

ENGLISH FOR WORK / SEPTEMBER 2026

Software Product Management English

Conversation lab

Use these role cards to practice a response, handle a follow-up, and repeat with a new communication challenge.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For software product managers, product owners, UX leads, engineering managers, growth product teams, platform PMs, and product-operations staff.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

How to use the conversation lab

1. Read the shared case. Spend two minutes noting the facts and your first response.
2. Assign roles. The responding professional uses role A; the listener uses role B. Read your own role privately before you begin.
3. Speak for 45-60 seconds. The listener asks a follow-up instead of simply agreeing. Continue until the meaning and next action are clear.
4. Reveal the model response. Identify one useful expression and compare it with your own wording.
5. Switch roles. Use the second-round challenge and speak again with fewer notes.

If you are studying alone

Speak both roles aloud. Leave a pause after the question, then answer without looking at the model. You can also write a four-turn exchange and read it back for clarity.

Useful conversation repair

- Could you say that another way?
- When you say that, which part do you mean?
- Let me check that I understood correctly.
- I need a moment to separate what is confirmed from what is still unknown.

Feedback

Judge whether the listener understands the situation and can identify the next action or unresolved question. Correct one meaning issue and one useful language pattern, then repeat.

CONVERSATION 01

Product Discovery and Problem Framing

SHARED CASE

A stakeholder requests a new button without explaining the user problem. Support notes mention difficulty finding an existing action.

Role A | Responding professional

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Useful expressions

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Cover this until after your first attempt

What is the user trying to achieve, and where do they get stuck? Let's examine that problem before deciding whether a new button is the right solution.

Second round

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 02

Roadmaps and Prioritization

SHARED CASE

A roadmap has three large features and capacity for two. All three sponsors describe their request as urgent.

Role A | Responding professional

Negotiate scope or timing while making conditions explicit. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You want the preferred outcome but can accept one tradeoff. Ask for two options, then state which condition you can accept and which still needs approval.

Useful expressions

We can ..., provided that

Would you prefer ... or ...?

I can take that proposal for review; I cannot yet confirm

Cover this until after your first attempt

We have capacity for two features in this period. Could we compare the expected outcomes and dependencies, then agree which item moves? Calling all three urgent does not resolve the capacity choice.

Second round

The preferred option is unavailable. Offer an alternative and clearly state any approval still needed.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 03

User Stories and Acceptance Criteria

SHARED CASE

A user story says the page should load "quickly." The team needs a testable completion condition.

Role A | Responding professional

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Useful expressions

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Cover this until after your first attempt

Could we define the relevant user journey, measurement conditions, and acceptable response time? That will make the acceptance criteria clear enough for development and testing.

Second round

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 04

Metrics, Funnels, and Product Analytics

SHARED CASE

A product dashboard shows more sign-ups but fewer users completing setup. A stakeholder calls the acquisition campaign a complete success.

Role A | Responding professional

Explain a useful distinction in plain English. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

Useful expressions

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Cover this until after your first attempt

Sign-ups increased, but setup completion fell. These metrics describe different stages of the funnel. Let's examine the full journey before concluding that the change improved the intended user outcome.

Second round

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 05

Experimentation and A/B Testing

SHARED CASE

An A/B test shows a higher conversion rate in one version after one day. The planned test duration has not elapsed.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

The early observed rate is higher, but the planned test is incomplete. I'll report it as an interim result and check the agreed analysis and guardrail measures before recommending a decision.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 06

Release Readiness and Go-to-Market

SHARED CASE

A release is ready for review, but the support team has not received migration notes. The launch checklist lists them as required.

Role A | Responding professional

Give a handoff that the receiving person can confirm. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are taking over the work. Ask what remains open and repeat back the critical status or responsibility. Point out one detail that would be unsafe or misleading to assume.

Useful expressions

The current status is ...; the outstanding item is

The record shows

Please confirm who has accepted

Cover this until after your first attempt

The product checks are ready for review; support preparation is still open. I'll send the migration notes and ask the support owner to confirm readiness before the launch decision.

Second round

The intended recipient cannot take ownership. Keep the status clear and identify the need for an authorized reassignment.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 07

Platform, APIs, and Technical Debt

SHARED CASE

A team can add a requested feature quickly using a workaround or spend longer improving the underlying interface.

Role A | Responding professional

Compare options using the same criteria and state the tradeoff. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You favor one option but have not checked whether the scope is comparable. Ask about one difference, then explain the tradeoff you are willing to accept.

Useful expressions

Both options ..., but

Option A ..., whereas option B

The comparison depends on

Cover this until after your first attempt

The workaround is faster initially, while the interface change may reduce future maintenance. Let's compare delivery time, reliability, and ongoing cost instead of considering only the first release date.

Second round

Your listener focuses only on the lowest price or fastest date. Explain one other relevant comparison criterion.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 08

Stakeholder Pushback and Executive Narrative

SHARED CASE

Two executives disagree about a product decision. The meeting has competing opinions but no shared criterion.

Role A | Responding professional

Include relevant voices and clarify the decision process. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You hold a relevant concern that has not been discussed. Raise it when invited and ask who will decide. Help the facilitator state one unresolved question accurately.

Useful expressions

Let's hear ... before we decide.

The point we still need to resolve is

Who will make this decision, and what do they need?

Cover this until after your first attempt

Could we agree on the outcome and decision criteria first? Then we can compare the options against them, record the tradeoff, and confirm who will make the final decision.

Second round

A participant interrupts or the meeting is running out of time. Protect a turn to speak and close with an accurate decision record.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.
