

**ENGLISH FOR WORK / SEPTEMBER 2026**

# Software Product Management English

## Teacher's guide

Teach practical workplace communication with specific cases, clear language targets, and a repeatable feedback process.

**PRACTICE THAT TRANSFERS TO WORK**

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For software product managers, product owners, UX leads, engineering managers, growth product teams, platform PMs, and product-operations staff.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

# Your course at a glance

Use the lesson numbers to match this document with the website and the other guides.

## 01 Product Discovery and Problem Framing

Clarify missing information before responding.

## 02 Roadmaps and Prioritization

Negotiate scope or timing while making conditions explicit.

## 03 User Stories and Acceptance Criteria

Make a request with a clear action, purpose, and realistic timing.

## 04 Metrics, Funnels, and Product Analytics

Explain a useful distinction in plain English.

## 05 Experimentation and A/B Testing

Separate observations, assumptions, and conclusions.

## 06 Release Readiness and Go-to-Market

Give a handoff that the receiving person can confirm.

## 07 Platform, APIs, and Technical Debt

Compare options using the same criteria and state the tradeoff.

## 08 Stakeholder Pushback and Executive Narrative

Include relevant voices and clarify the decision process.

## Choose your pace

Quick practice: spend 15 minutes reading one case and saying a response. Full lesson: allow 45-60 minutes for language work, conversation, writing, and revision.

## Level support

B1 learners can use the frames and a partner. B2 learners can try a response before reading the model. C1 learners can add the harder follow-up and reduce preparation time. These are teaching suggestions, not certified CEFR level ratings.

After practicing: open the AI prompt workshop, or use the prompts at the end of this guide.

# A 60-minute lesson that works

Prepare the case and the learner pages. Keep the model response hidden until learners have attempted their own. Choose two field terms that are important to understanding the case.

## **0-5 minutes | Activate experience**

Ask learners to name a comparable situation without sharing confidential details. Introduce the communication goal.

## **5-12 minutes | Read and sort facts**

Read the case. Learners identify confirmed facts, unknowns, the audience, and the immediate communication need.

## **12-22 minutes | Notice and practice language**

Explain the workshop pattern. Work through the vocabulary and editing example, then discuss both language checks and the reasons behind the choices.

## **22-35 minutes | Speak and respond**

Give two minutes of preparation. Run the partner exchange, switch roles, and add the follow-up challenge. Observe whether the listener can act on the message.

## **35-47 minutes | Write for a real reader**

Learners write the short message using only case facts. Partners check clarity, certainty, and the requested next step.

## **47-55 minutes | Compare and revise**

Reveal the model. Discuss alternative acceptable wording. Give one meaning correction and one language correction, then repeat.

## **55-60 minutes | Retrieve and transfer**

Close the materials. Learners recall two expressions and identify one communication habit to use in another situation.

## **Adapt the session**

For 45 minutes, shorten the first conversation and assign writing for follow-up. For 90 minutes, add 15 minutes for a second case and 15 minutes for the final challenge. More time should produce more meaningful practice, not longer explanations.

**LESSON 01 / FACILITATOR NOTES**

# Product Discovery and Problem Framing

Clarify missing information before responding.

**CASE**

A stakeholder requests a new button without explaining the user problem. Support notes mention difficulty finding an existing action.

## Teach this move

Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

Vocabulary to check: user need, persona, use case, opportunity cost.

## Model response

What is the user trying to achieve, and where do they get stuck? Let's examine that problem before deciding whether a new button is the right solution.

## Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. After an introductory phrase such as 'Could you explain', the embedded question uses statement word order: what this means.

## Second-round challenge

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

## Language-check answers

1. B - Could you confirm when the review starts? The embedded question uses subject then verb: the review starts.
2. A - Has the report been approved, or is it ready for review? This question distinguishes two meanings of 'ready' that affect the next action.

AI extension: adapt this lesson for your learners and available time.

**LESSON 02 / FACILITATOR NOTES**

# Roadmaps and Prioritization

Negotiate scope or timing while making conditions explicit.

**CASE**

A roadmap has three large features and capacity for two. All three sponsors describe their request as urgent.

## Teach this move

Acknowledge the goal and explain the available choices. Connect an offer to its actual conditions. A useful response makes room for discussion without promising approval or resources you do not control.

Vocabulary to check: roadmap, prioritization, dependency, capacity.

