Eight scenarios. Eight extended conversations.

INSIDE THE BOOK

192 vocabulary entries / 128 reusable phrases
160 dialogue turns / 80 numbered dialogue gaps
Word banks and explained answer keys

Upper-intermediate to advanced (B2-C1). For ground operations, maintenance coordination, airport services, and airline support teams.

2026 edition

Eight scenarios. Eight skills.

Eight aviation workplace exchanges: raise a hazard concern, qualify an operations plan, clarify a maintenance deferral, correct passenger updates, accept a turnaround handover, protect access, report an occurrence, and verify audit evidence.

01 Safety Culture and Stop-Work Authority 4

A concern must remain visible under schedule pressure | Use a direct stop-work message, describe an observation, and preserve the authorized restart boundary.

02 Operations Control and Dispatch Coordination 13

A provisional plan was labeled confirmed | Give a timestamped operations summary that preserves separate aircraft and crew statuses.

03 Maintenance Deferrals and MEL Language 22

A deferral note is missing its basis and status | Request the correct maintenance references and distinguish a proposed deferral from an authorized decision.

04 Irregular Operations and Passenger Communication 31

Passengers have heard two different departure times | Correct conflicting information, separate update and departure times, and offer a verified assistance route.

05 Ground Handling and Turnaround Performance 40

A handover was sent, but nobody accepted it | Confirm task ownership and report a catering balance without confusing arrival, receipt, and completion.

06 Security and Access Control 49

A meeting invitation is not access authorization | Refuse an access shortcut professionally and offer the approved verification route without implying automatic entry.

07 Incident Reporting and Investigation 58

An observed dent became an unsupported cause | Separate firsthand observation, another person's report, and a causal conclusion in an occurrence record.

08 Regulatory Audits and Readiness 67

Verified records are not the same as total compliance | Report evidence coverage accurately, assign outstanding checks, and avoid unsupported compliance claims.

Communication field notes	3
Answers and explanations	76
Fast-access phrase pages	92
Vocabulary index	94
Sources and publication notes	102

Precision matters before confidence

Aviation teams need language that separates observation, expectation, and authorization. Speak directly when an action needs to stop, preserve uncertainty when facts are incomplete, and confirm who has accepted the next task.

Name the action and the concern

In a safety escalation, indirect hints can conceal the urgency. Use the applicable local procedure, identify the affected activity, and report what you observed without inventing a diagnosis.

"The task remains stopped under the local process; the reported condition still needs assessment."

Attach status to each item

A provisional aircraft assignment and an unresolved crew question are not a confirmed operating plan. Keep the time basis and source visible as information changes.

"Aircraft assignment is provisional; crew confirmation is pending as of 10:10 UTC."

Close the communication loop

Sending a handover is not the same as someone accepting it. Name the receiving person, confirm the task and current status, and distinguish acceptance from completion.

"Elin has accepted the catering handover; delivery completion is still pending."

Report facts before conclusions

A time sequence, a reported sound, and observed damage do not by themselves prove a cause. Preserve the source of each statement and leave causal findings to the appropriate review.

"I observed the damage at 09:42; I did not witness the contact that caused it."

PROFESSIONAL BOUNDARIES

All cases and local processes are fictional. This is a language book, not flight, dispatch, maintenance, security, or emergency training. It does not teach operational radio phraseology or authorize aircraft release. Follow current approved manuals, qualified personnel, and applicable authority requirements.

A concern must remain visible under schedule pressure

A Read the situation

Use a direct stop-work message, describe an observation, and preserve the authorized restart boundary.

At 08:40 local time, ramp agent Dana observes an unidentified wet patch beside ground equipment at Stand 6. Dana invokes the fictional site's local stop-work process for the affected task and informs supervisor Malik. The equipment team has not assessed the patch or its source. Under this local process, the affected task stays stopped until the designated supervisor completes the required assessment and authorizes restart. Dana is not authorized to handle the substance or repair equipment. A colleague suggests continuing because the turnaround is behind schedule. No injury or equipment fault has been established.

PEOPLE / Dana: Ramp agent | Malik: Ground-operations supervisor

DIRECTNESS CAN BE PROFESSIONAL CARE

A clear stop-work statement may sound abrupt to someone accustomed to soft requests. In the supplied case, the action boundary needs to be unmistakable. Explain the observation and use the local escalation route; do not weaken the message to protect a senior colleague from mild discomfort.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What did Dana directly observe?

A A proved hydraulic failure

C A completed repair

B A confirmed injury

D An unidentified wet patch beside equipment

2. What is the affected task's current status?

A Cleared because the flight is late

C Automatically restarted

B Stopped under the local process

D Completed without concern

3. What does schedule pressure change about restart authority?

A The reporter must repair the equipment.

C Any colleague can waive it.

B Nothing; the required authorization is still needed.

D A late turnaround proves the patch is harmless.

Answers and explanations: [page 76](#).

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

ramp

The airport area used for aircraft servicing and related ground activity.

IN USE report a ramp concern

stand

A designated aircraft parking position.

IN USE identify the affected stand

ground support equipment (GSE)

Equipment used to support aircraft ground operations.

IN USE identify ground support equipment

hazard

A condition or object with potential to cause harm.

IN USE report a potential hazard

safety risk

The assessed likelihood and severity of harm from a hazard.

IN USE assess safety risk

stop-work authority

Authority under the relevant process to halt an unsafe or uncertain task.

IN USE invoke stop-work authority

affected task

The specific activity subject to the concern or restriction.

IN USE identify the affected task

escalation route

The defined path for raising a concern to the responsible people.

IN USE follow the escalation route

restart authorization

Permission to resume after the required conditions are satisfied.

IN USE obtain restart authorization

safety management system (SMS)

An organized approach to managing safety risks and controls.

IN USE support the safety management system

hazard report

A record communicating a potentially harmful condition.

IN USE submit a hazard report

risk control

A measure intended to reduce or manage risk.

IN USE verify a risk control

Precision check

Dana can report a wet patch without naming the substance or declaring an equipment failure. The observation warrants the local process, but it does not establish cause, injury, or the correct technical remedy.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

safety assurance

Checking whether safety arrangements remain effective.

IN USE support safety assurance

safety promotion

Training and communication that support safe working practices.

IN USE strengthen safety promotion

just culture

An approach balancing fair reporting, learning, and accountability.

IN USE support a just culture

authority gradient

The influence of rank differences on communication.

IN USE reduce the authority gradient

schedule pressure

Pressure to meet a planned operating time.

IN USE recognize schedule pressure

situational awareness

Understanding the relevant conditions and their implications.

IN USE maintain situational awareness

unidentified substance

Material whose identity has not been established.

IN USE report an unidentified substance

direct observation

Something personally seen or otherwise perceived.

IN USE distinguish direct observation

qualified assessment

Evaluation by personnel with the required competence and authority.

IN USE request a qualified assessment

hold point

A stage beyond which activity cannot proceed without a required condition.

