

Project Management English Participant Workbook

Practice pages for realistic field-specific meetings, pushback, documentation, and role-play preparation

Audience: project managers, program managers, PMO staff, scrum masters, delivery leads, operations managers, and cross-functional coordinators

Focus: A project-management English curriculum for scope, schedule, risks, dependencies, stakeholder alignment, status reporting, change control, delivery governance, and difficult timeline conversations.

Designed for advanced ESL learners who already use professional English and need industry-specific terminology, realistic meetings, role-play pressure, careful pushback, and polished workplace outputs.

Teaching stance: this is language and workplace-communication training, not legal, medical, financial, safety, or regulatory advice. Instructors should connect every scenario to the learner's current company policies, local rules, and approved procedures.

How to Use This Workbook

For each module, read a workplace scenario and complete a bounded dialogue. Choose one of four options, then use the answer key to see why the selected phrase fits the evidence, risk, owner, and next step.

Module 1. Project Charter and Scope Definition

Situation

A sponsor asks the team to start before scope is agreed.

Stakeholder pressure: Begin execution and define scope later.

Constraint: Objectives, deliverables, assumptions, exclusions, and decision rights need alignment.

Terms to use

- charter
- scope
- assumption
- exclusion

Guided dialogue completion

Situation

A sponsor asks the team to start before scope is agreed.

Speaker	Line
Stakeholder	Begin execution and define scope later.
ESL learner	I understand the urgency. Before we commit, I need to confirm charter, scope, the owner, and the evidence standard.
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	timeline
B	assumption
C	mitigation
D	project charter excerpt

Module 2. Schedule, Critical Path, and Dependencies

Situation

A launch date is announced before vendor dates are confirmed.

Stakeholder pressure: Tell teams to compress their tasks.

Constraint: Critical path, dependency owners, buffers, and decision dates are unresolved.

Terms to use

- critical path
- dependency
- milestone
- buffer

Project Charter and Scope Definition

Correct answer	Why it fits
D. project charter excerpt	A project charter excerpt is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Schedule, Critical Path, and Dependencies

Correct answer	Why it fits
A. schedule risk update	A schedule risk update is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Risk Register and Issue Escalation

Correct answer	Why it fits
B. risk-to-issue escalation	A risk-to-issue escalation is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Stakeholder Alignment and Governance

Correct answer	Why it fits
A. governance decision note	A governance decision note is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Change Requests and Scope Creep

Correct answer	Why it fits
A. change request response	A change request response is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Status Reporting and Executive Updates

Correct answer	Why it fits
C. executive status update	A executive status update is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Vendor and Cross-Functional Delivery

Correct answer	Why it fits
B. vendor recovery plan	A vendor recovery plan is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Post-Implementation Review

Correct answer	Why it fits
C. post-implementation review	A post-implementation review is the bounded workplace output that captures the evidence, owner, and next action for this situation.
