No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means without prior written permission from the author, except as permitted by law.

**Eight lessons. Eleven extended conversations.**

**INSIDE THE BOOK**

192 vocabulary entries / 128 reusable phrases  
220 extended-dialogue turns / 11 transfer exchanges  
Word banks and explained answer keys

Upper-intermediate to advanced (B2-C1). For retail associates, cashiers, collection-desk staff, customer-service colleagues, and shift supervisors.

2026 edition

# Eight scenarios. Eight skills.

Eight shop-floor lessons, plus three extended conversations about split payments, shelf replenishment, and weighed goods.

## 01 Finding the item the shopper actually means

4

Which blue shirt? | Use a reference, material, and size to identify a product before making an unverified local-stock claim.

## 02 Comparing fit, materials, and label information

13

The care label decides the comparison | Compare stated garment features and care requirements without inventing comfort, fit, or durability claims.

## 03 Resolving shelf prices and offer conditions

22

One bottle is not half the bundle | Explain a quantity condition, distinguish average and single-item prices, and respect the shopper choice.

## 04 Checking the basket and payment status

31

One mug, two recorded entries | Correct a duplicate before payment and distinguish the revised basket total from a refund or completed transaction.

## 05 Discussing returns and exchanges at the counter

40

Eligible does not mean in stock | Apply supplied exchange conditions while separating eligibility from replacement availability and completed processing.

## 06 Explaining local stock and collection status

49

An order message is not a pickup notice | Distinguish order acknowledgment from collection readiness and give a reliable update commitment without promising an outcome.

## 07 Managing queues and offering practical assistance

58

A checkout route that works | Ask what assistance is preferred, offer an available checkout route, and respect individual choices and position in line.

## 08 Handing over a till and an unfinished query

67

Five dollars below the expected count | Report an unverified cash difference neutrally and transfer ownership of two unfinished checks without inventing a cause.

# Helpful does not mean guessing.

A strong retail conversation identifies the exact item, explains the relevant condition, and makes the next step clear. Careful language protects the shopper from a wrong variation or price and helps colleagues distinguish checked facts from unfinished work.

## Identify before promising stock

Color alone may not identify an advertised product. Confirm the item reference, material, size, and location before making an availability claim or offering an unrequested substitute.

"You mean the medium cotton shirt C218; I have not checked local stock yet."

## State the condition with the price

A two-item offer does not necessarily give one item half the bundle price. State the qualifying quantity and the complete amount for each option without pressuring the shopper to buy more.

"One bottle is \$3; two qualifying bottles are \$5."

## Separate eligibility from completion

Meeting a fictional exchange policy does not establish replacement stock. An order acknowledgment is not a collection notice, and correcting an unpaid basket is not the same as issuing a refund.

"The exchange conditions are met, but I still need to check the larger size."

## Keep help and handovers specific

Ask which assistance the shopper prefers. At shift change, name unfinished checks and their owner without turning a difference into an accusation or an accepted task into a completed one.

"The recorded count is \$5 below expected; the second check is pending and the cause is unknown."

### PROFESSIONAL BOUNDARIES

All stores, shoppers, prices, product references, balances, offers, and policies are fictional. This book teaches workplace English, not legal advice, payment-system operation, accounting investigation, or accessibility certification. Follow actual store procedures, product information, payment-security requirements, applicable consumer and accessibility laws, and emergency arrangements. A fictional exchange policy does not replace statutory rights. Ask before providing personal assistance or handling a shopper's belongings or mobility aid.

# Which blue shirt?

## A Read the situation

**Use a reference, material, and size to identify a product before making an unverified local-stock claim.**

Shopper Casey asks associate Hana for the blue shirt in an advertisement. The advertisement contains two blue shirts: linen L214 and cotton C218. Casey wants the cotton version in medium, not the linen version or another size. Local availability has not been checked. Hana confirms C218, blue, medium, and cotton before beginning a stock inquiry. No item has been located, reserved, or sold, and the advertisement does not prove that the requested variation is available at this branch.

PEOPLE / Casey: Shopper | Hana: Retail associate

### CLARIFICATION IS PART OF HELPING

A shopper may reasonably remember the image rather than an item number. Narrow the choice with a short concrete question, then read back the product details. Avoid making the shopper repeat the whole story or treating a displayed advertisement as proof of local availability.

## Briefing checks

Circle one answer in each item. Use the briefing.

### 1. Which product does Casey mean?

A Cotton C214

C Linen L214

B Cotton C218

D Either blue shirt

### 2. Which size is requested?

A Any available size

C Small

B Medium

D Large

### 3. What is known about local stock?

A The item is definitely available

C One has already been reserved

B The item is definitely sold out

D It has not been checked

Answers and explanations: [page 85](#).

# The vocabulary that does the work

## B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

### item reference

Identifier used to distinguish a product.

**IN USE confirm the item reference**

### stock-keeping unit

Internal identifier for a stocked product variation, often abbreviated SKU.

**IN USE check the stock-keeping unit**

### barcode

Machine-readable code used to identify an item or record.

**IN USE scan the barcode**

### product variation

Specific version differing in size, color, or another feature.

**IN USE confirm the product variation**

### colorway

Color version offered within a product range.

**IN USE identify the blue colorway**

### size

Labelled dimension category such as medium.

**IN USE confirm the requested size**

### cotton

Textile fiber identified for the requested shirt in this case.

**IN USE identify the cotton version**

### linen

Different textile fiber used in the other advertised shirt.

**IN USE distinguish the linen version**

### fiber content

Information describing the fibers used in a textile.

**IN USE check the fiber content**

### advertised item

Product featured in a promotion or advertisement.

**IN USE identify the advertised item**

### product image

Picture of a product, not proof of local stock.

**IN USE compare the product image**

### range

Group of related products or variations.

**IN USE identify the product range**

### Precision check

The exact request is blue cotton C218 in medium. Linen L214 is a different item even though it is also blue. Confirming the product does not establish stock, a reservation, or permission to substitute another variation.

# The vocabulary that does the work

## B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

### local availability

Whether the exact variation is available at the relevant branch.

**IN USE check local availability**

### branch

Particular store location within a retailer.

**IN USE identify the branch**

### shop floor

Customer-accessible area where merchandise is displayed.

**IN USE check the shop floor**

### stockroom

Storage area for merchandise not on the selling floor.

**IN USE check the stockroom**

### display sample

Item shown for viewing, not necessarily available for sale.

**IN USE distinguish a display sample**

### stock inquiry

Request to check whether a specific item is available.

**IN USE make a stock inquiry**

### stock record

System record of recorded merchandise quantities or status.

**IN USE consult the stock record**

### physical check

Verification of the actual item and its location.

**IN USE request a physical check**

### reservation

Confirmed arrangement to hold an item under the store process.

**IN USE distinguish a reservation**

### substitution

Replacement with a different item or variation requiring agreement.

**IN USE discuss a substitution**

### specification

Set of details defining the requested item.

**IN USE repeat the specification**

### planogram

Diagram assigning products and display space on a fixture.

**IN USE follow the planogram**

### Precision check

A stock-keeping unit, item reference, and barcode may identify different levels of detail in a retailer's system. Use the actual system correctly and read back the shopper-facing details; do not assume a familiar-looking code proves the size or local availability.

# Phrases you can actually use

## **C** Notice the language / 1 of 2

### **NARROW THE ADVERTISEMENT**

"The ad shows two blue shirts; do you mean cotton or linen?"

### **NAME THE SELECTED REFERENCE**

"The cotton shirt is C218."

### **READ BACK THE REQUEST**

"Blue cotton C218 in medium; is that right?"

### **AVOID AN ADVERTISEMENT ASSUMPTION**

"The advertisement does not confirm stock at this branch."

### **ASK FOR THE SIZE**

"Which size are you looking for?"

### **DISTINGUISH THE OTHER ITEM**

"L214 is the linen version."

### **SEPARATE IDENTIFICATION AND STOCK**

"That's the right shirt; let me check whether we have your size here."

### **CONFIRM BEFORE SEARCHING**

"I will use that exact reference and size for the stock inquiry."

---

## **The blue shirt**

A shared color may still leave more than one possible item.

## **In medium**

In introduces the requested size rather than a different product name.

## **Cotton versus linen**

The material distinction identifies separate advertised products in this case.

# Phrases you can actually use

## **C** Notice the language / 2 of 2

### KEEP ALTERNATIVES OPTIONAL

"I would ask before offering a different size or material."

### CLARIFY THE LOCATION

"Are you asking about availability at this branch?"

### KEEP THE RECORD PRECISE

"Medium cotton, not medium linen."

### INVITE CORRECTION

"Please tell me if I have the size or material wrong."

### AVOID A RESERVATION CLAIM

"Nothing has been reserved yet."

### EXPLAIN THE NEXT STEP

"The next step is to check the requested variation."

### AVOID PREMATURE CERTAINTY

"I cannot confirm available or sold out before the check."

### CLOSE THE CLARIFICATION

"The item is confirmed; its stock status is still unknown."

---

## Yet

Not checked yet means unresolved, not unavailable.

## At this branch

Limits the availability question to a specific store location.

## Identified versus reserved

Identifying the correct item does not create a hold or confirm stock.

# Choose the precise message

## **D** Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

### 1. Which read-back is accurate?

- A** Blue cotton C218 in medium.
- B** Blue linen L214 in medium.
- C** Blue cotton C218 in small.
- D** Blue cotton C214 in medium.

### 2. Which stock statement is supported?

- A** A copy is already reserved.
- B** Local availability has not been checked yet.
- C** The advertisement guarantees one here.
- D** The medium version is sold out.

### 3. Which next step follows the clarification?

- A** Mark the sale complete.
- B** Check the exact requested variation.
- C** Substitute linen without asking.
- D** Promise a medium based on the photo.

### 4. Which distinction should a colleague receive?

- A** C218 is cotton; L214 is linen.
- B** C218 is linen; L214 is cotton.
- C** C218 identifies the requested large shirt.
- D** L214 identifies the requested medium cotton shirt.

[Answers and explanations: page 85.](#)

# Which blue shirt?

## E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

### WORD + PHRASE BANK

specification / advertised item / stock inquiry / substitution / cotton / item reference / local availability / reservation / size / product variation

- 01 **Casey:** Hi, do you have the blue shirt from this ad? The picture is small, so I can't make out the number.
- 02 **Hana:** There are two. I'll check the <sup>1</sup> \_\_\_\_\_ first: did you want the cotton shirt or the linen one?
- 03 **Casey:** Cotton, please. It's the one on the left, with the sleeves rolled up. I hadn't noticed the other shirt.
- 04 **Hana:** The <sup>2</sup> \_\_\_\_\_ one is C218. L214 is linen. What size would you like me to look for?
- 05 **Casey:** Medium. Small is usually too tight across my shoulders, and I don't want to take a chance on it.
- 06 **Hana:** I'll keep the <sup>3</sup> \_\_\_\_\_ as medium. Same blue as the picture, or were you looking for another color?
- 07 **Casey:** This blue. I assumed that because it was in the ad, you'd have it here. Is that how it works?
- 08 **Hana:** An <sup>4</sup> \_\_\_\_\_ isn't a live stock count. Let me check this branch before I tell you whether we have one.
- 09 **Casey:** Fair enough. There was a blue medium near the door, but the fabric felt different. Could that have been the linen shirt?
- 10 **Hana:** Possibly; we'd need its label. The <sup>5</sup> \_\_\_\_\_ we're checking is C218, blue, medium, cotton.

# The conversation, continued

## E Conversations / turns 11-20

Continue with the word bank on page 10.

11 **Casey:** Yes. I'm only asking about this shop for now. I can't get to another branch today.

12 **Hana:** Then I'll focus on <sup>6</sup> \_\_\_\_\_. We can discuss other options later if you want to.

13 **Casey:** Does asking you to look put one on hold, or would I need to ask separately for that?

14 **Hana:** A <sup>7</sup> \_\_\_\_\_ is separate. Nothing's been put aside; we're still checking what you want.

15 **Casey:** Could you read it back? Those two numbers are similar enough that I might have copied the wrong one.

16 **Hana:** Here's the <sup>8</sup> \_\_\_\_\_: blue cotton C218 in medium. Not the linen L214.

17 **Casey:** That's right. If there's only linen, please let me know. I wouldn't want it swapped without checking with me.

18 **Hana:** Any <sup>9</sup> \_\_\_\_\_ would be your choice. I'll check the shirt you asked for first.

19 **Casey:** Thanks. I'll stay nearby while you find out. I don't need you to look for a different size.

20 **Hana:** I'll start the <sup>10</sup> \_\_\_\_\_ for blue cotton C218 in medium at this branch. We don't have the stock result yet.

### ANSWERS / EXPLANATIONS: PAGE 86

1. item reference | 2. cotton | 3. size | 4. advertised item | 5. product variation | 6. local availability | 7. reservation | 8. specification | 9. substitution | 10. stock inquiry

# Identify a different advertised item

## F Say it

An advertisement shows red wool W310 and red cotton C314 sweaters. The shopper wants red cotton C314 in large. Local stock is unchecked, and no item is reserved.

Complete the four gaps. Use each bank entry once.

### WORD + PHRASE BANK

large / unchecked / C314 / reserved

Associate: "The requested reference is <sup>1</sup> \_\_\_\_\_."

Shopper: "The requested size is <sup>2</sup> \_\_\_\_\_."

Associate: "Local stock remains <sup>3</sup> \_\_\_\_\_."

Shopper: "Nothing has been <sup>4</sup> \_\_\_\_\_."

### ANSWERS / EXPLANATIONS: PAGE 86

1. C314 | 2. large | 3. unchecked | 4. reserved

## Rehearse with a fixed script

1. Read turns 2, 6, and 16 with C218 stressed. Your partner points to the cotton choice, not L214.
2. Repeat the complete request using the four facts: C218, blue, medium, cotton.
3. Read turns 14 and 20. Keep locating stock and reserving it as separate steps.

### WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

# The care label decides the comparison

## A Read the situation

**Compare stated garment features and care requirements without inventing comfort, fit, or durability claims.**

Shopper Luis needs a machine-washable jacket and compares two \$60 options with associate Priya. Jacket A is unlined and its label permits machine washing. Jacket B is lined and its label says dry-clean only. No other care details, durability tests, or fit measurements are supplied. A meets the stated washing requirement on the available label information; B does not. Luis asks to look at A next but has not tried it on or purchased it. Priya must not infer washing suitability from the presence or absence of a lining.

PEOPLE / Luis: Shopper | Priya: Retail associate

### USE EVIDENCE INSTEAD OF CONFIDENT SALES LANGUAGE

Words such as comfortable, durable, and easy-care can mean different things to different shoppers. Compare the label facts with the stated need, and distinguish a feature from a tested benefit. A useful recommendation can be conditional without sounding evasive.

## Briefing checks

Circle one answer in each item. Use the briefing.

1. Which jacket meets the stated machine-washing requirement?

A B, because it is lined

B Both, because they cost the same

C Neither, because A is unlined

D A, according to its label

2. What do the two jackets cost?

A \$60 for the pair

B A \$60 and B \$90

C \$60 each

D A \$30 and B \$60

3. What is unverified?

A Fit, comfort, and durability

B A's unlined construction

C B's dry-clean-only label

D The stated equal prices

Answers and explanations: page 87.

# The vocabulary that does the work

## B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

### garment

Item of clothing.

**IN USE compare the garments**

### care label

Label stating how a garment should be cared for.

**IN USE read the care label**

### machine-washable

Suitable for machine washing under the actual label instructions.

**IN USE check the machine-washable claim**

### dry-clean only

Label instruction restricting cleaning to dry cleaning.

**IN USE explain the dry-clean-only instruction**

### hand wash

Care instruction specifying washing by hand.

**IN USE distinguish a hand-wash instruction**

### lining

Inner layer of a garment.

**IN USE identify the lining**

### lined

Made with an inner lining.

**IN USE describe the lined jacket**

### unlined

Made without a separate inner lining.

**IN USE describe the unlined jacket**

### outer fabric

Material forming the garment's external surface.

**IN USE identify the outer fabric**

### fiber blend

Combination of different fibers in a textile.

**IN USE read the fiber blend**

### woven fabric

Textile formed by interlacing sets of yarns.

**IN USE identify woven fabric**

### knit fabric

Textile formed through interlocking loops.

**IN USE distinguish knit fabric**

### Precision check

The care label, not the lining, answers the washing question. A is unlined and permits machine washing; B is lined and says dry-clean only. Do not extend these two examples into a rule about all lined or unlined jackets.

# The vocabulary that does the work

## B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

### seam

Line where pieces of fabric are joined.

**IN USE inspect the seam**

### hem

Finished edge of a garment or fabric section.

**IN USE identify the hem**

### cuff

Finished section at the end of a sleeve.

**IN USE compare cuff styles**

### fastening

Part used to close or secure the garment.

**IN USE check the fastening**

### zipper

Sliding fastening with interlocking elements.

**IN USE inspect the zipper**

### fit

How the garment sits on the individual wearer.

**IN USE check the fit**

### cut

Overall shaping or silhouette of a garment.

**IN USE compare the cut**

### size chart

Guide relating labelled sizes to stated measurements.

