

Software Product Management English Participant Workbook

Practice pages for realistic field-specific meetings, pushback, documentation, and role-play preparation

Audience: software product managers, product owners, UX leads, engineering managers, growth product teams, platform PMs, and product-operations staff

Focus: A software product-management English curriculum for discovery, roadmaps, user stories, prioritization, metrics, launches, stakeholder negotiation, experimentation, and product strategy.

Designed for advanced ESL learners who already use professional English and need industry-specific terminology, realistic meetings, role-play pressure, careful pushback, and polished workplace outputs.

Teaching stance: this is language and workplace-communication training, not legal, medical, financial, safety, or regulatory advice. Instructors should connect every scenario to the learner's current company policies, local rules, and approved procedures.

How to Use This Workbook

For each module, read a workplace scenario and complete a bounded dialogue. Choose one of four options, then use the answer key to see why the selected phrase fits the evidence, risk, owner, and next step.

Module 1. Product Discovery and Problem Framing

Situation

A large customer asks for a custom feature.

Stakeholder pressure: Put it on the roadmap immediately.

Constraint: User need, segment fit, evidence, opportunity cost, and strategy need review.

Terms to use

- user need
- persona
- use case
- opportunity cost

Guided dialogue completion

Situation

A large customer asks for a custom feature.

Speaker	Line
Stakeholder	Put it on the roadmap immediately.
ESL learner	I understand the urgency. Before we commit, I need to confirm user need, persona, the owner, and the evidence standard.
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	stakeholder pushback script
B	evidence
C	risk
D	discovery brief

Module 2. Roadmaps and Prioritization

Situation

Executives want three major features in one quarter.

Stakeholder pressure: Commit to all three.

Constraint: Capacity, dependencies, risk, strategic fit, and sequencing must be clear.

Terms to use

- roadmap
- prioritization
- dependency
- capacity

Guided dialogue completion**Situation**

Executives want three major features in one quarter.

Speaker	Line
Stakeholder	Commit to all three.
ESL learner	I understand the urgency. Before we commit, I need to confirm roadmap, prioritization, the owner, and the evidence standard.
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	technical debt business case
B	stakeholder pushback script
C	roadmap tradeoff memo
D	launch readiness checklist

Module 3. User Stories and Acceptance Criteria**Situation**

Design and engineering disagree about what done means.

Stakeholder pressure: Let engineering interpret the request.

Constraint: Acceptance criteria, edge cases, analytics, and UX intent need definition.

Terms to use

- user story
- acceptance criteria
- edge case

- definition of done

Guided dialogue completion

Situation

Design and engineering disagree about what done means.

Speaker	Line
Stakeholder	Let engineering interpret the request.
ESL learner	I understand the urgency. Before we commit, I need to confirm user story, acceptance criteria, the owner, and the evidence standard.
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	user-story rewrite
B	scope
C	timeline
D	assumption

Module 4. Metrics, Funnels, and Product Analytics

Situation

Activation improved after a release.

Stakeholder pressure: Declare the feature successful.

Constraint: Cohorts, instrumentation, seasonality, and counter-metrics need review.

Terms to use

- activation
- retention
- funnel
- cohort

Guided dialogue completion

Situation

Activation improved after a release.

Speaker	Line
Stakeholder	Declare the feature successful.
ESL learner	I understand the urgency. Before we commit, I need to confirm activation, retention, the owner, and the evidence standard.

Speaker	Line
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	metric interpretation note
B	discovery brief
C	roadmap tradeoff memo
D	user-story rewrite

Module 5. Experimentation and A/B Testing

Situation

Marketing wants to launch a variant because early clicks are higher.

Stakeholder pressure: Roll it out to everyone.

Constraint: Sample size, significance, novelty effect, and guardrail metrics matter.

Terms to use

- A/B test
- hypothesis
- guardrail metric
- statistical significance

Guided dialogue completion

Situation

Marketing wants to launch a variant because early clicks are higher.

Speaker	Line
Stakeholder	Roll it out to everyone.
ESL learner	I understand the urgency. Before we commit, I need to confirm A/B test, hypothesis, the owner, and the evidence standard.
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	experiment readout
B	assumption
C	mitigation

Option	Phrase
D	approval

Module 6. Release Readiness and Go-to-Market

Situation

A feature is code-complete but docs and support training are not ready.

Stakeholder pressure: Launch because engineering is done.

Constraint: Documentation, enablement, migration, monitoring, and rollback need readiness.

Terms to use

- release
- rollback
- enablement
- migration

Guided dialogue completion

Situation

A feature is code-complete but docs and support training are not ready.

Speaker	Line
Stakeholder	Launch because engineering is done.
ESL learner	I understand the urgency. Before we commit, I need to confirm release, rollback, the owner, and the evidence standard.
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	launch readiness checklist
B	assumption
C	mitigation
D	approval

Module 7. Platform, APIs, and Technical Debt

Situation

Engineering asks for a sprint to address technical debt.

Stakeholder pressure: Reject it because customers cannot see it.

Constraint: Reliability, developer velocity, support burden, and future roadmap risk need translation.

Terms to use

- technical debt
- API
- platform
- reliability

Guided dialogue completion**Situation**

Engineering asks for a sprint to address technical debt.

Speaker	Line
Stakeholder	Reject it because customers cannot see it.
ESL learner	I understand the urgency. Before we commit, I need to confirm technical debt, API, the owner, and the evidence standard.
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	assumption
B	mitigation
C	approval
D	technical debt business case

Module 8. Stakeholder Pushback and Executive Narrative**Situation**

A senior stakeholder wants a feature that conflicts with strategy.

Stakeholder pressure: Agree to keep the relationship positive.

Constraint: Strategic fit, customer segment, cost, and alternatives need a clear recommendation.

Terms to use

- stakeholder
- strategic fit
- tradeoff
- decision memo

Guided dialogue completion**Situation**

A senior stakeholder wants a feature that conflicts with strategy.

Speaker	Line
Stakeholder	Agree to keep the relationship positive.
ESL learner	I understand the urgency. Before we commit, I need to confirm stakeholder, strategic fit, the owner, and the evidence standard.
Stakeholder	What would let us move forward responsibly?
ESL learner	Let's document the risk and prepare a _____ with facts, caveats, owner, and next step.

Choose the missing language

Option	Phrase
A	stakeholder pushback script
B	mitigation
C	approval
D	control

Answer Key and Rationale

Check each answer after completing the dialogue. The rationale shows why the correct phrase is the strongest fit for the real workplace situation.

Product Discovery and Problem Framing

Correct answer	Why it fits
D. discovery brief	A discovery brief is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Roadmaps and Prioritization

Correct answer	Why it fits
C. roadmap tradeoff memo	A roadmap tradeoff memo is the bounded workplace output that captures the evidence, owner, and next action for this situation.

User Stories and Acceptance Criteria

Correct answer	Why it fits
A. user-story rewrite	A user-story rewrite is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Metrics, Funnels, and Product Analytics

Correct answer	Why it fits
A. metric interpretation note	A metric interpretation note is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Experimentation and A/B Testing

Correct answer	Why it fits
A. experiment readout	A experiment readout is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Release Readiness and Go-to-Market

Correct answer	Why it fits
A. launch readiness checklist	A launch readiness checklist is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Platform, APIs, and Technical Debt

Correct answer	Why it fits
D. technical debt business case	A technical debt business case is the bounded workplace output that captures the evidence, owner, and next action for this situation.

Stakeholder Pushback and Executive Narrative

Correct answer	Why it fits
A. stakeholder pushback script	A stakeholder pushback script is the bounded workplace output that captures the evidence, owner, and next action for this situation.
