No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means without prior written permission from the author, except as permitted by law.

Eight lessons. Eleven extended conversations.

INSIDE THE BOOK

192 vocabulary entries / 128 reusable phrases
220 extended-dialogue turns / 11 transfer exchanges
Word banks and explained answer keys

Upper-intermediate to advanced (B2-C1). For line cooks, prep cooks, kitchen assistants, station leads, and food-service production teams.

2026 edition

Eight scenarios. Eight skills.

Eight lessons on prep, receiving, tickets, the pass, shortages, allergies, equipment, and handovers. Additional conversations cover recipe scaling, usable yield, and tracing a recalled ingredient.

01 Clarifying a prep list

4

Twenty-four of what? | Clarify an ambiguous prep quantity, confirm the recipe basis, and read back the instruction before production starts.

02 Reporting deliveries and stock discrepancies

13

Six listed, four counted | Report a delivery discrepancy using observed quantities, attributed statements, and a clear receiving decision owner.

03 Reading tickets and modifications

22

Three total, not five | Distinguish a replacement ticket from an added order and keep a one-item substitution linked to the current quantity.

04 Coordinating the pass

31

Two plated, two still cooking | Answer a whole-ticket readiness question with a precise split of completed work, remaining work, and estimated timing.

05 Communicating a shortage and an alternative

40

Five sides, three portions left | Quantify a shortfall, present a proposed alternative, and assign responsibility for obtaining the diners' decision.

06 Checking dietary modifications

49

No cheese is not the full question | Upgrade a simple omission request to an accurately communicated allergy review without inventing ingredient or handling assurances.

07 Reporting equipment and dish-station needs

58

Scale B keeps going blank | Report an observable equipment problem, identify the affected work, and request review and a verified alternative.

08 Closing and handing over unfinished work

67

Counted is not checked | Transfer unfinished closing work with explicit acceptance while preserving separate counts, reviews, and completion states.

Sources and publication notes

114

Say the quantity. Name the stage.

Kitchen communication needs to be brief enough for service and complete enough to prevent mistakes. Numbers need units, revised tickets need a clear total, and ready must identify which items have actually reached which stage.

A number needs a unit

Twenty-four portions, containers, and liters describe different amounts. Confirm the intended unit before starting a batch, then keep it visible on the prep list and in the read-back.

"Twenty-four portions from the current recipe, not twenty-four containers."

A revision can replace

A second slip is not always an additional order. Confirm whether it replaces the earlier ticket, identify the current total, and keep a substitution attached to the correct item.

"Revised ticket 41 replaces the old quantity: three tarts total."

Partial progress is useful

State what is complete and what remains. Two plates at the pass do not make a four-main ticket ready. An estimate for the remaining work is not a finished-table call.

"Two plated, two still at the station; current estimate four more minutes."

Keep the next owner visible

A shortage, allergy question, equipment fault, or unfinished closing check needs a responsible person. Name the actual next step without pretending an unresolved review is complete.

"The server will obtain the diners' choice before the proposed substitution is used."

PROFESSIONAL BOUNDARIES

All kitchens, tickets, quantities, and incidents are fictional. This book teaches workplace English, not culinary certification, food-safety procedures, medical advice, or equipment repair. Follow current local requirements, approved recipes, allergen controls, equipment instructions, and emergency procedures. No example authorizes serving unverified food, bypassing a control, or repairing faulty equipment.

Twenty-four of what?

A Read the situation

Clarify an ambiguous prep quantity, confirm the recipe basis, and read back the instruction before production starts.

The prep list says "soup: 24" without a unit. Yesterday's sheet used portions, while a storeroom label uses containers. Prep cook Asha has not started a batch. Lead Mateo intended twenty-four portions from the current recipe, not twenty-four containers. Asha needs to ask about the unit, confirm the current recipe, and make the corrected instruction visible. The conversation supplies no container capacity, portion volume, ingredient weights, or recipe conversion factor. Those details must come from the actual approved recipe and production arrangements, not from guessing what the number means.

PEOPLE / Asha: Prep cook | Mateo: Kitchen lead

A SHORT QUESTION PREVENTS A LARGE ERROR

In a busy kitchen, a clarification can feel like slowing down. Make it specific: state the item, the ambiguous number, and the missing unit. A confident read-back shows attention and protects production without turning the exchange into a challenge to rank.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What is missing from soup: 24?

A The word soup

B The number itself

C A confirmed completed batch

D The unit

2. What did Mateo intend?

A Twenty-four portions from the current recipe

B Twenty-four containers regardless of size

C Twenty-four liters established by the brief

D Yesterday's recipe without checking

3. What has Asha started?

A A completed soup service

B An invented conversion calculation

C No batch yet

D Twenty-four containers

Answers and explanations: [page 85](#).

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

prep list

Record of food-preparation tasks and required quantities.

IN USE clarify the prep list

mise en place

Ingredients, equipment, and organization prepared for the work ahead.

IN USE organize mise en place

portion

Specified amount intended for one serving or defined use.

IN USE prepare twenty-four portions

batch

Quantity produced together in one preparation cycle.

IN USE plan the batch

batch size

Amount to be produced in a particular batch.

IN USE confirm the batch size

recipe yield

Quantity or number of portions an approved recipe produces.

IN USE check the recipe yield

portion size

Specified amount allocated to each serving.

IN USE follow the portion size

unit of measure

Stated basis such as grams, liters, containers, or portions.

IN USE name the unit of measure

container capacity

Amount a particular container can hold.

IN USE verify container capacity

production quantity

Amount planned for preparation.

IN USE confirm the production quantity

standardized recipe

Defined recipe specifying ingredients, method, and yield for consistent production.

IN USE follow the standardized recipe

current recipe

Recipe version established for the present task.

IN USE use the current recipe

Precision check

A portion is not a container unless the actual arrangement explicitly makes them equivalent. The number twenty-four cannot be converted into liters, containers, or ingredient weights without the relevant recipe and capacity information.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

recipe version

Identified edition or revision of a recipe.

IN USE confirm the recipe version

scaling factor

Ratio used to adjust a recipe from its original yield to a target yield.

IN USE calculate the scaling factor

ingredient weight

Mass of a recipe component.

IN USE verify the ingredient weight

volume

Space occupied by a substance, measured in a stated unit.

IN USE measure the volume

tare

Container weight excluded to determine the contents' net weight.

IN USE account for the tare

net weight

Contents' weight excluding packaging or container weight.

IN USE record the net weight

gross weight

Combined weight of contents and relevant container or packaging.

IN USE distinguish gross weight

production sheet

Record of planned and actual kitchen output.

IN USE update the production sheet

prep target

Required output for a preparation task.

IN USE confirm the prep target

read-back

Repetition of an instruction to confirm the details understood.

IN USE give a read-back

clarification

Question or explanation that resolves an ambiguity.

IN USE request clarification

task start

Point at which the assigned preparation begins.

IN USE confirm the task start

Precision check

Yesterday used portions is context, not a substitute for confirming today. The lead establishes twenty-four portions from the current recipe. Check the approved yield and portion size before any scaling; the exercise supplies no numeric conversion factor.

Phrases you can actually use

C Notice the language / 1 of 2

IDENTIFY THE AMBIGUITY

"The prep list says soup, twenty-four, but the unit is missing."

STATE THE INTENDED QUANTITY

"I mean twenty-four portions."

KEEP THE REJECTED INTERPRETATION CLEAR

"Not twenty-four containers."

CHECK THE QUANTITY BASIS

"What portion size and finished yield does this recipe use?"

ASK THE EXACT QUESTION

"Do you mean twenty-four portions or twenty-four containers?"

NAME THE RECIPE BASIS

"Use the current recipe."

STATE THE WORK STATUS

"I have not started the batch yet."

CHECK THE RECIPE YIELD

"I will use the yield stated in the approved recipe."

Do you mean

Offers the relevant interpretations without accusing anyone of incompetence.

I mean

Corrects the intended meaning directly.

Not

Makes the rejected interpretation explicit in a noisy environment.

Phrases you can actually use

C Notice the language / 2 of 2

SEPARATE CONTAINER AND SERVING

"Container size does not define the portion count by itself."

READ BACK COMPLETELY

"Soup: twenty-four portions, using the current recipe."

AVOID COPYING BY HABIT

"Yesterday's sheet does not settle today's missing unit."

CONFIRM BEFORE STARTING

"I will check the corrected instruction before production starts."

MAKE THE CORRECTION VISIBLE

"Let us add portions to the prep list."

CLARIFY THE VERSION

"Which approved recipe version applies to this task?"

KEEP WEIGHTS GROUNDED

"Ingredient quantities must come from the actual recipe calculation."

CLOSE THE CLARIFICATION

"We now agree on the item, quantity, unit, and recipe basis."

Yet

Indicates that clarification is occurring before a batch has begun.

Using

Links the quantity to the specified recipe basis.

By itself

Prevents one available fact from being treated as enough for a conversion.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which read-back is complete?

- A** Soup: twenty-four of something.
- B** Twenty-four containers because the storeroom label says containers.
- C** Twenty-four liters because soup is liquid.
- D** Soup: twenty-four portions using the current recipe, not twenty-four containers.

2. What information is still needed to calculate ingredient amounts?

- A** The container capacity without the recipe
- B** The old ingredient list without its yield
- C** The actual recipe yield, portion size, and approved scaling details
- D** The number of portions without their size

3. Which statement correctly describes production status?

- A** All ingredients have been weighed as a supplied fact.
- B** Twenty-four containers are complete.
- C** No batch has started.
- D** The soup has already been served.

4. Why add portions to the list?

- A** To imply the batch is already complete
- B** To make the clarified unit visible to the next reader
- C** To change the target to containers
- D** To certify all food-safety controls

[Answers and explanations: page 85.](#)

Twenty-four of what?

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

unit of measure / read-back / recipe yield / production quantity / Container capacity / task start / portion size / scaling factor / prep list / current recipe

- 01 **Asha:** Mateo, can I check the soup line before I start? It says twenty-four, but there is no unit beside the number.
- 02 **Mateo:** Thank you for checking the ¹ _____. I mean twenty-four portions from the current recipe, not twenty-four containers.
- 03 **Asha:** Thanks. The store label says containers, so I wanted to check before I started filling twenty-four of those.
- 04 **Mateo:** They do not establish the same ² _____. Today's instruction is portions. The storage label does not change the production target I have given you.
- 05 **Asha:** I have not started a batch, so nothing needs undoing. I wanted to settle the quantity before collecting ingredients and beginning the preparation.
- 06 **Mateo:** Good. Keep the ³ _____ clear in the handoff. We are clarifying an instruction, not reporting that twenty-four of anything has already been made.
- 07 **Asha:** Which recipe version are we using today? I have yesterday's working sheet, but I would rather check it against the approved one.
- 08 **Mateo:** Use the ⁴ _____. Confirm the approved version for the task, including its yield and portion size, before working out the required ingredients.
- 09 **Asha:** What is the portion size on that recipe? Without it, I cannot turn twenty-four servings into a finished volume.
- 10 **Mateo:** Exactly. The ⁵ _____ comes from the actual recipe arrangement. Do not invent it from the size of a container you happen to see.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 10.

- 11 **Asha:** I will check how many portions the approved recipe produces. That will tell me whether I need a whole batch or an appropriately scaled quantity.
- 12 **Mateo:** The ⁶ _____ is the relevant starting point. The twenty-four target alone does not tell you the ingredient weights or the number of preparation cycles.
- 13 **Asha:** And the size of a storage container is a separate detail. One container could hold more than one serving, depending on the actual container and portion.
- 14 **Mateo:** Correct. ⁷ _____ is not a synonym for portion count. We need to keep storage descriptions and production quantities distinct.
- 15 **Asha:** If the recipe needs scaling, I will use its actual yield and the target rather than multiply everything by twenty-four automatically.
- 16 **Mateo:** Yes. A ⁸ _____ depends on the recipe basis. Follow the approved method, and ask about any unresolved detail before changing ingredient amounts.
- 17 **Asha:** I will add portions to the line now. Whoever takes over this prep should not have to ask the same question again.
- 18 **Mateo:** Agreed. Make the ⁹ _____ explicit. The corrected entry should preserve soup, twenty-four portions, and the current recipe basis without implying the task is complete.
- 19 **Asha:** My repeat is soup, twenty-four portions, current recipe. No batch started. I will check the recipe details before beginning the actual preparation.
- 20 **Mateo:** That ¹⁰ _____ is correct. We have resolved the missing unit, and the next step is to prepare against the approved recipe and actual kitchen process.

ANSWERS / EXPLANATIONS: PAGE 86

1. prep list | 2. unit of measure | 3. task start | 4. current recipe | 5. portion size | 6. recipe yield | 7. Container capacity | 8. scaling factor | 9. production quantity | 10. read-back

Clarify a sauce quantity

F Say it

A prep line says sauce: 18. Lead Noor clarifies eighteen portions from the current recipe, not eighteen tubs. No batch has started, and no portion volume is supplied.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

tubs / current / started / portions

Cook: "The target is eighteen ¹ _____."

Lead: "Use the ² _____ recipe."

Cook: "No batch has ³ _____."

Lead: "The target is not eighteen ⁴ _____."

ANSWERS / EXPLANATIONS: PAGE 86

1. portions | 2. current | 3. started | 4. tubs

Rehearse with a fixed script

1. Check the answers. Read the prep-list conversation, stressing portions rather than containers.
2. Switch roles. Repeat the twenty-four-portion instruction, current recipe, and no-batch-started status without inventing a volume.
3. Complete and check the sauce transfer. Read the eighteen-portion instruction and keep the tub interpretation rejected.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

Six listed, four counted

A Read the situation

Report a delivery discrepancy using observed quantities, attributed statements, and a clear receiving decision owner.

A delivery note lists six cases of tomatoes, but cook Ben can physically count four cases in the receiving area. The driver says two more may be on another trolley and has not checked. Receiving lead Lina is responsible for resolving the record through the actual receiving process. Ben must distinguish the delivery note from the observed count and the driver's unverified explanation. No full delivery, supplier fault, product-quality acceptance, or credit has been established. The count should not be recorded as six received merely to make the paperwork match.

PEOPLE / Ben: Cook helping receive the delivery | Lina: Receiving lead

A DISCREPANCY IS NOT AN ACCUSATION

A firm count can be stated neutrally. Say what the note lists, what is physically present, and what someone has suggested but not checked. That gives the receiving lead useful information without labeling the driver dishonest or accepting a quantity that has not arrived.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What quantity is physically present?

A Two cases only

C Four cases

B An uncounted full pallet

D Six verified cases

2. What did the driver say?

A A credit has been approved.

C Two more may be on another trolley.

B The supplier intentionally removed two cases.

D Six have been independently verified.

3. Who must resolve the receiving record?

A Lina, the receiving lead

C An unrelated guest

B Ben by inventing six received

D No one because paperwork cannot differ

Answers and explanations: page 87.

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

delivery note

Document listing goods associated with a delivery.

IN USE compare the delivery note

purchase order

Record of items and quantities ordered from a supplier.

IN USE check the purchase order

invoice

Supplier document requesting payment for stated goods or services.

IN USE reconcile the invoice

case

Shipping unit containing a specified group or quantity of product.

IN USE count the cases

case pack

Number or arrangement of items contained in a case.

IN USE verify the case pack

pallet

Platform used to handle and transport grouped goods.

IN USE identify the pallet

trolley

Wheeled equipment used to move goods.

IN USE check the trolley

receiving area

Location where incoming supplies are checked and processed.

IN USE inspect the receiving area

physical count

Quantity established by counting the items actually present.

IN USE record the physical count

listed quantity

Amount stated on a document.

IN USE compare the listed quantity

quantity discrepancy

Difference between two relevant quantity records or observations.

IN USE report a quantity discrepancy

short delivery

Delivery with less than the agreed quantity, once the relevant check establishes it.

IN USE verify a short delivery

Precision check

Six listed minus four present leaves two cases unaccounted for at this observation point. It does not establish where the other cases are or who caused the difference. May be on another trolley is not the same as checked and found.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

unchecked location

Place suggested as holding goods but not yet verified.

IN USE identify the unchecked location

driver statement

Information attributed to the person delivering the goods.

IN USE record the driver statement

receiving lead

Person responsible for coordinating acceptance and receiving records.

IN USE contact the receiving lead

receipt record

Documentation of goods actually received under the relevant process.

IN USE correct the receipt record

acceptance check

Required examination before goods are accepted for the intended use.

IN USE complete acceptance checks

condition check

Review of the physical state of incoming goods.

IN USE perform a condition check

product identifier

Code or description distinguishing the delivered item.

IN USE verify the product identifier

lot code

Identifier linking goods to a production or supply lot.

IN USE retain the lot code

traceability

Ability to follow a product's identity and movement through records.

IN USE preserve traceability

supplier query

Question sent to a supplier about a discrepancy or detail.

IN USE raise a supplier query

credit note

Supplier document reducing an amount owed under an approved adjustment.

