment. Can we work out the actual impact before I answer?" It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 16, after Carmen says: "The extra segment may also feel repetitive after the host has already mentioned the product." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 84

08 / Answers and explanations

A / Read the situation

A1. Which fact is verified?

A. Filming at Studio C paused at 09:20.

The brief verifies the pause, location, and time while leaving cause, injury status, and restart unresolved.

Return to the exercise, page 85

A2. Which claims must be removed from the draft?

A. Contractor blame and the unsupported no-injury claim

Neither contractor responsibility nor absence of injury is supported by the supplied facts.

Return to the exercise, page 85

A3. What does 11:00 represent?

D. The next public update

Eleven o'clock is the communication commitment, not a guarantee of operational or investigative completion.

Return to the exercise, page 85

D / Response choices

D1. Which holding statement fits the facts?

B. Filming at Studio C paused at 09:20 following a technical interruption. We are assessing the situation and will update at 11:00.

The supported statement uses the verified pause and timing while avoiding unsupported cause, injury, or restart claims.

Return to the exercise, page 90

D2. What does unverified injury information justify saying?

D. Injury reports have not yet been verified.

Lack of verification supports only the stated uncertainty, not either a positive or negative injury finding.

Return to the exercise, page 90

08 / Answers and explanations / continued

D3. A colleague needs the term for this meaning: Identifying where information came from. Which term fits?

A. source attribution

A Correct. source attribution: Identifying where information came from. The usual combination is "preserve source attribution".

B Not here. public statement: An authorized communication intended for a public audience. The usual combination is "approve the public statement".

C Not here. speculation: An explanation or claim not established by the available evidence. The usual combination is "avoid speculation".

D Not here. stakeholder briefing: An update to people with a relevant interest or responsibility. The usual combination is "coordinate a stakeholder briefing".

Return to the exercise, page 90

D4. Rebuild the exchange from "Confirm the production pause, not an unverified cause". Luis: "Someone on the crew says the contractor was working near the equipment. Does that justify naming them?" Farah: [missing response] Luis: "I have also seen social posts about injuries. We cannot confirm them yet." Which response belongs in the gap?

C. That is not enough for a causal claim. Being nearby does not establish responsibility. We need an adequate verified basis before asserting a cause or naming a party as responsible.

A Not here. This line belongs to turn 8, after Luis says: "I have also seen social posts about injuries. We cannot confirm them yet." It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 16, after Luis says: "Let us also keep track of when each fact was confirmed and by whom." It addresses that point, not the missing turn in the supplied exchange.

C Correct. This is Farah's response in turn 6. It connects Luis's preceding point with Luis's follow-up. Causal claim explains why an event occurred; proximity to equipment does not establish responsibility for the interruption.

D Not here. This line belongs to turn 14, after Luis says: "Who should send the public version? Several department leads are receiving media questions." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 90

E / Conversation

1. holding statement

Turn 2. Holding statement provides a brief verified update while open questions are checked; it must not invent a complete explanation.

08 / Answers and explanations / continued

2. verified fact

Turn 4. Verified fact has adequate confirmation; here the pause, location, and time are established while other claims remain unresolved.

3. causal claim

Turn 6. Causal claim explains why an event occurred; proximity to equipment does not establish responsibility for the interruption.

4. unverified report

Turn 8. Unverified report is information not yet confirmed; it does not establish either an injury finding or the absence of injuries.

5. welfare update

Turn 10. Welfare update concerns affected people and must use verified information within the relevant authorization and privacy limits.

6. restart authorization

Turn 12. Restart authorization permits resuming activity; the scheduled public update does not supply that permission or a restart time.

7. designated spokesperson

Turn 14. Designated spokesperson is the person authorized under this local process to release the approved public statement.

8. incident timeline

Turn 16. Incident timeline orders relevant events and their support, helping the team distinguish verified times from rumors and later interpretations.

9. correction

Turn 18. Correction acknowledges and repairs a factual error; a silent replacement would conceal the earlier incorrect public claim.