## Model response

We have capacity for two features in this period. Could we compare the expected outcomes and dependencies, then agree which item moves? Calling all three urgent does not resolve the capacity choice.

## Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. For an ordinary future condition, the if-clause uses present tense. The other clause can express the future consequence or possibility.

## Second-round challenge

The preferred option is unavailable. Offer an alternative and clearly state any approval still needed.

## Language-check answers

1. A - If the scope changes, we will review the schedule. The if-clause uses present tense; the main clause states the future response.
2. C - We can assess the addition and explain its effect on the agreed scope. This offers a useful next step while keeping the approval and scope question open.

AI extension: adapt this lesson for your learners and available time.

**LESSON 03 / FACILITATOR NOTES**

# User Stories and Acceptance Criteria

Make a request with a clear action, purpose, and realistic timing.

**CASE**

A user story says the page should load "quickly." The team needs a testable completion condition.

## Teach this move

State the action and the information needed. Explain why it matters and specify a deadline only when one is given or agreed. 'Could you' is polite; repeated apologies can obscure a legitimate request. Urgent situations may require a direct request.

Vocabulary to check: user story, acceptance criteria, edge case, definition of done.

## Model response

Could we define the relevant user journey, measurement conditions, and acceptable response time? That will make the acceptance criteria clear enough for development and testing.

## Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision names the document and requested response. It avoids expressions that may be unfamiliar or ambiguous for an international audience.

## Second-round challenge

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

## Language-check answers

1. C - Send it no later than Thursday. 'By' sets the latest point, while 'after' refers to a later time.
2. B - Could you confirm the document version needed for the review? The requested action and information are explicit.

AI extension: adapt this lesson for your learners and available time.

## LESSON 04 / FACILITATOR NOTES

# Metrics, Funnels, and Product Analytics

Explain a useful distinction in plain English.

**CASE**

A product dashboard shows more sign-ups but fewer users completing setup. A stakeholder calls the acquisition campaign a complete success.

**Teach this move**

Start with the reader's question. Explain one unfamiliar term with familiar words, then give a relevant example or contrast. Check understanding without asking only 'Do you understand?'.

Vocabulary to check: activation, retention, funnel, cohort.

**Model response**

Sign-ups increased, but setup completion fell. These metrics describe different stages of the funnel. Let's examine the full journey before concluding that the change improved the intended user outcome.

**Listen for, then coach**

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revised sentence names the action in familiar words. Specialist vocabulary is useful when it adds precision, but repeating abstract nouns can hide the meaning.

**Second-round challenge**

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

**Language-check answers**

1. B - The backlog is the work still waiting to be completed. This gives the meaning in familiar words.
2. A - How would you describe the next step in your own words? An open request lets the listener show their understanding.

AI extension: adapt this lesson for your learners and available time.

**LESSON 05 / FACILITATOR NOTES**

# Experimentation and A/B Testing

Separate observations, assumptions, and conclusions.

**CASE**

An A/B test shows a higher conversion rate in one version after one day. The planned test duration has not elapsed.

## Teach this move

Say what the evidence shows, identify what is still unknown, and limit the conclusion to that evidence. Words such as 'may', 'suggests', and 'in this sample' are useful when the uncertainty is real. Do not soften an urgent, verified safety concern.

Vocabulary to check: A/B test, hypothesis, guardrail metric, statistical significance.

## Model response

The early observed rate is higher, but the planned test is incomplete. I'll report it as an interim result and check the agreed analysis and guardrail measures before recommending a decision.

## Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revision states the finding and its scope. It avoids turning limited evidence into a universal claim.

## Second-round challenge

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

## Language-check answers

1. A - The change may have contributed to the delay. 'May have contributed' presents a possibility without claiming the cause is established.

2. C - In this pilot, the observed result was ... This locates the finding in the setting actually studied.

AI extension: adapt this lesson for your learners and available time.

**LESSON 06 / FACILITATOR NOTES**

# Release Readiness and Go-to-Market

Give a handoff that the receiving person can confirm.

**CASE**

A release is ready for review, but the support team has not received migration notes. The launch checklist lists them as required.

## Teach this move

State the current situation, relevant background, open task, and receiving role. Ask for acknowledgment or repeat-back of the critical item. Sending a message and transferring responsibility are not always the same thing.

Vocabulary to check: release, rollback, enablement, migration.

