

ENGLISH FOR WORK / SEPTEMBER 2026

# Telecommunications English

## Conversation lab

8 complete workplace dialogues, followed by eight additional role-play cases. Study the exchanges, then make the conversation your own.

### PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For network operations staff, telecom engineers, field technicians, customer operations teams, product managers, regulatory staff, and telecom project leaders.

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

# Inside this conversation lab

Original fictional training conversations in professional English. These are realistic scripts, not transcripts of actual people. The professional roles are the speaker labels; all figures, incidents, and organizations are invented.

01 Outage bridge

02 Fiber deployment dependency

03 Capacity or coverage?

04 Provisioning mismatch

05 Field dispatch handoff

06 Emergency-service change review

07 Churn-risk discussion

08 Equipment end of support

Then try eight independent role-play cases, followed by feedback criteria and references.

# Read it. Hear it. Make it yours.

1. Read the setting. Identify the roles, the immediate problem, and what each speaker needs.
2. Read the whole conversation aloud with a partner. In a group, give a third person the observer role. For three-speaker scripts, assign each professional a separate voice.
3. Notice how the speakers ask a specific question, qualify a claim, disagree, explain a technical point, or agree on a next step. Underline language you would actually use.
4. Cover the script. Recreate the exchange using the situation and professional roles. Keep the meaning, but change the wording.
5. Switch roles and introduce a complication: a missing record, a different priority, an unavailable colleague, or a changed assumption. End with a clear outcome or unresolved question.

## Register and terminology

These colleagues use concise professional language. In an internal technical meeting, familiar abbreviations can be natural. With a new colleague or a client, expand unfamiliar terms and check understanding. Keep disagreement directed at the evidence or proposal, and match the degree of certainty to what is known.

## Independent study

Speak each role aloud. Pause before the reply and supply your own response before revealing the next line. Record a second version using invented details, then compare its clarity and tone with the script.

## Professional context

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

## FULL DIALOGUE 01 / 6 SPEAKING TURNS

# Outage bridge

Network operations coordinates a service interruption.

Roles: NOC engineer / Incident coordinator

**NOC engineer:** We have loss-of-signal alarms on the eastern ring. Several enterprise circuits are affected.

**Incident coordinator:** Do we have a confirmed fault location or only correlated alarms?

**NOC engineer:** Only the alarms so far. Field verification is pending.

**Incident coordinator:** Keep the suspected cause separate from confirmed impact. Who owns field coordination?

**NOC engineer:** The duty field supervisor. I'll provide circuit IDs and the latest topology information.

**Incident coordinator:** I'll maintain the incident timeline and issue the next update without inventing a restoration time.

## Notice the professional language

Discuss this wording: "Do we have a confirmed fault location or only correlated alarms?" What does it help the other professional clarify?

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

## FULL DIALOGUE 02 / 6 SPEAKING TURNS

# Fiber deployment dependency

A rollout team encounters a blocked construction segment.

Roles: Deployment manager / Civil works coordinator

**Deployment manager:** The fiber crew is booked for Monday. Is the duct route ready?

**Civil works coordinator:** Not on the final segment. The permit condition requires clarification before excavation proceeds.

**Deployment manager:** Can the crew complete an independent section instead?

**Civil works coordinator:** Yes, if the revised work package and access arrangements are approved.

**Deployment manager:** I'll resequence the plan and flag the blocked dependency.

**Civil works coordinator:** I'll pursue the permit clarification and confirm which sections are actually released for work.

## Notice the professional language

Discuss this wording: "The fiber crew is booked for Monday. Is the duct route ready?" What does it help the other professional clarify?

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

## FULL DIALOGUE 03 / 6 SPEAKING TURNS

# Capacity or coverage?

Engineers investigate complaints in a busy area.

Roles: Radio engineer / Network planner

**Radio engineer:** Signal strength looks acceptable, but users report slow data during the evening peak.

**Network planner:** That could be capacity rather than coverage. What do utilization and throughput trends show?

**Radio engineer:** Utilization rises at the same times, but we still need to check backhaul and interference.

**Network planner:** Compare the affected cells with neighboring sites and the same time windows.

**Radio engineer:** I'll prepare the evidence before proposing additional capacity.

**Network planner:** Include the assumptions and constraints so we don't choose a remedy from signal strength alone.

## Notice the professional language

Discuss this wording: "That could be capacity rather than coverage. What do utilization and throughput trends show?" What does it help the other professional clarify?