IN USE respect the hold point

closed-loop communication

Communication in which receipt and understanding are confirmed.

IN USE use closed-loop communication

residual risk

Risk remaining after the relevant controls are applied.

IN USE assess residual risk

Precision check

The task is already stopped in this fictional case. Do not confuse a later written report with the immediate escalation, or acknowledgement with permission to restart. Only the specified authorized process can change the current task status.

Phrases you can actually use

C Notice the language / 1 of 2

STATE THE ACTION CLEARLY

"The affected task is stopped under our local process."

GIVE THE OBSERVATION TIME

"I observed it at 08:40 local time."

REQUEST QUALIFIED REVIEW

"The equipment team needs to assess the condition."

NAME THE RESTART BOUNDARY

"Restart requires the designated supervisor's authorization."

LOCATE THE OBSERVATION

"I saw a wet patch beside the equipment at Stand 6."

SEPARATE OBSERVATION AND CAUSE

"I have not identified the substance or its source."

AVOID AN UNSAFE ASSUMPTION

"We cannot treat it as harmless because the schedule is tight."

CHECK UNDERSTANDING

"Please confirm that the task remains stopped."

Stop versus perhaps pause

Do not soften an active safety instruction into an optional suggestion.

Observed

Identifies firsthand information, not a diagnosis.

Unidentified

Keeps a missing fact visible.

Phrases you can actually use

C Notice the language / 2 of 2

AVOID SELF-ASSIGNED REPAIR

"I am not authorized to handle the substance or repair the equipment."

RESPOND TO PRESSURE

"The delay does not remove the assessment requirement."

NAME THE NEXT RESPONSIBILITY

"I will coordinate the required assessment."

PRESERVE THE RECORD

"Record the time, location, observation, and action taken."

KEEP THE REPORT FACTUAL

"No injury or equipment fault has been established."

ACKNOWLEDGE THE REPORT

"Thank you for raising the concern promptly."

KEEP ACKNOWLEDGEMENT SEPARATE

"I have received the report; that is not restart approval."

CLOSE THE LOOP

"We will communicate any authorized change in status explicitly."

Local time

States the clock basis so later records can be compared.

Acknowledged

Means received, not approved for continuation.

Until authorized

Defines the boundary for resuming, not an estimated delay.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which message best preserves the facts?

- A** Continue unless the schedule improves.
- B** Task stopped: unidentified wet patch observed beside equipment at Stand 6, 08:40 local.
- C** Hydraulic failure confirmed, although nobody assessed it.
- D** Everything is safe because no injury is reported.

2. Which response to pressure is appropriate?

- A** We can skip review because we are late.
- B** Quietly resume and complete the report later.
- C** Ask the least experienced worker to test the substance.
- D** The task remains stopped until the required assessment and restart authorization.

3. What does a supervisor's acknowledgement establish?

- A** The equipment is repaired.
- B** Restart has been authorized.
- C** The substance has been identified.
- D** The concern has been received.

4. Which statement about reporting is accurate?

- A** Record the observation and action without assigning an unverified cause.
- B** Invent a fault category to make the form look complete.
- C** Omit the stop because it affected punctuality.
- D** State that every hazard report guarantees immunity from consequences.

[Answers and explanations: page 76.](#)

A concern must remain visible under schedule pressure

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

hold point / unidentified substance / direct observation / restart authorization / closed-loop communication / Schedule pressure / situational awareness / qualified assessment / hazard report / authority gradient

- 01 **Dana:** The affected task at Stand 6 is stopped under our local process. I saw a wet patch beside the ground equipment at eight forty local time.
- 02 **Malik:** I have received the ¹ _____. Thank you for raising it. Keep the task status clear while I coordinate the required assessment. Have you identified the material or its source?
- 03 **Dana:** No. I observed the patch, but I cannot identify the substance. I have not handled it or attempted a repair outside my role.
- 04 **Malik:** That distinction between ² _____ and interpretation matters. We should record what you saw and the action taken, without filling the missing information with a guessed fault.
- 05 **Dana:** A colleague says the turnaround is already behind schedule and suggests continuing while the equipment team checks. I need a clear response to that suggestion.
- 06 **Malik:** ³ _____ does not remove the hold. Under this process, the affected task remains stopped until the assessment is complete and the designated supervisor authorizes restart.
- 07 **Dana:** I will repeat that boundary without making it personal or guessing about the equipment.
- 08 **Malik:** Refer to the ⁴ _____ requirement. Name the task and current status, then direct questions through the responsible supervisor. You do not need to accuse anyone to keep the instruction firm.
- 09 **Dana:** Should I describe the patch as hydraulic fluid in the written record? It is beside equipment, but nobody has confirmed what it is.
- 10 **Malik:** Use ⁵ _____ or simply describe the wet patch. Location beside equipment does not establish its source. The qualified team can supply verified findings through the proper record.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 10.

- 11 **Dana:** Understood. I will give the stand, observation time, visible condition, and the fact that I invoked the local stop-work process. No injury is established.
- 12 **Malik:** That supports ⁶ _____ without inventing a diagnosis. It also helps the incoming staff understand what remains unresolved, especially if the handover occurs before the assessment is complete.
- 13 **Dana:** A senior colleague might hear my direct statement as disrespectful. I am more used to phrasing concerns as questions, particularly when someone has more experience.
- 14 **Malik:** The ⁷ _____ should not hide the concern. You can be courteous and explicit: the task is stopped under the local process, and restart authorization is still required.
- 15 **Dana:** I will use that wording. I will also ask the receiving person to repeat the task status so that a brief acknowledgement is not mistaken for agreement to continue.
- 16 **Malik:** That is ⁸ _____. Check that they understood the affected task and the restart condition. A quick response such as noted is not always enough to show that shared understanding.
- 17 **Dana:** Once the equipment team has assessed the patch, I will wait for the designated supervisor's decision rather than infer permission from people returning to the area.
- 18 **Malik:** Correct. The ⁹ _____ informs the decision, but it is not an unspoken release. Any authorized change must be communicated explicitly through the local process.
- 19 **Dana:** For now, the affected task remains stopped. The substance and source are unconfirmed, assessment is pending, and nobody has communicated restart authorization.
- 20 **Malik:** That is the correct ¹⁰ _____. I will coordinate the assessment and keep the relevant teams informed. Do not substitute the turnaround target for the required decision.

ANSWERS / EXPLANATIONS: PAGE 77

1. hazard report | 2. direct observation | 3. Schedule pressure | 4. restart authorization | 5. unidentified substance | 6. situational awareness | 7. authority gradient | 8. closed-loop communication | 9. qualified assessment | 10. hold point

Report the condition, not a guessed fault

F Say it

At Stand 9, a worker observes an unidentified patch at 07:20 local. The affected task is stopped under the local process. Assessment and restart authorization are pending.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

07:20 / authorization / 9 / unidentified

Worker: "The observation was at Stand ¹ _____."

Supervisor: "The time was ² _____ local."