**IN USE consult the size chart**

### measurement

Quantified dimension used to compare fit.

**IN USE check the measurement**

### shrinkage

Reduction in dimensions, not ruled out by an unsupported claim.

**IN USE avoid a shrinkage guarantee**

### colorfastness

Ability of a textile to retain color under specified conditions.

**IN USE check colorfastness information**

### durability claim

Statement about resistance to wear that needs support.

**IN USE avoid an unsupported durability claim**

## Precision check

Both prices are \$60 each. Equal price does not imply equal care, fit, comfort, or durability. The shopper has asked to inspect A, not confirmed that it fits or completed a purchase. Use actual label details for any further care question.

# Phrases you can actually use

## **C** Notice the language / 1 of 2

### ASK ABOUT THE REQUIREMENT

"Is machine washing a requirement for you?"

### READ THE SECOND LABEL

"Jacket B's label says dry-clean only."

### AVOID AN INFERENCE

"The lining alone does not tell us how to clean it."

### CONNECT FACT AND NEED

"A's label permits machine washing, so let's look at that one first."

### READ THE FIRST LABEL

"Jacket A's label permits machine washing."

### COMPARE CONSTRUCTION

"A is unlined; B has a lining."

### STATE THE EQUAL PRICES

"Both jackets are \$60 each."

### KEEP FIT SEPARATE

"We still need to check how it fits you."

---

### Each versus together

Sixty dollars each does not mean sixty dollars for both jackets.

### Permits versus recommends

Use the actual wording supplied rather than strengthening or changing the instruction.

### Only

Dry-clean only excludes treating the garment as machine-washable in this comparison.

# Phrases you can actually use

## **C** Notice the language / 2 of 2

### **AVOID A COMFORT CLAIM**

"Try it on and see how it feels; the lining alone won't tell us."

### **OFFER INSPECTION**

"Would you like to look at A more closely?"

### **AVOID INVENTED SETTINGS**

"No washing temperature has been supplied in this comparison."

### **INVITE A PRACTICAL CHECK**

"You can compare the fit before making your choice."

### **AVOID A DURABILITY PROMISE**

"We do not have evidence here that one will last longer."

### **USE THE FULL LABEL**

"We should check the actual instructions for any further care detail."

### **CLARIFY PURCHASE STATUS**

"Looking at A does not mean you have decided to buy it."

### **SUMMARIZE THE EVIDENCE**

"Same price, different care instructions, fit still unverified."

---

### **Feature versus benefit**

A lining is a construction feature, not automatic proof of comfort or durability.

### **Meets the requirement**

This applies to the specified washing need, not every possible shopping preference.

### **Not tried on**

Fit remains unverified until the relevant practical check occurs.

# Choose the precise message

## **D** Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

### 1. Which recommendation uses the supplied evidence?

- A** A meets your machine-washing requirement according to its label.
- B** All unlined jackets can be machine washed.
- C** B must wash well because it costs the same.
- D** A is guaranteed more comfortable.

### 2. Which comparison is unsupported?

- A** B will definitely last longer because it has a lining.
- B** Both jackets cost \$60 each.
- C** A is unlined.
- D** B's label says dry-clean only.

### 3. Which statement preserves the purchase status?

- A** Asking about A authorizes payment.
- B** Luis wants to inspect A but has not tried it on or bought it.
- C** Luis has confirmed A fits perfectly.
- D** Both jackets have been purchased.

### 4. What should resolve a further washing-temperature question?

- A** A guess based on the price
- B** Assuming all cotton settings apply
- C** Copying instructions from a different jacket
- D** The actual care-label instructions

Answers and explanations: page 87.

# The care label decides the comparison

## E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

### WORD + PHRASE BANK

washing temperature / durability claim / comfort claim / machine-washable / size chart / care label / lining / only / each / fit

- 01 **Luis:** I need something I can put in the washing machine. These are both sixty dollars, aren't they? Which one would work?
- 02 **Priya:** Let us check the <sup>1</sup> \_\_\_\_\_ on each. Jacket A permits machine washing, while jacket B says dry-clean only.
- 03 **Luis:** This one has a lining and that one doesn't. I usually check the fabric first, but perhaps that's not enough.
- 04 **Priya:** B has a <sup>2</sup> \_\_\_\_\_, and A is unlined. Those are construction details, but the lining alone does not establish the cleaning requirements or their cause.
- 05 **Luis:** A sounds more suitable, then. I don't want regular dry-cleaning bills on top of the purchase price.
- 06 **Priya:** On the information here, A is <sup>3</sup> \_\_\_\_\_ under its label instructions. That meets the specific care requirement you have stated.
- 07 **Luis:** Does dry-clean only really rule out machine washing, or is it just the maker's preferred method?
- 08 **Priya:** Yes. The word <sup>4</sup> \_\_\_\_\_ is important in B's instruction. I should not describe that label as permission to machine wash the jacket.
- 09 **Luis:** And it's sixty for either one, not sixty for both? I want to be sure I'm comparing the same price.
- 10 **Priya:** Both are sixty dollars <sup>5</sup> \_\_\_\_\_. The equal prices do not mean the care instructions or other characteristics are identical.

# The conversation, continued

## E Conversations / turns 11-20

Continue with the word bank on page 19.

- 11 **Luis:** I'll look at A first. I haven't tried either jacket, so I still need to see how the shoulders fit.
- 12 **Priya:** Of course. The <sup>6</sup> \_\_\_\_\_ is a separate question. Meeting your washing requirement does not tell us whether this particular jacket fits you as you want.
- 13 **Luis:** B feels different with that inner layer. Is that supposed to make it more comfortable, or does it depend on the wearer?
- 14 **Priya:** I cannot make a <sup>7</sup> \_\_\_\_\_ from the lining alone. We can compare the stated features without promising how either will feel to you.
- 15 **Luis:** What about lasting longer? I can see the extra layer, but I don't know whether that tells us much about wear.
- 16 **Priya:** Correct. A <sup>8</sup> \_\_\_\_\_ would need support. We have not checked evidence that one of these jackets will last longer than the other.
- 17 **Luis:** Let's look at A, then. I want to check it properly before I decide; I'm not ready to buy it yet.
- 18 **Priya:** I can help you with that. We can check the <sup>9</sup> \_\_\_\_\_ and the actual garment information rather than treating the washing label as a complete recommendation.
- 19 **Luis:** Before I wash it, I'll need the full instructions. I can't read the temperature information from where I'm standing.
- 20 **Priya:** That is the right detail to verify. The <sup>10</sup> \_\_\_\_\_ has not been confirmed in our discussion, and I will not invent one. For now, A meets the stated care requirement, with fit and purchase still open.

### ANSWERS / EXPLANATIONS: PAGE 88

1. care label | 2. lining | 3. machine-washable | 4. only | 5. each | 6. fit | 7. comfort claim | 8. durability claim | 9. size chart | 10. washing temperature

# Compare another pair of care labels

## F Say it

Jacket C is lined and permits machine washing. Jacket D is unlined and says dry-clean only. Both are \$70 each. The shopper requires machine washing and has tried neither on.

Complete the four gaps. Use each bank entry once.

### WORD + PHRASE BANK

each / fit / C / only

Associate: "Jacket <sup>1</sup> \_\_\_\_\_ meets the stated washing requirement."

Shopper: "Both jackets cost seventy dollars <sup>2</sup> \_\_\_\_\_."

Associate: "Jacket D says dry-clean <sup>3</sup> \_\_\_\_\_."

Shopper: "The <sup>4</sup> \_\_\_\_\_ remains unverified."

### ANSWERS / EXPLANATIONS: PAGE 88

1. C | 2. each | 3. only | 4. fit

## Rehearse with a fixed script

1. Read A's and B's care instructions aloud; emphasize only in B's instruction.
2. Read the sixty-dollars-each line, then the fit question, without claiming a purchase.
3. Use turns 4 and 20 to separate a lining from the actual care instructions.

### WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

# One bottle is not half the bundle

## A Read the situation

03

**Explain a quantity condition, distinguish average and single-item prices, and respect the shopper choice.**

Shopper Nia has one juice bottle with a regular single-bottle price of \$3. The shelf offer is two qualifying bottles for \$5; single bottles remain \$3. Nia expects one bottle to cost \$2.50. Associate Ben explains that \$2.50 is the average per bottle only when buying the qualifying pair. Two at regular prices would cost \$6, so the pair saves \$1 against that comparison, but it requires \$2 more total spending than one \$3 bottle. Nia chooses one bottle at \$3. No other charges apply in the exercise.

PEOPLE / Nia: Shopper | Ben: Retail associate

### EXPLAIN THE OFFER WITHOUT PUSHING THE EXTRA PURCHASE

A lower average price does not necessarily serve a shopper who needs only one item. State the quantity condition and both complete totals neutrally. Distinguish saving against two regular-price items from spending less than the single item already chosen.

## Briefing checks

Circle one answer in each item. Use the briefing.

1. What is the price of one bottle?

A \$6

B \$3

C \$2.50

D \$5

2. What qualifies for the \$5 offer?

A One qualifying bottle

B Two bottles of any juice

C One bottle plus any grocery item

D Two qualifying bottles

3. Which choice does Nia make?

A One bottle at \$3

B Two bottles at \$5

C One bottle at \$2.50

D Two bottles at \$3

Answers and explanations: page 89.

# The vocabulary that does the work

## B Find the words / 1 of 2

03

Read the definitions and say the common word combinations aloud.

### shelf label

Displayed product and price information at the shelf.

**IN USE check the shelf label**

### multibuy offer

Promotion requiring purchase of a specified number of items.

**IN USE explain the multibuy offer**

### qualifying item

Product that meets the offer's stated conditions.

**IN USE identify a qualifying item**

### quantity condition

Required number of items for an offer.

**IN USE state the quantity condition**

### single-item price

Price charged when buying one item alone.

**IN USE confirm the single-item price**

### regular price

Non-promotional price used as the stated comparison.

**IN USE compare regular prices**

### bundle total

Complete price for the grouped qualifying items.

**IN USE state the bundle total**

### average price

Total divided by the number of items, not necessarily the one-item selling price.

**IN USE explain the average price**

### price per item

Amount per individual item under the specified purchase conditions.

**IN USE compare the price per item**

### unit pricing

Price stated per standard quantity such as a liter or kilogram.

**IN USE distinguish unit pricing**

### comparison basis

Quantity and conditions used to calculate a saving.

**IN USE identify the comparison basis**

### saving

Reduction against the specified comparison amount.

**IN USE calculate the saving**

### Precision check

Two bottles for \$5 works out to \$2.50 per bottle only within that qualifying purchase. It does not change the stated \$3 single-bottle price. One bottle and two bottles are different purchase quantities with different complete totals.

# The vocabulary that does the work

## B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

### extra spending

Increase in total outlay compared with another purchase choice.

**IN USE explain the extra spending**

### minimum purchase

Smallest quantity or spend needed to qualify.

**IN USE clarify the minimum purchase**

### mix-and-match

Offer allowing specified different items to form a qualifying group.

**IN USE check mix-and-match eligibility**

### exclusion

Item or condition not covered by an offer.

**IN USE explain an exclusion**

### promotion period

Dates during which an offer applies.

**IN USE check the promotion period**

### loyalty price

Price available under a stated membership condition.

**IN USE clarify the loyalty price**

### coupon

Voucher or code offering a benefit under specified terms.

**IN USE check a coupon**

### redemption condition

Requirement for using a coupon or offer.

**IN USE explain redemption conditions**

### price query

Shopper question about the amount or conditions charged.

**IN USE resolve a price query**

### tare

Weight of packaging excluded when finding a product's net weight.

**IN USE deduct the correct tare**

### basket total

Total for the shopper's selected goods.

**IN USE confirm the basket total**

### purchase preference

Shopper's choice among clearly explained options.

**IN USE respect the purchase preference**

### Precision check

The pair saves \$1 compared with two bottles at \$3 each. It still costs \$2 more than buying only one \$3 bottle. Always name the comparison basis before saying cheaper or saves money; do not imply a larger basket necessarily lowers total spending.

# Phrases you can actually use

## C Notice the language / 1 of 2

03

### ACKNOWLEDGE THE CALCULATION

"I see how you arrived at \$2.50 by dividing the pair price."

### CONFIRM THE SINGLE PRICE

"One bottle on its own remains \$3."

### GIVE BOTH COMPLETE TOTALS

"One is \$3; two qualifying bottles are \$5."

### CALCULATE THE SAVING

"The pair saves \$1 compared with that \$6 total."

### STATE THE CONDITION

"The \$5 offer applies to two qualifying bottles."

### EXPLAIN THE AVERAGE

"\$2.50 is the average per bottle when you buy the pair."

### NAME THE COMPARISON

"Two at the regular price would cost \$6."

### EXPLAIN THE EXTRA OUTLAY

"It is still \$2 more spending than buying one bottle."

---

### For versus each

Two for \$5 gives a group price; \$3 each describes the regular single price here.

### Average versus sale price

Division explains the pair's average but does not create a one-item offer.

### Compared with

This phrase names the baseline for a saving claim.

# Phrases you can actually use

## C Notice the language / 2 of 2

03

### AVOID A FALSE SINGLE PRICE

"The bundle average is not the one-bottle selling price."

### AVOID ADDING CONDITIONS

"No membership condition is stated in this offer."

### ASK FOR THE CHOICE

"Would you prefer one at \$3 or two at \$5?"

### READ BACK QUANTITY

"The selected quantity is one, not the pair."

### KEEP QUALIFICATION EXPLICIT

"We should check that both bottles qualify for the offer."

### RESPECT THE NEED

"You do not have to buy a second bottle to keep the single-item option."

### CONFIRM THE SELECTION

"You have chosen one bottle at \$3."

### CLOSE THE QUERY

"The offer is clear, and your single-bottle choice remains unchanged."

---

## Qualifying

The offer applies only to products meeting the stated terms.

## More spending versus better value

A lower per-item price can still require a higher total payment.

## Choice versus pressure

Explain both options without treating the larger purchase as the only sensible one.

# Choose the precise message

## **D** Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

### 1. Which explanation is accurate?

- A** All juice products are automatically included.
- B** \$2.50 is the pair's average per bottle; one alone is \$3.
- C** One bottle must be \$2.50 because five divided by two is 2.5.
- D** The offer requires three bottles.

### 2. What is the saving on the pair against two regular-price bottles?

- A** \$1
- B** \$2
- C** \$2.50
- D** \$3

### 3. How much more does the pair cost than buying one bottle?

- A** \$1
- B** Nothing
- C** \$2.50
- D** \$2

### 4. Which response respects the final choice?

- A** I added another bottle because the average is lower.
- B** One bottle at \$2.50; I applied the bundle average.
- C** Two bottles at \$6; I used the regular prices.
- D** One bottle at \$3; I will keep that quantity.

Answers and explanations: [page 89](#).

# One bottle is not half the bundle

## E Conversations / turns 1-10

03

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

### WORD + PHRASE BANK

quantity condition / purchase preference / quantity read-back / extra spending / qualifying items / basket total / price query / single-item price / comparison basis / average price

- 01 **Nia:** This bottle is coming up at three dollars, but the shelf says two for five. Shouldn't one be two fifty?
- 02 **Ben:** I see why you'd read it that way. There's a <sup>1</sup> \_\_\_\_\_: the five-dollar price applies when you buy two.
- 03 **Nia:** I divided five by two. So that figure isn't wrong; it just doesn't apply to the one bottle I've brought?
- 04 **Ben:** Right. Two fifty is the <sup>2</sup> \_\_\_\_\_ within that pair. One on its own is three dollars.
- 05 **Nia:** That's the part I missed. I thought the shelf label had replaced the old price for every bottle.
- 06 **Ben:** Here the <sup>3</sup> \_\_\_\_\_ stays three dollars. I'll show you both totals so you can choose.
- 07 **Nia:** If I did get another, could it be any juice, or would I need to look for the same offer?
- 08 **Ben:** Both must be <sup>4</sup> \_\_\_\_\_. We'd check the shelf offer for the exact products included.
- 09 **Nia:** What's the actual saving on two? I'm trying to work out whether it's worth carrying an extra bottle home.
- 10 **Ben:** The <sup>5</sup> \_\_\_\_\_ is six dollars for two at the regular price. The pair is five, saving one dollar.

# The conversation, continued

## E Conversations / turns 11-20

03

Continue with the word bank on page 28.

- 11 **Nia:** But compared with just paying for this one, I'd still be handing over more money today.
- 12 **Ben:** Yes, two dollars of <sup>6</sup> \_\_\_\_\_: five instead of three. The lower per-bottle average doesn't lower today's total for one.
- 13 **Nia:** I'll stick with one. I only need it for lunch, and I don't have room in my bag for another.
- 14 **Ben:** No problem. I'll keep your <sup>7</sup> \_\_\_\_\_ as one bottle. The offer is there if you need two.
- 15 **Nia:** Thank you. Please don't add another one. I was asking about the price, not asking for the pair.
- 16 **Ben:** My <sup>8</sup> \_\_\_\_\_ is one bottle at three dollars. That's all we're keeping in this basket.
- 17 **Nia:** Do I need a loyalty card for the three-dollar price, or was the whole difference just the number of bottles?
- 18 **Ben:** No membership condition is stated here. This <sup>9</sup> \_\_\_\_\_ is about one bottle versus the qualifying pair.
- 19 **Nia:** All right. One bottle, three dollars. I understand the shelf sign now; I'll check the quantity wording next time.
- 20 **Ben:** Your <sup>10</sup> \_\_\_\_\_ is three dollars, with no other charges in this case. The quantity stays one.

