

ENGLISH FOR WORK / SEPTEMBER 2026

Telecommunications English

Learner workbook

Work with realistic cases, develop your own response, and use the answer section after you have tried the tasks.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For network operations staff, telecom engineers, field technicians, customer operations teams, product managers, regulatory staff, and telecom project leaders.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Your course at a glance

Use the lesson numbers to match this document with the website and the other guides.

01 Network Operations and Outage Bridges

Distinguish completed work from pending work and explain its impact.

02 Fiber Deployment and Construction Coordination

Give a handoff that the receiving person can confirm.

03 Wireless Capacity and Coverage

Explain a useful distinction in plain English.

04 Provisioning and Service Activation

Clarify missing information before responding.

05 Field Service and Dispatch

Make a request with a clear action, purpose, and realistic timing.

06 Regulatory and Emergency Services

Separate observations, assumptions, and conclusions.

07 Customer Churn and Service Recovery

Acknowledge a communication problem and give a corrected message.

08 Vendor and Equipment Lifecycle

Compare options using the same criteria and state the tradeoff.

Choose your pace

Quick practice: spend 15 minutes reading one case and saying a response. Full lesson: allow 45-60 minutes for language work, conversation, writing, and revision.

Level support

B1 learners can use the frames and a partner. B2 learners can try a response before reading the model. C1 learners can add the harder follow-up and reduce preparation time. These are teaching suggestions, not certified CEFR level ratings.

After practicing: open the AI prompt workshop, or use the prompts at the end of this guide.

LESSON 01 / READ AND NOTICE

Network Operations and Outage Bridges

Distinguish completed work from pending work and explain its impact.

SITUATION

A network incident affects one service area. Fault isolation is ongoing, and no restoration estimate has been verified.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

NOC - Network operations center: a team or location coordinating network monitoring and operational response.

outage - A period during which a service is unavailable.

fault isolation - Narrowing down where a technical problem originates.

ETA - Estimated time of arrival; an estimate should be distinguished from a confirmed time.

3. Notice the language

Lead with the current state, then the important change or open item. Use completed-action language only for completed work. Add a next update point when it is known; do not invent a date to make the message sound complete.

We have completed ...; ... remains open.

As of ..., the status is

The next update will cover

Improve this sentence: Everything is progressing well.

LESSON 01 / PRACTICE AND PRODUCE

Give a useful status update

4. Check the language

1. Which sentence says a review is finished?
 - A. The team is completing the review.
 - B. The team plans to complete the review.
 - C. The team has completed the review.
2. Which update distinguishes a plan from a confirmed fact?
 - A. The delivery plan proves that arrival will be Friday.
 - B. Delivery is planned for Friday; the carrier has not confirmed it.
 - C. Delivery is confirmed for Friday because we planned it.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 02 / READ AND NOTICE

Fiber Deployment and Construction Coordination

Give a handoff that the receiving person can confirm.

SITUATION

A fiber installation team has completed physical work but an inspection is still pending. The next team assumes the route is ready.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

fiber - Optical fiber used to transmit signals as light.

make-ready - Preparatory work needed before new telecommunications equipment or lines can be installed.

splicing - Joining sections of optical fiber using an appropriate technical process.

permit - Official permission for an activity under specified requirements.

3. Notice the language

State the current situation, relevant background, open task, and receiving role. Ask for acknowledgment or repeat-back of the critical item. Sending a message and transferring responsibility are not always the same thing.

The current status is ...; the outstanding item is

The record shows

Please confirm who has accepted

Improve this sentence: Someone should follow up on this.

LESSON 02 / PRACTICE AND PRODUCE

Transfer information and responsibility

4. Check the language

1. Which sentence checks that responsibility has been accepted?
 - A. The check appears somewhere in the notes.
 - B. Please confirm who will complete the outstanding check.
 - C. I mentioned the check in my earlier email.
2. Which response best checks a critical handoff detail?
 - A. So the result is pending and your team will follow up; is that correct?
 - B. I assume all results are final, so we can finish.
 - C. I saw the message, so no clarification is needed.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are taking over the work. Ask what remains open and repeat back the critical status or responsibility. Point out one detail that would be unsafe or misleading to assume.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 03 / READ AND NOTICE

Wireless Capacity and Coverage

Explain a useful distinction in plain English.

