

ENGLISH FOR WORK / SEPTEMBER 2026

Nursing and Allied Health English

Learner workbook

Work with realistic cases, develop your own response, and use the answer section after you have tried the tasks.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For nurses, charge nurses, physical therapists, occupational therapists, respiratory therapists, imaging staff, laboratory staff, care-team coordinators, and allied-health supervisors.

Fictional language practice for professional communication. Clinical, safety, regulatory, and patient-care decisions follow qualified supervision and current local procedures.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Your course at a glance

Use the lesson numbers to match this document with the website and the other guides.

01 Shift Handoffs and Clinical Prioritization

Give a handoff that the receiving person can confirm.

02 Patient Assessment and Escalation

Make a request with a clear action, purpose, and realistic timing.

03 Medication Safety and Allergy Clarification

Clarify missing information before responding.

04 Patient Education and Teach-Back

Explain a useful distinction in plain English.

05 Interprofessional Rounds

Include relevant voices and clarify the decision process.

06 Documentation and Charting

Separate observations, assumptions, and conclusions.

07 Difficult Families and Boundaries

Acknowledge a communication problem and give a corrected message.

08 Safety Events and Just Culture

Separate observations, assumptions, and conclusions.

Choose your pace

Quick practice: spend 15 minutes reading one case and saying a response. Full lesson: allow 45-60 minutes for language work, conversation, writing, and revision.

Level support

B1 learners can use the frames and a partner. B2 learners can try a response before reading the model. C1 learners can add the harder follow-up and reduce preparation time. These are teaching suggestions, not certified CEFR level ratings.

After practicing: open the AI prompt workshop, or use the prompts at the end of this guide.

LESSON 01 / READ AND NOTICE

Shift Handoffs and Clinical Prioritization

Give a handoff that the receiving person can confirm.

SITUATION

In a simulated handoff, the outgoing clinician has observations and background notes, but a requested result is still pending. The receiving clinician needs a clear transfer of information.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

SBAR - Situation, Background, Assessment, and Recommendation or Request: a framework for organizing a clear handoff or concern.

acuity - The severity or complexity of a patient's condition and associated care needs.

pending lab - A requested laboratory test or result that is not yet available.

watcher - A local clinical label sometimes used for a patient needing closer attention; its criteria must be clarified locally.

3. Notice the language

State the current situation, relevant background, open task, and receiving role. Ask for acknowledgment or repeat-back of the critical item. Sending a message and transferring responsibility are not always the same thing.

The current status is ...; the outstanding item is

The record shows

Please confirm who has accepted

Improve this sentence: Someone should follow up on this.

LESSON 01 / PRACTICE AND PRODUCE

Transfer information and responsibility

4. Check the language

1. Which sentence checks that responsibility has been accepted?
 - A. The check appears somewhere in the notes.
 - B. Please confirm who will complete the outstanding check.
 - C. I mentioned the check in my earlier email.
2. Which response best checks a critical handoff detail?
 - A. So the result is pending and your team will follow up; is that correct?
 - B. I assume all results are final, so we can finish.
 - C. I saw the message, so no clarification is needed.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are taking over the work. Ask what remains open and repeat back the critical status or responsibility. Point out one detail that would be unsafe or misleading to assume.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 02 / READ AND NOTICE

Patient Assessment and Escalation

Make a request with a clear action, purpose, and realistic timing.

SITUATION

During a simulation, a patient reports feeling worse and the learner identifies a change from the earlier observation. The local escalation process is available.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

vital signs - Core clinical measurements such as temperature, pulse, respiratory rate, blood pressure, and oxygen saturation used to assess patient status.

rapid response - Clinical team activated to assess and stabilize a patient showing signs of acute deterioration before a full emergency event.

clinical deterioration - Worsening patient condition that requires prompt reassessment, communication, and possible escalation of care.

escalation - Raising an issue to a higher authority or different function because risk, urgency, or decision rights require it.

3. Notice the language

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Improve this sentence: Please revert soonest with the necessary.

LESSON 02 / PRACTICE AND PRODUCE

Ask for an actionable next step

4. Check the language

1. What does 'Please send it by Thursday' normally mean?
 - A. Send it no later than Thursday.
 - B. Send it on Thursday, but not earlier.
 - C. Keep sending it regularly until Thursday.
2. Which request gives the recipient enough detail to act?
 - A. Could you confirm that the review is important?
 - B. Could you confirm that you received my earlier message?
 - C. Could you confirm the document version needed for the review?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 03 / READ AND NOTICE

Medication Safety and Allergy Clarification

Clarify missing information before responding.

