

ENGLISH FOR WORK / SEPTEMBER 2026

Construction and Architecture English

Learner workbook

Work with realistic cases, develop your own response, and use the answer section after you have tried the tasks.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For architects, construction managers, project engineers, site supervisors, estimators, owners' representatives, subcontractor coordinators, and design-build teams.

These cases practice communication. Actual equipment, construction, and safety work follows approved procedures and authorized specialist decisions.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Your course at a glance

Use the lesson numbers to match this document with the website and the other guides.

01 Design Intent and Client Requirements

Clarify missing information before responding.

02 Drawings, Specifications, and RFIs

Make a request with a clear action, purpose, and realistic timing.

03 Change Orders and Cost Control

Negotiate scope or timing while making conditions explicit.

04 Schedule, Sequencing, and Critical Path

Distinguish completed work from pending work and explain its impact.

05 Site Safety and Toolbox Talks

Clarify missing information before responding.

06 Permitting, Inspections, and Code Issues

Make a request with a clear action, purpose, and realistic timing.

07 Quality, Punch List, and Closeout

Give a handoff that the receiving person can confirm.

08 Claims, Disputes, and Documentation

Separate observations, assumptions, and conclusions.

Choose your pace

Quick practice: spend 15 minutes reading one case and saying a response. Full lesson: allow 45-60 minutes for language work, conversation, writing, and revision.

Level support

B1 learners can use the frames and a partner. B2 learners can try a response before reading the model. C1 learners can add the harder follow-up and reduce preparation time. These are teaching suggestions, not certified CEFR level ratings.

After practicing: open the AI prompt workshop, or use the prompts at the end of this guide.

LESSON 01 / READ AND NOTICE

Design Intent and Client Requirements

Clarify missing information before responding.

SITUATION

A client describes a meeting space as "flexible" but has not specified occupancy, furniture changes, or audiovisual needs.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

design intent - Functional, aesthetic, performance, and user objectives the design must preserve as details are developed.

program - In architecture, a statement of required spaces, functions, and user needs; elsewhere, an organized set of activities.

constructability - Extent to which a design can be built safely, efficiently, and reliably using available methods, materials, and sequencing.

scope - Defined boundary of work, responsibility, deliverables, assumptions, and exclusions.

3. Notice the language

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Improve this sentence: Could you explain what does this mean?

LESSON 01 / PRACTICE AND PRODUCE

Ask a precise question

4. Check the language

1. Which indirect question has the usual word order?
 - A. Could you confirm when the review starts?
 - B. Could you confirm when does the review start?
 - C. Could you confirm when starts the review?
2. Someone says the report is 'ready.' Which question best clarifies its approval status?
 - A. Can you send the report to me this afternoon?
 - B. Who will present the report at the meeting?
 - C. Has the report been approved, or is it ready for review?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 02 / READ AND NOTICE

Drawings, Specifications, and RFIs

Make a request with a clear action, purpose, and realistic timing.

SITUATION

A drawing and specification appear to describe different finishes for the same area. The site team needs a documented clarification.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

RFI - Request for information used to resolve an ambiguity, conflict, or missing detail in contract documents or a project scope.

specification - A detailed statement of required characteristics, performance, or materials.

drawing set - The collection of drawings that describes a design or construction project.

submittal - Information supplied by a contractor for required review, such as product data or shop drawings.

3. Notice the language

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Improve this sentence: Please revert soonest with the necessary.

LESSON 02 / PRACTICE AND PRODUCE

Ask for an actionable next step

4. Check the language

1. What does 'Please send it by Thursday' normally mean?
 - A. Send it on Thursday, but not earlier.
 - B. Keep sending it regularly until Thursday.
 - C. Send it no later than Thursday.
2. Which request gives the recipient enough detail to act?
 - A. Could you confirm that you received my earlier message?
 - B. Could you confirm the document version needed for the review?
 - C. Could you confirm that the review is important?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 03 / READ AND NOTICE

Change Orders and Cost Control

Negotiate scope or timing while making conditions explicit.

SITUATION

A client requests an additional partition after pricing is agreed. Cost and schedule effects have not been assessed.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

change order - A documented modification to agreed construction work, often affecting price or time.

allowance - An amount included in a construction budget for an item not yet fully specified.

contingency - A possible future condition or provision for it; in contracts, a condition affecting the transaction.

notice - A formal communication informing a party about an event, requirement, or proposed action.

