

ENGLISH FOR WORK / SEPTEMBER 2026

Consulting English

Learner workbook

Work with realistic cases, develop your own response, and use the answer section after you have tried the tasks.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For management consultants, strategy consultants, implementation consultants, analysts, engagement managers, client partners, internal consultants, and advisory teams.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Your course at a glance

Use the lesson numbers to match this document with the website and the other guides.

01 Client Discovery and Problem Definition

Clarify missing information before responding.

02 Hypotheses and Issue Trees

Separate observations, assumptions, and conclusions.

03 Data Requests and Client Burden

Make a request with a clear action, purpose, and realistic timing.

04 Slide Storylines and Executive Synthesis

Explain a useful distinction in plain English.

05 Scope Management and Change Requests

Negotiate scope or timing while making conditions explicit.

06 Difficult Client Feedback

Acknowledge a communication problem and give a corrected message.

07 Implementation and Change Management

Describe observed behavior, its effect, and a useful next step.

08 Steering Committees and Final Readouts

Include relevant voices and clarify the decision process.

Choose your pace

Quick practice: spend 15 minutes reading one case and saying a response. Full lesson: allow 45-60 minutes for language work, conversation, writing, and revision.

Level support

B1 learners can use the frames and a partner. B2 learners can try a response before reading the model. C1 learners can add the harder follow-up and reduce preparation time. These are teaching suggestions, not certified CEFR level ratings.

LESSON 01 / READ AND NOTICE

Client Discovery and Problem Definition

Clarify missing information before responding.

SITUATION

A client requests a benchmarking study but actually needs to decide whether to centralize a service.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

discovery - The process of learning needs or facts; in litigation, formal exchange of relevant information.

problem statement - A clear description of the issue to be addressed and why it matters.

decision question - The specific choice or issue that an analysis needs to help resolve.

stakeholder - Person or group with an interest, risk, authority, or dependency in the work.

3. Notice the language

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Improve this sentence: Could you explain what does this mean?

LESSON 01 / PRACTICE AND PRODUCE

Ask a precise question

4. Check the language

1. Which indirect question has the usual word order?
 - A. Could you confirm when does the review start?
 - B. Could you confirm when starts the review?
 - C. Could you confirm when the review starts?
2. Someone says the report is 'ready.' Which question best clarifies its approval status?
 - A. Who will present the report at the meeting?
 - B. Has the report been approved, or is it ready for review?
 - C. Can you send the report to me this afternoon?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After checking the answer section, revise one sentence and try the spoken response again.

LESSON 02 / READ AND NOTICE

Hypotheses and Issue Trees

Separate observations, assumptions, and conclusions.

SITUATION

A team believes customer churn is caused by price but has not examined service experience or competitor changes.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

hypothesis - A proposed explanation or prediction that can be examined using evidence.

issue tree - A structured breakdown of a question into smaller issues for analysis.

workstream - A connected set of activities within a larger project.

evidence plan - A plan identifying what information is needed and how it will be obtained or assessed.

3. Notice the language

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

The available evidence shows

This may indicate ..., but

We have not yet established whether

Improve this sentence: The pilot proves this will work everywhere.

LESSON 02 / PRACTICE AND PRODUCE

Match certainty to evidence

4. Check the language

1. Which sentence preserves uncertainty about an unconfirmed cause?
 - A. The change definitely caused the delay.
 - B. The change may have contributed to the delay.
 - C. The change must have caused the delay.
2. A result comes from a small pilot in one location. Which phrase accurately limits the claim?
 - A. In this pilot, the observed result was ...
 - B. In every location, the result will be ...
 - C. Without any uncertainty, the result is ...

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After checking the answer section, revise one sentence and try the spoken response again.

LESSON 03 / READ AND NOTICE

Data Requests and Client Burden

Make a request with a clear action, purpose, and realistic timing.

SITUATION

A client receives a 40-item data request with one deadline. Only six items are needed for the first analysis.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

data request - A request for defined information for a stated purpose.

confidentiality - Protecting information from disclosure to people who are not authorized to receive it.

owner - Named person or role accountable for a decision, action, deliverable, or risk.

deadline - The latest agreed or required time for completing an action.

3. Notice the language

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Improve this sentence: Please revert soonest with the necessary.

LESSON 03 / PRACTICE AND PRODUCE

Ask for an actionable next step

4. Check the language

1. What does 'Please send it by Thursday' normally mean?
 - A. Send it no later than Thursday.
 - B. Send it only after Thursday.
 - C. Send it on a date later than Thursday.
2. Which request gives the recipient enough detail to act?
 - A. Could you deal with the relevant matters soon?
 - B. Could you do the needful for the situation?
 - C. Could you confirm the document version needed for the review?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After checking the answer section, revise one sentence and try the spoken response again.

