Eight lessons. Eleven extended conversations.

INSIDE THE BOOK

192 vocabulary entries / 128 reusable phrases
220 extended-dialogue turns / 11 transfer exchanges
Word banks and explained answer keys

Upper-intermediate to advanced (B2-C1). For university professors, lecturers, instructors, and faculty members teaching and advising in English.

2026 edition

Eight scenarios. Eight skills.

Eight situations follow the work of a teaching professor: clarifying expectations, guiding a seminar, explaining feedback, helping in office hours, coordinating graders, implementing access arrangements, discussing integrity concerns, and making curriculum decisions.

01 Making assignment expectations explicit 4

Compare does not mean summarize twice | Explain the required intellectual task, evidence, and submission details without expanding the assignment.

02 Leading a rigorous and inclusive seminar 13

Challenge the causal claim, not the speaker | Guide disagreement, test an inference, and make room for a reasoned response.

03 Giving precise feedback and correcting a grading error 22

The total is wrong; the criterion still needs discussion | Acknowledge a clerical error while explaining the difference between score correction and academic review.

04 Making office hours a focused learning conversation 31

More people is not a higher percentage | Diagnose a specific misunderstanding through a worked example and check the student can apply the distinction.

05 Calibrating a teaching team before grades are released 40

Fluent wording is not the missing reasoning | Resolve a scoring difference through shared criteria, anchor examples, and a consistent review plan.

06 Implementing an approved access arrangement 49

The letter says ninety minutes; the platform says sixty | Confirm practical accessibility arrangements without demanding unnecessary personal disclosure or making unsupported promises.

07 Discussing an academic-integrity concern fairly 58

A missing source needs a factual explanation | State a specific concern, explain the applicable course rule, and separate an inquiry from a finding.

08 Making a faculty curriculum decision traceable 67

A recommendation is not implementation approval | Clarify a proposal, test resource assumptions, and summarize the actual committee decision.

Communication field notes 3

Answers and explanations 85

Fast-access phrase pages 104

Vocabulary index 106

Sources and publication notes 114

Make the intellectual demand clear.

Students can meet a demanding standard more readily when a professor names the task, explains the evidence, and distinguishes support from a promise about grades. Faculty conversations also require precise language about authority, process, and academic judgment.

Challenge the claim

A seminar can welcome disagreement while requiring accurate representation of evidence. Distinguish criticism of an argument from a judgment about its speaker.

"Which part of the evidence supports that conclusion?"

Name the criterion

Specific feedback connects a feature of the submitted work to the published criterion and a manageable next step.

"The paragraph summarizes the article but does not yet compare its explanation with the second source."

Make support usable

A referral should identify the relevant service and next step without diagnosing a student, promising an exception, or disclosing private information.

"Let us identify the appropriate contact and what they need to arrange this."

Separate recommendation from decision

Faculty proposals, committee votes, approvals, and implementation can be different stages. State the actual institutional process.

"The committee recommended the change; final approval is still pending."

PROFESSIONAL BOUNDARIES

All people, organizations, cases, figures, and documents in the exercises are fictional. Professional English practice, not institutional policy, legal advice, disability assessment, academic-integrity adjudication, or a grading system for real students. All course rules and committee procedures supplied in cases are fictional local rules, not universal university requirements. Use your institution's current policies, privacy and accessibility processes, authorized support services, and emergency procedures. Keep real student records confidential.

Compare does not mean summarize twice

A Read the situation

Explain the required intellectual task, evidence, and submission details without expanding the assignment.

Professor Chen assigns a 600-word comparison of two supplied articles. Students must identify one shared question, explain one difference in the authors' reasoning, and support that comparison with a passage from each article. Outside sources are not required. A formative outline is due Friday; the graded submission is due the following Tuesday. Student Maya has planned two separate summaries.

PEOPLE / Maya: Student | Professor Chen: Course instructor

DO NOT MAKE THE HIDDEN TASK A TEST

Advanced students may understand the vocabulary but misread what a comparison requires. Clarifying the task maintains the academic standard.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What is the central task?

A Summarize each article without connecting them
B Conduct an original survey
C Add as many outside sources as possible
D Compare the reasoning in two supplied articles

2. Which submission is formative?

A Both articles
B An unsupplied oral examination
C The Friday outline
D The Tuesday graded submission

3. Which evidence is required?

A Five outside articles
B A new dataset collected by the student
C A supporting passage from each supplied article
D Only the student's opinion

Answers and explanations: page 85.

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

learning outcome

Stated capability students should demonstrate through learning.

IN USE align the learning outcome

assessment criterion

Standard used to judge a feature of student work.

IN USE explain the assessment criterion

assignment brief

Instructions defining a particular assessed or practice task.

IN USE clarify the assignment brief

formative assessment

Practice assessment used to support learning and improvement.

IN USE provide formative assessment

comparison

Analysis identifying meaningful similarities or differences.

IN USE develop a focused comparison

summative assessment

Assessment used to evaluate learning at a defined stage.

IN USE distinguish summative assessment

summary

Condensed account of the main content of a source.

IN USE distinguish summary from analysis

submission window

Period during which work can be submitted under stated rules.

IN USE confirm the submission window

analytical claim

Statement offering an interpretation supported by reasoning and evidence.

IN USE formulate an analytical claim

word limit

Stated maximum or target length under the task rules.

IN USE apply the word limit

textual evidence

Passage or feature of a text supporting an interpretation.

IN USE select textual evidence

required reading

Material students are expected to read for the course.

IN USE identify the required reading

Precision check

Two summaries do not necessarily compare reasoning. The supplied task requires a connection between the articles and evidence from both.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

optional resource

Material available but not required for the stated task.

IN USE label an optional resource

scaffolding

Structured support helping students build toward a task.

IN USE provide appropriate scaffolding

prerequisite knowledge

Prior understanding needed for the learning task.

IN USE check prerequisite knowledge

task alignment

Connection between the activity and intended learning.

IN USE check task alignment

submission format

Required form or file type for delivering work.

IN USE specify the submission format

clarification announcement

Shared message resolving an instruction question.

IN USE post a clarification announcement

clarification request

Question that resolves an unclear meaning or instruction.

IN USE make a targeted clarification request

source attribution

Identification of where information came from.

IN USE preserve source attribution

working assumption

Provisional premise used while information is incomplete.

IN USE challenge a working assumption

scope boundary

Limit of the work or authority being discussed.

IN USE state the scope boundary

action owner

Named person responsible for a specified next step.

IN USE confirm the action owner

check-back

Restatement used to verify that a message was understood.

IN USE complete a check-back

Precision check

Formative describes the learning purpose here, not a universal rule that every formative task carries no marks. Follow the actual assignment instructions.

Phrases you can actually use

C Notice the language / 1 of 2

NAME THE TASK

"The goal is to compare their reasoning, not summarize them separately."

LOCATE THE EVIDENCE

"Which passage supports the difference you have identified?"

CLARIFY THE REQUIREMENT

"Use one passage from each of the two supplied articles."

LIMIT THE SCOPE

"Outside sources are not required for this assignment."

SEPARATE STAGES

"Friday is the outline; Tuesday is the graded submission."

EXPLAIN THE STANDARD

"I will assess how well the evidence supports the comparison."

CHECK UNDERSTANDING

"Tell me which part connects the two authors."

SHARE THE CLARIFICATION

"I will post the same clarification for everyone in the course."

Compare versus describe

Compare requires a relationship between items; describe can address each item independently.

Required versus optional

Required is part of the task; optional offers an additional resource without silently adding a condition.

By Friday versus on Friday

By identifies a latest point; on identifies a day. Use the actual published time when needed.

Phrases you can actually use

C Notice the language / 2 of 2

CLARIFY THE QUESTION

"Are you asking about the finding or the next step?"

INVITE CORRECTION

"Please correct me if I have misunderstood that detail."

ATTRIBUTE INFORMATION

"That is what the current record says; it has not been independently confirmed."

SEPARATE POSSIBILITY

"That is a possibility, not an agreed outcome."

CHECK SCOPE

"That decision sits outside my authority."

PIN DOWN RESPONSIBILITY

"Who is responsible for that specific next step?"

REPAIR MISUNDERSTANDING

"Let me restate the distinction more clearly."

CLOSE AN EXCHANGE

"We agree on the action, the owner, and the point for review."

Reported versus verified

Reported attributes information to a source; verified indicates it has been checked. Do not use the words interchangeably.

Could versus will

Could introduces a possibility. Will commits to an action or predicts an outcome; check whether that certainty is justified.

By versus at

By gives a latest time; at identifies a scheduled moment. State the time zone when people work across locations.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which plan best matches the brief?

A A shared question, one reasoning difference, and evidence from both texts
B Two unrelated summaries with no comparison
C A new survey replacing both texts
D Five outside sources without using the supplied articles

2. Which clarification preserves scope?

A Outside sources are not required
B Add outside sources to receive any credit
C Replace the articles with a personal example
D Ignore the stated word limit

3. What should the instructor assess in the central comparison?

A Whether the student agrees with the professor
B Whether the paper uses the longest words
C Whether the student added an unsupplied survey
D How the cited passages support the stated reasoning difference

4. Which announcement prevents unequal access to clarification?

A Add a hidden new criterion after submission
B Change the deadline in a private conversation only
C Share the clarified requirement with the whole course
D Tell only the student who asked

Answers and explanations: page 85.

Compare does not mean summarize twice

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

textual evidence / analytical claim / formative assessment / word limit / scaffolding / clarification announcement / comparison / learning outcome / assignment brief / assessment criterion

01 **Maya:** I have planned three hundred words on each article. Is that enough to meet the requirement to compare them?

02 **Professor Chen:** Two summaries may not yet give us a [1] _____. What shared question do the authors address, and where does their reasoning differ?

03 **Maya:** Both ask why commuters change routes, but one emphasizes travel time while the other emphasizes reliable arrival.

04 **Professor Chen:** That gives you a focused [2] _____. Now show the passages that support that difference rather than adding a general opinion about transport.

05 **Maya:** I marked a paragraph on average journey time in the first article and one on variation in the second.

06 **Professor Chen:** Those may provide the [3] _____. Explain how each passage supports your comparison instead of placing two quotations side by side without analysis.

07 **Maya:** I was about to search for five more articles because the task sounded too short to count as university work.

08 **Professor Chen:** The [4] _____ asks you to work closely with the two supplied texts. Outside sources are not required here.

09 **Maya:** Then the challenge is the quality of the connection, not the number of sources I can add to the bibliography.

10 **Professor Chen:** Exactly. The relevant [5] _____ is how clearly your evidence supports the reasoning difference you identify.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 10.

11 **Maya:** I also see two dates. Is Friday the final deadline, or do we submit something different on Tuesday?

12 **Professor Chen:** Friday is the [6] _____ stage: an outline that lets us address the comparison before the graded submission on Tuesday.

13 **Maya:** I can use the outline feedback to check whether I have actually connected the articles rather than simply shortened each one.

14 **Professor Chen:** Yes. That is the purpose of the [7] _____, while the final work still needs to demonstrate your own understanding of the texts.

15 **Maya:** Does the six-hundred-word requirement mean I should give equal space to every paragraph of each article?

16 **Professor Chen:** No. The [8] _____ makes selection important. Keep the shared question, the difference, and the evidence central.

17 **Maya:** I will organize the outline around that contrast and use the two passages to explain why the distinction matters.

18 **Professor Chen:** That matches the [9] _____ for this assignment: making a supported comparison rather than recalling each article separately.

19 **Maya:** Other students may have read compare the same way I did. Could the course page include this clarification?

20 **Professor Chen:** I will post a [10] _____ so everyone has the same instructions, without adding a new requirement or changing the published submission details.

ANSWERS / EXPLANATIONS: PAGE 86

1. comparison | 2. analytical claim | 3. textual evidence | 4. assignment brief | 5. assessment criterion | 6. formative assessment | 7. scaffolding | 8. word limit | 9. learning outcome | 10. clarification announcement

Optional reading became a requirement

F Say it

A course page labels an additional article optional. The assignment requires only the two supplied core articles. A student assumes the extra article is necessary for credit.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

optional / core / clarification / criteria

Student: "The extra article is labeled [1] _____."

Professor: "The assignment requires the two [2] _____ articles."

Student: "I should focus on the stated assessment [3] _____."

Professor: "I will share that [4] _____ with the class."

ANSWERS / EXPLANATIONS: PAGE 86

1. optional | 2. core | 3. criteria | 4. clarification

Rehearse with a fixed script

1. Read the corrected exchange and stress compare, support, required, and formative.

2. Swap roles and repeat the three-part task and the two submission stages exactly as supplied.

3. Complete the four-line follow-up with the supplied choices. Check the explanations, then read the corrected exchange twice, changing roles.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

Challenge the causal claim, not the speaker

A Read the situation

Guide disagreement, test an inference, and make room for a reasoned response.

In a seminar, student Leo says a campus survey proves that using the library causes higher grades because frequent library users report higher grades. The survey records an association and supplies no causal design. Professor Okafor asks Leo to distinguish the observation from the inference and acknowledge prior preparation as a possible alternative explanation. No participant has established the actual cause.

PEOPLE / Leo: Seminar participant | Professor Okafor: Seminar leader

DISAGREEMENT IS NOT A PERSONAL VERDICT

A seminar can challenge an argument firmly while treating its speaker with respect. Invite revision of the claim rather than humiliating the student.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What does the supplied survey establish?

A An association in the reported data
B A proven causal effect of library use
C That prior preparation is the actual cause
D That grades cause every library visit

2. Which alternative explanation is raised?

A A randomized assignment process
B Prior preparation
C Confirmed cheating by every participant
D A measured library intervention

3. What should the professor challenge?

A The unsupported causal inference
B The student's right to speak
C The student's nationality
D Every observation in the survey as fabricated

Answers and explanations: page 87.

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

seminar

Academic session centered on discussion and analysis.

IN USE facilitate a seminar

discussion norm

Shared expectation governing participation.

IN USE establish discussion norms

turn-taking

Management of who speaks and when.

IN USE support equitable turn-taking

wait time

Pause allowing participants time to formulate a response.

IN USE allow wait time

probing question

Question that examines reasoning or assumptions.

IN USE ask a probing question

follow-up question

Question extending or clarifying a previous contribution.

IN USE pose a follow-up question

revoicing

Restating a contribution to check or clarify its meaning.

IN USE use revoicing

evidence-based disagreement

Challenge tied to evidence and reasoning.

IN USE model evidence-based disagreement

causal claim

Assertion that one factor produces an effect.

IN USE qualify a causal claim

association

Observed relationship that does not alone establish causation.

IN USE distinguish association from causation

alternative explanation

Different account that could explain an observation.

IN USE test an alternative explanation

confounding variable

Factor affecting interpretation of a relationship between variables.

IN USE identify a possible confounding variable

Precision check

The survey reports a relationship. It does not establish that library use causes higher grades, nor that the proposed alternative explanation is the true cause.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

inference

Conclusion drawn from evidence or premises.

IN USE examine the inference

counterexample

Example challenging a general statement.

IN USE introduce a counterexample

scope condition

Circumstance limiting the application of an argument.

IN USE state the scope condition

qualified conclusion

Conclusion that retains relevant limits or uncertainty.

IN USE offer a qualified conclusion

discussion synthesis

Summary linking contributions and unresolved questions.

IN USE provide a discussion synthesis

participation balance

Distribution of opportunities to contribute.

IN USE monitor participation balance

clarification request

Question that resolves an unclear meaning or instruction.

IN USE make a targeted clarification request

source attribution

Identification of where information came from.

IN USE preserve source attribution

working assumption

Provisional premise used while information is incomplete.

IN USE challenge a working assumption

scope boundary

Limit of the work or authority being discussed.

IN USE state the scope boundary

action owner

Named person responsible for a specified next step.

IN USE confirm the action owner

check-back

Restatement used to verify that a message was understood.

IN USE complete a check-back

Precision check

Respectful disagreement can be intellectually demanding. A revised, qualified conclusion is not the same as abandoning every useful observation.

Phrases you can actually use

C Notice the language / 1 of 2

CHALLENGE THE INFERENCE

"What lets us move from association to causation here?"

