

ENGLISH FOR WORK / SEPTEMBER 2026

Environmental Consulting English

Conversation lab

8 complete workplace dialogues, followed by eight additional role-play cases. Study the exchanges, then make the conversation your own.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For environmental consultants, remediation managers, sustainability analysts, field scientists, permitting specialists, ESG teams, and environmental project managers.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Inside this conversation lab

Original fictional training conversations in professional English. These are realistic scripts, not transcripts of actual people. The professional roles are the speaker labels; all figures, incidents, and organizations are invented.

01 Site-assessment scope

02 Sampling data quality

03 Permit clarification

04 Remediation options

05 Compliance audit findings

06 Emissions boundary

07 Community meeting preparation

08 Proposal exclusions

Then try eight independent role-play cases, followed by feedback criteria and references.

Read it. Hear it. Make it yours.

1. Read the setting. Identify the roles, the immediate problem, and what each speaker needs.
2. Read the whole conversation aloud with a partner. In a group, give a third person the observer role. For three-speaker scripts, assign each professional a separate voice.
3. Notice how the speakers ask a specific question, qualify a claim, disagree, explain a technical point, or agree on a next step. Underline language you would actually use.
4. Cover the script. Recreate the exchange using the situation and professional roles. Keep the meaning, but change the wording.
5. Switch roles and introduce a complication: a missing record, a different priority, an unavailable colleague, or a changed assumption. End with a clear outcome or unresolved question.

Register and terminology

These colleagues use concise professional language. In an internal technical meeting, familiar abbreviations can be natural. With a new colleague or a client, expand unfamiliar terms and check understanding. Keep disagreement directed at the evidence or proposal, and match the degree of certainty to what is known.

Independent study

Speak each role aloud. Pause before the reply and supply your own response before revealing the next line. Record a second version using invented details, then compare its clarity and tone with the script.

Professional context

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

FULL DIALOGUE 01 / 6 SPEAKING TURNS

Site-assessment scope

A consultant explains an initial site review.

Roles: Client property manager / Environmental consultant

Client property manager: The historical records suggest a former industrial use. Does that establish contamination?

Environmental consultant: No. It identifies a concern for assessment; it isn't a sampling result.

Client property manager: What should the client understand about the next step?

Environmental consultant: We need to assess the evidence and recommend any further investigation within the agreed scope.

Client property manager: I'll distinguish records review, site observations, and untested questions in the summary.

Environmental consultant: Good. Avoid presenting either contamination or a clean bill of health as established without supporting evidence.

Notice the professional language

Discuss this wording: "The historical records suggest a former industrial use. Does that establish contamination?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 02 / 6 SPEAKING TURNS

Sampling data quality

A field scientist and laboratory contact review a sample issue.

Roles: Field scientist / Laboratory coordinator

Field scientist: The chain-of-custody form and bottle label have different sample times.

Laboratory coordinator: We need a documented clarification that preserves the original records.

Field scientist: I'll check the field notes and speak with the sampler rather than guess the intended time.

Laboratory coordinator: Please also confirm the sample identifiers and any relevant handling information.

Field scientist: I'll submit the verified correction through the agreed process.

Laboratory coordinator: We'll record the discrepancy and assess any implications for data usability under the project requirements.

Notice the professional language

Discuss this wording: "The chain-of-custody form and bottle label have different sample times." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 03 / 6 SPEAKING TURNS

Permit clarification

A consultant prepares a question for an agency.

Roles: Permitting consultant / Project manager

Permitting consultant: The draft design changes the discharge arrangement. We need to check its effect on the permit requirements.

Project manager: Can construction proceed while we ask?

Permitting consultant: That needs assessment against the actual approval conditions. Don't assume the old arrangement covers the change.

Project manager: I'll provide the revised drawings and project schedule.

Permitting consultant: I'll frame the specific questions and coordinate the authorized agency contact.

Project manager: We'll keep the approval status and any work constraints clear in the project plan.

Notice the professional language

Discuss this wording: "Can construction proceed while we ask?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 04 / 6 SPEAKING TURNS

Remediation options

A technical team compares treatment approaches.