SITUATION

A fictional medication record and the patient's account contain different allergy information. The learner must communicate the discrepancy through the clinical process.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

allergy - An immune response to a substance that can cause symptoms of varying severity.

contraindication - A circumstance that makes a treatment or procedure inadvisable because of potential harm.

MAR - Medication administration record: the clinical record used to document medication administration information.

closed-loop communication - A message-and-confirmation process in which the receiver repeats information and the sender verifies understanding.

3. Notice the language

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Improve this sentence: Could you explain what does this mean?

LESSON 03 / PRACTICE AND PRODUCE

Ask a precise question

4. Check the language

1. Which indirect question has the usual word order?
 - A. Could you confirm when does the review start?
 - B. Could you confirm when starts the review?
 - C. Could you confirm when the review starts?
2. Someone says the report is 'ready.' Which question best clarifies its approval status?
 - A. Who will present the report at the meeting?
 - B. Has the report been approved, or is it ready for review?
 - C. Can you send the report to me this afternoon?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 04 / READ AND NOTICE

Patient Education and Teach-Back

Explain a useful distinction in plain English.

SITUATION

A patient in a role-play nods during an explanation of an approved discharge sheet. The learner needs to check whether the explanation was clear.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

teach-back - Asking a person to explain information in their own words to check how clearly it was communicated.

discharge instructions - Information given to support a patient's care and follow-up after leaving a care setting.

health literacy - The ability to find, understand, and use information and services for health-related decisions.

adherence - The extent to which a person's actions follow an agreed care or treatment plan.

3. Notice the language

Start with the reader's question. Explain one unfamiliar term with familiar words, then give a relevant example or contrast. Check understanding without asking only 'Do you understand?'.

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Improve this sentence: We need to operationalize the implementation.

LESSON 04 / PRACTICE AND PRODUCE

Make a complex point clear

4. Check the language

1. Which sentence explains 'backlog' rather than repeating it?
 - A. The backlog is the maximum work the team can finish in a period.
 - B. The backlog is the work still waiting to be completed.
 - C. The backlog is the work completed during the last period.
2. Which follow-up best checks whether your explanation was clear?
 - A. How would you describe the next step in your own words?
 - B. Would you like me to repeat the explanation?
 - C. Was the explanation detailed enough for you?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 05 / READ AND NOTICE

Interprofessional Rounds

Include relevant voices and clarify the decision process.

SITUATION

In simulated rounds, one team member focuses on discharge timing and another raises an unresolved mobility concern.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

plan of care - A coordinated record of a patient's assessed needs, goals, and planned care.

functional status - A person's ability to perform activities relevant to daily life and care planning.

case management - Coordinating services and support around an individual's needs and circumstances.

safe discharge - A care transition planned to address the patient's identified needs through the applicable clinical process.

3. Notice the language

Summarize the issue neutrally, invite missing perspectives, and distinguish discussion from decision. State who can decide and record any unresolved question. Do not assume silence means agreement.

Let's hear ... before we decide.

The point we still need to resolve is

Who will make this decision, and what do they need?

Improve this sentence: Nobody objected, so everyone agrees.

LESSON 05 / PRACTICE AND PRODUCE

Help a group reach a clear next step

4. Check the language

1. Which phrase invites a missing perspective?
 - A. We haven't heard from the remote team yet; what is your view?
 - B. The remote team has been quiet, so they must agree.
 - C. We can record their agreement without asking them.
2. Which closing statement records an unresolved decision accurately?
 - A. We discussed the options, so approval is complete.
 - B. Everyone spoke, so the decision must be final.
 - C. Approval is pending; the sponsor will review the two options.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You hold a relevant concern that has not been discussed. Raise it when invited and ask who will decide. Help the facilitator state one unresolved question accurately.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 06 / READ AND NOTICE

Documentation and Charting

Separate observations, assumptions, and conclusions.

SITUATION

A draft simulated note says a patient was "difficult." It contains no description of what was said or observed.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

charting - Recording patient information and care in the clinical record.

objective finding - An observation or measured result described without unsupported judgment about intent.

intervention - An action intended to change a situation or improve an outcome.

patient response - A recorded change, statement, or reaction following care or an intervention.

3. Notice the language

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

The available evidence shows

This may indicate ..., but

We have not yet established whether

Improve this sentence: The pilot proves this will work everywhere.