INVITE A REVISION

"Can you restate that conclusion with the evidence limit included?"

OFFER AN ALTERNATIVE

"Could prior preparation affect both study habits and grades?"

PROTECT THE SPEAKER

"We are examining the claim, not judging the person making it."

CHECK MEANING

"Are you saying the survey shows a relationship or establishes a cause?"

MAKE SPACE

"Let us give others a moment before taking the next response."

RETURN TO EVIDENCE

"Which part of the data supports that stronger wording?"

SYNTHESIZE

"We agree on the association; the causal explanation remains open."

Shows versus proves

Shows can describe a finding; proves makes a stronger claim that needs appropriate support.

May explain versus explains

May explain offers a possibility; explains presents the account more definitively.

I disagree with the inference

This phrase directs disagreement toward the reasoning rather than the speaker's character.

Phrases you can actually use

C Notice the language / 2 of 2

CLARIFY THE QUESTION

"Are you asking about the finding or the next step?"

INVITE CORRECTION

"Please correct me if I have misunderstood that detail."

ATTRIBUTE INFORMATION

"That is what the current record says; it has not been independently confirmed."

SEPARATE POSSIBILITY

"That is a possibility, not an agreed outcome."

CHECK SCOPE

"That decision sits outside my authority."

PIN DOWN RESPONSIBILITY

"Who is responsible for that specific next step?"

REPAIR MISUNDERSTANDING

"Let me restate the distinction more clearly."

CLOSE AN EXCHANGE

"We agree on the action, the owner, and the point for review."

Reported versus verified

Reported attributes information to a source; verified indicates it has been checked. Do not use the words interchangeably.

Could versus will

Could introduces a possibility. Will commits to an action or predicts an outcome; check whether that certainty is justified.

By versus at

By gives a latest time; at identifies a scheduled moment. State the time zone when people work across locations.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which revision fits the evidence?

A Library use has been proven to cause higher grades
B Prior preparation is definitely the only cause
C The association must be meaningless
D Frequent library use is associated with higher reported grades

2. Which question invites rigorous discussion?

A Can we ignore the data because we disagree?
B Should only the loudest speaker answer?
C What other factor might account for both observations?
D Why are you bad at reasoning?

3. Which statement about prior preparation is supported?

A It disproves every survey response
B It makes further analysis unnecessary
C It is a possible alternative explanation
D It has been measured as the sole cause

4. What should the closing synthesis preserve?

A A unanimous causal finding that never occurred
B The professor's preference as proof
C A personal ranking of speakers
D The association and unresolved causal question

Answers and explanations: page 87.

Challenge the causal claim, not the speaker

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

confounding variable / association / alternative explanation / qualified conclusion / discussion norm / revoicing / discussion synthesis / probing question / inference / causal claim

01 **Leo:** The survey proves that studying in the library improves grades. Frequent users reported higher grades than students who rarely go there.

02 **Professor Okafor:** Let us examine that [1] _____. Does the survey establish a cause, or does it report a relationship?

03 **Leo:** It reports the relationship. I used proves because the difference seemed strong, but I do not know how students were selected.

04 **Professor Okafor:** Then start with [2] _____. A strong relationship can be worth discussing without settling the causal explanation.

05 **Leo:** Students who were already well prepared might be more likely to use the library and also receive higher grades.

06 **Professor Okafor:** That is an [3] _____ to examine. We should not announce it as the answer merely because it is plausible.

07 **Leo:** So prior preparation might affect our interpretation of the relationship, but we would need relevant evidence to assess it.

08 **Professor Okafor:** Yes. It could be a [4] _____. Naming a possibility helps define the question rather than resolving it automatically.

09 **Leo:** I can revise my sentence to say that frequent library use is associated with higher reported grades in this survey.

10 **Professor Okafor:** That is a [5] _____. It keeps the finding while avoiding a causal promise the study design has not supplied.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 19.

11 **Leo:** I worried that changing my wording would make it sound as though my entire contribution was wrong and should be withdrawn.

12 **Professor Okafor:** Revising an [6] _____ is part of rigorous discussion. We are examining the reasoning, not making a judgment about you.

13 **Leo:** Another student suggested that grades might influence where people choose to study. That is another direction we could investigate.

14 **Professor Okafor:** Good. Let us use that as a [7] _____ about direction, rather than treating the first plausible story as settled.

15 **Leo:** Could you restate the distinction once more before we invite the next response? I want to be sure I have it.

16 **Professor Okafor:** The [8] _____ is this: the reported grades differ with library use, but the cause of that difference remains unestablished here.

17 **Leo:** That gives others something specific to challenge. They can question the interpretation without dismissing the people who completed the survey.

18 **Professor Okafor:** Exactly. Our [9] _____ is to challenge claims with reasons and make room for a response.

19 **Leo:** I will keep the association in my summary and mark the causal explanation as an open question.

20 **Professor Okafor:** I will include that in the [10] _____, then invite another contribution after a short pause so more participants have time to formulate it.

ANSWERS / EXPLANATIONS: PAGE 88

1. causal claim | 2. association | 3. alternative explanation | 4. confounding variable | 5. qualified conclusion | 6. inference | 7. probing question | 8. revoicing | 9. discussion norm | 10. discussion synthesis

An alternative became the new certainty

F Say it

After the seminar, a note says prior preparation definitely caused the grade difference. The discussion identified it only as a possible alternative.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

explanation / association / cause / qualified

Student: "Prior preparation was a possible [1] _____."

Professor: "It was not established as the [2] _____."

Student: "The original survey reported an [3] _____."

Professor: "Keep the conclusion appropriately [4] _____."

ANSWERS / EXPLANATIONS: PAGE 88

1. explanation | 2. cause | 3. association | 4. qualified

Rehearse with a fixed script

1. Read the corrected seminar exchange and stress association, possible, and remains open.

2. Swap roles and state the revised conclusion without selecting an unsupplied causal explanation.

3. Complete the four-line follow-up with the supplied choices. Check the explanations, then read the corrected exchange twice, changing roles.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

The total is wrong; the criterion still needs discussion

A Read the situation

Acknowledge a clerical error while explaining the difference between score correction and academic review.

Student Sam receives criterion scores of 6, 7, and 8, but the recorded total is 19 rather than 21. Professor Rivera confirms the arithmetic error. Sam also requests 24 because of the time spent on the paper. The feedback says the second paragraph cites evidence without explaining how it supports the conclusion. A substantive grade change has not been decided.

PEOPLE / Sam: Student | Professor Rivera: Instructor

OWN THE ERROR WITHOUT BARGAINING AWAY THE STANDARD

A professor can apologize and correct a verifiable mistake while discussing the academic criterion separately. Effort deserves recognition without being substituted for the stated assessment standard.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What is the correct total of the supplied criterion scores?

A 18
B 21
C 19
D 24

2. What remains undecided?

A The requested substantive increase to 24
B Whether 6 plus 7 plus 8 equals 21
C Whether a paper was submitted
D Whether the student spent time on the paper

3. What does the feedback identify?

A Evidence is cited without explaining its link to the conclusion
B No evidence appears anywhere
C The student's effort is irrelevant to learning
D The paper was never read

Answers and explanations: page 89.

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

rubric

Framework describing criteria and performance levels for assessment.

IN USE apply the published rubric

criterion score

Score assigned to one assessment dimension.

IN USE check the criterion score

recorded total

Total entered in the grade record.

IN USE correct the recorded total

clerical error

Administrative or transcription mistake distinct from academic judgment.

IN USE acknowledge a clerical error

arithmetic correction

Change fixing an incorrect numerical calculation.

IN USE make an arithmetic correction

substantive review

Reassessment of the underlying academic judgment.

IN USE request a substantive review

grade appeal

Formal challenge through the institution's stated process.

IN USE explain the grade-appeal process

feedback conference

Meeting discussing assessed work and improvement.

IN USE hold a feedback conference

evidence link

Explanation connecting evidence to a claim or conclusion.

IN USE strengthen the evidence link

performance descriptor

Description of work meeting a rubric level.

IN USE apply the performance descriptor

feedforward

Guidance directed toward the next attempt or future work.

IN USE provide specific feedforward

revision priority

Improvement selected for attention before other changes.

IN USE identify a revision priority

Precision check

Correcting 19 to 21 fixes the supplied arithmetic. It does not decide whether any criterion score should change or promise the requested 24.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

margin comment

Feedback placed beside a particular passage.

IN USE clarify a margin comment

holistic judgment

Overall evaluation rather than separate dimension scoring.

IN USE distinguish holistic judgment

gradebook

System recording student assessment results.

IN USE update the gradebook

review procedure

Stated process for examining an assessment concern.

IN USE follow the review procedure

evidence of learning

Work demonstrating the intended knowledge or skill.

IN USE identify evidence of learning

professional apology

Clear acknowledgment of an error and responsibility.

IN USE offer a professional apology

clarification request

Question that resolves an unclear meaning or instruction.

IN USE make a targeted clarification request

source attribution

Identification of where information came from.

IN USE preserve source attribution

working assumption

Provisional premise used while information is incomplete.

IN USE challenge a working assumption

scope boundary

Limit of the work or authority being discussed.

IN USE state the scope boundary

action owner

Named person responsible for a specified next step.

IN USE confirm the action owner

check-back

Restatement used to verify that a message was understood.

IN USE complete a check-back

Precision check

Explain the actual review process without discouraging a legitimate concern or inventing a universal rule about whether a review can change grades.

Phrases you can actually use

C Notice the language / 1 of 2

ACKNOWLEDGE THE ERROR

"You are right; those scores total twenty-one, not nineteen."

TAKE RESPONSIBILITY

"I am sorry for the recording error, and I will correct it."

SEPARATE QUESTIONS

"The arithmetic correction and your request for a higher criterion score are separate."

POINT TO THE WORK

"This passage gives the evidence but does not yet explain the connection."

RECOGNIZE EFFORT

"I can see the work you put in; the score still needs to follow the stated criteria."

MAKE FEEDBACK USABLE

"Add the missing reasoning link before polishing the wording."

EXPLAIN PROCESS

"Let us use the published review procedure for the substantive concern."

AVOID A PROMISE

"Reviewing the concern does not predetermine the outcome."

Correct versus reconsider

Correct fixes an established error; reconsider reviews a judgment that may or may not change.

Effort versus evidence

Effort concerns work invested; evidence of learning concerns what the submitted work demonstrates under the criteria.

Will correct versus may revise

Will correct commits to fixing the established mistake; may revise leaves an unresolved judgment open.

Phrases you can actually use

C Notice the language / 2 of 2

CLARIFY THE QUESTION

"Are you asking about the finding or the next step?"

INVITE CORRECTION

"Please correct me if I have misunderstood that detail."

ATTRIBUTE INFORMATION

"That is what the current record says; it has not been independently confirmed."

SEPARATE POSSIBILITY

"That is a possibility, not an agreed outcome."

CHECK SCOPE

"That decision sits outside my authority."

PIN DOWN RESPONSIBILITY

"Who is responsible for that specific next step?"

REPAIR MISUNDERSTANDING

"Let me restate the distinction more clearly."

CLOSE AN EXCHANGE

"We agree on the action, the owner, and the point for review."

Reported versus verified

Reported attributes information to a source; verified indicates it has been checked. Do not use the words interchangeably.

Could versus will

Could introduces a possibility. Will commits to an action or predicts an outcome; check whether that certainty is justified.

By versus at

By gives a latest time; at identifies a scheduled moment. State the time zone when people work across locations.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which response takes appropriate responsibility?

A I will award 24 to avoid discussing the issue
B Your effort automatically changes every criterion score
C You are right about the total; I will correct it to 21
D The system must be right because I entered it

2. Which feedback is most actionable?

A Explain how the quoted evidence supports the paragraph conclusion
B Be more academic in every way
C Try harder next time
D Make the paper sound impressive

3. Which statement separates the issues?

A Effort alone resolves the evidence criterion
B The total correction does not decide the substantive review
C Correcting the total proves every criterion score is wrong
D A review guarantees the requested mark

4. What should the instructor avoid?

A Explaining the relevant criterion
B Correcting the gradebook total
C Recognizing the student's effort
D Discouraging the student from using the stated review process

Answers and explanations: page 89.

The total is wrong; the criterion still needs discussion

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

substantive review / performance descriptor / gradebook / evidence link / review procedure / revision priority / feedforward / recorded total / margin comment / arithmetic correction

01 **Sam:** My three scores are six, seven, and eight, but the gradebook total is nineteen. I think something has gone wrong.

02 **Professor Rivera:** You are right. The [1] _____ should be twenty-one. I am sorry for that error and will correct the entry.

03 **Sam:** Thank you. I also spent several evenings on the paper, so I hoped the mark could be raised to twenty-four.

04 **Professor Rivera:** Let us separate the [2] _____ from your concern about the academic assessment. They need different explanations.

05 **Sam:** The comment on paragraph two says the evidence is not connected to the conclusion, but I included a quotation there.

06 **Professor Rivera:** The quotation is present. The [3] _____ is the missing step: the paragraph does not explain how that passage supports the conclusion you draw.

07 **Sam:** So the issue is not that I failed to cite anything, but that I left the reader to supply the reasoning.

08 **Professor Rivera:** Exactly. The [4] _____ asks for an explained relationship, not simply the presence of a source.

09 **Sam:** I read the short comment as a judgment that the whole paper was poor, which made it difficult to know where to start.

10 **Professor Rivera:** I should make that [5] _____ more precise. The concern is this reasoning step, not a dismissal of every part of your work.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 28.

11 **Sam:** For the next assignment, would improving that connection be more useful than replacing ordinary words with longer academic expressions?

12 **Professor Rivera:** Yes. Make the missing explanation your [6] _____. Clear reasoning matters more here than making the wording sound complicated.

13 **Sam:** I still want to understand whether the criterion score itself was applied consistently with the published rubric.

14 **Professor Rivera:** That is a request for [7] _____. We can follow the stated process without assuming the outcome in advance.

15 **Sam:** I appreciate the distinction. I was worried that pointing out the error would be treated as bargaining for points.

16 **Professor Rivera:** Raising a specific concern is legitimate. The [8] _____ gives us a way to examine it against the work and criteria.

17 **Sam:** Then the immediate action is to fix the total, while the separate review addresses the criterion question.

18 **Professor Rivera:** Correct. I will update the [9] _____ to reflect the arithmetic and keep the substantive request clearly identified.

19 **Sam:** For future work, I will explain how each selected passage supports the conclusion rather than leave that relationship implied.

20 **Professor Rivera:** That is useful [10] _____. It gives you a specific next step, while the current review proceeds through the proper process.

ANSWERS / EXPLANATIONS: PAGE 90

1. recorded total | 2. arithmetic correction | 3. evidence link | 4. performance descriptor | 5. margin comment | 6. revision priority | 7. substantive review | 8. review procedure | 9. gradebook | 10. feedforward

A recording correction became a grade promise

F Say it

An instructor confirms a missing two-point entry. A student interprets that correction as approval of a separate request for five additional points. The latter request remains unresolved.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

promised / criteria / review / correction

Instructor: "The missing two-point entry is a confirmed [1] _____."

Student: "The additional five points remain under [2] _____."

Instructor: "We will use the published assessment [3] _____."

Student: "The outcome has not been [4] _____."

ANSWERS / EXPLANATIONS: PAGE 90

1. correction | 2. review | 3. criteria | 4. promised

Rehearse with a fixed script

1. Read the corrected exchange and distinguish the confirmed total from the unresolved criterion review.

2. Switch roles and repeat the concrete feedback about the evidence link without adding a promised grade.

3. Complete the four-line follow-up with the supplied choices. Check the explanations, then read the corrected exchange twice, changing roles.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

More people is not a higher percentage

A Read the situation

Diagnose a specific misunderstanding through a worked example and check the student can apply the distinction.

During a fifteen-minute office-hour meeting, student Noor asks why a chart cannot show that Group B had the higher participation rate merely because more people participated. Group A has 40 participants out of 100 eligible people; Group B has 60 out of 200. Professor Evans uses the supplied figures to distinguish counts from rates. The meeting does not determine a grade or change an assessment deadline.