Roles: Remediation engineer / Project director

Remediation engineer: Option A is faster, but its cost estimate assumes unrestricted site access.

Project director: The facility remains operational, so that assumption needs testing.

Remediation engineer: I'll compare access constraints, effectiveness evidence, residual uncertainty, and long-term requirements for both options.

Project director: Include what further investigation could change the recommendation.

Remediation engineer: Then we can discuss the tradeoffs with the client and relevant reviewers.

Project director: Good. Present a justified recommendation without implying that cost or speed alone settles the decision.

Notice the professional language

Discuss this wording: "Option A is faster, but its cost estimate assumes unrestricted site access." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 05 / 6 SPEAKING TURNS

Compliance audit findings

A consultant discusses a documentation gap.

Roles: Environmental auditor / Facility environmental manager

Environmental auditor: I couldn't locate the inspection record for May. That is an evidence gap, not yet proof the inspection wasn't done.

Facility environmental manager: I'll check the maintenance system and the responsible team's records.

Environmental auditor: Preserve the original records and distinguish verified completion from recollection.

Facility environmental manager: If we can't verify it, we'll document the gap and determine the appropriate corrective action.

Environmental auditor: I'll update the finding based on the evidence received.

Facility environmental manager: We'll assign an owner and track the action through our compliance process.

Notice the professional language

corrective action - Action taken to fix a current problem and prevent recurrence.

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 06 / 6 SPEAKING TURNS

Emissions boundary

A sustainability team reconciles its inventory scope.

Roles: Sustainability analyst / Client finance lead

Sustainability analyst: The draft total excludes the leased offices. What organizational boundary are we using?

Client finance lead: The finance data use one consolidation basis, but the emissions inventory may require a different assessment.

Sustainability analyst: Let's document the selected approach and apply it consistently across facilities.

Client finance lead: I'll provide the ownership and operating arrangements, not just the cost-center list.

Sustainability analyst: I'll also separate measured activity data from estimates and disclose the assumptions.

Client finance lead: Then reviewers can understand the boundary and compare the inventory appropriately.

Notice the professional language

Discuss this wording: "The draft total excludes the leased offices. What organizational boundary are we using?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 07 / 6 SPEAKING TURNS

Community meeting preparation

A team plans to explain preliminary sampling results.

Roles: Project scientist / Community liaison

Project scientist: Some results are still being validated. How do we discuss them without overstating certainty?

Community liaison: Explain what was sampled, what is preliminary, and what review remains in ordinary language.

Project scientist: I'll avoid treating an exceedance as a complete risk assessment.

Community liaison: Also explain the process for interpreting the results and where people can submit questions.

Project scientist: I'll prepare a clear map and define the technical terms we must use.

Community liaison: We'll record unanswered questions and identify who will provide the follow-up.

Notice the professional language

Discuss this wording: "Some results are still being validated. How do we discuss them without overstating certainty?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 08 / 6 SPEAKING TURNS

Proposal exclusions

A consultant clarifies what a fixed-fee proposal covers.

Roles: Consulting project manager / Client project lead

Consulting project manager: The fee covers the agreed sampling locations. It doesn't include additional investigation if unexpected conditions are found.

Client project lead: Can we include an option for extra locations so the project doesn't stall?

Consulting project manager: Yes. We can state the trigger, unit costs, and authorization process clearly.

Client project lead: Also specify who decides whether further work is needed.

Consulting project manager: I'll revise the scope, assumptions, deliverables, and exclusions for review.

Client project lead: Then we'll agree on the work and change process before authorizing the project.

Notice the professional language

Discuss this wording: "Can we include an option for extra locations so the project doesn't stall?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

Eight more situations to make your own

The following cases are open role plays. They give you facts, contrasting roles, useful expressions, and a short model response. Use what you learned from the complete dialogues to create a longer exchange.

Preparation: two minutes. Conversation: three to five minutes. Feedback: one minute. Switch roles and repeat with the second-round challenge.

