

ENGLISH FOR WORK / SEPTEMBER 2026

Environmental Consulting English

Vocabulary & phrasebook

Keep precise meanings and useful expressions close. Retrieve the words, then use them in a complete message.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For environmental consultants, remediation managers, sustainability analysts, field scientists, permitting specialists, ESG teams, and environmental project managers.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Make vocabulary usable

Knowing a definition is a start. To use a term well, explain it in plain English, connect it to a case, and choose a natural sentence around it.

- Read five terms, cover their definitions, and recall the meanings.
- Sort a pair you might confuse and explain the difference.
- Use one term in a sentence about a fictional case.
- Ask a partner to explain the sentence without repeating the specialist word.
- Return to the same terms on another day and test recall again.

Abbreviations need context

Expand an abbreviation on first use when the listener needs it. Some abbreviations have different meanings across professions: API can refer to an application programming interface or an active pharmaceutical ingredient. The course context determines the meaning.

Definitions have limits

These are concise language-learning explanations, not complete legal, clinical, or technical specifications. Use the applicable authoritative definition for regulated or operational decisions.

Field vocabulary A-Z

agency comment

A question, observation, or requested change from a reviewing public agency.

assumption

Something treated as true for planning or reasoning, though it may need verification.

cap

A covering used in some remediation approaches to limit contact with contaminated material.

carbon neutral

A claim about balancing specified carbon emissions with removals or offsets within a stated boundary and period.

chain of custody

A documented record of who handled a sample or item and when it changed hands.

change order

A documented modification to agreed construction work, often affecting price or time.

compliance audit

An examination of evidence against applicable rules or organizational requirements.

corrective action

Action taken to fix a current problem and prevent recurrence.

deliverable

A specified item of work to be provided to a customer or project recipient.

detection limit

The lowest amount or concentration reliably distinguished from absence under a specified method.

due diligence

Structured review of facts, risks, obligations, and evidence before a transaction, onboarding, investment, or decision.

ESG

Environmental, social, and governance factors considered in organizational reporting or decisions.

exposure

The extent to which people, assets, or operations are subject to a hazard or potential loss.

exposure pathway

The route by which a contaminant can reach a person or other receptor.

inspection

An examination of an item or condition against relevant requirements.

long-term monitoring

Repeated observation or measurement over an extended period to track conditions.

modeling

Creating a representation of a system or outcome using stated relationships and assumptions.

permit

Official permission for an activity under specified requirements.

Phase I ESA

An environmental site assessment reviewing records and site information to identify relevant environmental concerns.

Phase II

A further environmental investigation often involving sampling to assess concerns identified at a site.

plume

An area of contamination spreading through a medium such as groundwater or air.

public notice

A formal announcement made available to the public about an action or process.

QA/QC

Quality assurance and quality control: processes for establishing quality and checking specific results.

REC

Recognized environmental condition: a defined environmental-assessment term concerning hazardous substances or petroleum at a property.

recordkeeping

Creating, organizing, maintaining, and retaining required records.

remediation

Work to correct a problem or reduce its effects; in environmental work, addressing contamination.

risk communication

Explaining a risk, its evidence, uncertainty, and relevant response to an audience.

sampling plan

A plan specifying what will be sampled, where, when, and by which method.

scope

Defined boundary of work, responsibility, deliverables, assumptions, and exclusions.

Scope 1

Direct greenhouse-gas emissions from sources owned or controlled by the reporting organization under the chosen framework.

Scope 2

Indirect greenhouse-gas emissions from generating purchased or acquired energy used by the reporting organization.

Scope 3

Other indirect greenhouse-gas emissions in an organization's value chain under the relevant reporting framework.

stakeholder

Person or group with an interest, risk, authority, or dependency in the work.

Expressions for this course

Complete the frames with the facts of your case. A frame helps organize meaning; it should not replace an actual explanation.

Match certainty to evidence

The available evidence shows

This may indicate ..., but

We have not yet established whether

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

Ask for an actionable next step

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Ask a precise question

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

Explain a fair comparison

Both options ..., but

Option A ..., whereas option B

The comparison depends on

Use the same time period, scope, and measurement basis for both options. Explain a difference with 'whereas' or 'while'. State what improves and what is given up; do not hide the weaker side of a recommendation.