Worker: "The substance remains ³ _____."

Supervisor: "The task remains stopped pending the required restart
⁴ _____."

ANSWERS / EXPLANATIONS: PAGE 77

1. 9 | 2. 07:20 | 3. unidentified | 4. authorization

Rehearse with a fixed script

1. Check your answers, then read turns 1-10 with a partner using the corrected words.
2. Switch roles for turns 11-20. Stress words that distinguish facts from conditions or estimates.
3. Complete and check the four-line exchange. Read it twice, switching roles and keeping the printed facts.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

A provisional plan was labeled confirmed

A Read the situation

Give a timestamped operations summary that preserves separate aircraft and crew statuses.

At 10:10 UTC, a coordination snapshot for fictional Flight EL204 lists fleet aircraft A12 as provisional. Crew control has not confirmed the assigned crew's status. The planning target is an 11:00 UTC off-block time, not a cleared departure. Planner Nina finds a draft message calling the aircraft, crew, and departure confirmed. Operations coordinator Joel will seek aircraft confirmation, while crew controller Sara owns the crew-status check. Both will provide their next status at 10:25 UTC. These are two tracked planning items, not an exhaustive release checklist; all other approved operating processes still apply.

PEOPLE / Nina: Operations planner | Joel: Operations coordinator

ONE LABEL CANNOT DESCRIBE SEVERAL DEPENDENCIES

A plan can look complete because every field contains text. Separate the status of each dependency before using an overall label. A colleague who asks for the source and timestamp is checking the meaning of confirmed, not refusing to cooperate with the plan.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What is the aircraft assignment's status at 10:10 UTC?

- | | |
|----------------------|---------------------------------|
| A Provisional | B Finally confirmed |
| C Canceled | D Irrelevant to planning |

2. What does 11:00 UTC represent?

- | | |
|--------------------------------------|---|
| A The next crew-status update | B A planning target for off-block time |
| C An authorized departure | D A completed takeoff |

3. Who owns the crew-status check?

- | | |
|--|---------------------------------|
| A The aircraft's fleet identifier | B Sara in crew control |
| C Every passenger | D Nina's automated draft |

Answers and explanations: page 78.

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

operations control center (OCC)

The unit coordinating an airline's operational activity.

IN USE contact the operations control center

operational control

Responsibility for decisions about initiating, conducting, or ending a flight under applicable rules.

IN USE distinguish operational control

dispatch coordination

Communication among the relevant flight-planning and operating functions.

IN USE coordinate with dispatch

aircraft assignment

Allocation of a particular aircraft to an operation.

IN USE verify the aircraft assignment

fleet identifier

An internal label identifying an aircraft in the fleet.

IN USE confirm the fleet identifier

provisional plan

A proposed arrangement that remains subject to confirmation.

IN USE label a provisional plan

crew control

The function coordinating crew assignments and related status.

IN USE contact crew control

crew status

The verified position of the relevant crew requirements or assignment.

IN USE confirm crew status

crew roster

The schedule of assigned crew duties.

IN USE check the crew roster

duty period

A defined period of crew duty under applicable rules.

IN USE verify the duty period

qualification

A required credential or demonstrated competence for a role.

IN USE verify crew qualifications

positioning

Moving crew or aircraft to a required location.

IN USE coordinate crew positioning

Precision check

Aircraft A12 is provisional, crew status is unconfirmed, and 11:00 UTC is a planning target. Keep all three qualifiers in a short update. Replacing them with confirmed changes the operational meaning of the message.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

off-block time

The time an aircraft leaves its parking position.

IN USE distinguish off-block time

estimated off-block time (EOBT)

The estimated time the aircraft will leave its parking position.

IN USE update the estimated off-block time

target time

A planning objective rather than proof of completion or clearance.

IN USE label the target time

UTC

Coordinated Universal Time, a common aviation time reference.

IN USE state times in UTC

timestamp

A recorded time attached to information or an event.

IN USE preserve the timestamp

status snapshot

A report of known conditions at a particular time.

IN USE issue a status snapshot

dependency

A condition or input on which a later action relies.

IN USE track an unresolved dependency

operating restriction

A limitation applying to an operation.

IN USE communicate operating restrictions

flight release

The applicable authorized release documentation or decision for an operation.

IN USE verify flight release status

contingency aircraft

An alternative aircraft considered if the original plan cannot proceed.

IN USE assess a contingency aircraft

confirmation source

The responsible origin of a verified status.

IN USE identify the confirmation source

planning assumption

A condition treated as a basis for a plan but not yet established.

IN USE expose a planning assumption

Precision check

The 10:25 UTC check-in is a time for new status information, not a guarantee that both items will be resolved. Aircraft and crew confirmation are not presented as the complete set of conditions for an actual flight release.

Phrases you can actually use

C Notice the language / 1 of 2

GIVE THE TIME BASIS

"This is the status as of 10:10 UTC."

LABEL THE CREW ITEM

"Crew confirmation is still pending."

DESCRIBE THE TARGET

"The planning target is 11:00 UTC off-block."

NAME THE AIRCRAFT OWNER

"Joel is checking the aircraft assignment."

LABEL THE AIRCRAFT

"A12 remains provisionally assigned."

CORRECT THE DRAFT

"Confirmed is not supported by this snapshot."

AVOID RELEASE LANGUAGE

"That target is not a departure clearance."

NAME THE CREW OWNER

"Sara in crew control owns the crew-status check."

Provisional

A proposed assignment, not a completed commitment.

As of

Limits the statement to the recorded information time.

Target

Names an objective, not clearance or actual movement.

Phrases you can actually use

C Notice the language / 2 of 2

GIVE THE NEXT CHECK-IN

"Both owners will update at 10:25 UTC."

PRESERVE THE SOURCE

"Please include who confirmed each status."

SEPARATE DEPENDENCIES

"Aircraft confirmation does not confirm the crew."

ASK FOR A READBACK

"Please repeat the target and the two current statuses."

KEEP RESOLUTION UNCERTAIN

"The next update may still show an unresolved item."

AVOID A STALE MESSAGE

"Replace the earlier draft with the timestamped correction."

KEEP OTHER REQUIREMENTS VISIBLE

"All other approved operating processes still apply."

CLOSE THE COORDINATION

"We will revise the plan when verified information changes."

UTC

Keep the time basis explicit; do not silently mix local times.

Pending

Makes an unresolved item visible.

Confirmed by

Identifies the responsible source behind a status claim.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which short update is accurate?

- A** The aircraft has already taken off.
- B** All release requirements are satisfied because a target exists.
- C** At 10:10 UTC, A12 is provisional, crew is pending, and 11:00 is the off-block target.
- D** Aircraft, crew, and departure are confirmed.