ROLE-PLAY CASE 01

Phase I and Phase II Site Assessments

SHARED CASE

A site-assessment summary says no further questions remain, but one historical record has not been obtained.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

The review is incomplete because that historical record is missing. I'll identify the information gap and its significance for the assessment rather than imply that all relevant questions have been resolved.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 02

Sampling Plans and Data Quality

SHARED CASE

A sample record omits a transfer signature. The laboratory result is available, but the chain-of-custody record needs review.

Role A | Responding professional

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Useful expressions

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Cover this until after your first attempt

Could the responsible team review the missing transfer record and document the resolution? I'll flag the gap in the data-quality discussion instead of treating the paperwork as complete.

Second round

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 03

Permitting and Agency Coordination

SHARED CASE

An agency comment requests additional modeling but does not specify which scenario the team believes is missing.

Role A | Responding professional

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Useful expressions

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Cover this until after your first attempt

Could we confirm which scenario and supporting information the comment refers to? I'll draft a focused clarification question and identify our proposed response for review.

Second round

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 04

Remediation Options and Risk

SHARED CASE

Two remediation options have different implementation times and monitoring needs. A client asks which is simply "best."

Role A | Responding professional

Compare options using the same criteria and state the tradeoff. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You favor one option but have not checked whether the scope is comparable. Ask about one difference, then explain the tradeoff you are willing to accept.

Useful expressions

Both options ..., but

Option A ..., whereas option B

The comparison depends on

Cover this until after your first attempt

The options address the problem in different ways and have different monitoring needs. Let's compare them against the agreed objectives and site conditions before recommending a preferred approach.

Second round

Your listener focuses only on the lowest price or fastest date. Explain one other relevant comparison criterion.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 05

Regulatory Compliance and Audits

SHARED CASE

A compliance review has six findings. Four have documented corrective actions; two still lack an assigned owner.

Role A | Responding professional

Distinguish completed work from pending work and explain its impact. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

Useful expressions

We have completed ...; ... remains open.

As of ..., the status is

The next update will cover

Cover this until after your first attempt

Four findings have documented actions. Two still need owners and target dates. I'll make those open decisions visible in the review update and distinguish planned actions from completed ones.

Second round

The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 06

Sustainability and ESG Reporting

SHARED CASE

A sustainability draft says the company is carbon neutral, but the supporting calculation covers only selected operations.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

The calculation does not yet support that broad claim. I'll state the included operations and reporting boundary clearly, then route the proposed wording for the appropriate review.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 07

Community and Stakeholder Meetings

SHARED CASE

Residents ask whether a preliminary result proves that an entire area is safe. Sampling covered only specified locations and conditions.

Role A | Responding professional

Explain a useful distinction in plain English. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

Useful expressions

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Cover this until after your first attempt

The result describes the sampled locations and conditions. It does not answer every question about the wider area. We should explain the findings, their limits, and the next planned information step clearly.

Second round

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 08

Proposal, Scope, and Client Expectations

SHARED CASE

A client requests additional sampling outside the agreed scope. The team has not assessed the extra time and cost.

Role A | Responding professional

Negotiate scope or timing while making conditions explicit. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You want the preferred outcome but can accept one tradeoff. Ask for two options, then state which condition you can accept and which still needs approval.

Useful expressions

We can ..., provided that

Would you prefer ... or ...?

I can take that proposal for review; I cannot yet confirm

Cover this until after your first attempt

We can assess the additional sampling as a scope change. Could we confirm the question it needs to answer, then provide the time and cost implications before agreeing to the work?

Second round

The preferred option is unavailable. Offer an alternative and clearly state any approval still needed.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Digital.gov: plain-language guidance

<https://digital.gov/guides/plain-language>

Council of Europe: CEFR descriptors

<https://www.coe.int/en/web/common-european-framework-reference-languages/cefr-descriptors>

GHG Protocol: corporate standard

<https://ghgprotocol.org/corporate-standard>

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

Rehearse with an AI colleague

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

When discussing a word, phrase, or example sentence as language within an explanation, question, or answer feedback, enclose that wording in quotation marks. For example: What does "about" mean in "about twenty people"? Use "on" with a named day. Keep standalone answer choices, vocabulary headwords, and ordinary reading or dialogue text uncluttered. Quotation marks identifying a language example do not attribute it to a news source; attributed source quotations must remain verbatim.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Environmental Consulting English

Professional audience: environmental consultants, remediation managers, sustainability analysts, field scientists, permitting specialists, ESG teams, and environmental project managers

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Dialogue 01: Site-assessment scope

Original fictional setting: A consultant explains an initial site review.