PEOPLE / Noor: Student | Professor Evans: Instructor

SUPPORT DOES NOT REQUIRE DOING THE TASK FOR THE STUDENT

A focused meeting can model one distinction and check understanding without rewriting the student's assignment or promising a mark.

Briefing checks

Circle one answer in each item. Use the briefing.

1. Which group has the larger participant count?

A Both have 100 participants
B The count cannot be identified
C Group B, with 60
D Group A, with 40

2. Which group has the higher participation rate?

A B, at 60 percent
B B, at 30 percent
C Both, at 40 percent
D A, at 40 percent

3. What is the meeting intended to resolve?

A The difference between a count and a rate
B A guaranteed higher grade
C A deadline extension already approved
D A complete rewrite of the student's assignment

Answers and explanations: page 91.

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

office hours

Scheduled time for students to consult an instructor.

IN USE hold accessible office hours

meeting agenda

Agreed focus for a discussion.

IN USE set a focused meeting agenda

diagnostic question

Question identifying the source of a misunderstanding.

IN USE ask a diagnostic question

worked example

Example showing the reasoning or steps of a solution.

IN USE explain a worked example

think-aloud

Spoken demonstration of the reasoning process.

IN USE model a think-aloud

conceptual misunderstanding

Incorrect understanding of an underlying idea.

IN USE identify a conceptual misunderstanding

procedural slip

Mistake in carrying out a process despite understanding the concept.

IN USE distinguish a procedural slip

numerator

Quantity above the fraction line, representing the counted part here.

IN USE identify the numerator

denominator

Quantity below the fraction line, representing the eligible group here.

IN USE check the denominator

absolute count

Number of observed items or people without normalization.

IN USE report the absolute count

participation rate

Proportion of the eligible group that participated.

IN USE calculate the participation rate

normalization

Expressing values relative to a common basis for comparison.

IN USE explain normalization

Precision check

Group B has more participants, but Group A has the higher participation rate. The denominator changes the comparison.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

concept check

Short task checking understanding of an idea.

IN USE use a concept check

transfer of learning

Application of understanding to a different example.

IN USE check transfer of learning

retrieval practice

Recalling knowledge rather than only rereading it.

IN USE use retrieval practice

metacognition

Awareness and monitoring of one's own learning or reasoning.

IN USE support metacognition

learning bottleneck

Specific difficulty preventing further progress.

IN USE identify a learning bottleneck

follow-up appointment

Subsequent meeting for continued support.

IN USE arrange a follow-up appointment

clarification request

Question that resolves an unclear meaning or instruction.

IN USE make a targeted clarification request

source attribution

Identification of where information came from.

IN USE preserve source attribution

working assumption

Provisional premise used while information is incomplete.

IN USE challenge a working assumption

scope boundary

Limit of the work or authority being discussed.

IN USE state the scope boundary

action owner

Named person responsible for a specified next step.

IN USE confirm the action owner

check-back

Restatement used to verify that a message was understood.

IN USE complete a check-back

Precision check

The supplied numerical example supports a language and reasoning conversation. It does not authorize changing an actual student grade or deadline.

Phrases you can actually use

C Notice the language / 1 of 2

FOCUS THE MEETING

"Which step stopped making sense to you?"

DISTINGUISH THE QUANTITIES

"Are you comparing the number of participants or the share of eligible people?"

IDENTIFY THE DENOMINATOR

"How many people could have participated in each group?"

MODEL THE REASONING

"Forty out of one hundred is forty percent."

INVITE A CHECK

"Explain why sixty participants can still represent a lower rate."

KEEP THE TASK BOUNDED

"Let us resolve this distinction before adding another topic."

CHECK TRANSFER

"Apply the same distinction to the second supplied group."

CLOSE WITH A NEXT STEP

"Use counts for headcount and rates for the stated proportional comparison."

More versus a larger share

More can compare counts; a larger share compares proportions relative to the relevant whole.

Out of versus compared with

Out of identifies a denominator; compared with identifies another quantity or group.

Cannot conclude versus is false

Cannot conclude identifies an evidence limit; it does not always establish that the proposition itself is false.

Phrases you can actually use

C Notice the language / 2 of 2

CLARIFY THE QUESTION

"Are you asking about the finding or the next step?"

INVITE CORRECTION

"Please correct me if I have misunderstood that detail."

ATTRIBUTE INFORMATION

"That is what the current record says; it has not been independently confirmed."

SEPARATE POSSIBILITY

"That is a possibility, not an agreed outcome."

CHECK SCOPE

"That decision sits outside my authority."

PIN DOWN RESPONSIBILITY

"Who is responsible for that specific next step?"

REPAIR MISUNDERSTANDING

"Let me restate the distinction more clearly."

CLOSE AN EXCHANGE

"We agree on the action, the owner, and the point for review."

Reported versus verified

Reported attributes information to a source; verified indicates it has been checked. Do not use the words interchangeably.

Could versus will

Could introduces a possibility. Will commits to an action or predicts an outcome; check whether that certainty is justified.

By versus at

By gives a latest time; at identifies a scheduled moment. State the time zone when people work across locations.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which explanation correctly compares the groups?

A A has sixty participants out of two hundred
B The denominators can be ignored
C B has more participants, but A has the higher rate
D B has both the larger count and rate

2. Which question diagnoses the misunderstanding?

A Would a longer answer sound more academic?
B What is the eligible population for each count?
C Why did you not work harder?
D Can you memorize the larger number?

3. Which sentence checks understanding rather than supplying a grade?

A The deadline is automatically extended
B Explain why the larger count can have the lower rate
C This explanation guarantees full marks
D I will rewrite the entire assignment for you

4. What should the final meeting summary contain?

A A promise that every chart uses the same denominator
B An invented grade change
C A conclusion that Group B has fewer participants
D The count-rate distinction and the next practice step

Answers and explanations: page 91.

More people is not a higher percentage

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

meeting agenda / worked example / concept check / conceptual misunderstanding / absolute count / learning bottleneck / normalization / denominator / numerator / retrieval practice

01 **Noor:** I thought Group B performed better because sixty people participated, compared with forty in Group A. The feedback says to check the rate.

02 **Professor Evans:** Let us set a short [1] _____: first distinguish the quantities, then use the two groups to check the idea.

03 **Noor:** I compared the number of people and did not look at how many people were eligible in each group.

04 **Professor Evans:** That identifies the [2] _____. You are using an absolute count to answer a question about a proportion.

05 **Noor:** Group A had one hundred eligible people, while Group B had two hundred, so the groups were not the same size.

06 **Professor Evans:** Exactly. The [3] _____ tells us the whole against which the participant count is being compared.

07 **Noor:** Then forty is the part for Group A, and sixty is the part for Group B.

08 **Professor Evans:** Those are the [4] _____ values. For A, forty out of one hundred gives forty percent.

09 **Noor:** For B, sixty out of two hundred gives thirty percent, even though sixty is the larger number of participants.

10 **Professor Evans:** Good. That is the [5] _____: B has the larger count, while A has the higher participation rate.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 37.

11 **Noor:** I can see why putting both raw counts on a chart does not by itself answer which group had the higher proportion.

12 **Professor Evans:** That is the purpose of [6] _____ here. We compare each count with its own eligible population rather than treating the groups as equal in size.

13 **Noor:** Would it be accurate to say B had more participants but a lower share of its eligible population?

14 **Professor Evans:** Yes. That sentence separates the [7] _____ from the proportional measure and keeps both facts intact.

15 **Noor:** I initially thought the feedback meant sixty was the wrong number, but the number was right and my interpretation was wrong.

16 **Professor Evans:** That is a [8] _____ rather than a transcription error. Understanding the distinction will help with other unequal-size groups.

17 **Noor:** Can we check it once more without looking at the completed percentages, using the same supplied figures?

18 **Professor Evans:** Certainly. That [9] _____ will show whether you can reconstruct the reasoning instead of recognizing an answer that is already written.

19 **Noor:** A is forty percent and B is thirty percent. I will identify the eligible population whenever I report a participation rate.

20 **Professor Evans:** That completes the [10] _____. Use the distinction in your next practice, and bring any remaining specific question to a follow-up meeting.

ANSWERS / EXPLANATIONS: PAGE 92

1. meeting agenda | 2. learning bottleneck | 3. denominator | 4. numerator | 5. worked example | 6. normalization | 7. absolute count | 8. conceptual misunderstanding | 9. retrieval practice | 10. concept check

Equal counts, different rates

F Say it

Group C has 20 participants out of 50 eligible people. Group D has 20 out of 100. Their counts are equal; their rates are 40 percent and 20 percent.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

rate / proportions / count / denominators

Student: "Both groups have the same participant [1] _____."

Professor: "Their eligible populations form different [2] _____."

Student: "Group C has the higher participation [3] _____."

Professor: "Equal counts do not guarantee equal [4] _____."

ANSWERS / EXPLANATIONS: PAGE 92

1. count | 2. denominators | 3. rate | 4. proportions

Rehearse with a fixed script

1. Read the corrected exchange and say all four supplied numbers and both percentages clearly.

2. Switch roles and explain the contrast using more participants but a lower share.

3. Complete the four-line follow-up with the supplied choices. Check the explanations, then read the corrected exchange twice, changing roles.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

Fluent wording is not the missing reasoning

A Read the situation

Resolve a scoring difference through shared criteria, anchor examples, and a consistent review plan.

Professor Malik and teaching assistant Elena use a fictional three-level evidence scale: 0 for no relevant evidence, 1 for relevant evidence without an explained link, and 2 for relevant evidence with an explained link. An anchor response contains a relevant quotation but no explanation of its connection. Elena gave 2 because the prose was fluent; Malik applied 1. Grades have not been released.

PEOPLE / Elena: Teaching assistant | Professor Malik: Course coordinator

CALIBRATE THE JUDGMENT, NOT THE PERSON

A grading discussion should examine the criterion and submitted work, not rank graders by status. Agree how the same principle will be applied across the batch.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What score matches the supplied evidence scale for the anchor response?

A 2

B A score cannot be assigned from the supplied facts

C 1

D 0

2. Why did Elena assign 2?

A The student requested an extension

B The grades had already been released

C The prose was fluent

D The response contained no evidence

3. What is the release status?

A A formal appeal has concluded

B Grades have not been released

C Every student has received a final result

D The review is prohibited by policy

Answers and explanations: page 93.

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

teaching assistant

Staff member or student supporting teaching under the relevant role.

IN USE brief the teaching assistant

grading calibration

Process of aligning application of assessment standards.

IN USE conduct grading calibration

anchor response

Selected example used to illustrate a scoring standard.

IN USE discuss an anchor response

scoring guide

Instructions explaining how to assign marks.

IN USE apply the scoring guide

inter-rater agreement

Degree of consistency between assessors.

IN USE improve inter-rater agreement

double marking

Assessment of work by two markers under the stated process.

IN USE use double marking

moderation

Review supporting consistency and appropriateness of assessment.

IN USE conduct assessment moderation

borderline response

Work near the boundary between performance levels.

IN USE discuss a borderline response

criterion contamination

Influence of an unrelated feature on a criterion judgment.

IN USE avoid criterion contamination

batch review

Examination of a group of submissions under a defined process.

IN USE organize a batch review

release hold

Temporary pause before results are made available.

IN USE maintain the release hold

scoring rationale

Explanation linking a score to the work and standard.

IN USE document the scoring rationale

Precision check

The fictional evidence scale assesses the explained link, not general fluency. The anchor response earns 1 under the supplied rule because the link is absent.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

marking consistency

Application of the same relevant standard across work.

IN USE check marking consistency

anonymized sample

Example with identifying details removed under the actual process.

IN USE use an anonymized sample

adjudication

Resolution of a disputed judgment through the stated authority or process.

IN USE route for adjudication

teaching-team briefing

Meeting or message aligning course staff on responsibilities.

IN USE hold a teaching-team briefing

assessment dimension

Particular aspect of performance being evaluated.

IN USE separate assessment dimensions

release approval

Authorization to make results available.

IN USE obtain release approval

clarification request

Question that resolves an unclear meaning or instruction.

IN USE make a targeted clarification request

source attribution

Identification of where information came from.

IN USE preserve source attribution

working assumption

Provisional premise used while information is incomplete.

IN USE challenge a working assumption

scope boundary

Limit of the work or authority being discussed.

IN USE state the scope boundary

action owner

Named person responsible for a specified next step.

IN USE confirm the action owner

check-back

Restatement used to verify that a message was understood.

IN USE complete a check-back

Precision check

Calibration should apply the agreed standard consistently. Do not invent a universal moderation policy or quietly change a published criterion after seeing results.

Phrases you can actually use

C Notice the language / 1 of 2

RETURN TO THE SCALE

"Which descriptor matches what the response actually demonstrates?"

SEPARATE DIMENSIONS

"Fluency and evidence use are different dimensions here."

EXPLAIN THE SCORE

"The quotation is relevant, but the link is not explained."

INVITE COMPARISON

"Let us score the same anchor before reviewing the next sample."

NAME THE INCONSISTENCY

"We have applied different standards to the same feature."

PLAN THE REVIEW

"We need to check whether the same issue affects other submissions."

PROTECT PRIVACY

"Use the approved anonymized samples for the briefing."

CONFIRM RELEASE

"Results remain on hold until the agreed review and approval are complete."

Consistent versus identical

Consistent applies the same standard; it does not require different work to receive identical scores.

Relevant versus explained

Evidence may be relevant while its connection to the conclusion remains unexplained.

Calibrate versus curve

Calibration aligns judgments with standards; changing a grade distribution is a different action.

Phrases you can actually use

C Notice the language / 2 of 2

CLARIFY THE QUESTION

"Are you asking about the finding or the next step?"

INVITE CORRECTION

"Please correct me if I have misunderstood that detail."

ATTRIBUTE INFORMATION

"That is what the current record says; it has not been independently confirmed."

SEPARATE POSSIBILITY

"That is a possibility, not an agreed outcome."

CHECK SCOPE

"That decision sits outside my authority."

PIN DOWN RESPONSIBILITY

"Who is responsible for that specific next step?"

REPAIR MISUNDERSTANDING

"Let me restate the distinction more clearly."

CLOSE AN EXCHANGE

"We agree on the action, the owner, and the point for review."

Reported versus verified

Reported attributes information to a source; verified indicates it has been checked. Do not use the words interchangeably.

Could versus will

Could introduces a possibility. Will commits to an action or predicts an outcome; check whether that certainty is justified.

By versus at

By gives a latest time; at identifies a scheduled moment. State the time zone when people work across locations.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which scoring rationale follows the stated scale?

A Relevant quotation present, explanatory link absent: 1
B Fluent prose always earns 2 for evidence
C Any quotation automatically earns 2
D Missing explanation means no evidence exists: 0

2. What is the main inconsistency?

A Both graders ignored every criterion
B The anchor had no quotation
C The grades were already public
D Fluency influenced the evidence score

3. What should the team check next?

A Only the student's name
B How to conceal the discrepancy
C Whether to guarantee everyone a higher mark
D Whether the same interpretation affected other work

4. Which statement preserves authority and status?

A Calibration automatically changes every mark
B A discussion alone is final release approval
C Release awaits the agreed review and approval
D The teaching assistant may invent a new scale

Answers and explanations: page 93.

Fluent wording is not the missing reasoning

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

scoring rationale / anchor response / scoring guide / release hold / batch review / borderline response / inter-rater agreement / grading calibration / release approval / criterion contamination

01 **Elena:** I gave this response two points because it reads fluently and includes a relevant quotation. Your score is one.

02 **Professor Malik:** Let us return to the [1] _____. What distinguishes level one from level two on this evidence scale?

03 **Elena:** Level two requires the response to explain how the evidence supports the conclusion. This response leaves that connection unstated.

04 **Professor Malik:** Then our [2] _____ demonstrates level one, even though the prose is fluent.

05 **Elena:** I allowed the polished wording to influence my judgment about whether the reasoning was complete.

06 **Professor Malik:** That is [3] _____. We need to keep the evidence dimension separate from any criterion assessing expression.

07 **Elena:** I can explain the one-point score as relevant quotation present, but the explanatory link is absent.

