

ENGLISH FOR WORK / SEPTEMBER 2026

Data Analytics and Business Intelligence English

Conversation lab

Use these role cards to practice a response, handle a follow-up, and repeat with a new communication challenge.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For data analysts, BI developers, analytics engineers, data scientists, reporting teams, business analysts, and data-driven managers.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

How to use the conversation lab

1. Read the shared case. Spend two minutes noting the facts and your first response.
2. Assign roles. The responding professional uses role A; the listener uses role B. Read your own role privately before you begin.
3. Speak for 45-60 seconds. The listener asks a follow-up instead of simply agreeing. Continue until the meaning and next action are clear.
4. Reveal the model response. Identify one useful expression and compare it with your own wording.
5. Switch roles. Use the second-round challenge and speak again with fewer notes.

If you are studying alone

Speak both roles aloud. Leave a pause after the question, then answer without looking at the model. You can also write a four-turn exchange and read it back for clarity.

Useful conversation repair

- Could you say that another way?
- When you say that, which part do you mean?
- Let me check that I understood correctly.
- I need a moment to separate what is confirmed from what is still unknown.

Feedback

Judge whether the listener understands the situation and can identify the next action or unresolved question. Correct one meaning issue and one useful language pattern, then repeat.

CONVERSATION 01

Metric Definitions and Business Questions

SHARED CASE

Two teams report different active-user totals. One counts logins; the other counts completed transactions.

Role A | Responding professional

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Useful expressions

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Cover this until after your first attempt

What action qualifies a user as active, and over what period? The two totals use different definitions. Let's agree on the business question and label each measure clearly.

Second round

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 02

Data Quality and Trust

SHARED CASE

A dashboard refreshed today, but one source table contains data only through Monday. A manager assumes all figures are current.

Role A | Responding professional

Distinguish completed work from pending work and explain its impact. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

Useful expressions

We have completed ...; ... remains open.

As of ..., the status is

The next update will cover

Cover this until after your first attempt

The dashboard refreshed today, but that table is current only through Monday. I'll show the source's data cutoff separately from the dashboard refresh time.

Second round

The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 03

Dashboards and Executive Reporting

SHARED CASE

A KPI card shows a monthly total without its target, comparison period, or definition. The reader cannot interpret whether the result is favorable.

Role A | Responding professional

Explain a useful distinction in plain English. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

Useful expressions

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Cover this until after your first attempt

The total needs context. I'll add the definition, reporting period, and relevant comparison so the reader can understand what changed and whether action is needed.

Second round

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 04

Causation, Correlation, and Caveats

SHARED CASE

Customers who attend training renew more often. Attendance was voluntary, and the groups may differ in motivation.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

Training attendance is associated with renewal in this dataset. That does not establish causation; the groups may differ in other ways. I'll state the finding with that limitation.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 05

SQL, Models, and Transformation Logic

SHARED CASE

A report joins order rows to several payment rows per order. Revenue appears larger after the join.

Role A | Responding professional

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Useful expressions

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Cover this until after your first attempt

What does one row represent in each table? The join may repeat order values when there are multiple payments. Let's check the grain and aggregation before interpreting the total.

Second round

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 06

Experiment Readouts and Statistical Thinking

SHARED CASE

An experiment estimates a positive effect, but the interval includes values close to no change. The slide presents only the point estimate.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

I'll show the estimated effect and its uncertainty together. The point estimate alone hides the range of values compatible with the analysis and can make the result sound more certain than it is.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 07

Data Governance and Privacy

SHARED CASE

An analyst wants customer-level data but has not specified which fields are needed or how long they will be retained.

Role A | Responding professional

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Useful expressions

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know ...

Cover this until after your first attempt

Could you define the analysis purpose, necessary fields, and retention period? That will let the appropriate team review access and privacy requirements before the data is shared.

Second round

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 08

Insight Storytelling and Recommendations

SHARED CASE

A report lists ten findings but no recommended action. The audience has five minutes to decide whether to investigate a service issue.

Role A | Responding professional

Explain a useful distinction in plain English. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

Useful expressions

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Cover this until after your first attempt

I'll lead with the finding relevant to that decision, explain its limitation, and recommend a specific investigation. The other findings can support the discussion without obscuring the request.

Second round

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.