LESSON 06 / PRACTICE AND PRODUCE

Match certainty to evidence

4. Check the language

1. Which sentence preserves uncertainty about an unconfirmed cause?
 - A. The change must have caused the delay.
 - B. The change definitely caused the delay.
 - C. The change may have contributed to the delay.
2. A result comes from a small pilot in one location. Which phrase accurately limits the claim?
 - A. Across the service, the observed result was ...
 - B. In this pilot, the observed result was ...
 - C. In similar locations, we can now expect the same result ...

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 07 / READ AND NOTICE

Difficult Families and Boundaries

Acknowledge a communication problem and give a corrected message.

SITUATION

A family member in a role-play says, "Nobody tells us anything." The learner can explain their role and arrange an appropriate conversation.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

scope of practice - The activities a professional is permitted and qualified to perform under applicable rules.

privacy - The appropriate handling of personal information and individuals' related interests and rights.

family meeting - A coordinated discussion with a patient's family or support people about relevant care matters.

boundary - A limit on acceptable conduct, responsibility, access, or scope.

3. Notice the language

Name what was unclear or wrong, acknowledge its effect, and correct it. A brief apology can help, followed by a practical next step. Avoid explaining away the other person's reaction or promising an outcome you cannot control.

My earlier message did not make ... clear.

I'm sorry for The correct information is

Let me check that the revised explanation addresses

Improve this sentence: I'm sorry if you failed to understand.

LESSON 07 / PRACTICE AND PRODUCE

Repair a misunderstanding

4. Check the language

1. Which apology takes responsibility for unclear wording?
 - A. I'm sorry we could not meet the original date.
 - B. I'm sorry my earlier wording was unclear.
 - C. I'm sorry the process took longer than expected.
2. What should follow an apology for an incorrect date?
 - A. The corrected date and the current confirmation status.
 - B. A longer explanation that never states the correct date.
 - C. A new guaranteed date even if it is unverified.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are frustrated because an earlier message created an expectation. Explain that expectation. Ask your partner to distinguish the correction from anything still uncertain.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 08 / READ AND NOTICE

Safety Events and Just Culture

Separate observations, assumptions, and conclusions.

SITUATION

A simulated safety report includes a fall and an assumption that a colleague was careless. The review has not established the contributing factors.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

fall risk - The possibility that a person may fall, assessed in the relevant care context.

incident report - A structured record of an event, available facts, and relevant follow-up information.

just culture - An approach to learning from safety events that examines systems and behavior while retaining appropriate accountability.

root cause - Underlying reason a problem occurred, not merely the visible symptom.

3. Notice the language

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

The available evidence shows

This may indicate ..., but

We have not yet established whether

Improve this sentence: The pilot proves this will work everywhere.

LESSON 08 / PRACTICE AND PRODUCE

Match certainty to evidence

4. Check the language

1. Which sentence preserves uncertainty about an unconfirmed cause?
 - A. The change may have contributed to the delay.
 - B. The change must have caused the delay.
 - C. The change definitely caused the delay.
2. A result comes from a small pilot in one location. Which phrase accurately limits the claim?
 - A. In similar locations, we can now expect the same result ...
 - B. Across the service, the observed result was ...
 - C. In this pilot, the observed result was ...

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

Answer workshop

Try the tasks first. The model is one acceptable response, not a script to memorize. Your written version needs a subject line, an opening, and appropriate context. Assess it using the four criteria at the end.

01 | Shift Handoffs and Clinical Prioritization

Editing example: Please confirm which team has accepted the follow-up task.

The revised sentence asks for an identifiable receiving team instead of leaving responsibility with an unspecified 'someone'.

Check 1: B - Please confirm who will complete the outstanding check.

A: A written record alone does not identify who will act.

B: It asks for an identifiable person or team responsible for the task.

C: Mentioning a task does not show that anyone accepted it.

Check 2: A - So the result is pending and your team will follow up; is that correct?

A: This repeats the status and responsibility and invites correction.

B: It changes pending information into a final result.

C: Receiving a message is not the same as confirming its meaning.

Model response: The result is still pending. I'll separate the current situation, relevant background, my assessment, and the request in this handoff. Please repeat back the outstanding task so we can confirm understanding.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

02 | Patient Assessment and Escalation

Editing example: Could you send the missing document and confirm when it will be available?

The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

Check 1: A - Send it no later than Thursday.

A: 'By' sets the latest point, while 'after' refers to a later time.

B: "By Thursday" permits earlier delivery; it is not restricted to that day.

C: This interprets a deadline as a continuing activity, which would use "until".

Check 2: C - Could you confirm the document version needed for the review?

A: This checks importance rather than identifying the needed document version.

B: This checks receipt, not which version is required for the review.

C: The requested action and information are explicit.