2. What does aircraft confirmation alone establish?

- A** The aircraft assignment's status, not crew confirmation
- B** Every operating requirement
- C** The actual off-block time
- D** That crew-control review is unnecessary

3. Which phrase should not be used for the 11:00 target?

- A** Cleared departure
- B** Planning target
- C** Proposed off-block time
- D** Subject to the required operating decisions

4. What should happen at 10:25 if crew status remains unresolved?

- A** Change it to confirmed to avoid another update.
- B** Delete the item from the message.
- C** Claim every check failed.
- D** Report it as pending with the current timestamp and owner.

Answers and explanations: page 78.

A provisional plan was labeled confirmed

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

Crew control / dependency / timestamp / aircraft assignment / status snapshot / target time / confirmation source / UTC / flight release / crew status

- 01 **Nina:** The draft says aircraft, crew, and departure confirmed. That does not match the ten-ten UTC snapshot. Can we check each item before the message goes out?
- 02 **Joel:** Yes. The ¹ _____ for A12 is still provisional. I am checking it, but I have not received the confirmation needed to change that status.
- 03 **Nina:** The crew field names a team, which may be why the draft looked complete. Does a name in that field mean crew control has confirmed the status?
- 04 **Joel:** No. ² _____ has not confirmed it. Sara owns that check. We should show the unresolved status rather than infer readiness from an assigned name.
- 05 **Nina:** Then the eleven-hundred time also needs a qualifier. Is it our planned off-block time, or has someone authorized a departure at that time?
- 06 **Joel:** It is a ³ _____ for off-block at eleven hundred UTC. It is not a departure clearance. The draft has combined a planning objective with two unfinished confirmations.
- 07 **Nina:** I will keep all three distinctions visible. A shorter update must not remove information that changes its meaning.
- 08 **Joel:** Include the ⁴ _____ of ten-ten UTC. These statuses may change, and recipients need to know which snapshot they are reading rather than treating every copied message as current.
- 09 **Nina:** Name who is checking each item, or teams may assume someone else will resolve it and send the update.
- 10 **Joel:** I own the aircraft check; Sara owns ⁵ _____. Both of us will provide a status at ten twenty-five UTC. That is the next check-in, not a promise that both items will be resolved.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 19.

- 11 **Nina:** Suppose you confirm A12 at ten twenty, but Sara is still waiting at ten twenty-five. We should report one confirmed item and one pending item, correct?
- 12 **Joel:** Correct. Each ⁶ _____ retains its own status. Do not upgrade the whole plan to confirmed because one favorable answer arrives, or leave the earlier provisional aircraft label unchanged after verification.
- 13 **Nina:** What should we say about release requirements beyond these two items? I do not want readers to treat our brief planning update as the complete operating checklist.
- 14 **Joel:** State that the applicable ⁷ _____ process and all other required checks still apply. This message tracks aircraft and crew coordination; it does not replace authorized operational decisions or approved manuals.
- 15 **Nina:** I will withdraw the old draft so colleagues do not continue forwarding the unsupported confirmation.
- 16 **Joel:** Identify the ⁸ _____ for each later update. If someone asks why a status changed, we should be able to point to verified information rather than a wording preference.
- 17 **Nina:** There is one more risk: a local station might read eleven hundred on its own clock. Every time in this exchange should retain the same reference.
- 18 **Joel:** Use ⁹ _____ throughout. Do not silently translate a number while keeping its original label. The recipient should see the same time basis for the snapshot, target, and next check-in.
- 19 **Nina:** The revised message reads: as of ten-ten UTC, A12 provisional, crew confirmation pending, target off-block eleven hundred UTC, next owner updates at ten twenty-five UTC.
- 20 **Joel:** That is a clear ¹⁰ _____. Send it as the correction, keep the separate owners visible, and revise it when verified information changes. The overall release boundary remains unchanged.

ANSWERS / EXPLANATIONS: PAGE 79

1. aircraft assignment | 2. Crew control | 3. target time | 4. timestamp | 5. crew status | 6. dependency | 7. flight release | 8. confirmation source | 9. UTC | 10. status snapshot

Keep the planning labels attached

F Say it

At 12:05 UTC, aircraft B7 is provisional and crew confirmation is pending. Target off-block is 13:00 UTC. The next coordination update is 12:20 UTC; no release is established.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

pending / provisional / 12:20 / target

Planner: "B7 is still ¹ _____."

Coordinator: "Crew confirmation remains ² _____."

Planner: "Thirteen hundred is the off-block ³ _____."

Coordinator: "The next update is at ⁴ _____ UTC."

ANSWERS / EXPLANATIONS: PAGE 79

1. provisional | 2. pending | 3. target | 4. 12:20

Rehearse with a fixed script

1. Check your answers, then read turns 1-10 with a partner using the corrected words.
2. Switch roles for turns 11-20. Stress words that distinguish facts from conditions or estimates.
3. Complete and check the four-line exchange. Read it twice, switching roles and keeping the printed facts.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

A deferral note is missing its basis and status

A Read the situation

Request the correct maintenance references and distinguish a proposed deferral from an authorized decision.

Coordinator Priya receives a note for fictional defect record D17 reading, "Deferred; okay to operate." It gives no approved operator MEL item reference, document revision, applicable conditions, or authorized decision record. Maintenance controller Tomas confirms that D17 is still under review and that no deferral authorization is recorded. D17 is an internal defect identifier, not an MEL reference. The coordinator must correct the status message, request the relevant controlled records through maintenance control, and preserve the unresolved status. The exercise does not specify an aircraft fault or determine whether any item is eligible for deferral.

PEOPLE / Priya: Maintenance coordinator | Tomas: Maintenance controller

A FAMILIAR LABEL IS NOT SUPPORTING EVIDENCE

Colleagues may use deferred casually to mean that someone intends to review an item later. In maintenance communication, status and authority must remain explicit. Request the actual controlled reference without treating the request for evidence as a personal accusation.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What is the verified status of D17?

- | | |
|---|---|
| A Authorized for indefinite operation | B Repaired and closed |
| C Approved solely because the note says deferred | D Under review with no deferral authorization recorded |

2. What is D17?

- | | |
|--|--|
| A A universal repair interval | B An aircraft operating clearance |
| C An internal defect identifier | D A verified MEL item reference |

3. Can the learner determine deferral eligibility from this case?

- | | |
|--|---|
| A No; the fault and applicable technical conditions are not supplied. | B Yes; every defect can be deferred. |
| C Yes; any coordinator may approve it. | D Yes; a short note replaces the approved documents. |

Answers and explanations: page 80.

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

minimum equipment list (MEL)

An operator-specific approved basis for limited operation with specified inoperative items, subject to conditions.

IN USE consult the approved MEL

master minimum equipment list (MMEL)

An aircraft-type baseline used in developing an operator's MEL.

IN USE distinguish the MMEL

deferral

Authorized postponement of rectification under applicable conditions.

IN USE verify a maintenance deferral

proposed deferral

A suggested postponement not yet established as authorized.

IN USE label a proposed deferral

defect record

Documentation identifying a reported equipment problem.

IN USE trace the defect record

defect identifier

The internal code assigned to a reported problem.