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

## FULL DIALOGUE 04 / 6 SPEAKING TURNS

# Provisioning mismatch

A service activation fails despite a completed order status.

Roles: Provisioning specialist / Service delivery manager

**Provisioning specialist:** The order is marked complete, but the customer's circuit isn't passing the acceptance test.

**Service delivery manager:** Which stage failed: configuration, physical connectivity, or test validation?

**Provisioning specialist:** The port configuration doesn't match the approved service profile.

**Service delivery manager:** Route the correction through the authorized change process and retain the test results.

**Provisioning specialist:** I'll verify the configuration and repeat the agreed acceptance checks after the change.

**Service delivery manager:** I'll keep customer acceptance pending and explain the next confirmed step to the account team.

## Notice the professional language

Discuss this wording: "Which stage failed: configuration, physical connectivity, or test validation?" What does it help the other professional clarify?

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

## FULL DIALOGUE 05 / 6 SPEAKING TURNS

# Field dispatch handoff

A technician receives an incomplete fault ticket.

Roles: Field technician / Dispatch coordinator

**Field technician:** I have the site address, but no access contact or equipment reference.

**Dispatch coordinator:** I'll obtain both before confirming the visit. The ticket currently lists only the customer's billing address.

**Field technician:** Please also confirm whether any access restrictions or hazards are recorded.

**Dispatch coordinator:** I'll check the work order and required site arrangements.

**Field technician:** Once those are complete, I can assess the tools and skills needed for the job.

**Dispatch coordinator:** I'll update the ticket and send you the verified work location before dispatch.

## Notice the professional language

Discuss this wording: "I have the site address, but no access contact or equipment reference." What does it help the other professional clarify?

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

## FULL DIALOGUE 06 / 6 SPEAKING TURNS

# Emergency-service change review

A network change has potential emergency-service implications.

Roles: Change manager / Compliance specialist

**Change manager:** This routing change affects a service used for emergency calling. Can it follow the ordinary release schedule?

**Compliance specialist:** It needs the applicable specialist review, testing, and coordination before approval.

**Change manager:** The current change record doesn't identify that dependency.

**Compliance specialist:** Add the affected services and ask the responsible engineering team to define the required evidence.

**Change manager:** I'll keep implementation pending and update the review group.

**Compliance specialist:** Record the approval conditions clearly; a successful general connectivity test isn't enough to close this issue.

## Notice the professional language

Discuss this wording: "This routing change affects a service used for emergency calling. Can it follow the ordinary release schedule?" What does it help the other professional clarify?

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

## FULL DIALOGUE 07 / 6 SPEAKING TURNS

# Churn-risk discussion

A service manager responds to a customer's repeated interruptions.

Roles: Account manager / Service assurance lead

**Account manager:** The customer is considering leaving after three outages. Can we promise there won't be another?

**Service assurance lead:** No. We can explain the confirmed incidents, completed improvements, and remaining work accurately.

**Account manager:** They also want a service-credit review.

**Service assurance lead:** Route that against the actual agreement and incident records; don't promise an amount before review.

**Account manager:** I'll arrange a meeting around the recovery actions and communication plan.

**Service assurance lead:** I'll bring the evidence and identify who owns each outstanding reliability action.

## Notice the professional language

Discuss this wording: "The customer is considering leaving after three outages. Can we promise there won't be another?" What does it help the other professional clarify?

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

## FULL DIALOGUE 08 / 6 SPEAKING TURNS

# Equipment end of support

A network team plans replacement of aging equipment.

Roles: Network planner / Vendor manager

**Network planner:** The router family reaches end of support next year. Does that mean it stops operating then?

**Vendor manager:** No, but the vendor's support and update arrangements change. We need to verify the exact notice and dates.

**Network planner:** I'll map installed units and service dependencies.

**Vendor manager:** I'll confirm replacement options, lead times, and contractual support conditions.

**Network planner:** Then we can prioritize migration by exposure and business impact.

**Vendor manager:** Include test, rollback, and maintenance-window requirements in the plan before committing customer dates.

## Notice the professional language

end of support - The point after which a supplier stops providing specified support for a product.

## Rehearse and extend with AI

Explain the issue and the agreed next step without reading. Identify any point still awaiting evidence, agreement, or approval. Then replay the exchange with a changed constraint and a new ending.