Give a useful status update

We have completed ...; ... remains open.

As of ..., the status is

The next update will cover

Lead with the current state, then the important change or open item. Use completed-action language only for completed work. Add a next update point when it is known; do not invent a date to make the message sound complete.

Make a complex point clear

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Start with the reader's question. Explain one unfamiliar term with familiar words, then give a relevant example or contrast. Check understanding without asking only 'Do you understand?'.

Offer a workable tradeoff

We can ..., provided that

Would you prefer ... or ...?

I can take that proposal for review; I cannot yet confirm

Acknowledge the goal and explain the available choices. Connect an offer to its actual conditions. A useful response makes room for discussion without promising approval or resources you do not control.

Model responses in context

Read the situation first. Cover the model, say your own response, and compare the two for meaning and tone.

01 | Phase I and Phase II Site Assessments

A site-assessment summary says no further questions remain, but one historical record has not been obtained.

The review is incomplete because that historical record is missing. I'll identify the information gap and its significance for the assessment rather than imply that all relevant questions have been resolved.

Try it again: Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

AI extension: build and retrieve vocabulary from this case.

02 | Sampling Plans and Data Quality

A sample record omits a transfer signature. The laboratory result is available, but the chain-of-custody record needs review.

Could the responsible team review the missing transfer record and document the resolution? I'll flag the gap in the data-quality discussion instead of treating the paperwork as complete.

Try it again: The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

AI extension: build and retrieve vocabulary from this case.

03 | Permitting and Agency Coordination

An agency comment requests additional modeling but does not specify which scenario the team believes is missing.

Could we confirm which scenario and supporting information the comment refers to? I'll draft a focused clarification question and identify our proposed response for review.

Try it again: The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

AI extension: build and retrieve vocabulary from this case.

04 | Remediation Options and Risk

Two remediation options have different implementation times and monitoring needs. A client asks which is simply "best."

The options address the problem in different ways and have different monitoring needs. Let's compare them against the agreed objectives and site conditions before recommending a preferred approach.

Try it again: Your listener focuses only on the lowest price or fastest date. Explain one other relevant comparison criterion.

AI extension: build and retrieve vocabulary from this case.

05 | Regulatory Compliance and Audits

A compliance review has six findings. Four have documented corrective actions; two still lack an assigned owner.

Four findings have documented actions. Two still need owners and target dates. I'll make those open decisions visible in the review update and distinguish planned actions from completed ones.

Try it again: The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

AI extension: build and retrieve vocabulary from this case.

06 | Sustainability and ESG Reporting

A sustainability draft says the company is carbon neutral, but the supporting calculation covers only selected operations.

The calculation does not yet support that broad claim. I'll state the included operations and reporting boundary clearly, then route the proposed wording for the appropriate review.

Try it again: Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

AI extension: build and retrieve vocabulary from this case.

07 | Community and Stakeholder Meetings

Residents ask whether a preliminary result proves that an entire area is safe. Sampling covered only specified locations and conditions.

The result describes the sampled locations and conditions. It does not answer every question about the wider area. We should explain the findings, their limits, and the next planned information step clearly.

Try it again: Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

AI extension: build and retrieve vocabulary from this case.

08 | Proposal, Scope, and Client Expectations

A client requests additional sampling outside the agreed scope. The team has not assessed the extra time and cost.

We can assess the additional sampling as a scope change. Could we confirm the question it needs to answer, then provide the time and cost implications before agreeing to the work?

Try it again: The preferred option is unavailable. Offer an alternative and clearly state any approval still needed.

AI extension: build and retrieve vocabulary from this case.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Digital.gov: plain-language guidance

<https://digital.gov/guides/plain-language>

Council of Europe: CEFR descriptors

<https://www.coe.int/en/web/common-european-framework-reference-languages/cefr-descriptors>

GHG Protocol: corporate standard

<https://ghgprotocol.org/corporate-standard>

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

Build vocabulary and collocations

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Environmental Consulting English

Professional audience: environmental consultants, remediation managers, sustainability analysts, field scientists, permitting specialists, ESG teams, and environmental project managers

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Lesson 01: Phase I and Phase II Site Assessments

Original fictional case: A site-assessment summary says no further questions remain, but one historical record has not been obtained.