### ANSWERS / EXPLANATIONS: PAGE 90

1. quantity condition | 2. average price | 3. single-item price | 4. qualifying items | 5. comparison basis | 6. extra spending | 7. purchase preference | 8. quantity read-back | 9. price query | 10. basket total

# Explain a different quantity offer

## F Say it

One qualifying soup can is \$4. The offer is three qualifying cans for \$10, with no other charges. The shopper selects one can. Three at regular prices would cost \$12.

Complete the four gaps. Use each bank entry once.

### WORD + PHRASE BANK

three / two / four / one

Associate: "The offer requires <sup>1</sup> \_\_\_\_\_ qualifying cans."

Shopper: "My one-can choice costs <sup>2</sup> \_\_\_\_\_ dollars."

Associate: "The bundle saves <sup>3</sup> \_\_\_\_\_ dollars against three regular-price cans."

Shopper: "My selected quantity remains <sup>4</sup> \_\_\_\_\_."

### ANSWERS / EXPLANATIONS: PAGE 90

1. three | 2. four | 3. two | 4. one

## Rehearse with a fixed script

1. Read the two totals as options: one for \$3, two qualifying bottles for \$5.
2. Repeat the two comparisons: \$1 saved against two regular bottles; \$2 more than one.
3. Read the closing lines without changing the shopper's one-bottle choice.

### WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

# One mug, two recorded entries

## A Read the situation

**Correct a duplicate before payment and distinguish the revised basket total from a refund or completed transaction.**

Shopper Leo has one mug priced at \$8, but cashier Amira has scanned it twice. The checkout record shows two mugs and \$16. No other charges apply in the exercise, and payment has not begun. Amira acknowledges the duplicate, corrects the recorded quantity through the store checkout process, and reads back one mug at \$8. Leo confirms the correction. No money has been taken, no refund is required for this unstarted payment, and the exchange ends before payment completion.

PEOPLE / Leo: Shopper | Amira: Cashier

### MAKE THE CORRECTION VISIBLE IN THE EXPLANATION

A shopper should not need to infer that a total changed correctly. Acknowledge the exact error, explain the corrected quantity, and read back the revised total before payment. Avoid calling an unpaid-basket correction a refund, which can make the transaction sound further along than it is.

## Briefing checks

Circle one answer in each item. Use the briefing.

1. What is the actual quantity?

A Sixteen mugs

C Two mugs

B One mug

D Eight mugs

2. What is the corrected total?

A \$0

C \$16

B \$8

D \$24

3. What is the payment status?

A Payment has not begun

C Payment was declined

B Payment has been refunded

D Payment is completed

Answers and explanations: page 91.

# The vocabulary that does the work

## B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

### checkout

Place or process for recording and paying for purchases.

**IN USE check the checkout total**

### point-of-sale system

System recording sales and payments, often abbreviated POS.

**IN USE use the point-of-sale system**

### scan

Read an item code into the checkout record.

**IN USE scan the item**

### duplicate scan

Recording the same intended item twice by mistake.

**IN USE correct a duplicate scan**

### line item

Individual product entry in a transaction record.

**IN USE review the line item**

### recorded quantity

Number of units entered in the system.

**IN USE correct the recorded quantity**

### physical quantity

Actual number of items the shopper has.

**IN USE verify the physical quantity**

### basket correction

Amendment to the selected goods before completion.

**IN USE make a basket correction**

### void entry

Cancel an incorrect recorded item under the store process.

**IN USE void the duplicate entry**

### quantity adjustment

Change to the number of units recorded.

**IN USE confirm the quantity adjustment**

### revised total

Updated amount after a correction.

**IN USE read back the revised total**

### amount due

Sum still to be paid.

**IN USE confirm the amount due**

### Precision check

The original record incorrectly shows two \$8 mugs, totaling \$16. The corrected record shows one \$8 mug. This is a quantity correction before payment, not a refund of money already taken.

# The vocabulary that does the work

## B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

### payment status

Stage of the payment, such as unstarted or completed.

**IN USE** check the payment status

### tender

Money or payment method offered to pay.

**IN USE** confirm the tender amount

### cash payment

Payment made using notes or coins.

**IN USE** process a cash payment

### card terminal

Device used for supported card-payment interactions.

**IN USE** identify the card terminal

### contactless payment

Payment interaction using supported contactless technology.

**IN USE** distinguish a contactless payment

### authorization

Payment-system approval stage, not equivalent to every later settlement step.

**IN USE** check authorization status

### declined payment

Payment attempt not approved through the relevant system.

**IN USE** explain a declined payment

### receipt

Record of a transaction or completed purchase details.

**IN USE** check the receipt

### refund

Return of money already paid.

**IN USE** distinguish a refund from a correction

### change

Cash returned when the tendered amount exceeds the amount due.

**IN USE** confirm the change

### customer display

Screen showing transaction information to the shopper.

**IN USE** check the customer display

### split tender

Payment for one sale using more than one payment method.

**IN USE** explain a split-tender payment

### Precision check

A displayed total, a started payment, an authorization, and a completed transaction are different states. In this case payment has not begun, so do not invent a decline, reversal, or refund. Follow the actual checkout process for the correction.

# Phrases you can actually use

## C Notice the language / 1 of 2

### ACKNOWLEDGE THE DUPLICATE

"You are right; the mug has been recorded twice."

### PAUSE BEFORE PAYMENT

"Let us correct the basket before payment begins."

### NAME THE CORRECTION

"I will correct the recorded quantity through our checkout process."

### READ BACK THE AMOUNT

"The corrected total is \$8."

### STATE THE ACTUAL QUANTITY

"You have one mug, not two."

### EXPLAIN THE RECORD

"The current entry shows two at \$8, totaling \$16."

### CONFIRM THE REVISED QUANTITY

"The record now shows one mug."

### KEEP STATUS CLEAR

"Payment has not begun."

---

### Twice versus two

Scanning the same intended item twice does not mean the shopper has two items.

### Quantity versus price

The unit price is unchanged; the recorded number of mugs is corrected.

### Due versus paid

Eight dollars due is not eight dollars already paid.

# Phrases you can actually use

## C Notice the language / 2 of 2

### AVOID REFUND LANGUAGE

"No money has been taken, so this is not a refund."

### DISTINGUISH THE PRICE

"The price per mug stays \$8; the quantity was wrong."

### CONFIRM THE REMAINING STEP

"Payment is still the next step."

### AVOID AN INVENTED DECLINE

"There has been no payment attempt to decline."

### INVITE A CHECK

"Please check that the display shows one mug at \$8."

### AVOID A FALSE DISCOUNT

"This is a correction, not a special discount."

### KEEP THE EXPLANATION SHORT

"The duplicate is removed; one mug remains."

### CLOSE THE CORRECTION

"We have confirmed the corrected basket before proceeding."

---

### Correction versus refund

An unstarted payment has no paid amount to return in this scenario.

### Now shows

This describes the updated record, not merely a promise to change it later.

### Before proceeding

The shopper can verify the correction before the payment step begins.

# Choose the precise message

## **D** Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which explanation is accurate?

- A** The shopper has two mugs but pays for one.
- B** One mug was recorded twice; the corrected total is \$8 before payment.
- C** The price of each mug has been reduced to \$4.
- D** A \$16 payment has already been refunded.

2. Which term should not describe this correction?

- A** Revised total
- B** Duplicate scan correction
- C** Refund
- D** Quantity adjustment

3. What should the customer display show after correction?

- A** Two mugs at \$8 each
- B** A completed payment receipt
- C** A declined-payment message
- D** One mug at \$8

4. Which statement preserves the final stage?

- A** The bank rejected the payment.
- B** Change has already been returned.
- C** The basket is corrected; payment is still next.
- D** The sale is already paid and complete.

Answers and explanations: [page 91](#).

# One mug, two recorded entries

## E Conversations / turns 1-10

04

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

### WORD + PHRASE BANK

payment status / line item / duplicate scan / revised total / physical quantity / customer display / quantity adjustment / amount due / Transaction completion / refund

- 01 **Leo:** Hang on, could you check the screen? It says two mugs, but I've only brought one to the counter.
- 02 **Amira:** You are right. There is a <sup>1</sup> \_\_\_\_\_. The mug has been recorded twice, and we should correct that before starting payment.
- 03 **Leo:** Maybe it scanned again when you moved it. The mug is here; I haven't got another one in my bag.
- 04 **Amira:** The <sup>2</sup> \_\_\_\_\_ is one mug. The recorded quantity is two, so the issue is the number entered rather than the price of the mug.
- 05 **Leo:** Eight dollars each is right. It's the sixteen-dollar total that caught my eye when I looked up.
- 06 **Amira:** Exactly. The <sup>3</sup> \_\_\_\_\_ needs correction. Two at eight dollars gives sixteen, while your one mug should total eight dollars here.
- 07 **Leo:** Yes, please fix it before I tap. I haven't used my card yet, so there shouldn't be a payment to undo.
- 08 **Amira:** The <sup>4</sup> \_\_\_\_\_ is still unstated. I will make the quantity correction through our checkout process before we move to the payment step.
- 09 **Leo:** Are you removing the extra mug or changing its price? I'd like the record to show what I'm actually buying.
- 10 **Amira:** It is a <sup>5</sup> \_\_\_\_\_. The price per mug stays eight dollars; we are removing the extra recorded unit rather than applying a discount.

# The conversation, continued

## E Conversations / turns 11-20

04

Continue with the word bank on page 37.

- 11 **Leo:** The quantity says one now. Could you read the total back too? The screen's a bit hard to see from this angle.
- 12 **Amira:** The <sup>6</sup> \_\_\_\_\_ is eight dollars for one mug. There are no other charges on this purchase, and the basket now matches the item on the counter.
- 13 **Leo:** That's better. When you said correction, I wasn't sure whether I'd have to wait for money to come back.
- 14 **Amira:** This is not a <sup>7</sup> \_\_\_\_\_. No money has been taken here, so we are correcting the unpaid basket rather than returning a payment.
- 15 **Leo:** Good, so there's no refund to wait for. I'm still at the stage of paying the eight dollars.
- 16 **Amira:** Correct. The <sup>8</sup> \_\_\_\_\_ is eight dollars. It is still to be paid, and I will not describe the sale as paid or completed.
- 17 **Leo:** I can see it now: one mug, eight dollars. That matches what's on the counter.
- 18 **Amira:** Thank you for checking the <sup>9</sup> \_\_\_\_\_. Reading back both the quantity and the amount helps confirm that the record and your purchase agree.
- 19 **Leo:** Thanks for sorting it out. We can move on to payment now that the item and total are right.
- 20 **Amira:** We have confirmed one mug at eight dollars. <sup>10</sup> \_\_\_\_\_ is still ahead of us, after the payment step, so the correction has not been confused with a refund or an already finished sale.

### ANSWERS / EXPLANATIONS: PAGE 92

1. duplicate scan | 2. physical quantity | 3. line item | 4. payment status | 5. quantity adjustment | 6. revised total | 7. refund | 8. amount due | 9. customer display | 10. Transaction completion

# Correct a different duplicate scan

## F Say it

One bowl costs \$12, but two were recorded for \$24. The shopper has one bowl. Payment has not begun and no other charges apply. The quantity is corrected to one.

Complete the four gaps. Use each bank entry once.

### WORD + PHRASE BANK

twelve / one / refund / begun

Cashier: "The actual quantity is <sup>1</sup> \_\_\_\_\_ bowl."

Shopper: "The corrected total is <sup>2</sup> \_\_\_\_\_ dollars."

Cashier: "Payment has not <sup>3</sup> \_\_\_\_\_."

Shopper: "This is a correction, not a <sup>4</sup> \_\_\_\_\_."

### ANSWERS / EXPLANATIONS: PAGE 92

1. one | 2. twelve | 3. begun | 4. refund

## Rehearse with a fixed script

1. Use turns 2, 10, and 12 to correct two recorded mugs to one at \$8.
2. Read the payment-status exchange and stress that no payment has begun.
3. Repeat the final quantity and total before the separate payment step.

### WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

# Eligible does not mean in stock

## A Read the situation

**Apply supplied exchange conditions while separating eligibility from replacement availability and completed processing.**

05

Shopper Morgan wants a larger size of a shirt bought ten days ago. The shirt is unused, its tags remain attached, and Morgan has the receipt. In this fictional store, those conditions permit an exchange within thirty days. Associate Ellis confirms that the supplied conditions are met, then explains that stock of the larger size has not been checked. Morgan wants the same shirt in the larger size, not a different color or an automatic refund. The exchange remains unfinished pending the stock check and actual store process.

PEOPLE / Morgan: Shopper | Ellis: Customer-service associate

### EXPLAIN THE POLICY WITHOUT MAKING IT UNIVERSAL

A clear answer can confirm what the supplied store policy allows while admitting that the desired replacement has not yet been located. Do not use eligibility as a promise of immediate stock, and do not substitute a refund or another variation for the shopper's stated request.

## Briefing checks

Circle one answer in each item. Use the briefing.

### 1. Which supplied policy conditions are met?

- A** Only the request for a larger size
- B** Unused shirt, attached tags, receipt, and purchase within thirty days
- C** Used shirt without proof of purchase
- D** Purchase outside the stated window

### 2. What does Morgan want?

- A** An automatic refund
- B** A different color without discussion
- C** A second identical size
- D** The same shirt in a larger size

### 3. What remains unknown?

- A** Whether ten days is within thirty
- B** Whether the shirt is unused
- C** Larger-size availability
- D** Whether a receipt is present

Answers and explanations: [page 93](#).

# The vocabulary that does the work

## B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

### return

Bringing an item back for a requested resolution.

**IN USE discuss a return**

### exchange

Replacing a purchased item with another agreed item.

**IN USE request an exchange**

### refund

Return of money already paid.

**IN USE distinguish an exchange from a refund**

### store credit

Value issued for use with the retailer under stated terms.

**IN USE clarify store-credit terms**

### proof of purchase

Record supporting where and when the item was bought.

**IN USE check proof of purchase**

### receipt

Transaction record supplied as purchase evidence.

**IN USE review the receipt**

### purchase date

Date on which the original sale occurred.

**IN USE confirm the purchase date**

### exchange window

Time period during which the stated exchange policy applies.

**IN USE check the exchange window**

### eligibility

Whether the stated conditions for a process are met.

**IN USE confirm exchange eligibility**

### unused condition

Item state in which it has not been used.

**IN USE confirm unused condition**

### attached tags

Original tags still connected to the item.

**IN USE check attached tags**

### original packaging

Packaging supplied with the original product.

**IN USE identify original packaging**

### Precision check

Ten days is within the fictional thirty-day exchange window, and the unused condition, attached tags, and receipt are present. Eligibility is established on these supplied facts, but availability of the larger size is still unknown.

# The vocabulary that does the work

## B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

### replacement size

Different size requested in the exchange.

**IN USE check the replacement size**

### same-style exchange

Exchange retaining the same product style while changing a variation.

**IN USE request a same-style exchange**

### price difference

Difference between original and replacement prices, if established.

**IN USE clarify any price difference**

### policy condition

Requirement stated in the relevant store policy.

**IN USE explain a policy condition**

### exception request

Request for a departure from a stated policy, requiring the relevant authority.

**IN USE refer an exception request**

### manager review

Review by a person with the relevant decision authority.

**IN USE arrange manager review**

### statutory rights

Rights established by applicable law, distinct from a fictional store policy.

**IN USE distinguish statutory rights**

### replacement stock

Inventory of the desired alternative item.

**IN USE check replacement stock**

### availability check

Verification that the exact replacement can be supplied.

**IN USE complete the availability check**

### exchange processing

Store steps needed to carry out an agreed exchange.

**IN USE complete exchange processing**

### requested remedy

Outcome the shopper asks the store to provide.

**IN USE confirm the requested remedy**

### pending exchange

Exchange not yet completed.

**IN USE record the pending exchange**

### Precision check

An exchange, refund, and store credit are different outcomes. The shopper requests the same shirt in a larger size. Do not promise an unverified replacement, invent a price difference, or present the fictional policy as a statement of universal consumer rights.

# Phrases you can actually use

## C Notice the language / 1 of 2

### CLARIFY THE REQUESTED OUTCOME

"Would you like the same shirt in a larger size?"

### STATE THE LOCAL WINDOW

"This store's stated exchange window is thirty days."

### IDENTIFY THE EVIDENCE

"You have the receipt as proof of purchase."

### SEPARATE STOCK FROM POLICY

"I still need to check the larger size."

### CHECK THE DATE

"The receipt shows the purchase was ten days ago."

### CONFIRM THE CONDITION

"The shirt is unused and the tags are attached."

### CONFIRM ELIGIBILITY

"Yes, this meets our stated exchange conditions."

### AVOID A READINESS PROMISE

"Eligibility does not mean the replacement is already available."

