

Data Analytics and Business Intelligence English Participant Workbook

Practice pages for realistic field-specific meetings, pushback, documentation, and role-play preparation

Audience: data analysts, BI developers, analytics engineers, data scientists, reporting teams, business analysts, and data-driven managers

Focus: A data analytics and BI English curriculum for metric definitions, dashboards, data quality, stakeholder requests, causation, experimentation, governance, and insight presentation.

Designed for advanced ESL learners who already use professional English and need industry-specific terminology, realistic meetings, role-play pressure, careful pushback, and polished workplace outputs.

Teaching stance: this is language and workplace-communication training, not legal, medical, financial, safety, or regulatory advice. Instructors should connect every scenario to the learner's current company policies, local rules, and approved procedures.

How to Use This Workbook

For each module, read a workplace scenario and complete a bounded dialogue. Choose one of four options, then use the answer key to see why the selected phrase fits the evidence, risk, owner, and next step.

Module 1. Metric Definitions and Business Questions

Situation

Two teams use different definitions of active customer.

Stakeholder pressure: Pick one quickly for the dashboard.

Constraint: Business definition, source table, filter logic, and owner need agreement.

Terms to use

- metric
- business definition
- source of truth
- owner

Guided dialogue completion

Situation

Two teams use different definitions of active customer.

Speaker	Line
Stakeholder	Pick one quickly for the dashboard.
ESL learner	I understand the urgency. Before we commit, I need to confirm metric, business definition, the owner, and the evidence standard.
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	mitigation
B	approval
C	control
D	metric definition note

Module 2. Data Quality and Trust

Situation

A dashboard shows a sudden drop after a pipeline change.

Stakeholder pressure: Tell users the data are wrong.

Constraint: Freshness, completeness, transformation logic, and upstream changes must be checked.

Terms to use

- data quality
- freshness
- completeness
- pipeline

Guided dialogue completion**Situation**

A dashboard shows a sudden drop after a pipeline change.

Speaker	Line
Stakeholder	Tell users the data are wrong.
ESL learner	I understand the urgency. Before we commit, I need to confirm data quality, freshness, the owner, and the evidence standard.
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	dashboard requirements brief
B	causality caveat paragraph
C	reconciliation explanation
D	data-quality incident update

Module 3. Dashboards and Executive Reporting**Situation**

Executives ask for a dashboard with every possible metric.

Stakeholder pressure: Add all requested charts.

Constraint: Audience, decision, refresh cadence, and alert thresholds need focus.

Terms to use

- dashboard
- KPI
- threshold

- drill-down

Guided dialogue completion

Situation

Executives ask for a dashboard with every possible metric.

Speaker	Line
Stakeholder	Add all requested charts.
ESL learner	I understand the urgency. Before we commit, I need to confirm dashboard, KPI, the owner, and the evidence standard.
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	scope
B	timeline
C	dashboard requirements brief
D	owner

Module 4. Causation, Correlation, and Caveats

Situation

Sales increased after a campaign and marketing claims causality.

Stakeholder pressure: Say the campaign caused the increase.

Constraint: Seasonality, selection bias, control groups, and other factors need analysis.

Terms to use

- correlation
- causation
- confounder
- selection bias

Guided dialogue completion

Situation

Sales increased after a campaign and marketing claims causality.

Speaker	Line
Stakeholder	Say the campaign caused the increase.
ESL learner	I understand the urgency. Before we commit, I need to confirm correlation, causation, the owner, and the evidence standard.

Speaker	Line
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	causality caveat paragraph
B	approval
C	control
D	disclosure

Module 5. SQL, Models, and Transformation Logic

Situation

A finance report differs from the warehouse model.

Stakeholder pressure: Fix the number silently.

Constraint: Join logic, grain, filters, and reconciliation need transparent review.

Terms to use

- SQL
- data model
- grain
- join logic

Guided dialogue completion

Situation

A finance report differs from the warehouse model.

Speaker	Line
Stakeholder	Fix the number silently.
ESL learner	I understand the urgency. Before we commit, I need to confirm SQL, data model, the owner, and the evidence standard.
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	disclosure
B	metric definition note
C	reconciliation explanation

Option	Phrase
D	control

Module 6. Experiment Readouts and Statistical Thinking

Situation

A test shows a small lift with uncertain confidence.

Stakeholder pressure: Recommend full rollout.

Constraint: Sample size, effect size, confidence, guardrails, and cost should guide decisions.

Terms to use

- sample size
- effect size
- confidence interval
- guardrail

Guided dialogue completion

Situation

A test shows a small lift with uncertain confidence.

Speaker	Line
Stakeholder	Recommend full rollout.
ESL learner	I understand the urgency. Before we commit, I need to confirm sample size, effect size, the owner, and the evidence standard.
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	approval
B	control
C	experiment readout slide
D	mitigation

Module 7. Data Governance and Privacy

Situation

A team requests customer-level data for broad exploration.

Stakeholder pressure: Send the extract.

Constraint: Purpose limitation, access control, retention, and privacy rules need confirmation.

Terms to use

- data governance
- privacy
- access control
- retention

Guided dialogue completion**Situation**

A team requests customer-level data for broad exploration.

Speaker	Line
Stakeholder	Send the extract.
ESL learner	I understand the urgency. Before we commit, I need to confirm data governance, privacy, the owner, and the evidence standard.
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	owner
B	scope
C	data access response
D	risk

Module 8. Insight Storytelling and Recommendations**Situation**

A stakeholder wants a simple recommendation from messy data.

Stakeholder pressure: Hide limitations to make the story clear.

Constraint: Uncertainty, tradeoffs, assumptions, and next tests need visible framing.

Terms to use

- insight
- recommendation
- assumption
- next best action

Guided dialogue completion**Situation**

A stakeholder wants a simple recommendation from messy data.

Speaker	Line
Stakeholder	Hide limitations to make the story clear.
ESL learner	I understand the urgency. Before we commit, I need to confirm insight, recommendation, the owner, and the evidence standard.
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	experiment readout slide
B	data access response
C	insight recommendation memo
D	reconciliation explanation

Answer Key and Rationale

Check each answer after completing the dialogue. The rationale shows why the correct phrase is the strongest fit for the real workplace situation.

Metric Definitions and Business Questions

Correct answer	Why it fits
D. metric definition note	A metric definition note is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Data Quality and Trust

Correct answer	Why it fits
D. data-quality incident update	A data-quality incident update is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Dashboards and Executive Reporting

Correct answer	Why it fits
C. dashboard requirements brief	A dashboard requirements brief is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Causation, Correlation, and Caveats

Correct answer	Why it fits
A. causality caveat paragraph	A causality caveat paragraph is the bounded workplace output that captures the evidence, owner, and next action for this situation.

SQL, Models, and Transformation Logic

Correct answer	Why it fits
C. reconciliation explanation	A reconciliation explanation is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Experiment Readouts and Statistical Thinking

Correct answer	Why it fits
C. experiment readout slide	A experiment readout slide is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Data Governance and Privacy

Correct answer	Why it fits
C. data access response	A data access response is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Insight Storytelling and Recommendations

Correct answer	Why it fits
C. insight recommendation memo	A insight recommendation memo is the bounded workplace output that captures the evidence, owner, and next action for this situation.
