

ENGLISH FOR WORK / SEPTEMBER 2026

Aviation English

Teacher's guide

Teach practical workplace communication with specific cases, clear language targets, and a repeatable feedback process.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For aviation operations managers, airline staff, maintenance coordinators, safety teams, dispatchers, airport operations staff, ground handlers, and aviation-adjacent professionals.

Workplace coordination English. This course does not teach radiotelephony phraseology or certify aviation language proficiency; operational communication follows approved aviation procedures.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Your course at a glance

Use the lesson numbers to match this document with the website and the other guides.

01 Safety Culture and Stop-Work Authority

Make a request with a clear action, purpose, and realistic timing.

02 Operations Control and Dispatch Coordination

Distinguish completed work from pending work and explain its impact.

03 Maintenance Deferrals and MEL Language

Clarify missing information before responding.

04 Irregular Operations and Passenger Communication

Acknowledge a communication problem and give a corrected message.

05 Ground Handling and Turnaround Performance

Give a handoff that the receiving person can confirm.

06 Security and Access Control

Make a request with a clear action, purpose, and realistic timing.

07 Incident Reporting and Investigation

Separate observations, assumptions, and conclusions.

08 Regulatory Audits and Readiness

Distinguish completed work from pending work and explain its impact.

Choose your pace

Quick practice: spend 15 minutes reading one case and saying a response. Full lesson: allow 45-60 minutes for language work, conversation, writing, and revision.

Level support

B1 learners can use the frames and a partner. B2 learners can try a response before reading the model. C1 learners can add the harder follow-up and reduce preparation time. These are teaching suggestions, not certified CEFR level ratings.

A 60-minute lesson that works

Prepare the case and the learner pages. Keep the model response hidden until learners have attempted their own. Choose two field terms that are important to understanding the case.

0-5 minutes | Activate experience

Ask learners to name a comparable situation without sharing confidential details. Introduce the communication goal.

5-12 minutes | Read and sort facts

Read the case. Learners identify confirmed facts, unknowns, the audience, and the immediate communication need.

12-22 minutes | Notice and practice language

Explain the workshop pattern. Work through the vocabulary and editing example, then discuss both language checks and the reasons behind the choices.

22-35 minutes | Speak and respond

Give two minutes of preparation. Run the partner exchange, switch roles, and add the follow-up challenge. Observe whether the listener can act on the message.

35-47 minutes | Write for a real reader

Learners write the short message using only case facts. Partners check clarity, certainty, and the requested next step.

47-55 minutes | Compare and revise

Reveal the model. Discuss alternative acceptable wording. Give one meaning correction and one language correction, then repeat.

55-60 minutes | Retrieve and transfer

Close the materials. Learners recall two expressions and identify one communication habit to use in another situation.

Adapt the session

For 45 minutes, shorten the first conversation and assign writing for follow-up. For 90 minutes, add 15 minutes for a second case and 15 minutes for the final challenge. More time should produce more meaningful practice, not longer explanations.

LESSON 01 / FACILITATOR NOTES

Safety Culture and Stop-Work Authority

Make a request with a clear action, purpose, and realistic timing.

CASE

In a ground-operations language exercise, a team member sees a possible hazard near equipment. The local safety process applies.

Teach this move

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Vocabulary to check: safety management system, hazard, stop work, reporting culture.

Model response

I see a possible hazard near the equipment. Please alert the responsible person and follow the local safety process. I'll state the location and observation clearly so the concern can be assessed.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

Second-round challenge

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Language-check answers

1. B - Send it no later than Thursday. 'By' sets the latest point, while 'after' refers to a later time.
2. A - Could you confirm the document version needed for the review? The requested action and information are explicit.

LESSON 02 / FACILITATOR NOTES

Operations Control and Dispatch Coordination

Distinguish completed work from pending work and explain its impact.

CASE

An operations update has a provisional aircraft assignment and an unresolved crew-status question. A draft message calls the plan confirmed.

Teach this move

Lead with the current state, then the important change or open item. Use completed-action language only for completed work. Add a next update point when it is known; do not invent a date to make the message sound complete.

Vocabulary to check: dispatch, crew legality, aircraft routing, delay code.

Model response

The aircraft assignment is provisional, and crew status still needs confirmation. I'll distinguish those open items from confirmed information in the operations update.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision gives observable progress. A positive label alone does not tell the reader what is complete or still needed.

Second-round challenge

The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Language-check answers

1. A - The team has completed the review. 'Has completed' states that the action is finished.
2. C - Delivery is planned for Friday; the carrier has not confirmed it. This explicitly labels the date as planned and identifies the missing confirmation.

LESSON 03 / FACILITATOR NOTES

Maintenance Deferrals and MEL Language

Clarify missing information before responding.

CASE

A maintenance coordination note mentions a deferral but omits the relevant reference and authorized status.

Teach this move

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

Vocabulary to check: MEL, logbook, deferred maintenance, airworthiness.