---

### Within

Ten days falls inside the stated thirty-day window.

### Eligible versus available

Policy conditions can be met while replacement stock remains unknown.

### Same versus similar

The same shirt is more specific than an unrequested similar product.

# Phrases you can actually use

## C Notice the language / 2 of 2

### KEEP THE VARIATION EXACT

"Same shirt and color, larger size."

### KEEP ALTERNATIVES OPTIONAL

"We can discuss alternatives only if you want to."

### NAME THE PENDING STEP

"The replacement-stock check is still outstanding."

### LIMIT THE POLICY CLAIM

"I am explaining this store's stated policy for this case."

### AVOID CHANGING THE REMEDY

"I will not turn your exchange request into a refund without discussion."

### AVOID INVENTED CHARGES

"No price difference has been established here."

### KEEP THE STATUS ACCURATE

"The exchange has not been completed yet."

### CLOSE WITH THE NEXT ACTION

"I will check the exact larger-size replacement next."

---

## Exchange versus refund

Replacing an item and returning money are different remedies.

## Present versus processed

Having a receipt does not mean an exchange has already been completed.

## Local policy

The exercise policy is a supplied condition, not a replacement for applicable rights.

# Choose the precise message

## **D** Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

### 1. Which explanation is accurate?

- A** A receipt automatically completes the exchange.
- B** You meet the stated exchange conditions; I still need to check the larger size.
- C** Meeting the policy guarantees the replacement is here.
- D** Ten days is outside thirty days.

### 2. Which outcome has the shopper requested?

- A** Different material selected by staff
- B** Same-shirt exchange to a larger size
- C** Immediate store credit instead
- D** Refund without further discussion

### 3. Which claim is unsupported?

- A** The larger size is unchecked.
- B** Every store must use this exact thirty-day policy.
- C** The receipt is present.
- D** The tags remain attached.

### 4. What should be checked next?

- A** A refund already described as complete
- B** Stock of the exact larger-size replacement
- C** Whether ten is greater than thirty
- D** An unrelated color chosen without asking

Answers and explanations: [page 93](#).

# Eligible does not mean in stock

## E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

05

### WORD + PHRASE BANK

requested remedy / refund / exchange window / replacement size / availability check / proof of purchase / exchange / Replacement stock / eligibility / pending exchange

- 01 **Morgan:** Could I swap this for a bigger size? I bought it ten days ago. It's unused, and the tags are still attached.
- 02 **Ellis:** I can help check the <sup>1</sup> \_\_\_\_\_ request. Do you want the same shirt and color, with only the size changed?
- 03 **Morgan:** Yes, same shirt and same color, please. The style is right; it's just a bit too small.
- 04 **Ellis:** I will keep the <sup>2</sup> \_\_\_\_\_ separate from the other details. The request is the same shirt and color in the larger size.
- 05 **Morgan:** Here's the receipt. I wasn't sure how long I had to bring it back, so I came as soon as I could.
- 06 **Ellis:** Our stated <sup>3</sup> \_\_\_\_\_ is thirty days for an unused shirt with attached tags and a receipt. Ten days falls within that period.
- 07 **Morgan:** I haven't worn it, and I left the tags on. Does that cover the conditions you've just explained?
- 08 **Ellis:** On these facts, the <sup>4</sup> \_\_\_\_\_ conditions are met. That answers the policy question, but I still need to check the larger-size stock.
- 09 **Morgan:** Great. Does that mean you can give me the larger one today, or do you still need to find it?
- 10 **Ellis:** Correct. <sup>5</sup> \_\_\_\_\_ has not been checked. I do not want the policy confirmation to sound like a promise that we have located your size.

# The conversation, continued

## E Conversations / turns 11-20

Continue with the word bank on page 46.

- 11 **Morgan:** Please check. I'd rather know now than assume I'm taking a replacement home and then find there's none left.
- 12 **Ellis:** The <sup>6</sup> \_\_\_\_\_ is the next step. We will use the same shirt and color in the larger size, rather than check only for something similar.
- 13 **Morgan:** If you don't have it, tell me the options first. Please don't start a refund; I'd prefer the same shirt if possible.
- 14 **Ellis:** I will keep your <sup>7</sup> \_\_\_\_\_. You have asked for an exchange, and any different outcome should be discussed with you instead of assumed.
- 15 **Morgan:** Right, I want another shirt, not my money back at this stage. I think that's where I was getting confused.
- 16 **Ellis:** A <sup>8</sup> \_\_\_\_\_ returns money, while an exchange replaces the item with an agreed alternative. They are different outcomes, even when both begin with bringing an item back.
- 17 **Morgan:** Do you need the receipt just to check the purchase, or has bringing it over started the exchange already?
- 18 **Ellis:** It is <sup>9</sup> \_\_\_\_\_. The receipt supports the original transaction and date, but the replacement and exchange processing are not complete.
- 19 **Morgan:** Understood. Please look for the larger size next. Keep the shirt and color the same.
- 20 **Ellis:** I will do that. The status is a <sup>10</sup> \_\_\_\_\_: the stated conditions are met, the requested replacement is clear, and stock and processing remain to be confirmed.

### ANSWERS / EXPLANATIONS: PAGE 94

1. exchange | 2. replacement size | 3. exchange window | 4. eligibility | 5. Replacement stock | 6. availability check | 7. requested remedy | 8. refund | 9. proof of purchase | 10. pending exchange

# Separate another eligibility and stock question

## F Say it

A fictional store permits unused, tagged shirts to be exchanged with a receipt within twenty-one days. A shopper bought a shirt seven days ago, meets those conditions, and requests the same shirt in small. Replacement stock is unchecked.

Complete the four gaps. Use each bank entry once.

### WORD + PHRASE BANK

small / within / unchecked / exchange

Associate: "Seven days is <sup>1</sup> \_\_\_\_\_ the stated window."

Shopper: "The replacement size requested is <sup>2</sup> \_\_\_\_\_."

Associate: "Replacement stock remains <sup>3</sup> \_\_\_\_\_."

Shopper: "The requested remedy is an <sup>4</sup> \_\_\_\_\_."

### ANSWERS / EXPLANATIONS: PAGE 94

1. within | 2. small | 3. unchecked | 4. exchange

## Rehearse with a fixed script

1. Read the four exchange conditions from turns 6 and 8: time, condition, tags, receipt.
2. Repeat Morgan's request without changing the shirt, color, or larger-size choice.
3. Use turns 10 and 20 to distinguish eligibility from checked replacement stock.

### WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

# An order message is not a pickup notice

## A Read the situation

**Distinguish order acknowledgment from collection readiness and give a reliable update commitment without promising an outcome.**

Shopper Ravi shows collection-desk associate Jules a message acknowledging order R61. It is not a ready-for-collection notification. One item is still being located, and the complete order is not confirmed ready. Collection colleague Noor will update Ravi at 3:00 even if the issue is unresolved. No substitute size, color, or product has been agreed. Jules must keep the order reference, current status, next contact owner, and update time clear without turning 3:00 into a collection promise.

PEOPLE / Ravi: Shopper | Jules: Collection-desk associate

06

### AN UPDATE IS STILL USEFUL WHEN THE OUTCOME IS UNCERTAIN

A shopper may read a positive-sounding automated message as permission to travel to the store. Explain what the message actually confirms, acknowledge the inconvenience, and state who will update them and when. Do not make the uncertainty disappear by offering a guessed ready time.

## Briefing checks

Circle one answer in each item. Use the briefing.

### 1. What does the message confirm?

- |                                                 |                                         |
|-------------------------------------------------|-----------------------------------------|
| <b>A</b> Collection has already occurred        | <b>B</b> Acknowledgment of order R61    |
| <b>C</b> The complete order is ready to collect | <b>D</b> A substitute has been accepted |

### 2. What remains unfinished?

- |                                                         |                                               |
|---------------------------------------------------------|-----------------------------------------------|
| <b>A</b> A refund is already processed                  | <b>B</b> One item is still being located      |
| <b>C</b> The complete order is awaiting customer pickup | <b>D</b> An agreed substitute is being packed |

### 3. What is promised for 3:00?

- |                                          |                                                  |
|------------------------------------------|--------------------------------------------------|
| <b>A</b> Guaranteed collection readiness | <b>B</b> Automatic replacement with another size |
| <b>C</b> A completed refund              | <b>D</b> An update from Noor, even if unresolved |

Answers and explanations: page 95.

# The vocabulary that does the work

## B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

### order acknowledgment

Message confirming that an order has been received or recorded.

**IN USE read the order acknowledgment**

### order reference

Identifier used to locate the specific order.

**IN USE confirm the order reference**

### collection notice

Message stating that the order can be collected under the stated process.

**IN USE distinguish a collection notice**

### pickup

Common US term for collecting an order.

**IN USE explain pickup status**

### ready for collection

Status indicating the relevant preparation and checks are complete.

**IN USE confirm ready-for-collection status**

### order line

Individual item entry within an order.

**IN USE check the outstanding order line**

### item location

Place where a requested unit is being found or verified.

**IN USE confirm the item location**

### picking

Selecting the ordered goods from stock under the store process.

**IN USE check picking status**

### packing

Preparing selected goods for handover or dispatch.

**IN USE distinguish packing from picking**

### fulfillment

Process of preparing and supplying the order.

**IN USE explain fulfillment status**

### partial order

Order for which only some items are available or prepared.

**IN USE describe a partial order**

### complete order

All items included in the order together.

**IN USE verify the complete order**

### Precision check

Order R61 is acknowledged but not confirmed ready. One item is still being located. Noor will update the shopper at 3:00 even if unresolved; that is an update commitment, not a promise that collection will be possible then.

# The vocabulary that does the work

## B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

### collection desk

Store point handling order pickup.

**IN USE** contact the collection desk

### facing

One front-facing product position across a display; not its full depth of stock.

**IN USE** check the number of facings

### status update

Communication about the latest verified position.

**IN USE** give a status update

### update time

Specified time for the next communication, distinct from order readiness.

**IN USE** confirm the update time

### readiness estimate

Provisional expectation of when collection may be possible.

**IN USE** distinguish a readiness estimate

### readiness promise

Commitment that the order will be available by a stated time.

**IN USE** avoid an unsupported readiness promise

### unresolved item

Item whose location or status remains unsettled.

**IN USE** track the unresolved item

### variation match

Confirmation that size, color, and other details match the order.

**IN USE** check the variation match

### substitution consent

Shopper agreement to a different item or variation.

**IN USE** obtain substitution consent

### contact owner

Person responsible for the next communication.

**IN USE** identify the contact owner

### collection record

Record of order preparation and handover status.

**IN USE** update the collection record

### handover completion

Actual transfer of the order to the shopper.

**IN USE** confirm handover completion

### Precision check

A different size, color, or product is not automatically an acceptable way to complete the order. No substitution is agreed. Keep preparation, readiness, and actual handover distinct so a message does not imply a stage that has not occurred.

# Phrases you can actually use

## **C** Notice the language / 1 of 2

### IDENTIFY THE ORDER

"Let us check order R61."

### STATE THE CURRENT POSITION

"One item is still being located."

### ACKNOWLEDGE THE INCONVENIENCE

"I understand why you expected the message to mean you could collect it."

### GIVE THE CONTACT TIME

"Noor will update you at 3:00."

### EXPLAIN THE MESSAGE

"This is an order acknowledgment, not a collection notice."

### AVOID A READINESS CLAIM

"The complete order is not confirmed ready yet."

### NAME THE UPDATE OWNER

"Noor is the collection colleague handling the next update."

### KEEP THE COMMITMENT PRECISE

"The update will happen even if the issue is still unresolved."

06

## Acknowledged versus ready

Recording an order does not establish that every item is prepared for collection.

## At three versus by three

Here at three identifies the promised contact time, not an order-completion deadline.

## Even if

This keeps the communication commitment valid when the outcome remains uncertain.

# Phrases you can actually use

## **C** Notice the language / 2 of 2

### SEPARATE TIME AND OUTCOME

"Three o'clock is the update time, not a guaranteed collection time."

### AVOID AN UNREQUESTED SUBSTITUTE

"No alternative item has been agreed."

### DO NOT INVENT A CAUSE

"I do not have a confirmed reason the item has not been located."

### KEEP HANDOVER STATUS ACCURATE

"The order has not been collected."

### PRESERVE THE ORDERED VARIATION

"We will keep the requested size and color in the check."

### ASK BEFORE A CHANGE

"Any proposed substitution needs your agreement."

### READ BACK THE NEXT STEP

"Noor will provide the next status update at 3:00."

### CLOSE WITH THE KNOWN FACTS

"Acknowledged order, one unresolved item, next update at three."

06

---

## Complete order

Readiness of some items does not establish readiness of the whole order.

## Substitute

A different variation requires discussion instead of silent acceptance on the shopper's behalf.

## Located versus handed over

Finding an item is a different stage from transferring the order to the shopper.

# Choose the precise message

## **D** Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

### 1. Which explanation is accurate?

- A** The order has already been collected.
- B** The message acknowledges R61; one item is still being located.
- C** Every acknowledged order is ready.
- D** The shopper accepted a substitute by showing the message.

### 2. What does even if unresolved add?

- A** A substitute will be selected automatically.
- B** The update moves to the day the item is found.
- C** The update still occurs without a final stock answer.
- D** The order must be ready by then.

### 3. Which statement wrongly turns an update into a promise?

- A** Your complete order will definitely be ready at 3:00.
- B** Noor will update you at 3:00.
- C** One item is still being located.
- D** No substitute has been agreed.

### 4. What needs separate agreement?

- A** A proposed different size, color, or product
- B** Reading the order reference aloud in the conversation
- C** Stating that readiness is unconfirmed
- D** Naming the update time

Answers and explanations: [page 95](#).

# An order message is not a pickup notice

## E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

### WORD + PHRASE BANK

order line / substitution consent / order acknowledgment / variation match / status update / handover completion / order reference / contact owner / update time / item location

06

- 01 **Ravi:** I've come for R61. This message says you've got my order, but the desk says one item isn't there. Have I come too early?
- 02 **Jules:** I'm sorry for the confusion. This is the <sup>1</sup> \_\_\_\_\_, which says we received the order. A separate notice confirms it's ready to collect.
- 03 **Ravi:** I read it on the bus and thought that was the pickup message. Is the whole order missing?
- 04 **Jules:** One <sup>2</sup> \_\_\_\_\_ is still being located. The complete order isn't confirmed ready yet.
- 05 **Ravi:** Is that item sold out, then? I don't want to wait here if you already know it isn't available.
- 06 **Jules:** The <sup>3</sup> \_\_\_\_\_ check is still open. I don't have a confirmed stock answer to give you yet.
- 07 **Ravi:** All right, but who's going to let me know? I don't want to explain this again each time I come to the desk.
- 08 **Jules:** Noor is the <sup>4</sup> \_\_\_\_\_. Noor will update you at three, even if the check isn't finished.
- 09 **Ravi:** So there will be a message either way? Last time I waited because I thought no news meant someone was still looking.
- 10 **Jules:** Yes, you'll get a <sup>5</sup> \_\_\_\_\_ at three either way. It won't depend on the item being found first.

# The conversation, continued

## E Conversations / turns 11-20

Continue with the word bank on page 55.

- 11 **Ravi:** I have to make another trip after this. Should I plan to pick it up at three, or just wait for that message?
- 12 **Jules:** Three is the <sup>6</sup> \_\_\_\_\_, not a pickup promise. Please wait for confirmation before making another collection trip.
- 13 **Ravi:** It's a gift, so I need the exact color and size. Please don't fill the gap with the nearest thing you have.
- 14 **Jules:** We haven't recorded <sup>7</sup> \_\_\_\_\_. We'd ask you before changing the size, color, or product.
- 15 **Ravi:** Thank you. The other color would fit, but it wouldn't match the item this is supposed to go with.
- 16 **Jules:** I'll keep the <sup>8</sup> \_\_\_\_\_ clear in the check. Similar isn't necessarily what you need.
- 17 **Ravi:** Can you repeat which order Noor is following up? I ordered several things recently and don't want them mixed up.
- 18 **Jules:** The <sup>9</sup> \_\_\_\_\_ is R61. One item is being located; Noor will update you at three.
- 19 **Ravi:** Right. I haven't collected anything from this order. I'll wait for the actual ready message before coming back for it.
- 20 **Jules:** I'll keep the <sup>10</sup> \_\_\_\_\_ status accurate. R61 hasn't been collected, and the next contact is Noor's update.

06

### ANSWERS / EXPLANATIONS: PAGE 96

1. order acknowledgment | 2. order line | 3. item location | 4. contact owner | 5. status update | 6. update time | 7. substitution consent | 8. variation match | 9. order reference | 10. handover completion

# Keep another update commitment precise

## F Say it

Order P74 is acknowledged but not ready for collection because one item is still being located. Jo will update the shopper at 4:30 even if unresolved. No substitution is agreed.

06

Complete the four gaps. Use each bank entry once.

### WORD + PHRASE BANK

4:30 / Jo / P74 / agreed

Associate: "The order reference is <sup>1</sup> \_\_\_\_\_."

Shopper: "The next update is at <sup>2</sup> \_\_\_\_\_."