SITUATION

Customers report slow service in a busy area even though the coverage map shows signal availability.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

spectrum - The range of radio frequencies used for wireless communication.

coverage - The protection provided by an insurance policy; in telecommunications, the area with service availability.

capacity - Available people, assets, time, space, or system throughput for a given workload.

congestion - Demand exceeding the available capacity of a network or transport route.

3. Notice the language

Start with the reader's question. Explain one unfamiliar term with familiar words, then give a relevant example or contrast. Check understanding without asking only 'Do you understand?'.

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Improve this sentence: We need to operationalize the implementation.

LESSON 03 / PRACTICE AND PRODUCE

Make a complex point clear

4. Check the language

1. Which sentence explains 'backlog' rather than repeating it?
 - A. The backlog is the work still waiting to be completed.
 - B. The backlog is the work completed during the last period.
 - C. The backlog is the maximum work the team can finish in a period.
2. Which follow-up best checks whether your explanation was clear?
 - A. Would you like me to repeat the explanation?
 - B. Was the explanation detailed enough for you?
 - C. How would you describe the next step in your own words?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 04 / READ AND NOTICE

Provisioning and Service Activation

Clarify missing information before responding.

SITUATION

A service-activation request has a customer address but no circuit reference or requested activation date.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

provisioning - Configuring systems or resources so a service can be supplied to a user.

CPE - Customer premises equipment: communications equipment located at the customer's site.

circuit - A telecommunications connection or path used to carry a service.

service activation - The process of making a configured service available for customer use.

3. Notice the language

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Improve this sentence: Could you explain what does this mean?

LESSON 04 / PRACTICE AND PRODUCE

Ask a precise question

4. Check the language

1. Which indirect question has the usual word order?
 - A. Could you confirm when does the review start?
 - B. Could you confirm when starts the review?
 - C. Could you confirm when the review starts?
2. Someone says the report is 'ready.' Which question best clarifies its approval status?
 - A. Who will present the report at the meeting?
 - B. Has the report been approved, or is it ready for review?
 - C. Can you send the report to me this afternoon?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 05 / READ AND NOTICE

Field Service and Dispatch

Make a request with a clear action, purpose, and realistic timing.

SITUATION

A field technician receives a ticket that says only "internet bad." The customer is available for a clarification call.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

truck roll - A field-service visit requiring a technician to travel to a site.

signal level - The measured strength of a communications signal under specified conditions.

dispatch - Coordinating and assigning resources for an operational task.

inside wiring - Telecommunications wiring within a customer's building or premises.

3. Notice the language

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Improve this sentence: Please revert soonest with the necessary.

LESSON 05 / PRACTICE AND PRODUCE

Ask for an actionable next step

4. Check the language

1. What does 'Please send it by Thursday' normally mean?
 - A. Keep sending it regularly until Thursday.
 - B. Send it no later than Thursday.
 - C. Send it on Thursday, but not earlier.
2. Which request gives the recipient enough detail to act?
 - A. Could you confirm the document version needed for the review?
 - B. Could you confirm that the review is important?
 - C. Could you confirm that you received my earlier message?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 06 / READ AND NOTICE

Regulatory and Emergency Services

Separate observations, assumptions, and conclusions.

SITUATION

A customer notice describes a regulatory requirement without citing the current approved wording. The responsible team has not reviewed it.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

E911 - Enhanced 911: emergency-call capabilities that can provide routing and location information.

lawful intercept - Authorized interception of communications under applicable law and procedures.

regulatory filing - Information formally submitted to a regulator under a relevant process.

customer notice - An official communication to customers about a relevant change, event, or requirement.

3. Notice the language

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

The available evidence shows

This may indicate ..., but

We have not yet established whether

Improve this sentence: The pilot proves this will work everywhere.

LESSON 06 / PRACTICE AND PRODUCE

Match certainty to evidence

4. Check the language

1. Which sentence preserves uncertainty about an unconfirmed cause?
 - A. The change may have contributed to the delay.
 - B. The change must have caused the delay.
 - C. The change definitely caused the delay.
2. A result comes from a small pilot in one location. Which phrase accurately limits the claim?
 - A. In similar locations, we can now expect the same result ...
 - B. Across the service, the observed result was ...
 - C. In this pilot, the observed result was ...

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 07 / READ AND NOTICE

Customer Churn and Service Recovery

Acknowledge a communication problem and give a corrected message.

