

ENGLISH FOR WORK / SEPTEMBER 2026

Data Analytics and Business Intelligence English

Learner workbook

Work with realistic cases, develop your own response, and use the answer section after you have tried the tasks.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For data analysts, BI developers, analytics engineers, data scientists, reporting teams, business analysts, and data-driven managers.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Your course at a glance

Use the lesson numbers to match this document with the website and the other guides.

01 Metric Definitions and Business Questions

Clarify missing information before responding.

02 Data Quality and Trust

Distinguish completed work from pending work and explain its impact.

03 Dashboards and Executive Reporting

Explain a useful distinction in plain English.

04 Causation, Correlation, and Caveats

Separate observations, assumptions, and conclusions.

05 SQL, Models, and Transformation Logic

Clarify missing information before responding.

06 Experiment Readouts and Statistical Thinking

Separate observations, assumptions, and conclusions.

07 Data Governance and Privacy

Make a request with a clear action, purpose, and realistic timing.

08 Insight Storytelling and Recommendations

Explain a useful distinction in plain English.

Choose your pace

Quick practice: spend 15 minutes reading one case and saying a response. Full lesson: allow 45-60 minutes for language work, conversation, writing, and revision.

Level support

B1 learners can use the frames and a partner. B2 learners can try a response before reading the model. C1 learners can add the harder follow-up and reduce preparation time. These are teaching suggestions, not certified CEFR level ratings.

After practicing: open the AI prompt workshop, or use the prompts at the end of this guide.

LESSON 01 / READ AND NOTICE

Metric Definitions and Business Questions

Clarify missing information before responding.

SITUATION

Two teams report different active-user totals. One counts logins; the other counts completed transactions.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

metric - A defined quantitative measure used to track or assess something.

business definition - An agreed explanation of what a measure or term means in an organization.

source of truth - The agreed authoritative reference for a particular item of organizational information.

owner - Named person or role accountable for a decision, action, deliverable, or risk.

3. Notice the language

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Improve this sentence: Could you explain what does this mean?

LESSON 01 / PRACTICE AND PRODUCE

Ask a precise question

4. Check the language

1. Which indirect question has the usual word order?
 - A. Could you confirm when does the review start?
 - B. Could you confirm when starts the review?
 - C. Could you confirm when the review starts?
2. Someone says the report is 'ready.' Which question best clarifies its approval status?
 - A. Who will present the report at the meeting?
 - B. Has the report been approved, or is it ready for review?
 - C. Can you send the report to me this afternoon?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 02 / READ AND NOTICE

Data Quality and Trust

Distinguish completed work from pending work and explain its impact.

SITUATION

A dashboard refreshed today, but one source table contains data only through Monday. A manager assumes all figures are current.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

data quality - How well data meets requirements for its intended use, such as accuracy and completeness.

freshness - How recently data reflects events in the source system.

completeness - The extent to which required information or records are present.

pipeline - A sequence of stages through which data, work, or sales opportunities move.

3. Notice the language

Lead with the current state, then the important change or open item. Use completed-action language only for completed work. Add a next update point when it is known; do not invent a date to make the message sound complete.

We have completed ...; ... remains open.

As of ..., the status is

The next update will cover

Improve this sentence: Everything is progressing well.

LESSON 02 / PRACTICE AND PRODUCE

Give a useful status update

4. Check the language

1. Which sentence says a review is finished?
 - A. The team plans to complete the review.
 - B. The team has completed the review.
 - C. The team is completing the review.
2. Which update distinguishes a plan from a confirmed fact?
 - A. Delivery is planned for Friday; the carrier has not confirmed it.
 - B. Delivery is confirmed for Friday because we planned it.
 - C. The delivery plan proves that arrival will be Friday.

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 03 / READ AND NOTICE

Dashboards and Executive Reporting

Explain a useful distinction in plain English.

SITUATION

A KPI card shows a monthly total without its target, comparison period, or definition. The reader cannot interpret whether the result is favorable.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

dashboard - Visual summary of selected measures used to monitor status, performance, or risk.

