Practical Examples in Context

Key Points to Remember

Visual anchor

Use the concept poster to spotlight the main language pattern in **Measurements & Shapes** and keep the explanation visible during practice and discussion.

ENGLISH LADDER

Concept #22 ►

Measurements & Shapes

For many measurements there is a **noun** style and an **adjective** style.

	<i>Noun Style</i>	<i>Adjective Style</i>
What is its size ?	How large ?	How small ?
What is its length ?	How long ?	How short ?
What is its width ?	How wide ?	How narrow ?
What is its depth ?	How deep ?	How shallow ?
What is its height ?	How high ?	How short ?
What is its weight ?	How heavy ?	How light ?
What is its age ?	How old ?	How new ?
What is its temperature ?	How hot ?	How cold ?
What is its speed ?	How fast ?	How slow ?
What is the distance ?	How far ?	How near ?
What is the price ?	How expensive ?	How cheap ?
What is its value ?	How valuable ?

At a Glance

Lesson focus Measurements & Shapes	Suggested timing 45-60 minutes
Core objective Students explain the target pattern clearly and apply it accurately in controlled practice and discussion.	Materials Student PDF, the concept image, board space, and time for partner checking.

Suggested Lesson Flow

Warm-up

Display the concept image and ask learners to predict the rule behind **Measurements & Shapes** before reading the explanation.

Model

Walk through the Core Idea and the sections on Key Points, Practical Examples in Context, Key Points to Remember. Pause after each part so students can restate the pattern in plain English.

Guided practice

Project two or three examples from the concept sheet and ask pairs to explain why each choice works, not just what the answer is.

Independent work

Assign the 24 practice items for quiet work, partner checking, and final feedback.

Closure

Ask students to create one new sentence or mini-example of their own that follows the same pattern.

Likely Learner Errors

- Learners may overgeneralize the first pattern they notice. Keep returning to **Key Points, Practical Examples in Context, Key Points to Remember** and ask students to explain what changes from one example to the next.
- Long explanations can hide the signal word or structure. Have students underline the exact phrase that tells them which form, pattern, or response is needed.
- If students can choose an answer but cannot explain it, ask them to justify their choice using words taken directly from the concept sheet.

Differentiation and Delivery Notes

- Support: teach one section at a time, then send students back to **the examples** or the practice set so they can apply the same rule immediately.
- Pair work: let students compare answers aloud before you reveal the key. The explanation step is as important as the final answer.
- Extension: ask stronger students to write two fresh examples or a short dialogue that uses the same target language accurately.

Model Language from the Concept Sheet

- Noun: It is a circle.
- Adjective: It is circular.
- The children sat in a circle.
- The garden has a circular layout.
- Noun: It is a square.
- Adjective: It is square.

Answer Key

Use this key for whole-class feedback or fast marking.

Item 01 b) circular. "Circular" is the correct adjective form to describe the layout.

Item 02 a) triangle. "Triangle" is the correct noun form for the shape.

Item 03 c) rectangle. "Rectangle" is the correct noun form for the shape.

Item 04 b) circle. "Circle" is the correct noun form for the arrangement.

Item 05 b) large. "Large" is the correct adjective to describe the box.

Item 06 b) wide. "Wide" is the correct adjective to describe the road.

Item 07 b) deep. "Deep" is the correct adjective to describe the pool's measurement.

Item 08 b) high. "High" is the correct adjective to describe the building.

Item 09 b) heavy. "Heavy" is the correct adjective to describe the package.