IN USE confirm the defect identifier

Precision check

D17 identifies the internal defect; it does not identify an approved MEL item. An MMEL is not interchangeable with an operator's approved MEL. A copied heading or familiar acronym cannot supply missing applicability or authorization.

item reference

The precise document entry relevant to the matter.

IN USE verify the item reference

document revision

An identified version of a controlled document.

IN USE check the document revision

applicability

Whether a document or condition governs the particular case.

IN USE verify applicability

proviso

A specified condition attached to permission or relief.

IN USE read the applicable proviso

operating limitation

A boundary governing permitted operation.

IN USE preserve operating limitations

repair interval

The applicable time window for rectification.

IN USE verify the repair interval

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

rectification

Action that corrects the reported defect.

IN USE record rectification

inoperative

Not functioning as required for the relevant purpose.

IN USE describe an inoperative item

maintenance procedure

A specified technical maintenance action or sequence.

IN USE refer to the maintenance procedure

operational procedure

A specified operating action or sequence.

IN USE refer to the operational procedure

placard

A required notice or label communicating equipment status.

IN USE verify placard requirements

technical log

The controlled record of aircraft defects and maintenance status.

IN USE reconcile the technical log

maintenance control

The function coordinating maintenance status and related decisions.

IN USE contact maintenance control

authorized sign-off

A recorded decision or certification by an appropriately authorized person.

IN USE verify authorized sign-off

airworthiness

The status of conformity and condition required for safe operation under applicable rules.

IN USE avoid assuming airworthiness

configuration deviation list (CDL)

Approved conditions for operation with specified external parts missing.

IN USE distinguish the CDL

nonessential equipment and furnishings (NEF)

A defined category managed under the applicable approved program.

IN USE verify NEF applicability

release statement

A communication of the relevant authorized operational or maintenance release status.

IN USE verify the release statement

Precision check

Under review, proposed for deferral, authorized deferral, and repaired describe different statuses. Do not infer an interval, condition, or release from this language exercise. Qualified personnel must apply the actual approved documents and operating requirements.

Phrases you can actually use

C Notice the language / 1 of 2

03

QUOTE THE UNSUPPORTED STATUS

"The note says deferred, but the authorization is not recorded."

IDENTIFY THE CASE

"I am checking defect record D17."

SEPARATE IDENTIFIERS

"D17 is our defect identifier, not the MEL item reference."

REQUEST THE SOURCE

"Please provide the applicable controlled reference."

CHECK THE VERSION

"Which approved document revision applies?"

PRESERVE CONDITIONS

"The status must include the applicable conditions."

AVOID A GUESSED INTERVAL

"I cannot infer a repair interval from this note."

NAME THE PENDING STEP

"Maintenance control is still reviewing the item."

Deferred

Use only with its actual status and applicable authority.

Proposed

Signals a request awaiting the relevant decision.

Reference

Must identify the governing entry, not merely an internal ticket.

Phrases you can actually use

C Notice the language / 2 of 2

03

CORRECT THE DISTRIBUTION

"Please replace the unsupported okay-to-operate message."

SEPARATE REPAIR

"An authorized deferral would not mean the defect is repaired."

ASK FOR THE DECISION RECORD

"Who authorized the status, and where is it recorded?"

AVOID TECHNICAL IMPROVISATION

"Use the actual approved procedures and qualified personnel."

KEEP THE ROLE BOUNDARY

"I am requesting clarification, not authorizing a deferral."

SEPARATE DOCUMENT TYPES

"The MMEL is not the operator's approved MEL."

KEEP UNCERTAINTY VISIBLE

"No deferral authorization is recorded at present."

CLOSE THE HANDOVER

"Confirm the corrected status in the relevant controlled record."

Revision

Affects which controlled wording applies.

Okay to operate

Too broad without the actual authorized operational basis.

Rectified

Means corrected, not merely postponed under conditions.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which correction fits the verified information?

- A** D17 remains under review; no deferral authorization is recorded.
- B** D17 is approved for unlimited operation.
- C** D17 is repaired because someone proposed a deferral.
- D** The aircraft is released solely by this coordination note.

2. Which pair must not be treated as interchangeable?

- A** A stated timestamp and the same timestamp
- B** The name D17 and the exact identifier D17
- C** Internal defect identifier and approved MEL item reference
- D** A reported code and its exact copied spelling

3. Which request stays within Priya's coordination role?

- A** Ignore maintenance control if the schedule is tight.
- B** Please supply the applicable reference, revision, conditions, and authorized status record.
- C** I approve any deferral without checking.
- D** Use whatever interval sounds familiar.

4. What would an authorized deferral establish, in general?

- A** Permanent freedom from operating rules
- B** Proof that every equipment item works
- C** Permission for any unrelated defect
- D** Conditional postponement under the applicable basis, not completed repair

Answers and explanations: [page 80](#).

A deferral note is missing its basis and status

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

Rectification / maintenance control / under review / repair interval / item reference / authorized sign-off / document revision / defect identifier / MMEL / proposed deferral

- 01 **Priya:** The note for D17 says deferred and okay to operate. I cannot find the supporting reference or decision record. What is the verified status?
- 02 **Tomas:** It is still ¹ _____. No deferral authorization is recorded. Please do not repeat the okay-to-operate statement while I clarify the record through maintenance control.
- 03 **Priya:** I will correct the coordination message. The defect number is clear, but I need to avoid presenting that number as the reference for an approved exception.
- 04 **Tomas:** Exactly. D17 is the ² _____. It tracks our reported item. It does not identify an entry in the operator's approved minimum equipment list or establish that one applies.
- 05 **Priya:** The colleague who sent the note may have meant that a deferral was being considered. Should the corrected wording preserve that distinction rather than call it approved?
- 06 **Tomas:** Yes. A ³ _____ is not an authorized decision. We should use the current verified status and request the actual basis, rather than infer approval from informal shorthand.
- 07 **Priya:** What information should I request without implying that I can decide the technical question or complete the maintenance review myself?
- 08 **Tomas:** Request the applicable ⁴ _____, document revision, relevant conditions, and recorded authorized status. Those details come through the qualified process. This message does not replace the actual technical records.
- 09 **Priya:** I found a master list title in an older email. Can I attach that as the operator's MEL reference, or would that create another ambiguity?
- 10 **Tomas:** Do not substitute the ⁵ _____ for the operator's approved MEL. The document type, revision, and applicability matter. An older title alone cannot settle which controlled requirements govern this item.

The conversation, continued

E Conversations / turns 11-20

03

Continue with the word bank on page 28.