Model response

Could you confirm the reference and current authorized status with maintenance control? I need accurate coordination information; I cannot infer airworthiness from an incomplete note.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: what this means.

Second-round challenge

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Language-check answers

1. C - Could you confirm when the review starts? The embedded question uses subject then verb: the review starts.
2. B - Has the report been approved, or is it ready for review? This question distinguishes two meanings of 'ready' that affect the next action.

LESSON 04 / FACILITATOR NOTES

Irregular Operations and Passenger Communication

Acknowledge a communication problem and give a corrected message.

CASE

Passengers receive conflicting messages about a delay. The next departure estimate has not been confirmed.

Teach this move

Name what was unclear or wrong, acknowledge its effect, and correct it. A brief apology can help, followed by a practical next step. Avoid explaining away the other person's reaction or promising an outcome you cannot control.

Vocabulary to check: IROP, reaccommodation, misconnect, weather delay.

Model response

I'm sorry for the conflicting information. We are waiting for a confirmed update from the responsible team. I'll share the next verified information and explain the available assistance through our process.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision takes responsibility for the message without blaming the listener. It identifies what needs to be corrected.

Second-round challenge

The listener remains disappointed after the correction. Acknowledge the impact and restate the available next step calmly.

Language-check answers

1. B - I'm sorry my earlier wording was unclear. This acknowledges the speaker's contribution to the problem.
2. A - The corrected date and the current confirmation status. A repair needs usable corrected information, including any uncertainty.

LESSON 05 / FACILITATOR NOTES

Ground Handling and Turnaround Performance

Give a handoff that the receiving person can confirm.

CASE

A turnaround handoff identifies an open ground-service task but does not name who accepted it.

Teach this move

State the current situation, relevant background, open task, and receiving role. Ask for acknowledgment or repeat-back of the critical item. Sending a message and transferring responsibility are not always the same thing.

Vocabulary to check: turnaround, ground handling, load sheet, ramp safety.

Model response

This ground-service task is still open. Please confirm which team has accepted it and record the status in the agreed coordination channel before we describe the handoff as complete.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revised sentence asks for an identifiable receiving team instead of leaving responsibility with an unspecified 'someone'.

Second-round challenge

The intended recipient cannot take ownership. Keep the status clear and identify the need for an authorized reassignment.

Language-check answers

1. A - Please confirm who will complete the outstanding check. It asks for an identifiable person or team responsible for the task.
2. C - So the result is pending and your team will follow up; is that correct? This repeats the status and responsibility and invites correction.

LESSON 06 / FACILITATOR NOTES

Security and Access Control

Make a request with a clear action, purpose, and realistic timing.

CASE

A visitor asks a staff member to bypass an access check because a meeting is running late.

Teach this move

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Vocabulary to check: secure area, badge, escort, audit.

Model response

I understand the meeting is urgent, but access still needs to follow the approved process. Let me contact the authorized team to arrange the appropriate check and escort if required.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

Second-round challenge

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Language-check answers

1. C - Send it no later than Thursday. 'By' sets the latest point, while 'after' refers to a later time.
2. B - Could you confirm the document version needed for the review? The requested action and information are explicit.

LESSON 07 / FACILITATOR NOTES

Incident Reporting and Investigation

Separate observations, assumptions, and conclusions.

CASE

An initial incident note says equipment damage was caused by a specific action, although the review is incomplete.

Teach this move

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

Vocabulary to check: incident report, damage assessment, root cause, corrective action.

Model response

The damage has been observed; its cause is still under review. I'll record the known sequence and distinguish witness reports from confirmed findings in the note.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Second-round challenge

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Language-check answers

1. B - The change may have contributed to the delay. 'May have contributed' presents a possibility without claiming the cause is established.
2. A - In this pilot, the observed result was ... This locates the finding in the setting actually studied.

LESSON 08 / FACILITATOR NOTES

Regulatory Audits and Readiness

Distinguish completed work from pending work and explain its impact.

CASE

An audit preparation list has current records for most staff but three records still need verification.

Teach this move

Lead with the current state, then the important change or open item. Use completed-action language only for completed work. Add a next update point when it is known; do not invent a date to make the message sound complete.

Vocabulary to check: audit, training record, compliance, corrective action.

Model response

Most records have been checked; three remain unverified. I'll list those items, their owners, and the follow-up status so the audit update shows the outstanding work clearly.

Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision gives observable progress. A positive label alone does not tell the reader what is complete or still needed.

Second-round challenge

The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Language-check answers

1. A - The team has completed the review. 'Has completed' states that the action is finished.
2. C - Delivery is planned for Friday; the carrier has not confirmed it. This explicitly labels the date as planned and identifies the missing confirmation.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

Workplace coordination English. This course does not teach radiotelephony phraseology or certify aviation language proficiency; operational communication follows approved aviation procedures.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.