LESSON 04 / READ AND NOTICE

Slide Storylines and Executive Synthesis

Explain a useful distinction in plain English.

SITUATION

A presentation has twelve charts and no clear recommendation. The audience must decide whether to pilot a new process.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

storyline - The ordered sequence of claims and supporting points in a presentation or narrative.

so what - An informal prompt asking why a finding matters for the audience's decision.

recommendation - A proposed action supported by reasons and relevant evidence.

decision ask - A clear statement of the decision requested from an audience.

3. Notice the language

Start with the reader's question. Explain one unfamiliar term with familiar words, then give a relevant example or contrast. Check understanding without asking only 'Do you understand?'.

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Improve this sentence: We need to operationalize the implementation.

LESSON 04 / PRACTICE AND PRODUCE

Make a complex point clear

4. Check the language

1. Which sentence explains 'backlog' rather than repeating it?
 - A. The backlog is an important operational backlog.
 - B. The backlog must be reviewed at the backlog meeting.
 - C. The backlog is the work still waiting to be completed.
2. Which follow-up best checks whether your explanation was clear?
 - A. You understand everything now, don't you?
 - B. How would you describe the next step in your own words?
 - C. I have explained the next step, so shall we finish?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After checking the answer section, revise one sentence and try the spoken response again.

LESSON 05 / READ AND NOTICE

Scope Management and Change Requests

Negotiate scope or timing while making conditions explicit.

SITUATION

A client requests a second market study halfway through an engagement. The existing schedule covers only the original market.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

scope - Defined boundary of work, responsibility, deliverables, assumptions, and exclusions.

change request - A proposal to alter an agreed product, scope, schedule, or process.

tradeoff - A choice that improves one objective while giving up something on another.

statement of work - A document defining the work, deliverables, responsibilities, and relevant commercial conditions of an engagement.

3. Notice the language

Acknowledge the goal and explain the available choices. Connect an offer to its actual conditions. A useful response makes room for discussion without promising approval or resources you do not control.

We can ..., provided that

Would you prefer ... or ...?

I can take that proposal for review; I cannot yet confirm

Improve this sentence: If you will approve the scope, we can assess the schedule.

LESSON 05 / PRACTICE AND PRODUCE

Offer a workable tradeoff

4. Check the language

1. Which sentence presents a normal future condition clearly?
 - A. If the scope changed tomorrow, we reviewed the schedule yesterday.
 - B. If the scope changes, we will review the schedule.
 - C. If the scope will change, we review yesterday's schedule.
2. Which response negotiates a new request without silently promising extra work?
 - A. We can assess the addition and explain its effect on the agreed scope.
 - B. We have included it, although its scope has not been reviewed.
 - C. We guarantee the original date without assessing the addition.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You want the preferred outcome but can accept one tradeoff. Ask for two options, then state which condition you can accept and which still needs approval.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After checking the answer section, revise one sentence and try the spoken response again.

LESSON 06 / READ AND NOTICE

Difficult Client Feedback

Acknowledge a communication problem and give a corrected message.

SITUATION

A client says a recommendation ignores a staffing constraint that the team missed in discovery.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

assumption - Something treated as true for planning or reasoning, though it may need verification.

implementation constraint - A condition that limits how a proposed change can be put into practice.

stakeholder buy-in - Support from people whose participation or approval affects an initiative.

iteration - A repeated cycle of developing, reviewing, and improving work.

3. Notice the language

Name what was unclear or wrong, acknowledge its effect, and correct it. A brief apology can help, followed by a practical next step. Avoid explaining away the other person's reaction or promising an outcome you cannot control.

My earlier message did not make ... clear.

I'm sorry for The correct information is

Let me check that the revised explanation addresses

Improve this sentence: I'm sorry if you failed to understand.

LESSON 06 / PRACTICE AND PRODUCE

Repair a misunderstanding

4. Check the language

1. Which apology takes responsibility for unclear wording?
 - A. I'm sorry my earlier wording was unclear.
 - B. I'm sorry you did not read it correctly.
 - C. I'm sorry if you chose to misunderstand it.
2. What should follow an apology for an incorrect date?
 - A. A longer explanation that never states the correct date.
 - B. A new guaranteed date even if it is unverified.
 - C. The corrected date and the current confirmation status.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are frustrated because an earlier message created an expectation. Explain that expectation. Ask your partner to distinguish the correction from anything still uncertain.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After checking the answer section, revise one sentence and try the spoken response again.