KPI - Key performance indicator used to monitor progress against an important objective.

threshold - A defined value or condition that triggers a decision or changes a classification.

drill-down - Moving from a summary measure to more detailed information behind it.

3. Notice the language

Start with the reader's question. Explain one unfamiliar term with familiar words, then give a relevant example or contrast. Check understanding without asking only 'Do you understand?'.

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Improve this sentence: We need to operationalize the implementation.

LESSON 03 / PRACTICE AND PRODUCE

Make a complex point clear

4. Check the language

1. Which sentence explains 'backlog' rather than repeating it?
 - A. The backlog is the work still waiting to be completed.
 - B. The backlog is the work completed during the last period.
 - C. The backlog is the maximum work the team can finish in a period.
2. Which follow-up best checks whether your explanation was clear?
 - A. Would you like me to repeat the explanation?
 - B. Was the explanation detailed enough for you?
 - C. How would you describe the next step in your own words?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 04 / READ AND NOTICE

Causation, Correlation, and Caveats

Separate observations, assumptions, and conclusions.

SITUATION

Customers who attend training renew more often. Attendance was voluntary, and the groups may differ in motivation.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

correlation - A statistical association between variables; it does not by itself establish causation.

causation - A relationship in which a change in one factor produces a change in another.

confounder - A factor related to both a proposed cause and outcome that can distort their apparent relationship.

selection bias - Distortion caused by how people or observations are selected into a study or dataset.

3. Notice the language

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

The available evidence shows

This may indicate ..., but

We have not yet established whether

Improve this sentence: The pilot proves this will work everywhere.

LESSON 04 / PRACTICE AND PRODUCE

Match certainty to evidence

4. Check the language

1. Which sentence preserves uncertainty about an unconfirmed cause?
 - A. The change must have caused the delay.
 - B. The change definitely caused the delay.
 - C. The change may have contributed to the delay.
2. A result comes from a small pilot in one location. Which phrase accurately limits the claim?
 - A. Across the service, the observed result was ...
 - B. In this pilot, the observed result was ...
 - C. In similar locations, we can now expect the same result ...

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 05 / READ AND NOTICE

SQL, Models, and Transformation Logic

Clarify missing information before responding.

SITUATION

A report joins order rows to several payment rows per order. Revenue appears larger after the join.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

SQL - Structured Query Language: a language for querying and working with relational data.

data model - A representation of how data is structured and how its elements relate.

grain - What one row or record represents in a dataset.

join logic - The rules used to connect records from different data tables.

3. Notice the language

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Improve this sentence: Could you explain what does this mean?

LESSON 05 / PRACTICE AND PRODUCE

Ask a precise question

4. Check the language

1. Which indirect question has the usual word order?
 - A. Could you confirm when starts the review?
 - B. Could you confirm when the review starts?
 - C. Could you confirm when does the review start?
2. Someone says the report is 'ready.' Which question best clarifies its approval status?
 - A. Has the report been approved, or is it ready for review?
 - B. Can you send the report to me this afternoon?
 - C. Who will present the report at the meeting?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 06 / READ AND NOTICE

Experiment Readouts and Statistical Thinking

Separate observations, assumptions, and conclusions.

SITUATION

An experiment estimates a positive effect, but the interval includes values close to no change. The slide presents only the point estimate.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

sample size - The number of independent units or observations included in a defined analysis.

effect size - A measure of the magnitude of a difference or relationship.

confidence interval - An interval produced by a method with a stated long-run coverage rate under its assumptions.

guardrail - A boundary or protective check used to prevent an unacceptable outcome.

3. Notice the language

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

The available evidence shows

This may indicate ..., but

We have not yet established whether

Improve this sentence: The pilot proves this will work everywhere.

LESSON 06 / PRACTICE AND PRODUCE

Match certainty to evidence

4. Check the language

1. Which sentence preserves uncertainty about an unconfirmed cause?
 - A. The change may have contributed to the delay.
 - B. The change must have caused the delay.
 - C. The change definitely caused the delay.
2. A result comes from a small pilot in one location. Which phrase accurately limits the claim?
 - A. In similar locations, we can now expect the same result ...
 - B. Across the service, the observed result was ...
 - C. In this pilot, the observed result was ...

