

ENGLISH FOR WORK / SEPTEMBER 2026

Environmental Consulting English

Conversation lab

Use these role cards to practice a response, handle a follow-up, and repeat with a new communication challenge.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For environmental consultants, remediation managers, sustainability analysts, field scientists, permitting specialists, ESG teams, and environmental project managers.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

How to use the conversation lab

1. Read the shared case. Spend two minutes noting the facts and your first response.
2. Assign roles. The responding professional uses role A; the listener uses role B. Read your own role privately before you begin.
3. Speak for 45-60 seconds. The listener asks a follow-up instead of simply agreeing. Continue until the meaning and next action are clear.
4. Reveal the model response. Identify one useful expression and compare it with your own wording.
5. Switch roles. Use the second-round challenge and speak again with fewer notes.

If you are studying alone

Speak both roles aloud. Leave a pause after the question, then answer without looking at the model. You can also write a four-turn exchange and read it back for clarity.

Useful conversation repair

- Could you say that another way?
- When you say that, which part do you mean?
- Let me check that I understood correctly.
- I need a moment to separate what is confirmed from what is still unknown.

Feedback

Judge whether the listener understands the situation and can identify the next action or unresolved question. Correct one meaning issue and one useful language pattern, then repeat.

CONVERSATION 01

Phase I and Phase II Site Assessments

SHARED CASE

A site-assessment summary says no further questions remain, but one historical record has not been obtained.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

The review is incomplete because that historical record is missing. I'll identify the information gap and its significance for the assessment rather than imply that all relevant questions have been resolved.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 02

Sampling Plans and Data Quality

SHARED CASE

A sample record omits a transfer signature. The laboratory result is available, but the chain-of-custody record needs review.

Role A | Responding professional

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Useful expressions

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know ...

Cover this until after your first attempt

Could the responsible team review the missing transfer record and document the resolution? I'll flag the gap in the data-quality discussion instead of treating the paperwork as complete.

Second round

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 03

Permitting and Agency Coordination

SHARED CASE

An agency comment requests additional modeling but does not specify which scenario the team believes is missing.

Role A | Responding professional

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Useful expressions

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Cover this until after your first attempt

Could we confirm which scenario and supporting information the comment refers to? I'll draft a focused clarification question and identify our proposed response for review.

Second round

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 04

Remediation Options and Risk

SHARED CASE

Two remediation options have different implementation times and monitoring needs. A client asks which is simply "best."

Role A | Responding professional

Compare options using the same criteria and state the tradeoff. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You favor one option but have not checked whether the scope is comparable. Ask about one difference, then explain the tradeoff you are willing to accept.

Useful expressions

Both options ..., but

Option A ..., whereas option B

The comparison depends on

Cover this until after your first attempt

The options address the problem in different ways and have different monitoring needs. Let's compare them against the agreed objectives and site conditions before recommending a preferred approach.

Second round

Your listener focuses only on the lowest price or fastest date. Explain one other relevant comparison criterion.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 05

Regulatory Compliance and Audits

SHARED CASE

A compliance review has six findings. Four have documented corrective actions; two still lack an assigned owner.

Role A | Responding professional

Distinguish completed work from pending work and explain its impact. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

Useful expressions

We have completed ...; ... remains open.

As of ..., the status is

The next update will cover

Cover this until after your first attempt

Four findings have documented actions. Two still need owners and target dates. I'll make those open decisions visible in the review update and distinguish planned actions from completed ones.

Second round

The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 06

Sustainability and ESG Reporting

SHARED CASE

A sustainability draft says the company is carbon neutral, but the supporting calculation covers only selected operations.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

The calculation does not yet support that broad claim. I'll state the included operations and reporting boundary clearly, then route the proposed wording for the appropriate review.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 07

Community and Stakeholder Meetings

SHARED CASE

Residents ask whether a preliminary result proves that an entire area is safe. Sampling covered only specified locations and conditions.

Role A | Responding professional

Explain a useful distinction in plain English. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

Useful expressions

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Cover this until after your first attempt

The result describes the sampled locations and conditions. It does not answer every question about the wider area. We should explain the findings, their limits, and the next planned information step clearly.

Second round

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 08

Proposal, Scope, and Client Expectations

SHARED CASE

A client requests additional sampling outside the agreed scope. The team has not assessed the extra time and cost.

Role A | Responding professional

Negotiate scope or timing while making conditions explicit. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You want the preferred outcome but can accept one tradeoff. Ask for two options, then state which condition you can accept and which still needs approval.

Useful expressions

We can ..., provided that

Would you prefer ... or ...?

I can take that proposal for review; I cannot yet confirm

Cover this until after your first attempt

We can assess the additional sampling as a scope change. Could we confirm the question it needs to answer, then provide the time and cost implications before agreeing to the work?

Second round

The preferred option is unavailable. Offer an alternative and clearly state any approval still needed.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.