Associate: "The update owner is <sup>3</sup> \_\_\_\_\_."

Shopper: "No substitution has been <sup>4</sup> \_\_\_\_\_."

### ANSWERS / EXPLANATIONS: PAGE 96

1. P74 | 2. 4:30 | 3. Jo | 4. agreed

## Rehearse with a fixed script

1. Read turns 2 and 4 to distinguish acknowledgment from a ready notice.
2. Read Noor's 3:00 commitment with emphasis on update, not pickup.
3. Repeat R61 and the no-substitution instruction before the closing handover line.

### WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

# A checkout route that works

## A Read the situation

**Ask what assistance is preferred, offer an available checkout route, and respect individual choices and position in line.**

Shopper Sam uses a mobility aid and says the current checkout is too narrow. Associate Lina knows that accessible checkout lane four is open, reached by the clear main aisle to the left. Sam prefers spoken directions, keeps personal belongings and the mobility aid under their own control, and accepts the move to lane four. Lina will ask colleague Noor to preserve the current place in line during the move; that request is not yet confirmed. No diagnosis, physical assistance, or handling of belongings is requested.

PEOPLE / Sam: Shopper | Lina: Retail associate

07

### ASK RATHER THAN TAKE OVER

Address the shopper directly and ask what help would be useful. A mobility aid is not an invitation to touch it or a reason to make assumptions about the person. Give practical information and respect the requested form of assistance without demanding a personal explanation.

## Briefing checks

Circle one answer in each item. Use the briefing.

1. What problem does Sam identify?

**A** Every checkout is inaccessible

**C** The shopper forgot a payment card

**B** The current checkout is too narrow

**D** The shopper cannot locate the collection desk

2. Which available route is offered?

**A** An unverified staff-only shortcut

**C** A closed lane with no clear route

**B** Main aisle to the left toward open lane four

**D** Moving the mobility aid without asking

3. What help does Sam prefer?

**A** Staff taking the mobility aid

**C** Spoken directions, with belongings and aid left under personal control

**B** A medical assessment

**D** Unrequested physical guidance

Answers and explanations: [page 97](#).

# The vocabulary that does the work

## B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

### queue

Line of shoppers waiting for service.

**IN USE manage the queue**

### place in line

Shopper's position in the service order.

**IN USE preserve a place in line**

### checkout lane

Specific path and counter used for payment.

**IN USE identify the checkout lane**

### accessible checkout

Checkout identified as accessible in the supplied store scenario.

**IN USE offer the accessible checkout**

### main aisle

Principal route through the selling area.

**IN USE describe the main aisle**

### clear route

Route free of the stated obstruction in the scenario.

**IN USE identify a clear route**

### narrow passage

Space the shopper reports as too restricted for access.

**IN USE acknowledge a narrow passage**

### mobility aid

Device a person uses to support movement.

**IN USE respect the mobility aid**

### walker

Walking aid providing support through a frame.

**IN USE identify a walker when relevant**

### wheelchair

Mobility device used for seated movement.

**IN USE respect wheelchair users' choices**

### personal belongings

Items owned or carried by the shopper.

**IN USE ask before handling belongings**

### preferred assistance

Help the shopper says would be useful.

**IN USE ask about preferred assistance**

## Precision check

Lane four is open and reached by the supplied main-aisle route. Sam chooses spoken directions and retains control of belongings and the mobility aid. Lina will ask Noor to preserve the place in line, but that coordination is not yet confirmed.

# The vocabulary that does the work

## **B** Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

### spoken directions

Verbal explanation of where to go.

**IN USE offer spoken directions**

### physical guidance

Hands-on assistance, not authorized by a general offer to help.

**IN USE ask before physical guidance**

### permission

Agreement to a specific action.

**IN USE obtain permission before handling items**

### independent movement

Shopper moving under their own control.

**IN USE respect independent movement**

### direct address

Speaking to the shopper rather than only a companion.

**IN USE use direct address**

### companion

Person accompanying the shopper, not automatically their spokesperson.

**IN USE avoid addressing only the companion**

### route confirmation

Check that the proposed path is understood and suitable for the request.

**IN USE give a route confirmation**

### colleague coordination

Communication to arrange the next service step with another worker.

**IN USE coordinate with a colleague**

### open lane

Checkout currently available for use.

**IN USE identify the open lane**

### queue transfer

Move between lines while managing the service order.

**IN USE arrange a queue transfer**

### assistance boundary

Limit on what help the shopper has authorized.

**IN USE respect the assistance boundary**

### pending request

Asked-for action not yet confirmed or completed.

**IN USE distinguish a pending request**

### Precision check

Do not turn a helpful offer into unrequested touching or a medical inquiry. Ask about the practical assistance needed for this route. The fictional description identifies an available checkout; it does not certify real-world accessibility or replace applicable requirements.

# Phrases you can actually use

## C Notice the language / 1 of 2

### ACKNOWLEDGE THE BARRIER

"I understand that this checkout is too narrow for you."

### OFFER THE AVAILABLE LANE

"The accessible checkout at lane four is open."

### CHECK THE PREFERENCE

"Would spoken directions be helpful?"

### RESPECT THE MOBILITY AID

"I will leave your mobility aid under your control."

### ASK ABOUT PREFERRED HELP

"What help would you prefer?"

### DESCRIBE THE ROUTE

"The clear main aisle to the left leads to lane four."

### RESPECT BELONGINGS

"I will not handle your belongings without your permission."

### AVOID A PERSONAL INQUIRY

"We can focus on the checkout route and the help you want."

---

### Would you like

Offers a choice without assuming that assistance is needed or wanted.

### Directly

Speaking to the shopper preserves agency even when a companion is present.

### Permission scope

Accepting directions does not authorize touching a bag or mobility aid.

# Phrases you can actually use

## **C** Notice the language / 2 of 2

### ADDRESS THE SHOPPER

"Let me check the next step with you directly."

### KEEP COORDINATION ACCURATE

"That request still needs confirmation."

### CONFIRM THE ACCEPTED HELP

"You prefer directions, without physical assistance."

### KEEP THE CHOICE WITH THE SHOPPER

"Please tell me if you prefer a different form of help."

### PRESERVE SERVICE ORDER

"I will ask Noor to preserve your place during the move."

### AVOID AN UNVERIFIED PROMISE

"I have not yet confirmed the queue arrangement with Noor."

### INVITE A ROUTE QUESTION

"Is there any part of the route you would like clarified?"

### CLOSE THE ARRANGEMENT

"Lane four is available; I will coordinate the place-in-line request."

### Too narrow

This reports the shopper's practical barrier without requiring a diagnosis.

### Will ask versus confirmed

A promised coordination step is not proof that the colleague has accepted it.

### Preserve versus restart

Preserving the place means addressing continuity rather than automatically sending the shopper to the back.

# Choose the precise message

## **D** Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which opening respects the shopper's choice?

- A** Tell me your diagnosis before I help.
- B** Your companion should decide for you.
- C** What help would you prefer with the route to lane four?
- D** I will move your aid now.

2. Which action is authorized?

- A** Giving spoken directions
- B** Taking the mobility aid without asking
- C** Carrying the bag despite refusal
- D** Providing hands-on guidance automatically

3. Which statement accurately describes the queue arrangement?

- A** The open lane itself confirms the queue transfer.
- B** Lina will ask Noor to preserve the place; confirmation is pending.
- C** Noor has already confirmed the move.
- D** Sam must automatically restart at the back.

4. Which route information is supplied?

- A** A closed lane at the far exit
- B** A measured legal clearance for every passage
- C** Clear main aisle to the left, toward open lane four
- D** An unverified back-room shortcut

Answers and explanations: [page 97](#).

# A checkout route that works

## E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

### WORD + PHRASE BANK

spoken directions / main aisle / place in line / route confirmation / assistance boundary / accessible checkout / direct address / pending request / colleague coordination / permission

07

- 01 **Sam:** This lane's too narrow for my mobility aid. Is there a wider checkout I can use?
- 02 **Lina:** Yes. The <sup>1</sup> \_\_\_\_\_ at lane four is open. Before I offer help, what would you prefer?
- 03 **Sam:** Just tell me the way, please. I'll move myself and keep my bag with me.
- 04 **Lina:** I will give <sup>2</sup> \_\_\_\_\_ and leave your belongings and aid under your control. I will not assume you want me to carry or move anything.
- 05 **Sam:** Which way is lane four? I can't see the number beyond the people in front.
- 06 **Lina:** The <sup>3</sup> \_\_\_\_\_ to your left leads toward lane four. That is the clear route available, rather than trying to continue through this narrow checkout.
- 07 **Sam:** That route sounds fine. I've been waiting in this line for a while, though. Will I lose my place?
- 08 **Lina:** I will ask Noor to preserve your <sup>4</sup> \_\_\_\_\_ during the move. I do not want to treat the change of lane as a reason to ignore the time you have already waited.
- 09 **Sam:** Has Noor already agreed, or do we need to wait for an answer before I move across?
- 10 **Lina:** The <sup>5</sup> \_\_\_\_\_ still needs confirmation. I will ask Noor, but I should not tell you the arrangement has already been accepted.

# The conversation, continued

## E Conversations / turns 11-20

Continue with the word bank on page 64.

- 11 **Sam:** Please ask. Directions are enough for the move; I don't need anyone to take hold of the aid.
- 12 **Lina:** Understood. Your <sup>6</sup> \_\_\_\_\_ is clear. Directions are welcome; touching the mobility aid or taking your bag has not been authorized.
- 13 **Sam:** Thanks for checking with me. It's awkward when someone takes my bag before I can explain what would help.
- 14 **Lina:** I will seek <sup>7</sup> \_\_\_\_\_ before any different kind of help. Your answer about directions should not be treated as agreement to every possible action.
- 15 **Sam:** I'm happy to use lane four once you've checked the queue arrangement. Could you repeat the direction?
- 16 **Lina:** Let me give a <sup>8</sup> \_\_\_\_\_: use the clear main aisle to the left, toward the open lane four. I will also follow up with Noor about the queue.
- 17 **Sam:** Left, then lane four. You've explained it clearly. You can keep talking to me rather than my companion.
- 18 **Lina:** Of course. I will use <sup>9</sup> \_\_\_\_\_ and keep discussing the arrangement with you. The practical route and your preference are what we need to clarify.
- 19 **Sam:** Yes, that's what I need: directions, my belongings left with me, and help keeping my place.
- 20 **Lina:** That is accurate. The <sup>10</sup> \_\_\_\_\_ is the queue arrangement with Noor. Lane four is open, your preferred assistance is clear, and I will not describe the coordination as complete until it is confirmed.

### ANSWERS / EXPLANATIONS: PAGE 98

1. accessible checkout | 2. spoken directions | 3. main aisle | 4. place in line | 5. colleague coordination | 6. assistance boundary | 7. permission | 8. route confirmation | 9. direct address | 10. pending request

# Offer another agreed form of help

## F Say it

A shopper says lane two is too narrow. Open lane six is reached through the clear aisle to the right. The shopper wants spoken directions only. A request to preserve the place in line is awaiting a colleague response.

Complete the four gaps. Use each bank entry once.

07

### WORD + PHRASE BANK

six / directions / right / pending

Associate: "The open alternative is lane <sup>1</sup> \_\_\_\_\_."

Shopper: "The clear aisle is to the <sup>2</sup> \_\_\_\_\_."

Associate: "The preferred help is spoken <sup>3</sup> \_\_\_\_\_."

Shopper: "The place-in-line request is still <sup>4</sup> \_\_\_\_\_."

### ANSWERS / EXPLANATIONS: PAGE 98

1. six | 2. right | 3. directions | 4. pending

## Rehearse with a fixed script

1. Read the left-hand route to lane four and have your partner repeat it.
2. Read the shopper's requested help without adding touching or carrying.
3. Repeat the queue request and mark Noor's confirmation as still pending.

### WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

# Five dollars below the expected count

## A Read the situation

**Report an unverified cash difference neutrally and transfer ownership of two unfinished checks without inventing a cause.**

At shift change, cashier Tessa reports an expected drawer balance of \$180 and a recorded count of \$175. A second check has not occurred, so the recorded difference is \$5 below expected with no cause established. A separate price query for item P32 is also open. Incoming supervisor Arun accepts responsibility for both the second balance check and the P32 price query. Neither task is completed during the handover. Tessa must not accuse a colleague, describe a proven loss, or imply that Arun accepting the checks resolves them.

PEOPLE / Tessa: Outgoing cashier | Arun: Incoming supervisor

08

### NEUTRAL DETAIL IS STRONGER THAN SUSPICION

A precise handover names the expected figure, the recorded count, the unchecked difference, and the person taking the next action. It should not speculate about a colleague or combine unrelated open matters into an invented explanation. Separate ownership from completion.

## Briefing checks

Circle one answer in each item. Use the briefing.

1. What is the recorded difference?

- A \$5 below expected
- C \$175 below expected

- B \$5 above expected
- D No difference

2. What verification is pending?

- A A confirmed theft finding
- C A second balance check

- B An approved correction to P32
- D A completed investigation

3. What does Arun accept?

- A Only a resolved price query
- C Both unfinished checks, not their completed outcomes

- B Responsibility for an admitted cause
- D A proven-loss finding

Answers and explanations: page 99.

# The vocabulary that does the work

## B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

### till

Register or cash-handling point used for sales.

**IN USE hand over the till**

### cash drawer

Compartment holding cash at the checkout.

**IN USE check the cash drawer**

### expected balance

Amount the relevant record indicates should be present.

**IN USE state the expected balance**

### recorded count

Amount entered after the initial cash count.

**IN USE report the recorded count**

### cash difference

Difference between expected and recorded amounts before cause is established.

**IN USE report the cash difference**

### variance

Difference between a reference figure and an actual or recorded figure.

**IN USE quantify the variance**

### overage

Amount recorded above the expected balance.

**IN USE distinguish an overage**

### shortfall

Amount recorded below a specified expected balance.

**IN USE describe a recorded shortfall**

### recount

Another count to verify the initial result.

**IN USE request a recount**

### second check

Independent or repeated verification under the store process.

**IN USE complete the second check**

### reconciliation

Comparison of related records and amounts to explain differences.

**IN USE begin reconciliation**

### opening float

Cash amount assigned at the start for normal checkout operations.

**IN USE verify the opening float**

### Precision check

The arithmetic is \$180 expected minus \$175 recorded, giving \$5 below expected. The second check is pending and the cause is unknown. This is a recorded discrepancy, not proof of theft, a specific error, or a confirmed loss.

# The vocabulary that does the work

## B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

### cash drop

Recorded movement of cash out of a till under store procedures.

**IN USE** check the cash-drop record

### cash movement

Transfer of cash that should be reflected in relevant records.

**IN USE** review cash movements

### denomination

Face-value category of notes or coins.

**IN USE** check the denomination totals

### count sheet

Record used to document counted amounts.

**IN USE** review the count sheet

### transaction log

Record of sales and related checkout actions.

**IN USE** consult the transaction log

### unverified discrepancy

Difference not yet confirmed or explained through the required checks.

**IN USE** record an unverified discrepancy

### established cause

Explanation supported by completed verification.

**IN USE** distinguish an established cause

### proven loss

Confirmed loss, not established by the initial difference alone.

**IN USE** avoid claiming a proven loss

### open price query

Unresolved question about an item's price.

**IN USE** hand over the open price query

### incoming supervisor

Supervisor taking over responsibility for the next shift.

**IN USE** brief the incoming supervisor

### action owner

Person assigned the next check or follow-up.

**IN USE** name the action owner

### handover status

Current state of each item at transfer.

**IN USE** confirm the handover status

08

### Precision check

The P32 price query is a separate unfinished item. No evidence links it to the drawer difference. Arun accepts both follow-ups, but acceptance does not complete the recount or resolve the price question. Record both statuses explicitly.

# Phrases you can actually use

## **C** Notice the language / 1 of 2

### STATE THE EXPECTED FIGURE

"The expected drawer balance is \$180."

### QUANTIFY THE DIFFERENCE

"That is \$5 below expected."

### AVOID A CAUSE CLAIM

"The cause is not established."

### AVOID A PROVEN-LOSS STATEMENT

"The initial difference does not establish a confirmed loss."

### STATE THE RECORDED FIGURE

"The recorded count is \$175."

### MARK THE VERIFICATION STAGE

"The second check has not occurred yet."

### KEEP THE LANGUAGE NEUTRAL

"I am reporting a discrepancy, not accusing anyone."

### SEPARATE THE OTHER ITEM

"There is also an open price query for P32."

08

---

### Below versus above

The direction of the difference matters as much as the five-dollar amount.

### Recorded versus verified

A written initial count can still await the required second check.

### Unknown versus suspicious

Unknown cause is a factual limit, not evidence against a person.

# Phrases you can actually use

## **C** Notice the language / 2 of 2

### **AVOID AN INVENTED LINK**

"I have no verified connection between the two issues."

### **CONFIRM OWNERSHIP**

"I accept responsibility for both follow-ups."

### **ASK FOR A READ-BACK**

"Please repeat the figures and the two pending actions."

### **NAME THE CURRENT STATUS**

"Recount pending; price query open; cause unknown."