LESSON 07 / READ AND NOTICE

Implementation and Change Management

Describe observed behavior, its effect, and a useful next step.

SITUATION

Managers are expected to adopt a new process but have not received training or time to practice.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

operating model - How work is organized across people, process, technology, governance, and metrics.

change management - Helping people and organizations adopt a new way of working.

adoption - The extent to which people begin and continue using a product or process.

decision rights - The allocation of authority to recommend, approve, or make particular decisions.

3. Notice the language

Use a specific example instead of a personality label. Explain its effect, invite the person's perspective, and agree on a practical improvement. Focus on communication that can be changed, not accent or national identity.

In [specific situation], I noticed ...

The effect was ... What was happening from your perspective?

Could we agree to ... and review it ...?

Improve this sentence: You are always careless.

LESSON 07 / PRACTICE AND PRODUCE

Give feedback people can use

4. Check the language

1. Which feedback begins with observable behavior?
 - A. You obviously do not care about our work.
 - B. You are the kind of person who ignores details.
 - C. The last two updates omitted the agreed completion date.
2. Which follow-up invites useful information before agreeing on support?
 - A. You should already know what I am thinking.
 - B. What is making this part of the task difficult?
 - C. There cannot be any reasonable explanation.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You can explain a practical obstacle affecting the work. Share it after your partner asks for your perspective, then agree on one observable change.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After checking the answer section, revise one sentence and try the spoken response again.

LESSON 08 / READ AND NOTICE

Steering Committees and Final Readouts

Include relevant voices and clarify the decision process.

SITUATION

A steering group agrees on the problem but is split between two options. The presentation time is almost over.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

steering committee - A group that oversees an initiative and resolves major direction or governance questions.

option set - The alternatives being considered for a decision.

risk - Uncertainty that may affect objectives or expose people or assets to harm or loss.

next step - The specific action that should follow the current discussion or stage.

3. Notice the language

Summarize the issue neutrally, invite missing perspectives, and distinguish discussion from decision. State who can decide and record any unresolved question. Do not assume silence means agreement.

Let's hear ... before we decide.

The point we still need to resolve is

Who will make this decision, and what do they need?

Improve this sentence: Nobody objected, so everyone agrees.

LESSON 08 / PRACTICE AND PRODUCE

Help a group reach a clear next step

4. Check the language

1. Which phrase invites a missing perspective?
 - A. We can record their agreement without asking them.
 - B. We haven't heard from the remote team yet; what is your view?
 - C. The remote team has been quiet, so they must agree.
2. Which closing statement records an unresolved decision accurately?
 - A. Approval is pending; the sponsor will review the two options.
 - B. We discussed the options, so approval is complete.
 - C. Everyone spoke, so the decision must be final.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You hold a relevant concern that has not been discussed. Raise it when invited and ask who will decide. Help the facilitator state one unresolved question accurately.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After checking the answer section, revise one sentence and try the spoken response again.

Answer workshop

Try the tasks first. The model is one acceptable response, not a script to memorize. Your written version needs a subject line, an opening, and appropriate context. Assess it using the four criteria at the end.

01 | Client Discovery and Problem Definition

Editing example: Could you explain what this means?

After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: what this means.

Check 1: C - Could you confirm when the review starts?

A: Remove 'does' and use statement word order after 'confirm'.

B: Place the subject 'the review' before 'starts'.

C: The embedded question uses subject then verb: the review starts.

Check 2: B - Has the report been approved, or is it ready for review?

A: This asks about the presenter, not the report's approval status.

B: This question distinguishes two meanings of 'ready' that affect the next action.

C: This asks about delivery timing, not whether approval has happened.

Model response: What decision will the benchmark help you make? If the question is centralization, we should examine the criteria and constraints first, then decide which external comparisons would be useful.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

02 | Hypotheses and Issue Trees

Editing example: The pilot worked in the tested setting; performance elsewhere remains untested.

The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Check 1: B - The change may have contributed to the delay.

A: 'Definitely' presents the cause as certain.

B: 'May have contributed' presents a possibility without claiming the cause is established.

C: 'Must have' expresses a strong inference that the evidence may not support.

Check 2: A - In this pilot, the observed result was ...

A: This locates the finding in the setting actually studied.

B: The pilot does not establish future results everywhere.

C: This removes uncertainty rather than explaining its limits.

Model response: Price is one hypothesis, not an established explanation. I'll structure the work around the main alternatives and identify the evidence that would support or weaken each one.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

03 | Data Requests and Client Burden

Editing example: Could you send the missing document and confirm when it will be available?