SITUATION

A customer asks for an update after repeated service interruptions. The investigation has no confirmed root cause.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

churn - Loss of customers, revenue, employees, donors, users, or accounts over a period of time.

SLA credit - A credit provided under a service-level agreement when specified service conditions are not met.

root cause - Underlying reason a problem occurred, not merely the visible symptom.

service assurance - Activities that monitor and maintain whether a service meets its intended performance requirements.

3. Notice the language

Name what was unclear or wrong, acknowledge its effect, and correct it. A brief apology can help, followed by a practical next step. Avoid explaining away the other person's reaction or promising an outcome you cannot control.

My earlier message did not make ... clear.

I'm sorry for The correct information is

Let me check that the revised explanation addresses

Improve this sentence: I'm sorry if you failed to understand.

LESSON 07 / PRACTICE AND PRODUCE

Repair a misunderstanding

4. Check the language

1. Which apology takes responsibility for unclear wording?
 - A. I'm sorry the process took longer than expected.
 - B. I'm sorry we could not meet the original date.
 - C. I'm sorry my earlier wording was unclear.
2. What should follow an apology for an incorrect date?
 - A. A new guaranteed date even if it is unverified.
 - B. The corrected date and the current confirmation status.
 - C. A longer explanation that never states the correct date.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are frustrated because an earlier message created an expectation. Explain that expectation. Ask your partner to distinguish the correction from anything still uncertain.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 08 / READ AND NOTICE

Vendor and Equipment Lifecycle

Compare options using the same criteria and state the tradeoff.

SITUATION

One equipment proposal has a lower purchase price but an earlier end-of-support date. The replacement plan extends beyond that date.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

end of support - The point after which a supplier stops providing specified support for a product.

interoperability - The ability of systems or products to exchange information and work together.

spares - Replacement equipment or components held to support service continuity.

capital plan - A plan for investment in long-lived assets or major projects.

3. Notice the language

Use the same time period, scope, and measurement basis for both options. Explain a difference with 'whereas' or 'while'. State what improves and what is given up; do not hide the weaker side of a recommendation.

Both options ..., but

Option A ..., whereas option B

The comparison depends on

Improve this sentence: This option is more better.

LESSON 08 / PRACTICE AND PRODUCE

Explain a fair comparison

4. Check the language

1. Which sentence expresses a clear contrast?
 - A. Option A is faster, so option B costs less.
 - B. Option A is faster, whereas option B costs less.
 - C. Option A is faster because option B costs less.
2. A rate increases from 6% to 7%. What is the absolute difference?
 - A. An increase of one percentage point.
 - B. An increase of one percent relative to the original rate.
 - C. An increase of seven percentage points.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You favor one option but have not checked whether the scope is comparable. Ask about one difference, then explain the tradeoff you are willing to accept.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

Answer workshop

Try the tasks first. The model is one acceptable response, not a script to memorize. Your written version needs a subject line, an opening, and appropriate context. Assess it using the four criteria at the end.

01 | Network Operations and Outage Bridges

Editing example: Three checks are complete; two remain open and are being reviewed.

The revision gives observable progress. A positive label alone does not tell the reader what is complete or still needed.

Check 1: C - The team has completed the review.

A: 'Is completing' presents the work as in progress.

B: 'Plans to complete' describes an intention, not completion.

C: 'Has completed' states that the action is finished.

Check 2: B - Delivery is planned for Friday; the carrier has not confirmed it.

A: A plan cannot prove a future arrival time.

B: This explicitly labels the date as planned and identifies the missing confirmation.

C: A plan does not establish carrier confirmation.

Model response: The affected area is identified, and fault isolation is continuing. We do not yet have a verified restoration estimate. I'll state the next update time and revise the message when confirmed information is available.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

02 | Fiber Deployment and Construction Coordination

Editing example: Please confirm which team has accepted the follow-up task.

The revised sentence asks for an identifiable receiving team instead of leaving responsibility with an unspecified 'someone'.

Check 1: B - Please confirm who will complete the outstanding check.

A: A written record alone does not identify who will act.

B: It asks for an identifiable person or team responsible for the task.

C: Mentioning a task does not show that anyone accepted it.

Check 2: A - So the result is pending and your team will follow up; is that correct?

A: This repeats the status and responsibility and invites correction.

B: It changes pending information into a final result.

C: Receiving a message is not the same as confirming its meaning.

