

ENGLISH FOR WORK / SEPTEMBER 2026

Higher Education and Research English

Conversation lab

8 complete workplace dialogues, followed by eight additional role-play cases. Study the exchanges, then make the conversation your own.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For faculty, postdoctoral researchers, graduate students, lab managers, research administrators, grant staff, ethics-board coordinators, and academic program leaders.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

Inside this conversation lab

Original fictional training conversations in professional English. These are realistic scripts, not transcripts of actual people. The professional roles are the speaker labels; all figures, incidents, and organizations are invented.

01 Study design discussion

02 Grant specific aims

03 A result that did not reproduce

04 Protocol amendment

05 Authorship discussion

06 Responding to peer review

07 Reproducible analysis handoff

08 Conference questions

Then try eight independent role-play cases, followed by feedback criteria and references.

Read it. Hear it. Make it yours.

1. Read the setting. Identify the roles, the immediate problem, and what each speaker needs.
2. Read the whole conversation aloud with a partner. In a group, give a third person the observer role. For three-speaker scripts, assign each professional a separate voice.
3. Notice how the speakers ask a specific question, qualify a claim, disagree, explain a technical point, or agree on a next step. Underline language you would actually use.
4. Cover the script. Recreate the exchange using the situation and professional roles. Keep the meaning, but change the wording.
5. Switch roles and introduce a complication: a missing record, a different priority, an unavailable colleague, or a changed assumption. End with a clear outcome or unresolved question.

Register and terminology

These colleagues use concise professional language. In an internal technical meeting, familiar abbreviations can be natural. With a new colleague or a client, expand unfamiliar terms and check understanding. Keep disagreement directed at the evidence or proposal, and match the degree of certainty to what is known.

Independent study

Speak each role aloud. Pause before the reply and supply your own response before revealing the next line. Record a second version using invented details, then compare its clarity and tone with the script.

Professional context

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

FULL DIALOGUE 01 / 6 SPEAKING TURNS

Study design discussion

Researchers refine an overly broad question.

Roles: Principal investigator / Postdoctoral researcher

Principal investigator: Our question asks whether the program improves wellbeing. Which outcome and population do we mean?

Postdoctoral researcher: We should specify the target group, measurement instrument, and follow-up period.

Principal investigator: The available dataset may not cover the full period.

Postdoctoral researcher: Then either revise the feasible question or obtain suitable data; don't imply the design answers more than it can.

Principal investigator: I'll map the variables and missingness before we finalize the protocol.

Postdoctoral researcher: I'll review the design assumptions and proposed analysis with the team.

Notice the professional language

Discuss this wording: "Our question asks whether the program improves wellbeing. Which outcome and population do we mean?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 02 / 6 SPEAKING TURNS

Grant specific aims

A researcher and grants officer review a proposal.

Roles: Research lead / Grants officer

Research lead: Aim two depends entirely on a technique we haven't established. Is that too risky?

Grants officer: Reviewers need to understand the feasibility evidence and what happens if that method fails.

Research lead: We have pilot data, but only under one condition.

Grants officer: State that accurately and explain the alternative approach and decision points.

Research lead: I'll revise the milestones and connect the budget to the actual work.

Grants officer: I'll check the funder's requirements and the consistency of the aims, timeline, and resources.

Notice the professional language

Discuss this wording: "Aim two depends entirely on a technique we haven't established. Is that too risky?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 03 / 6 SPEAKING TURNS

A result that did not reproduce

A lab discusses conflicting experimental runs.

Roles: Graduate researcher / Lab manager

Graduate researcher: The second run didn't reproduce the first result. Should I leave it out of the presentation until we know why?

Lab manager: Include it with the conditions and controls. The discrepancy is part of the evidence.

Graduate researcher: The reagent lot and incubation time differ between runs.

Lab manager: Record those differences without assuming either caused the result.

Graduate researcher: I'll show both datasets and propose the comparisons needed to investigate.