10. approval version

Turn 20. Approval version is the specific text cleared for release, preventing an obsolete or unsupported draft from becoming the public statement.

Return to the conversation, page 92

08 / Answers and explanations / continued

F / Accuracy and scope

F1. Who may release the statement under the local process?

C. The designated spokesperson, using the approved version

The briefing assigns public release to the designated spokesperson and the approved text.

Return to the exercise, page 94

F2. If a published factual claim proves wrong, what is appropriate?

D. Acknowledge and correct the error visibly through the authorized process.

Accurate correction must repair the record transparently rather than hide a substantive published error.

Return to the exercise, page 94

F / Guided speaking

1. 15:10

Producer: The confirmed pause time is 15:10.

Turn 1. Fifteen ten is the verified event time, distinct from the later communication appointment.

2. unconfirmed

Communications lead: The cause remains unconfirmed.

Turn 2. The briefing supplies no established cause, so an explanation must not be invented.

3. 16:00

Producer: The next status update is at 16:00.

Turn 3. Sixteen hundred is the planned update, not a promised restart.

4. Rina

Communications lead: The designated spokesperson is Rina.

Turn 4. Rina is the named person responsible for delivering the approved update.

Return to the conversation, page 95

08 / Answers and explanations / continued

F / Rebuild the exchange

1. Rebuild the exchange from "Confirm the production pause, not an unverified cause". Luis: "Who should send the public version? Several department leads are receiving media questions." Farah: [missing response] Luis: "Let us also keep track of when each fact was confirmed and by whom." Which response belongs in the gap?

D. The designated spokesperson will issue the approved text. We should brief the department leads on the same facts and route inquiries through the agreed process rather than improvise separate explanations.

A Not here. This line belongs to turn 16, after Luis says: "Let us also keep track of when each fact was confirmed and by whom." It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 6, after Luis says: "Someone on the crew says the contractor was working near the equipment. Does that justify naming them?" It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 8, after Luis says: "I have also seen social posts about injuries. We cannot confirm them yet." It addresses that point, not the missing turn in the supplied exchange.

D Correct. This is Farah's response in turn 14. It connects Luis's preceding point with Luis's follow-up. Designated spokesperson is the person authorized under this local process to release the approved public statement.

Return to the exercise, page 95

Review 1 / Explanations

Cumulative review

1. A colleague needs the term for this meaning: The main message the communication should convey. Which term fits?

B. single-minded proposition

A Not here. storyboard: A sequence of images planning the shots or story. The usual combination is "approve the storyboard".

B Correct. single-minded proposition: The main message the communication should convey. The usual combination is "sharpen the single-minded proposition".

C Not here. cutdown: A shorter version adapted from a longer piece. The usual combination is "scope a cutdown".

D Not here. visual hierarchy: The ordering of visual elements by importance. The usual combination is "establish visual hierarchy".

Return to the exercise, page 24

2. A colleague needs the term for this meaning: The time a person or department is required to report. Which term fits?

C. call time

A Not here. call sheet: The daily production document listing timing, locations, and key information. The usual combination is "revise the call sheet".

B Not here. location permit: Required permission to use a location under applicable rules. The usual combination is "verify the location permit".

C Correct. call time: The time a person or department is required to report. The usual combination is "confirm the call time".

D Not here. contingency: A planned reserve for specified uncertainties. The usual combination is "review the contingency".

Return to the exercise, page 24

Review 1 / Explanations / continued

3. Rebuild the exchange from "What does premium and energetic actually mean?". Sora: "I can send one. I want the team to discuss the editing, not reproduce its entire visual style." Ellis: [missing response] Sora: "The main film needs to be thirty seconds. It will appear in the normal wide player on the website." Which response belongs in the gap?

B. Good. We will label it as a reference film for rhythm only. That avoids turning one useful example into an instruction to imitate every shot, color, or music choice.

A Not here. This line belongs to turn 2, after Sora says: "The last film looked polished, but it took too long to get going. Can this one feel premium without losing that first burst of energy?" It addresses that point, not the missing turn in the supplied exchange.