- 11 **Priya:** Understood. I also will not add a repair deadline from memory. Nothing in the note tells me which interval applies or when its clock would begin.
- 12 **Tomas:** Correct. The ⁶ _____ must be verified in the applicable record. A familiar interval from another case is not a safe substitute for the conditions governing this one.
- 13 **Priya:** If a deferral is eventually authorized, our update should still not say repaired. The defect and its treatment would remain different parts of the record.
- 14 **Tomas:** Right. ⁷ _____ means the defect has been corrected. Deferral concerns permitted postponement under conditions. Keep that distinction visible to everyone who receives the status.
- 15 **Priya:** Who should the next update come from? I want the receiving team to see a verified source rather than another copied sentence without ownership.
- 16 **Tomas:** Use ⁸ _____ as the coordination contact here. We will identify the relevant decision record when available. Do not turn a request for that record into a release statement.
- 17 **Priya:** I will withdraw the unsupported message and replace it with D17 under review, authorization not recorded. The request for the controlled reference will remain open.
- 18 **Tomas:** Include the ⁹ _____ when the reference is verified. That lets the receiving team distinguish the current basis from an old email or an unrelated record.
- 19 **Priya:** For now, I am communicating the uncertainty and asking for evidence. I am not deciding whether the defect is eligible for deferral or whether the aircraft may operate.
- 20 **Tomas:** Correct. The ¹⁰ _____ remains a separate requirement in the actual process. Keep the status accurate, preserve the record, and leave technical eligibility and release decisions to authorized personnel.

ANSWERS / EXPLANATIONS: PAGE 81

1. under review | 2. defect identifier | 3. proposed deferral | 4. item reference | 5. MMEL | 6. repair interval | 7. Rectification | 8. maintenance control | 9. document revision | 10. authorized sign-off

A ticket number is not approval

F Say it

Internal defect Q8 is described as deferred in an email. Maintenance control verifies that review is pending and no authorization is recorded. The approved item reference and revision are missing.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

authorization / identifier / revision / review

Coordinator: "Q8 is the internal defect ¹ _____."

Controller: "The verified status is under ² _____."

Coordinator: "The controlled document ³ _____ is still missing."

Controller: "The email does not establish deferral ⁴ _____."

ANSWERS / EXPLANATIONS: PAGE 81

1. identifier | 2. review | 3. revision | 4. authorization

Rehearse with a fixed script

1. Check your answers, then read turns 1-10 with a partner using the corrected words.
2. Switch roles for turns 11-20. Stress words that distinguish facts from conditions or estimates.
3. Complete and check the four-line exchange. Read it twice, switching roles and keeping the printed facts.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

Passengers have heard two different departure times

A Read the situation

Correct conflicting information, separate update and departure times, and offer a verified assistance route.

At 14:40 local time, passengers for fictional Flight EL618 have heard an earlier 14:30 departure message and seen 15:00 on a display. The latest verified operations message says the departure estimate is not confirmed; its cause has not been authorized for public explanation. Gate supervisor Lena will provide the next passenger update at 15:10 local, even if no new estimate is available. Agent Omar must correct both unsupported times and keep channels consistent. The service desk can review individual connection and rebooking questions, but no replacement seat, refund, or compensation is guaranteed by the supplied facts.

PEOPLE / Omar: Gate agent | Ms Bell: Delayed passenger

CONSISTENCY IS MORE HELPFUL THAN REPEATED OPTIMISM

Passengers make onward plans from the words and times they hear. Acknowledge conflicting messages directly instead of defending each channel. One reliable status, a named update time, and a practical assistance route give the passenger something usable without a new unsupported promise.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What is the latest verified departure estimate?

- | | |
|--|----------------------|
| A 15:00 local | B 15:10 local |
| C No departure estimate is confirmed. | D 14:30 local |

2. What will happen at 15:10 local?

- | | |
|---|--|
| A Automatic rebooking of every passenger | B Guaranteed arrival at the destination |
| C The next passenger status update | D Guaranteed departure |

3. What can the service desk do on the supplied facts?

- | | |
|---|---|
| A Promise every passenger compensation | B Override the operational decision |
| C Review individual connection and rebooking questions | D Guarantee a replacement seat immediately |

Answers and explanations: page 82.

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

irregular operations (IROPS)

Disruptions affecting the normal airline schedule or service.

IN USE manage irregular operations

departure estimate

The current expected departure time, subject to its stated status.

IN USE verify a departure estimate

delay announcement

A passenger message explaining a service delay.

IN USE issue a delay announcement

flight information display

A screen showing flight and gate information.

IN USE correct the flight information display

gate supervisor

The person coordinating the gate team's activity.

IN USE contact the gate supervisor

passenger update

A communication of the latest verified passenger-facing status.

IN USE schedule a passenger update

onward connection

A later service a traveler plans to take.

IN USE review an onward connection

connection risk

The possibility that a traveler will miss a later service.

IN USE explain connection risk

rebooking option

A possible alternative reservation subject to confirmation.

IN USE check rebooking options

seat availability

Whether a place can be confirmed on the relevant service.

IN USE verify seat availability

standby

A waiting status without a confirmed seat on the relevant flight.

IN USE distinguish standby status

confirmed reservation

A booking accepted for the specified service under its terms.

IN USE verify a confirmed reservation

Precision check

Neither 14:30 nor 15:00 is supported by the latest verified update. The 15:10 time concerns a new communication, not departure. State the local time basis and correct the conflicting channels without inventing a cause.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

itinerary change

An alteration to the planned travel sequence.

IN USE explain an itinerary change

service desk

The point handling individual travel assistance requests.

IN USE direct to the service desk

travel document

A document relevant to a passenger's journey or eligibility.

IN USE check required travel documents

baggage routing

The planned handling path for checked bags.

IN USE verify baggage routing

assistance request

A request for help with a particular passenger need.

IN USE record an assistance request

accessibility assistance

Support enabling a passenger with an access need to use the service.

IN USE coordinate accessibility assistance

meal voucher

A document authorizing specified food or drink support.

IN USE explain a meal voucher

refund

Money returned under the applicable terms or rules.

IN USE verify refund status

compensation

A payment or remedy under the relevant policy or legal basis.

IN USE distinguish compensation

authorized explanation

Information approved for the relevant public communication.

IN USE use the authorized explanation

channel consistency

Agreement among the current messages provided through different routes.

IN USE maintain channel consistency

superseded message

An earlier message replaced by newer verified information.

IN USE identify a superseded message

Precision check

A possible rebooking route is not a confirmed replacement seat. Refunds, compensation, and assistance may follow different terms and requirements. This case establishes a review route only, not the passenger's legal entitlement or a particular approved remedy.

Phrases you can actually use

C Notice the language / 1 of 2

ACKNOWLEDGE THE CONFLICT

"You have received two different times, and I am sorry for the confusion."

CORRECT THE EARLIER ANNOUNCEMENT

"The earlier 14:30 message is no longer reliable."

GIVE THE NEXT UPDATE

"We will update you at 15:10 local time."

KEEP THE CAUSE BOUNDED

"I do not have an authorized explanation to share yet."

STATE THE LATEST POSITION

"We do not have a confirmed departure estimate."

CORRECT THE DISPLAY

"The 15:00 display does not reflect a confirmed estimate."

SEPARATE UPDATE FROM DEPARTURE

"That time is for information, not a promised departure."