## Model response

The product checks are ready for review; support preparation is still open. I'll send the migration notes and ask the support owner to confirm readiness before the launch decision.

## Listen for, then coach

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revised sentence asks for an identifiable receiving team instead of leaving responsibility with an unspecified 'someone'.

## Second-round challenge

The intended recipient cannot take ownership. Keep the status clear and identify the need for an authorized reassignment.

## Language-check answers

1. C - Please confirm who will complete the outstanding check. It asks for an identifiable person or team responsible for the task.
2. B - So the result is pending and your team will follow up; is that correct? This repeats the status and responsibility and invites correction.

AI extension: adapt this lesson for your learners and available time.

## LESSON 07 / FACILITATOR NOTES

# Platform, APIs, and Technical Debt

Compare options using the same criteria and state the tradeoff.

**CASE**

A team can add a requested feature quickly using a workaround or spend longer improving the underlying interface.

**Teach this move**

Use the same time period, scope, and measurement basis for both options. Explain a difference with 'whereas' or 'while'. State what improves and what is given up; do not hide the weaker side of a recommendation.

Vocabulary to check: technical debt, API, platform, reliability.

**Model response**

The workaround is faster initially, while the interface change may reduce future maintenance. Let's compare delivery time, reliability, and ongoing cost instead of considering only the first release date.

**Listen for, then coach**

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. 'Better' already has comparative meaning, so it does not need 'more'. Naming the criterion and tradeoff makes the comparison useful.

**Second-round challenge**

Your listener focuses only on the lowest price or fastest date. Explain one other relevant comparison criterion.

**Language-check answers**

1. B - Option A is faster, whereas option B costs less. 'Whereas' marks a contrast between two options.
2. A - An increase of one percentage point. Subtracting 6% from 7% gives one percentage point. The relative increase is about 16.7%.

AI extension: adapt this lesson for your learners and available time.

## LESSON 08 / FACILITATOR NOTES

# Stakeholder Pushback and Executive Narrative

Include relevant voices and clarify the decision process.

**CASE**

Two executives disagree about a product decision. The meeting has competing opinions but no shared criterion.

**Teach this move**

Summarize the issue neutrally, invite missing perspectives, and distinguish discussion from decision. State who can decide and record any unresolved question. Do not assume silence means agreement.

Vocabulary to check: stakeholder, strategic fit, tradeoff, decision memo.

**Model response**

Could we agree on the outcome and decision criteria first? Then we can compare the options against them, record the tradeoff, and confirm who will make the final decision.

**Listen for, then coach**

Ask learners to point to the case fact behind each important statement. Accept different wording when it preserves meaning, fits the listener, and does not invent an outcome. The revised question gives people a way to raise a concern. Silence can have several meanings, especially in unfamiliar or unequal-power situations.

**Second-round challenge**

A participant interrupts or the meeting is running out of time. Protect a turn to speak and close with an accurate decision record.

**Language-check answers**

1. A - We haven't heard from the remote team yet; what is your view? It invites participation without interpreting silence as consent.
2. C - Approval is pending; the sponsor will review the two options. This distinguishes discussion from approval and identifies the next reviewer.

AI extension: adapt this lesson for your learners and available time.

# Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

## Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

## Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

## Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

## Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

## Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

## Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

## Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

# Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

## Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

## Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

### Digital.gov: plain-language guidance

<https://digital.gov/guides/plain-language>

### Council of Europe: CEFR descriptors

<https://www.coe.int/en/web/common-european-framework-reference-languages/cefr-descriptors>

## Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

# Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

## Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

## Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

## Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

## Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

# Adapt a partner or class activity

## START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

## REFERENCE

Course: Software Product Management English

Professional audience: software product managers, product owners, UX leads, engineering managers, growth product teams, platform PMs, and product-operations staff

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Lesson 01: Product Discovery and Problem Framing

Original fictional case: A stakeholder requests a new button without explaining the user problem. Support notes mention difficulty finding an existing action.

Language workshop: Ask a precise question

Communication goal: Clarify missing information before responding.

Language guidance: Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

Useful frames (complete the gaps with case facts): When you say ..., do you mean ...? / Could you clarify which ...? / So, my understanding is ... . Is that right?

Vocabulary: user need: Something a user needs to accomplish in a particular context. / persona: A research-informed representation of a user group used to guide design or communication. / use case: A specific situation describing how someone uses a product or service to achieve a goal. / opportunity cost: The value of the best alternative given up when choosing an option.