B Correct. This is Ellis's response in turn 10. It connects Sora's preceding point with Sora's follow-up. Reference film provides an example of a named quality; it does not authorize copying or adopt every creative element.

C Not here. This line belongs to turn 14, after Sora says: "We may want a shorter, fifteen-second vertical version for social later. Please do not include it as confirmed scope yet." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 6, after Sora says: "I like deliberate close shots of the product. I do not want the film to look cheap just because the edit is energetic." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 24

4. Rebuild the exchange from "The location move does not fit the call sheet". Leena: "I will present a revised timing option with the known costs and the overtime question." Grant: [missing response] Leena: "Once a decision is made, both the crew schedule and the financial record should reflect it." Which response belongs in the gap?

D. Route the proposed change order through the approval process. A client request explains why the change is being assessed, but it does not make every consequence approved.

A Not here. This line belongs to turn 12, after Leena says: "The current approved budget is twenty-five thousand. Can I say the revised budget is twenty-six thousand?" It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 2, after Leena says: "Can you sanity-check the second-location plan? We wrap at A at noon, but the client has put the first interview at B at twelve thirty." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 6, after Leena says: "That makes the earliest filming start thirteen twenty, before any extra delay." It addresses that point, not the missing turn in the supplied exchange.

D Correct. This is Grant's response in turn 18. It connects Leena's preceding point with Leena's follow-up. Change order records an authorized alteration to agreed work; the proposed timing and cost revision still needs that decision.

Return to the exercise, page 24

Review 2 / Explanations

Cumulative review

1. A colleague needs the term for this meaning: The underlying music and any lyrics. Which term fits?

A. musical composition

A Correct. musical composition: The underlying music and any lyrics. The usual combination is "identify the musical composition".

B Not here. organic use: Distribution without paid amplification in the specified context. The usual combination is "confirm organic-use rights".

C Not here. music publisher: An entity administering relevant rights in musical works. The usual combination is "contact the music publisher".

D Not here. public domain: A status in which relevant copyright protection does not apply in the jurisdiction concerned. The usual combination is "assess public-domain status".

Return to the exercise, page 49

2. A colleague needs the term for this meaning: Approval treated as occurring under a specified contractual condition. Which term fits?

A. deemed approval

A Correct. deemed approval: Approval treated as occurring under a specified contractual condition. The usual combination is "check deemed-approval wording".

B Not here. final cut: A specified completed edit, subject to the actual approval arrangement. The usual combination is "identify the final cut".

C Not here. likeness: A person's recognizable image or representation. The usual combination is "confirm likeness rights".

D Not here. talent agreement: A contract governing a performer's engagement and relevant uses. The usual combination is "review the talent agreement".

Return to the exercise, page 49

Review 2 / Explanations / continued

3. Rebuild the exchange from "The location move does not fit the call sheet". Leena: "The transport quote adds seven hundred fifty dollars, and the extra equipment adds two hundred fifty." Grant: [missing response] Leena: "The current approved budget is twenty-five thousand. Can I say the revised budget is twenty-six thousand?" Which response belongs in the gap?

D. Record those in the cost report. They total one thousand dollars. The timing change may also affect overtime, but we have not priced that exposure yet.

A Not here. This line belongs to turn 14, after Leena says: "We also need to know whether Location B permits the later filming and exit times." It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 12, after Leena says: "The current approved budget is twenty-five thousand. Can I say the revised budget is twenty-six thousand?" It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 2, after Leena says: "Can you sanity-check the second-location plan? We wrap at A at noon, but the client has put the first interview at B at twelve thirty." It addresses that point, not the missing turn in the supplied exchange.

D Correct. This is Grant's response in turn 10. It connects Leena's preceding point with Leena's follow-up. Cost report tracks spending, commitments, and forecasts; the two known additions need visibility without implying approval.

Return to the exercise, page 49

---

4. Rebuild the exchange from "A delivery target arrives before the review window ends". Joel: "Can you own the submission and follow-up? I need one place to check which files were received and whether the decision covers them." Mina: [missing response] Joel: "I will tell the client approval is pending, the full window ends Wednesday at ten, and we have requested an earlier response." Which response belongs in the gap?