The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

Check 1: A - Send it no later than Thursday.

A: 'By' sets the latest point, while 'after' refers to a later time.

B: This reverses the meaning of the deadline.

C: A later date does not meet a 'by Thursday' deadline.

Check 2: C - Could you confirm the document version needed for the review?

A: 'Relevant matters' and 'soon' leave the task unclear.

B: This expression does not identify the specific action needed.

C: The requested action and information are explicit.

Model response: Could we prioritize the six items needed for the first analysis and agree on their owners? I'll explain their purpose and propose later dates for the remaining requests to reduce unnecessary burden.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

04 | Slide Storylines and Executive Synthesis

Editing example: We need to put the plan into practice.

The revised sentence names the action in familiar words. Specialist vocabulary is useful when it adds precision, but repeating abstract nouns can hide the meaning.

Check 1: C - The backlog is the work still waiting to be completed.

A: Repeating the same term does not define it.

B: This describes a meeting but leaves the term unexplained.

C: This gives the meaning in familiar words.

Check 2: B - How would you describe the next step in your own words?

A: This leading question makes it easy to agree without showing understanding.

B: An open request lets the listener show their understanding.

C: Finishing the conversation gives no evidence of understanding.

Model response: I'll lead with the pilot recommendation and the decision required, then use the strongest evidence and its limitations to support it. The remaining charts can answer follow-up questions.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

05 | Scope Management and Change Requests

Editing example: If you approve the scope, we can assess the schedule.

For an ordinary future condition, the if-clause uses present tense. The other clause can express the future consequence or possibility.

Check 1: B - If the scope changes, we will review the schedule.

A: The conflicting time references make the condition unclear.

B: The if-clause uses present tense; the main clause states the future response.

C: The tense pattern and time reference do not express the intended future condition.

Check 2: A - We can assess the addition and explain its effect on the agreed scope.

A: This offers a useful next step while keeping the approval and scope question open.

B: It treats unreviewed work as already included.

C: It promises an outcome without examining the consequences.

Model response: We can assess the additional market as a scope change. Would you prefer to extend the schedule, add resources, or reprioritize the original work? I'll prepare the implications for discussion.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

06 | Difficult Client Feedback

Editing example: I'm sorry my message did not explain the timing clearly.

The revision takes responsibility for the message without blaming the listener. It identifies what needs to be corrected.

Check 1: A - I'm sorry my earlier wording was unclear.

A: This acknowledges the speaker's contribution to the problem.

B: This shifts blame to the reader.

C: This attributes an unverified motive to the listener.

Check 2: C - The corrected date and the current confirmation status.

A: The reader still lacks the information they need.

B: An unsupported new promise can create a second misunderstanding.

C: A repair needs usable corrected information, including any uncertainty.

Model response: You're right that the recommendation does not account for that staffing constraint. Let's confirm its effect and revise the options. I'll make the changed assumption explicit in the next version.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

07 | Implementation and Change Management

Editing example: The last two reports omitted the agreed summary section.

The revision identifies observable work. 'Always' and a personality judgment make the feedback harder to verify or act on.

Check 1: C - The last two updates omitted the agreed completion date.

A: This assumes motivation rather than describing behavior.

B: This labels a person rather than an action.

C: The recipient can check the specific examples and discuss how to improve them.

Check 2: B - What is making this part of the task difficult?

A: This relies on unstated expectations.

B: An open question may reveal a barrier the speaker has not considered.

C: This closes off relevant information.

Model response: The rollout asks managers to change their work without enough preparation. Could we add role-specific training and a short practice period, then check where adoption is difficult?

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

08 | Steering Committees and Final Readouts

Editing example: Before I record agreement, does anyone have a concern or need more time?

The revised question gives people a way to raise a concern. Silence can have several meanings, especially in unfamiliar or unequal-power situations.

Check 1: B - We haven't heard from the remote team yet; what is your view?

A: Recording agreement without checking may misrepresent the team's view.

B: It invites participation without interpreting silence as consent.

C: Silence does not establish agreement.

Check 2: A - Approval is pending; the sponsor will review the two options.

A: This distinguishes discussion from approval and identifies the next reviewer.

B: Discussion does not itself constitute approval.

C: Participation alone does not establish a decision.

Model response: Let's pause the slides and compare the two options against the agreed criteria. Then we can record the decision, or the precise unresolved question and who will resolve it by when.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Digital.gov: plain-language guidance

<https://digital.gov/guides/plain-language>

Council of Europe: CEFR descriptors

<https://www.coe.int/en/web/common-european-framework-reference-languages/cefr-descriptors>

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.