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 07 / READ AND NOTICE

Data Governance and Privacy

Make a request with a clear action, purpose, and realistic timing.

SITUATION

An analyst wants customer-level data but has not specified which fields are needed or how long they will be retained.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

data governance - The responsibilities and rules for managing data quality, access, use, and protection.

privacy - The appropriate handling of personal information and individuals' related interests and rights.

access control - Rules and mechanisms that determine who may use information or a system.

retention - Keeping customers, users, staff, or records over a stated period; specify which meaning applies.

3. Notice the language

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Improve this sentence: Please revert soonest with the necessary.

LESSON 07 / PRACTICE AND PRODUCE

Ask for an actionable next step

4. Check the language

1. What does 'Please send it by Thursday' normally mean?
 - A. Send it on Thursday, but not earlier.
 - B. Keep sending it regularly until Thursday.
 - C. Send it no later than Thursday.
2. Which request gives the recipient enough detail to act?
 - A. Could you confirm that you received my earlier message?
 - B. Could you confirm the document version needed for the review?
 - C. Could you confirm that the review is important?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

LESSON 08 / READ AND NOTICE

Insight Storytelling and Recommendations

Explain a useful distinction in plain English.

SITUATION

A report lists ten findings but no recommended action. The audience has five minutes to decide whether to investigate a service issue.

1. Understand the situation

Identify two confirmed facts, one missing detail, and the person who needs your response. Do not fill gaps with invented facts.

2. Find the words

insight - An interpretation of evidence that improves understanding of a question or decision.

recommendation - A proposed action supported by reasons and relevant evidence.

assumption - Something treated as true for planning or reasoning, though it may need verification.

next best action - The action judged most useful for a stated objective given current information.

3. Notice the language

Start with the reader's question. Explain one unfamiliar term with familiar words, then give a relevant example or contrast. Check understanding without asking only 'Do you understand?'.

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Improve this sentence: We need to operationalize the implementation.

LESSON 08 / PRACTICE AND PRODUCE

Make a complex point clear

4. Check the language

1. Which sentence explains 'backlog' rather than repeating it?
 - A. The backlog is the maximum work the team can finish in a period.
 - B. The backlog is the work still waiting to be completed.
 - C. The backlog is the work completed during the last period.
2. Which follow-up best checks whether your explanation was clear?
 - A. How would you describe the next step in your own words?
 - B. Would you like me to repeat the explanation?
 - C. Was the explanation detailed enough for you?

5. Say it

Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

6. Write it

Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Check: facts accurate | meaning clear | tone appropriate | next action or question explicit

After revising your response: open the AI extension for feedback on your own draft.

Answer workshop

Try the tasks first. The model is one acceptable response, not a script to memorize. Your written version needs a subject line, an opening, and appropriate context. Assess it using the four criteria at the end.

01 | Metric Definitions and Business Questions

Editing example: Could you explain what this means?

After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: what this means.

Check 1: C - Could you confirm when the review starts?

A: Remove 'does' and use statement word order after 'confirm'.

B: Place the subject 'the review' before 'starts'.

C: The embedded question uses subject then verb: the review starts.

Check 2: B - Has the report been approved, or is it ready for review?

A: This asks about the presenter, not the report's approval status.

B: This question distinguishes two meanings of 'ready' that affect the next action.

C: This asks about delivery timing, not whether approval has happened.

Model response: What action qualifies a user as active, and over what period? The two totals use different definitions. Let's agree on the business question and label each measure clearly.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

02 | Data Quality and Trust

Editing example: Three checks are complete; two remain open and are being reviewed.

The revision gives observable progress. A positive label alone does not tell the reader what is complete or still needed.

Check 1: B - The team has completed the review.

A: 'Plans to complete' describes an intention, not completion.

B: 'Has completed' states that the action is finished.

C: 'Is completing' presents the work as in progress.

Check 2: A - Delivery is planned for Friday; the carrier has not confirmed it.

A: This explicitly labels the date as planned and identifies the missing confirmation.

B: A plan does not establish carrier confirmation.

C: A plan cannot prove a future arrival time.