3. Notice the language

Acknowledge the goal and explain the available choices. Connect an offer to its actual conditions. A useful response makes room for discussion without promising approval or resources you do not control.

We can ..., provided that

Would you prefer ... or ...?

I can take that proposal for review; I cannot yet confirm

Improve this sentence: If you will approve the scope, we can assess the schedule.

LESSON 03 / PRACTICE AND PRODUCE

Offer a workable tradeoff

4. Check the language

1. Which sentence presents a normal future condition clearly?
 - A. If the scope changes, we reviewed the schedule.
 - B. If the scope changes, we will review the schedule.
 - C. If the scope will change, we will review the schedule.
2. Which response negotiates a new request without silently promising extra work?
 - A. We can assess the addition and explain its effect on the agreed scope.
 - B. We have included it, although its scope has not been reviewed.
 - C. We guarantee the original date without assessing the addition.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You want the preferred outcome but can accept one tradeoff. Ask for two options, then state which condition you can accept and which still needs approval.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 04 / READ AND NOTICE

Schedule, Sequencing, and Critical Path

Distinguish completed work from pending work and explain its impact.

SITUATION

A delivery delay affects a task on the current critical path. A lookahead schedule still shows the original sequence.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

critical path - Sequence of dependent work that determines the shortest feasible timeline.

float - The amount a scheduled activity can move without delaying a specified project milestone under the schedule model.

lookahead schedule - A detailed plan for work expected in the near term.

resequencing - Changing the planned order of activities.

3. Notice the language

Lead with the current state, then the important change or open item. Use completed-action language only for completed work. Add a next update point when it is known; do not invent a date to make the message sound complete.

We have completed ...; ... remains open.

As of ..., the status is

The next update will cover

Improve this sentence: Everything is progressing well.

LESSON 04 / PRACTICE AND PRODUCE

Give a useful status update

4. Check the language

1. Which sentence says a review is finished?
 - A. The team has completed the review.
 - B. The team is completing the review.
 - C. The team plans to complete the review.
2. Which update distinguishes a plan from a confirmed fact?
 - A. Delivery is confirmed for Friday because we planned it.
 - B. The delivery plan proves that arrival will be Friday.
 - C. Delivery is planned for Friday; the carrier has not confirmed it.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 05 / READ AND NOTICE

Site Safety and Toolbox Talks

Clarify missing information before responding.

SITUATION

In a toolbox-talk exercise, an instruction says to use "the right protection" without identifying the task or approved requirement.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

PPE - Personal protective equipment selected and used under applicable task-specific safety requirements.

fall protection - Systems and measures used under approved procedures to address the risk of falls from height.

toolbox talk - A short, task-relevant safety discussion conducted under an organization's safety arrangements.

stop work - A call or authorized action to pause work when a safety concern requires attention under local procedures.

3. Notice the language

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Improve this sentence: Could you explain what does this mean?

LESSON 05 / PRACTICE AND PRODUCE

Ask a precise question

4. Check the language

1. Which indirect question has the usual word order?
 - A. Could you confirm when does the review start?
 - B. Could you confirm when starts the review?
 - C. Could you confirm when the review starts?
2. Someone says the report is 'ready.' Which question best clarifies its approval status?
 - A. Who will present the report at the meeting?
 - B. Has the report been approved, or is it ready for review?
 - C. Can you send the report to me this afternoon?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 06 / READ AND NOTICE

Permitting, Inspections, and Code Issues

Make a request with a clear action, purpose, and realistic timing.

SITUATION

An inspection note identifies outstanding items, but a progress email says the area is fully approved.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

permit - Official permission for an activity under specified requirements.

inspection - An examination of an item or condition against relevant requirements.

code compliance - Conformity with the applicable building, engineering, or other technical code requirements.

reinspection - An additional inspection, often to check correction of previously identified issues.

3. Notice the language

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Improve this sentence: Please revert soonest with the necessary.

LESSON 06 / PRACTICE AND PRODUCE

Ask for an actionable next step

4. Check the language

1. What does 'Please send it by Thursday' normally mean?
 - A. Keep sending it regularly until Thursday.
 - B. Send it no later than Thursday.
 - C. Send it on Thursday, but not earlier.
2. Which request gives the recipient enough detail to act?
 - A. Could you confirm the document version needed for the review?
 - B. Could you confirm that the review is important?
 - C. Could you confirm that you received my earlier message?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 07 / READ AND NOTICE

Quality, Punch List, and Closeout

Give a handoff that the receiving person can confirm.