Lab manager: Preserve the raw files and agree on the next experiment before repeating the work.

Notice the professional language

Discuss this wording: "The second run didn't reproduce the first result. Should I leave it out of the presentation until we know why?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 04 / 6 SPEAKING TURNS

Protocol amendment

A researcher proposes changing participant recruitment.

Roles: Research coordinator / Ethics coordinator

Research coordinator: Recruitment is slow. Could we broaden eligibility before the next session?

Ethics coordinator: Check whether the change requires prior ethics approval under the applicable process.

Research coordinator: We haven't amended the approved protocol yet.

Ethics coordinator: Then prepare the proposed change and its implications for consent, risk, and analysis for review.

Research coordinator: I'll keep recruitment within the approved criteria while that is assessed.

Ethics coordinator: I'll confirm the review route and communicate the decision once it is issued.

Notice the professional language

Discuss this wording: "Recruitment is slow. Could we broaden eligibility before the next session?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 05 / 6 SPEAKING TURNS

Authorship discussion

Collaborators clarify credit before submitting a paper.

Roles: Corresponding author / Collaborating researcher

Corresponding author: We haven't agreed on authorship order or contribution statements. Can we settle that before submission?

Collaborating researcher: Yes. Let's review actual contributions against the relevant journal and institutional criteria.

Corresponding author: One colleague provided resources but hasn't reviewed the manuscript.

Collaborating researcher: We should discuss their contribution and the requirements with them, rather than assume a position.

Corresponding author: I'll circulate a proposed contribution record for everyone's review.

Collaborating researcher: Make room for corrections and resolve disagreements before asking the team to approve submission.

Notice the professional language

Discuss this wording: "We haven't agreed on authorship order or contribution statements. Can we settle that before submission?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 06 / 6 SPEAKING TURNS

Responding to peer review

Two authors plan a response to a critical reviewer.

Roles: Lead author / Coauthor

Lead author: The reviewer asks for a causal claim we can't support with this design.

Coauthor: Explain the limitation respectfully and revise any wording that overstates the result.

Lead author: We can add a sensitivity analysis, but it won't turn the study into an experiment.

Coauthor: Say what that analysis addresses and what it doesn't.

Lead author: I'll quote the relevant comment and give a point-by-point response with manuscript locations.

Coauthor: I'll check that each claimed revision is actually present in the new version.

Notice the professional language

Discuss this wording: "The reviewer asks for a causal claim we can't support with this design." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 07 / 6 SPEAKING TURNS

Reproducible analysis handoff

A researcher transfers an analysis to a colleague.

Roles: Data analyst / Research associate

Data analyst: The notebook runs on my laptop, but it relies on files in my downloads folder.

Research associate: We need documented inputs, environment details, and a reproducible project structure.

Data analyst: Some source data have sharing restrictions.

Research associate: Keep those restrictions intact. Document how authorized users obtain the data and include permissible test data where appropriate.

Data analyst: I'll record package versions and the exact analysis steps.

Research associate: I'll attempt a clean run and report any missing dependencies or unclear transformations.

Notice the professional language

Discuss this wording: "The notebook runs on my laptop, but it relies on files in my downloads folder." What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

FULL DIALOGUE 08 / 6 SPEAKING TURNS

Conference questions

A researcher practices a conference discussion with a colleague.

Roles: Presenter / Faculty colleague

Presenter: If someone asks whether the result generalizes, how should I frame the answer?

Faculty colleague: Start with the population and conditions actually studied, then describe what remains untested.

Presenter: I could say the mechanism is plausible elsewhere but hasn't been demonstrated by this study.

Faculty colleague: Yes, if the evidence supports that distinction. Don't turn plausibility into a finding.

Presenter: I'll prepare a slide showing the sample and main limitations.

Faculty colleague: And invite a question about the next study rather than promise an outcome you haven't investigated.

Notice the professional language

Discuss this wording: "If someone asks whether the result generalizes, how should I frame the answer?" What does it help the other professional clarify?

Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

Eight more situations to make your own

The following cases are open role plays. They give you facts, contrasting roles, useful expressions, and a short model response. Use what you learned from the complete dialogues to create a longer exchange.

Preparation: two minutes. Conversation: three to five minutes. Feedback: one minute. Switch roles and repeat with the second-round challenge.

ROLE-PLAY CASE 01

Research Questions and Study Design

SHARED CASE

A research proposal asks whether a program "works" without specifying the outcome or population.

Role A | Responding professional

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Useful expressions

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Cover this until after your first attempt

What outcome would count as improvement, for whom, and over what period? A clearer research question will help us choose an appropriate design and describe its limits.

Second round

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 02

Grant Proposals and Specific Aims

SHARED CASE

A grant draft promises to solve a broad scientific problem using a small pilot study.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

The pilot can test feasibility and provide preliminary evidence. It cannot resolve the entire problem. I'll narrow the aim so the proposed work and the claim match.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 03

Lab Meetings and Data Challenges

SHARED CASE

A result differs from an earlier experiment, but the lab notes omit a protocol change.

Role A | Responding professional

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Useful expressions

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know ...

Cover this until after your first attempt

Could we compare the protocol versions and recorded conditions? Please add the missing change to the record so the team can assess possible explanations for the difference.

Second round

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 04

Research Ethics and Human Subjects

SHARED CASE

A researcher wants to reuse participant data for a new question. The existing approval and consent materials have not been reviewed.

Role A | Responding professional

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Useful expressions

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Cover this until after your first attempt

Does the proposed use fall within the relevant approval and consent arrangements? Let's check with the appropriate ethics and data-governance processes before assuming reuse is permitted.

Second round

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 05

Authorship, Collaboration, and Credit

SHARED CASE

Collaborators disagree about authorship late in a project. Their contributions and expectations have not been discussed together.

Role A | Responding professional

Include relevant voices and clarify the decision process. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You hold a relevant concern that has not been discussed. Raise it when invited and ask who will decide. Help the facilitator state one unresolved question accurately.

Useful expressions

Let's hear ... before we decide.

The point we still need to resolve is

Who will make this decision, and what do they need?

Cover this until after your first attempt

Could we document each contribution and review the applicable authorship criteria as a group? That will give us a clearer basis for the discussion than relying on assumptions about rank or effort.

Second round

A participant interrupts or the meeting is running out of time. Protect a turn to speak and close with an accurate decision record.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 06

Peer Review and Revision Responses

SHARED CASE

A reviewer points out that a manuscript's claim goes beyond its sample. The authors agree that the wording needs revision.

Role A | Responding professional

Acknowledge a communication problem and give a corrected message. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are frustrated because an earlier message created an expectation. Explain that expectation. Ask your partner to distinguish the correction from anything still uncertain.

Useful expressions

My earlier message did not make ... clear.

I'm sorry for The correct information is

Let me check that the revised explanation addresses

Cover this until after your first attempt

Thank you for identifying this limitation. We have narrowed the claim to the studied sample and added a discussion of generalizability. The response should point the reviewer to the revised passage.

Second round

The listener remains disappointed after the correction. Acknowledge the impact and restate the available next step calmly.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 07

Data Management and Reproducibility

SHARED CASE

A shared dataset has variable names but no description of units, missing values, or collection dates.

Role A | Responding professional

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Useful expressions

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know ...

Cover this until after your first attempt

Could you add a data dictionary covering units, missing-value codes, and collection dates? Those details will help another researcher interpret and reuse the data correctly.