08 **Professor Malik:** That gives a clear [4] _____ that another grader can inspect and discuss.

09 **Elena:** Should we compare a second example where the link is partly implied? That seems more difficult than this clear case.

10 **Professor Malik:** Yes. A [5] _____ can expose where we interpret the descriptor differently, without rewriting the published standard.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 46.

11 **Elena:** We can score it independently first and then compare the passages each of us relied on.

12 **Professor Malik:** That supports [6] _____. The purpose is consistent judgment, not simply having the junior colleague copy a senior score.

13 **Elena:** I may have applied the same fluency shortcut to other papers in my batch, so correcting this one example is not enough.

14 **Professor Malik:** Then define a [7] _____ under our assessment process and identify the work that needs checking.

15 **Elena:** The grades are still unreleased. I can keep the results from being published while we complete the agreed check.

16 **Professor Malik:** Maintain the [8] _____ and make the reason clear to the teaching team, without exposing student work unnecessarily.

17 **Elena:** For the briefing, I will use the approved anonymized examples and show the criterion alongside the relevant passages.

18 **Professor Malik:** Good. That should improve [9] _____ by making our interpretation and evidence visible.

19 **Elena:** Once the review is complete, I will report what was checked and any changes made through the approved process.

20 **Professor Malik:** Then we can seek [10] _____. A calibration conversation is a useful step, but it is not the same as completing and authorizing the release.

ANSWERS / EXPLANATIONS: PAGE 94

1. scoring guide | 2. anchor response | 3. criterion contamination | 4. scoring rationale | 5. borderline response | 6. grading calibration | 7. batch review | 8. release hold | 9. inter-rater agreement | 10. release approval

The quotation is relevant but unexplained

F Say it

Under the same supplied scale, a second response includes relevant evidence but does not explain its link. The team has agreed to apply the criterion consistently.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

relevant / standard / one / absent

Assistant: "The evidence is [1] _____."

Professor: "The explanatory link is [2] _____."

Assistant: "That matches level [3] _____."

Professor: "Apply the same [4] _____ across the reviewed work."

ANSWERS / EXPLANATIONS: PAGE 94

1. relevant | 2. absent | 3. one | 4. standard

Rehearse with a fixed script

1. Read the corrected exchange and apply the supplied 0-1-2 scale to the anchor response.

2. Switch roles and repeat the review and release sequence without inventing a new grading rule.

3. Complete the four-line follow-up with the supplied choices. Check the explanations, then read the corrected exchange twice, changing roles.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

The letter says ninety minutes; the platform says sixty

A Read the situation

Confirm practical accessibility arrangements without demanding unnecessary personal disclosure or making unsupported promises.

Student Tessa has an approved arrangement specifying 90 minutes for a quiz whose standard duration is 60 minutes. Professor Ali sees that the learning platform still shows the standard setting. A suitable testing-room booking has not been confirmed. They need prompt coordination with the designated access office and testing staff. Tessa is not being asked to disclose a diagnosis to classmates or justify the approved arrangement again.

PEOPLE / Tessa: Student | Professor Ali: Instructor

DISCUSS ACCESS WITHOUT MAKING THE STUDENT DEFEND IT

Focus on implementing the approved arrangement and resolving practical obstacles. Keep personal information within the appropriate institutional process.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What duration is specified in the approved arrangement?

A 30 minutes
B An unspecified unlimited period
C 90 minutes
D 60 minutes

2. Which two practical issues remain?

A A decided grade change and appeal
B A requirement to disclose the diagnosis publicly
C The platform setting and room confirmation
D Whether the student may speak in class

3. What should the professor focus on?

A Asking classmates to vote on access
B Requiring a public medical explanation
C Assuming the platform has already updated itself
D Implementing and checking the approved arrangement

Answers and explanations: page 95.

Named person responsible for a specified next step.

IN USE confirm the action owner

check-back

Restatement used to verify that a message was understood.

IN USE complete a check-back

Precision check

Do not require unnecessary diagnostic disclosure or ask the student to negotiate access with classmates. Resolve implementation promptly through the actual institutional process.

Phrases you can actually use

C Notice the language / 1 of 2

ACKNOWLEDGE THE MISMATCH

"The platform setting does not match the approved ninety minutes."

FOCUS ON IMPLEMENTATION

"We need to correct the practical arrangement, not ask you to justify the approval again."

PROTECT PRIVACY

"We can discuss the logistics without sharing your diagnosis with the class."

NAME THE CONTACT

"I will coordinate with the access office and testing staff."

VERIFY THE CHANGE

"I will check the student-facing setting after the update."

AVOID AN EMPTY ASSURANCE

"The room is requested, but I do not yet have confirmation."

PLAN FOR FAILURE

"We need an authorized alternative if the booking cannot be completed."

CLOSE THE LOOP

"I will confirm the actual arrangements through the agreed private channel."

Approved versus implemented

Approved records authorization; implemented means the practical arrangement is in place.

Requested versus booked

Requested identifies an application or inquiry; booked indicates confirmed allocation.

Same standard versus same conditions

Maintaining academic requirements does not imply that every student must use identical access arrangements.

Phrases you can actually use

C Notice the language / 2 of 2

CLARIFY THE QUESTION

"Are you asking about the finding or the next step?"

INVITE CORRECTION

"Please correct me if I have misunderstood that detail."

ATTRIBUTE INFORMATION

"That is what the current record says; it has not been independently confirmed."

SEPARATE POSSIBILITY

"That is a possibility, not an agreed outcome."

CHECK SCOPE

"That decision sits outside my authority."

PIN DOWN RESPONSIBILITY

"Who is responsible for that specific next step?"

REPAIR MISUNDERSTANDING

"Let me restate the distinction more clearly."

CLOSE AN EXCHANGE

"We agree on the action, the owner, and the point for review."

Reported versus verified

Reported attributes information to a source; verified indicates it has been checked. Do not use the words interchangeably.

Could versus will

Could introduces a possibility. Will commits to an action or predicts an outcome; check whether that certainty is justified.

By versus at

By gives a latest time; at identifies a scheduled moment. State the time zone when people work across locations.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which response addresses the actual problem?

A Tell the student the default overrides the approval
B Require a classroom explanation of the diagnosis
C Assume an email request confirms the room
D Correct and verify the platform setting through the approved process

2. Which status statement is accurate?

A The room has been requested but is not confirmed
B The room is definitely booked
C No testing arrangement is needed
D The platform already shows ninety minutes

3. What information should the discussion prioritize?

A Necessary implementation details
B A public account of the student's diagnosis
C Classmate opinions about fairness
D An unrelated student's private record

4. What should happen if the planned room cannot be arranged?

A Coordinate an authorized alternative promptly
B Leave the student to improvise alone
C Cancel the approved arrangement automatically
D Promise any room without checking

Answers and explanations: page 95.

The letter says ninety minutes; the platform says sixty

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

contingency arrangement / testing arrangement / implementation detail / confidentiality boundary / accessibility office / effective access / essential requirement / approved accommodation / access concern / implementation confirmation

01 **Tessa:** My approved letter specifies ninety minutes for the quiz, but the course platform still shows the standard sixty-minute limit.

02 **Professor Ali:** Thank you for flagging it. The [1] _____ does not match the approval, and we need to resolve that before relying on the setup.

03 **Tessa:** I was worried I would need to explain my diagnosis again to persuade you that the extra time is justified.

04 **Professor Ali:** We are discussing the [2] _____, not asking you to justify it again. Let us focus on the necessary logistics.

05 **Tessa:** The testing room was requested last week, but I have not received a booking confirmation from the office.

06 **Professor Ali:** Then the [3] _____ is not yet fully confirmed. I will coordinate with the responsible staff rather than assume the request completed the booking.

07 **Tessa:** Which office should we include so that the timing setting and room information do not remain in separate conversations?

08 **Professor Ali:** I will contact the [4] _____ and testing coordinator through the appropriate process, using only the information needed to arrange access.

09 **Tessa:** I would prefer not to have my personal situation discussed in a general announcement to the class.

10 **Professor Ali:** Of course. We should maintain the [5] _____ and use the agreed private channel for your specific arrangements.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 55.

11 **Tessa:** If the platform limit is changed, can you check what I will actually see rather than only the instructor setting?

12 **Professor Ali:** Yes. We need [6] _____, including the relevant student-facing view, so an administrative update does not leave the same practical problem.

13 **Tessa:** The quiz content itself has not changed, and I understand that the same academic requirements still apply.

14 **Professor Ali:** Correct. The [7] _____ and the access arrangement are different questions; identical conditions are not the only way to maintain the academic standard.

15 **Tessa:** What happens if the requested room cannot be confirmed in time? I do not want to arrive without a workable plan.

16 **Professor Ali:** We need a [8] _____ agreed through the actual process, and I will raise that promptly rather than leave you to improvise.

17 **Tessa:** Thank you. A clear confirmation of the duration, location, and contact would resolve the uncertainty for me.

18 **Professor Ali:** That is the aim of [9] _____: the arrangement has to work in practice, not just exist as an approved document.

19 **Tessa:** I will use the private channel if the displayed information still conflicts with the confirmation you send.

20 **Professor Ali:** Please do. Any remaining [10] _____ needs prompt attention, and I will close the loop when the actual setting and testing arrangements are verified.

ANSWERS / EXPLANATIONS: PAGE 96

1. implementation detail | 2. approved accommodation | 3. testing arrangement | 4. accessibility office | 5. confidentiality boundary | 6. implementation confirmation | 7. essential requirement | 8. contingency arrangement | 9. effective access | 10. access concern

The setting changed but the booking did not

F Say it

The platform now correctly shows 90 minutes. The testing-room request remains unconfirmed. The approved arrangement still needs a workable location.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

unconfirmed / coordinator / confirmation / correct

Instructor: "The platform duration is now [1] _____."

Student: "The room booking remains [2] _____."

Instructor: "I will contact the testing [3] _____."

Student: "Please send the final arrangement [4] _____."

ANSWERS / EXPLANATIONS: PAGE 96

1. correct | 2. unconfirmed | 3. coordinator | 4. confirmation

Rehearse with a fixed script

1. Read the corrected exchange and distinguish approved, requested, implemented, and confirmed.

2. Switch roles and repeat the three confirmation items: duration, location, and contact.

3. Complete the four-line follow-up with the supplied choices. Check the explanations, then read the corrected exchange twice, changing roles.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

A missing source needs a factual explanation

A Read the situation

State a specific concern, explain the applicable course rule, and separate an inquiry from a finding.

A fictional assignment permits AI-assisted brainstorming if disclosed but requires the submitted analysis to be the student's own work. Professor Park cannot locate a cited article and finds that its journal details do not match the supplied reference. Student Amir says he used a tool for an outline and believed the suggested reference was real. No integrity finding or penalty has been determined; the actual institutional review process applies.

PEOPLE / Amir: Student | Professor Park: Instructor

BE SPECIFIC BEFORE BEING CONCLUSIVE

A concern about a reference warrants careful inquiry. State the discrepancy and relevant rule without treating a student's accent, fluency, or a tool flag as a verdict.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What does the fictional assignment permit?

A Any invented citation if formatted correctly
B Automatic delegation of the whole assignment
C Disclosed AI-assisted brainstorming
D Undisclosed generated final analysis

2. What is the concrete concern?

A The student's accent
B A confirmed confession of every allegation
C A final penalty already imposed
D A cited article cannot be located and its details mismatch

3. What is the review status?

A The inquiry has been abandoned
B The professor has approved every reference
C No finding or penalty has been determined
D A violation has been conclusively established

Answers and explanations: page 97.

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

academic integrity

Honest and responsible participation in academic work.

IN USE uphold academic integrity

permitted assistance

Help allowed under the stated assignment rules.

IN USE clarify permitted assistance

authorship

Responsibility for producing the submitted work.

IN USE explain authorship

attribution

Identification of the source of ideas, wording, or assistance.

IN USE provide appropriate attribution

disclosure statement

Account of assistance or tool use required by the task.

IN USE review the disclosure statement

source verification

Checking that a cited source exists and supports the use made of it.

IN USE complete source verification

fabricated reference

Citation identifying a source that is not genuine as represented.

IN USE investigate a potentially fabricated reference

citation discrepancy

Mismatch or problem in reference details.

IN USE identify a citation discrepancy

process evidence

Material relevant to how work was developed.

IN USE review relevant process evidence

draft sequence

Ordered versions showing development of a document.

IN USE preserve the draft sequence

unauthorized collaboration

Cooperation not allowed by the stated task rules.

IN USE distinguish unauthorized collaboration

similarity report

Tool output indicating textual matches for review.

IN USE interpret a similarity report

Precision check

The source discrepancy is a fact to investigate. It does not establish the complete history of tool use, intent, or a formal violation by itself.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

allegation

Assertion of a possible violation not itself a finding.

IN USE distinguish an allegation from a finding

finding

Determination reached through the relevant review process.

IN USE communicate the actual finding

procedural fairness

Appropriate and fair handling under the relevant process.

IN USE maintain procedural fairness

opportunity to respond

Chance to address a concern through the stated process.

IN USE provide an opportunity to respond

referral for review

Routing a concern to the designated process or authority.

IN USE make a referral for review

educational consequence

Learning-related outcome or requirement under the applicable decision.

IN USE explain an authorized educational consequence

clarification request

Question that resolves an unclear meaning or instruction.

IN USE make a targeted clarification request

source attribution

Identification of where information came from.

IN USE preserve source attribution

working assumption

Provisional premise used while information is incomplete.

IN USE challenge a working assumption

scope boundary

Limit of the work or authority being discussed.

IN USE state the scope boundary

action owner

Named person responsible for a specified next step.

IN USE confirm the action owner

check-back

Restatement used to verify that a message was understood.

IN USE complete a check-back

Precision check

Fictional course rules here are not universal AI policies. Use the actual communicated assignment requirements and institutional process; do not invent evidence or presume a penalty.

Phrases you can actually use

C Notice the language / 1 of 2

STATE THE CONCERN

"I could not locate this article, and the journal details do not match."

INVITE AN ACCOUNT

"Please explain where the reference came from."

CLARIFY THE RULE

"The assignment permits disclosed brainstorming, not generated final analysis."

SEPARATE THE ISSUE

"A tool suggestion still needs source verification."

AVOID A VERDICT

"This meeting does not predetermine a finding."

PROTECT FAIRNESS

"You will have the opportunity to respond through the stated process."

PRESERVE RECORDS

"Keep the relevant existing drafts and source information intact."

EXPLAIN NEXT STEPS

"I will explain the applicable review route and what happens next."

Concern versus finding

Concern identifies a matter to examine; finding is an actual determination through the relevant process.

Reported versus admitted

Reported attributes an account; admitted can imply acceptance of wrongdoing and should not replace neutral description without basis.

Permitted with conditions

Permission can depend on disclosure, task stage, or other stated limits; it is not unrestricted permission.

Phrases you can actually use

C Notice the language / 2 of 2

CLARIFY THE QUESTION

"Are you asking about the finding or the next step?"

INVITE CORRECTION

"Please correct me if I have misunderstood that detail."

ATTRIBUTE INFORMATION

"That is what the current record says; it has not been independently confirmed."

SEPARATE POSSIBILITY

"That is a possibility, not an agreed outcome."

CHECK SCOPE

"That decision sits outside my authority."

PIN DOWN RESPONSIBILITY

"Who is responsible for that specific next step?"

REPAIR MISUNDERSTANDING

"Let me restate the distinction more clearly."

CLOSE AN EXCHANGE

"We agree on the action, the owner, and the point for review."

Reported versus verified

Reported attributes information to a source; verified indicates it has been checked. Do not use the words interchangeably.

Could versus will

Could introduces a possibility. Will commits to an action or predicts an outcome; check whether that certainty is justified.

By versus at

By gives a latest time; at identifies a scheduled moment. State the time zone when people work across locations.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which opening is most appropriate?