Professional roles: Client property manager / Environmental consultant

Published dialogue (reference script, not my own performance):

Client property manager: The historical records suggest a former industrial use. Does that establish contamination?

Environmental consultant: No. It identifies a concern for assessment; it isn't a sampling result.

Client property manager: What should the client understand about the next step?

Environmental consultant: We need to assess the evidence and recommend any further investigation within the agreed scope.

Client property manager: I'll distinguish records review, site observations, and untested questions in the summary.

Environmental consultant: Good. Avoid presenting either contamination or a clean bill of health as established without supporting evidence.

Vocabulary in this exchange: scope: Defined boundary of work, responsibility, deliverables, assumptions, and exclusions.

END REFERENCE

TASK: Interactive workplace role-play

1. Use the supplied case or dialogue as the starting situation. Give a two-sentence briefing and offer two relevant professional roles for me to choose from. For a supplied dialogue, use its actual roles. Ask which role I want, then stop and wait. Do not write my replies.
2. After I choose, identify who you will play and the immediate communication goal. Play the other professional; where a meeting requires a third person, label each of your speakers clearly. Start with one natural workplace turn and wait for my reply. Keep most turns to one to three sentences and ask no more than one question at a time.
3. Let the exchange develop across six to ten learner turns, or end earlier if I type "feedback". Respond to what I actually say. Include a plausible clarification, disagreement or tradeoff without silently changing the starting facts. Mark any added constraint as a fictional second-round variation. Do not resolve approvals, evidence or commitments that remain uncertain.
4. Stay in role during the exchange. If my meaning is unclear, ask for clarification naturally. Give a hint only if I ask or cannot proceed. Do not deliver a model conversation in advance.
5. At the debrief, quote two of my phrases: one successful choice and one worth improving. Check factual accuracy, language, register and whether the next step was clear. Give up to three focused suggestions. Ask me to retry the weakest turn; wait. Only then offer an alternative wording and a harder replay.

Client property manager: What should the client understand about the next step?

Environmental consultant: We need to assess the evidence and recommend any further investigation within the agreed scope.

Client property manager: I'll distinguish records review, site observations, and untested questions in the summary.

Environmental consultant: Good. Avoid presenting either contamination or a clean bill of health as established without supporting evidence.

Vocabulary in this exchange: scope: Defined boundary of work, responsibility, deliverables, assumptions, and exclusions.

END REFERENCE

TASK: Extend the conversation library

1. Propose six distinct, common scenarios in this field beyond the supplied case or script. For each, name the setting, two or more professional roles, the communication problem and one useful terminology focus. Include routine coordination, clarification, a complication, disagreement, handoff and follow-up where relevant. Choose scenarios that fit this profession, rather than forcing unsuitable situations into it.
2. Ask me to choose one scenario, or request all six in sequence. Stop and wait. Do not write all the scripts before I choose.
3. For the selected scenario, write an original fictional dialogue of 12-18 substantial speaking turns between two or three professionals. Name each role, establish an actual work problem, and let the exchange progress through questions, clarification, competing constraints and a credible next step or explicitly unresolved issue. Use the occupation's natural nomenclature and register. Avoid an interview between a teacher and a learner, generic small talk, and inserting a glossary definition into every reply. Explain specialist terms outside the dialogue instead.
4. After the script, explain five useful expressions in context, identify two grammar or register choices and ask three questions about the speakers' reasoning. Withhold the answers until I attempt them. Add one role-switch challenge.
5. Before presenting a script, check names, numbers, chronology, roles and terminology for consistency. Label invented facts and acknowledge uncertain specialist usage. If I requested all six, deliver one complete script at a time and wait for "next". Make each scenario materially different.