Model response: The dashboard refreshed today, but that table is current only through Monday. I'll show the source's data cutoff separately from the dashboard refresh time.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

03 | Dashboards and Executive Reporting

Editing example: We need to put the plan into practice.

The revised sentence names the action in familiar words. Specialist vocabulary is useful when it adds precision, but repeating abstract nouns can hide the meaning.

Check 1: A - The backlog is the work still waiting to be completed.

A: This gives the meaning in familiar words.

B: Completed work is different from work still waiting.

C: This describes capacity, not the work waiting to be completed.

Check 2: C - How would you describe the next step in your own words?

A: Offering repetition may help, but it does not show how the listener understood the next step.

B: This invites an opinion on detail, not a demonstration of understanding.

C: An open request lets the listener show their understanding.

Model response: The total needs context. I'll add the definition, reporting period, and relevant comparison so the reader can understand what changed and whether action is needed.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

04 | Causation, Correlation, and Caveats

Editing example: The pilot worked in the tested setting; performance elsewhere remains untested.

The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Check 1: C - The change may have contributed to the delay.

A: 'Must have' expresses a strong inference that the evidence may not support.

B: 'Definitely' presents the cause as certain.

C: 'May have contributed' presents a possibility without claiming the cause is established.

Check 2: B - In this pilot, the observed result was ...

A: A pilot in one location does not establish a service-wide observation.

B: This locates the finding in the setting actually studied.

C: Similarity alone does not establish that the result will transfer.

Model response: Training attendance is associated with renewal in this dataset. That does not establish causation; the groups may differ in other ways. I'll state the finding with that limitation.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

05 | SQL, Models, and Transformation Logic

Editing example: Could you explain what this means?

After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: what this means.

Check 1: B - Could you confirm when the review starts?

A: Place the subject 'the review' before 'starts'.

B: The embedded question uses subject then verb: the review starts.

C: Remove 'does' and use statement word order after 'confirm'.

Check 2: A - Has the report been approved, or is it ready for review?

A: This question distinguishes two meanings of 'ready' that affect the next action.

B: This asks about delivery timing, not whether approval has happened.

C: This asks about the presenter, not the report's approval status.

Model response: What does one row represent in each table? The join may repeat order values when there are multiple payments. Let's check the grain and aggregation before interpreting the total.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

06 | Experiment Readouts and Statistical Thinking

Editing example: The pilot worked in the tested setting; performance elsewhere remains untested.

The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

Check 1: A - The change may have contributed to the delay.

A: 'May have contributed' presents a possibility without claiming the cause is established.

B: 'Must have' expresses a strong inference that the evidence may not support.

C: 'Definitely' presents the cause as certain.

Check 2: C - In this pilot, the observed result was ...

A: Similarity alone does not establish that the result will transfer.

B: A pilot in one location does not establish a service-wide observation.

C: This locates the finding in the setting actually studied.

Model response: I'll show the estimated effect and its uncertainty together. The point estimate alone hides the range of values compatible with the analysis and can make the result sound more certain than it is.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

07 | Data Governance and Privacy

Editing example: Could you send the missing document and confirm when it will be available?

The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

Check 1: C - Send it no later than Thursday.

A: By Thursday permits earlier delivery; it is not restricted to that day.

B: This interprets a deadline as a continuing activity, which would use until.

C: 'By' sets the latest point, while 'after' refers to a later time.

Check 2: B - Could you confirm the document version needed for the review?

A: This checks receipt, not which version is required for the review.

B: The requested action and information are explicit.

C: This checks importance rather than identifying the needed document version.

Model response: Could you define the analysis purpose, necessary fields, and retention period? That will let the appropriate team review access and privacy requirements before the data is shared.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

08 | Insight Storytelling and Recommendations

Editing example: We need to put the plan into practice.

The revised sentence names the action in familiar words. Specialist vocabulary is useful when it adds precision, but repeating abstract nouns can hide the meaning.

Check 1: B - The backlog is the work still waiting to be completed.

A: This describes capacity, not the work waiting to be completed.

B: This gives the meaning in familiar words.