A The penalty is fixed before you respond
B I cannot locate this reference; please explain its source
C Your fluent wording proves misconduct
D A tool flag settles every question

2. Which rule summary matches the case?

A Citation formatting makes invented sources acceptable
B Brainstorming is allowed with disclosure; final analysis must be the student's own
C Every AI use is forbidden in every university course
D Any tool-generated final text is allowed if polished

3. What should happen to existing drafts?

A Alter them to support a preferred account
B Delete inconvenient versions
C Present newly invented notes as contemporaneous
D Preserve relevant records through the actual review process

4. Which status language is accurate?

A The source has been verified as genuine
B The student has no opportunity to respond
C A concern is being reviewed; no finding is determined
D A complete violation is already proven

Answers and explanations: page 97.

A missing source needs a factual explanation

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

permitted assistance / disclosure statement / allegation / process evidence / procedural fairness / finding / source verification / attribution / citation discrepancy / opportunity to respond

01 **Amir:** Your message says there is a concern about my reference list. I am worried that you have already decided I cheated.

02 **Professor Park:** No finding has been made. I want to explain a specific [1] _____ and hear your account through the appropriate process.

03 **Amir:** Which reference is the problem? I used a tool to help outline the topic and thought the suggested article was real.

04 **Professor Park:** I could not locate that article, and the journal details do not match. It needs [2] _____ rather than an assumption based on a plausible-looking citation.

05 **Amir:** The assignment allowed brainstorming, so I understood that I could ask for possible topics and an outline.

06 **Professor Park:** It allowed that [3] _____ with disclosure. It also required the submitted analysis to be your own work.

07 **Amir:** I included a short note about the outline tool, but I did not explain that the reference came from its suggestion.

08 **Professor Park:** We need to examine the actual [4] _____ and the relevant facts, not broaden or narrow the rule during this conversation.

09 **Amir:** I understand that even if brainstorming was allowed, I still needed to check whether the cited source existed.

10 **Professor Park:** Correct. Accurate [5] _____ and source checking remain important. A convincing format does not establish that a reference is genuine.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 64.

11 **Amir:** I have the drafts and notes I actually used. Should I keep them as they are rather than try to tidy the history?

12 **Professor Park:** Yes. Preserve the relevant [6] _____ through the appropriate process. Do not create a different history to make the record look cleaner.

13 **Amir:** Will this conversation determine the outcome immediately, or is there a separate university procedure I need to understand?

14 **Professor Park:** I will explain the applicable route. A concern or [7] _____ is not itself the final determination.

15 **Amir:** I want to respond to the specific source issue and understand what information the process asks me to provide.

16 **Professor Park:** You should have the stated [8] _____, with clear information about the concern and the actual next steps.

17 **Amir:** Thank you. I do not want my explanation summarized as admitting things I have not said or that have not been established.

18 **Professor Park:** I will record your account accurately and maintain [9] _____ under the institution's process.

19 **Amir:** For now, I will preserve the existing materials and respond to the identified question about the source and its use.

20 **Professor Park:** That is the next step. Any [10] _____ or authorized consequence must be communicated as an actual outcome, not implied in advance by this inquiry.

ANSWERS / EXPLANATIONS: PAGE 98

1. citation discrepancy | 2. source verification | 3. permitted assistance | 4. disclosure statement | 5. attribution | 6. process evidence | 7. allegation | 8. opportunity to respond | 9. procedural fairness | 10. finding

A report was mistaken for a verdict

F Say it

A tool report flags a passage for review. The instructor has not checked the source or completed the institutional process. No finding exists.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

finding / evidence / respond / review

Instructor: "The report identifies a passage for [1] _____."

Student: "It is not a formal [2] _____."

Instructor: "We need to check the actual [3] _____."

Student: "I need the stated opportunity to [4] _____."

ANSWERS / EXPLANATIONS: PAGE 98

1. review | 2. finding | 3. evidence | 4. respond

Rehearse with a fixed script

1. Read the corrected exchange and distinguish the permitted brainstorming rule from the source-verification issue.

2. Switch roles and state the concern, response opportunity, and unresolved status without inventing intent or a penalty.

3. Complete the four-line follow-up with the supplied choices. Check the explanations, then read the corrected exchange twice, changing roles.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

A recommendation is not implementation approval

A Read the situation

Clarify a proposal, test resource assumptions, and summarize the actual committee decision.

A fictional department committee discusses increasing a seminar enrollment cap from 20 to 30. Professor Grant supports access; Professor Silva asks about feedback workload and room capacity. A motion is amended to recommend a one-term pilot only if staffing and a suitable room are confirmed. The committee votes for that recommendation. Under the supplied local process, a separate faculty board must approve implementation; that approval has not occurred.

PEOPLE / Professor Grant: Committee member | Professor Silva: Committee chair

DISAGREE ON CONDITIONS WITHOUT IMPLYING OPPOSITION TO THE GOAL

Faculty can share a goal while disagreeing about readiness. State the unresolved resource question and the decision authority rather than labeling colleagues obstructive.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What enrollment change was initially discussed?

A From 30 to 20
B From 20 to 60
C No change to enrollment
D From 20 to 30

2. What did the committee vote for?

A Cancellation of the seminar
B A conditional one-term pilot recommendation
C Immediate unconditional implementation
D Permanent approval by every body

3. Which approval remains outstanding?

A A student vote required by the brief
B An external accreditation decision already supplied
C The separate faculty board approval
D The committee vote already reported

Answers and explanations: page 99.

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

curriculum proposal

Suggested change to a program or course structure.

IN USE submit a curriculum proposal

enrollment cap

Maximum permitted enrollment under the stated arrangement.

IN USE revise the enrollment cap

teaching allocation

Assignment of teaching responsibilities or resources.

IN USE confirm the teaching allocation

contact hours

Scheduled instructional time with students.

IN USE calculate contact hours

feedback workload

Time and effort required to respond to student work.

IN USE assess feedback workload

resource assumption

Premise about available staffing, space, or support.

IN USE test a resource assumption

committee motion

Formal proposal presented for a committee decision.

IN USE put forward a committee motion

motion amendment

Proposed change to the motion under discussion.

IN USE agree a motion amendment

quorum

Required participation for valid business under the applicable rules.

IN USE confirm quorum

abstention

Decision not to cast a vote for or against.

IN USE record an abstention

meeting minutes

Formal record of discussion and decisions.

IN USE approve the meeting minutes

decision authority

Person or body empowered to make the relevant decision.

IN USE identify decision authority

Precision check

The committee recommended a conditional pilot. It did not provide the separate implementation approval required by the supplied local process.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

conditional recommendation

Recommendation dependent on specified unresolved conditions.

IN USE record a conditional recommendation

pilot offering

Limited trial delivery before a broader decision.

IN USE plan a pilot offering

implementation approval

Authorization to put a proposal into operation.

IN USE obtain implementation approval

course capacity

Ability to deliver a course for the proposed enrollment.

IN USE verify course capacity

review checkpoint

Defined stage for evaluating progress or results.

IN USE establish a review checkpoint

dissenting view

Position disagreeing with the proposal or majority.

IN USE record a dissenting view

clarification request

Question that resolves an unclear meaning or instruction.

IN USE make a targeted clarification request

source attribution

Identification of where information came from.

IN USE preserve source attribution

working assumption

Provisional premise used while information is incomplete.

IN USE challenge a working assumption

scope boundary

Limit of the work or authority being discussed.

IN USE state the scope boundary

action owner

Named person responsible for a specified next step.

IN USE confirm the action owner

check-back

Restatement used to verify that a message was understood.

IN USE complete a check-back

Precision check

Committee rules vary. Quorum, voting, authority, and minute-taking must follow the actual institution; the case supplies only its fictional decision sequence.

Phrases you can actually use

C Notice the language / 1 of 2

SEPARATE GOAL FROM READINESS

"I support wider access, but the staffing assumption is unresolved."

MAKE THE CONDITION EXPLICIT

"The pilot depends on confirmed teaching support and a suitable room."

CLARIFY THE MOTION

"Are we recommending a pilot or authorizing immediate implementation?"

IDENTIFY AUTHORITY

"The faculty board must approve implementation under this process."

INVITE PRECISE DISSENT

"Which condition would need to change for you to support the proposal?"

RECORD THE AMENDMENT

"The recommendation is limited to one term."

PRESERVE STATUS

"The committee vote does not complete the board approval."

SUMMARIZE NEXT STEPS

"Verify the resources, submit the recommendation, and await the actual decision."

Recommend versus approve

Recommend proposes a course of action; approve exercises the relevant authority to authorize it.

Subject to versus after

Subject to retains a condition; after identifies sequence but may not clearly state a dependency.

Support the goal versus support this version

Agreement with an objective does not imply agreement with every implementation proposal.

Phrases you can actually use

C Notice the language / 2 of 2

CLARIFY THE QUESTION

"Are you asking about the finding or the next step?"

INVITE CORRECTION

"Please correct me if I have misunderstood that detail."

ATTRIBUTE INFORMATION

"That is what the current record says; it has not been independently confirmed."

SEPARATE POSSIBILITY

"That is a possibility, not an agreed outcome."

CHECK SCOPE

"That decision sits outside my authority."

PIN DOWN RESPONSIBILITY

"Who is responsible for that specific next step?"

REPAIR MISUNDERSTANDING

"Let me restate the distinction more clearly."

CLOSE AN EXCHANGE

"We agree on the action, the owner, and the point for review."

Reported versus verified

Reported attributes information to a source; verified indicates it has been checked. Do not use the words interchangeably.

Could versus will

Could introduces a possibility. Will commits to an action or predicts an outcome; check whether that certainty is justified.

By versus at

By gives a latest time; at identifies a scheduled moment. State the time zone when people work across locations.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which minute accurately records the outcome?

A The committee rejected wider access entirely
B Conditional one-term pilot recommended; board approval pending
C Thirty places are permanently approved from today
D All staffing and rooms are confirmed

2. Which response identifies a resource issue without dismissing the goal?

A Anyone questioning staffing opposes students
B Room availability is irrelevant to implementation
C A favorable vote creates staff automatically
D I support access, but we need to verify feedback capacity

3. What must remain visible in the recommendation?

A A claim that the board already approved it
B The staffing and room conditions
C Only the headline enrollment number
D An invented unanimous vote

4. What is the next decision-status distinction?

A A room name versus a page number
B A contact list versus an attendance list
C Submission to the board versus board approval
D A committee title versus a course title

Answers and explanations: page 99.

A recommendation is not implementation approval

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

Implementation approval / review checkpoint / feedback workload / conditional recommendation / meeting minutes / decision authority / resource assumption / pilot offering / motion amendment / curriculum proposal

01 **Professor Grant:** I support raising the seminar cap from twenty to thirty. More students want access, and the current limit leaves some out.

02 **Professor Silva:** I support that goal too. Before we settle the [1] _____, we need to examine the teaching and room assumptions.

03 **Professor Grant:** My concern is that resource questions will delay the idea indefinitely, even though the demand is already visible.

04 **Professor Silva:** Let us make them specific. The [2] _____ increases with enrollment, and the current staffing plan has not addressed that increase.

05 **Professor Grant:** We could recommend a limited trial rather than a permanent change, provided the teaching support is confirmed.

06 **Professor Silva:** That would be a [3] _____. We should state the duration and conditions clearly instead of leaving them in informal discussion.

07 **Professor Grant:** I propose one term, subject to confirmed staffing and a room suitable for thirty participants.

08 **Professor Silva:** That is a [4] _____ to the original proposal. We need the committee to know exactly which version it is voting on.

09 **Professor Grant:** The revised wording still supports increased access, but it does not assume that a larger room and staff already exist.

10 **Professor Silva:** Correct. It makes the [5] _____ visible and gives the responsible colleagues concrete information to verify.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 73.

11 **Professor Grant:** Under our department process, does this committee authorize the pilot once the vote is complete?

12 **Professor Silva:** No. The faculty board has [6] _____ for implementation; this committee sends a recommendation under the local process.

13 **Professor Grant:** Then the minutes should not say the enrollment increase is approved for next term merely because this vote passes.

14 **Professor Silva:** Exactly. The [7] _____ need to record the amended wording and distinguish our recommendation from the board's eventual decision.

15 **Professor Grant:** The committee has voted for the amended proposal. I will tell colleagues it is a one-term pilot recommendation with conditions.

16 **Professor Silva:** Call it a [8] _____, and keep staffing and room confirmation in the same sentence as the proposed increase.

17 **Professor Grant:** We can submit the recommendation after identifying the responsible contacts for those checks, without announcing a completed launch.

18 **Professor Silva:** Yes. [9] _____ remains pending until the faculty board actually makes that decision.

19 **Professor Grant:** If the pilot is approved, we should specify when the department evaluates workload and student participation.

20 **Professor Silva:** Include a [10] _____ in the proposal, so a limited trial does not quietly become a permanent change without the appropriate review.

ANSWERS / EXPLANATIONS: PAGE 100

1. curriculum proposal | 2. feedback workload | 3. pilot offering | 4. motion amendment | 5. resource assumption | 6. decision authority | 7. meeting minutes | 8. conditional recommendation | 9. Implementation approval | 10. review checkpoint

Submitted became approved

F Say it

The committee recommendation has been sent to the faculty board. The board has not yet decided. Staffing and room confirmation remain conditions of the proposal.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

conditions / submitted / pending / launch

Chair: "The recommendation has been [1] _____."

Member: "Implementation approval remains [2] _____."

Chair: "Keep the resource [3] _____ visible."

Member: "We should not announce a confirmed [4] _____."

ANSWERS / EXPLANATIONS: PAGE 100

1. submitted | 2. pending | 3. conditions | 4. launch

Rehearse with a fixed script

1. Read the corrected meeting exchange and stress recommend, conditional, and approval pending.

2. Switch roles and deliver the minute entry using the supplied cap, duration, conditions, and decision authority.

3. Complete the four-line follow-up with the supplied choices. Check the explanations, then read the corrected exchange twice, changing roles.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

Responding to a parent request without disclosing a student record

E More workplace conversations / 1-10

Offer useful general information while routing a request for individual records through the authorized process.

A parent contacts Professor Harris, says they pay their adult child's tuition, and asks for the student's grades and attendance. The professor has not verified the caller or any consent or applicable disclosure basis. The fictional institution requires this request to go through its student-records process. The professor can explain that route and public course information without confirming the individual record.

PEOPLE / Parent: Caller | Professor Harris: Instructor

Use each bank entry once, without changing its form. Answers follow turn 20.

WORD + PHRASE BANK

public course information / student-records office / privacy boundary / disclosure basis / verification process / Consent

01 **Parent:** I pay my child's tuition, and I need to know the current grade and whether they are attending your class.

02 **Professor Harris:** I understand you want to support them. I cannot disclose an individual record through this unverified call.

03 **Parent:** I assumed paying the fees meant the university could immediately tell me anything about their academic progress.

04 **Professor Harris:** Payment alone does not establish the [1] _____ for this request. We need to use the institution's proper process.

05 **Parent:** Are you saying a parent can never receive information, even when the student wants us involved?

06 **Professor Harris:** No. [2] _____ and applicable exceptions need to be assessed through the authorized process, not decided from this call alone.

07 **Parent:** My child told me generally that I could speak to the university, but I have no verified record of that permission here.

08 **Professor Harris:** Then the [3] _____ can explain the actual requirements and review the request appropriately.

09 **Parent:** Could you at least confirm whether the student is enrolled in your particular section while we sort that out?

10 **Professor Harris:** I should not disclose or confirm individual record details through an unverified request while the relevant basis remains unchecked.

The conversation, continued

E More workplace conversations / 11-20

Continue with the word bank on page 76.

11 **Parent:** I do not want the process to prevent me from helping. Is there general information you can provide now?

12 **Professor Harris:** I can point you to [4] _____ and the appropriate support contacts without discussing an individual student's grades or attendance.

13 **Parent:** That would help me understand how the course normally communicates assessment and where students can seek support.

14 **Professor Harris:** I can also explain the [5] _____ for your records inquiry, so you know which office handles the next step.

15 **Parent:** I will contact that office rather than keep asking you to confirm details before the authorization question is resolved.

16 **Professor Harris:** Thank you. That keeps the [6] _____ clear without treating your wish to help as improper.

17 **Parent:** Once the appropriate process has been completed, any information shared should stay within the permission or other applicable basis.