Model response: Physical installation is complete; the inspection remains pending. Please confirm the approved status before scheduling the next activity, and record the outstanding item in the handoff.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

03 | Wireless Capacity and Coverage

Editing example: We need to put the plan into practice.

The revised sentence names the action in familiar words. Specialist vocabulary is useful when it adds precision, but repeating abstract nouns can hide the meaning.

Check 1: A - The backlog is the work still waiting to be completed.

A: This gives the meaning in familiar words.

B: Completed work is different from work still waiting.

C: This describes capacity, not the work waiting to be completed.

Check 2: C - How would you describe the next step in your own words?

A: Offering repetition may help, but it does not show how the listener understood the next step.

B: This invites an opinion on detail, not a demonstration of understanding.

C: An open request lets the listener show their understanding.

Model response: Coverage and capacity describe different issues. A signal may be available while busy-period demand affects performance. I'll explain that distinction and report the observed conditions for investigation.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

04 | Provisioning and Service Activation

Editing example: Could you explain what this means?

After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: "what this means".

Check 1: C - Could you confirm when the review starts?

A: Remove 'does' and use statement word order after 'confirm'.

B: Place the subject 'the review' before 'starts'.

C: The embedded question uses subject then verb: "the review starts".

Check 2: B - Has the report been approved, or is it ready for review?

A: This asks about the presenter, not the report's approval status.

B: This question distinguishes two meanings of 'ready' that affect the next action.

C: This asks about delivery timing, not whether approval has happened.

Model response: Could you confirm the circuit reference and target activation date? We need to match the request to the correct service and distinguish the requested date from a confirmed appointment.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

05 | Field Service and Dispatch

Editing example: Could you send the missing document and confirm when it will be available?

The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

Check 1: B - Send it no later than Thursday.

A: This interprets a deadline as a continuing activity, which would use "until".

B: 'By' sets the latest point, while 'after' refers to a later time.

C: "By Thursday" permits earlier delivery; it is not restricted to that day.

Check 2: A - Could you confirm the document version needed for the review?

A: The requested action and information are explicit.

B: This checks importance rather than identifying the needed document version.

C: This checks receipt, not which version is required for the review.

Model response: Could you describe what happens, when it occurs, and which devices are affected? Those details will help the field team prepare for the visit and avoid assumptions about the cause.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

06 | Regulatory and Emergency Services

Editing example: The pilot worked in the tested setting; performance elsewhere remains untested.

The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Check 1: A - The change may have contributed to the delay.

A: 'May have contributed' presents a possibility without claiming the cause is established.

B: 'Must have' expresses a strong inference that the evidence may not support.

C: 'Definitely' presents the cause as certain.

Check 2: C - In this pilot, the observed result was ...

A: Similarity alone does not establish that the result will transfer.

B: A pilot in one location does not establish a service-wide observation.

C: This locates the finding in the setting actually studied.

Model response: The notice needs review against the current applicable requirement and approved language. I'll identify the disputed wording and route it to the responsible team before release.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

07 | Customer Churn and Service Recovery

Editing example: I'm sorry my message did not explain the timing clearly.

The revision takes responsibility for the message without blaming the listener. It identifies what needs to be corrected.

Check 1: C - I'm sorry my earlier wording was unclear.

A: This acknowledges duration, but does not take responsibility for the unclear wording.

B: This acknowledges a missed date, not the communication problem in the question.

C: This acknowledges the speaker's contribution to the problem.

Check 2: B - The corrected date and the current confirmation status.

A: An unsupported new promise can create a second misunderstanding.

B: A repair needs usable corrected information, including any uncertainty.

C: The reader still lacks the information they need.

Model response: I'm sorry the interruptions have continued. The cause is still under investigation. I'll summarize the verified service history and confirm the next update rather than repeat an unverified explanation.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

08 | Vendor and Equipment Lifecycle

Editing example: This option is better on cost, but slower to deliver.

'Better' already has comparative meaning, so it does not need 'more'. Naming the criterion and tradeoff makes the comparison useful.

Check 1: B - Option A is faster, whereas option B costs less.

A: 'So' implies one fact causes the other.

B: 'Whereas' marks a contrast between two options.

C: 'Because' claims a causal connection that is not given.

Check 2: A - An increase of one percentage point.

A: Subtracting 6% from 7% gives one percentage point. The relative increase is about 16.7%.