Language workshop: Match certainty to evidence

Communication goal: Separate observations, assumptions, and conclusions.

Language guidance: Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

Useful frames (complete the gaps with case facts): The available evidence shows ... / This may indicate ..., but ... / We have not yet established whether ...

Vocabulary: Phase I ESA: An environmental site assessment reviewing records and site information to identify relevant environmental concerns. / REC: Recognized environmental condition: a defined environmental-assessment term concerning hazardous substances or petroleum at a property. / Phase II: A further environmental investigation often involving sampling to assess concerns identified at a site. / due diligence: Structured review of facts, risks, obligations, and evidence before a transaction, onboarding, investment, or decision.

Speaking task: Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Writing task: Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Optional second-round challenge: Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Model for comparison AFTER my attempt, not a response to give me first: The review is incomplete because that historical record is missing. I'll identify the information gap and its significance for the assessment rather than imply that all relevant questions have been resolved.

END REFERENCE

TASK: Vocabulary in use

1. Choose four useful terms from the reference. For each, give a plain-English meaning in this field, two natural word combinations (collocations), one realistic example and a likely misuse or contrast. Keep the examples consistent with the reference and avoid jargon that does not fit this occupation.
2. Add four related terms that would be useful in a different common situation in the same field. Label these as suggested extensions, explain how they connect to the work, and flag regional or organizational variation where relevant. Do not pad the list with synonyms nobody would use at work.
3. Start a retrieval round: give one short workplace sentence with a gap and a clear clue. Ask me to supply the best term and explain my choice. Stop and wait; do not reveal the answer or a completed sentence yet. Accept another term if its meaning and collocation work.
4. After my attempt, explain one useful distinction and ask me to write my own sentence. Wait, correct a genuine meaning or usage problem, then give the next retrieval question. Work through four questions one at a time.
5. Finish with a short handoff or message task using three terms, followed by two recall questions I can save for another day. Do not pretend to schedule a reminder.

Lesson 01: Phase I and Phase II Site Assessments

Original fictional case: A site-assessment summary says no further questions remain, but one historical record has not been obtained.

Language workshop: Match certainty to evidence

Communication goal: Separate observations, assumptions, and conclusions.

Language guidance: Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

Useful frames (complete the gaps with case facts): The available evidence shows ... / This may indicate ..., but ... / We have not yet established whether ...

Vocabulary: Phase I ESA: An environmental site assessment reviewing records and site information to identify relevant environmental concerns. / REC: Recognized environmental condition: a defined environmental-assessment term concerning hazardous substances or petroleum at a property. / Phase II: A further environmental investigation often involving sampling to assess concerns identified at a site. / due diligence: Structured review of facts, risks, obligations, and evidence before a transaction, onboarding, investment, or decision.

Speaking task: Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Writing task: Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and an appropriate opening. Do not invent a deadline, finding, or approval.

Optional second-round challenge: Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Model for comparison AFTER my attempt, not a response to give me first: The review is incomplete because that historical record is missing. I'll identify the information gap and its significance for the assessment rather than imply that all relevant questions have been resolved.

END REFERENCE

TASK: A short retrieval session

1. Tell me to close my notes. Plan six questions: two vocabulary-in-context items, one grammar or meaning contrast, one question about a confirmed versus unknown detail, one short spoken-style response and one new-situation transfer task. Use the supplied material as the answer reference, but do not repeat its existing checks word for word.
2. Ask only the first question, then stop and wait. Prefer a short answer over a multiple-choice question. Do not display the remaining questions, model answers or a word bank in advance.
3. After each answer, say what it gets right and explain a meaningful error if there is one. Accept alternative wording when it preserves the facts and does the communication job. If I struggle, give one clue and invite a retry before revealing a model. Only then move to the next question.
4. Keep a simple record of which items I answered independently, with a hint, or after seeing a model. This records today's practice, not a certified proficiency score. Do not judge pronunciation from typed text.
5. At the end, summarize two strengths and two useful next steps with examples from my answers. Give me a small review card containing three prompts and a separate answer section. Suggest that I revisit it tomorrow and a week later; do not claim you will remember this session or send reminders. Label the final transfer scenario as fictional.