18 **Professor Harris:** Exactly. The relevant scope matters; one authorized disclosure should not be treated as unrestricted access to every record.

19 **Parent:** Please send me the public information and the correct office contact, without including the student's private results.

20 **Professor Harris:** I can provide those general resources. The records request itself will follow the institution's actual verification and disclosure process.

ANSWERS / EXPLANATIONS: PAGE 101

1. disclosure basis | 2. Consent | 3. student-records office | 4. public course information | 5. verification process | 6. privacy boundary

A general permission was treated as unlimited access

F Say it in a new situation

A verified authorization permits sharing one specified progress report. A requester asks for unrelated records as well. No basis for the additional disclosure is supplied.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

process / review / scope / permission

Instructor: "The verified authorization has a defined [1] _____."

Requester: "The additional records are outside that [2] _____."

Instructor: "The broader request needs separate [3] _____."

Requester: "I will use the designated records [4] _____."

ANSWERS / EXPLANATIONS: PAGE 101

1. scope | 2. permission | 3. review | 4. process

Read, switch, repeat

1. Check the four answers and read the complete exchange aloud.

2. Switch roles. Read it again with the word bank covered.

3. Return to the extended conversation. Read turns 1-10, then switch roles for turns 11-20. Use the corrected expressions.

SOLO PRACTICE

Read both roles. Pause briefly at each change of speaker. Repeat any line that needed an answer check.

Agreeing to a recommendation within the evidence available

E More workplace conversations / 1-10

Offer a supportive reference without claiming observations the professor has not made.

Student Isabel asks Professor Mensah for a strong internship recommendation. Mensah taught Isabel in one seminar and directly observed her evidence-based presentations and reliable group contributions. Mensah did not supervise her laboratory research. Isabel asks whether the letter can describe her as an outstanding laboratory researcher. The professor explains the evidence limit and confirms the actual submission requirements before committing to a deadline.

PEOPLE / Isabel: Student | Professor Mensah: Faculty referee

Use each bank entry once, without changing its form. Answers follow turn 20.

WORD + PHRASE BANK

specific endorsement / basis of assessment / evidential scope / availability confirmation / direct observations / submission requirements

01 **Isabel:** Would you write a strong recommendation for my internship? I hoped it could emphasize that I am an outstanding laboratory researcher.

02 **Professor Mensah:** I can discuss your seminar work positively, but I did not supervise your laboratory research and should not imply that I did.

03 **Isabel:** You saw my presentations and group work, while my lab supervisor observed the research activities I want to highlight.

04 **Professor Mensah:** That distinction defines the [1] _____ for my letter and helps you decide whether I am the right referee.

05 **Isabel:** Could you focus on how I evaluated evidence and responded to questions during the seminar presentations?

06 **Professor Mensah:** Yes. Those are [2] _____ I can support with specific examples rather than a broad claim about work I did not see.

07 **Isabel:** I would prefer an accurate letter with examples to an impressive label that the reader could misunderstand.

08 **Professor Mensah:** That is a sound approach. A [3] _____ can be persuasive without describing you as the best researcher I have ever supervised.

09 **Isabel:** The internship also values collaboration. You observed me coordinating the evidence table for our group presentation.

10 **Professor Mensah:** I can describe that contribution and distinguish your role from the group's collective work.

The conversation, continued

E More workplace conversations / 11-20

Continue with the word bank on page 79.

11 **Isabel:** Should I send my current résumé and the internship description, so you can see what the position requires?

12 **Professor Mensah:** Please send those materials through the appropriate channel, along with the [4] _____ and the actual deadline.

13 **Isabel:** The portal asks for the referee to submit directly. I should not assume that receiving an email draft completes that step.

14 **Professor Mensah:** Correct. We need to distinguish a prepared letter from a completed submission through the requested route.

15 **Isabel:** I also need to know whether you can meet the deadline before I enter your name as a confirmed referee.

16 **Professor Mensah:** I will check the details and give you a clear [5] _____ rather than leave you relying on an uncertain possibility.

17 **Isabel:** If the position needs a judgment specifically about laboratory research, I should also approach the person who supervised that work.

18 **Professor Mensah:** Yes. That would provide the relevant [6] _____ rather than asking one letter to cover experience its writer does not have.

19 **Isabel:** I will send the materials and ask you to emphasize the seminar strengths you directly observed, without extending them into laboratory claims.

20 **Professor Mensah:** That lets me be supportive and accurate. Once I confirm the request, we can keep the preparation and submission status clear.

ANSWERS / EXPLANATIONS: PAGE 102

1. basis of assessment | 2. direct observations | 3. specific endorsement | 4. submission requirements | 5. availability confirmation | 6. evidential scope

Prepared is not submitted

F Say it in a new situation

A professor has completed a recommendation letter, but the required direct portal submission has not yet occurred. The actual deadline remains relevant.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

visible / prepared / submission / pending

Student: "The letter has been [1] _____."

Professor: "The portal submission is still [2] _____."

Student: "We should keep the actual deadline [3] _____."

Professor: "I will confirm the completed [4] _____."

ANSWERS / EXPLANATIONS: PAGE 102

1. prepared | 2. pending | 3. visible | 4. submission

Read, switch, repeat

1. Check the four answers and read the complete exchange aloud.

2. Switch roles. Read it again with the word bank covered.

3. Return to the extended conversation. Read turns 1-10, then switch roles for turns 11-20. Use the corrected expressions.

SOLO PRACTICE

Read both roles. Pause briefly at each change of speaker. Repeat any line that needed an answer check.

Reviewing a peer teaching observation

E More workplace conversations / 1-10

Use observed classroom evidence to discuss participation while separating observation, interpretation, and a proposed change.

In a twenty-minute seminar observation, Wu records eight responses: six from one student and one each from two others. Wu and Lewis discuss wait time and turn-taking. Silence does not establish disengagement, and a proposed pause has no guaranteed effect. Their agreed meeting is developmental, not a personnel evaluation.

PEOPLE / Professor Lewis: Observed instructor | Professor Wu: Peer observer

Use each bank entry once, without changing its form. Answers follow turn 20.

WORD + PHRASE BANK

follow-up focus / teaching adjustment / participation pattern / observation record / observation agreement / developmental feedback cycle

01 **Professor Lewis:** The class seemed engaged to me, but your note says one student gave most of the responses. What exactly did you observe?

02 **Professor Wu:** In the twenty-minute segment, I recorded eight verbal responses: six from one student and one each from two others.

03 **Professor Lewis:** That is useful detail. It does not tell us what every silent student was thinking or whether they understood the material.

04 **Professor Wu:** Correct. The [1] _____ should stay separate from interpretations that the data do not establish.

05 **Professor Lewis:** I may have treated quick replies as evidence that the whole room was ready to move on.

06 **Professor Wu:** The response distribution suggests a question about [2] _____, not a conclusion that the other students learned nothing.

07 **Professor Lewis:** Could a slightly longer pause after the question give more people time to formulate an answer?

08 **Professor Wu:** That is a plausible [3] _____ to try under your course arrangements, provided we state what we want to observe.

09 **Professor Lewis:** We could keep the question type similar and note whether a wider range of students contributes after the pause.

10 **Professor Wu:** Yes. That makes the proposed comparison more specific without pretending it is a controlled causal study.

The conversation, continued

E More workplace conversations / 11-20

Continue with the word bank on page 82.

11 **Professor Lewis:** I also want to invite a second response before I summarize, so the first contribution does not close the discussion.

12 **Professor Wu:** We can include that in the [4] _____ and record the actual sequence of invitations and responses.

13 **Professor Lewis:** Our agreement described this as developmental feedback. I do not want the notes to become an unexpected personnel rating.

14 **Professor Wu:** We should keep the [5] _____ and the institution's actual process clear, including who receives the notes.

15 **Professor Lewis:** Then the summary should say that verbal participation was concentrated in the observed segment, not that the entire class was disengaged.

16 **Professor Wu:** Exactly. It should also avoid implying that one short segment represents every session or every form of participation.

17 **Professor Lewis:** After trying the pause, I can bring a comparable record and discuss what changed without announcing success in advance.

18 **Professor Wu:** That gives us a [6] _____ grounded in evidence and your stated teaching goal.

19 **Professor Lewis:** I appreciate the distinction between a concrete observation and a broad judgment about my students or my teaching.

20 **Professor Wu:** The concrete record makes the conversation more useful. It gives us something to inspect and test while preserving what remains unknown.

ANSWERS / EXPLANATIONS: PAGE 103

1. observation record | 2. participation pattern | 3. teaching adjustment | 4. follow-up focus | 5. observation agreement | 6. developmental feedback cycle

Silence was labeled disengagement

F Say it in a new situation

A note records that four students did not speak during one observed segment. No information about their thinking or understanding is supplied.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

understanding / bounded / interpretation / participation

Observer: "The recorded fact concerns verbal [1] _____."

Instructor: "It does not establish their [2] _____."

Observer: "The broader claim is an [3] _____."

Instructor: "We should keep the observation appropriately [4] _____."

ANSWERS / EXPLANATIONS: PAGE 103

1. participation | 2. understanding | 3. interpretation | 4. bounded

Read, switch, repeat

1. Check the four answers and read the complete exchange aloud.

2. Switch roles. Read it again with the word bank covered.

3. Return to the extended conversation. Read turns 1-10, then switch roles for turns 11-20. Use the corrected expressions.

SOLO PRACTICE

Read both roles. Pause briefly at each change of speaker. Repeat any line that needed an answer check.

01 Briefing and language checks

Making assignment expectations explicit

A Briefing checks / page 4

1. What is the central task?

D. Compare the reasoning in two supplied articles
The assignment requires a shared question and a supported difference in reasoning.

2. Which submission is formative?

C. The Friday outline
The brief explicitly labels Friday's outline as formative and Tuesday's submission as graded.

3. Which evidence is required?

C. A supporting passage from each supplied article
The stated task requires support from both supplied texts, not new research.

D Language checks / page 9

1. Which plan best matches the brief?

A. A shared question, one reasoning difference, and evidence from both texts
This plan contains the exact intellectual components and evidence requested.

2. Which clarification preserves scope?

A. Outside sources are not required
The brief does not require additional research or authorize replacing the texts.

3. What should the instructor assess in the central comparison?

D. How the cited passages support the stated reasoning difference
The task concerns evidence-based comparison, not agreement, decorative complexity, or additional research.

4. Which announcement prevents unequal access to clarification?

C. Share the clarified requirement with the whole course
A shared clarification makes the same task information available to all students.

01 Conversation answers

Making assignment expectations explicit

E Dialogue gaps 1-5

Pages 10-11

1. comparison. Turn 2. A comparison explicitly relates the two texts, whereas separate summaries can leave their relationship unexplained.

2. analytical claim. Turn 4. An analytical claim offers a reasoned interpretation that the student can support with evidence from the two articles.

3. textual evidence. Turn 6. Textual evidence links the proposed interpretation to specific passages rather than leaving the comparison unsupported.

4. assignment brief. Turn 8. The assignment brief defines the actual required task and should not be expanded through assumptions about how much additional research looks impressive.

5. assessment criterion. Turn 10. The assessment criterion concerns the demonstrated quality of the evidence-based comparison rather than the quantity of extra sources.

F Transfer answers 1-2

Page 12

1. optional

Student: "The extra article is labeled optional."

The page explicitly identifies the article as an additional resource, not a requirement.

2. core

Professor: "The assignment requires the two core articles."

The supplied task names the two core texts as the required materials.

E Dialogue gaps 6-10

Pages 10-11

6. formative assessment. Turn 12. The formative assessment is the outline used to support improvement before the later graded submission in this fictional assignment.

7. scaffolding. Turn 14. Scaffolding provides structured support for building the required skill before the more complete task.

8. word limit. Turn 16. The word limit constrains the length but does not require equal coverage of every source paragraph or replace the task's analytical focus.

9. learning outcome. Turn 18. The learning outcome is the capability to demonstrate, here an evidence-based comparison rather than disconnected recall.

10. clarification announcement. Turn 20. A clarification announcement shares the same resolved instructions with the course rather than giving a private advantage to one student.

F Transfer answers 3-4

Page 12

3. criteria

Student: "I should focus on the stated assessment criteria."

The student should follow the actual standards rather than invent an extra condition.

4. clarification

Professor: "I will share that clarification with the class."

A shared clarification gives everyone the same accurate assignment information.

02 Briefing and language checks

Leading a rigorous and inclusive seminar

A Briefing checks / page 13

1. What does the supplied survey establish?

A. An association in the reported data
The case supplies association without a design establishing the causal direction or mechanism.

2. Which alternative explanation is raised?

B. Prior preparation
Prior preparation is supplied as a possible alternative, not an established cause.

3. What should the professor challenge?

A. The unsupported causal inference
The central issue is the leap from association to causation, not the student's identity or participation.

D Language checks / page 18

1. Which revision fits the evidence?

D. Frequent library use is associated with higher reported grades
The qualified statement preserves the observation without claiming an established causal explanation.

2. Which question invites rigorous discussion?

C. What other factor might account for both observations?
This question examines an alternative explanation rather than attacking or excluding participants.

3. Which statement about prior preparation is supported?

C. It is a possible alternative explanation
The brief supplies it as a possibility, not a verified explanation or conclusive refutation.

4. What should the closing synthesis preserve?

D. The association and unresolved causal question
The synthesis should accurately retain both the finding and its evidential limit.

02 Conversation answers

Leading a rigorous and inclusive seminar

E Dialogue gaps 1-5

Pages 19-20

1. causal claim. Turn 2. A causal claim says library use produces the grade difference, which the supplied association alone does not establish.

2. association. Turn 4. Association describes the observed relationship without claiming that one measured factor caused the other.

3. alternative explanation. Turn 6. An alternative explanation identifies another possible account of the observation without establishing that account as the actual cause.

4. confounding variable. Turn 8. A confounding variable can affect interpretation of the relationship, but its role here remains a possibility requiring evidence.

5. qualified conclusion. Turn 10. A qualified conclusion preserves the observed finding and its limits instead of replacing uncertainty with a stronger unsupported claim.

F Transfer answers 1-2

Page 21

1. explanation

Student: "Prior preparation was a possible explanation."

The discussion raised a possibility rather than a confirmed causal result.

2. cause

Professor: "It was not established as the cause."

The supplied evidence does not identify the actual cause of the difference.

E Dialogue gaps 6-10

Pages 19-20

6. inference. Turn 12. An inference is a conclusion drawn from evidence, and revising it can improve an argument without discarding the underlying observation.

7. probing question. Turn 14. A probing question examines the reasoning or assumptions and can open a testable issue without treating it as an established result.

8. revoicing. Turn 16. Revoicing restates a contribution or distinction to check shared meaning before the discussion moves forward.

9. discussion norm. Turn 18. A discussion norm sets expectations for participation, here challenging claims with reasons rather than attacking the people making them.

10. discussion synthesis. Turn 20. The discussion synthesis links what was established and what remains open rather than manufacturing consensus on an unproven causal story.

F Transfer answers 3-4

Page 21

3. association

Student: "The original survey reported an association."

The survey supports a relationship, not the stronger causal conclusion.

4. qualified

Professor: "Keep the conclusion appropriately qualified."

The revised conclusion must retain the evidence limit stated in the case.

03 Briefing and language checks

Giving precise feedback and correcting a grading error

A Briefing checks / page 22

1. What is the correct total of the supplied criterion scores?

B. 21
Adding the stated scores of six, seven, and eight gives twenty-one.

2. What remains undecided?

A. The requested substantive increase to 24
The arithmetic correction is clear, but the larger academic score change has not been decided.

3. What does the feedback identify?

A. Evidence is cited without explaining its link to the conclusion
The specific concern is the missing explanation connecting cited evidence to the conclusion.

D Language checks / page 27

1. Which response takes appropriate responsibility?

C. You are right about the total; I will correct it to 21
The supplied arithmetic error is verifiable and should be acknowledged without an unrelated grade promise.

2. Which feedback is most actionable?

A. Explain how the quoted evidence supports the paragraph conclusion
This comment identifies the specific missing reasoning step in the supplied work.