Speaking task: Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Writing task: Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and

an appropriate opening. Do not invent a deadline, finding, or approval.

Optional second-round challenge: The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Model for comparison AFTER my attempt, not a response to give me first: What is the user trying to achieve, and where do they get stuck? Let's examine that problem before deciding whether a new button is the right solution.

**END REFERENCE**

**TASK:** Adapt this material for a teaching session

1. Ask me one brief planning question covering learner support needs, group size and available time. Offer a default of two B2 learners and 20 minutes. Stop and wait; use the default only if I choose it.
2. Create a timed plan using the supplied case or dialogue, its actual terminology and one narrow language goal. Include an individual first attempt, partner exchange, focused feedback and a retry. Keep the total within the time I choose. State what the learner should be able to communicate at the end.
3. Provide separate role cards for two or three professional speakers. Each card needs an objective, known information and one question to resolve. Label any invented private information as a variation; do not contradict shared facts. Do not place the model answer on the learner cards.
4. Add a B1 support option with useful frames, a B2 independent task and a C1 extension involving a plausible competing constraint. Maintain the same professional meaning across levels. Explain unfamiliar terms without removing the field's normal language. Include a workable solo alternative.
5. Put teacher notes and suggested responses in a clearly separate section after the learner material. Include likely misunderstandings and a short observation checklist for facts, clarity, tone and next step. Accept multiple successful formulations. Finish with one exit question and a delayed-recall task; identify what the teacher should check before use.

**END PROMPT**

Copy this prompt online or choose another lesson and support level

# Adjust tone and register

## START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

## REFERENCE

Course: Software Product Management English

Professional audience: software product managers, product owners, UX leads, engineering managers, growth product teams, platform PMs, and product-operations staff

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Lesson 01: Product Discovery and Problem Framing

Original fictional case: A stakeholder requests a new button without explaining the user problem. Support notes mention difficulty finding an existing action.

Language workshop: Ask a precise question

Communication goal: Clarify missing information before responding.

Language guidance: Name the exact word, fact, or requirement you need clarified. Ask one focused question at a time. Repeat your understanding and give the other person a chance to correct it.

Useful frames (complete the gaps with case facts): When you say ..., do you mean ...? / Could you clarify which ...? / So, my understanding is ... . Is that right?

Vocabulary: user need: Something a user needs to accomplish in a particular context. / persona: A research-informed representation of a user group used to guide design or communication. / use case: A specific situation describing how someone uses a product or service to achieve a goal. / opportunity cost: The value of the best alternative given up when choosing an option.

Speaking task: Prepare for two minutes. Speak for 45-60 seconds using the case facts, then respond to your partner's question. Switch roles and repeat without reading the model response.

Partner: You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Writing task: Write a 70-110 word message for the person who needs to act on this case. State the purpose, preserve the relevant facts, and make the next action or unresolved question clear. Use a subject line and

an appropriate opening. Do not invent a deadline, finding, or approval.

Optional second-round challenge: The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Model for comparison AFTER my attempt, not a response to give me first: What is the user trying to achieve, and where do they get stuck? Let's examine that problem before deciding whether a new button is the right solution.

**END REFERENCE**

**TASK:** Match the language to the listener

1. Choose a short message or utterance from the reference and quote it exactly. Identify its purpose and likely audience. Ask me to choose a new audience: a close colleague, a decision-maker, or an external reader who may not know the jargon. Stop and wait.
2. Ask me to adapt that message for the chosen reader, keeping its facts and degree of certainty unchanged. Offer a short frame only if I request help. Wait for my attempt before showing alternatives.
3. Discuss at most three choices in my version: directness, specialist vocabulary and interpersonal tone. Explain when a direct request is clearer than extra politeness, and when an unfamiliar abbreviation needs expansion. Avoid cultural stereotypes or claims that one nationality always communicates a certain way.
4. Show two natural alternatives, such as a concise spoken version and a more explicit written version. Explain the tradeoff in each. Do not turn a request into an order, a possibility into a promise, or a pending decision into approval.
5. Ask me to respond to one realistic follow-up from the new reader, then wait. Finish by asking me to adapt the message for a second audience without losing its core meaning. Give feedback only after the attempt.

**END PROMPT**

Copy this prompt online or choose another lesson and support level