### **ASSIGN BOTH CHECKS**

"Can you take the balance check and the P32 follow-up?"

### **KEEP COMPLETION SEPARATE**

"Neither check is completed by this handover."

### **PRESERVE THE INITIAL RECORD**

"Keep the recorded count distinct from any later verified result."

### **CLOSE THE HANDOVER**

"The next owner is clear, while both outcomes remain unresolved."

08

---

## **Also**

This introduces a separate item without claiming it caused the first issue.

## **Accept versus complete**

Taking responsibility for a task does not mean it has been performed.

## **Initial versus final**

Preserve the original count while documenting any later checked result accurately.

# Choose the precise message

## **D** Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

### 1. Which handover is accurate?

- A** The drawer is five dollars over.
- B** The second check proved the initial count correct.
- C** Expected \$180, recorded \$175, second check pending, cause unknown.
- D** Five dollars has definitely been stolen.

### 2. What is known about P32?

- A** Its price query is still open.
- B** It caused the drawer difference.
- C** It has been resolved and closed.
- D** The shopper admitted a pricing error.

### 3. Which statement wrongly treats ownership as completion?

- A** The second check remains pending.
- B** No cause is established.
- C** Arun accepted both checks, so both issues are resolved.
- D** Arun is the next action owner.

### 4. Which calculation matches the facts?

- A** The \$175 count is itself the discrepancy.
- B** \$180 minus \$175 equals \$5 below expected.
- C** \$175 minus \$180 means \$5 above expected.
- D** \$180 plus \$175 equals the loss.

Answers and explanations: page 99.

# Five dollars below the expected count

## E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

### WORD + PHRASE BANK

second check / expected balance / unverified discrepancy / reconciliation / action owner / handover status / recorded count / open price query / variance / proven loss

08

- 01 **Tessa:** Before I hand over, there are two things outstanding: the drawer check and a price query. Can I run through them with you?
- 02 **Arun:** Yes. What's the <sup>1</sup> \_\_\_\_\_ on the record? Give me that separately from what you counted.
- 03 **Tessa:** The record says one hundred eighty. I entered one hundred seventy-five on the count sheet. Nobody's done the second check yet.
- 04 **Arun:** So the <sup>2</sup> \_\_\_\_\_ is one seventy-five, not one eighty. We'll keep the original entry for the follow-up.
- 05 **Tessa:** That's right: five dollars short of the expected figure. I haven't established where the difference comes from.
- 06 **Arun:** I'll record the <sup>3</sup> \_\_\_\_\_ as five below expected, with verification still pending. No explanation yet.
- 07 **Tessa:** Should I put cash lost in the handover? I don't want to make the entry sound more final than it is.
- 08 **Arun:** Use <sup>4</sup> \_\_\_\_\_. We have an initial difference, not a finding about a loss or a person.
- 09 **Tessa:** The separate query is P32. A customer questioned the price, and that hasn't been resolved. I don't know of any link to the count.
- 10 **Arun:** I'll list the <sup>5</sup> \_\_\_\_\_ separately. Don't merge the two just because they're in the same handover.

# The conversation, continued

## E Conversations / turns 11-20

Continue with the word bank on page 73.

- 11 **Tessa:** Can you take both follow-ups? I'd rather name one person than leave a note saying someone needs to look at them.
- 12 **Arun:** Yes, put me as the <sup>6</sup> \_\_\_\_\_ for both the balance check and P32. I haven't carried them out yet.
- 13 **Tessa:** I'll leave both marked open, then. The count hasn't been checked twice just because we've repeated the numbers aloud.
- 14 **Arun:** Correct. The <sup>7</sup> \_\_\_\_\_ is still to be done through our process. This conversation is the handover.
- 15 **Tessa:** And I shouldn't say the five dollars definitely disappeared. At the moment, the figures simply don't agree.
- 16 **Arun:** Exactly. A <sup>8</sup> \_\_\_\_\_ hasn't been established. Keep the numbers, the direction, and the unfinished check explicit.
- 17 **Tessa:** Could you read it back before I leave? Especially the five below; I don't want that turned into five over.
- 18 **Arun:** Expected one eighty, recorded one seventy-five, five below. The <sup>9</sup> \_\_\_\_\_ is second check pending, P32 query open, both assigned to me.
- 19 **Tessa:** That's everything. No established cause and no known connection between the two matters. The initial count stays in the record.
- 20 **Arun:** I'll take the <sup>10</sup> \_\_\_\_\_ forward and follow up P32 separately. Ownership is clear; the outcomes are still open.

08

### ANSWERS / EXPLANATIONS: PAGE 100

1. expected balance | 2. recorded count | 3. variance | 4. unverified discrepancy | 5. open price query | 6. action owner | 7. second check | 8. proven loss | 9. handover status | 10. reconciliation

# Report a different recorded difference

## F Say it

Expected drawer balance is \$240 and the recorded count is \$245. A second check is pending and the cause is unknown. Price query Q18 is open. Supervisor Jo accepts both follow-ups.

Complete the four gaps. Use each bank entry once.

### WORD + PHRASE BANK

above / unknown / Q18 / pending

08

Cashier: "The recorded count is five dollars <sup>1</sup> \_\_\_\_\_ expected."

Supervisor: "The second check is <sup>2</sup> \_\_\_\_\_."

Cashier: "The open price query is <sup>3</sup> \_\_\_\_\_."

Supervisor: "The cause remains <sup>4</sup> \_\_\_\_\_."

### ANSWERS / EXPLANATIONS: PAGE 100

1. above | 2. pending | 3. Q18 | 4. unknown

## Rehearse with a fixed script

1. Read \$180 expected and \$175 recorded, followed by \$5 below expected.
2. Repeat Arun's two actions: second balance check and the separate P32 price query.
3. Read the closing record with cause unknown and both outcomes still open.

### WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

# One sale, two ways to pay

## E More workplace conversations / 1-10

**Explain a completed split-tender receipt without confusing cash handed over, cash retained, sale value, and gift-card balance.**

Fictional completed sale: total \$42.60, including all charges. The shopper used \$15 from a gift card that previously held \$20, then handed over \$50 cash. The remaining \$27.60 was paid in cash and \$22.40 change returned. Both payments succeeded. Cashier Inez and supervisor Omar review the receipt; no refund is requested.

PEOPLE / Inez: Cashier | Omar: Supervisor

Use each bank entry once, without changing its form. Answers follow turn 20.

09

### WORD + PHRASE BANK

split tender / cash portion / remaining balance / change / outstanding amount / cash retained

- 01 **Inez:** Could you check how I'm explaining this receipt? It shows forty-two sixty for the sale, fifteen on a gift card, and fifty cash tendered.
- 02 **Omar:** That's a <sup>1</sup> \_\_\_\_\_: one sale, two payment methods. The fifty-dollar note isn't all money retained for the purchase.
- 03 **Inez:** The customer asked us to use only fifteen from the twenty-dollar gift card. We did that before the cash portion.
- 04 **Omar:** Then the card's <sup>2</sup> \_\_\_\_\_ is five dollars. Don't describe the original twenty as the amount redeemed.
- 05 **Inez:** After applying fifteen, the screen said twenty-seven sixty still due. That is forty-two sixty minus fifteen.
- 06 **Omar:** Right. That was the <sup>3</sup> \_\_\_\_\_ of the sale. The customer handed over fifty to cover it.
- 07 **Inez:** So the difference between the note and that remaining amount is twenty-two forty. We returned that at the counter.
- 08 **Omar:** Yes, that's the <sup>4</sup> \_\_\_\_\_. It comes from fifty minus twenty-seven sixty, not fifty minus the whole sale.
- 09 **Inez:** If I subtract the whole forty-two sixty from fifty, I get seven forty. That would ignore the fifteen already paid on the gift card.
- 10 **Omar:** Exactly. You'd be collecting that gift-card portion twice. The <sup>5</sup> \_\_\_\_\_ is twenty-seven sixty, and the gift-card redemption supplies the other fifteen.

# The conversation, continued

## E More workplace conversations / 11-20

Continue with the word bank on page 76.

- 11 **Inez:** I can explain that as fifty handed over, twenty-two forty handed back, and twenty-seven sixty applied to the purchase.
- 12 **Omar:** Good. Both methods succeeded, so the sale's <sup>6</sup> \_\_\_\_\_ is zero. The five left on the gift card isn't an unpaid part of this sale.
- 13 **Inez:** What if the customer sees two payment lines and thinks we've charged forty-two sixty twice?
- 14 **Omar:** Point to the sale total once, then the two portions: fifteen and twenty-seven sixty. Their sum is forty-two sixty, not eighty-five twenty.
- 15 **Inez:** And the fifty-cash entry records what was handed over, rather than a third payment on top of those portions?
- 16 **Omar:** Correct. Read it with the change entry. Don't add the tendered note to the net cash portion when explaining the total.
- 17 **Inez:** Should I call the twenty-two forty a refund? Money did go back to the shopper during the transaction.
- 18 **Omar:** Call it change. No return or refund is requested here; it was excess cash tendered for this same purchase.
- 19 **Inez:** Then my summary is one completed sale, fifteen gift-card value used, twenty-seven sixty cash paid, twenty-two forty change, and five still on the gift card.
- 20 **Omar:** That's clear. Use the receipt and actual confirmed payment results. This example explains the amounts; it doesn't supply buttons or procedures for another checkout system.

09

### ANSWERS / EXPLANATIONS: PAGE 101

1. split tender | 2. remaining balance | 3. cash portion | 4. change | 5. cash retained | 6. outstanding amount

# Separate the two remaining balances

## F Say it in a new situation

A completed \$68.25 sale has no additional charges. A gift card held \$30; \$18 was redeemed. The shopper handed over \$60 cash for the remaining \$50.25, and the correct change was returned. Both portions succeeded.

Complete the four gaps. Use each bank entry once.

### WORD + PHRASE BANK

12 / 50.25 / zero / 9.75

09

Cashier: The cash applied to the sale is \$<sup>1</sup> \_\_\_\_\_ .

Supervisor: The change returned is \$<sup>2</sup> \_\_\_\_\_ .

Cashier: The gift card still holds \$<sup>3</sup> \_\_\_\_\_ .

Supervisor: The amount still due on this completed sale is <sup>4</sup> \_\_\_\_\_ .

### ANSWERS / EXPLANATIONS: PAGE 101

1. 50.25 | 2. 9.75 | 3. 12 | 4. zero

## Read, switch, repeat

1. Check the four answers and read the complete exchange aloud.
2. Switch roles. Read it again with the word bank covered.
3. Return to the extended conversation. Read turns 1-10, then switch roles for turns 11-20. Use the corrected expressions.

### SOLO PRACTICE

Read both roles. Pause briefly at each change of speaker. Repeat any line that needed an answer check.

# Facings are not the full count

## E More workplace conversations / 1-10

**Read a shelf plan, calculate a refill, and distinguish moving stock within a store from receiving additional stock.**

Fictional shelf plan: SKU B24 has three facings across, four units deep per facing, one unit high. Seven units are on the shelf. The stockroom holds one unopened six-unit case plus five loose units, all available. No other locations, sales, damage, or deliveries occur. Mina and Dev plan to fill the assigned space.

PEOPLE / Mina: Retail associate | Dev: Department lead

Use each bank entry once, without changing its form. Answers follow turn 20.

### WORD + PHRASE BANK

case pack / location quantities / replenishment quantity / internal transfer / facings / shelf capacity

10

- 01 **Mina:** The shelf looks almost full from the front, but the refill sheet says we're short. Am I counting the wrong thing?
- 02 **Dev:** Count the actual units, not just the <sup>1</sup> \_\_\_\_\_. This plan assigns three front positions to B24, each holding four units deep, including the front unit.
- 03 **Mina:** I counted seven units altogether, including the ones at the back. There aren't four in every position yet.
- 04 **Dev:** The <sup>2</sup> \_\_\_\_\_ is twelve: three across, four deep, one high. Seven on hand there means five more will fill the planned space.
- 05 **Mina:** The stockroom has a sealed case marked six and five loose units. I nearly brought the whole case because it was easier to count.
- 06 **Dev:** The <sup>3</sup> \_\_\_\_\_ is five units, not one case. The loose five are enough for this refill.
- 07 **Mina:** That lets us leave the six-unit case unopened. The shelf would then have twelve and the stockroom would have six.
- 08 **Dev:** Yes. The <sup>4</sup> \_\_\_\_\_ is six, but it doesn't set the refill quantity. We fill the assigned space from available stock.
- 09 **Mina:** Would I add five to the store's total stock when I record that move? The shelf number is going up by five.
- 10 **Dev:** No. This is an <sup>5</sup> \_\_\_\_\_ from stockroom to shelf, not a new delivery. Total store stock remains eighteen.

# The conversation, continued

## E More workplace conversations / 11-20

Continue with the word bank on page 79.

- 11 **Mina:** Before the move that was seven on the shelf plus eleven in the stockroom. Afterwards it's twelve plus six.
- 12 **Dev:** Exactly. Keep the <sup>6</sup> \_\_\_\_\_ separate. A shelf increase can have an equal stockroom decrease.
- 13 **Mina:** What if I just pull the seven existing units forward so each front position looks neat? Would that count as the refill?
- 14 **Dev:** It would improve presentation, but it wouldn't add the missing five units. Fronting the stock and replenishing it are different actions.
- 15 **Mina:** I also see a gap next to B24. Could I spread its three facings over that space to make the area look full?
- 16 **Dev:** Use the current plan rather than taking another product's allocation. Check the SKU and shelf label so B24 doesn't end up behind the wrong price.
- 17 **Mina:** So first I use the plan's three positions, then the actual seven-unit count, then move five matching loose units from the stockroom.
- 18 **Dev:** Yes, following the store's handling and rotation process. The arithmetic alone doesn't authorize changing labels, the layout, or stock condition.
- 19 **Mina:** I'll record the locations accurately after the move, with twelve on the shelf and six in the stockroom if the count matches.
- 20 **Dev:** Good. No extra sale or receipt belongs in that record. We've planned a five-unit move within the same eighteen units.

10

### ANSWERS / EXPLANATIONS: PAGE 102

1. facings | 2. shelf capacity | 3. replenishment quantity | 4. case pack | 5. internal transfer | 6. location quantities

# Refill a different shelf

## F Say it in a new situation

SKU C18 has two facings, five units deep, one high. Four units are on the shelf and nine available units are in the stockroom. Move only enough to fill the assigned shelf. No other stock movements occur.

Complete the four gaps. Use each bank entry once.

### WORD + PHRASE BANK

six / three / thirteen / ten

10

Associate: The assigned shelf capacity is <sup>1</sup> \_\_\_\_\_ units.

Lead: Move <sup>2</sup> \_\_\_\_\_ units from the stockroom.

Associate: The stockroom will retain <sup>3</sup> \_\_\_\_\_ units.

Lead: Total store stock remains <sup>4</sup> \_\_\_\_\_ units.

### ANSWERS / EXPLANATIONS: PAGE 102

1. ten | 2. six | 3. three | 4. thirteen

## Read, switch, repeat

1. Check the four answers and read the complete exchange aloud.

2. Switch roles. Read it again with the word bank covered.

3. Return to the extended conversation. Read turns 1-10, then switch roles for turns 11-20. Use the corrected expressions.

### SOLO PRACTICE

Read both roles. Pause briefly at each change of speaker. Repeat any line that needed an answer check.

# The weight behind the price

## E More workplace conversations / 1-10

**Explain gross, tare, and net weight with consistent units, without deducting packaging twice.**

Fictional deli label check: filled container gross weight 0.845 kg; correct container tare 0.035 kg; label net weight 0.810 kg. Product price is \$12.00 per kg, with no other charges. The label price is \$9.72. Shopper Eva and associate Bao compare the label with the weighing record; the tare is already deducted.

PEOPLE / Eva: Shopper | Bao: Retail associate

Use each bank entry once, without changing its form. Answers follow turn 20.

### WORD + PHRASE BANK

tare / twice / unit price / difference / gross weight / net weight

11

- 01 **Eva:** Could you explain this label? I saw eight hundred forty-five grams with the container, but the label says eight hundred ten.
- 02 **Bao:** The larger number is the <sup>1</sup> \_\_\_\_\_. It includes the food and container together. The label charges for the food's weight.
- 03 **Eva:** Then the thirty-five-gram difference is the container? I thought perhaps some of the food had been removed between the two numbers.
- 04 **Bao:** It's the <sup>2</sup> \_\_\_\_\_.: thirty-five grams for this container. Nothing in this record indicates food was removed.
- 05 **Eva:** So eight hundred forty-five minus thirty-five gives eight hundred ten grams. That's what the label is using?
- 06 **Bao:** Yes, the <sup>3</sup> \_\_\_\_\_ is point eight one zero kilograms, which is eight hundred ten grams.
- 07 **Eva:** The price says twelve dollars a kilogram. I shouldn't multiply twelve by eight hundred ten, because that's a number in grams.
- 08 **Bao:** Right. Match the <sup>4</sup> \_\_\_\_\_ to kilograms: twelve times point eight one gives nine dollars seventy-two.
- 09 **Eva:** And if the container had been included, twelve times point eight four five would have come to ten dollars fourteen.
- 10 **Bao:** Yes. The <sup>5</sup> \_\_\_\_\_ would be forty-two cents. The actual nine-seventy-two label already excludes that container weight.