Model response: I'm concerned because this is a change from the earlier observation. I need an assessment through our escalation process now. Here is what I observed and when it changed.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

03 | Medication Safety and Allergy Clarification

Editing example: Could you explain what this means?

After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: "what this means".

Check 1: C - Could you confirm when the review starts?

A: Remove 'does' and use statement word order after 'confirm'.

B: Place the subject 'the review' before 'starts'.

C: The embedded question uses subject then verb: "the review starts".

Check 2: B - Has the report been approved, or is it ready for review?

A: This asks about the presenter, not the report's approval status.

B: This question distinguishes two meanings of 'ready' that affect the next action.

C: This asks about delivery timing, not whether approval has happened.

Model response: The recorded allergy information differs from what the patient has told me. Could we verify the details through the appropriate clinical process? I will state the discrepancy clearly rather than assume either account is complete.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

04 | Patient Education and Teach-Back

Editing example: We need to put the plan into practice.

The revised sentence names the action in familiar words. Specialist vocabulary is useful when it adds precision, but repeating abstract nouns can hide the meaning.

Check 1: B - The backlog is the work still waiting to be completed.

A: This describes capacity, not the work waiting to be completed.

B: This gives the meaning in familiar words.

C: Completed work is different from work still waiting.

Check 2: A - How would you describe the next step in your own words?

A: An open request lets the listener show their understanding.

B: Offering repetition may help, but it does not show how the listener understood the next step.

C: This invites an opinion on detail, not a demonstration of understanding.

Model response: I want to check that I explained this clearly. In your own words, how will you follow the instructions when you get home? We can go over any part that is unclear.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

05 | Interprofessional Rounds

Editing example: Before I record agreement, does anyone have a concern or need more time?

The revised question gives people a way to raise a concern. Silence can have several meanings, especially in unfamiliar or unequal-power situations.

Check 1: A - We haven't heard from the remote team yet; what is your view?

A: It invites participation without interpreting silence as consent.

B: Silence does not establish agreement.

C: Recording agreement without checking may misrepresent the team's view.

Check 2: C - Approval is pending; the sponsor will review the two options.

A: Discussion does not itself constitute approval.

B: Participation alone does not establish a decision.

C: This distinguishes discussion from approval and identifies the next reviewer.

Model response: Before we agree on timing, could we hear the mobility concern and the current assessment? Let's confirm the outstanding questions and who will address them in the care plan.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

06 | Documentation and Charting

Editing example: The pilot worked in the tested setting; performance elsewhere remains untested.

The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Check 1: C - The change may have contributed to the delay.

A: 'Must have' expresses a strong inference that the evidence may not support.

B: 'Definitely' presents the cause as certain.

C: 'May have contributed' presents a possibility without claiming the cause is established.

Check 2: B - In this pilot, the observed result was ...

A: A pilot in one location does not establish a service-wide observation.

B: This locates the finding in the setting actually studied.

C: Similarity alone does not establish that the result will transfer.

Model response: Let's replace that label with observable information. Record what the patient said or did, the relevant context, the action taken, and the response, following the documentation process.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

07 | Difficult Families and Boundaries

Editing example: I'm sorry my message did not explain the timing clearly.

The revision takes responsibility for the message without blaming the listener. It identifies what needs to be corrected.

Check 1: B - I'm sorry my earlier wording was unclear.

A: This acknowledges a missed date, not the communication problem in the question.

B: This acknowledges the speaker's contribution to the problem.

C: This acknowledges duration, but does not take responsibility for the unclear wording.

Check 2: A - The corrected date and the current confirmation status.

A: A repair needs usable corrected information, including any uncertainty.

B: The reader still lacks the information they need.

C: An unsupported new promise can create a second misunderstanding.

Model response: I can hear that the lack of information is frustrating. Let me explain what I can clarify and arrange contact with the appropriate team member for the questions outside my role.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

08 | Safety Events and Just Culture

Editing example: The pilot worked in the tested setting; performance elsewhere remains untested.

The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Check 1: A - The change may have contributed to the delay.

A: 'May have contributed' presents a possibility without claiming the cause is established.

B: 'Must have' expresses a strong inference that the evidence may not support.

C: 'Definitely' presents the cause as certain.

Check 2: C - In this pilot, the observed result was ...

A: Similarity alone does not establish that the result will transfer.

B: A pilot in one location does not establish a service-wide observation.

C: This locates the finding in the setting actually studied.