IN USE request a credit note

verified receipt

Receiving status supported by actual checks rather than expected paperwork.

IN USE record verified receipt

Precision check

Quantity verification and product acceptance are different checks. Four cases being present does not certify their condition, temperature, specification, or suitability. Follow the actual receiving process and keep any unresolved record or product question visible to the responsible lead.

Phrases you can actually use

C Notice the language / 1 of 2

STATE THE DOCUMENT

"The delivery note lists six cases of tomatoes."

CALCULATE THE DIFFERENCE

"Two listed cases are not accounted for in this area."

PRESERVE THE CHECK STATUS

"That trolley has not been checked yet."

NAME THE OWNER

"Lina needs to resolve the receiving record."

STATE THE OBSERVATION

"I can count four cases here."

ATTRIBUTE THE EXPLANATION

"The driver says they may be on another trolley."

AVOID RECORDING AN ASSUMPTION

"I cannot record six as received from this count."

KEEP THE REPORT NEUTRAL

"I am reporting the difference, not assigning fault."

Lists

Attributes a quantity to a document.

Can count

Identifies the directly observed amount.

May be

Preserves the uncertainty in the driver's statement.

Phrases you can actually use

C Notice the language / 2 of 2

SEPARATE QUANTITY AND CONDITION

"This count does not complete the product acceptance checks."

ASK FOR THE NEXT STEP

"What should happen through our receiving process now?"

DO NOT INVENT A CREDIT

"No supplier credit has been confirmed."

UPDATE ONLY AFTER VERIFICATION

"Change the received quantity when the actual check supports it."

USE A CLEAR COMPARISON

"Six listed; four physically present."

KEEP THE UNITS CONSISTENT

"The quantities are cases, not individual tomatoes."

RETAIN THE PRODUCT IDENTITY

"Keep the tomato product details with the discrepancy."

CLOSE THE REPORT

"The difference is reported, and the additional two cases remain unverified."

Not accounted for here

States the local observation without claiming universal absence.

Through our process

Refers to the actual receiving arrangement rather than an improvised shortcut.

When supported

Makes a record change conditional on verification.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which report is accurate?

- A** Six cases listed, four present; the driver suggests two may be on an unchecked trolley.
- B** Six received, with two still to unload from a verified trolley
- C** Four received; the supplier has confirmed two were not sent
- D** Six expected, four accepted after all condition checks

2. What should not be recorded as established?

- A** The note lists six
- B** The driver has not checked the other trolley
- C** Six cases received
- D** Four cases physically counted

3. Which conclusion exceeds the evidence?

- A** The supplier deliberately shorted the kitchen.
- B** There is a quantity discrepancy to resolve.
- C** Another location needs checking through the process.
- D** The receiving lead owns the record question.

4. What remains separate from the quantity count?

- A** Required product acceptance checks
- B** The arithmetic difference between six and four
- C** The fact that the unit is cases
- D** The driver's attributed statement

Answers and explanations: page 87.

Six listed, four counted

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

acceptance check / product identifier / unchecked location / credit note / receipt record / quantity discrepancy / driver statement / receiving lead / listed quantity / physical count

- 01 **Ben:** Lina, can you review this tomato delivery with me? The note lists six cases, but I can physically count only four in the receiving area.
- 02 **Lina:** Thank you. Keep the ¹ _____ separate from your observed count. Six on the note does not let us record six received without the relevant check.
- 03 **Ben:** The driver says two more may be on another trolley. He has not looked yet, so I have not treated that explanation as a confirmed location.
- 04 **Lina:** That is an attributed ² _____. Record it as a possibility he gave us, not as two additional cases already verified.
- 05 **Ben:** I have counted four cases at the receiving bay. I am comparing cases with cases, not counting the tomatoes inside.
- 06 **Lina:** Good. The ³ _____ should name the product and unit clearly. We need everyone comparing the same thing when they read the record.
- 07 **Ben:** So the difference between the note and what I see is two cases. I should not jump from that difference to a statement about why it happened.
- 08 **Lina:** Correct. It is a ⁴ _____ to resolve through receiving. It could have an explanation, but we do not have that explanation verified yet.
- 09 **Ben:** I have not signed off six as received. I did not want the paperwork to appear complete while the extra two cases were still only a suggestion.
- 10 **Lina:** That protects the ⁵ _____. It needs to reflect what the actual process verifies, not what would make the numbers look tidy.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 19.

- 11 **Ben:** Can we have the driver check that other trolley? I have not seen those two cases yet, so I do not know whether they arrived.
- 12 **Lina:** Yes, the ⁶ _____ needs to be resolved through our process. Do not convert not seen here into a final account of the whole delivery.
- 13 **Ben:** I also have not made any claim about the tomatoes' condition. Counting the cases is not the same as finishing every required receiving check.
- 14 **Lina:** Exactly. The ⁷ _____ is a separate matter. Product identity, condition, and any required controls still need the appropriate actual checks.
- 15 **Ben:** I will keep the tomato details with the discrepancy. Otherwise a later note saying two cases missing could be confused with another delivery.
- 16 **Lina:** Preserve the ⁸ _____ and relevant delivery reference. Accurate context matters as much as the subtraction when another colleague follows it up.
- 17 **Ben:** I will keep the commercial question with you. We have a discrepancy to resolve, not an approved credit to enter.
- 18 **Lina:** Correct. A ⁹ _____ is not established here. First keep the receiving facts accurate and follow the proper route for any later commercial action.
- 19 **Ben:** My handoff is six cases listed, four physically present, and a possible two on an unchecked trolley. You own the record question from here.
- 20 **Lina:** I accept that as ¹⁰ _____. I will coordinate the next checks. The extra two cases remain unverified until the actual result supports an update.

ANSWERS / EXPLANATIONS: PAGE 88

1. listed quantity | 2. driver statement | 3. physical count | 4. quantity discrepancy | 5. receipt record | 6. unchecked location | 7. acceptance check | 8. product identifier | 9. credit note | 10. receiving lead

Report another count difference

F Say it

A delivery note lists eight flour sacks. Six are physically present. The driver suggests two may still be in the vehicle, which has not been checked. Receiving lead Noor accepts the query.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

vehicle / eight / Noor / six

Cook: "The note lists ¹ _____ sacks."

Lead: "The observed count is ² _____."

Cook: "The suggested location is the ³ _____."

Lead: "The receiving owner is ⁴ _____."

ANSWERS / EXPLANATIONS: PAGE 88

1. eight | 2. six | 3. vehicle | 4. Noor

Rehearse with a fixed script

1. Check the answers. Read the receiving exchange, separating six on the note from four physically counted.
2. Switch roles. Attribute the unchecked-trolley explanation to the driver without recording the two cases as received.
3. Complete the flour-sack transfer and check the key. Read the documented count, observed count, suggested location, and receiving lead.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

Three total, not five

A Read the situation

03

Distinguish a replacement ticket from an added order and keep a one-item substitution linked to the current quantity.

Ticket 41 originally requests two tarts. A new slip says "three tarts, revised 41." Cook Imani asks expediter Cole whether the new slip replaces or adds to the old quantity. Cole confirms that it replaces it: the total is three tarts, not five. One of the three has salad instead of potatoes. The conversation does not establish a seat number, cooking completion, or allergy. Imani must retain the one-item substitution, clarify the actual item identification through the ticket process, and prevent both versions from being treated as separate orders.

PEOPLE / Imani: Cook on the tart station | Cole: Expediter

REPEAT THE WHOLE CORRECTED MEANING

A quick yes can confirm the wrong interpretation if two people are looking at different slips. Repeat replaces, the ticket number, the current total, and the affected item. Keep the superseded record traceable through the actual system without treating it as another active order.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What is the current total for ticket 41?

- A Five tarts
- C One tart

- B Two tarts plus three extra
- D Three tarts

2. How many tarts have the side substitution?

- A Five
- C All three

- B One of the three
- D None

3. What does salad replace?

- A The tart itself
- C The ticket number

- B All other guests' mains
- D Potatoes

Answers and explanations: [page 89](#).

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

ticket number

Identifier linking an order and its updates.

IN USE confirm the ticket number

revised ticket

Updated order record changing a previous instruction.

IN USE read the revised ticket

replacement instruction

Direction that supersedes an earlier direction rather than adding to it.

IN USE confirm a replacement instruction

additional order

New quantity added beyond the existing confirmed order.

IN USE distinguish an additional order

current total

Complete quantity now required after applying the confirmed change.

IN USE state the current total

superseded ticket

Earlier record no longer governing the current instruction.

IN USE identify the superseded ticket

amendment

Change to an existing order or document.

IN USE acknowledge the amendment

modifier

Instruction changing a particular item's standard preparation or accompaniment.

IN USE attach the modifier

substitution

Replacement of one component with another.

IN USE confirm the substitution

instead of

Phrase indicating replacement rather than addition.

IN USE serve salad instead of potatoes

extra

Additional quantity beyond what is already included.

IN USE distinguish extra from replacement

all day

Kitchen shorthand for the total quantity outstanding across the stated order scope.

IN USE clarify the all-day count

Precision check

Revised 41 refers to the same ticket, but the meaning of the new quantity still needs confirmation. Here, Cole explicitly says replaces. Three total is not two plus three, and one salad substitution does not apply to all three tarts.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

expediter

Person coordinating order information and dish completion at the pass.

IN USE confirm with the expediter

ticket rail

Place where order slips are held and organized for service.

IN USE organize the ticket rail

duplicate production

Making an order twice because its records or instructions were misread.

IN USE prevent duplicate production

active instruction

Direction currently governing the work.

IN USE identify the active instruction

change acknowledgment

Explicit confirmation that a revision has been received and understood.

IN USE give change acknowledgment

item identification

Details distinguishing the particular dish affected by a request.

IN USE confirm item identification

seat mapping

Link between an ordered item and the guest's place at a table.

IN USE verify seat mapping

side order

Accompanying item ordered alongside a main or other dish.

IN USE clarify the side order

standard accompaniment

Side normally supplied with an item unless modified.

IN USE identify the standard accompaniment

one-item change

Modification affecting one item rather than every item in the order.

IN USE preserve the one-item change

order scope

Set of tickets or items to which a quantity or instruction applies.

IN USE state the order scope

revision trail

Record showing how an instruction changed over time.

IN USE preserve the revision trail

Precision check

Salad instead of potatoes changes the side, not the tart count. Do not invent a seat number or report dishes ready from a quantity correction. Keep the current instruction identifiable and preserve any required revision history through the actual system.

Phrases you can actually use

C Notice the language / 1 of 2

03

IDENTIFY BOTH RECORDS

"I have the original two-tart ticket and the revised slip for three."

CONFIRM REPLACEMENT

"It replaces the old quantity."

REJECT THE WRONG ADDITION

"Not two plus three."

KEEP THE OTHER SIDES UNCHANGED

"The other two keep potatoes."

ASK THE KEY DISTINCTION

"Does the revised quantity replace the old one or add to it?"

GIVE THE TOTAL

"Ticket 41 is three tarts total."

SPECIFY THE MODIFICATION

"One of the three has salad instead of potatoes."

AVOID CHANGING EVERY PLATE

"The salad substitution applies to one item only."

Replace or add

Names the two interpretations that could cause duplicate production.

Three total

States the final quantity explicitly.

One of the three

Limits the modification to a single item.

Phrases you can actually use

C Notice the language / 2 of 2

03

CHECK THE AFFECTED ITEM

"Which guest gets the salad substitution?"

PREVENT TWO ACTIVE ORDERS

"Do not treat the earlier slip as another order to produce."

ACKNOWLEDGE THE CHANGE

"Heard: three total, replacing the earlier two."

CLARIFY THE SCOPE

"I am confirming this ticket, not every tart outstanding across the kitchen."

KEEP THE NUMBER STABLE

"Both slips refer to ticket 41."

PRESERVE THE RECORD

"Keep the revision trail according to our system."

KEEP PRODUCTION STATUS SEPARATE

"This correction does not mean the tarts are already ready."

CLOSE WITH A READ-BACK

"Ticket 41: three total, one salad instead of potatoes, earlier quantity replaced."

Instead of

Means substitution, not both sides automatically.

This ticket

Limits the count to its stated order scope.

Received and understood

Confirms the meaning of the change, not just receipt of paper.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which read-back is correct?

- A** Three extra tarts beyond the original two
- B** Three tarts all with salad and potatoes
- C** Revised ticket 41 replaces two with three total; one has salad instead of potatoes.
- D** Five tarts because both slips count

2. Which interpretation of instead of is correct?

- A** Every ticket in the kitchen changes.
- B** Salad replaces potatoes for the specified tart.
- C** Salad is automatically an extra side for everyone.
- D** The tart itself is canceled.

3. What is not established by the revised ticket?

- A** That the old quantity is replaced
- B** That one tart has the side substitution
- C** That the three tarts are prepared and ready
- D** That the current total is three

4. What should the team avoid doing with the earlier slip?

- A** Preserving its required history
- B** Marking its superseded status through the actual process
- C** Checking that both slips concern ticket 41
- D** Treating it as a second active order

Answers and explanations: [page 89](#).

Three total, not five

E Conversations / turns 1-10

03

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

one-item change / superseded ticket / revision trail / item identification / revised ticket / current total / order scope / duplicate production / change acknowledgment / substitution

- 01 **Imani:** Cole, I have two slips for ticket forty-one. The original says two tarts, and the new one says three tarts, revised forty-one. Can I check the meaning before proceeding?
- 02 **Cole:** Yes. The ¹ _____ replaces the earlier quantity. We need three tarts total for ticket forty-one, not two from one slip and three from another.
- 03 **Imani:** Three altogether, then, not three more. I will not make the five I would get by adding both slips.
- 04 **Cole:** The ² _____ is three. Please read it as a replacement instruction so the earlier two do not remain a separate quantity to make.
- 05 **Imani:** I also see one tart has salad instead of potatoes. That changes one accompaniment, not the number of tarts, correct?
- 06 **Cole:** Correct. It is a ³ _____. One tart has salad; the other two keep the standard potato accompaniment.
- 07 **Imani:** Which item gets the salad? I need the correct reference on the ticket before it goes to the pass.
- 08 **Cole:** Good. The ⁴ _____ still needs to be clear through our ticket process. A correct quantity does not help if the side reaches the wrong diner.
- 09 **Imani:** The phrase instead of matters here. It does not mean I should put both salad and potatoes on the modified plate.
- 10 **Cole:** Exactly. The ⁵ _____ replaces potatoes on that item. Do not expand it into an extra side for every guest or cancel the tart itself.

The conversation, continued

E Conversations / turns 11-20

03

Continue with the word bank on page 28.

- 11 **Imani:** How do we mark the old slip in this system? I do not want another cook picking it up as a fresh order.
- 12 **Cole:** Handle it as the ⁶ _____ through our actual system. Preserve the required history while making the current instruction unmistakable.
- 13 **Imani:** I will not add the two and three together. We should also keep the ticket number visible so this change is not applied to a different table.
- 14 **Cole:** Yes. The ⁷ _____ is ticket forty-one. We are not giving an all-day count for every tart outstanding across the kitchen.
- 15 **Imani:** If someone asks for the all-day count, I will check the other live tickets too. These three belong to forty-one only.
- 16 **Cole:** Right. State the scope whenever it could be unclear. Our aim here is to prevent ⁸ _____ from the two versions, not to change any other confirmed order.
- 17 **Imani:** My repeat is forty-one, three tarts total, one with salad instead of potatoes, and the earlier quantity replaced. I will confirm the affected item's identification through the system.
- 18 **Cole:** That is the ⁹ _____ I need. You have the new total and the limited substitution, without adding an invented seat number.
- 19 **Imani:** I will update the working instruction accordingly. I am not calling the ticket ready; this conversation has clarified what we need to prepare.
- 20 **Cole:** Correct. Keep the ¹⁰ _____ clear, and report production progress separately. Three required does not mean three cooked, plated, or released from the pass.

ANSWERS / EXPLANATIONS: PAGE 90

1. revised ticket | 2. current total | 3. one-item change | 4. item identification | 5. substitution | 6. superseded ticket | 7. order scope | 8. duplicate production | 9. change acknowledgment | 10. revision trail

Replace a different quantity

F Say it

Ticket 52 originally lists four pies. A revised slip lists six, and the expeditor confirms replacement, not addition. One pie has peas instead of carrots. No seat number or readiness is supplied.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

replaced / six / established / peas

Cook: "The current total is ¹ _____ pies."

Expediter: "The old quantity is ² _____."

Cook: "One pie has ³ _____ instead of carrots."

Expediter: "Readiness is not ⁴ _____."

ANSWERS / EXPLANATIONS: PAGE 90

1. six | 2. replaced | 3. peas | 4. established

Rehearse with a fixed script

1. Check the answers, then read the revised-ticket conversation. Stress three total, not three extra.
2. Switch roles. Repeat ticket 41's one-item salad substitution, keeping the other two accompaniments unchanged.
3. Complete the pie transfer and check its key. Read six total with one peas substitution; do not announce the pies ready.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

Two plated, two still cooking

A Read the situation

04

Answer a whole-ticket readiness question with a precise split of completed work, remaining work, and estimated timing.