# The conversation, continued

## E More workplace conversations / 11-20

Continue with the word bank on page 82.

- 11 **Eva:** Could you take the thirty-five grams off the label weight now, just to make sure I don't pay for the packaging?
- 12 **Bao:** That would deduct it <sup>6</sup> \_\_\_\_\_. The label says net, so its eight hundred ten grams is already the product-only amount.
- 13 **Eva:** I see. I was comparing a combined weight on the record with a product-only weight on the label, not two measurements of the same thing.
- 14 **Bao:** Exactly. Keeping gross, tare, and net named makes the difference clear. We shouldn't treat every number on the record as another chargeable weight.
- 15 **Eva:** Does the same thirty-five-gram deduction apply to every container you use, or just the one in this check?
- 16 **Bao:** Just the correct container tare supplied here. Different packaging needs its applicable verified tare; we don't carry a convenient number across every container.
- 17 **Eva:** And this calculation doesn't tell us whether a scale is accurate in general? It only shows how these recorded numbers fit together.
- 18 **Bao:** That's right. Actual scales and their use need the required checks. This record lets us explain the price, not certify the equipment.
- 19 **Eva:** Then the food is eight hundred ten grams at twelve dollars a kilogram, and the total here is nine seventy-two.
- 20 **Bao:** Correct, with no additional charges in this case. The container was accounted for once, and the units and label price agree.

11

### ANSWERS / EXPLANATIONS: PAGE 103

1. gross weight | 2. tare | 3. net weight | 4. unit price | 5. difference | 6. twice

# Use the net figure once

## F Say it in a new situation

Gross weight is 1.260 kg, tare 0.060 kg, and the label already shows net 1.200 kg. The price is \$7.50 per kg, with no other charges. A gross-weight calculation would incorrectly give \$9.45.

Complete the four gaps. Use each bank entry once.

### WORD + PHRASE BANK

0.45 / 1200 / once / 9.00

Associate: The labelled net product weight is <sup>1</sup> \_\_\_\_\_ grams.

Shopper: The correct total is \$<sup>2</sup> \_\_\_\_\_.

Associate: Charging on gross weight would add \$<sup>3</sup> \_\_\_\_\_ incorrectly.

Shopper: The tare must be deducted <sup>4</sup> \_\_\_\_\_, not again from the net figure.

11

### ANSWERS / EXPLANATIONS: PAGE 103

1. 1200 | 2. 9.00 | 3. 0.45 | 4. once

## Read, switch, repeat

1. Check the four answers and read the complete exchange aloud.
2. Switch roles. Read it again with the word bank covered.
3. Return to the extended conversation. Read turns 1-10, then switch roles for turns 11-20. Use the corrected expressions.

### SOLO PRACTICE

Read both roles. Pause briefly at each change of speaker. Repeat any line that needed an answer check.

# 01 Briefing and language checks

## Finding the item the shopper actually means

### A Briefing checks / page 4

1. Which product does Casey mean?

**B. Cotton C218**

Casey identifies the cotton version, whose reference is C218.

2. Which size is requested?

**B. Medium**

Medium is the explicit size preference and should not be substituted without agreement.

3. What is known about local stock?

**D. It has not been checked**

The conversation identifies the item before any local availability check has occurred.

### D Language checks / page 9

1. Which read-back is accurate?

**A. Blue cotton C218 in medium.**

The correct read-back preserves the requested reference, material, color, and size.

2. Which stock statement is supported?

**B. Local availability has not been checked yet.**

No stock inquiry result exists yet, so both availability and reservation claims are unsupported.

3. Which next step follows the clarification?

**B. Check the exact requested variation.**

The exact item must be checked before discussing verified local availability.

4. Which distinction should a colleague receive?

**A. C218 is cotton; L214 is linen.**

The two references identify different products despite their shared color.

### E Dialogue gaps

Pages 10-11

- 1. item reference.** Turn 2. The reference distinguishes the two advertised shirts before the associate searches for a particular size.
- 2. cotton.** Turn 4. Cotton is the requested fiber, identifying C218 rather than linen L214.
- 3. size.** Turn 6. The shopper requests medium; willingness to inquire does not authorize a different size.
- 4. advertised item.** Turn 8. An advertisement identifies a promoted product but does not confirm this branch has the requested variation.
- 5. product variation.** Turn 10. The variation combines product reference, material, color, and size; a shared color and size alone may misidentify it.
- 6. local availability.** Turn 12. Local availability is stock of this exact item at this branch, not availability across the whole chain.
- 7. reservation.** Turn 14. A reservation would be a confirmed hold; this conversation has not located or reserved an item.
- 8. specification.** Turn 16. The complete specification is blue cotton C218 in medium; L214 refers to the other material.
- 9. substitution.** Turn 18. A different material, size, or product changes the request and needs the shopper's agreement.
- 10. stock inquiry.** Turn 20. The stock inquiry follows identification; no availability result or hold exists yet.

### F Transfer conversation

Page 12

#### 1. C314

Associate: "The requested reference is C314."

C314 identifies the cotton sweater the shopper selects, not the wool alternative.

#### 2. large

Shopper: "The requested size is large."

Large is the explicit size choice in this new scenario.

#### 3. unchecked

Associate: "Local stock remains unchecked."

Identifying the product does not supply a verified availability result.

#### 4. reserved

Shopper: "Nothing has been reserved."

No hold has been created merely by clarifying the product request.

## 02 Briefing and language checks

### Comparing fit, materials, and label information

#### A Briefing checks / page 13

1. Which jacket meets the stated machine-washing requirement?

**D. A, according to its label**

Jacket A's label permits machine washing, while B's says dry-clean only.

2. What do the two jackets cost?

**C. \$60 each**

The brief prices each jacket at sixty dollars, not both together.

3. What is unverified?

**A. Fit, comfort, and durability**

No fitting, comfort evidence, or durability testing has been supplied.

#### D Language checks / page 18

1. Which recommendation uses the supplied evidence?

**A. A meets your machine-washing requirement according to its label.**

The recommendation connects the actual label to the shopper's specific requirement.

2. Which comparison is unsupported?

**A. B will definitely last longer because it has a lining.**

A lining alone does not establish comparative durability or wear performance.

3. Which statement preserves the purchase status?

**B. Luis wants to inspect A but has not tried it on or bought it.**

Inspection interest does not establish fit or a completed purchase.

4. What should resolve a further washing-temperature question?

**D. The actual care-label instructions**

The comparison supplies no temperature, so the actual garment information must be checked.

## 02 Conversation answers

### Comparing fit, materials, and label information

#### E Dialogue gaps

Pages 19-20

**1. care label.** Turn 2. Care label provides the relevant evidence about cleaning, rather than relying on equal price or visual similarity.

**2. lining.** Turn 4. Lining is a construction feature, not by itself proof of the garment's care requirements or the reason for them.

**3. machine-washable.** Turn 6. Machine-washable reflects A's supplied label instruction, subject to the actual care details rather than invented settings.

**4. only.** Turn 8. Only limits the stated method for B; it should not be paraphrased as optional dry cleaning or machine-washing permission.

**5. each.** Turn 10. Each applies the sixty-dollar price separately to either jacket, not to the pair together.

**6. fit.** Turn 12. Fit concerns how the jacket sits on Luis, which has not been established by its label or price.

**7. comfort claim.** Turn 14. Comfort claim would assert an experience not established by the supplied construction and care facts or by Luis trying the jacket.

**8. durability claim.** Turn 16. Durability claim needs evidence about wear; neither equal price nor the presence of a lining supplies that evidence here.

**9. size chart.** Turn 18. Size chart can provide stated measurements for a fitting comparison, without guaranteeing fit before the shopper assesses the actual garment.

**10. washing temperature.** Turn 20. Washing temperature has not been supplied in this comparison; the actual label must answer it rather than an invented general setting.

#### F Transfer conversation

Page 21

##### 1. C

Associate: "Jacket C meets the stated washing requirement."

C's actual label permits machine washing despite its lined construction.

##### 2. each

Shopper: "Both jackets cost seventy dollars each."

Each states the price of either jacket separately, not the pair.

##### 3. only

Associate: "Jacket D says dry-clean only."

Only preserves the restriction in D's supplied care instruction.

##### 4. fit

Shopper: "The fit remains unverified."

Neither garment has been tried on, so fit is not established.

## 03 Briefing and language checks

### Resolving shelf prices and offer conditions

03

#### A Briefing checks / page 22

1. What is the price of one bottle?

**B. \$3**

The offer leaves the single-bottle price at three dollars.

2. What qualifies for the \$5 offer?

**D. Two qualifying bottles**

The stated promotion requires a qualifying pair, not a single item.

3. Which choice does Nia make?

**A. One bottle at \$3**

Nia chooses the single bottle after the complete comparison is explained.

#### D Language checks / page 27

1. Which explanation is accurate?

**B. \$2.50 is the pair's average per bottle; one alone is \$3.**

The promotion has a quantity condition that division alone does not remove.

2. What is the saving on the pair against two regular-price bottles?

**A. \$1**

Two regular-price bottles cost six dollars, so the five-dollar pair saves one.

3. How much more does the pair cost than buying one bottle?

**D. \$2**

The five-dollar total exceeds the three-dollar single purchase by two dollars.

4. Which response respects the final choice?

**D. One bottle at \$3; I will keep that quantity.**

The shopper explicitly selects one, and its stated single price remains three dollars.

# 03 Conversation answers

## Resolving shelf prices and offer conditions

03

### E Dialogue gaps

Pages 28-29

**1. quantity condition.** Turn 2. The five-dollar promotion requires two qualifying bottles; it does not change the single-bottle price.

**2. average price.** Turn 4. Five dollars divided by two is the average within the pair, not a separate one-bottle offer.

**3. single-item price.** Turn 6. The stated price for one bottle alone remains three dollars.

**4. qualifying items.** Turn 8. Each bottle must meet the stated offer terms; another product cannot automatically complete the pair.

**5. comparison basis.** Turn 10. Two bottles at the regular three-dollar price total six dollars; the pair offer saves one against that amount.

**6. extra spending.** Turn 12. Five dollars for the pair is two dollars more total spending than three dollars for one.

**7. purchase preference.** Turn 14. Nia chooses the single bottle based on need and total spending; the offer does not override that choice.

**8. quantity read-back.** Turn 16. The read-back confirms one bottle and prevents an explanation of the offer becoming an unintended purchase.

**9. price query.** Turn 18. The question concerns the quantity requirement, not a loyalty condition that the offer does not state.

**10. basket total.** Turn 20. One bottle at three dollars totals three dollars; this fictional case has no other charges.

### F Transfer conversation

Page 30

#### 1. three

Associate: "The offer requires three qualifying cans."

Three is the stated quantity required for the ten-dollar promotion.

#### 2. four

Shopper: "My one-can choice costs four dollars."

The single-can price remains four dollars despite the bundle offer.

#### 3. two

Associate: "The bundle saves two dollars against three regular-price cans."

Twelve dollars minus the ten-dollar bundle total gives a two-dollar saving.

#### 4. one

Shopper: "My selected quantity remains one."

The shopper chooses one rather than accepting the larger bundle.

# 04 Briefing and language checks

## Checking the basket and payment status

04

### A Briefing checks / page 31

1. What is the actual quantity?

**B. One mug**

The shopper has one mug even though two entries were recorded.

2. What is the corrected total?

**B. \$8**

One mug at eight dollars gives eight dollars with no additional charges.

3. What is the payment status?

**A. Payment has not begun**

The brief explicitly places the correction before any payment begins.

### D Language checks / page 36

1. Which explanation is accurate?

**B. One mug was recorded twice; the corrected total is \$8 before payment.**

The correction removes an erroneous quantity while preserving the eight-dollar price.

2. Which term should not describe this correction?

**C. Refund**

Refund means returning paid money, but payment has not begun here.

3. What should the customer display show after correction?

**D. One mug at \$8**

The revised basket contains one eight-dollar mug before payment begins.

4. Which statement preserves the final stage?

**C. The basket is corrected; payment is still next.**

No payment attempt or completion occurs during this correction exchange.

# 04 Conversation answers

## Checking the basket and payment status

### E Dialogue gaps

Pages 37-38

**1. duplicate scan.** Turn 2. Duplicate scan means the same intended mug has been entered twice, not that the shopper selected two physical mugs.

**2. physical quantity.** Turn 4. Physical quantity is one mug, which the checkout record must match rather than leaving the two-entry mistake in place.

**3. line item.** Turn 6. Line item is the transaction entry showing the mug and its quantity; the duplicate produces the incorrect sixteen-dollar total.

**4. payment status.** Turn 8. Payment status is unstated, so the cashier must not describe this as a completed charge, decline, or refund.

**5. quantity adjustment.** Turn 10. Quantity adjustment changes the recorded number from two mugs to one while leaving the eight-dollar item price unchanged.

**6. revised total.** Turn 12. Revised total is eight dollars after the duplicate quantity is corrected, with no additional charges in the supplied case.

**7. refund.** Turn 14. Refund would return money already paid; no money has been taken because the payment has not begun.

**8. amount due.** Turn 16. Amount due is the eight dollars still to be paid, distinct from money already received or returned.

**9. customer display.** Turn 18. Customer display lets Leo verify the corrected quantity and total before the next payment step.

**10. Transaction completion.** Turn 20. Transaction completion has not yet occurred; the corrected basket is ready for the separate payment and completion steps.

### F Transfer conversation

Page 39

#### 1. one

Cashier: "The actual quantity is one bowl."

Only one physical bowl is being purchased in this scenario.

#### 2. twelve

Shopper: "The corrected total is twelve dollars."

One bowl at twelve dollars gives the revised twelve-dollar total.

#### 3. begun

Cashier: "Payment has not begun."

The correction occurs before any payment attempt starts.

#### 4. refund

Shopper: "This is a correction, not a refund."

No money has been paid, so there is no paid amount to return.

04

# 05 Briefing and language checks

## Discussing returns and exchanges at the counter

### A Briefing checks / page 40

1. Which supplied policy conditions are met?

**B. Unused shirt, attached tags, receipt, and purchase within thirty days**

The brief confirms all four conditions of this fictional exchange policy.

2. What does Morgan want?

**D. The same shirt in a larger size**

The requested remedy is a larger-size exchange for the same shirt.

3. What remains unknown?

**C. Larger-size availability**

The replacement stock has not been checked despite the policy conditions being met.

### D Language checks / page 45

1. Which explanation is accurate?

**B. You meet the stated exchange conditions; I still need to check the larger size.**

Eligibility is supported while replacement availability and processing remain unfinished.

2. Which outcome has the shopper requested?

**B. Same-shirt exchange to a larger size**

Morgan wants a particular replacement rather than any available remedy.

3. Which claim is unsupported?

**B. Every store must use this exact thirty-day policy.**

The stated policy is fictional and does not establish universal legal requirements.

4. What should be checked next?

**B. Stock of the exact larger-size replacement**

Replacement availability is the unresolved practical step after the supplied conditions are confirmed.

# 05 Conversation answers

## Discussing returns and exchanges at the counter

### E Dialogue gaps

Pages 46-47

**1. exchange.** Turn 2. Exchange is the requested replacement of the purchased shirt with a larger size, not an automatic refund or store credit.

**2. replacement size.** Turn 4. Replacement size is the specific larger variation Morgan requests, while the shirt style and color remain unchanged.

**3. exchange window.** Turn 6. Exchange window is thirty days in this fictional store, and the ten-day-old purchase falls within it.

**4. eligibility.** Turn 8. Eligibility means the stated unused-condition, tags, receipt, and time-window requirements are met, not that replacement stock is confirmed.

**5. Replacement stock.** Turn 10. Replacement stock is the inventory of the exact larger-size shirt, which has not yet been checked.

**6. availability check.** Turn 12. Availability check is the next verification of the exact requested variation, separate from confirming the exchange policy conditions.

**7. requested remedy.** Turn 14. Requested remedy is the larger-size exchange; an unavailable replacement would require another discussion rather than automatic substitution of a refund.

**8. refund.** Turn 16. Refund returns money already paid, whereas Morgan's exchange request seeks a replacement item.

**9. proof of purchase.** Turn 18. Proof of purchase supports the original transaction and date; presenting it does not itself complete an exchange.

**10. pending exchange.** Turn 20. Pending exchange means the conditions are met but the stock check and actual exchange steps remain unfinished.

### F Transfer conversation

Page 48

#### 1. within

Associate: "Seven days is within the stated window."

Seven days falls inside the twenty-one-day period supplied for this store.

#### 2. small

Shopper: "The replacement size requested is small."

Small is the specific variation requested in this new case.

#### 3. unchecked

Associate: "Replacement stock remains unchecked."

Meeting exchange conditions does not establish the replacement's availability.

#### 4. exchange

Shopper: "The requested remedy is an exchange."

The shopper seeks a replacement shirt rather than an automatic refund.

# 06 Briefing and language checks

## Explaining local stock and collection status

### A Briefing checks / page 49

1. What does the message confirm?

**B. Acknowledgment of order R61**

The supplied message acknowledges the order but is not a collection-ready notice.

