

ENGLISH FOR WORK / SEPTEMBER 2026

Pharmaceutical English

Conversation lab

Use these role cards to practice a response, handle a follow-up, and repeat with a new communication challenge.

PRACTICE THAT TRANSFERS TO WORK

Read a realistic case. Find the right language. Speak, write, get feedback, and try again.

Eight lessons | Intermediate to advanced | Independent or classroom study

For clinical development, regulatory affairs, pharmacovigilance, quality, CMC, manufacturing, medical affairs, market access, and compliance teams.

Fictional language practice for professional communication. Clinical, safety, regulatory, and patient-care decisions follow qualified supervision and current local procedures.

All scenarios, figures, and model responses are fictional teaching material. Use invented details in practice.

[Open this course on English Ladder](#)

How to use the conversation lab

1. Read the shared case. Spend two minutes noting the facts and your first response.
2. Assign roles. The responding professional uses role A; the listener uses role B. Read your own role privately before you begin.
3. Speak for 45-60 seconds. The listener asks a follow-up instead of simply agreeing. Continue until the meaning and next action are clear.
4. Reveal the model response. Identify one useful expression and compare it with your own wording.
5. Switch roles. Use the second-round challenge and speak again with fewer notes.

If you are studying alone

Speak both roles aloud. Leave a pause after the question, then answer without looking at the model. You can also write a four-turn exchange and read it back for clarity.

Useful conversation repair

- Could you say that another way?
- When you say that, which part do you mean?
- Let me check that I understood correctly.
- I need a moment to separate what is confirmed from what is still unknown.

Feedback

Judge whether the listener understands the situation and can identify the next action or unresolved question. Correct one meaning issue and one useful language pattern, then repeat.

CONVERSATION 01

Drug Development Strategy, Unmet Need, TPP, and Evidence Logic

SHARED CASE

A development slide describes an early laboratory result as evidence that a product will benefit patients. Clinical benefit has not been established.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

The result supports further investigation in this laboratory setting. It does not establish patient benefit. I'll revise the wording to distinguish the early finding from the clinical questions still to be tested.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 02

Regulatory Pathways, IND Readiness, NDA/BLA Strategy, and Agency Interaction

SHARED CASE

A team is preparing a question for a regulatory meeting. The draft asks broadly whether the whole development plan is acceptable.

Role A | Responding professional

Make a request with a clear action, purpose, and realistic timing. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You can help but need a clear request and its purpose. Ask what is required and whether the timing is fixed or negotiable.

Useful expressions

Could you provide ... so that ...?

Please confirm ... by [agreed time].

If that timing is not possible, please let me know ...

Cover this until after your first attempt

Could we identify the specific issue, proposed approach, and evidence supporting it? A focused question will make the requested feedback clearer than asking for general approval of the plan.

Second round

The other person cannot meet the requested timing. Clarify an alternative without inventing authority to change a formal deadline.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 03

Clinical Trial Design, Protocols, GCP, and Operations

SHARED CASE

Two trial documents give different visit-window descriptions. A coordinator is asked which one to use but has not confirmed the controlling version.

Role A | Responding professional

Clarify missing information before responding. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to know exactly what information is missing. Give one answer only after your partner asks a focused question; then ask them to confirm their understanding.

Useful expressions

When you say ..., do you mean ...?

Could you clarify which ...?

So, my understanding is Is that right?

Cover this until after your first attempt

The documents appear inconsistent. Which approved version governs this activity? I'll raise the discrepancy through the study process and request clarification before communicating a definitive instruction.

Second round

The other person uses an ambiguous word such as 'ready', 'approved', or 'urgent'. Clarify it before continuing.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 04

Endpoints, Estimands, Statistics, Data Readouts, and Clinical Meaning

SHARED CASE

A trial slide highlights a secondary endpoint while the primary endpoint result needs explanation. The audience may mistake the highlighted result for the main study conclusion.

Role A | Responding professional

Separate observations, assumptions, and conclusions. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to tell a colleague what is known. Ask which part is confirmed and which part is an assumption. Challenge one statement that sounds more certain than the case supports.

Useful expressions

The available evidence shows

This may indicate ..., but

We have not yet established whether

Cover this until after your first attempt

Let's state the primary endpoint result clearly and identify the secondary analysis as such. The presentation should explain what each result supports and any limits on interpretation.

Second round

Someone asks for a yes-or-no answer when the evidence supports only a qualified answer. Be concise while preserving the uncertainty.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 05

Pharmacovigilance, Safety Signals, Risk-Benefit, and Label Updates

SHARED CASE

A team member receives a report of a possible adverse event. Key details are incomplete, and the team has a defined safety-reporting process.