AVOID INVENTED REASSURANCE

"I cannot guarantee that you will make the connection."

Estimate

A forecast, not an actual departure or a guarantee.

Latest verified

Names the information basis that supersedes earlier conflicting messages.

Update at

Attach the time to communication so its purpose remains clear.

Phrases you can actually use

C Notice the language / 2 of 2

OFFER PRACTICAL ASSISTANCE

"The service desk can review your individual itinerary."

PROTECT PRIVATE DETAILS

"Let us discuss your booking details at the service desk."

KEEP REMEDIES ACCURATE

"I cannot confirm a refund or compensation from this update."

PROMISE COMMUNICATION

"You will receive an update even if the estimate remains unconfirmed."

SEPARATE AN OPTION FROM A SEAT

"A rebooking option still needs confirmation."

ASK ABOUT A SPECIFIC NEED

"Do you need assistance while we review the options?"

MAINTAIN ALL CHANNELS

"We are correcting the display and the gate message."

CLOSE WITH THE USABLE FACTS

"No confirmed departure estimate; next update at 15:10 local."

Can review

Offers an assessment, not an automatic favorable result.

Confirmed seat

Different from standby or a proposed itinerary.

Cause unknown to the speaker

Do not fill the gap with a plausible operational story.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which announcement is accurate?

- A** Departure is guaranteed at 15:10.
- B** The display proves that 15:00 is final.
- C** Every connection will be protected automatically.
- D** There is no confirmed departure estimate; the next update is at 15:10 local.

2. Which response handles an onward connection appropriately?

- A** A possible seat means you are already rebooked.
- B** Your connection does not matter.
- C** The service desk can review your itinerary and available options.
- D** I guarantee you will make it.

3. What should happen to the conflicting channels?

- A** Add a third guessed departure time.
- B** Treat the oldest message as permanently authoritative.
- C** Correct them to the latest verified status.
- D** Leave both and ask passengers to choose.

4. Which statement about the delay's cause is appropriate?

- A** It is definitely the crew, although I have no verified information.
- B** It is definitely maintenance because that sounds plausible.
- C** No explanation will ever be provided.
- D** I do not have an authorized explanation to share yet.

Answers and explanations: [page 82](#).

Passengers have heard two different departure times

E Conversations / turns 1-10

04

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

compensation / channel consistency / baggage routing / Seat availability / conflicting messages / onward connection / flight information display / departure estimate / passenger update / authorized explanation

- 01 **Ms Bell:** We were told fourteen thirty, but the screen says fifteen hundred. It is already fourteen forty. Which time should I use for my connection plans?
- 02 **Omar:** I am sorry for those ¹ _____. The latest verified information is that we do not have a confirmed departure estimate. I should not ask you to rely on either displayed time.
- 03 **Ms Bell:** The screen looks official, so I assumed fifteen hundred was firm. Does it need correcting?
- 04 **Omar:** Yes. The ² _____ does not currently reflect a confirmed estimate. We are aligning it with the gate message so you do not have to choose between inconsistent sources.
- 05 **Ms Bell:** Does anyone know why the flight is delayed? Other passengers are saying it is a crew problem, but somebody else mentioned maintenance.
- 06 **Omar:** I do not have an ³ _____ to share about the cause yet. I will not repeat speculation about crew or maintenance as fact. I can give you the verified current status.
- 07 **Ms Bell:** When will we hear something again? We keep watching the display and asking, but the answers change.
- 08 **Omar:** Our gate supervisor, Lena, will give the next ⁴ _____ at fifteen ten local time. That commitment applies even if there is no new departure estimate, so you will not be left interpreting silence.
- 09 **Ms Bell:** Just to check, fifteen ten is when you will speak to us, not when you now expect the aircraft to leave?
- 10 **Omar:** Correct. It is not a ⁵ _____. I cannot promise a departure time at present. We will clearly label any verified estimate if operations supplies one later.

The conversation, continued

E Conversations / turns 11-20

04

Continue with the word bank on page 37.

- 11 **Ms Bell:** My onward flight leaves this evening. Can you guarantee that I will still make it, or put me on another service now?
- 12 **Omar:** I cannot guarantee the ⁶ _____ from this information. The service desk can review your itinerary and the available options. A proposed replacement would still need its own confirmation.
- 13 **Ms Bell:** I saw another flight online with seats showing. Does that mean I can go directly to its gate and assume my booking has transferred?
- 14 **Omar:** No. ⁷ _____ on another service does not mean your reservation has changed. Please use the service desk so the actual booking and any related requirements can be checked.
- 15 **Ms Bell:** I also checked a bag. I do not want to agree to a different itinerary without understanding whether the bag arrangement changes.
- 16 **Omar:** Ask the desk to verify ⁸ _____ as part of that review. I cannot promise the bag's route from this gate update, but it is a relevant question for the individual arrangement.
- 17 **Ms Bell:** All right. Can the desk also explain whether any refund or compensation applies? I am not asking you to decide that without the details.
- 18 **Omar:** Yes, ask them to review the applicable basis. This update does not confirm ⁹ _____ or a refund. I should distinguish that financial review from the current flight status and possible rebooking options.
- 19 **Ms Bell:** I will take the booking details to the desk. Please make sure the next announcement is clear enough that nobody hears another update time as a departure.
- 20 **Omar:** We will maintain ¹⁰ _____. The usable facts now are no confirmed departure estimate and a passenger update at fifteen ten local. I am sorry for the earlier confusion.

ANSWERS / EXPLANATIONS: PAGE 83

1. conflicting messages | 2. flight information display | 3. authorized explanation | 4. passenger update | 5. departure estimate | 6. onward connection | 7. Seat availability | 8. baggage routing | 9. compensation | 10. channel consistency

Correct the time without inventing a new one

F Say it

At 16:20 local, a display says 16:30 departure, but operations has no confirmed estimate. The gate promises an update at 16:45. The service desk can review individual itineraries.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

update / itinerary / desk / departure estimate

Passenger: "Is 16:30 a confirmed ¹ _____?"

Agent: "No; our next information ² _____ is at 16:45."

Passenger: "Where can I review my individual ³ _____?"

Agent: "Please speak with the service ⁴ _____."

ANSWERS / EXPLANATIONS: PAGE 83

1. departure estimate | 2. update | 3. itinerary | 4. desk

Rehearse with a fixed script

1. Check your answers, then read turns 1-10 with a partner using the corrected words.
2. Switch roles for turns 11-20. Stress words that distinguish facts from conditions or estimates.
3. Complete and check the four-line exchange. Read it twice, switching roles and keeping the printed facts.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

A handover was sent, but nobody accepted it

A Read the situation

05

Confirm task ownership and report a catering balance without confusing arrival, receipt, and completion.