C: Completed work is different from work still waiting.

Check 2: A - How would you describe the next step in your own words?

A: An open request lets the listener show their understanding.

B: Offering repetition may help, but it does not show how the listener understood the next step.

C: This invites an opinion on detail, not a demonstration of understanding.

Model response: I'll lead with the finding relevant to that decision, explain its limitation, and recommend a specific investigation. The other findings can support the discussion without obscuring the request.

Case check: underline the confirmed information and circle a limitation, question, or next step in the response.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Digital.gov: plain-language guidance

<https://digital.gov/guides/plain-language>

Council of Europe: CEFR descriptors

<https://www.coe.int/en/web/common-european-framework-reference-languages/cefr-descriptors>

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

Practice grammar in context

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Data Analytics and Business Intelligence English

Professional audience: data analysts, BI developers, analytics engineers, data scientists, reporting teams, business analysts, and data-driven managers

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Lesson 01: Metric Definitions and Business Questions

Original fictional case: Two teams report different active-user totals. One counts logins; the other counts completed transactions.

Language workshop: Ask a precise question

Communication goal: Clarify missing information before responding.

Language guidance: Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

Useful frames (complete the gaps with case facts): When you say ..., do you mean ...? / Could you clarify which ...? / So, my understanding is Is that right?

Vocabulary: metric: A defined quantitative measure used to track or assess something. / business definition: An agreed explanation of what a measure or term means in an organization. / source of truth: The agreed authoritative reference for a particular item of organizational information. / owner: Named person or role accountable for a decision, action, deliverable, or risk.

Speaking task: Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Writing task: Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and

an appropriate opening. Do not invent a deadline, finding, or approval.

Optional second-round challenge: The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Model for comparison AFTER my attempt, not a response to give me first: What action qualifies a user as active, and over what period? The two totals use different definitions. Let's agree on the business question and label each measure clearly.

END REFERENCE

TASK: Grammar that changes the meaning

1. For a lesson, use its language workshop as the focus. For a dialogue, quote one actual sentence and select one useful grammar feature from it, such as question word order, tense, modality, conditionals or clause linking. Explain in no more than 90 words how this feature helps the speakers do their work. Keep the grammar target narrow.
2. Give two short contrasting sentences using this workplace context. Explain the difference in time, certainty, condition or politeness. Label invented examples and preserve the distinction between possible, planned and confirmed events. Describe context-dependent choices as choices, not universal rules.
3. Give me one editing or sentence-building task using a known case fact. Do not copy the supplied editing example or reveal its answer. Ask me to explain my intended meaning. Stop and wait.
4. After I answer, quote my wording, identify at most two issues, and give a brief explanation and one hint. Ask me to revise before offering a full corrected version. Then accept any accurate, natural alternative that serves the purpose.
5. Continue with two new tasks, one at a time: first guided, then an original response without a sentence frame. End with a two-sentence workplace message using the target feature and a compact self-check. Do not replace this sequence with a worksheet and answer key.

END REFERENCE

TASK: Coach my workplace writing

1. Ask me to paste my own fictional or anonymized draft and identify its reader and purpose. If the reference gives a writing task, mention that task as the default. If it is a dialogue, suggest a brief follow-up message that records its outcome and open questions. Stop and wait. Do not write the message for me first.
2. Once I supply the draft, check it against the reference. If an ambiguity changes the meaning, ask one focused question before rewriting. Do not assume that the draft is correct evidence for a new deadline, approval, diagnosis, cost or commitment.
3. Give feedback in three parts: one effective phrase with a reason; up to three priority improvements, quoting my words; and one short revision task for me. Prioritize incorrect facts or unclear action before minor grammar. For each language correction, explain why it matters to this reader. Label optional stylistic alternatives separately and preserve my level of certainty and intended politeness.
4. Stop and wait for my revision. Then compare the two attempts, identify an improvement and offer one edited version that preserves my voice and purpose. Keep the requested length; if none is specified, use 70-110 words. Explain any meaningful change rather than silently making the message stronger or more certain.
5. Close with one phrase worth reusing and a short transfer task for a different fictional reader. Wait for my attempt before providing another model.