Ticket 28 contains four mains. Two are plated, and two are still at cook Rosa's station. Rosa estimates four more minutes for the remaining pair. Expediter Jules asks whether the whole table is ready. Rosa must report partial progress and the current estimate without calling all four ready, guaranteeing pickup in exactly four minutes, or inventing a dispatch decision. Plating alone does not establish that all relevant food checks have been completed. Actual holding, quality, and release arrangements remain governed by the kitchen process, not by this language exercise.

PEOPLE / Jules: Expediter coordinating the pass | Rosa: Cook completing ticket 28

ANSWER THE SCOPE OF THE QUESTION

An expeditor may need a table-level answer while a cook is focused on one station. Start with not the whole ticket yet, then give the exact split. Clear partial progress is more useful than either a vague yes or a vague not ready.

Briefing checks

Circle one answer in each item. Use the briefing.

1. How many mains are on ticket 28?

A Two total

B Six

C An unspecified number

D Four

2. How many are plated?

A None

B Four plus another pair

C Two

D All four

3. What is Rosa's estimate for the remaining pair?

A Four more minutes

B Guaranteed pickup now

C Four minutes already elapsed as the estimate

D A completed dispatch

Answers and explanations: page 91.

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

pass

Area where dishes are checked and handed from kitchen to service staff.

IN USE coordinate the pass

ticket readiness

Status of the complete order against the required ready-to-serve conditions.

IN USE confirm ticket readiness

plated

Arranged on a plate, without alone certifying every readiness check.

IN USE report two plated

cook station

Assigned kitchen work area responsible for particular preparation tasks.

IN USE check the cook station

remaining pair

Two items still outstanding within the stated group.

IN USE finish the remaining pair

partial progress

Work completed for some but not all of the required scope.

IN USE report partial progress

whole-table call

Status message referring to every relevant dish for a table.

IN USE make a whole-table call

pickup

Collection of dishes from the kitchen for service under the actual arrangement.

IN USE confirm pickup

dispatch

Release or movement of prepared dishes toward service.

IN USE coordinate dispatch

runner

Colleague taking dishes from the pass to the dining area.

IN USE brief the runner

plating sequence

Order in which dishes are assembled on plates.

IN USE coordinate the plating sequence

finishing step

Final preparation action before the next required stage.

IN USE complete the finishing step

Precision check

Two plated describes partial progress. Four more minutes describes an estimate for the remaining pair. Neither statement alone makes the full ticket ready to run. Keep quantity, location, stage, and timing together.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

garnish

Food element used to finish or accompany a dish.

IN USE check the garnish

quality check

Review against the relevant dish and service requirements.

IN USE complete the quality check

holding arrangement

Approved method and conditions for keeping food before the next stage.

IN USE follow the holding arrangement

readiness estimate

Approximate expectation for reaching a specified ready stage.

IN USE communicate the readiness estimate

remaining work

Tasks still needed before the defined completion point.

IN USE identify the remaining work

coordination point

Event or location where different stations align their work.

IN USE agree the coordination point

synchronized service

Planned delivery of related dishes together or in an agreed sequence.

IN USE coordinate synchronized service

release decision

Authorization or instruction to send dishes from the relevant stage.

IN USE confirm the release decision

status call

Brief spoken report of progress or readiness.

IN USE give a status call

update trigger

Change or condition prompting a fresh status message.

IN USE identify an update trigger

ready-to-run

Local service status indicating dishes can be collected under the actual process.

IN USE confirm ready-to-run status

full ticket

Entire order rather than one completed component.

IN USE check the full ticket

Precision check

Do not infer food safety or quality from the word plated. Actual holding limits, checks, and release decisions must follow the real kitchen process. If the estimate changes, update the expeditor rather than allow an earlier approximate time to become a false promise.

Phrases you can actually use

C Notice the language / 1 of 2

ANSWER THE WHOLE-TICKET QUESTION

"Not the whole ticket yet."

STATE COMPLETED PROGRESS

"Two are plated."

GIVE THE ESTIMATE

"I estimate four more minutes for the remaining pair."

AVOID A PREMATURE CALL

"I am not calling all four ready."

GIVE THE TOTAL

"Ticket 28 has four mains."

LOCATE THE REMAINDER

"The other two are still at my station."

KEEP THE SCOPE CLEAR

"That estimate is for the two outstanding mains."

SEPARATE PLATING AND RELEASE

"Plated does not mean the full release check is complete."

Not the whole ticket

Corrects the scope immediately.

Two are, two are

Makes the split easy to hear during a busy service.

Still at my station

Gives a concrete location and incomplete stage.

Phrases you can actually use

C Notice the language / 2 of 2

COORDINATE HOLDING PROPERLY

"We need to follow our actual holding and quality arrangements."

MAKE A USEFUL REPEAT

"Four total, two plated, two pending, around four more minutes."

KEEP THE RUNNER INFORMED

"The runner needs the actual ready-to-run status."

CONFIRM THE NEXT STAGE

"Let us verify the full ticket before the release call."

AVOID AN INVENTED DISPATCH

"I have not called that ticket for pickup yet."

UPDATE A CHANGE

"I will call you if that estimate changes."

DO NOT BLUR THE COUNT

"Two at the pass is not four ready for the table."

CLOSE ACCURATELY

"The table is partially prepared, not yet confirmed ready as a whole."

I estimate

Identifies the speaker's forecast rather than a guaranteed time.

For the remaining pair

Limits the timing claim to the unfinished items.

If that changes

Creates an expectation of updated information.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which status call answers Jules accurately?

- A** Two mains total, all complete
- B** Ticket 28: four total, two plated, two at the station, estimated four more minutes for the pair.
- C** All four ready now
- D** Nothing has been done

2. What does plated establish by itself?

- A** A preparation stage, not completion of every food and release check
- B** Completion of the final check for the whole ticket
- C** The runner's acceptance of all four dishes
- D** Permission to hold the dishes for any length of time

3. Which time statement overclaims?

- A** The entire table will definitely be delivered in exactly four minutes.
- B** Rosa estimates four more minutes for the pair.
- C** The estimate may need updating.
- D** Pickup still needs the actual process.

4. What should happen if the estimate changes?

- A** Pretend the dishes were already dispatched.
- B** Change the ticket total without instruction.
- C** Tell the expeditor the revised status.
- D** Keep repeating the old time as certain.

Answers and explanations: [page 91](#).

Two plated, two still cooking

E Conversations / turns 1-10

04

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

release decision / full ticket / Ready-to-run / status call / readiness estimate / remaining pair / holding arrangement / Synchronized service / partial progress / update trigger

- 01 **Jules:** Rosa, twenty-eight: can I call the runner? I have four mains on the ticket but can only see two plates at the pass.
- 02 **Rosa:** Not yet. It is ¹ _____: two plated, two still at my station. Keep the full ticket open.
- 03 **Jules:** What is the wait on the other two? I need a clear update for the server, not a guess from looking at the plates.
- 04 **Rosa:** The ² _____ needs about four more minutes. I will call if that changes.
- 05 **Jules:** Four more from now, understood. That is preparation time for those two, not a promise that the runner will be at the table then.
- 06 **Rosa:** Correct. That is my ³ _____, not a finished call. I am still working on the pair.
- 07 **Jules:** I will tell the server: four ordered, two plated, two still coming. I will not say the whole table is ready.
- 08 **Rosa:** Yes, keep the ⁴ _____ in view. My station update covers only part of it.
- 09 **Jules:** The plated dishes need attention while we coordinate the rest. We cannot just leave them here indefinitely because a time was mentioned.
- 10 **Rosa:** Follow the agreed ⁵ _____ and checks. Tell me promptly if the timing creates a problem for those dishes.

The conversation, continued

E Conversations / turns 11-20

04

Continue with the word bank on page 37.

- 11 **Jules:** I have not sent either plate. Are you calling for pickup now, or are we still coordinating?
- 12 **Rosa:** Still coordinating. No ⁶ _____ has been confirmed. I am not telling the runner to take the pair.
- 13 **Jules:** Understood. I need the dishes brought together through our service plan, with the relevant checks, not a stream of unrelated plates.
- 14 **Rosa:** ⁷ _____ is what we are coordinating. I will keep you informed about the two at my station.
- 15 **Jules:** When they are plated, say that first. Then we can verify the whole ticket before anyone gives the ready-to-run call.
- 16 **Rosa:** I will make the ⁸ _____ specific. Two more plated is a different message from four checked and ready.
- 17 **Jules:** And if four minutes slips, call it straight away. I would rather update the server than leave them repeating an old time.
- 18 **Rosa:** That is the ⁹ _____: a change to timing or readiness. I will not wait for you to chase.
- 19 **Jules:** My read-back: twenty-eight, four mains total, two plated, two at your station, around four more minutes for the pair. No pickup call yet.
- 20 **Rosa:** Correct. ¹⁰ _____ is not confirmed for all four. I will give you the next actual change while we follow the kitchen's checks.

ANSWERS / EXPLANATIONS: PAGE 92

1. partial progress | 2. remaining pair | 3. readiness estimate | 4. full ticket | 5. holding arrangement | 6. release decision | 7. Synchronized service | 8. status call | 9. update trigger | 10. Ready-to-run

Report a six-main ticket

F Say it

Ticket 63 has six mains. Four are plated, and two remain at the station. The cook estimates three more minutes for that pair. No whole-ticket release is confirmed.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

confirmed / four / three / six

Cook: "The ticket total is ¹ _____ mains."

Expediter: "The plated count is ² _____."

Cook: "The remaining pair needs an estimated ³ _____ more minutes."

Expediter: "Whole-ticket release is not ⁴ _____."

ANSWERS / EXPLANATIONS: PAGE 92

1. six | 2. four | 3. three | 4. confirmed

Rehearse with a fixed script

1. Check the answers. Read the pass exchange, using a short pause between the total, plated count, and remaining pair.
2. Switch roles. Give the last read-back without converting a four-minute estimate into a pickup promise.
3. Complete and check the six-main transfer. Say four plated and two remaining, with three more minutes estimated for the pair.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

Five sides, three portions left

A Read the situation

Quantify a shortfall, present a proposed alternative, and assign responsibility for obtaining the diners' decision.

05

Three portions of potatoes remain unallocated when a new ticket requests five potato sides. Rice is available as a proposed alternative for two diners, but they have not agreed to it. Cook Dario explains the shortage to server Mei, who can ask the diners and return with their decision. Dario cannot silently substitute rice or describe the whole ticket as ready. The case supplies no additional potato stock, replenishment time, price difference, or dietary suitability assessment for rice. The team must keep the two-portion gap and pending choice visible.

PEOPLE / Dario: Cook managing the side station | Mei: Server handling the affected ticket

AN ALTERNATIVE IS AN OFFER UNTIL ACCEPTED

Kitchen availability and guest preference are different parts of the decision. State the shortage early and give the server a clear option to discuss. A convenient alternative should not become a silent substitution, especially when price or dietary questions still require checking.

Briefing checks

Circle one answer in each item. Use the briefing.

1. How many potato portions remain unallocated?

A None

B Three

C Five

D Two

2. What is the shortfall against five requested portions?

A Five portions

B Eight portions

C Two portions

D Three portions

3. Who can obtain the diners' decision about rice?

A No one because availability equals acceptance

B Mei, the server

C Dario by silently changing plates

D A diner who has not been asked

Answers and explanations: [page 93](#).

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

available stock

Quantity presently available under the actual stock and use conditions.

IN USE confirm available stock

unallocated portion

Prepared or available portion not yet assigned to a specific order.

IN USE count unallocated portions

allocation

Assignment of stock to a particular order or purpose.

IN USE confirm the allocation

committed stock

Quantity already assigned to existing requirements.

IN USE protect committed stock

shortfall

Amount by which supply is less than the stated requirement.

IN USE quantify the shortfall

as-purchased weight

Ingredient weight in its purchased form before the specified trimming or preparation, often abbreviated AP weight.

IN USE record the as-purchased weight

portion count

Number of defined servings available or required.

IN USE update the portion count

par level

Target stock quantity used for planning under the establishment's system.

IN USE review the par level

replenishment

Addition of stock to restore availability.

IN USE confirm replenishment

stockout

Situation in which an item is unavailable for the relevant demand.

IN USE report a stockout

eighty-six

Restaurant shorthand indicating an item is unavailable or should no longer be sold in the stated scope.

IN USE communicate an eighty-six call

availability board

Shared record of current menu or ingredient availability.

IN USE update the availability board

Precision check

The shortfall is two portions, not a complete absence of potatoes. Rice being available does not prove that two diners want it. Do not reduce portion sizes, borrow committed stock, or change prices without the actual authorized process.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

alternative side

Different accompaniment offered in place of the requested side.

IN USE propose an alternative side

starch

Menu category including foods such as potatoes, rice, or pasta, without implying equivalence.

IN USE compare the starch options

proposed substitution

Suggested replacement that has not yet been agreed.

IN USE label the proposed substitution

accepted substitution

Replacement explicitly agreed through the appropriate process.

IN USE record the accepted substitution

guest decision

Diner's choice after the relevant option and conditions are explained.

IN USE obtain the guest decision

order hold

Pause while an unresolved order detail is clarified.

IN USE maintain the order hold

yield percentage

Usable output divided by input quantity, multiplied by 100, for a defined preparation stage.

IN USE calculate the yield percentage

reallocation

Change in which order receives a quantity of stock.

IN USE authorize reallocation

yield variance

Difference between expected and actual usable output.

IN USE investigate a yield variance

edible portion

Usable quantity after the specified preparation or trimming stage, often abbreviated EP.

IN USE calculate the edible portion

portion control

Consistent serving amounts under the applicable recipe and service specification.

IN USE maintain portion control

return message

Information brought back after a query or request is answered.

IN USE request a return message

Precision check

One starch is not automatically equivalent to another for preference, ingredients, or dietary requirements. The server should communicate the option accurately and verify any relevant unanswered question. No replenishment time or price consequence is established by this case.

Phrases you can actually use

C Notice the language / 1 of 2

STATE THE AVAILABLE COUNT

"Three potato portions remain unallocated."

QUANTIFY THE GAP

"We are two portions short."

PRESERVE THE DECISION

"The two diners have not accepted it yet."

ACCEPT OWNERSHIP

"I will ask them and return with the decision."

STATE THE DEMAND

"The new ticket requests five."

OFFER THE ACTUAL ALTERNATIVE

"Rice is available as a proposed alternative side."

ASSIGN THE QUESTION

"Mei, can you ask the diners and bring back their choice?"

AVOID A SILENT CHANGE

"Do not substitute rice before the choice is confirmed."

Unallocated

Distinguishes free stock from portions already promised elsewhere.

Short

States a numerical gap rather than blaming the preparation team.

Proposed

Keeps the alternative from sounding agreed.

Phrases you can actually use

C Notice the language / 2 of 2

KEEP THE REMAINING POTATOES CLEAR

"The three available portions do not cover all five requests."

DO NOT IMPLY PRICE EQUALITY

"Check the price before offering it as a like-for-like change."

RETAIN THE UNRESOLVED ITEM

"The two-side decision remains open."

ASK FOR A PRECISE RETURN

"Tell me which diners accept which side."

AVOID INVENTED REPLENISHMENT

"We have no confirmed time for more potatoes."

KEEP DIETARY QUESTIONS SEPARATE

"Rice availability is not a dietary-suitability confirmation."

DO NOT DISTORT PORTIONS

"A shortage does not authorize smaller portions without approval."

CLOSE THE HANDOFF

"Three potato portions available, two choices pending, Mei obtaining the decision."

Bring back

Makes the communication loop explicit.

Which diners

Prevents a correct replacement from reaching the wrong person.

No confirmed time

Avoids a replenishment promise unsupported by the case.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which shortage report is accurate?

- A** No potatoes exist anywhere.
- B** Five portions are available.
- C** Eight more portions are needed.
- D** Five requested, three unallocated potato portions, two short.

2. When may rice be described as accepted?

- A** Whenever potatoes are short
- B** After the relevant diners' choice is actually confirmed
- C** As soon as the kitchen says rice exists
- D** Before Mei speaks to anyone

3. Which handoff closes the communication loop?

- A** Someone should probably mention it.
- B** Dario will assume both diners agree.
- C** The ticket is automatically complete.
- D** Mei will ask the diners and return with their choices.

4. What is not supported by the case?

- A** Two potato portions are missing against demand.
- B** The server needs the diners' decision.
- C** Rice has the same price and is suitable for every dietary need.
- D** Rice is available as an option.

Answers and explanations: [page 93](#).