Model response: The report should describe the event and available observations. We have not established the contributing factors. I'll remove the unsupported judgment and use the reporting process to raise the concern.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

Fictional language practice for professional communication. Clinical, safety, regulatory, and patient-care decisions follow qualified supervision and current local procedures.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

Practice grammar in context

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

When discussing a word, phrase, or example sentence as language within an explanation, question, or answer feedback, enclose that wording in quotation marks. For example: What does "about" mean in "about twenty people"? Use "on" with a named day. Keep standalone answer choices, vocabulary headwords, and ordinary reading or dialogue text uncluttered. Quotation marks identifying a language example do not attribute it to a news source; attributed source quotations must remain verbatim.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Nursing and Allied Health English

Professional audience: nurses, charge nurses, physical therapists, occupational therapists, respiratory therapists, imaging staff, laboratory staff, care-team coordinators, and allied-health supervisors

Scope: Fictional language practice for professional communication. Clinical, safety, regulatory, and patient-care decisions follow qualified supervision and current local procedures.

Lesson 01: Shift Handoffs and Clinical Prioritization

Original fictional case: In a simulated handoff, the outgoing clinician has observations and background notes, but a requested result is still pending. The receiving clinician needs a clear transfer of information.

Language workshop: Transfer information and responsibility

Communication goal: Give a handoff that the receiving person can confirm.

Language guidance: State the current situation, relevant background, open task, and receiving role. Ask for acknowledgment or repeat-back of the critical item. Sending a message and transferring responsibility are not always the same thing.

Useful frames (complete the gaps with case facts): The current status is ...; the outstanding item is ... / The record shows ... / Please confirm who has accepted ...

Vocabulary: SBAR: Situation, Background, Assessment, and Recommendation or Request: a framework for organizing a clear handoff or concern. / acuity: The severity or complexity of a patient's condition and associated care needs. / pending lab: A requested laboratory test or result that is not yet available. / watcher: A local clinical label sometimes used for a patient needing closer attention; its criteria must be clarified locally.

Speaking task: Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are taking over the work. Ask what remains open and repeat back the critical status or responsibility. Point out one detail that would be unsafe or misleading to assume.

Writing task: Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Optional second-round challenge: The intended recipient cannot take ownership. Keep the status clear and identify the need for an authorized reassignment.

Model for comparison AFTER my attempt, not a response to give me first: The result is still pending. I'll separate the current situation, relevant background, my assessment, and the request in this handoff. Please repeat back the outstanding task so we can confirm understanding.

END REFERENCE

TASK: Grammar that changes the meaning

1. For a lesson, use its language workshop as the focus. For a dialogue, quote one actual sentence and select one useful grammar feature from it, such as question word order, tense, modality, conditionals or clause linking. Explain in no more than 90 words how this feature helps the speakers do their work. Keep the grammar target narrow.
2. Give two short contrasting sentences using this workplace context. Explain the difference in time, certainty, condition or politeness. Label invented examples and preserve the distinction between possible, planned and confirmed events. Describe context-dependent choices as choices, not universal rules.
3. Give me one editing or sentence-building task using a known case fact. Do not copy the supplied editing example or reveal its answer. Ask me to explain my intended meaning. Stop and wait.
4. After I answer, quote my wording, identify at most two issues, and give a brief explanation and one hint. Ask me to revise before offering a full corrected version. Then accept any accurate, natural alternative that serves the purpose.
5. Continue with two new tasks, one at a time: first guided, then an original response without a sentence frame. End with a two-sentence workplace message using the target feature and a compact self-check. Do not replace this sequence with a worksheet and answer key.

END REFERENCE

TASK: Coach my workplace writing

1. Ask me to paste my own fictional or anonymized draft and identify its reader and purpose. If the reference gives a writing task, mention that task as the default. If it is a dialogue, suggest a brief follow-up message that records its outcome and open questions. Stop and wait. Do not write the message for me first.
2. Once I supply the draft, check it against the reference. If an ambiguity changes the meaning, ask one focused question before rewriting. Do not assume that the draft is correct evidence for a new deadline, approval, diagnosis, cost or commitment.
3. Give feedback in three parts: one effective phrase with a reason; up to three priority improvements, quoting my words; and one short revision task for me. Prioritize incorrect facts or unclear action before minor grammar. For each language correction, explain why it matters to this reader. Label optional stylistic alternatives separately and preserve my level of certainty and intended politeness.
4. Stop and wait for my revision. Then compare the two attempts, identify an improvement and offer one edited version that preserves my voice and purpose. Keep the requested length; if none is specified, use 70-110 words. Explain any meaningful change rather than silently making the message stronger or more certain.
5. Close with one phrase worth reusing and a short transfer task for a different fictional reader. Wait for my attempt before providing another model.