SITUATION

A closeout list contains eight items, with three completed and five awaiting review. The incoming coordinator needs the supporting records.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

punch list - A list of outstanding construction items requiring completion or correction.

substantial completion - A contract-defined construction stage when work is sufficiently complete for its intended use, subject to applicable terms.

warranty - A promise or contractual assurance about a product or work, with defined terms and remedies.

closeout - The documented completion and transfer of a project's remaining obligations and records.

3. Notice the language

State the current situation, relevant background, open task, and receiving role. Ask for acknowledgment or repeat-back of the critical item. Sending a message and transferring responsibility are not always the same thing.

The current status is ...; the outstanding item is

The record shows

Please confirm who has accepted

Improve this sentence: Someone should follow up on this.

LESSON 07 / PRACTICE AND PRODUCE

Transfer information and responsibility

4. Check the language

1. Which sentence checks that responsibility has been accepted?
 - A. Please confirm who will complete the outstanding check.
 - B. I mentioned the check in my earlier email.
 - C. The check appears somewhere in the notes.
2. Which response best checks a critical handoff detail?
 - A. I assume all results are final, so we can finish.
 - B. I saw the message, so no clarification is needed.
 - C. So the result is pending and your team will follow up; is that correct?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are taking over the work. Ask what remains open and repeat back the critical status or responsibility. Point out one detail that would be unsafe or misleading to assume.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 08 / READ AND NOTICE

Claims, Disputes, and Documentation

Separate observations, assumptions, and conclusions.

SITUATION

A project team wants to say a delay automatically entitles it to compensation. The contract and records have not been reviewed.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

claim - A statement that may need evidence, approval, qualification, or disclosure before it is used externally.

daily report - A dated record of work, conditions, events, or progress during a day.

meeting minutes - A written record of key discussion points, decisions, and agreed actions.

entitlement - A right to a benefit or remedy under applicable rules or an agreement.

3. Notice the language

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

The available evidence shows

This may indicate ..., but

We have not yet established whether

Improve this sentence: The pilot proves this will work everywhere.

LESSON 08 / PRACTICE AND PRODUCE

Match certainty to evidence

4. Check the language

1. Which sentence preserves uncertainty about an unconfirmed cause?
 - A. The change must have caused the delay.
 - B. The change definitely caused the delay.
 - C. The change may have contributed to the delay.
2. A result comes from a small pilot in one location. Which phrase accurately limits the claim?
 - A. Across the service, the observed result was ...
 - B. In this pilot, the observed result was ...
 - C. In similar locations, we can now expect the same result ...

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

Answer workshop

Try the tasks first. The model is one acceptable response, not a script to memorize. Your written version needs a subject line, an opening, and appropriate context. Assess it using the four criteria at the end.

01 | Design Intent and Client Requirements

Editing example: Could you explain what this means?

After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: "what this means".

Check 1: A - Could you confirm when the review starts?

A: The embedded question uses subject then verb: "the review starts".

B: Remove 'does' and use statement word order after 'confirm'.

C: Place the subject 'the review' before 'starts'.

Check 2: C - Has the report been approved, or is it ready for review?

A: This asks about delivery timing, not whether approval has happened.

B: This asks about the presenter, not the report's approval status.

C: This question distinguishes two meanings of 'ready' that affect the next action.

Model response: What activities should the space support, and how often will the layout change? Let's clarify occupancy and equipment needs so the design brief gives the team a usable direction.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

02 | Drawings, Specifications, and RFIs

Editing example: Could you send the missing document and confirm when it will be available?

The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

Check 1: C - Send it no later than Thursday.

A: "By Thursday" permits earlier delivery; it is not restricted to that day.

B: This interprets a deadline as a continuing activity, which would use "until".

C: 'By' sets the latest point, while 'after' refers to a later time.

Check 2: B - Could you confirm the document version needed for the review?

A: This checks receipt, not which version is required for the review.

B: The requested action and information are explicit.

C: This checks importance rather than identifying the needed document version.

Model response: Could the design team confirm the intended finish and relevant revision? I'll identify the conflicting references in a request for information rather than assume which instruction takes precedence.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

03 | Change Orders and Cost Control

Editing example: If you approve the scope, we can assess the schedule.