Five sides, three portions left

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

proposed substitution / return message / accepted substitution / alternative side / replenishment / order hold / guest decision / shortfall / unallocated portion / portion control

- 01 **Dario:** Mei, I need to flag the side count before this new ticket moves on. It requests five potato portions, and we have only three left unallocated.
- 02 **Mei:** So the ¹ _____ is two portions. I should not tell the table that potatoes are completely gone, but we cannot cover all five requests.
- 03 **Dario:** Correct. Rice is available as an option for the other two sides, but nobody has asked the diners whether they want that change.
- 04 **Mei:** I will present it as a ² _____, not as something the kitchen has already decided for them. I need to return with their actual choices.
- 05 **Dario:** Those three portions are free for this ticket. I have already separated them from stock committed to other orders.
- 06 **Mei:** That makes the ³ _____ count clear. We have three available for allocation, not five available and not three already committed to another table.
- 07 **Dario:** Exactly. I also have no confirmed time for more potatoes. Please do not tell the guests another batch will be ready shortly unless that is actually checked.
- 08 **Mei:** I will not promise ⁴ _____ that has not been confirmed. My message will be the current count and the rice option, with the choice still open.
- 09 **Dario:** Mei, can you ask the table and bring the answer straight back? Please tell me exactly which two guests agree to rice.
- 10 **Mei:** Yes. I will obtain the ⁵ _____ and return to you. I will identify the affected diners so a confirmed alternative is not attached to the wrong plate.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 46.

05

- 11 **Dario:** Good. Until then, I will not put rice on two plates and hope that saves time. The availability of an ingredient is not agreement to change the order.
- 12 **Mei:** Agreed. The ⁶ _____ on that unresolved detail stays clear. We have an option to discuss, not a completed replacement instruction.
- 13 **Dario:** If they ask whether the price changes, I do not have that answer from the information we have. That needs the actual authorized pricing response.
- 14 **Mei:** I will separate that from the ⁷ _____ itself. I also will not claim it meets a dietary requirement without the appropriate ingredient and preparation checks.
- 15 **Dario:** We also cannot make five by quietly shrinking the three portions. The serving specification has not changed.
- 16 **Mei:** The shortage does not change ⁸ _____. I will explain the real option rather than hide the difference in the amount served.
- 17 **Dario:** If they accept rice, please bring back which two diners agreed. If they do not, tell me that too so we can use the proper next step.
- 18 **Mei:** I will make the ⁹ _____ specific. Silence or the fact that I walked to the table will not count as acceptance.
- 19 **Dario:** Then we are aligned: five requested, three potato portions available, two pending choices, and you are asking about rice. The ticket is not complete yet.
- 20 **Mei:** Correct. An ¹⁰ _____ will be recorded only after the relevant decision. I am taking the question now and will return with the answer.

ANSWERS / EXPLANATIONS: PAGE 94

1. shortfall | 2. proposed substitution | 3. unallocated portion | 4. replenishment | 5. guest decision | 6. order hold | 7. alternative side | 8. portion control | 9. return message | 10. accepted substitution

Offer a different available side

F Say it

A ticket requests seven portions of couscous, but five remain unallocated. Roasted carrots are available as a proposed alternative. Server Noor will ask the two affected diners. No acceptance or price decision is supplied.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

carrots / two / Noor / accepted

Cook: "The shortfall is ¹ _____ portions."

Server: "The proposed alternative is roasted ² _____."

Cook: "The server obtaining the choice is ³ _____."

Server: "The substitution is not yet ⁴ _____."

ANSWERS / EXPLANATIONS: PAGE 94

1. two | 2. carrots | 3. Noor | 4. accepted

Rehearse with a fixed script

1. Check the answers. Read the shortage exchange and stress five requested, three available, two short.
2. Switch roles. Keep rice as an offer until Mei reports the affected diners' actual decisions.
3. Complete and check the couscous transfer. Read the carrot proposal without inventing acceptance, a price, or dietary suitability.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

No cheese is not the full question

A Read the situation

Upgrade a simple omission request to an accurately communicated allergy review without inventing ingredient or handling assurances.

Ticket 17 says "no cheese." Server Arun then reports that the diner has a milk allergy. Cook Tessa has not checked the sauce specification and cannot confirm the dish's suitability. Lead Noor is available to review the question with the server. Tessa must preserve both the requested cheese omission and the newly reported milk allergy, keep the sauce and preparation questions open, and route them through the actual allergy process. No ingredient finding, accepted alternative, food exposure, or reaction is supplied. The exchange is a pre-service clarification, not a clinical assessment.

PEOPLE / Arun: Server carrying the allergy report | Tessa: Cook receiving the updated ticket information

06

NEW INFORMATION CAN CHANGE THE QUESTION

No cheese may begin as an omission instruction, but a later allergy report requires clear communication of the allergen and the relevant review. Do not criticize the timing of the disclosure or reduce the new information back to a preference. Keep the guest informed without promising suitability.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What additional information does Arun report?

- A A safe replacement has been accepted.
- B The diner has had a reaction in this case.
- C The diner has a milk allergy.
- D The sauce has already been verified.

2. Which specification remains unchecked?

- A A completed payment record
- B The ticket number itself
- C The sauce specification
- D The confirmed replacement dish recipe

3. Who is available to review the question?

- A No responsible person
- B Lead Noor with the server
- C Only an unidentified person next month
- D Another guest making a guess

Answers and explanations: [page 95](#).

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

omission request

Instruction to leave out a named component.

IN USE record the omission request

reported allergy

Allergy information attributed to the diner or relaying colleague.

IN USE communicate the reported allergy

milk protein

Protein originating from milk that matters in milk-allergy assessment.

IN USE identify milk protein

casein

Group of proteins found in milk and used in some food ingredients.

IN USE recognize casein as milk-derived

whey protein

Milk-derived protein associated with the liquid separated during cheesemaking.

IN USE identify whey protein

compound ingredient

Ingredient made from multiple components that may need separate checking.

IN USE examine a compound ingredient

sauce specification

Documented information describing the actual sauce product or recipe.

IN USE verify the sauce specification

ingredient declaration

Statement identifying ingredients in a food product.

IN USE review the ingredient declaration

allergen source

Food source associated with a relevant allergenic protein.

IN USE identify the allergen source

contains statement

Label statement identifying major food allergens intentionally present under the relevant labeling rules.

IN USE read the contains statement

advisory statement

Warning such as may contain that requires appropriate interpretation, not a guarantee from its absence.

IN USE interpret an advisory statement

recipe verification

Check that the relevant current recipe and ingredients are correctly identified.

IN USE complete recipe verification

Precision check

Leaving off cheese answers a topping instruction, not the whole milk-allergy question. The sauce, other components, and preparation conditions require appropriate verification. Casein and whey are examples of milk-derived proteins; do not rely only on the everyday word milk appearing in a dish name.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

cross-contact

Unintended transfer or introduction of an allergen into another food.

IN USE address cross-contact

shared utensil

Tool used across foods that may create a relevant handling question.

IN USE check shared-utensil use

preparation control

Required measure governing how food is prepared under the actual safety system.

IN USE follow preparation controls

allergen flag

Clear marker carrying the reported allergen with the relevant order.

IN USE preserve the allergen flag

ticket update

Change adding or correcting information on the order record.

IN USE communicate the ticket update

dish suitability

Whether the complete dish and preparation can meet the relevant verified requirement.

IN USE assess dish suitability

unverified component

Part of a dish whose relevant information has not been checked.

IN USE identify an unverified component

ingredient finding

Result actually established by checking a relevant ingredient source.

IN USE report an ingredient finding

safety assurance

Statement that a specified safety condition is met, requiring adequate evidence and authority.

IN USE avoid an unsupported safety assurance

pre-service review

Check performed before the relevant food is served.

IN USE request a pre-service review

review owner

Person responsible for coordinating the unresolved question.

IN USE identify the review owner

guest update

Accurate message to the diner about the query and its actual status.

IN USE provide a guest update

Precision check

No sauce result is supplied. Do not change unchecked into contains milk or milk-free. An absent advisory statement is not a universal absence guarantee. Use the actual current product information and allergy process, and communicate what remains unresolved.

Phrases you can actually use

C Notice the language / 1 of 2

RECEIVE THE UPDATE

"Thank you; I have heard that the diner reports a milk allergy."

EXPAND THE QUESTION ACCURATELY

"Leaving off cheese does not confirm the whole dish."

AVOID A GUESSED INGREDIENT

"I cannot say whether this sauce contains milk from the information available."

PRESERVE THE ALLERGY MARKER

"Keep milk allergy clearly linked to the ticket."

KEEP THE OMISSION

"The no-cheese request still belongs to ticket 17."

NAME THE UNCHECKED COMPONENT

"The sauce specification has not been checked."

NAME THE REVIEW OWNER

"Noor can review the question with you."

ASK ABOUT THE ACTUAL RECIPE

"We need the current sauce recipe or product information."

06

Still belongs

Preserves the original omission alongside new information.

Does not confirm

Rejects an unjustified leap from one modification to whole-dish suitability.

Has not been checked

Marks an information gap, not a positive or negative finding.

Phrases you can actually use

C Notice the language / 2 of 2

INCLUDE PREPARATION

"The relevant cross-contact and handling questions also need review."

KEEP THE GUEST INFORMED

"Tell the diner the question is being checked, not already resolved."

SEPARATE RECEIPT AND RESULT

"Receiving the allergy report is not completing the review."

PRESERVE THE SOURCE

"Arun reports the diner's milk allergy."

AVOID A FALSE SAFETY CLAIM

"I cannot confirm suitability yet."

DO NOT INVENT AN ALTERNATIVE

"Any replacement needs its own appropriate checks and the guest's choice."

AVOID BLAMING THE DISCLOSURE

"Let us handle the updated information clearly now."

CLOSE THE HANDOFF

"Ticket 17, no cheese, milk allergy reported, sauce unchecked, Noor available to review."

06

Current

Keeps the review tied to the actual recipe or product.

Also

Includes preparation questions beyond ingredients alone.

Not already resolved

Prevents a progress update from becoming reassurance.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which statement correctly handles the new report?

- A** Replace milk with an unspecified preference.
- B** Keep no cheese and add the reported milk allergy for the appropriate review.
- C** No cheese proves the dish is suitable.
- D** Ignore the allergy because the first ticket was shorter.

2. What does unchecked sauce mean?

- A** The sauce is certified milk-free.
- B** The sauce can be served without further process.
- C** No relevant ingredient conclusion is established yet.
- D** The sauce definitely contains milk.

3. Which statement about casein and whey is correct?

- A** They are removed from every sauce when the cheese topping is omitted.
- B** They are advisory label phrases rather than ingredients.
- C** They are examples of milk-derived proteins relevant to ingredient checking.
- D** They are forms of milk sugar, so only lactose intolerance is relevant.

4. Which guest update is accurate?

- A** All checks are complete because the cook heard the report.
- B** A substitute has been accepted without asking.
- C** The diner had a reaction despite no such report.
- D** The milk-allergy question is under review; suitability is not confirmed yet.

Answers and explanations: [page 95](#).

No cheese is not the full question

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

Recipe verification / omission request / dish suitability / Cross-contact / sauce specification / allergen flag / guest update / compound ingredient / review owner / unverified component

06

- 01 **Arun:** Tessa, stop on seventeen for an allergy update. The guest now reports a milk allergy. The ticket only says no cheese, so that note is not enough.
- 02 **Tessa:** Thank you. I will keep the ¹ _____ and the allergy information together. Leaving off the cheese does not confirm that the complete dish is suitable.
- 03 **Arun:** I have not told the diner it is suitable. I said I would bring the information to the kitchen and return with an accurate answer.
- 04 **Tessa:** Good. The ² _____ has not been checked. We cannot answer the sauce question from the topping instruction alone.
- 05 **Arun:** Noor is available to review it with me. I can make sure the lead has the ticket number, the cheese omission, and the milk allergy exactly as reported.
- 06 **Tessa:** Please do. Keep the ³ _____ clear on ticket seventeen through our actual process. The new information should not disappear into a vague special-request note.
- 07 **Arun:** For my next update, the sauce is still unchecked, right? I should not tell the guest it contains milk or that it is suitable.
- 08 **Tessa:** Say it is an ⁴ _____. We have no verified ingredient finding here. Do not turn unknown into definitely contains milk or definitely suitable.
- 09 **Arun:** We will need the actual current sauce information, not a memory of a recipe that may have been used on another service.
- 10 **Tessa:** Exactly. ⁵ _____ must match what is being prepared. If it is a supplied product, the current product information matters as well.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 55.

- 11 **Arun:** I will check the full ingredient information, including the sauce components. Its name alone does not tell us what went into it.
- 12 **Tessa:** Yes. A ⁶ _____ can have components that need review. Casein and whey are milk-derived proteins; the familiar dish name is not a complete ingredient answer.
- 13 **Arun:** I will also ask Noor about the preparation arrangements. A suitable ingredient list would not by itself answer every question about handling.
- 14 **Tessa:** Correct. ⁷ _____ needs the appropriate process too. We should not present one completed ingredient check as proof that every relevant preparation question is settled.
- 15 **Arun:** I will tell the diner that Noor is reviewing the question with us. I will not say the review is complete simply because you have received the update.
- 16 **Tessa:** That is an accurate ⁸ _____. Keep the uncertainty visible, and do not propose an unverified replacement as automatically safe.
- 17 **Arun:** If the guest wants a different dish, I will bring back that exact option. We still need to check it before promising anything.
- 18 **Tessa:** Good. Any ⁹ _____ conclusion must concern the actual dish and preparation. We do not have an accepted alternative or a verified outcome in this conversation.
- 19 **Arun:** My handoff to Noor is ticket seventeen, no cheese, milk allergy reported, sauce unchecked. I will ask for the actual review and report back.
- 20 **Tessa:** Yes. Noor is the ¹⁰ _____ available for that next step. Keep the food and message within our real allergy procedure until the relevant questions are properly resolved.

06

ANSWERS / EXPLANATIONS: PAGE 96

1. omission request | 2. sauce specification | 3. allergen flag | 4. unverified component | 5. Recipe verification | 6. compound ingredient | 7. Cross-contact | 8. guest update | 9. dish suitability | 10. review owner

Expand a different omission request

F Say it

Ticket 35 says no peanuts on top. The server then reports a peanut allergy. The dressing specification is unchecked. Lead Maya is available to review the question. No suitability result is supplied.

Complete the four gaps. Use each bank entry once.

06

WORD + PHRASE BANK

Maya / confirmed / peanut / dressing

Server: "The reported allergen is ¹ _____."

Cook: "The unchecked component is the ² _____."

Server: "The available review lead is ³ _____."

Cook: "Suitability is not yet ⁴ _____."

ANSWERS / EXPLANATIONS: PAGE 96

1. peanut | 2. dressing | 3. Maya | 4. confirmed

Rehearse with a fixed script

1. Check the answers. Read the allergy update, preserving ticket 17, no cheese, and the reported milk allergy.
2. Switch roles. Clearly distinguish an unchecked sauce from a verified milk finding and a completed whole-dish review.
3. Complete and check the peanut-dressing transfer. Read Maya's role and the unresolved suitability accurately.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

Scale B keeps going blank

A Read the situation

Report an observable equipment problem, identify the affected work, and request review and a verified alternative.

At the pastry prep bench, scale B repeatedly shows a blank display. Cook Nia has stopped using it. No cause, repair, or measurement error has been established. Lead Omar needs to arrange the appropriate review and confirm whether scale A is available and suitable for the task. Nia should name the equipment and location, describe the observed display behavior, and keep both review and alternative status clear. The case supplies no permission to repair scale B, no proof that previous batches are defective, and no confirmed time for returning it to use.

PEOPLE / Nia: Cook at the pastry prep bench | Omar: Kitchen lead receiving the equipment report

07

DESCRIBE THE SYMPTOM BEFORE THE CAUSE

A useful fault report identifies the equipment, location, observed behavior, and work already stopped. Avoid presenting a guess as a diagnosis. Ask for the specific support needed so the lead can route the problem and assess an alternative through the actual procedure.

Briefing checks

Circle one answer in each item. Use the briefing.

1. Which equipment is affected?

- A Scale A confirmed faulty
- C An unidentified dishwasher

- B Every oven
- D Scale B at the pastry prep bench

2. What has Nia observed?

- A A completed repair
- C The display repeatedly goes blank.

- B A measured error in every previous batch
- D A confirmed internal electrical cause

3. What is still needed about scale A?

- A Confirmation that it is available and suitable for the task
- C Permission to dismantle scale B

- B An assumption that it is already allocated to Nia
- D A guarantee of identical performance

Answers and explanations: [page 97](#).

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

equipment identifier

Name or code distinguishing a particular piece of equipment.

IN USE state the equipment identifier

asset tag

Label used to identify equipment within an organization's records.

IN USE check the asset tag

fault report

Account of an equipment problem and its relevant context.

IN USE submit a fault report

display

Screen or indicator presenting a device's readings or status.

IN USE describe the blank display

intermittent fault

Problem that appears repeatedly but not necessarily continuously.