3. Which statement separates the issues?

B. The total correction does not decide the substantive review
Arithmetic and academic judgment are different issues in the supplied case.

4. What should the instructor avoid?

D. Discouraging the student from using the stated review process
A legitimate concern should be handled through the actual process rather than suppressed.

03 Conversation answers

Giving precise feedback and correcting a grading error

E Dialogue gaps 1-5

Pages 28-29

1. recorded total. Turn 2. The recorded total is the entered sum, which is incorrect because the supplied criterion scores add to twenty-one.

2. arithmetic correction. Turn 4. The arithmetic correction fixes the established sum and does not itself decide whether the underlying academic scores should change.

3. evidence link. Turn 6. The evidence link explains how the cited material supports the conclusion, which is different from merely including a quotation.

4. performance descriptor. Turn 8. The performance descriptor defines the quality expected at the rubric level and keeps the feedback tied to the published standard.

5. margin comment. Turn 10. A margin comment concerns a particular passage and should identify its specific issue rather than imply an unsupported judgment about the entire work.

E Dialogue gaps 6-10

Pages 28-29

6. revision priority. Turn 12. A revision priority identifies the most important next improvement, here the reasoning link rather than decorative vocabulary changes.

7. substantive review. Turn 14. Substantive review examines the underlying academic judgment and remains distinct from correcting an established recording or calculation error.

8. review procedure. Turn 16. The review procedure provides the actual route for examining a grading concern rather than treating the request as improper negotiation.

9. gradebook. Turn 18. The gradebook is the record that needs the confirmed total correction, without silently changing unresolved criterion judgments.

10. feedforward. Turn 20. Feedforward directs feedback toward a concrete improvement in subsequent work without promising a particular future grade.

F Transfer answers 1-2

Page 30

1. correction

Instructor: "The missing two-point entry is a confirmed correction."

The established recording issue is separate from the unresolved larger request.

2. review

Student: "The additional five points remain under review."

The brief does not supply approval of the substantive request.

F Transfer answers 3-4

Page 30

3. criteria

Instructor: "We will use the published assessment criteria."

The academic concern must be examined against the actual assessment standards.

4. promised

Student: "The outcome has not been promised."

A review is not an advance guarantee of the requested change.

04 Briefing and language checks

Making office hours a focused learning conversation

A Briefing checks / page 31

1. Which group has the larger participant count?

C. Group B, with 60
Sixty participants in B is a larger count than forty in A.

2. Which group has the higher participation rate?

D. A, at 40 percent
A is forty out of one hundred, while B is sixty out of two hundred, or thirty percent.

3. What is the meeting intended to resolve?

A. The difference between a count and a rate
The brief identifies a focused conceptual question, not a grade or deadline decision.

D Language checks / page 36

1. Which explanation correctly compares the groups?

C. B has more participants, but A has the higher rate
The supplied figures give B sixty participants but thirty percent, versus A forty participants and forty percent.

2. Which question diagnoses the misunderstanding?

B. What is the eligible population for each count?
The denominator is the missing basis for the proportional comparison in this case.

3. Which sentence checks understanding rather than supplying a grade?

B. Explain why the larger count can have the lower rate
Asking for the distinction checks learning without making an unsupplied assessment or policy decision.

4. What should the final meeting summary contain?

D. The count-rate distinction and the next practice step
The meeting resolves the stated concept and identifies how to apply it accurately.

04 Conversation answers

Making office hours a focused learning conversation

E Dialogue gaps 1-5

Pages 37-38

1. meeting agenda. Turn 2. The meeting agenda focuses the available time on the specific count-versus-rate misunderstanding instead of trying to redo the whole assignment.

2. learning bottleneck. Turn 4. The learning bottleneck is the specific missing denominator distinction that prevents the student from interpreting the comparison correctly.

3. denominator. Turn 6. The denominator is the eligible group size in this example, which changes how each participant count becomes a rate.

4. numerator. Turn 8. The numerator is the participating part of each fraction, not the full eligible population.

5. worked example. Turn 10. The worked example demonstrates the actual calculation and reasoning needed to separate counts from proportions.

E Dialogue gaps 6-10

Pages 37-38

6. normalization. Turn 12. Normalization expresses the counts relative to their eligible populations, allowing the stated proportional comparison.

7. absolute count. Turn 14. The absolute count reports how many participated without dividing by the eligible population.

8. conceptual misunderstanding. Turn 16. A conceptual misunderstanding concerns the meaning of the comparison, unlike a simple numerical or transcription slip.

9. retrieval practice. Turn 18. Retrieval practice asks the student to recall and apply the reasoning rather than only reread the completed explanation.

10. concept check. Turn 20. The concept check verifies the specific understanding developed in the meeting without promising a grade or changing the assignment requirements.

F Transfer answers 1-2

Page 39

1. count

Student: "Both groups have the same participant count."

Each group has twenty participants, so the absolute counts are equal.

2. denominators

Professor: "Their eligible populations form different denominators."

Fifty and one hundred are the different totals used in the fractions.

F Transfer answers 3-4

Page 39

3. rate

Student: "Group C has the higher participation rate."

Forty percent in C is higher than twenty percent in D.

4. proportions

Professor: "Equal counts do not guarantee equal proportions."

Different denominators can produce different proportions from the same numerator.

05 Briefing and language checks

Calibrating a teaching team before grades are released

A Briefing checks / page 40

1. What score matches the supplied evidence scale for the anchor response?

C. 1
Relevant evidence without an explained link matches level one on the fictional scale.

2. Why did Elena assign 2?

C. The prose was fluent
Elena used fluency as the reason for the higher evidence score.

3. What is the release status?

B. Grades have not been released
The brief explicitly states that results remain unreleased.

D Language checks / page 45

1. Which scoring rationale follows the stated scale?

A. Relevant quotation present, explanatory link absent: 1
The scale distinguishes relevant evidence without explanation from both absent evidence and an explained link.

2. What is the main inconsistency?

D. Fluency influenced the evidence score
Elena substituted an unrelated dimension for the stated evidence-link requirement.

3. What should the team check next?

D. Whether the same interpretation affected other work
A defined review should identify whether the inconsistent standard affected the wider batch.

4. Which statement preserves authority and status?

C. Release awaits the agreed review and approval
Review completion and actual release authorization are distinct steps in the case.

05 Conversation answers

Calibrating a teaching team before grades are released

E Dialogue gaps 1-5

Pages 46-47

1. scoring guide. Turn 2. The scoring guide defines the actual evidence levels and prevents unrelated impressions from replacing the stated requirement.

2. anchor response. Turn 4. The anchor response illustrates the criterion boundary, here relevant evidence without the explanation required for the higher level.

3. criterion contamination. Turn 6. Criterion contamination occurs when an unrelated feature, here fluency, influences the score for a different assessed dimension.

4. scoring rationale. Turn 8. The scoring rationale connects the assigned score to the actual work and descriptor instead of relying on an overall impression.

5. borderline response. Turn 10. A borderline response sits near a descriptor boundary and can help the team clarify consistent application without changing the published scale.

F Transfer answers 1-2

Page 48

1. relevant

Assistant: "The evidence is relevant."

The brief states that the selected evidence relates to the task.

2. absent

Professor: "The explanatory link is absent."

The response does not explain how its evidence supports the conclusion.

E Dialogue gaps 6-10

Pages 46-47

6. grading calibration. Turn 12. Grading calibration aligns how assessors apply the standard through shared examples and explicit reasoning.

7. batch review. Turn 14. A batch review checks the relevant group of submissions for the identified scoring issue rather than fixing only the visible example.

8. release hold. Turn 16. The release hold keeps unreviewed results from being made available while the identified assessment issue is addressed.

9. inter-rater agreement. Turn 18. Inter-rater agreement concerns consistency among assessors applying the same standard, not forcing every student result to be identical.

10. release approval. Turn 20. Release approval is the actual authorization to publish results after the required review, not merely the fact that graders discussed an example.

F Transfer answers 3-4

Page 48

3. one

Assistant: "That matches level one."

The supplied scale assigns one to relevant evidence without the explained link.

4. standard

Professor: "Apply the same standard across the reviewed work."

Consistency requires the same descriptor rather than a different rule for each student.

06 Briefing and language checks

Implementing an approved access arrangement

A Briefing checks / page 49

1. What duration is specified in the approved arrangement?

C. 90 minutes
The supplied approval specifies ninety minutes for this quiz.

2. Which two practical issues remain?

C. The platform setting and room confirmation
The platform still shows sixty minutes, and the room booking is unconfirmed.

3. What should the professor focus on?

D. Implementing and checking the approved arrangement
The case concerns practical implementation, not relitigation or public disclosure of the approval.

D Language checks / page 54

1. Which response addresses the actual problem?

D. Correct and verify the platform setting through the approved process
The supplied approval needs practical implementation and verification.

2. Which status statement is accurate?

A. The room has been requested but is not confirmed
The brief leaves the room booking unresolved and identifies a conflicting platform setting.

3. What information should the discussion prioritize?

A. Necessary implementation details
The case requires logistics and appropriate coordination, not unnecessary personal disclosure.

4. What should happen if the planned room cannot be arranged?

A. Coordinate an authorized alternative promptly
The actual institutional process should resolve access with a workable authorized contingency.

06 Conversation answers

Implementing an approved access arrangement

E Dialogue gaps 1-5

Pages 55-56

1. implementation detail. Turn 2. The implementation detail is the practical platform setting, which must be aligned with the approved arrangement rather than treated as overriding it.

2. approved accommodation. Turn 4. The approved accommodation has already been authorized through the relevant process; this conversation concerns carrying it out rather than requiring a new public justification.

3. testing arrangement. Turn 6. The testing arrangement includes the actual practical conditions, including a room whose confirmation remains unresolved here.

4. accessibility office. Turn 8. The accessibility office is the relevant institutional service for coordinating the approved access arrangement and resolving implementation questions.

5. confidentiality boundary. Turn 10. The confidentiality boundary limits personal-information sharing and keeps the logistical discussion within the appropriate private process.

E Dialogue gaps 6-10

Pages 55-56

6. implementation confirmation. Turn 12. Implementation confirmation verifies that the arrangement is actually functioning, rather than stopping at a promise or an unchecked setting change.

7. essential requirement. Turn 14. The essential requirement concerns the academic demand, which remains distinct from the approved conditions used to provide access.

8. contingency arrangement. Turn 16. A contingency arrangement is an authorized workable alternative if the intended setup cannot operate, not an improvised cancellation of the approval.

9. effective access. Turn 18. Effective access concerns the practical ability to participate, not merely the existence of an approval letter or a request in an inbox.

10. access concern. Turn 20. An access concern is a reported practical obstacle that should be addressed through timely coordination rather than dismissed after an administrative assurance.

F Transfer answers 1-2

Page 57

1. correct

Instructor: "The platform duration is now correct."

The displayed ninety-minute duration now matches the approved arrangement.

2. unconfirmed

Student: "The room booking remains unconfirmed."

The scenario expressly leaves the testing-room request unresolved.

F Transfer answers 3-4

Page 57

3. coordinator

Instructor: "I will contact the testing coordinator."

The responsible testing contact can address the practical location question.

4. confirmation

Student: "Please send the final arrangement confirmation."

The student needs verified logistics, not merely another unconfirmed request.

07 Briefing and language checks

Discussing an academic-integrity concern fairly

A Briefing checks / page 58

1. What does the fictional assignment permit?

C. Disclosed AI-assisted brainstorming
The supplied rule permits brainstorming with disclosure while requiring the student's own submitted analysis.

2. What is the concrete concern?

D. A cited article cannot be located and its details mismatch
The brief identifies a specific reference discrepancy, not an identity-based suspicion or determined outcome.

3. What is the review status?

C. No finding or penalty has been determined
The case expressly leaves any formal finding and consequence unresolved.

D Language checks / page 63

1. Which opening is most appropriate?

B. I cannot locate this reference; please explain its source
This opening states a concrete discrepancy and invites an account without a predetermined verdict.

2. Which rule summary matches the case?

B. Brainstorming is allowed with disclosure; final analysis must be the student's own
This choice preserves the assignment-specific permission and its limits.

3. What should happen to existing drafts?

D. Preserve relevant records through the actual review process
Existing records should remain intact rather than be fabricated or manipulated.

4. Which status language is accurate?

C. A concern is being reviewed; no finding is determined
The supplied case identifies an inquiry with an unresolved formal outcome.

07 Conversation answers

Discussing an academic-integrity concern fairly

E Dialogue gaps 1-5

Pages 64-65

1. citation discrepancy. Turn 2. The citation discrepancy is the mismatched and unlocated source information, not a complete determination of misconduct.

2. source verification. Turn 4. Source verification checks that a reference exists and supports its use, which is required even when a tool suggested it.

3. permitted assistance. Turn 6. Permitted assistance is bounded by the actual assignment rule, here disclosed brainstorming rather than unrestricted generation of the final analysis.

4. disclosure statement. Turn 8. The disclosure statement records the assistance reported and should be examined against the communicated requirement rather than assumed complete.

5. attribution. Turn 10. Attribution identifies sources and assistance honestly, but a citation label does not make an unverified or nonexistent source genuine.

F Transfer answers 1-2

Page 66

1. review

Instructor: "The report identifies a passage for review."

A tool flag directs attention to material and does not itself determine misconduct.

2. finding

Student: "It is not a formal finding."

The case contains no completed institutional determination of a violation.

E Dialogue gaps 6-10

Pages 64-65

6. process evidence. Turn 12. Process evidence concerns the actual development record and should be preserved, not retrospectively fabricated or altered to fit an account.

7. allegation. Turn 14. An allegation identifies a possible violation and must remain distinct from a formal finding reached through the relevant process.

8. opportunity to respond. Turn 16. The opportunity to respond allows the student to address the identified concern through the relevant institutional process.

9. procedural fairness. Turn 18. Procedural fairness requires appropriate handling of the concern and response rather than a predetermined conclusion or distorted account.

10. finding. Turn 20. A finding is an actual determination under the relevant process, which has not yet occurred in this fictional case.

F Transfer answers 3-4

Page 66

3. evidence

Instructor: "We need to check the actual evidence."

The underlying facts and sources require assessment through the appropriate process.

4. respond

Student: "I need the stated opportunity to respond."

The student should address the specific concern through the actual review procedure.

08 Briefing and language checks

Making a faculty curriculum decision traceable

A Briefing checks / page 67

1. What enrollment change was initially discussed?

D. From 20 to 30
The supplied proposal increases the seminar cap by ten students.

2. What did the committee vote for?

B. A conditional one-term pilot recommendation
The amended motion recommends a pilot subject to staffing and room confirmation.

3. Which approval remains outstanding?

C. The separate faculty board approval
The fictional local process assigns implementation approval to a board that has not yet approved it.

D Language checks / page 72

1. Which minute accurately records the outcome?

B. Conditional one-term pilot recommended; board approval pending
This choice preserves the amended recommendation and the separate outstanding approval.

2. Which response identifies a resource issue without dismissing the goal?

D. I support access, but we need to verify feedback capacity
This statement separates the shared objective from the practical capacity question.

3. What must remain visible in the recommendation?

B. The staffing and room conditions
The conditions limit the recommendation and cannot be removed without changing its meaning.

4. What is the next decision-status distinction?

C. Submission to the board versus board approval
Sending the recommendation does not establish that the authorized body has approved implementation.

08 Conversation answers

Making a faculty curriculum decision traceable

E Dialogue gaps 1-5

Pages 73-74

1. curriculum proposal. Turn 2. The curriculum proposal is the suggested change under discussion, not an already authorized implementation decision.

2. feedback workload. Turn 4. Feedback workload concerns the actual capacity to respond to additional student work and is a practical condition rather than opposition to access.

3. pilot offering. Turn 6. A pilot offering is a limited trial rather than a permanent change, allowing the proposal to be bounded in duration and scope.

4. motion amendment. Turn 8. A motion amendment changes the proposal being decided, here limiting it to a conditional one-term pilot.

5. resource assumption. Turn 10. The resource assumption identifies capacity that must be verified rather than treated as created by a favorable vote.

F Transfer answers 1-2

Page 75

1. submitted

Chair: "The recommendation has been submitted."