Role A | Responding professional

Give a handoff that the receiving person can confirm. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are taking over the work. Ask what remains open and repeat back the critical status or responsibility. Point out one detail that would be unsafe or misleading to assume.

Useful expressions

The current status is ...; the outstanding item is

The record shows

Please confirm who has accepted

Cover this until after your first attempt

I've received a report that needs review through the safety process. Here are the details available and the information still missing. Please confirm receipt; I have not determined causality or classification.

Second round

The intended recipient cannot take ownership. Keep the status clear and identify the need for an authorized reassignment.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 06

CMC, CGMP, Quality Events, Manufacturing, and Supply

SHARED CASE

A quality review identifies missing documentation in a batch record. A manager asks whether the batch can be described as fully reviewed.

Role A | Responding professional

Distinguish completed work from pending work and explain its impact. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You need to brief someone who has only one minute. Ask what is complete, what is open, and which open item affects the next action.

Useful expressions

We have completed ...; ... remains open.

As of ..., the status is

The next update will cover

Cover this until after your first attempt

The documentation review is still open. I'll report the missing items and their review status. We should not describe the batch review as complete until the responsible quality team confirms it.

Second round

The listener asks you to reduce the update to two sentences. Preserve the most important completed and pending items.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 07

Labeling, Medical Affairs, Promotion Review, and Compliance Boundaries

SHARED CASE

A draft promotional slide uses stronger benefit language than the approved material supplied for review.

Role A | Responding professional

State a concern respectfully and propose a practical route forward. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You want to move quickly and initially overlook a relevant condition. Ask why it matters, then consider a practical route forward that respects the real constraint.

Useful expressions

I understand the goal. My concern is

That statement goes beyond

Could we ... before confirming ...?

Cover this until after your first attempt

The proposed wording goes beyond the material we have been asked to use. Could we revise it to match the approved claim and send the change through the appropriate review process?

Second round

The other person repeats the request more firmly. Restate the specific concern calmly and explain the appropriate next route.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

CONVERSATION 08

Market Access, RWE, Launch Readiness, Biosimilars, and Lifecycle Management

SHARED CASE

A market-access presentation combines trial findings and observational data without identifying the different study designs.

Role A | Responding professional

Explain a useful distinction in plain English. Use only the facts given. Choose two relevant terms and be ready to explain one of them in ordinary words.

Role B | Listener

You are unfamiliar with one technical term in the case. Ask for a plain-English explanation and then paraphrase it. Do not pretend to understand a term you cannot explain.

Useful expressions

In this context, ... means

The difference is that

How would you explain that distinction to a colleague?

Cover this until after your first attempt

Let's label the evidence sources separately. The trial and observational study answer different questions and have different limitations. That distinction will help the audience interpret the findings accurately.

Second round

Your listener is new to this field. Replace two specialist expressions with clear explanations without changing the meaning.

Debrief

Which phrase helped the listener? Which case fact needed clarification? Write one better follow-up question, then repeat the exchange.

Give feedback that helps

Score each criterion 0, 1, or 2. This is a practice rubric, not a professional qualification or CEFR test. Do not award or remove points for a particular accent.

Meaning and accuracy

Keeps the case facts accurate; clearly separates confirmed and unknown information.

Clarity and language

Uses understandable sentences and explains specialist terms when the listener needs it.

Interaction and tone

Responds to the other person's question, checks understanding, and uses an appropriate tone.

Task completion

Makes the requested action or unresolved question clear without inventing authority or facts.

Use the same scale for each criterion

0 - Not yet: The reader or listener cannot yet recover the intended meaning or action.

1 - With support: The message works after a prompt, clarification, or revision.

2 - Independently: The message is clear and accurate without a prompt.

Feedback sequence

First, identify a successful phrase. Next, identify one point where meaning or accuracy needs work. Offer one useful language correction, allow a repeat, and compare the two attempts. A total out of eight describes this performance only; do not translate it into a proficiency level.

Final challenge

Choose a case not rehearsed today. The learner gives a one-minute response, answers two follow-up questions, and writes a 70-110 word message. Add the lesson's second-round challenge. Compare the result with an earlier attempt using the four criteria.

Use the language responsibly

Fictional language practice for professional communication. Clinical, safety, regulatory, and patient-care decisions follow qualified supervision and current local procedures.

Meaning before performance

Use specialist terms only when they help the listener. Explain unfamiliar words, preserve uncertainty, and ask when an instruction or responsibility is unclear. The model responses illustrate language; they do not authorize professional actions.

Sources and further reading

The cases, workshops, and explanations are original teaching material. These references provide language frameworks and selected professional context. References were checked in September 2026; consult current local guidance for actual work.

Your next step

Choose one expression you can use in a genuine work situation. Rehearse it with fictional details, then adapt the wording to your role and audience.