IN USE report an intermittent fault

observed symptom

Behavior directly noticed before its cause is established.

IN USE state the observed symptom

diagnosis

Established explanation of a fault after appropriate assessment.

IN USE avoid an unsupported diagnosis

out-of-use status

State indicating equipment has been removed from use under the relevant process.

IN USE communicate out-of-use status

pastry bench

Work surface or station used for pastry preparation.

IN USE identify the pastry bench

weighing task

Work requiring measurement of ingredient mass.

IN USE pause the weighing task

measurement result

Value produced by a measurement process.

IN USE verify the measurement result

measurement uncertainty

Quantified spread associated with a measurement result, not a known measurement error.

IN USE report measurement uncertainty

Precision check

The display keeps going blank is an observation. The power supply has failed is a cause claim not supplied by this case. Describe the symptom without opening, adjusting, or repairing equipment outside the actual authorized process.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

resolution

Smallest displayed or distinguishable increment of a measuring device.

IN USE check the scale resolution

capacity

Maximum load or operating range specified for the equipment.

IN USE verify scale capacity

calibration

Comparison against a reference to establish measurement relationships, not necessarily adjustment.

IN USE review calibration information

verification

Check that specified requirements are met.

IN USE complete equipment verification

adjustment

Intervention changing equipment response to meet a required condition.

IN USE distinguish adjustment from calibration

service request

Request for authorized equipment assessment or maintenance.

IN USE raise a service request

authorized technician

Person permitted and qualified under the relevant arrangement to assess or service equipment.

IN USE contact an authorized technician

alternative equipment

Different device proposed for the required task.

IN USE verify alternative equipment

equipment availability

Whether a device can actually be assigned for use when needed.

IN USE confirm equipment availability

fit for task

Suitable for the specific intended work under applicable requirements.

IN USE confirm fit-for-task status

return to use

Resumption of operation after the required assessment and authorization.

IN USE authorize return to use

review status

Current stage of the assessment, distinct from a completed repair.

IN USE report review status

Precision check

Scale A exists does not mean it is available, appropriate, or checked for this weighing task. Availability and suitability both need confirmation. A display fault also does not establish that every earlier ingredient weight or finished batch was wrong.

Phrases you can actually use

C Notice the language / 1 of 2

IDENTIFY THE DEVICE

"Scale B at the pastry prep bench is affected."

STATE THE ACTION ALREADY TAKEN

"I have stopped using it."

NAME THE AFFECTED WORK

"The weighing task cannot continue on this scale as normal."

ASK ABOUT THE ALTERNATIVE

"Can you confirm whether scale A is available and suitable?"

DESCRIBE THE SYMPTOM

"Its display keeps going blank."

AVOID A GUESSED CAUSE

"I do not know the cause."

REQUEST REVIEW

"Please arrange the appropriate equipment review."

DO NOT CLAIM A REPAIR

"No repair has been completed."

07

Keeps going

Describes repetition without inventing an exact frequency.

I have stopped

States an action already taken, not merely proposed.

Do not know

Separates observation from diagnosis.

Phrases you can actually use

C Notice the language / 2 of 2

KEEP THE STATUS CLEAR

"Scale B has not been cleared for return to use."

PRESERVE THE LOCATION

"The report concerns the pastry bench, not an unspecified station."

KEEP ALTERNATIVE STATUS HONEST

"Please check scale A before we move the weighing task."

AVOID A GUESSED TIMELINE

"No return-to-use time has been confirmed."

SEPARATE PREVIOUS-WORK QUESTIONS

"We have not established an error in earlier batches."

STAY WITHIN AUTHORITY

"I will not attempt an unauthorized repair."

ASK FOR THE ACTUAL NEXT OWNER

"Who will receive the service request?"

CLOSE THE REPORT

"Scale B, pastry bench, repeated blank display, use stopped, review needed."

Whether

Leaves the alternative genuinely open pending confirmation.

Available and suitable

Names two different checks.

Has not been cleared

Preserves the current operating status until the actual process changes it.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which report is strongest?

- A** Scale B went blank, so every earlier weight must be discarded as wrong.
- B** Scale B at the pastry bench repeatedly goes blank; I stopped using it; the cause is unknown.
- C** Scale A at the pastry bench is unavailable because its circuit failed.
- D** Scale B has a confirmed power-supply fault and will return in five minutes.

2. Which request about scale A is appropriate?

- A** Ignore its capacity and measurement requirements.
- B** It proves scale B is repaired.
- C** Please verify that it is available and suitable for this task.
- D** Its existence guarantees we can use it immediately.

3. What does the fault establish about previous batches?

- A** No specific previous-batch error by itself
- B** That every batch is unsafe
- C** That every earlier weight was exact
- D** That no review could ever be needed

4. Which statement falsely reports completion?

- A** Review is needed.
- B** Nia stopped using scale B.
- C** No return time is confirmed.
- D** Scale B is repaired and cleared for use.

Answers and explanations: [page 97](#).

Scale B keeps going blank

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

review status / measurement result / fit for task / equipment identifier / observed symptom / fault report / Equipment availability / return to use / out-of-use status / service request

07

- 01 **Nia:** Omar, I need help with scale B at the pastry prep bench. Its display keeps going blank, so I have stopped using it for the weighing task.
- 02 **Omar:** Thank you for making the ¹ _____ specific. Scale B, pastry prep bench, repeated blank display, and use stopped. Do you know the cause, or only the symptom?
- 03 **Nia:** Only the display problem. It has happened repeatedly. I have stopped using B and have not opened it or tried a repair.
- 04 **Omar:** Keep that as an ² _____. We should not write that a particular component failed when we have not established it through the appropriate assessment.
- 05 **Nia:** Can you arrange the equipment review and check whether scale A is available? I need a confirmed way forward for the work at this bench.
- 06 **Omar:** I will arrange the appropriate ³ _____. I also need to check scale A rather than assume it can be assigned to you immediately.
- 07 **Nia:** I saw scale A earlier, but another station may need it. Could you check that as well as whether it fits this weighing task?
- 08 **Omar:** Exactly. ⁴ _____ is one question, and suitability is another. We need both answered before presenting it as your confirmed alternative.
- 09 **Nia:** Please keep the location in the report. A message saying the scale is blank could send someone to a different bench or device.
- 10 **Omar:** I will include the ⁵ _____ and the pastry location. That gives the person reviewing it a clear starting point without a guessed cause.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 64.

- 11 **Nia:** Does this automatically mean that everything I weighed earlier was wrong? I do not have evidence about those earlier readings from this symptom alone.
- 12 **Omar:** It does not establish a specific ⁶ _____ as wrong. Any question about earlier work needs its own appropriate review, not a blanket conclusion or a blanket reassurance.
- 13 **Nia:** I will not resume using scale B just because the display briefly comes back. The repeated blanking is the problem I am reporting.
- 14 **Omar:** Keep the ⁷ _____ clear through our actual process. A momentary display change is not evidence that a repair or required check has been completed.
- 15 **Nia:** For scale A, we need more than a place to put ingredients. Its capacity and the required measurement performance have to fit the job.
- 16 **Omar:** Yes, it must be ⁸ _____. I will not call it suitable just because it is another scale or appears to be free.
- 17 **Nia:** What should I tell pastry about the delay? I have no confirmed review or return time for B.
- 18 **Omar:** Do not promise a ⁹ _____ time. We have a report to route and an alternative to verify, not a completed equipment decision.
- 19 **Nia:** My update to the team will be scale B unavailable for our task, use stopped, cause unknown, and scale A still awaiting your confirmation.
- 20 **Omar:** That accurately states the ¹⁰ _____. I will handle the review route and alternative check, and communicate the actual outcome before anyone treats the issue as resolved.

07

ANSWERS / EXPLANATIONS: PAGE 98

1. fault report | 2. observed symptom | 3. service request | 4. Equipment availability | 5. equipment identifier | 6. measurement result | 7. out-of-use status | 8. fit for task | 9. return to use | 10. review status

Report another display problem

F Say it

Scale C at the cold-prep bench repeatedly goes blank. Cook Noor has stopped using it. The cause is unknown. Lead Maya will arrange review and verify whether scale D is available and suitable.

Complete the four gaps. Use each bank entry once.

07

WORD + PHRASE BANK

D / unknown / C / cold-prep

Cook: "The affected scale is ¹ _____."

Lead: "Its location is the ² _____ bench."

Cook: "The cause remains ³ _____."

Lead: "The proposed alternative is scale ⁴ _____."

ANSWERS / EXPLANATIONS: PAGE 98

1. C | 2. cold-prep | 3. unknown | 4. D

Rehearse with a fixed script

1. Check the answers. Read the scale report with a partner, naming scale B and the pastry prep bench.
2. Switch roles. Separate the observed blank display from a diagnosed cause; keep scale A's availability and suitability unconfirmed.
3. Complete and check the scale C transfer. Repeat the cold-prep location and proposed scale D without changing their statuses.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

Counted is not checked

A Read the situation

Transfer unfinished closing work with explicit acceptance while preserving separate counts, reviews, and completion states.

At shift change, cook Elena has completed the garnish count: twelve portions. A waste-log entry concerning three damaged tarts is awaiting the lead's review. The closing shelf check has not been performed. Incoming cook Owen is asked to accept that shelf check. The handover does not establish disposal of the tarts, approval of the waste entry, completion of shelf checks, or release of any food for service. Elena must give each item its actual status, and Owen must repeat the specific task he is accepting without implying that the whole kitchen is closed.

PEOPLE / Elena: Outgoing cook | Owen: Incoming cook

08

FINISHED TASKS DO NOT ERASE UNFINISHED ONES

A confident handover can include incomplete work. Name it plainly, assign the next action, and keep a pending review with its decision owner. Avoid an all done summary that hides one unchecked area behind another completed count.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What task is complete?

- | | |
|-------------------------------------|---|
| A The closing shelf check | B The lead's waste review |
| C Every kitchen closing task | D The garnish count at twelve portions |

2. What awaits lead review?

- | | |
|--|---|
| A The waste-log entry for three damaged tarts | B An approved disposal certificate |
| C A completed shelf inspection | D A new garnish order |

3. What task is Owen asked to accept?

- | | |
|--|--|
| A A completed task needing no action | B The unperformed closing shelf check |
| C Retroactive approval of every waste entry | D An invented repair |

Answers and explanations: page 99.

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

closing checklist

Record of required end-of-service or shift tasks and their actual status.

IN USE follow the closing checklist

garnish count

Number of prepared garnish portions established by counting.

IN USE complete the garnish count

waste log

Record of food waste or relevant waste events under the actual process.

IN USE update the waste log

damaged product

Item affected by physical or other damage requiring appropriate handling.

IN USE identify damaged product

review pending

Status indicating a required assessment has not yet been completed.

IN USE mark review pending

shelf check

Examination of a storage shelf against the relevant requirements.

IN USE perform the shelf check

completed count

Quantity check actually finished, distinct from other controls.

IN USE report the completed count

carryover task

Work transferred unfinished to a later person or shift.

IN USE assign a carryover task

incoming cook

Colleague accepting work at the next shift or stage.

IN USE brief the incoming cook

outgoing cook

Colleague transferring responsibility or finishing a shift.

IN USE receive the outgoing cook's handover

task acceptance

Explicit agreement to take responsibility for a specified action.

IN USE confirm task acceptance

completion record

Evidence that a defined task was actually performed.

IN USE update the completion record

08

Precision check

Twelve garnish portions counted does not establish that shelves have been checked or that every food-safety control is complete. Keep quantity, task completion, and permission to use or dispose of food as separate matters.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

sign-off

Authorized acknowledgment of completion or approval in the relevant process.

IN USE obtain the required sign-off

disposal authorization

Permission for a disposal action under the applicable procedure.

IN USE verify disposal authorization

date marking

Labeling food with relevant dates under the actual food-safety system.

IN USE verify date marking

stock rotation

Organized use of stock in the required order.

IN USE check stock rotation

FIFO

First in, first out: rotation approach using earlier received stock first where appropriate.

IN USE follow the FIFO arrangement

FEFO

First expiring, first out: prioritize the earliest applicable expiry while stock remains suitable and within its permitted use period.

IN USE distinguish FEFO from FIFO

storage location

Identified place where an item is held.

IN USE record the storage location

cleaning

Removal of food residue, dirt, and other unwanted material.

IN USE complete the required cleaning

sanitizing

Treatment reducing microorganisms to the required level under the applicable process.

IN USE verify the sanitizing step

warewashing

Cleaning and sanitizing utensils and food-contact equipment through the appropriate system.

IN USE follow warewashing procedures

unperformed check

Required examination that has not yet taken place.

IN USE disclose an unperformed check

closing handover

Transfer of actual end-of-shift status and unfinished work.

IN USE give a closing handover

Precision check

A waste-log entry can await review even while another closing task is complete. Do not record disposal or approval unless it actually occurs. Follow the real handling requirements for damaged food; an administrative review is not permission to ignore immediate safety controls.

Phrases you can actually use

C Notice the language / 1 of 2

OPEN THE HANDOVER

"I have one completed count and two unfinished matters to hand over."

NAME THE PENDING REVIEW

"The waste entry for three damaged tarts awaits the lead's review."

ASK FOR ACCEPTANCE

"Can you take the shelf check?"

PRESERVE THE DECISION OWNER

"The lead still owns the waste review."

REPORT THE FINISHED COUNT

"The garnish count is complete at twelve portions."

STATE THE UNCHECKED TASK

"The closing shelf check has not been performed."

ACCEPT PRECISELY

"I accept the shelf check; I have not completed it yet."

AVOID A FALSE DISPOSAL RECORD

"The waste entry is pending; I cannot confirm disposal."

08

Complete at

Gives both completion status and the measured count.

Awaits

Marks a pending review without implying approval.

Has not been performed

States absence of the check clearly.

Phrases you can actually use

C Notice the language / 2 of 2

KEEP THE UNITS

"Twelve portions of garnish and three damaged tarts are different counts."

RECORD COMPLETION AFTERWARD

"Mark the shelf check complete only after it has been performed."

SEPARATE COUNTING AND SUITABILITY

"A completed count does not by itself authorize service."

PRESERVE THE OPEN ENTRY

"Keep the waste-review status visible until the decision is made."

DO NOT CALL EVERYTHING DONE

"The whole closing checklist is not complete."

KEEP CONTROLS ACTIVE

"Follow the actual handling requirements for the damaged items."

IDENTIFY THE NEXT UPDATE

"Report the shelf-check result through the closing process."

CLOSE WITH CLEAR OWNERSHIP

"Owen accepts the shelf check; the lead retains the waste review."

08

I accept

Establishes responsibility, not completion.

Only after

Links the record to the actual event.

Retains

Keeps an existing decision owner from disappearing during the shift change.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which handover is accurate?

- A** Waste approved and shelves checked because garnish is counted
- B** Three portions of garnish and twelve damaged tarts
- C** Garnish count complete at twelve; three-tart waste entry pending; shelf check not performed.
- D** All closing tasks done

2. What does Owen accepting the shelf check establish?

- A** Disposal of every damaged item
- B** Ownership of the next task, not completion
- C** That the shelves are already checked
- D** Approval of the waste entry

3. Which claim is unsupported?

- A** The shelf check remains open.
- B** The three damaged tarts have been disposed of with approval.
- C** The waste entry awaits review.
- D** Twelve garnish portions were counted.

4. How should completion be recorded?

- A** Before checking because someone accepted the task
- B** By copying a previous shift's sign-off
- C** By replacing every pending label with done
- D** After the actual required check, using its real result

Answers and explanations: [page 99](#).

Counted is not checked

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

disposal authorization / carryover task / shelf check / completion record / review pending / closing handover / completed count / closing checklist / task acceptance / waste log

08

- 01 **Elena:** Owen, before I finish, I need to hand over three separate items. The garnish count is done, but the waste review and shelf check are not complete.
- 02 **Owen:** I am ready for the ¹ _____. Please give me each count and status separately so I do not confuse a finished task with one I need to take on.
- 03 **Elena:** Garnish is counted: twelve portions. That is the finished count; the other closing checks still need their own entries.
- 04 **Owen:** Understood. The ² _____ is twelve portions of garnish. I will keep that separate from shelf condition, storage checks, and any permission to use the food.
- 05 **Elena:** The waste-log entry concerns three damaged tarts. It still awaits the lead's review, and I have no approved outcome to pass to you.
- 06 **Owen:** I will keep that as ³ _____. The three damaged tarts and the twelve garnish portions are different items with different statuses.
- 07 **Elena:** Correct. I am not reporting that the tarts have been disposed of, or that the entry has been approved. Those events are not established by this note.
- 08 **Owen:** Then I will not record ⁴ _____ or a disposal event from the handover alone. The actual handling requirements still apply while the record is being reviewed.
- 09 **Elena:** The third item is the closing shelf check. It has not been performed. Can you accept responsibility for carrying it out through our closing process?
- 10 **Owen:** Yes, I accept that ⁵ _____. I will perform the shelf check and report the actual result. Accepting it now does not mean it is already done.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 73.