A. I will own the approval tracker. If a file changes, I will check whether it needs a new review and keep that separate from any decision on the previous version.

A Correct. This is Mina's response in turn 18. It connects Joel's preceding point with Joel's follow-up. Approval tracker records submissions, versions, recipients, timing, and decisions so responsibility remains clear throughout the process.

B Not here. This line belongs to turn 4, after Joel says: "Was that package complete, including the vertical version?" It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 2, after Joel says: "The client wants F29 Tuesday at five. I see Monday's submission in the tracker, but no decision. How much of the review window is still left?" It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 10, after Joel says: "Could we treat no response by Tuesday afternoon as consent?" It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 49

Review 3 / Explanations

Cumulative review

1. A colleague needs the term for this meaning: Permission reserving the specified licensed use to the licensee under its terms. Which term fits?

B. exclusive license

A Not here. minimum guarantee: A contractually specified minimum payment, often linked to later accounting. The usual combination is "review the minimum guarantee".

B Correct. exclusive license: Permission reserving the specified licensed use to the licensee under its terms. The usual combination is "negotiate an exclusive license".

C Not here. caption file: A file carrying timed text for accessible or translated presentation. The usual combination is "deliver the caption file".

D Not here. transactional VOD (TVOD): On-demand viewing paid for per rental or purchase. The usual combination is "negotiate TVOD terms".

Return to the exercise, page 72

2. A colleague needs the term for this meaning: Viewing time divided by the relevant view count. Which term fits?

C. average view duration

A Not here. cost per completed view: Cost divided by completed views under the specified rules. The usual combination is "calculate cost per completed view".

B Not here. reach: The estimated or measured distinct audience under a stated method. The usual combination is "report estimated reach".

C Correct. average view duration: Viewing time divided by the relevant view count. The usual combination is "compare average view duration".

D Not here. repeat play: An additional playback rather than necessarily a new viewer. The usual combination is "distinguish repeat plays".

Return to the exercise, page 72

Review 3 / Explanations / continued

3. Rebuild the exchange from "A delivery target arrives before the review window ends". Joel: "Could we treat no response by Tuesday afternoon as consent?" Mina: [missing response] Joel: "Then please ask whether the representative can accommodate an accelerated review." Which response belongs in the gap?

B. No. The stated terms do not provide deemed approval. A deadline on our internal calendar does not create that mechanism. Silence cannot be turned into a positive decision here.

A Not here. This line belongs to turn 8, after Joel says: "They might answer on Tuesday. I do not want to tell the client that Wednesday is certain if an earlier response is possible." It addresses that point, not the missing turn in the supplied exchange.

B Correct. This is Mina's response in turn 10. It connects Joel's preceding point with Joel's follow-up. Deemed approval would arise only under specified terms; this agreement expressly does not treat silence as approval.

C Not here. This line belongs to turn 4, after Joel says: "Was that package complete, including the vertical version?" It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 2, after Joel says: "The client wants F29 Tuesday at five. I see Monday's submission in the tracker, but no decision. How much of the review window is still left?" It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 72

---

4. Rebuild the exchange from "More completed plays, but a lower completion rate". Dana: "They may also want to know whether the campaign increased sales." Felix: [missing response] Dana: "I will report more reached accounts and more complete plays, alongside the lower completion rate and the missing cost and sales data." Which response belongs in the gap?

B. That business outcome needs separate evidence and an appropriate attribution approach. Neither the reach increase nor the completion change proves a sales effect.

A Not here. This line belongs to turn 10, after Dana says: "And twelve hundred finished plays may include someone watching more than once." It addresses that point, not the missing turn in the supplied exchange.

B Correct. This is Felix's response in turn 18. It connects Dana's preceding point with Dana's follow-up. Business outcome concerns a commercial result beyond exposure; the audience figures alone do not establish sales impact.