For an ordinary future condition, the "if" clause uses present tense. The other clause can express the future consequence or possibility.

Check 1: B - If the scope changes, we will review the schedule.

A: "Reviewed" places the response in the past instead of expressing the future response.

B: The "if" clause uses present tense; the main clause states the future response.

C: For this ordinary future condition, use present simple in the "if" clause.

Check 2: A - We can assess the addition and explain its effect on the agreed scope.

A: This offers a useful next step while keeping the approval and scope question open.

B: It treats unreviewed work as already included.

C: It promises an outcome without examining the consequences.

Model response: We can review the partition as a proposed change. Let's assess its cost and schedule effect through the agreed change process before confirming that it is included in the current price.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

04 | Schedule, Sequencing, and Critical Path

Editing example: Three checks are complete; two remain open and are being reviewed.

The revision gives observable progress. A positive label alone does not tell the reader what is complete or still needed.

Check 1: A - The team has completed the review.

A: 'Has completed' states that the action is finished.

B: 'Is completing' presents the work as in progress.

C: 'Plans to complete' describes an intention, not completion.

Check 2: C - Delivery is planned for Friday; the carrier has not confirmed it.

A: A plan does not establish carrier confirmation.

B: A plan cannot prove a future arrival time.

C: This explicitly labels the date as planned and identifies the missing confirmation.

Model response: The delayed delivery affects a critical-path task. I'll update the lookahead and show the feasible resequencing options for review instead of leaving the original dates unexplained.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

05 | Site Safety and Toolbox Talks

Editing example: Could you explain what this means?

After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: "what this means".

Check 1: C - Could you confirm when the review starts?

A: Remove 'does' and use statement word order after 'confirm'.

B: Place the subject 'the review' before 'starts'.

C: The embedded question uses subject then verb: "the review starts".

Check 2: B - Has the report been approved, or is it ready for review?

A: This asks about the presenter, not the report's approval status.

B: This question distinguishes two meanings of 'ready' that affect the next action.

C: This asks about delivery timing, not whether approval has happened.

Model response: Which task and approved safety requirement does this refer to? Please have the authorized person clarify the instruction before work proceeds. The language needs to be specific enough to understand and check.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

06 | Permitting, Inspections, and Code Issues

Editing example: Could you send the missing document and confirm when it will be available?

The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

Check 1: B - Send it no later than Thursday.

A: This interprets a deadline as a continuing activity, which would use "until".

B: 'By' sets the latest point, while 'after' refers to a later time.

C: "By Thursday" permits earlier delivery; it is not restricted to that day.

Check 2: A - Could you confirm the document version needed for the review?

A: The requested action and information are explicit.

B: This checks importance rather than identifying the needed document version.

C: This checks receipt, not which version is required for the review.

Model response: Could you confirm the inspection status and the items still outstanding? I'll correct the progress wording so it does not imply approval that has not been documented.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

07 | Quality, Punch List, and Closeout

Editing example: Please confirm which team has accepted the follow-up task.

The revised sentence asks for an identifiable receiving team instead of leaving responsibility with an unspecified 'someone'.

Check 1: A - Please confirm who will complete the outstanding check.

A: It asks for an identifiable person or team responsible for the task.

B: Mentioning a task does not show that anyone accepted it.

C: A written record alone does not identify who will act.

Check 2: C - So the result is pending and your team will follow up; is that correct?

A: It changes pending information into a final result.

B: Receiving a message is not the same as confirming its meaning.

C: This repeats the status and responsibility and invites correction.

Model response: Three items are complete, and five await review. The list links each item to its record and responsible party. Please confirm the remaining review steps before reporting closeout as finished.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

08 | Claims, Disputes, and Documentation

Editing example: The pilot worked in the tested setting; performance elsewhere remains untested.

The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Check 1: C - The change may have contributed to the delay.

A: 'Must have' expresses a strong inference that the evidence may not support.

B: 'Definitely' presents the cause as certain.

C: 'May have contributed' presents a possibility without claiming the cause is established.

Check 2: B - In this pilot, the observed result was ...

A: A pilot in one location does not establish a service-wide observation.

B: This locates the finding in the setting actually studied.

C: Similarity alone does not establish that the result will transfer.