Submission describes sending the proposal, not a completed board decision.

2. pending

Member: "Implementation approval remains pending."

The board has not yet made the required decision.

E Dialogue gaps 6-10

Pages 73-74

6. decision authority. Turn 12. Decision authority identifies the body empowered to authorize implementation under the supplied fictional process.

7. meeting minutes. Turn 14. The meeting minutes should preserve the actual motion, conditions, and decision status rather than report an authorization that did not occur.

8. conditional recommendation. Turn 16. A conditional recommendation retains the unresolved requirements and must not be shortened into an unconditional commitment.

9. Implementation approval. Turn 18. Implementation approval is the separate authorization needed before putting the change into operation, which the committee recommendation does not supply.

10. review checkpoint. Turn 20. A review checkpoint defines when the trial will be assessed, keeping evaluation separate from an automatic promise of permanent continuation.

F Transfer answers 3-4

Page 75

3. conditions

Chair: "Keep the resource conditions visible."

Staffing and room confirmation remain part of the proposed authorization.

4. launch

Member: "We should not announce a confirmed launch."

The supplied status does not establish authorization to begin implementation.

09 Conversation answers

Responding to a parent request without disclosing a student record

E Extended conversation

Pages 76-77

1. disclosure basis. Turn 4. The disclosure basis is the actual authorization or applicable exception for sharing records, not an assumption based only on who pays tuition.

2. Consent. Turn 6. Consent may provide a basis for sharing under the relevant requirements, but its existence and scope must be verified rather than assumed.

3. student-records office. Turn 8. The student-records office is the designated route in this fictional institution for verifying the request and any relevant authority to disclose.

4. public course information. Turn 12. Public course information can explain general course arrangements without revealing an individual student's protected academic record.

5. verification process. Turn 14. The verification process checks identity, authority, and the relevant request under institutional requirements before an individual record is shared.

6. privacy boundary. Turn 16. The privacy boundary protects individual record information while allowing appropriate support and properly authorized requests to proceed.

F Transfer exchange

Page 78

1. scope

Instructor: "The verified authorization has a defined scope."

The supplied authorization concerns one specified report, not every student record.

2. permission

Requester: "The additional records are outside that permission."

The case supplies no authorization covering the unrelated additional records.

3. review

Instructor: "The broader request needs separate review."

The additional disclosure requires the appropriate institutional assessment rather than assumption.

4. process

Requester: "I will use the designated records process."

The broader request should follow the actual authorized review route.

Background reading: US Department of Education. Postsecondary parent access to education records.. The conversation is an original fictional teaching case.

10 Conversation answers

Agreeing to a recommendation within the evidence available

E Extended conversation

Pages 79-80

1. basis of assessment. Turn 4. The basis of assessment identifies what the referee actually observed, preventing supportive language from implying nonexistent direct supervision.

2. direct observations. Turn 6. Direct observations concern work the professor actually witnessed, unlike laboratory performance outside the professor's experience.

3. specific endorsement. Turn 8. A specific endorsement supports an identified strength with evidence instead of relying on an ungrounded superlative.

4. submission requirements. Turn 12. Submission requirements identify how and when the reference must be delivered, which need checking before a reliable commitment can be made.

5. availability confirmation. Turn 16. Availability confirmation establishes whether the professor can undertake the request within the actual requirements rather than leaving the student to assume acceptance.

6. evidential scope. Turn 18. Evidential scope limits the claims a reference can responsibly make based on the referee's actual knowledge and observations.

F Transfer exchange

Page 81

1. prepared

Student: "The letter has been prepared."

The document is complete, but that does not establish delivery through the required route.

2. pending

Professor: "The portal submission is still pending."

The case states that the required direct submission has not occurred.

3. visible

Student: "We should keep the actual deadline visible."

An unfinished submission requires continued attention to the real deadline.

4. submission

Professor: "I will confirm the completed submission."

Confirmation should concern the actual delivery event rather than document preparation alone.

11 Conversation answers

Reviewing a peer teaching observation

E Extended conversation

Pages 82-83

1. observation record. Turn 4. The observation record captures the responses actually seen and heard, not an inferred account of every student's engagement or understanding.

2. participation pattern. Turn 6. The participation pattern describes how contributions were distributed and invites inquiry without proving that silent participants were disengaged.

3. teaching adjustment. Turn 8. A teaching adjustment is a proposed change to practice whose effect needs checking rather than being guaranteed by the suggestion.

4. follow-up focus. Turn 12. The follow-up focus identifies what a subsequent observation will examine, preventing the discussion from expanding into an undefined judgment of the whole course.

5. observation agreement. Turn 14. The observation agreement defines the purpose and handling of this developmental visit, which should not be silently changed into another evaluative use.

6. developmental feedback cycle. Turn 18. A developmental feedback cycle links observation, a bounded change, and subsequent review rather than treating advice as proof of improved learning.

F Transfer exchange

Page 84

1. participation

Observer: "The recorded fact concerns verbal participation."

The note describes whether students spoke, not their entire mental engagement.

2. understanding

Instructor: "It does not establish their understanding."

The supplied observation contains no direct evidence of what those students understood.

3. interpretation

Observer: "The broader claim is an interpretation."

Calling silence disengagement adds an inference beyond the recorded behavior.

4. bounded

Instructor: "We should keep the observation appropriately bounded."

One segment and one behavior cannot establish every student's overall learning state.

Find the move you need

Use these as precise language models. Replace details only when you know the actual facts, authority, and agreed conditions.

01 Making assignment expectations explicit

Name the task: The goal is to compare their reasoning, not summarize them separately.

Limit the scope: Outside sources are not required for this assignment.

Share the clarification: I will post the same clarification for everyone in the course.

Full phrase set: pages 7-8 | Dialogue: pages 10-11

02 Leading a rigorous and inclusive seminar

Challenge the inference: What lets us move from association to causation here?

Protect the speaker: We are examining the claim, not judging the person making it.

Synthesize: We agree on the association; the causal explanation remains open.

Full phrase set: pages 16-17 | Dialogue: pages 19-20

03 Giving precise feedback and correcting a grading error

Acknowledge the error: You are right; those scores total twenty-one, not nineteen.

Point to the work: This passage gives the evidence but does not yet explain the connection.

Avoid a promise: Reviewing the concern does not predetermine the outcome.

Full phrase set: pages 25-26 | Dialogue: pages 28-29

04 Making office hours a focused learning conversation

Focus the meeting: Which step stopped making sense to you?

Model the reasoning: Forty out of one hundred is forty percent.

Close with a next step: Use counts for headcount and rates for the stated proportional comparison.

Full phrase set: pages 34-35 | Dialogue: pages 37-38

Keep the conversation productive

Use these as precise language models. Replace details only when you know the actual facts, authority, and agreed conditions.

05 Calibrating a teaching team before grades are released

Return to the scale: Which descriptor matches what the response actually demonstrates?

Invite comparison: Let us score the same anchor before reviewing the next sample.

Confirm release: Results remain on hold until the agreed review and approval are complete.

Full phrase set: pages 43-44 | Dialogue: pages 46-47

06 Implementing an approved access arrangement

Acknowledge the mismatch: The platform setting does not match the approved ninety minutes.

Name the contact: I will coordinate with the access office and testing staff.

Close the loop: I will confirm the actual arrangements through the agreed private channel.

Full phrase set: pages 52-53 | Dialogue: pages 55-56

07 Discussing an academic-integrity concern fairly

State the concern: I could not locate this article, and the journal details do not match.

Separate the issue: A tool suggestion still needs source verification.

Explain next steps: I will explain the applicable review route and what happens next.

Full phrase set: pages 61-62 | Dialogue: pages 64-65

08 Making a faculty curriculum decision traceable

Separate goal from readiness: I support wider access, but the staffing assumption is unresolved.

Identify authority: The faculty board must approve implementation under this process.

Summarize next steps: Verify the resources, submit the recommendation, and await the actual decision.

Full phrase set: pages 70-71 | Dialogue: pages 73-74

Find a term and its context

The page number leads to the definition and a typical word combination. Repeated terms have separate entries when they serve different lesson contexts.

absolute count report the absolute count 32
abstention record an abstention 68
academic adjustment implement an academic adjustment 50
academic integrity uphold academic integrity 59
access concern address an access concern 51
accessibility office coordinate with the accessibility office 50
accessible format provide an accessible format 50
action owner confirm the action owner 6
action owner confirm the action owner 15
action owner confirm the action owner 24
action owner confirm the action owner 33
action owner confirm the action owner 42
action owner confirm the action owner 51
action owner confirm the action owner 60
action owner confirm the action owner 69
adjudication route for adjudication 42
allegation distinguish an allegation from a finding 60
alternative explanation test an alternative explanation 14
analytical claim formulate an analytical claim 5
anchor response discuss an anchor response 41
anonymized sample use an anonymized sample 42
approved accommodation confirm the approved accommodation 50
arithmetic correction make an arithmetic correction 23
assessment criterion explain the assessment criterion 5

Find a term and its context

The page number leads to the definition and a typical word combination. Repeated terms have separate entries when they serve different lesson contexts.

assessment dimension separate assessment dimensions 42
assignment brief clarify the assignment brief 5
assistive technology check assistive-technology compatibility 50
association distinguish association from causation 14
attribution provide appropriate attribution 59
authorship explain authorship 59
batch review organize a batch review 41
borderline response discuss a borderline response 41
captioning arrange accurate captioning 50
causal claim qualify a causal claim 14
check-back complete a check-back 6
check-back complete a check-back 15
check-back complete a check-back 24
check-back complete a check-back 33
check-back complete a check-back 42
check-back complete a check-back 51
check-back complete a check-back 60
check-back complete a check-back 69
citation discrepancy identify a citation discrepancy 59
clarification announcement post a clarification announcement 6
clarification request make a targeted clarification request 6
clarification request make a targeted clarification request 15
clarification request make a targeted clarification request 24
clarification request make a targeted clarification request 33

Find a term and its context

The page number leads to the definition and a typical word combination. Repeated terms have separate entries when they serve different lesson contexts.

clarification request make a targeted clarification request 42
clarification request make a targeted clarification request 51
clarification request make a targeted clarification request 60
clarification request make a targeted clarification request 69
clerical error acknowledge a clerical error 23
committee motion put forward a committee motion 68
comparison develop a focused comparison 5
concept check use a concept check 33
conceptual misunderstanding identify a conceptual misunderstanding 32
conditional recommendation record a conditional recommendation 69
confidentiality boundary maintain the confidentiality boundary 51
confounding variable identify a possible confounding variable 14
contact hours calculate contact hours 68
contingency arrangement confirm a contingency arrangement 51
counterexample introduce a counterexample 15
course capacity verify course capacity 69
criterion contamination avoid criterion contamination 41
criterion score check the criterion score 23
curriculum proposal submit a curriculum proposal 68
decision authority identify decision authority 68
denominator check the denominator 32
diagnostic question ask a diagnostic question 32
disclosure statement review the disclosure statement 59
discussion norm establish discussion norms 14

Find a term and its context

The page number leads to the definition and a typical word combination. Repeated terms have separate entries when they serve different lesson contexts.

discussion synthesis provide a discussion synthesis 15
dissenting view record a dissenting view 69
double marking use double marking 41
draft sequence preserve the draft sequence 59
educational consequence explain an authorized educational consequence 60
effective access verify effective access 51
enrollment cap revise the enrollment cap 68
essential requirement identify the essential requirement 50
evidence link strengthen the evidence link 23
evidence of learning identify evidence of learning 24
evidence-based disagreement model evidence-based disagreement 14
extended time configure approved extended time 50
fabricated reference investigate a potentially fabricated reference 59
feedback conference hold a feedback conference 23
feedback workload assess feedback workload 68
feedforward provide specific feedforward 23
finding communicate the actual finding 60
follow-up appointment arrange a follow-up appointment 33
follow-up question pose a follow-up question 14
formative assessment provide formative assessment 5
functional barrier identify a functional barrier 50
grade appeal explain the grade-appeal process 23
gradebook update the gradebook 24
grading calibration conduct grading calibration 41

Find a term and its context

The page number leads to the definition and a typical word combination. Repeated terms have separate entries when they serve different lesson contexts.

holistic judgment distinguish holistic judgment 24
implementation approval obtain implementation approval 69
implementation confirmation obtain implementation confirmation 51
implementation detail confirm implementation details 50
inference examine the inference 15
inter-rater agreement improve inter-rater agreement 41
learning bottleneck identify a learning bottleneck 33
learning outcome align the learning outcome 5
margin comment clarify a margin comment 24
marking consistency check marking consistency 42
meeting agenda set a focused meeting agenda 32
meeting minutes approve the meeting minutes 68
metacognition support metacognition 33
moderation conduct assessment moderation 41
motion amendment agree a motion amendment 68
normalization explain normalization 32
numerator identify the numerator 32
office hours hold accessible office hours 32
opportunity to respond provide an opportunity to respond 60
optional resource label an optional resource 6
participation balance monitor participation balance 15
participation rate calculate the participation rate 32
performance descriptor apply the performance descriptor 23
permitted assistance clarify permitted assistance 59

Find a term and its context

The page number leads to the definition and a typical word combination. Repeated terms have separate entries when they serve different lesson contexts.

pilot offering plan a pilot offering 69
prerequisite knowledge check prerequisite knowledge 6
probing question ask a probing question 14
procedural fairness maintain procedural fairness 60
procedural slip distinguish a procedural slip 32
process evidence review relevant process evidence 59
professional apology offer a professional apology 24
qualified conclusion offer a qualified conclusion 15
quorum confirm quorum 68
recorded total correct the recorded total 23
referral for review make a referral for review 60
release approval obtain release approval 42
release hold maintain the release hold 41
required reading identify the required reading 5
resource assumption test a resource assumption 68
retrieval practice use retrieval practice 33
review checkpoint establish a review checkpoint 69
review procedure follow the review procedure 24
revision priority identify a revision priority 23
revoicing use revoicing 14
rubric apply the published rubric 23
scaffolding provide appropriate scaffolding 6
scope boundary state the scope boundary 6
scope boundary state the scope boundary 15

Find a term and its context

The page number leads to the definition and a typical word combination. Repeated terms have separate entries when they serve different lesson contexts.

scope boundary state the scope boundary 24
scope boundary state the scope boundary 33
scope boundary state the scope boundary 42
scope boundary state the scope boundary 51
scope boundary state the scope boundary 60
scope boundary state the scope boundary 69
scope condition state the scope condition 15
scoring guide apply the scoring guide 41
scoring rationale document the scoring rationale 41
screen-reader compatibility verify screen-reader compatibility 50
seminar facilitate a seminar 14
similarity report interpret a similarity report 59
source attribution preserve source attribution 6
source attribution preserve source attribution 15
source attribution preserve source attribution 24
source attribution preserve source attribution 33
source attribution preserve source attribution 42
source attribution preserve source attribution 51
source attribution preserve source attribution 60
source attribution preserve source attribution 69
source verification complete source verification 59
submission format specify the submission format 6
submission window confirm the submission window 5
substantive review request a substantive review 23

Find a term and its context

The page number leads to the definition and a typical word combination. Repeated terms have separate entries when they serve different lesson contexts.

summary distinguish summary from analysis 5
summative assessment distinguish summative assessment 5
task alignment check task alignment 6
teaching allocation confirm the teaching allocation 68
teaching assistant brief the teaching assistant 41
teaching-team briefing hold a teaching-team briefing 42
testing arrangement verify the testing arrangement 50
testing coordinator contact the testing coordinator 51
textual evidence select textual evidence 5
think-aloud model a think-aloud 32
transfer of learning check transfer of learning 33
turn-taking support equitable turn-taking 14
unauthorized collaboration distinguish unauthorized collaboration 59
wait time allow wait time 14
word limit apply the word limit 5
worked example explain a worked example 32
working assumption challenge a working assumption 6
working assumption challenge a working assumption 15
working assumption challenge a working assumption 24
working assumption challenge a working assumption 33
working assumption challenge a working assumption 42
working assumption challenge a working assumption 51
working assumption challenge a working assumption 60
working assumption challenge a working assumption 69