2. What remains unfinished?

**B. One item is still being located**

The order is not confirmed ready because one item is still being located.

3. What is promised for 3:00?

**D. An update from Noor, even if unresolved**

The commitment concerns communication at three, not a guaranteed stock outcome.

### D Language checks / page 54

1. Which explanation is accurate?

**B. The message acknowledges R61; one item is still being located.**

The message and current location work do not establish complete readiness.

2. What does even if unresolved add?

**C. The update still occurs without a final stock answer.**

The phrase preserves the communication commitment despite an uncertain outcome.

3. Which statement wrongly turns an update into a promise?

**A. Your complete order will definitely be ready at 3:00.**

Readiness at three is not supported by the promised status update.

4. What needs separate agreement?

**A. A proposed different size, color, or product**

The shopper has not authorized any substitution for the ordered variation.

# 06 Conversation answers

## Explaining local stock and collection status

### E Dialogue gaps

Pages 55-56

**1. order acknowledgment.** Turn 2. The acknowledgment confirms receipt of R61, not that its complete contents are ready to collect.

**2. order line.** Turn 4. One individual ordered item is still being located, so complete-order readiness is not confirmed.

**3. item location.** Turn 6. The item-location check remains unfinished; that alone does not establish sold-out status.

**4. contact owner.** Turn 8. Noor is responsible for the next update, giving the shopper a named point of contact.

**5. status update.** Turn 10. The update communicates the current position at three even without a final stock result.

**6. update time.** Turn 12. At three names the promised contact time; it is not a deadline or guarantee for collection readiness.

**7. substitution consent.** Turn 14. No consent to a different product variation has been given; an alternative needs a separate agreement.

**8. variation match.** Turn 16. The check must preserve the ordered variation rather than substitute a similar item to complete the order.

**9. order reference.** Turn 18. R61 connects the pending item and Noor's three-o'clock update to this specific order.

**10. handover completion.** Turn 20. No handover has occurred; acknowledgment and an update commitment must not be recorded as collection.

### F Transfer conversation

Page 57

#### 1. P74

Associate: "The order reference is P74."

P74 connects the message and unresolved item to the correct order.

#### 2. 4:30

Shopper: "The next update is at 4:30."

Four thirty is the promised communication time, not a readiness guarantee.

#### 3. Jo

Associate: "The update owner is Jo."

Jo is explicitly responsible for the next status communication.

#### 4. agreed

Shopper: "No substitution has been agreed."

An unresolved item does not authorize a different variation without agreement.

06

# 07 Briefing and language checks

## Managing queues and offering practical assistance

### A Briefing checks / page 58

1. What problem does Sam identify?

**B. The current checkout is too narrow**

Sam identifies the width of the current checkout, not a store-wide finding.

2. Which available route is offered?

**B. Main aisle to the left toward open lane four**

The brief supplies an open accessible checkout and a clear main-aisle route.

3. What help does Sam prefer?

**C. Spoken directions, with belongings and aid left under personal control**

The shopper chooses directions and does not authorize handling personal belongings or the aid.

### D Language checks / page 63

1. Which opening respects the shopper's choice?

**C. What help would you prefer with the route to lane four?**

The question asks about practical preferences without assuming permission or demanding personal medical details.

2. Which action is authorized?

**A. Giving spoken directions**

Sam accepts directions and retains control of belongings and the mobility aid.

3. Which statement accurately describes the queue arrangement?

**B. Lina will ask Noor to preserve the place; confirmation is pending.**

The brief distinguishes the planned colleague request from an accepted arrangement.

4. Which route information is supplied?

**C. Clear main aisle to the left, toward open lane four**

The scenario provides a specific usable route, not a certification or invented shortcut.

# 07 Conversation answers

## Managing queues and offering practical assistance

### E Dialogue gaps

Pages 64-65

**1. accessible checkout.** Turn 2. Accessible checkout is the available lane four identified in this scenario, offering a practical alternative to the reported narrow lane.

**2. spoken directions.** Turn 4. Spoken directions are the form of assistance Sam chooses, without authorizing physical guidance or handling personal items.

**3. main aisle.** Turn 6. Main aisle is the clear route to the left supplied in the scenario, leading toward open lane four.

**4. place in line.** Turn 8. Place in line is Sam's existing service position, which Lina will ask the colleague to preserve during the move.

**5. colleague coordination.** Turn 10. Colleague coordination is still pending; Lina has proposed asking Noor but has not received confirmation.

**6. assistance boundary.** Turn 12. Assistance boundary limits help to the requested directions and coordination, excluding unrequested handling of the mobility aid or belongings.

**7. permission.** Turn 14. Permission must apply to a specific proposed action; a general offer of help does not authorize touching or carrying.

**8. route confirmation.** Turn 16. Route confirmation repeats the left-hand main aisle and lane-four destination so the shopper can verify the proposed path.

**9. direct address.** Turn 18. Direct address means speaking to Sam about Sam's preferences, rather than treating a companion as the automatic decision-maker.

**10. pending request.** Turn 20. Pending request is Noor's place-in-line coordination, which remains to be confirmed rather than reported as already complete.

### F Transfer conversation

Page 66

#### 1. six

Associate: "The open alternative is lane six."

Lane six is the available checkout stated in this new scenario.

#### 2. right

Shopper: "The clear aisle is to the right."

Right identifies the supplied direction to the alternative lane.

#### 3. directions

Associate: "The preferred help is spoken directions."

The shopper requests verbal route information rather than physical assistance.

#### 4. pending

Shopper: "The place-in-line request is still pending."

The colleague has not yet responded, so the arrangement is unconfirmed.

# 08 Briefing and language checks

## Handing over a till and an unfinished query

### A Briefing checks / page 67

1. What is the recorded difference?

**A. \$5 below expected**

The recorded count of \$175 is five dollars below the expected \$180.

2. What verification is pending?

**C. A second balance check**

The brief states that the second check has not yet occurred.

3. What does Arun accept?

**C. Both unfinished checks, not their completed outcomes**

Arun takes the next actions without confirming a cause or completing either task.

### D Language checks / page 72

1. Which handover is accurate?

**C. Expected \$180, recorded \$175, second check pending, cause unknown.**

The correct statement includes both figures, the verification stage, and the limit on causal claims.

2. What is known about P32?

**A. Its price query is still open.**

The price query remains unfinished, with no established connection to the balance difference.

3. Which statement wrongly treats ownership as completion?

**C. Arun accepted both checks, so both issues are resolved.**

Accepting follow-up responsibility does not perform the checks or supply their outcomes.

4. Which calculation matches the facts?

**B. \$180 minus \$175 equals \$5 below expected.**

The expected balance exceeds the recorded count by five dollars, with verification still pending.

# 08 Conversation answers

## Handing over a till and an unfinished query

### E Dialogue gaps

Pages 73-74

- 1. expected balance.** Turn 2. The expected balance is the reference figure, 180 dollars, rather than the initial recorded count.
- 2. recorded count.** Turn 4. The 175-dollar count is the initial recorded figure and still needs the second check.
- 3. variance.** Turn 6. The variance is five dollars below expected; the arithmetic does not identify its cause.
- 4. unverified discrepancy.** Turn 8. An unverified discrepancy records a difference without claiming a confirmed loss or alleging misconduct.
- 5. open price query.** Turn 10. P32 is a separate unfinished price matter; there is no evidence connecting it to the drawer difference.
- 6. action owner.** Turn 12. Arun accepts responsibility for the two next actions; neither outcome is complete at handover.
- 7. second check.** Turn 14. The second check is the pending verification work, not this verbal read-back of the original figures.
- 8. proven loss.** Turn 16. A proven loss is a supported conclusion that the initial difference alone cannot establish.
- 9. handover status.** Turn 18. The handover preserves both open checks, Arun's ownership, and the absence of an established cause.
- 10. reconciliation.** Turn 20. Reconciliation compares cash and relevant records to investigate a difference; that work remains ahead after the handover.

### F Transfer conversation

Page 75

#### 1. above

Cashier: "The recorded count is five dollars above expected."

Two hundred forty-five exceeds the expected two hundred forty by five dollars.

#### 2. pending

Supervisor: "The second check is pending."

The check has not occurred merely because follow-up responsibility is accepted.

#### 3. Q18

Cashier: "The open price query is Q18."

Q18 identifies the separate unresolved price matter in this handover.

#### 4. unknown

Supervisor: "The cause remains unknown."

The initial arithmetic does not establish why the difference exists.

08

# 09 Conversation answers

## One sale, two ways to pay

### E Extended conversation

Pages 76-77

**1. split tender.** Turn 2. Split tender means one sale paid using more than one payment method; it does not create two separate sales.

**2. remaining balance.** Turn 4. Twenty dollars on the gift card minus fifteen redeemed leaves a five-dollar remaining balance.

**3. cash portion.** Turn 6. The cash portion is the remaining 27.60 paid toward the sale, not the 50.00 note initially handed over.

**4. change.** Turn 8. Cash tendered of 50.00 minus the 27.60 cash portion produces 22.40 change.

**5. cash retained.** Turn 10. The store retains 27.60 in cash after returning change; this plus 15.00 redeemed equals the sale total.

**6. outstanding amount.** Turn 12. Both successful payment portions total 42.60, leaving zero outstanding; the five-dollar gift balance is separate.

### F Transfer exchange

Page 78

#### 1. 50.25

Cashier: The cash applied to the sale is \$50.25 .

The sale total 68.25 minus the 18.00 gift-card redemption leaves 50.25 paid in cash.

#### 2. 9.75

Supervisor: The change returned is \$9.75 .

Sixty dollars tendered minus the 50.25 cash portion gives 9.75 change.

#### 3. 12

Cashier: The gift card still holds \$12 .

The card began with 30 and only 18 was redeemed, leaving 12.

#### 4. zero

Supervisor: The amount still due on this completed sale is zero .

The successful 18.00 and 50.25 portions together pay all 68.25; the gift-card balance is separate.

Background reading: [Shopify: payment methods and split-payment settings](#). The conversation is an original fictional teaching case.

# 10 Conversation answers

## Facings are not the full count

### E Extended conversation

Pages 79-80

**1. facings.** Turn 2. Facings are the three front positions across the shelf; each can hold additional units behind it.

**2. shelf capacity.** Turn 4. Three facings multiplied by four units deep and one unit high gives twelve units of assigned shelf capacity.

**3. replenishment quantity.** Turn 6. The refill is twelve minus seven, or five units; bringing six would exceed the assigned shelf quantity by one.

**4. case pack.** Turn 8. The case pack contains six individual units; one case is not the same quantity as one unit or the five-unit refill.

**5. internal transfer.** Turn 10. Moving five units from stockroom to shelf changes their location, not the store's total quantity.

**6. location quantities.** Turn 12. Location quantities change from seven and eleven to twelve and six, while their combined total stays eighteen.

### F Transfer exchange

Page 81

#### 1. ten

Associate: The assigned shelf capacity is ten units.

Two facings times five units deep times one high equals ten units.

#### 2. six

Lead: Move six units from the stockroom.

Ten capacity minus four already on the shelf gives a six-unit refill.

#### 3. three

Associate: The stockroom will retain three units.

Nine available units minus the six moved leaves three in the stockroom.

#### 4. thirteen

Lead: Total store stock remains thirteen units.

Four plus nine before the move equals ten plus three afterwards; no stock was received or sold.

10

Background reading: [Oracle Retail: facings and shelf capacity](#). The conversation is an original fictional teaching case.

# 11 Conversation answers

## The weight behind the price

### E Extended conversation

Pages 82-83

**1. gross weight.** Turn 2. Gross weight includes product and container; 0.845 kg is not the product-only weight to charge here.

**2. tare.** Turn 4. Tare is the container weight, 0.035 kg or 35 g, deducted from gross to find net product weight.

**3. net weight.** Turn 6. Net weight is 0.845 minus 0.035, or 0.810 kg, after the correct tare has already been deducted.

**4. unit price.** Turn 8. The supplied unit price is twelve dollars per kilogram, so the multiplier must be kilograms rather than grams.

**5. difference.** Turn 10. 10.14 based on gross minus the correct 9.72 based on net is 0.42, the price attributable to the container weight.

**6. twice.** Turn 12. Tare has already reduced 0.845 kg to 0.810 kg; subtracting it again would understate the product weight.

### F Transfer exchange

Page 84

#### 1. 1200

Associate: The labelled net product weight is 1200 grams.

1.200 kilograms equals 1200 grams after subtracting the sixty-gram tare.

#### 2. 9.00

Shopper: The correct total is \$9.00 .

1.200 kg multiplied by 7.50 dollars per kg gives 9.00.

#### 3. 0.45

Associate: Charging on gross weight would add \$0.45 incorrectly.

The incorrect 9.45 exceeds the correct 9.00 by 0.45, attributable to packaging weight.

#### 4. once

Shopper: The tare must be deducted once, not again from the net figure.

Net already excludes tare; another deduction would subtract the packaging weight twice.

11

Background reading: [NIST: grocery scales, packaging tare, and accurate charges](#). The conversation is an original fictional teaching case.

# Find the move you need

Use these as precise language models. Replace details only when you know the actual facts, authority, and agreed conditions.

## 01 Finding the item the shopper actually means

**Narrow the advertisement:** The ad shows two blue shirts; do you mean cotton or linen?

**Distinguish the other item:** L214 is the linen version.

**Confirm before searching:** I will use that exact reference and size for the stock inquiry.

Full phrase set: pages 7-8 | Dialogue: pages 10-11

## 02 Comparing fit, materials, and label information

**Ask about the requirement:** Is machine washing a requirement for you?

**Compare construction:** A is unlined; B has a lining.

**Keep fit separate:** We still need to check how it fits you.

Full phrase set: pages 16-17 | Dialogue: pages 19-20

## 03 Resolving shelf prices and offer conditions

**Acknowledge the calculation:** I see how you arrived at \$2.50 by dividing the pair price.

**Explain the average:** \$2.50 is the average per bottle when you buy the pair.

**Explain the extra outlay:** It is still \$2 more spending than buying one bottle.

Full phrase set: pages 25-26 | Dialogue: pages 28-29

## 04 Checking the basket and payment status

**Acknowledge the duplicate:** You are right; the mug has been recorded twice.

**Explain the record:** The current entry shows two at \$8, totaling \$16.

**Keep status clear:** Payment has not begun.

Full phrase set: pages 34-35 | Dialogue: pages 37-38

# Keep the conversation productive

Use these as precise language models. Replace details only when you know the actual facts, authority, and agreed conditions.

## 05 Discussing returns and exchanges at the counter

**Clarify the requested outcome:** Would you like the same shirt in a larger size?

**Confirm the condition:** The shirt is unused and the tags are attached.

**Avoid a readiness promise:** Eligibility does not mean the replacement is already available.

Full phrase set: pages 43-44 | Dialogue: pages 46-47

## 06 Explaining local stock and collection status

**Identify the order:** Let us check order R61.

**Avoid a readiness claim:** The complete order is not confirmed ready yet.

**Keep the commitment precise:** The update will happen even if the issue is still unresolved.

Full phrase set: pages 52-53 | Dialogue: pages 55-56

## 07 Managing queues and offering practical assistance

**Acknowledge the barrier:** I understand that this checkout is too narrow for you.

**Describe the route:** The clear main aisle to the left leads to lane four.

**Avoid a personal inquiry:** We can focus on the checkout route and the help you want.

Full phrase set: pages 61-62 | Dialogue: pages 64-65

## 08 Handing over a till and an unfinished query

**State the expected figure:** The expected drawer balance is \$180.

**Mark the verification stage:** The second check has not occurred yet.

**Separate the other item:** There is also an open price query for P32.

Full phrase set: pages 70-71 | Dialogue: pages 73-74

# Find a term and its context

The page number leads to the definition and a typical word combination. Repeated terms have separate entries when they serve different lesson contexts.

|                                                            |    |
|------------------------------------------------------------|----|

# Original cases. Clear boundaries.

These are original fictional teaching conversations, not transcripts of real workers. Names, figures, organizations, and incidents are invented. Sources support terminology and communication aims, not the fictional results or an endorsement of this book.

## **[1] US Bureau of Labor Statistics. Retail Sales Workers.**

[Open the original source](#)

Occupational context for product assistance, promotions, payment, receipts, and exchange-policy communication. The dialogues are original fictional teaching cases. Checked 10 October 2026.

## **[2] Federal Trade Commission. Clothes Captioning: Complying with the Care Labeling Rule.**

[Open the original source](#)

Background for reading actual garment-care information rather than inventing care claims. The book does not prescribe laundering settings or summarize legal penalties. Checked 10 October 2026.

## **[3] Federal Trade Commission. Solving Problems With a Business: Returns, Refunds, and Other Resolutions.**

[Open the original source](#)

Context for distinguishing requested remedies, purchase records, policies, and factual follow-up. The example exchange conditions are fictional, not universal rights. Checked 10 October 2026.

## **[4] US Department of Justice. ADA Update: A Primer for Small Business.**

[Open the original source](#)

Background for accessible customer service and appropriate assistance. The supplied checkout route is fictional and is not an accessibility-compliance assessment. Checked 10 October 2026.