Model response: The delay and its effects should be documented, but entitlement requires appropriate contract and legal review. I'll separate the factual record from any conclusion about a claim.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

These cases practice communication. Actual equipment, construction, and safety work follows approved procedures and authorized specialist decisions.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Digital.gov: plain-language guidance

<https://digital.gov/guides/plain-language>

Council of Europe: CEFR descriptors

<https://www.coe.int/en/web/common-european-framework-reference-languages/cefr-descriptors>

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

Practice grammar in context

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

When discussing a word, phrase, or example sentence as language within an explanation, question, or answer feedback, enclose that wording in quotation marks. For example: What does "about" mean in "about twenty people"? Use "on" with a named day. Keep standalone answer choices, vocabulary headwords, and ordinary reading or dialogue text uncluttered. Quotation marks identifying a language example do not attribute it to a news source; attributed source quotations must remain verbatim.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Construction and Architecture English

Professional audience: architects, construction managers, project engineers, site supervisors, estimators, owners' representatives, subcontractor coordinators, and design-build teams

Scope: These cases practice communication. Actual equipment, construction, and safety work follows approved procedures and authorized specialist decisions.

Lesson 01: Design Intent and Client Requirements

Original fictional case: A client describes a meeting space as "flexible" but has not specified occupancy, furniture changes, or audiovisual needs.

Language workshop: Ask a precise question

Communication goal: Clarify missing information before responding.

Language guidance: Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

Useful frames (complete the gaps with case facts): When you say ..., do you mean ...? / Could you clarify which ...? / So, my understanding is Is that right?

Vocabulary: design intent: Functional, aesthetic, performance, and user objectives the design must preserve as details are developed. / program: In architecture, a statement of required spaces, functions, and user needs; elsewhere, an organized set of activities. / constructability: Extent to which a design can be built safely, efficiently, and reliably using available methods, materials, and sequencing. / scope: Defined boundary of work, responsibility, deliverables, assumptions, and exclusions.

Speaking task: Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Writing task: Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Optional second-round challenge: The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Model for comparison AFTER my attempt, not a response to give me first: What activities should the space support, and how often will the layout change? Let's clarify occupancy and equipment needs so the design brief gives the team a usable direction.

END REFERENCE

TASK: Grammar that changes the meaning

1. For a lesson, use its language workshop as the focus. For a dialogue, quote one actual sentence and select one useful grammar feature from it, such as question word order, tense, modality, conditionals or clause linking. Explain in no more than 90 words how this feature helps the speakers do their work. Keep the grammar target narrow.
2. Give two short contrasting sentences using this workplace context. Explain the difference in time, certainty, condition or politeness. Label invented examples and preserve the distinction between possible, planned and confirmed events. Describe context-dependent choices as choices, not universal rules.
3. Give me one editing or sentence-building task using a known case fact. Do not copy the supplied editing example or reveal its answer. Ask me to explain my intended meaning. Stop and wait.
4. After I answer, quote my wording, identify at most two issues, and give a brief explanation and one hint. Ask me to revise before offering a full corrected version. Then accept any accurate, natural alternative that serves the purpose.
5. Continue with two new tasks, one at a time: first guided, then an original response without a sentence frame. End with a two-sentence workplace message using the target feature and a compact self-check. Do not replace this sequence with a worksheet and answer key.

END REFERENCE

TASK: Coach my workplace writing

1. Ask me to paste my own fictional or anonymized draft and identify its reader and purpose. If the reference gives a writing task, mention that task as the default. If it is a dialogue, suggest a brief follow-up message that records its outcome and open questions. Stop and wait. Do not write the message for me first.
2. Once I supply the draft, check it against the reference. If an ambiguity changes the meaning, ask one focused question before rewriting. Do not assume that the draft is correct evidence for a new deadline, approval, diagnosis, cost or commitment.
3. Give feedback in three parts: one effective phrase with a reason; up to three priority improvements, quoting my words; and one short revision task for me. Prioritize incorrect facts or unclear action before minor grammar. For each language correction, explain why it matters to this reader. Label optional stylistic alternatives separately and preserve my level of certainty and intended politeness.
4. Stop and wait for my revision. Then compare the two attempts, identify an improvement and offer one edited version that preserves my voice and purpose. Keep the requested length; if none is specified, use 70-110 words. Explain any meaningful change rather than silently making the message stronger or more certain.
5. Close with one phrase worth reusing and a short transfer task for a different fictional reader. Wait for my attempt before providing another model.