Observer: note one natural professional expression and one place where the follow-up made the meaning clearer.

## Eight more situations to make your own

The following cases are open role plays. They give you facts, contrasting roles, useful expressions, and a short model response. Use what you learned from the complete dialogues to create a longer exchange.

Preparation: two minutes. Conversation: three to five minutes. Feedback: one minute. Switch roles and repeat with the second-round challenge.

## ROLE-PLAY CASE 01

# Network Operations and Outage Bridges

**SHARED CASE**

A network incident affects one service area. Fault isolation is ongoing, and no restoration estimate has been verified.

**Role A | Responding professional**

Distinguish completed work from pending work and explain its impact. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

**Useful expressions**

We have completed ...; ... remains open.

As of ..., the status is ... .

The next update will cover ... .

**Cover this until after your first attempt**

The affected area is identified, and fault isolation is continuing. We do not yet have a verified restoration estimate. I'll state the next update time and revise the message when confirmed information is available.

**Second round**

The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

## ROLE-PLAY CASE 02

# Fiber Deployment and Construction Coordination

**SHARED CASE**

A fiber installation team has completed physical work but an inspection is still pending. The next team assumes the route is ready.

**Role A | Responding professional**

Give a handoff that the receiving person can confirm. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You are taking over the work. Ask what remains open and repeat back the critical status or responsibility. Point out one detail that would be unsafe or misleading to assume.

**Useful expressions**

The current status is ...; the outstanding item is ... .

The record shows ... .

Please confirm who has accepted ... .

**Cover this until after your first attempt**

Physical installation is complete; the inspection remains pending. Please confirm the approved status before scheduling the next activity, and record the outstanding item in the handoff.

**Second round**

The intended recipient cannot take ownership. Keep the status clear and identify the need for an authorized reassignment.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

## ROLE-PLAY CASE 03

# Wireless Capacity and Coverage

**SHARED CASE**

Customers report slow service in a busy area even though the coverage map shows signal availability.

**Role A | Responding professional**

Explain a useful distinction in plain English. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

**Useful expressions**

In this context, ... means ... .

The difference is that ... .

How would you explain that distinction to a colleague?

**Cover this until after your first attempt**

Coverage and capacity describe different issues. A signal may be available while busy-period demand affects performance. I'll explain that distinction and report the observed conditions for investigation.

**Second round**

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

**ROLE-PLAY CASE 04**

# Provisioning and Service Activation

**SHARED CASE**

A service-activation request has a customer address but no circuit reference or requested activation date.

**Role A | Responding professional**

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

**Useful expressions**

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is ... . Is that right?

**Cover this until after your first attempt**

Could you confirm the circuit reference and target activation date? We need to match the request to the correct service and distinguish the requested date from a confirmed appointment.

**Second round**

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

**ROLE-PLAY CASE 05**

# Field Service and Dispatch

**SHARED CASE**

A field technician receives a ticket that says only "internet bad." The customer is available for a clarification call.

**Role A | Responding professional**

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

**Useful expressions**

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know ... .

**Cover this until after your first attempt**

Could you describe what happens, when it occurs, and which devices are affected? Those details will help the field team prepare for the visit and avoid assumptions about the cause.

**Second round**

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

## ROLE-PLAY CASE 06

# Regulatory and Emergency Services

**SHARED CASE**

A customer notice describes a regulatory requirement without citing the current approved wording. The responsible team has not reviewed it.

**Role A | Responding professional**

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

**Useful expressions**

The available evidence shows ... .

This may indicate ..., but ... .

We have not yet established whether ... .

**Cover this until after your first attempt**

The notice needs review against the current applicable requirement and approved language. I'll identify the disputed wording and route it to the responsible team before release.

**Second round**

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

## ROLE-PLAY CASE 07

# Customer Churn and Service Recovery

**SHARED CASE**

A customer asks for an update after repeated service interruptions. The investigation has no confirmed root cause.

**Role A | Responding professional**

Acknowledge a communication problem and give a corrected message. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You are frustrated because an earlier message created an expectation. Explain that expectation. Ask your partner to distinguish the correction from anything still uncertain.

**Useful expressions**

My earlier message did not make ... clear.

I'm sorry for ... . The correct information is ... .

Let me check that the revised explanation addresses ... .