- 11 **Elena:** Please record the shelf result after the check. I have left it unfinished on my sheet, so no one should copy a completed mark from yesterday.
- 12 **Owen:** The ⁶ _____ will reflect what I actually do. I will not let an accepted task turn into a completed task before the work occurs.
- 13 **Elena:** We also should not use the garnish count as a shortcut for checking labels, storage arrangements, or whatever the actual shelf procedure requires.
- 14 **Owen:** Agreed. The ⁷ _____ has its own requirements. I will follow the actual checklist rather than assume a known quantity proves the shelf has been checked.
- 15 **Elena:** The lead still owns the waste review. I am asking you to take the shelf task, not to approve the waste entry outside your authority.
- 16 **Owen:** That boundary stays clear in the ⁸ _____. I can preserve its pending status while taking responsibility for the shelf check.
- 17 **Elena:** Can you give me the three-item read-back? Especially who has the shelf check and who has the waste review.
- 18 **Owen:** My ⁹ _____ is the shelf check. Garnish is counted at twelve portions, the entry for three damaged tarts awaits the lead, and the shelf check is still unperformed.
- 19 **Elena:** That is correct. When the shelf check is finished, report its real result through the process. Until then, the kitchen closing work is not all complete.
- 20 **Owen:** I will keep the ¹⁰ _____ accurate. My next action is the shelf check, while the lead retains the waste review and all actual food-handling controls remain in force.

08

ANSWERS / EXPLANATIONS: PAGE 100

1. closing handover | 2. completed count | 3. review pending | 4. disposal authorization | 5. carryover task | 6. completion record | 7. shelf check | 8. waste log | 9. task acceptance | 10. closing checklist

Transfer another unfinished closing check

F Say it

The sauce count is complete at nine portions. A waste entry for two damaged rolls awaits lead review. The refrigerator shelf check is unperformed. Incoming cook Noor accepts that check.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

unperformed / rolls / Noor / nine

Outgoing cook: "The completed sauce count is ¹ _____ portions."

Incoming cook: "The waste entry concerns two damaged ² _____."

Outgoing cook: "The shelf check remains ³ _____."

Incoming cook: "The receiving cook is ⁴ _____."

ANSWERS / EXPLANATIONS: PAGE 100

1. nine | 2. rolls | 3. unperformed | 4. Noor

Rehearse with a fixed script

1. Check the answers. Read the closing handover, distinguishing the garnish count, tart entry, and shelf check.
2. Switch roles. Accept the shelf check without marking it complete or approving the lead's waste decision.
3. Complete and check the sauce-and-rolls transfer. Repeat nine portions, two damaged rolls, the unperformed check, and Noor's responsibility.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

More guests, smaller portions

E More workplace conversations / 1-10

Explain a recipe conversion using both portion count and portion size, with consistent units.

Fictional calculation check: the approved soup recipe yields twelve 250 mL portions. The event requires thirty 200 mL portions. Two listed ingredients are 900 g prepared carrots and 2.4 L stock in the base recipe. This excerpt is not a complete recipe or a production authorization; the lead must confirm the adjusted process and equipment.

PEOPLE / Asha: Prep cook | Mateo: Kitchen lead

Use each bank entry once, without changing its form. Answers follow turn 20.

09

WORD + PHRASE BANK

scaling factor / Process time / prepared carrots / unit conversion / recipe yield / portion size

- 01 **Asha:** I was about to multiply the soup recipe by two and a half for thirty guests, but the event sheet says smaller portions. Can we check the basis first?
- 02 **Mateo:** Yes. The original ¹ _____ is twelve portions at two hundred fifty milliliters each: three liters altogether.
- 03 **Asha:** The new portions are two hundred milliliters, and we need thirty. That makes six thousand milliliters, or six liters.
- 04 **Mateo:** Correct. The ² _____ is six divided by three: two. Thirty divided by twelve would ignore the changed serving size.
- 05 **Asha:** So the two-and-a-half calculation would make seven and a half liters at the old portion size. That is not this event's stated target.
- 06 **Mateo:** Right. Keep the ³ _____ visible beside the count. More guests does not mean we can ignore what each guest receives.
- 07 **Asha:** For the carrots, nine hundred grams times two is eighteen hundred grams. I will write one point eight kilograms if the production sheet uses kilograms.
- 08 **Mateo:** Yes, and keep the prepared form stated. Those are ⁴ _____, not an instruction to buy one point eight kilograms before any trimming loss.
- 09 **Asha:** The stock starts at two point four liters. Twice that is four point eight liters, not four hundred eighty milliliters.
- 10 **Mateo:** Correct. The ⁵ _____ to milliliters would be four thousand eight hundred. Say the number and unit together when you read it back.

The conversation, continued

E More workplace conversations / 11-20

Continue with the word bank on page 76.

- 11 **Asha:** Those two lines are only part of the recipe. I still need the complete approved ingredient list rather than treat carrots and stock as the whole formula.
- 12 **Mateo:** Exactly. Check every line through the approved conversion. Keep this arithmetic check separate from permission to start production.
- 13 **Asha:** Should the cooking time also be doubled? That would be an easy rule to remember, but I am not sure it follows.
- 14 **Mateo:** It does not follow from doubling ingredients. ⁶ _____ and equipment loading need their own approved checks, not an automatic times-two rule.
- 15 **Asha:** We may need more than one preparation cycle if the equipment cannot take the whole quantity. Six liters required does not specify one vessel.
- 16 **Mateo:** Right. I will confirm the production arrangement, including the complete recipe, capacity, method, and applicable controls before authorizing the work.
- 17 **Asha:** My calculation read-back: twelve at two hundred fifty is three liters; thirty at two hundred is six liters; factor two.
- 18 **Mateo:** And the two ingredient lines?
- 19 **Asha:** One point eight kilograms prepared carrots and four point eight liters stock. The target is six liters finished yield, not the sum of two unrelated unit labels.
- 20 **Mateo:** Confirmed for the calculation. Keep the complete adjusted recipe and process checks with the production sheet, then begin only under the actual approved arrangement.

09

ANSWERS / EXPLANATIONS: PAGE 101

1. recipe yield | 2. scaling factor | 3. portion size | 4. prepared carrots | 5. unit conversion | 6. Process time

Change both count and size

F Say it in a new situation

A fictional base recipe yields twenty 150 mL portions. The new target is thirty-six 125 mL portions. Its base celery line is 600 g prepared celery. Calculate quantities only; the full recipe and production controls still require review.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

1.5 / 3 / 900 / 4.5

09

Cook: The base yield is ¹ _____ liters.

Lead: The new target yield is ² _____ liters.

Cook: The conversion factor is ³ _____ .

Lead: The adjusted prepared celery is ⁴ _____ grams.

ANSWERS / EXPLANATIONS: PAGE 101

1. 3 | 2. 4.5 | 3. 1.5 | 4. 900

Read, switch, repeat

1. Check the four answers and read the complete exchange aloud.
2. Switch roles. Read it again with the word bank covered.
3. Return to the extended conversation. Read turns 1-10, then switch roles for turns 11-20. Use the corrected expressions.

SOLO PRACTICE

Read both roles. Pause briefly at each change of speaker. Repeat any line that needed an answer check.

Buying weight is not usable yield

E More workplace conversations / 1-10

Read a trimming test, calculate purchase quantity, and explain cost per usable kilogram.

Fictional trimming test: 8 kg as-purchased carrots yields 6.4 kg prepared carrots at the specified stage. Planning assumes that 80% yield for a 10 kg prepared-carrot requirement. Purchase cost is \$1.60 per kg, with no credit assigned to trim and no other costs included. These are case figures, not universal carrot yields.

PEOPLE / Ben: Prep cook | Lina: Kitchen lead

Use each bank entry once, without changing its form. Answers follow turn 20.

WORD + PHRASE BANK

as-purchased weight / shortfall / portion ingredient cost / edible portion / yield percentage / cost per usable kilogram

10

- 01 **Ben:** The prep requirement is ten kilograms of prepared carrots. I was going to request ten kilograms from stores, but our yield sheet suggests that will not be enough.
- 02 **Lina:** Check the ¹ _____ against the usable output. We started the test with eight kilograms and finished with six point four.
- 03 **Ben:** Six point four divided by eight is zero point eight. That means eighty percent reached the prepared form specified on this sheet.
- 04 **Lina:** Yes. That is the ² _____. It describes this trimming stage, not a guarantee for every delivery or the final cooked dish.
- 05 **Ben:** Then ten kilograms before trimming would give eight kilograms prepared if this yield holds. We would be two kilograms short of the requirement.
- 06 **Lina:** Correct. Our ³ _____ requirement is ten kilograms. To work back to purchase weight, divide ten by zero point eight.
- 07 **Ben:** That gives twelve point five kilograms to request. I should not just add twenty percent to ten and stop at twelve.
- 08 **Lina:** Exactly. Twelve multiplied by eighty percent produces nine point six kilograms. It still leaves a ⁴ _____ of four hundred grams.
- 09 **Ben:** The purchase rate is one dollar sixty per kilogram. Twelve point five kilograms would cost twenty dollars at that rate.
- 10 **Lina:** Right. With no trim credit in this case, the ⁵ _____ is twenty divided by ten: two dollars.

The conversation, continued

E More workplace conversations / 11-20

Continue with the word bank on page 79.

- 11 **Ben:** So one dollar sixty is the purchased-kilogram rate, and two dollars is the prepared-kilogram ingredient cost. They are not competing quotes for the same form.
- 12 **Lina:** That is the distinction to explain. The preparation loss changes how much usable product the purchase buys; it does not mean the supplier raised the price.
- 13 **Ben:** For a recipe needing two hundred fifty grams of these prepared carrots, the ingredient cost would be fifty cents at two dollars per kilogram.
- 14 **Lina:** Yes. Convert two hundred fifty grams to zero point two five kilograms before multiplying. That is a ⁶ _____ for carrots only.
- 15 **Ben:** It is not the menu price or the cost of the entire dish. Labor, other ingredients, and other costs are outside this calculation.
- 16 **Lina:** Correct. Also, this sheet assigns no value to the trim. If another approved costing method gives usable by-products a credit, we would need that stated separately.
- 17 **Ben:** I will not describe every gram outside the prepared-carrot output as spoiled food. This test records a preparation yield, not the condition of every removed piece.
- 18 **Lina:** Good. Keep the actual trimming and waste records accurate, and use only the kitchen's approved handling arrangements. Do not invent a salvage value or use.
- 19 **Ben:** My request is twelve point five kilograms in purchased form to plan for ten kilograms prepared, assuming the recorded eighty-percent yield.
- 20 **Lina:** Confirmed. Record the actual input and output when the job is done. If the yield differs, report it; do not change the serving specification to conceal the difference.

10

ANSWERS / EXPLANATIONS: PAGE 102

1. as-purchased weight | 2. yield percentage | 3. edible portion | 4. shortfall | 5. cost per usable kilogram | 6. portion ingredient cost

Use the decimal yield

F Say it in a new situation

A fictional preparation has 75% usable yield. The required usable amount is 9 kg. Purchase cost is \$3 per kg, with no trim credit or other costs in this example.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

12 / 4 / 0.80 / 36

Cook: The required purchased amount is ¹ _____ kilograms.

Lead: The purchase cost is ² _____ dollars.

Cook: The cost per usable kilogram is ³ _____ dollars.

Lead: A 200 g usable portion costs ⁴ _____ dollars for this ingredient.

10

ANSWERS / EXPLANATIONS: PAGE 102

1. 12 | 2. 36 | 3. 4 | 4. 0.80

Read, switch, repeat

1. Check the four answers and read the complete exchange aloud.
2. Switch roles. Read it again with the word bank covered.
3. Return to the extended conversation. Read turns 1-10, then switch roles for turns 11-20. Use the corrected expressions.

SOLO PRACTICE

Read both roles. Pause briefly at each change of speaker. Repeat any line that needed an answer check.

Trace the ingredient into the dish

E More workplace conversations / 1-10

Link a recalled supplier lot to kitchen batches and report known quantities without declaring the recall complete.

Fictional Australian kitchen: a verified recall notice names sauce lot Q17 for undeclared sesame. Lead Nia has immediately stopped its use and service, isolated remaining stock and related dressing batches D9/D10, and begun the recall response. This later record check must not delay protective action or required notifications. Prior service is still being investigated.

PEOPLE / Cole: Cook checking preparation records | Nia: Kitchen lead coordinating the response

Use each bank entry once, without changing its form. Answers follow turn 20.

WORD + PHRASE BANK

batch records / disposition / remaining stock / lot code / traceability gap / recall update

11

- 01 **Cole:** The receiving record shows four bottles of the recalled sauce, lot Q seventeen. I have two sealed bottles, one partly used bottle, and the label from the emptied fourth.
- 02 **Nia:** Keep the ¹ _____ with each entry. The stop-use and stop-service response is already in effect; this count must not delay it.
- 03 **Cole:** The two sealed bottles and the remaining contents of the opened bottle are identified and separated. The empty bottle's label is retained with the record.
- 04 **Nia:** That records three bottles containing ² _____. Do not list the empty bottle as a full unit recovered.
- 05 **Cole:** I cannot give a total volume recovered until the actual remaining quantities are established. Four received does not mean four full bottles still exist.
- 06 **Nia:** Correct. Keep container count and contents quantity separate. Preserve the receipt, labels, and preparation information through our response process.
- 07 **Cole:** The preparation sheet links the emptied bottle to dressing batch D nine. The partly used bottle is linked to D ten.
- 08 **Nia:** Those ³ _____ explain why we have stopped service of both dressings. Do not check only the storeroom and overlook food already made with the ingredient.
- 09 **Cole:** Both dressing batches have been identified and held. I have not recorded disposal or return; neither outcome has been confirmed to me.
- 10 **Nia:** Keep their ⁴ _____ pending until the applicable instructions are carried out and recorded. Nobody should put the food back into service on their own.

The conversation, continued

E More workplace conversations / 11-20

Continue with the word bank on page 82.

- 11 **Cole:** Another case has the same brand but lot Q eighteen. It is not the lot named in the notice we have.
- 12 **Nia:** Record that distinction and check the full current recall identifiers and any updates. A different lot code is not a blanket safety certificate for every product or use.
- 13 **Cole:** Some dressing may have been served earlier. The service records are still being checked, so I cannot honestly say nobody received it.
- 14 **Nia:** Report that ⁵ _____ immediately through the response. Required external action and guest-protection decisions must not wait for us to produce a neat final tally.
- 15 **Cole:** I will give you the verified links and clearly mark the uncertain service history. I will not fill missing quantities from memory and present them as measured.
- 16 **Nia:** Good. Keep the source of each quantity visible. An estimate, a preparation entry, and a physically measured remainder are different kinds of information.
- 17 **Cole:** The new message from the supplier has been received. I have not checked whether it changes the affected lots or the action instructions.
- 18 **Nia:** Review that ⁶ _____ promptly and communicate any change to the affected teams. Keep the response aligned with the current notice and enforcement advice.
- 19 **Cole:** My handoff is four Q seventeen bottles received, three with remaining contents, one emptied, and links to D nine and D ten. Prior service remains unresolved.
- 20 **Nia:** Accepted. Continue the assigned record checks while the protective response remains active. Counts and an internal handoff do not mean the recall, notifications, or guest follow-up are complete.

11

ANSWERS / EXPLANATIONS: PAGE 103

1. lot code | 2. remaining stock | 3. batch records | 4. disposition | 5. traceability gap | 6. recall update

Do not lose the prepared batch

F Say it in a new situation

A verified fictional recall names ingredient lot R6. Immediate protective action is already under way. Five tubs were received: three remain sealed and two were fully used in batch S4. S4 is held; earlier service is unresolved. An empty tub is not recovered ingredient.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

S4 / R6 / unresolved / three

Cook: The recalled supplier lot is ¹ _____.

Lead: The sealed tubs containing remaining ingredient number ² _____.

Cook: The preparation record links the used ingredient to batch ³ _____.

Lead: Earlier service remains ⁴ _____.

11

ANSWERS / EXPLANATIONS: PAGE 103

1. R6 | 2. three | 3. S4 | 4. unresolved

Read, switch, repeat

1. Check the four answers and read the complete exchange aloud.
2. Switch roles. Read it again with the word bank covered.
3. Return to the extended conversation. Read turns 1-10, then switch roles for turns 11-20. Use the corrected expressions.

SOLO PRACTICE

Read both roles. Pause briefly at each change of speaker. Repeat any line that needed an answer check.

01 Briefing and language checks

Clarifying a prep list

A Briefing checks / page 4

1. What is missing from soup: 24?

D. The unit

The number is present, but it does not say portions, containers, or another unit.

2. What did Mateo intend?

A. Twenty-four portions from the current recipe

The lead clarifies portions and the current recipe as the intended production basis.

3. What has Asha started?

C. No batch yet

The brief explicitly says no batch has started before the clarification.