B: A one-percent relative increase on 6% would be 6.06%, not 7%.

C: The new rate is 7%; the difference between the rates is one percentage point.

Model response: The lower price comes with a shorter support period. Let's compare the expected service life, support needs, and replacement timing before making the investment recommendation.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Digital.gov: plain-language guidance

<https://digital.gov/guides/plain-language>

Council of Europe: CEFR descriptors

<https://www.coe.int/en/web/common-european-framework-reference-languages/cefr-descriptors>

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

Practice grammar in context

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

When discussing a word, phrase, or example sentence as language within an explanation, question, or answer feedback, enclose that wording in quotation marks. For example: What does "about" mean in "about twenty people"? Use "on" with a named day. Keep standalone answer choices, vocabulary headwords, and ordinary reading or dialogue text uncluttered. Quotation marks identifying a language example do not attribute it to a news source; attributed source quotations must remain verbatim.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Telecommunications English

Professional audience: network operations staff, telecom engineers, field technicians, customer operations teams, product managers, regulatory staff, and telecom project leaders

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Lesson 01: Network Operations and Outage Bridges

Original fictional case: A network incident affects one service area. Fault isolation is ongoing, and no restoration estimate has been verified.

Language workshop: Give a useful status update

Communication goal: Distinguish completed work from pending work and explain its impact.

Language guidance: Lead with the current state, then the important change or open item. Use completed-action language only for completed work. Add a next update point when it is known; do not invent a date to make the message sound complete.

Useful frames (complete the gaps with case facts): We have completed ...; ... remains open. / As of ..., the status is / The next update will cover

Vocabulary: NOC: Network operations center: a team or location coordinating network monitoring and operational response. / outage: A period during which a service is unavailable. / fault isolation: Narrowing down where a technical problem originates. / ETA: Estimated time of arrival; an estimate should be distinguished from a confirmed time.

Speaking task: Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

Writing task: Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Optional second-round challenge: The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Model for comparison AFTER my attempt, not a response to give me first: The affected area is identified, and fault isolation is continuing. We do not yet have a verified restoration estimate. I'll state the next update time and revise the message when confirmed information is available.

END REFERENCE

TASK: Grammar that changes the meaning

1. For a lesson, use its language workshop as the focus. For a dialogue, quote one actual sentence and select one useful grammar feature from it, such as question word order, tense, modality, conditionals or clause linking. Explain in no more than 90 words how this feature helps the speakers do their work. Keep the grammar target narrow.
2. Give two short contrasting sentences using this workplace context. Explain the difference in time, certainty, condition or politeness. Label invented examples and preserve the distinction between possible, planned and confirmed events. Describe context-dependent choices as choices, not universal rules.
3. Give me one editing or sentence-building task using a known case fact. Do not copy the supplied editing example or reveal its answer. Ask me to explain my intended meaning. Stop and wait.
4. After I answer, quote my wording, identify at most two issues, and give a brief explanation and one hint. Ask me to revise before offering a full corrected version. Then accept any accurate, natural alternative that serves the purpose.
5. Continue with two new tasks, one at a time: first guided, then an original response without a sentence frame. End with a two-sentence workplace message using the target feature and a compact self-check. Do not replace this sequence with a worksheet and answer key.

END REFERENCE

TASK: Coach my workplace writing

1. Ask me to paste my own fictional or anonymized draft and identify its reader and purpose. If the reference gives a writing task, mention that task as the default. If it is a dialogue, suggest a brief follow-up message that records its outcome and open questions. Stop and wait. Do not write the message for me first.
2. Once I supply the draft, check it against the reference. If an ambiguity changes the meaning, ask one focused question before rewriting. Do not assume that the draft is correct evidence for a new deadline, approval, diagnosis, cost or commitment.
3. Give feedback in three parts: one effective phrase with a reason; up to three priority improvements, quoting my words; and one short revision task for me. Prioritize incorrect facts or unclear action before minor grammar. For each language correction, explain why it matters to this reader. Label optional stylistic alternatives separately and preserve my level of certainty and intended politeness.
4. Stop and wait for my revision. Then compare the two attempts, identify an improvement and offer one edited version that preserves my voice and purpose. Keep the requested length; if none is specified, use 70-110 words. Explain any meaningful change rather than silently making the message stronger or more certain.
5. Close with one phrase worth reusing and a short transfer task for a different fictional reader. Wait for my attempt before providing another model.