C Not here. This line belongs to turn 4, after Dana says: "The later period had twice as many starts, so the larger completion count does not mean the same rate." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 6, after Dana says: "That is twenty percentage points lower. The complete-play count itself is fifty percent higher." It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 72

Review 4 / Explanations

Cumulative review

1. A colleague needs the term for this meaning: Display or inclusion of a product within content. Which term fits?

D. product placement

A Not here. approval chain: The sequence of authorized content or commercial reviews. The usual combination is "confirm the approval chain".

B Not here. brand safety: Avoiding specified harmful or unsuitable brand associations. The usual combination is "review brand-safety conditions".

C Not here. clear and conspicuous: Readily noticeable and understandable in the relevant context. The usual combination is "make the disclosure clear and conspicuous".

D Correct. product placement: Display or inclusion of a product within content. The usual combination is "agree product placement".

Return to the exercise, page 96

2. A colleague needs the term for this meaning: A request for information from a journalist or outlet. Which term fits?

A. media inquiry

A Correct. media inquiry: A request for information from a journalist or outlet. The usual combination is "log a media inquiry".

B Not here. correction: A visible acknowledgment and repair of an error. The usual combination is "issue a correction".

C Not here. holding statement: A brief initial statement using verified information while further facts are checked. The usual combination is "prepare a holding statement".

D Not here. operational pause: A temporary stop in activity. The usual combination is "confirm the operational pause".

Return to the exercise, page 96

Review 4 / Explanations / continued

3. Rebuild the exchange from "More completed plays, but a lower completion rate". Dana: "And twelve hundred finished plays may include someone watching more than once." Felix: [missing response] Dana: "What should we examine to understand the lower proportion finishing?" Which response belongs in the gap?

D. Yes. A repeat play can add another completion without adding a distinct account. Event counts and audience counts are useful, but they answer different questions.

A Not here. This line belongs to turn 6, after Dana says: "That is twenty percentage points lower. The complete-play count itself is fifty percent higher." It addresses that point, not the missing turn in the supplied exchange.

B Not here. This line belongs to turn 18, after Dana says: "They may also want to know whether the campaign increased sales." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 4, after Dana says: "The later period had twice as many starts, so the larger completion count does not mean the same rate." It addresses that point, not the missing turn in the supplied exchange.

D Correct. This is Felix's response in turn 10. It connects Dana's preceding point with Dana's follow-up. Repeat play is another playback event and does not necessarily add a new distinct audience member.

Return to the exercise, page 96

---

4. Rebuild the exchange from "Confirm the production pause, not an unverified cause". Luis: "If something we publish later proves wrong, we should not just quietly replace the text." Farah: [missing response] Luis: "I will remove the blame and no-injury sentence. The remaining statement will give the pause, ongoing assessment, and eleven-o'clock update." Which response belongs in the gap?

A. Correct. Issue a visible correction through the authorized process. A clarification can explain wording, but it should not be used to disguise a substantive error in what we said.

A Correct. This is Farah's response in turn 18. It connects Luis's preceding point with Luis's follow-up. Correction acknowledges and repairs a factual error; a silent replacement would conceal the earlier incorrect public claim.

B Not here. This line belongs to turn 8, after Luis says: "I have also seen social posts about injuries. We cannot confirm them yet." It addresses that point, not the missing turn in the supplied exchange.

C Not here. This line belongs to turn 14, after Luis says: "Who should send the public version? Several department leads are receiving media questions." It addresses that point, not the missing turn in the supplied exchange.

D Not here. This line belongs to turn 6, after Luis says: "Someone on the crew says the contractor was working near the equipment. Does that justify naming them?" It addresses that point, not the missing turn in the supplied exchange.

Return to the exercise, page 96

Additional case 1 / Explanations

Extended conversation

1. integrated loudness

Turn 2. Integrated loudness measures the program over the relevant duration in LUFS; the supplied -19 reading is four loudness units above this delivery's -23 target.

2. true peak

Turn 4. True peak is measured in dBTP and addresses peak level rather than average program loudness; -0.2 dBTP exceeds the stipulated -1 dBTP ceiling by 0.8 dB.