**Cover this until after your first attempt**

I'm sorry the interruptions have continued. The cause is still under investigation. I'll summarize the verified service history and confirm the next update rather than repeat an unverified explanation.

**Second round**

The listener remains disappointed after the correction. Acknowledge the impact and restate the available next step calmly.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

**ROLE-PLAY CASE 08**

# Vendor and Equipment Lifecycle

**SHARED CASE**

One equipment proposal has a lower purchase price but an earlier end-of-support date. The replacement plan extends beyond that date.

**Role A | Responding professional**

Compare options using the same criteria and state the tradeoff. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

**Role B | Listener**

You favor one option but have not checked whether the scope is comparable. Ask about one difference, then explain the tradeoff you are willing to accept.

**Useful expressions**

Both options ..., but ... .

Option A ..., whereas option B ... .

The comparison depends on ... .

**Cover this until after your first attempt**

The lower price comes with a shorter support period. Let's compare the expected service life, support needs, and replacement timing before making the investment recommendation.

**Second round**

Your listener focuses only on the lowest price or fastest date. Explain one other relevant comparison criterion.

**Debrief and extend with AI**

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

# Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

## Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

## Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

## Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

## Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

## Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

## Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

## Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

# Use the language responsibly

All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

## Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

## Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

### Digital.gov: plain-language guidance

<https://digital.gov/guides/plain-language>

### Council of Europe: CEFR descriptors

<https://www.coe.int/en/web/common-european-framework-reference-languages/cefr-descriptors>

## Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.

# Extend your practice with AI

Use the next two prompts after your own first attempt. Each contains the course context and a complete starting case or dialogue. Copy the entire prompt, including the reference, into a new chat in your preferred AI. You can also use the links to copy it from the website.

## Choose the right kind of help

A role-play prompt makes the AI wait for your replies. A new-dialogue prompt asks for a complete professional script. Writing feedback begins with your draft. Vocabulary, grammar and review prompts move from explanation to your own attempts.

## Choose any lesson or dialogue online

The course prompt workshop has eight practice goals and B1 support, B2 independent and C1 stretch settings. These are practice choices, not assessed proficiency levels. Select the same lesson number or dialogue title you used in this guide.

[Open this course's AI prompt workshop](#)

## Keep practice useful

Use fictional or anonymized details. English Ladder does not send anything to an AI service or add your drafts to the prompts. Your chosen service's terms and any usage charges apply. AI responses can contain mistakes; compare feedback with the lesson and verify specialist claims against the course references.

The two starter prompts use B2 practice. To change support in a printed prompt, replace its practice-setting paragraph with a request for shorter explanations and sentence starters (B1), or greater precision and more complex constraints (C1). Keep the professional facts unchanged.

## Changing the example

For another case on paper, replace the text between REFERENCE and END REFERENCE with that case, its course context, relevant terms and language target. Include the full exchange if practicing a dialogue. Do not assume your AI can access this PDF or a link. The website makes this substitution for you.

Prompt edition: 2026-09-06. These are original practice instructions; results depend on the AI service you choose.

# Rehearse with an AI colleague

## START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

## REFERENCE

Course: Telecommunications English

Professional audience: network operations staff, telecom engineers, field technicians, customer operations teams, product managers, regulatory staff, and telecom project leaders

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Dialogue 01: Outage bridge

Original fictional setting: Network operations coordinates a service interruption.

Professional roles: NOC engineer / Incident coordinator

Published dialogue (reference script, not my own performance):

NOC engineer: We have loss-of-signal alarms on the eastern ring. Several enterprise circuits are affected.

Incident coordinator: Do we have a confirmed fault location or only correlated alarms?

NOC engineer: Only the alarms so far. Field verification is pending.

Incident coordinator: Keep the suspected cause separate from confirmed impact. Who owns field coordination?

NOC engineer: The duty field supervisor. I'll provide circuit IDs and the latest topology information.

Incident coordinator: I'll maintain the incident timeline and issue the next update without inventing a restoration time.

Vocabulary in this exchange: circuit: A telecommunications connection or path used to carry a service.

## END REFERENCE

TASK: Interactive workplace role-play

1. Use the supplied case or dialogue as the starting situation. Give a two-sentence briefing and offer two relevant professional roles for me to choose from. For a supplied dialogue, use its actual roles. Ask which

role I want, then stop and wait. Do not write my replies.