D Language checks / page 9

1. Which read-back is complete?

D. Soup: twenty-four portions using the current recipe, not twenty-four containers.

The read-back preserves the clarified unit and recipe basis while rejecting the mistaken interpretation.

2. What information is still needed to calculate ingredient amounts?

C. The actual recipe yield, portion size, and approved scaling details

The brief supplies the target portions but no ingredient quantities or numeric conversion basis.

3. Which statement correctly describes production status?

C. No batch has started.

Asha has paused before production, so no completed preparation should be invented.

4. Why add portions to the list?

B. To make the clarified unit visible to the next reader

Updating the wording prevents the original ambiguity from being passed to another colleague.

01 Conversation answers

Clarifying a prep list

E Dialogue gaps

Pages 10-11

- 1. prep list.** Turn 2. The prep list contains the ambiguous soup quantity; clarifying it prevents the wrong production amount from being started.
- 2. unit of measure.** Turn 4. The unit of measure identifies what the number counts; portions and containers are different units unless explicitly related.
- 3. task start.** Turn 6. The task start has not occurred; the clarification precedes production rather than correcting an already completed batch.
- 4. current recipe.** Turn 8. The current recipe is the specified production basis; yesterday's working sheet is not automatically the correct recipe authority.
- 5. portion size.** Turn 10. The portion size defines the amount per serving; it is needed to relate a portion count to an actual quantity.
- 6. recipe yield.** Turn 12. The recipe yield states the output of the approved recipe, providing the basis for comparing it with the target portions.
- 7. Container capacity.** Turn 14. Container capacity measures what a vessel can hold; it does not by itself define a serving or the required portion count.
- 8. scaling factor.** Turn 16. A scaling factor relates target yield to recipe yield; twenty-four portions is not automatically a factor of twenty-four.
- 9. production quantity.** Turn 18. The production quantity is twenty-four portions, which should remain visible with its unit on the corrected instruction.
- 10. read-back.** Turn 20. The read-back repeats item, quantity, unit, recipe basis, and current work status, confirming the instruction understood.

F Transfer conversation

Page 12

1. portions

Cook: "The target is eighteen portions."

Noor explicitly names portions as the intended production unit.

2. current

Lead: "Use the current recipe."

The applicable basis is the current recipe, not a guessed older sheet.

3. started

Cook: "No batch has started."

The scenario states that preparation has not begun.

4. tubs

Lead: "The target is not eighteen tubs."

Tubs is the rejected interpretation of the ambiguous quantity.

02 Briefing and language checks

Reporting deliveries and stock discrepancies

A Briefing checks / page 13

1. What quantity is physically present?

C. Four cases

Ben can physically count four cases in the receiving area.

2. What did the driver say?

C. Two more may be on another trolley.

The driver offers an unverified possibility, not a completed check.

3. Who must resolve the receiving record?

A. Lina, the receiving lead

Lina is responsible for the record through the actual receiving process.

D Language checks / page 18

1. Which report is accurate?

A. Six cases listed, four present; the driver suggests two may be on an unchecked trolley.

The report distinguishes the document, physical observation, and unverified explanation.

2. What should not be recorded as established?

C. Six cases received

The current observation does not verify receipt of all six listed cases.

3. Which conclusion exceeds the evidence?

A. The supplier deliberately shorted the kitchen.

The cause and intent behind the discrepancy are not established by the count.

4. What remains separate from the quantity count?

A. Required product acceptance checks

Counting cases does not establish their condition or satisfy every required receiving control.

02 Conversation answers

Reporting deliveries and stock discrepancies

E Dialogue gaps

Pages 19-20

- 1. listed quantity.** Turn 2. The listed quantity belongs to the delivery document and must remain distinct from the goods physically verified.
- 2. driver statement.** Turn 4. The driver statement is an unverified suggestion about another trolley, not evidence that the missing cases have been found.
- 3. physical count.** Turn 6. The physical count is four cases actually present in the receiving area, preserving both number and unit.
- 4. quantity discrepancy.** Turn 8. A quantity discrepancy identifies a difference between listed and observed amounts; it does not establish cause or deliberate misconduct.
- 5. receipt record.** Turn 10. The receipt record should reflect actual supported receipt, not an expected quantity entered merely to match the delivery note.
- 6. unchecked location.** Turn 12. The unchecked location is the suggested other trolley; its possible contents remain unknown until the actual check occurs.
- 7. acceptance check.** Turn 14. The acceptance check concerns the required product and receiving criteria, which a simple quantity count does not complete.
- 8. product identifier.** Turn 16. The product identifier links the count discrepancy to the correct tomatoes rather than leaving an ambiguous two-case note.
- 9. credit note.** Turn 18. A credit note is a supplier adjustment document; the current count discrepancy does not establish that any credit has been approved.
- 10. receiving lead.** Turn 20. The receiving lead is the responsible owner for resolving the record through the actual process, without inventing a completed outcome.

F Transfer conversation

Page 21

1. eight

Cook: "The note lists eight sacks."

Eight is the documented quantity, not the physically verified count.

2. six

Lead: "The observed count is six."

Six sacks are physically present under the supplied facts.

3. vehicle

Cook: "The suggested location is the vehicle."

The driver suggests the vehicle, but that location remains unchecked.

4. Noor

Lead: "The receiving owner is Noor."

Noor accepts responsibility for the receiving query in this scenario.

03 Briefing and language checks

Reading tickets and modifications

03

A Briefing checks / page 22

1. What is the current total for ticket 41?

D. Three tarts

Cole confirms that the revised quantity replaces the earlier quantity, giving three total.

2. How many tarts have the side substitution?

B. One of the three

The specified substitution applies to one tart, not the entire ticket.

3. What does salad replace?

D. Potatoes

Salad is supplied instead of potatoes for the one modified tart.

D Language checks / page 27

1. Which read-back is correct?

C. Revised ticket 41 replaces two with three total; one has salad instead of potatoes.

The read-back captures replacement, final quantity, and the one-item side substitution.

2. Which interpretation of instead of is correct?

B. Salad replaces potatoes for the specified tart.

Instead of marks replacement of the named component within the specified item's scope.

3. What is not established by the revised ticket?

C. That the three tarts are prepared and ready

A quantity instruction does not establish completed preparation or readiness.

4. What should the team avoid doing with the earlier slip?

D. Treating it as a second active order

Treating both versions as active would create duplicate production beyond the confirmed total.

03 Conversation answers

Reading tickets and modifications

03

E Dialogue gaps

Pages 28-29

- 1. revised ticket.** Turn 2. The revised ticket updates the existing order; Cole confirms that its three-tart quantity replaces the earlier two.
- 2. current total.** Turn 4. The current total is three after replacement; adding the two slips would incorrectly produce five tarts.
- 3. one-item change.** Turn 6. The one-item change applies the salad substitution to one of the three tarts, not to every item.
- 4. item identification.** Turn 8. Item identification must connect the substitution to the correct tart through the actual process, without inventing a seat reference.
- 5. substitution.** Turn 10. The substitution replaces potatoes with salad for the identified tart; it does not add both sides or change all plates.
- 6. superseded ticket.** Turn 12. The superseded ticket is the earlier version no longer governing production; retaining history must not keep it active.
- 7. order scope.** Turn 14. The order scope is ticket forty-one; its three-tart total is not a count of every outstanding tart in the kitchen.
- 8. duplicate production.** Turn 16. Duplicate production would result from treating the original and revised quantities as separate active orders instead of one replacement.
- 9. change acknowledgment.** Turn 18. Change acknowledgment confirms the replacement quantity and modification have been understood, not merely that a new slip arrived.
- 10. revision trail.** Turn 20. The revision trail records how the instruction changed while leaving the current production status distinct from completed preparation.

F Transfer conversation

Page 30

1. six

Cook: "The current total is six pies."

The confirmed replacement sets the total at six, not four plus six.

2. replaced

Expediter: "The old quantity is replaced."

The revised slip supersedes the earlier quantity rather than adding to it.

3. peas

Cook: "One pie has peas instead of carrots."

Peas is the stated substitute for the one modified pie.

4. established

Expediter: "Readiness is not established."

The quantity correction does not establish that any pie is ready.

04 Briefing and language checks

Coordinating the pass

04

A Briefing checks / page 31

1. How many mains are on ticket 28?

D. Four

The brief supplies four mains as the complete ticket quantity.

2. How many are plated?

C. Two

Two mains are plated, while the other two remain at the station.

3. What is Rosa's estimate for the remaining pair?

A. Four more minutes

Rosa estimates four additional minutes for the pair still at the station.

D Language checks / page 36

1. Which status call answers Jules accurately?

B. Ticket 28: four total, two plated, two at the station, estimated four more minutes for the pair.

The call preserves the full quantity, partial completion, location, and estimated remaining time.

2. What does plated establish by itself?

A. A preparation stage, not completion of every food and release check

Plating describes assembly and does not independently certify all required checks or later stages.

3. Which time statement overclaims?

A. The entire table will definitely be delivered in exactly four minutes.

The estimate concerns the remaining pair and cannot guarantee the timing of every later service stage.

4. What should happen if the estimate changes?

C. Tell the expeditor the revised status.

Updated communication prevents a provisional earlier estimate from misleading the rest of the service team.

04 Conversation answers

Coordinating the pass

E Dialogue gaps

Pages 37-38

- 1. partial progress.** Turn 2. Two of the four mains are plated, so the update reports partial progress rather than whole-ticket readiness.
- 2. remaining pair.** Turn 4. The remaining pair is the two mains still at Rosa's station, distinct from the two plated dishes.
- 3. readiness estimate.** Turn 6. Rosa's estimate is four additional minutes for the unfinished pair, not an exact table-delivery promise.
- 4. full ticket.** Turn 8. The full ticket is all four mains; seeing two plated dishes does not establish completion of that scope.
- 5. holding arrangement.** Turn 10. Holding must follow the actual kitchen's approved conditions; an estimated delay does not authorize arbitrary holding.
- 6. release decision.** Turn 12. A release decision authorizes dispatch; this conversation has not established that decision for any part of the order.
- 7. Synchronized service.** Turn 14. Synchronized service coordinates related dishes under the kitchen's actual plan rather than equating one station's progress with dispatch.
- 8. status call.** Turn 16. The status call identifies the actual stage; plated and ready to run are not automatically interchangeable.
- 9. update trigger.** Turn 18. A changed estimate or readiness problem triggers a fresh message before colleagues continue relying on stale information.
- 10. Ready-to-run.** Turn 20. Ready-to-run means the actual collection-ready stage; it has not yet been established for all four mains.

F Transfer conversation

Page 39

1. six

Cook: "The ticket total is six mains."

Six is the complete number required for ticket sixty-three.

2. four

Expediter: "The plated count is four."

Four mains have reached plating, leaving two at the station.

3. three

Cook: "The remaining pair needs an estimated three more minutes."

Three additional minutes is the supplied estimate for the unfinished pair.

4. confirmed

Expediter: "Whole-ticket release is not confirmed."

Partial plating and an estimate do not establish the full release decision.

04

05 Briefing and language checks

Communicating a shortage and an alternative

A Briefing checks / page 40

1. How many potato portions remain unallocated?

B. Three

The brief gives three potato portions available for allocation to the new ticket.

2. What is the shortfall against five requested portions?

C. Two portions

Five requested minus three available leaves two portions short.

3. Who can obtain the diners' decision about rice?

B. Mei, the server

Mei is the named server who can ask the diners and return with their choice.

D Language checks / page 45

1. Which shortage report is accurate?

D. Five requested, three unallocated potato portions, two short.

The comparison uses the stated demand and available count without exaggerating the shortage.

2. When may rice be described as accepted?

B. After the relevant diners' choice is actually confirmed

Availability establishes an option, not a guest decision or agreed substitution.

3. Which handoff closes the communication loop?

D. Mei will ask the diners and return with their choices.

Naming the person and required return message gives the pending decision a clear owner.

4. What is not supported by the case?

C. Rice has the same price and is suitable for every dietary need.

Neither a price comparison nor a dietary-suitability assessment is supplied merely by rice availability.

05 Conversation answers

Communicating a shortage and an alternative

E Dialogue gaps

Pages 46-47

- 1. shortfall.** Turn 2. The shortfall is five requested minus three available, leaving two potato portions not covered by the current supply.
- 2. proposed substitution.** Turn 4. The proposed substitution is an available rice option that remains unaccepted until the diners' relevant choice is confirmed.
- 3. unallocated portion.** Turn 6. An unallocated portion has not been assigned to another order; three such portions are available in the stated count.
- 4. replenishment.** Turn 8. Replenishment would add more stock, but the case supplies no confirmed additional quantity or timing.
- 5. guest decision.** Turn 10. The guest decision belongs to the diners; Mei explicitly accepts the task of asking and reporting it back.
- 6. order hold.** Turn 12. The order hold preserves the unresolved side choice; it prevents a proposed alternative from becoming a silent change.
- 7. alternative side.** Turn 14. The alternative side is rice, but its availability does not establish a price consequence or settle dietary suitability.
- 8. portion control.** Turn 16. Portion control preserves the specified serving amount; a shortage does not authorize silently shrinking portions to cover demand.
- 9. return message.** Turn 18. The return message reports the actual choices and affected diners, completing the communication loop without assuming acceptance.
- 10. accepted substitution.** Turn 20. An accepted substitution requires an actual confirmed choice; the present handoff establishes only the option and the person asking.

F Transfer conversation

Page 48

1. two

Cook: "The shortfall is two portions."

Seven requested minus five unallocated leaves two portions short.

2. carrots

Server: "The proposed alternative is roasted carrots."

Roasted carrots are the available option named in the scenario.

3. Noor

Cook: "The server obtaining the choice is Noor."

Noor explicitly owns asking the diners for their decision.

4. accepted

Server: "The substitution is not yet accepted."

No diner has confirmed acceptance in the supplied facts.

05

06 Briefing and language checks

Checking dietary modifications

A Briefing checks / page 49

1. What additional information does Arun report?

C. The diner has a milk allergy.

Arun reports a milk allergy beyond the original no-cheese wording.

2. Which specification remains unchecked?

C. The sauce specification

Tessa has not checked the sauce specification, so its relevant contents remain unverified.

3. Who is available to review the question?

B. Lead Noor with the server

Noor is available to review the question with Arun through the actual process.

D Language checks / page 54

1. Which statement correctly handles the new report?

B. Keep no cheese and add the reported milk allergy for the appropriate review.

The update preserves the omission and communicates the new allergen information accurately.

2. What does unchecked sauce mean?

C. No relevant ingredient conclusion is established yet.

An unchecked specification supports neither a positive ingredient finding nor an absence assurance.

3. Which statement about casein and whey is correct?

C. They are examples of milk-derived proteins relevant to ingredient checking.

These terms identify milk-derived proteins but do not by themselves complete a whole-dish or preparation assessment.

4. Which guest update is accurate?

D. The milk-allergy question is under review; suitability is not confirmed yet.

The message communicates the actual unresolved stage without a false guarantee or invented event.

06 Conversation answers

Checking dietary modifications

E Dialogue gaps

Pages 55-56

1. omission request. Turn 2. The omission request is no cheese; it remains relevant but does not replace the broader reported milk-allergy information.

2. sauce specification. Turn 4. The sauce specification has not been checked, so its relevant ingredients cannot yet be stated as present or absent.

3. allergen flag. Turn 6. The allergen flag keeps the reported milk allergy attached to ticket seventeen as it moves between the server, cook, and lead.

4. unverified component. Turn 8. An unverified component has not been checked; that status does not establish either milk content or absence.

5. Recipe verification. Turn 10. Recipe verification checks the relevant current recipe and ingredients, rather than relying on recollection or a different sauce version.

6. compound ingredient. Turn 12. A compound ingredient contains multiple components, so its relevant subingredients may need checking rather than relying on its short name.

7. Cross-contact. Turn 14. Cross-contact concerns unintended allergen introduction during handling or preparation, which remains distinct from intentional ingredients.

8. guest update. Turn 16. The guest update should describe the actual review stage without converting receipt of the allergy report into a completed suitability decision.

9. dish suitability. Turn 18. Dish suitability concerns the complete relevant dish and preparation, so another menu item needs its own appropriate assessment.

10. review owner. Turn 20. The review owner coordinates the unresolved question; Noor's availability does not itself complete the checks or authorize service.

F Transfer conversation

Page 57

1. peanut

Server: "The reported allergen is peanut."

The reported allergy concerns peanut and must be preserved accurately.

2. dressing

Cook: "The unchecked component is the dressing."

The dressing specification is explicitly the unresolved ingredient source.

3. Maya

Server: "The available review lead is Maya."

Maya is named as available to review the updated question.

4. confirmed

Cook: "Suitability is not yet confirmed."

Removing a topping does not supply a completed whole-dish assessment.

07 Briefing and language checks

Reporting equipment and dish-station needs

A Briefing checks / page 58

1. Which equipment is affected?

D. Scale B at the pastry prep bench

The report concerns scale B at the named pastry preparation location.