3. attenuation

Turn 6. Attenuation reduces the signal level; a uniform four-decibel reduction predicts a four-unit loudness decrease and a four-decibel peak decrease before final remeasurement.

4. headroom

Turn 10. Headroom is the remaining level margin below the applicable limit; a predicted -4.2 dBTP is 3.2 dB below this -1 dBTP ceiling.

5. channel mapping

Turn 14. Channel mapping assigns the intended audio to delivery channels; a loudness pass does not prove that left, right, or other required tracks are correctly assigned.

6. QC report

Turn 18. The quality-control report records the tested file, measurements, specification, and remaining findings; results for an earlier version do not establish the delivered version's status.

Return to the conversation, page 99

Transfer exchange

1. 3

Supervisor: The initial gain reduction to target is 3 decibels.

Turn 1. Moving from minus twenty toward minus twenty-three calls for three decibels of reduction, not an increase.

Additional case 1 / Explanations / continued

2. -4

Mixer: That predicts a true peak of -4 dBTP.

Turn 2. Subtracting three decibels from the initial minus-one peak predicts minus four dBTP.

3. 2

Supervisor: The predicted peak is 2 decibels below the ceiling.

Turn 3. Minus four is two decibels below the specified minus-two maximum.

4. remeasure

Mixer: Before delivery, we must remeasure the final export.

Turn 4. The calculated shift is a prediction; the actual final file must be measured against the delivery requirements.

Return to the conversation, page 102

Additional case 2 / Explanations

Extended conversation

1. reference master

Turn 2. The reference master is the identified picture and sound version used for caption review; using an earlier edit could produce incorrect timing and content judgments.

2. constant offset

Turn 4. A constant offset is the same timing difference at checked points; three matching observations suggest it but do not prove the entire file shares it.

3. frame rate

Turn 6. The frame rate converts the observed frame difference into time: eight frames divided by twenty-five frames per second equals 0.32 seconds.

4. negation

Turn 10. Negation is the negative meaning carried here by 'not'; omitting it reverses the speaker's statement rather than merely shortening the sentence.

5. speaker identification

Turn 13. Speaker identification tells the viewer who speaks when that is not clear from the image and context; it should use established information without inventing or prematurely revealing identity.

6. sound cue

Turn 15. A sound cue represents relevant non-speech audio such as the audible doorbell driving the character's reaction; captions need more than spoken words when sound carries meaning.

Return to the conversation, page 104

Transfer exchange

1. 0.25

Editor: Six frames at this rate equal 0.25 seconds.

Turn 1. Six frames divided by twenty-four frames per second equals one quarter of a second.

Additional case 2 / Explanations / continued

2. earlier

Reviewer: This checked caption needs to move earlier.

Turn 2. The caption is late relative to its speech, so the correction direction is earlier rather than later.

3. not

Editor: Restore the missing word not.

Turn 3. The supplied soundtrack includes not; omitting it falsely changes an unexpired permit into an expired one.

4. synchronization

Reviewer: A single checked cue does not establish whole-file synchronization.

Turn 4. The remaining cues have not been checked, so one timing observation cannot certify synchronization throughout the track.

Return to the conversation, page 107

Additional case 3 / Explanations

Extended conversation

1. hard out

Turn 2. The hard out is the fixed 20:10 ending in this plan; at 20:07 it leaves 180 seconds, not enough for the current 240-second sequence.

2. rundown

Turn 4. The rundown lists the ordered program items and durations; changing the interview from 120 to 90 seconds removes thirty seconds from its current total.

3. cutdown

Turn 6. The cutdown is the approved shorter package, sixty seconds instead of ninety; selecting it removes the remaining thirty seconds without inventing a live edit.

4. out cue

Turn 8. The out cue is the identifiable ending used to coordinate the next item; it must match the selected package rather than be guessed from its file name.

5. read-back

Turn 11. A read-back repeats the critical instruction so the sender can check understanding; here it should confirm the short package identifier and the revised item durations.