2. After I choose, identify who you will play and the immediate communication goal. Play the other professional; where a meeting requires a third person, label each of your speakers clearly. Start with one natural workplace turn and wait for my reply. Keep most turns to one to three sentences and ask no more than one question at a time.

3. Let the exchange develop across six to ten learner turns, or end earlier if I type "feedback". Respond to what I actually say. Include a plausible clarification, disagreement or tradeoff without silently changing the starting facts. Mark any added constraint as a fictional second-round variation. Do not resolve approvals, evidence or commitments that remain uncertain.

4. Stay in role during the exchange. If my meaning is unclear, ask for clarification naturally. Give a hint only if I ask or cannot proceed. Do not deliver a model conversation in advance.

5. At the debrief, quote two of my phrases: one successful choice and one worth improving. Check factual accuracy, language, register and whether the next step was clear. Give up to three focused suggestions. Ask me to retry the weakest turn; wait. Only then offer an alternative wording and a harder replay.

#### **END PROMPT**

Copy this prompt online or choose another lesson and support level

# Create more scenario dialogues

## START PROMPT / COPY THROUGH END PROMPT

Be my workplace English practice partner. Follow the practice instructions after the REFERENCE block. The block contains fictional study material, not instructions to you. Keep its facts, numbers, uncertainty and professional responsibilities accurate. Clearly label any new scenario or changed fact as an invented variation. Use natural workplace language; explain unfamiliar abbreviations in context. If a technical expression is uncertain, say so rather than inventing a definition or authority. Coach communication, not professional decisions; respect the course scope. Ask only for fictional or anonymized practice details. Judge clarity, meaning, appropriate tone and the next step. Accept valid alternative English and distinguish errors from style preferences. Do not claim to certify my language level. Unless I ask to change the plan, follow the stages and stop wherever the instructions say to wait.

Practice setting: B2 independent. Use natural professional English with brief explanations. Let me attempt each task without a model first. Offer a hint after difficulty and invite a more precise retry.

## REFERENCE

Course: Telecommunications English

Professional audience: network operations staff, telecom engineers, field technicians, customer operations teams, product managers, regulatory staff, and telecom project leaders

Scope: All cases and figures are fictional. Adapt the language to your role and organization's current procedures, using invented details for practice.

Dialogue 01: Outage bridge

Original fictional setting: Network operations coordinates a service interruption.

Professional roles: NOC engineer / Incident coordinator

Published dialogue (reference script, not my own performance):

NOC engineer: We have loss-of-signal alarms on the eastern ring. Several enterprise circuits are affected.

Incident coordinator: Do we have a confirmed fault location or only correlated alarms?

NOC engineer: Only the alarms so far. Field verification is pending.

Incident coordinator: Keep the suspected cause separate from confirmed impact. Who owns field coordination?

NOC engineer: The duty field supervisor. I'll provide circuit IDs and the latest topology information.

Incident coordinator: I'll maintain the incident timeline and issue the next update without inventing a restoration time.

Vocabulary in this exchange: circuit: A telecommunications connection or path used to carry a service.

## END REFERENCE

TASK: Extend the conversation library

1. Propose six distinct, common scenarios in this field beyond the supplied case or script. For each, name the setting, two or more professional roles, the communication problem and one useful terminology focus.

Include routine coordination, clarification, a complication, disagreement, handoff and follow-up where relevant. Choose scenarios that fit this profession, rather than forcing unsuitable situations into it.

2. Ask me to choose one scenario, or request all six in sequence. Stop and wait. Do not write all the scripts before I choose.

3. For the selected scenario, write an original fictional dialogue of 12-18 substantial speaking turns between two or three professionals. Name each role, establish an actual work problem, and let the exchange progress through questions, clarification, competing constraints and a credible next step or explicitly unresolved issue. Use the occupation's natural nomenclature and register. Avoid an interview between a teacher and a learner, generic small talk, and inserting a glossary definition into every reply. Explain specialist terms outside the dialogue instead.

4. After the script, explain five useful expressions in context, identify two grammar or register choices and ask three questions about the speakers' reasoning. Withhold the answers until I attempt them. Add one role-switch challenge.

5. Before presenting a script, check names, numbers, chronology, roles and terminology for consistency. Label invented facts and acknowledge uncertain specialist usage. If I requested all six, deliver one complete script at a time and wait for "next". Make each scenario materially different.

**END PROMPT**
