

ENGLISH FOR WORK / SEPTEMBER 2026

Nursing and Allied Health English

Conversation lab

Use these role cards to practice a response, handle a follow-up, and repeat with a new communication challenge.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For nurses, charge nurses, physical therapists, occupational therapists, respiratory therapists, imaging staff, laboratory staff, care-team coordinators, and allied-health supervisors.

Fictional language practice for professional communication. Clinical, safety, regulatory, and patient-care decisions follow qualified supervision and current local procedures.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

How to use the conversation lab

1. Read the shared case. Spend two minutes noting the facts and your first response.
2. Assign roles. The responding professional uses role A; the listener uses role B. Read your own role privately before you begin.
3. Speak for 45-60 seconds. The listener asks a follow-up instead of simply agreeing. Continue until the meaning and next action are clear.
4. Reveal the model response. Identify one useful expression and compare it with your own wording.
5. Switch roles. Use the second-round challenge and speak again with fewer notes.

If you are studying alone

Speak both roles aloud. Leave a pause after the question, then answer without looking at the model. You can also write a four-turn exchange and read it back for clarity.

Useful conversation repair

- Could you say that another way?
- When you say that, which part do you mean?
- Let me check that I understood correctly.
- I need a moment to separate what is confirmed from what is still unknown.

Feedback

Judge whether the listener understands the situation and can identify the next action or unresolved question. Correct one meaning issue and one useful language pattern, then repeat.

CONVERSATION 01

Shift Handoffs and Clinical Prioritization

SHARED CASE

In a simulated handoff, the outgoing clinician has observations and background notes, but a requested result is still pending. The receiving clinician needs a clear transfer of information.

Role A | Responding professional

Give a handoff that the receiving person can confirm. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are taking over the work. Ask what remains open and repeat back the critical status or responsibility. Point out one detail that would be unsafe or misleading to assume.

Useful expressions

The current status is ...; the outstanding item is

The record shows

Please confirm who has accepted

Cover this until after your first attempt

The result is still pending. I'll separate the current situation, relevant background, my assessment, and the request in this handoff. Please repeat back the outstanding task so we can confirm understanding.

Second round

The intended recipient cannot take ownership. Keep the status clear and identify the need for an authorized reassignment.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 02

Patient Assessment and Escalation

SHARED CASE

During a simulation, a patient reports feeling worse and the learner identifies a change from the earlier observation. The local escalation process is available.

Role A | Responding professional

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Useful expressions

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know

Cover this until after your first attempt

I'm concerned because this is a change from the earlier observation. I need an assessment through our escalation process now. Here is what I observed and when it changed.

Second round

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 03

Medication Safety and Allergy Clarification

SHARED CASE

A fictional medication record and the patient's account contain different allergy information. The learner must communicate the discrepancy through the clinical process.

Role A | Responding professional

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Useful expressions

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Cover this until after your first attempt

The recorded allergy information differs from what the patient has told me. Could we verify the details through the appropriate clinical process? I will state the discrepancy clearly rather than assume either account is complete.

Second round

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 04

Patient Education and Teach-Back

SHARED CASE

A patient in a role-play nods during an explanation of an approved discharge sheet. The learner needs to check whether the explanation was clear.

Role A | Responding professional

Explain a useful distinction in plain English. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

Useful expressions

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Cover this until after your first attempt

I want to check that I explained this clearly. In your own words, how will you follow the instructions when you get home? We can go over any part that is unclear.

Second round

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 05

Interprofessional Rounds

SHARED CASE

In simulated rounds, one team member focuses on discharge timing and another raises an unresolved mobility concern.

Role A | Responding professional

Include relevant voices and clarify the decision process. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You hold a relevant concern that has not been discussed. Raise it when invited and ask who will decide. Help the facilitator state one unresolved question accurately.

Useful expressions

Let's hear ... before we decide.

The point we still need to resolve is

Who will make this decision, and what do they need?

Cover this until after your first attempt

Before we agree on timing, could we hear the mobility concern and the current assessment? Let's confirm the outstanding questions and who will address them in the care plan.

Second round

A participant interrupts or the meeting is running out of time. Protect a turn to speak and close with an accurate decision record.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 06

Documentation and Charting

SHARED CASE

A draft simulated note says a patient was "difficult." It contains no description of what was said or observed.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

Let's replace that label with observable information. Record what the patient said or did, the relevant context, the action taken, and the response, following the documentation process.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 07

Difficult Families and Boundaries

SHARED CASE

A family member in a role-play says, "Nobody tells us anything." The learner can explain their role and arrange an appropriate conversation.

Role A | Responding professional

Acknowledge a communication problem and give a corrected message. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are frustrated because an earlier message created an expectation. Explain that expectation. Ask your partner to distinguish the correction from anything still uncertain.

Useful expressions

My earlier message did not make ... clear.

I'm sorry for The correct information is

Let me check that the revised explanation addresses

Cover this until after your first attempt

I can hear that the lack of information is frustrating. Let me explain what I can clarify and arrange contact with the appropriate team member for the questions outside my role.

Second round

The listener remains disappointed after the correction. Acknowledge the impact and restate the available next step calmly.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 08

Safety Events and Just Culture

SHARED CASE

A simulated safety report includes a fall and an assumption that a colleague was careless. The review has not established the contributing factors.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

The report should describe the event and available observations. We have not established the contributing factors. I'll remove the unsupported judgment and use the reporting process to raise the concern.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

Fictional language practice for professional communication. Clinical, safety, regulatory, and patient-care decisions follow qualified supervision and current local procedures.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.