6. stand by

Turn 16. Stand by instructs the operator to prepare, not to start playback; a separate execution cue is needed under the agreed control-room procedure.

Return to the conversation, page 109

Transfer exchange

1. 120

Producer: The three durations total 120 seconds.

Turn 1. Forty-five plus fifty plus twenty-five equals the full one-hundred-twenty seconds available.

Additional case 3 / Explanations / continued

2. 18:28:45

Director: The package begins at 18:28:45.

Turn 2. The forty-five-second interview begins at 18:28, so the package follows at 18:28:45.

3. 18:29:35

Producer: The close begins at 18:29:35.

Turn 3. Adding the fifty-second package to 18:28:45 gives 18:29:35 for the final twenty-five seconds.

4. start

Director: Stand by means prepare, not start playback.

Turn 4. The preparation cue does not itself instruct the operator to execute playback under the stated distinction.

Return to the conversation, page 111

Find a phrase by purpose

Creative Briefs and Development Notes

Acknowledge the direction: I understand that you want it to feel premium and energetic.

Request a concrete distinction: Do you mean faster pacing, more camera movement, or both?

Identify the viewer: Who needs to understand the product after watching?

Full phrase bank, page 7

Production Planning and Budget

Name the conflict: The twelve-thirty filming slot does not fit the location move.

Show the dependency: Setup begins only after the thirty-five-minute move.

Do the arithmetic: Thirty-five plus forty-five gives eighty minutes.

Full phrase bank, page 17

Rights, Clearances, and Licensing

Identify the asset: We are reviewing music track M17.

Separate payment and permission: The receipt does not establish the complete license scope.

Read the actual document: The document describes organic website use in the United States.

Full phrase bank, page 29

Talent, Contracts, and Approvals

Locate the governing term: The agreement allows forty-eight elapsed hours.

Confirm the start event: The complete package was received Monday at 10:00.

List the required versions: The package contains the main film and vertical version.

Full phrase bank, page 40

Find a phrase by purpose / continued

Distribution and Windowing

Start with the headline: Offer A pays $30,000 and Offer B pays $22,000.

Add the missing context: The larger fee comes with broader exclusive rights.

State A's duration: A proposes twenty-four months.

Full phrase bank, page 54

Audience Metrics and Performance

Lead with both results: Complete plays increased, while completion rate declined.

State the count gain: Completions rose from eight hundred to twelve hundred.

State the rate change: The rate fell from eighty to sixty percent.

Full phrase bank, page 64

Sponsorship, Brand Safety, and Integration

Acknowledge the request: The sponsor wants a second fifteen-second mention.

State the existing agreement: The current plan approves one ten-second mention.

Quantify the change: The proposed mentions would total twenty-five seconds.

Full phrase bank, page 77

Crisis Response and Public Statements

Lead with the verified event: Filming at Studio C paused at 09:20.

Describe the known context: The pause followed a technical interruption.

Limit the explanation: The cause has not yet been confirmed.

Full phrase bank, page 89

Make the brief specific. Keep the story, rights, and delivery aligned.

Eight production conversations: clarify a creative direction, repair a shooting schedule, check music rights, coordinate talent approval, compare distribution offers, explain audience results, respond to a sponsor change, and prepare a factual public statement.

Creative Briefs and Development Notes

Energetic can refer to pacing, movement, music, or transitions. Here it means energetic editing, not flashing transitions. A reference is useful only when the team states which feature is being borrowed as inspiration.

Production Planning and Budget

The 35-minute move and 45-minute setup are consecutive in this plan: 80 minutes after 12:00 gives 13:20. The 12:30 filming slot is short by 50 minutes, even without additional delay.

Rights, Clearances, and Licensing

The composition and the specific recording are distinct rights subjects. A single provider may administer both, but the team must verify its authority and the actual grant. Do not assume a receipt establishes every required permission.

Talent, Contracts, and Approvals

Forty-eight elapsed hours is not the same as two business days unless the agreement makes them equivalent. This case expressly uses elapsed hours and one time zone. The full window ends Wednesday at 10:00.