2. What has Nia observed?

C. The display repeatedly goes blank.

The supplied symptom is a repeatedly blank display, not a diagnosis or proven batch defect.

3. What is still needed about scale A?

A. Confirmation that it is available and suitable for the task

Omar must verify the alternative rather than treat its mere existence as availability or suitability.

D Language checks / page 63

1. Which report is strongest?

B. Scale B at the pastry bench repeatedly goes blank; I stopped using it; the cause is unknown.

The report names equipment, location, symptom, action, and uncertainty without an unsupported diagnosis.

2. Which request about scale A is appropriate?

C. Please verify that it is available and suitable for this task.

The alternative needs both practical availability and task suitability, not merely a known name.

3. What does the fault establish about previous batches?

A. No specific previous-batch error by itself

A display symptom alone does not determine previous measurement results or eliminate appropriate follow-up questions.

4. Which statement falsely reports completion?

D. Scale B is repaired and cleared for use.

The case supplies no completed repair, verification, or authorization to return scale B to use.

07 Conversation answers

Reporting equipment and dish-station needs

E Dialogue gaps

Pages 64-65

- 1. fault report.** Turn 2. The fault report identifies the specific equipment, observed problem, and action taken without claiming a diagnosed cause.
- 2. observed symptom.** Turn 4. The observed symptom is the blank display; a cause or repair diagnosis requires appropriate assessment not supplied here.
- 3. service request.** Turn 6. The service request routes the equipment problem for authorized review; submitting it is not the same as completing a repair.
- 4. Equipment availability.** Turn 8. Equipment availability means the device can actually be assigned when needed; knowing scale A exists does not establish that.
- 5. equipment identifier.** Turn 10. The equipment identifier distinguishes scale B from scale A or other devices, keeping the report tied to the correct asset.
- 6. measurement result.** Turn 12. A measurement result concerns an actual recorded value; the display symptom alone does not determine every earlier reading's accuracy.
- 7. out-of-use status.** Turn 14. Out-of-use status preserves the stopped-use condition until the actual review and authorization process determines the next action.
- 8. fit for task.** Turn 16. Fit for task means meeting the actual weighing requirements, not merely being a different device that can display a number.
- 9. return to use.** Turn 18. Return to use requires the relevant actual assessment and authorization; no timing or completed decision is supplied here.
- 10. review status.** Turn 20. Review status distinguishes the current unresolved equipment question from a repaired scale or confirmed replacement.

F Transfer conversation

Page 66

1. C

Cook: "The affected scale is C."

Scale C is the device with the reported display problem.

2. cold-prep

Lead: "Its location is the cold-prep bench."

The brief identifies the cold-preparation bench as the affected location.

3. unknown

Cook: "The cause remains unknown."

No cause has been established by the observed display behavior.

4. D

Lead: "The proposed alternative is scale D."

Scale D still needs availability and suitability confirmation.

08 Briefing and language checks

Closing and handing over unfinished work

A Briefing checks / page 67

1. What task is complete?

D. The garnish count at twelve portions

The brief establishes only the garnish count as complete among these three items.

2. What awaits lead review?

A. The waste-log entry for three damaged tarts

The waste entry is pending review, and no approval or disposal result is supplied.

3. What task is Owen asked to accept?

B. The unperformed closing shelf check

The incoming cook is specifically asked to take responsibility for the shelf check.

D Language checks / page 72

1. Which handover is accurate?

C. Garnish count complete at twelve; three-tart waste entry pending; shelf check not performed.

The message preserves the distinct quantities and statuses of all three matters.

2. What does Owen accepting the shelf check establish?

B. Ownership of the next task, not completion

Task acceptance transfers responsibility while the check itself remains to be performed.

3. Which claim is unsupported?

B. The three damaged tarts have been disposed of with approval.

The scenario supplies a pending log review but no approved disposal event.

4. How should completion be recorded?

D. After the actual required check, using its real result

Records must reflect actual performed work, not intentions, assumptions, or copied completion states.

08 Conversation answers

Closing and handing over unfinished work

E Dialogue gaps

Pages 73-74

1. closing handover. Turn 2. The closing handover transfers actual completed and unfinished states, rather than compressing different tasks into an all-done summary.

2. completed count. Turn 4. The completed count establishes twelve garnish portions counted; it does not establish completion of other checks or authorize service.

3. review pending. Turn 6. Review pending means the lead has not completed the relevant waste-entry decision; the handover must not imply approval.

4. disposal authorization. Turn 8. Disposal authorization is a separate actual permission; a pending waste-log entry does not establish it or a completed disposal.

5. carryover task. Turn 10. The carryover task is the unperformed shelf check transferred to Owen, not the already completed garnish count.

6. completion record. Turn 12. The completion record must follow the performed check and its actual result, rather than a promise or copied previous entry.

7. shelf check. Turn 14. The shelf check concerns the relevant storage requirements and remains separate from the numerical garnish count.

8. waste log. Turn 16. The waste log entry remains with the lead for review; Owen's shelf-task acceptance does not approve that separate record.

9. task acceptance. Turn 18. Task acceptance explicitly assigns the shelf check to Owen while preserving the completed count and separately pending waste review.

10. closing checklist. Turn 20. The closing checklist should show each task's true state, distinguishing counted, pending review, accepted, and completed work.

F Transfer conversation

Page 75

1. nine

Outgoing cook: "The completed sauce count is nine portions."

Nine portions is the completed sauce count supplied in this case.

2. rolls

Incoming cook: "The waste entry concerns two damaged rolls."

Rolls, not sauce portions, are the damaged items awaiting review.

3. unperformed

Outgoing cook: "The shelf check remains unperformed."

The check has not occurred even though a receiving cook accepts it.

4. Noor

Incoming cook: "The receiving cook is Noor."

Noor explicitly accepts responsibility for the next shelf check.

08

09 Conversation answers

More guests, smaller portions

E Extended conversation

Pages 76-77

1. recipe yield. Turn 2. Twelve portions at 250 mL each give a 3,000 mL, or 3 L, base yield.

2. scaling factor. Turn 4. The required 6 L divided by the original 3 L gives a scaling factor of 2, not the count-only ratio 2.5.

3. portion size. Turn 6. The new portion size is 200 mL, so the target is thirty smaller servings rather than thirty original-size servings.

4. prepared carrots. Turn 8. The ingredient amount is for carrots in the recipe's prepared form; it is not automatically the amount to purchase before trimming.

5. unit conversion. Turn 10. 4.8 L equals 4,800 mL; switching unit labels without converting the number would change the quantity.

6. Process time. Turn 14. Process time depends on the approved method and equipment; an ingredient scaling factor does not automatically multiply cooking time.

F Transfer exchange

Page 78

1. 3

Cook: The base yield is 3 liters.

Twenty times 150 mL equals 3,000 mL, or 3 L.

2. 4.5

Lead: The new target yield is 4.5 liters.

Thirty-six times 125 mL equals 4,500 mL, or 4.5 L.

3. 1.5

Cook: The conversion factor is 1.5 .

The new 4.5 L target divided by the 3 L base equals 1.5; portion count alone gives the wrong factor.

4. 900

Lead: The adjusted prepared celery is 900 grams.

The 600 g base ingredient multiplied by 1.5 gives 900 g in the same prepared form.

Background reading: [BC Cook Articulation Committee: recipe conversion and portion-size changes](#). The conversation is an original fictional teaching case.

10 Conversation answers

Buying weight is not usable yield

E Extended conversation

Pages 79-80

1. as-purchased weight. Turn 2. The test starts with 8 kg in purchased form, before the specified trimming stage.

2. yield percentage. Turn 4. 6.4 kg of prepared output divided by 8 kg input, multiplied by 100, equals 80% for this defined trimming stage.

3. edible portion. Turn 6. The requirement is 10 kg of prepared usable carrots, often described as the edible portion, not 10 kg of untrimmed purchased input.

4. shortfall. Turn 8. Adding 20% to 10 kg produces 12 kg input and only 9.6 kg usable output at 80%, a 0.4 kg shortfall.

5. cost per usable kilogram. Turn 10. The \$20 purchase cost divided by 10 kg prepared output is \$2 per usable kilogram, before labor and other costs.

6. portion ingredient cost. Turn 14. 0.25 kg at \$2 per usable kg costs \$0.50; this covers only the carrot ingredient, not the complete dish or its selling price.

F Transfer exchange

Page 81

1. 12

Cook: The required purchased amount is 12 kilograms.

Nine kilograms usable divided by 0.75 equals 12 kg purchased.

2. 36

Lead: The purchase cost is 36 dollars.

Twelve kilograms at \$3 per purchased kilogram costs \$36.

3. 4

Cook: The cost per usable kilogram is 4 dollars.

The \$36 purchase cost divided by 9 kg usable output equals \$4 per usable kilogram.

4. 0.80

Lead: A 200 g usable portion costs 0.80 dollars for this ingredient.

Two hundred grams is 0.2 kg; multiplying by \$4 per usable kilogram gives \$0.80.

10

Background reading: [BC Cook Articulation Committee: yield testing and usable-product costing](#). The conversation is an original fictional teaching case.

11 Conversation answers

Trace the ingredient into the dish

E Extended conversation

Pages 82-83

- 1. lot code.** Turn 2. Q17 is the recalled supplier lot, linking the specific sauce receipt and containers; a brand name alone is not the full identifier.
- 2. remaining stock.** Turn 4. Two sealed bottles and one partly used bottle contain remaining sauce; an empty fourth bottle is not a full bottle available for recovery.
- 3. batch records.** Turn 8. The kitchen batch records link supplier sauce lot Q17 to dressings D9 and D10, extending the check beyond the original bottles.
- 4. disposition.** Turn 10. Disposition is the actual decision and outcome for held material, such as authorized return or disposal; holding alone does not establish either.
- 5. traceability gap.** Turn 14. Earlier service is still under investigation; the incomplete trail cannot support a claim that no guest received affected food.
- 6. recall update.** Turn 18. A recall update may change scope or instructions; merely receiving it does not establish that the earlier interpretation remains current.

F Transfer exchange

Page 84

1. R6

Cook: The recalled supplier lot is R6 .

R6 identifies the supplier lot in the verified notice, not the kitchen's prepared-batch identifier.

2. three

Lead: The sealed tubs containing remaining ingredient number three .

Three tubs still contain sealed stock; the two fully used tubs do not add recovered ingredient.

3. S4

Cook: The preparation record links the used ingredient to batch S4 .

S4 is the prepared batch that must remain visible alongside the supplier-lot and container records.

4. unresolved

Lead: Earlier service remains unresolved .

No completed service-history check is supplied, so the team cannot claim that nobody received affected food.

Background reading: [FSANZ: identifying and separating recalled food and maintaining traceability](#). The conversation is an original fictional teaching case.

Find the move you need

Use these as precise language models. Replace details only when you know the actual facts, authority, and agreed conditions.

01 Clarifying a prep list

Identify the ambiguity: The prep list says soup, twenty-four, but the unit is missing.

Name the recipe basis: Use the current recipe.

Check the recipe yield: I will use the yield stated in the approved recipe.

Full phrase set: pages 7-8 | Dialogue: pages 10-11

02 Reporting deliveries and stock discrepancies

State the document: The delivery note lists six cases of tomatoes.

Attribute the explanation: The driver says they may be on another trolley.

Keep the report neutral: I am reporting the difference, not assigning fault.

Full phrase set: pages 16-17 | Dialogue: pages 19-20

03 Reading tickets and modifications

Identify both records: I have the original two-tart ticket and the revised slip for three.

Give the total: Ticket 41 is three tarts total.

Avoid changing every plate: The salad substitution applies to one item only.

Full phrase set: pages 25-26 | Dialogue: pages 28-29

04 Coordinating the pass

Answer the whole-ticket question: Not the whole ticket yet.

Locate the remainder: The other two are still at my station.

Separate plating and release: Plated does not mean the full release check is complete.

Full phrase set: pages 34-35 | Dialogue: pages 37-38

Keep the conversation productive

Use these as precise language models. Replace details only when you know the actual facts, authority, and agreed conditions.

05 Communicating a shortage and an alternative

State the available count: Three potato portions remain unallocated.

Offer the actual alternative: Rice is available as a proposed alternative side.

Avoid a silent change: Do not substitute rice before the choice is confirmed.

Full phrase set: pages 43-44 | Dialogue: pages 46-47

06 Checking dietary modifications

Receive the update: Thank you; I have heard that the diner reports a milk allergy.

Name the unchecked component: The sauce specification has not been checked.

Ask about the actual recipe: We need the current sauce recipe or product information.

Full phrase set: pages 52-53 | Dialogue: pages 55-56

07 Reporting equipment and dish-station needs

Identify the device: Scale B at the pastry prep bench is affected.

Avoid a guessed cause: I do not know the cause.

Do not claim a repair: No repair has been completed.

Full phrase set: pages 61-62 | Dialogue: pages 64-65

08 Closing and handing over unfinished work

Open the handover: I have one completed count and two unfinished matters to hand over.

State the unchecked task: The closing shelf check has not been performed.

Avoid a false disposal record: The waste entry is pending; I cannot confirm disposal.

Full phrase set: pages 70-71 | Dialogue: pages 73-74

review owner	identify the review owner	51
review pending	mark review pending	68
review status	report review status	60
revised ticket	read the revised ticket	23
revision trail	preserve the revision trail	24
runner	brief the runner	32

Find a term and its context

The page number leads to the definition and a typical word combination. Repeated terms have separate entries when they serve different lesson contexts.

safety assurance	avoid an unsupported safety assurance	51
sanitizing	verify the sanitizing step	69
sauce specification	verify the sauce specification	50
scaling factor	calculate the scaling factor	6
seat mapping	verify seat mapping	24
service request	raise a service request	60
shared utensil	check shared-utensil use	51
shelf check	perform the shelf check	68
short delivery	verify a short delivery	14
shortfall	quantify the shortfall	41
side order	clarify the side order	24
sign-off	obtain the required sign-off	69
standard accompaniment	identify the standard accompaniment	24
standardized recipe	follow the standardized recipe	5
starch	compare the starch options	42
status call	give a status call	33
stock rotation	check stock rotation	69
stockout	report a stockout	41
storage location	record the storage location	69
substitution	confirm the substitution	23
superseded ticket	identify the superseded ticket	23
supplier query	raise a supplier query	15
synchronized service	coordinate synchronized service	33
tare	account for the tare	6

Find a term and its context

The page number leads to the definition and a typical word combination. Repeated terms have separate entries when they serve different lesson contexts.

task acceptance confirm task acceptance	68
task start confirm the task start	6
ticket number confirm the ticket number	23
ticket rail organize the ticket rail	24
ticket readiness confirm ticket readiness	32
ticket update communicate the ticket update	51
traceability preserve traceability	15
trolley check the trolley	14
unallocated portion count unallocated portions	41
unchecked location identify the unchecked location	15
unit of measure name the unit of measure	5
unperformed check disclose an unperformed check	69
unverified component identify an unverified component	51
update trigger identify an update trigger	33
verification complete equipment verification	60
verified receipt record verified receipt	15
volume measure the volume	6
warewashing follow warewashing procedures	69
waste log update the waste log	68
weighing task pause the weighing task	59
whey protein identify whey protein	50
whole-table call make a whole-table call	32
yield percentage calculate the yield percentage	42
yield variance investigate a yield variance	42

Original cases. Clear boundaries.

These are original fictional teaching conversations, not transcripts of real workers. Names, figures, organizations, and incidents are invented. Sources support terminology and communication aims, not the fictional results or an endorsement of this book.

[1] US Bureau of Labor Statistics. Cooks.

[Open the original source](#)

Occupational context for recipe-based preparation, station work, portioning, and kitchen coordination. The original cases do not reproduce workplace transcripts. Checked 10 October 2026.

[2] US Food and Drug Administration. Food Allergies.

[Open the original source](#)

Background for allergy and cross-contact terminology. Removing a named topping does not verify a complete dish or its preparation. Checked 10 October 2026.

[3] US Food and Drug Administration. Food Code 2026.

[Open the original source](#)

Model code offered for jurisdictional adoption. The language exercises do not replace applicable local rules or the actual kitchen food-safety system. Checked 10 October 2026.

[4] US Food and Drug Administration. Have Food Allergies? Read the Label.

[Open the original source](#)

Ingredient-source context, including casein and whey as milk proteins. Label information must match the actual product; it does not alone settle kitchen handling. Checked 10 October 2026.

All kitchens, tickets, quantities, and incidents are fictional. This book teaches workplace English, not culinary certification, food-safety procedures, medical advice, or equipment repair. Follow current local requirements, approved recipes, allergen controls, equipment instructions, and emergency procedures. No example authorizes serving unverified food, bypassing a control, or repairing faulty equipment.

English Ladder | English for Work | 2026 edition. The B2-C1 range is an editorial study recommendation, not a proficiency certification.