Second round

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

ROLE-PLAY CASE 08

Academic Presentations and Conferences

SHARED CASE

An audience member asks whether a small study proves a general theory. The presenter needs a concise answer.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

The study offers evidence relevant to the theory under these conditions. It does not establish the theory in every setting. A useful next step would test whether the finding holds in a broader sample.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief and extend with AI

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Digital.gov: plain-language guidance

<https://digital.gov/guides/plain-language>

Council of Europe: CEFR descriptors

<https://www.coe.int/en/web/common-european-framework-reference-languages/cefr-descriptors>

US Department of Education: FERPA

<https://studentprivacy.ed.gov/ferpa>

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

Rehearse with an AI colleague

START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

REFERENCE

Course: Higher Education and Research English

Professional audience: faculty, postdoctoral researchers, graduate students, lab managers, research administrators, grant staff, ethics-board coordinators, and academic program leaders

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Dialogue 01: Study design discussion

Original fictional setting: Researchers refine an overly broad question.

Professional roles: Principal investigator / Postdoctoral researcher

Published dialogue (reference script, not my own performance):

Principal investigator: Our question asks whether the program improves wellbeing. Which outcome and population do we mean?

Postdoctoral researcher: We should specify the target group, measurement instrument, and follow-up period.

Principal investigator: The available dataset may not cover the full period.

Postdoctoral researcher: Then either revise the feasible question or obtain suitable data; don't imply the design answers more than it can.

Principal investigator: I'll map the variables and missingness before we finalize the protocol.

Postdoctoral researcher: I'll review the design assumptions and proposed analysis with the team.

END REFERENCE

TASK: Interactive workplace role-play

1. Use the supplied case or dialogue as the starting situation. Give a two-sentence briefing and offer two relevant professional roles for me to choose from. For a supplied dialogue, use its actual roles. Ask which role I want, then stop and wait. Do not write my replies.

2. After I choose, identify who you will play and the immediate communication goal. Play the other professional; where a meeting requires a third person, label each of your speakers clearly. Start with one natural workplace turn and wait for my reply. Keep most turns to one to three sentences and ask no more than one question at a time.
3. Let the exchange develop across six to ten learner turns, or end earlier if I type "feedback". Respond to what I actually say. Include a plausible clarification, disagreement or tradeoff without silently changing the starting facts. Mark any added constraint as a fictional second-round variation. Do not resolve approvals, evidence or commitments that remain uncertain.
4. Stay in role during the exchange. If my meaning is unclear, ask for clarification naturally. Give a hint only if I ask or cannot proceed. Do not deliver a model conversation in advance.
5. At the debrief, quote two of my phrases: one successful choice and one worth improving. Check factual accuracy, language, register and whether the next step was clear. Give up to three focused suggestions. Ask me to retry the weakest turn; wait. Only then offer an alternative wording and a harder replay.

Principal investigator: I'll map the variables and missingness before we finalize the protocol.

Postdoctoral researcher: I'll review the design assumptions and proposed analysis with the team.

END REFERENCE

TASK: Extend the conversation library

1. Propose six distinct, common scenarios in this field beyond the supplied case or script. For each, name the setting, two or more professional roles, the communication problem and one useful terminology focus.

Include routine coordination, clarification, a complication, disagreement, handoff and follow-up where relevant. Choose scenarios that fit this profession, rather than forcing unsuitable situations into it.

2. Ask me to choose one scenario, or request all six in sequence. Stop and wait. Do not write all the scripts before I choose.

3. For the selected scenario, write an original fictional dialogue of 12-18 substantial speaking turns between two or three professionals. Name each role, establish an actual work problem, and let the exchange progress through questions, clarification, competing constraints and a credible next step or explicitly unresolved issue. Use the occupation's natural nomenclature and register. Avoid an interview between a teacher and a learner, generic small talk, and inserting a glossary definition into every reply. Explain specialist terms outside the dialogue instead.

4. After the script, explain five useful expressions in context, identify two grammar or register choices and ask three questions about the speakers' reasoning. Withhold the answers until I attempt them. Add one role-switch challenge.

5. Before presenting a script, check names, numbers, chronology, roles and terminology for consistency. Label invented facts and acknowledge uncertain specialist usage. If I requested all six, deliver one complete script at a time and wait for "next". Make each scenario materially different.