At 13:20 UTC, a fictional turnaround requires 96 catering packs. The receiving record confirms 80 packs, leaving 16 outstanding. A supplier truck has arrived with a note claiming the remaining 16, but receipt and count are not yet verified. The outgoing ground team sent a handover without obtaining a named receiving person's acceptance. Coordinator Hassan contacts incoming lead Elin. She can accept responsibility for verifying the balance and reporting status at 13:35 UTC; acceptance does not itself complete the delivery. The 13:45 UTC off-block target remains a planning target. Other required turnaround and release processes are outside this short coordination case.

PEOPLE / Hassan: Turnaround coordinator | Elin: Incoming ground-services lead

OWNERSHIP NEEDS AN ANSWER

A sent message can create an illusion that responsibility has transferred. Ask the receiving colleague to confirm the task, current balance, and next report. This check is especially valuable when shifts overlap briefly and everyone is working toward the same time target.

Briefing checks

Circle one answer in each item. Use the briefing.

1. How many packs remain unverified in the receiving balance?

- | | |
|--------------|-------------|
| A 176 | B 16 |
| C 80 | D 96 |

2. What does the truck's arrival establish?

- | | |
|-------------------------------------|---|
| A All packs are received. | B Every turnaround task is complete. |
| C The aircraft has departed. | D The truck is present, not that receipt and count are verified. |

3. What does Elin's acceptance establish?

- | | |
|---------------------------------------|--|
| A A guaranteed 13:45 departure | B Ownership of the verification and status task |
| C Completed delivery | D Final flight release |

Answers and explanations: [page 84](#).

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

turnaround

The ground-service period between an aircraft's arrival and next departure.

IN USE coordinate the turnaround

ground handler

A person or organization providing aircraft ground services.

IN USE contact the ground handler

service handover

Transfer of a service task and its current information.

IN USE complete a service handover

receiving lead

The person accepting responsibility at the receiving end.

IN USE name the receiving lead

catering uplift

Food and service supplies provided for a flight.

IN USE verify the catering uplift

catering pack

A counted package of catering supplies in the stated case.

IN USE reconcile catering packs

required quantity

The amount specified as needed.

IN USE confirm the required quantity

confirmed receipt

Recorded verification that specified goods were received.

IN USE record confirmed receipt

outstanding balance

The amount still needed after verified receipt.

IN USE calculate the outstanding balance

delivery note

A supplier document describing a delivery.

IN USE check the delivery note

manifest

A list of the goods or people covered by an operation.

IN USE reconcile the manifest

truck arrival

The event of the delivery vehicle reaching the site.

IN USE record truck arrival

Precision check

96 required minus 80 confirmed received leaves 16 outstanding. The supplier note claims those 16 are on the truck; it does not prove they have been counted and accepted. Keep the receiving balance unchanged until verification.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

physical count

A check of the actual quantity present or received.

IN USE verify the physical count

short delivery

Receipt of less than the required quantity.

IN USE report a short delivery

task acceptance

Explicit agreement to take responsibility for an activity.

IN USE confirm task acceptance

task completion

Verified finishing of the specified activity.

IN USE distinguish task completion

milestone

A defined event used to track progress.

IN USE report a turnaround milestone

critical path

The sequence of dependent activities determining the earliest completion.

IN USE identify the critical path

service dependency

A required service relationship affecting later work.

IN USE track a service dependency

target off-block time

A planning target for leaving the parking position.

IN USE protect the target off-block time

readiness status

The verified position of preparation for the next step.

IN USE report readiness status

handover gap

Missing information or acceptance during a transfer.

IN USE close the handover gap

exception report

A message identifying a departure from the planned condition.

IN USE issue an exception report

delay attribution

Assigning a cause or category to a delay using the applicable evidence.

IN USE verify delay attribution

Precision check

Elin accepts the verification task and the 13:35 status report, not a promise of completed delivery by then. A catering completion would also not establish completion of every other turnaround or release requirement.

Phrases you can actually use

C Notice the language / 1 of 2

STATE THE CURRENT COUNT

"We have 80 confirmed against a requirement of 96."

SEPARATE ARRIVAL

"The truck is here, but receipt is not verified."

IDENTIFY THE HANDOVER GAP

"The earlier message has no named acceptance."

CONFIRM THE SCOPE

"I will verify receipt and count, then report the result."

CALCULATE THE REMAINDER

"Sixteen packs remain outstanding."

ATTRIBUTE THE CLAIM

"The delivery note lists the remaining sixteen."

REQUEST OWNERSHIP

"Can you accept the balance-verification task?"

SET THE REPORT TIME

"Please provide status at 13:35 UTC."

Arrived

Describes vehicle presence, not accepted delivery.

Lists

Attributes a quantity to a document rather than a completed count.

Outstanding

The balance not yet confirmed received.

Phrases you can actually use

C Notice the language / 2 of 2

AVOID A COMPLETION PROMISE

"That is a reporting time, not a guarantee of completion."

KEEP OTHER REQUIREMENTS SEPARATE

"Catering status is not the whole turnaround status."

REPORT AN EXCEPTION

"Any unverified balance remains open."

CLOSE WITH A READBACK

"Ninety-six required, eighty received, sixteen pending verification."

PRESERVE THE PLAN LABEL

"13:45 UTC remains the off-block target."

RECORD ACCEPTANCE

"Elin has accepted responsibility for the check."

AVOID PREMATURE BLAME

"We have not established the cause of the handover gap."

UPDATE FROM EVIDENCE

"Change the receiving balance only after verified receipt."

Accepted the task

Distinguish from accepted the goods.

By 13:35

In this case, the commitment concerns a status report.

Ready

Specify which service or decision the label covers.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which handover is accurate?

- A** Nobody needs to accept a task already emailed.
- B** The flight is released when Elin answers.
- C** Elin owns verification of the remaining 16; status due at 13:35 UTC.
- D** Truck arrived, so all 96 are received.

2. Which statement about the delivery note is accurate?

- A** It automatically completes the receiving record.
- B** It proves every pack meets every requirement.
- C** It authorizes the aircraft to depart.
- D** It claims a quantity that still needs receipt verification.

3. If 12 additional packs are later verified received, what remains outstanding?

- A** 4
- B** 12
- C** 16
- D** 28

4. Which overall conclusion is unsupported even after catering completion?

- A** All flight-release requirements are satisfied.
- B** The catering balance can be updated from verified receipt.
- C** The catering task has reached its recorded completion.
- D** The coordinator can report the verified catering status.

Answers and explanations: [page 84](#).

A handover was sent, but nobody accepted it

E Conversations / turns 1-10

05

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

status report / delivery note / Task completion / service handover / confirmed receipt / outstanding balance / required quantity / task acceptance / handover gap / truck arrival

- 01 **Hassan:** The outgoing team sent the catering handover, but I cannot find a receiving person's acceptance. Before they leave, can we confirm the task and current balance?
- 02 **Elin:** Yes. Give me the ¹ _____ and what has actually been received. I do not want to accept a vague instruction that assumes the delivery is already complete.
- 03 **Hassan:** We require ninety-six packs. The receiving record confirms eighty. A truck is here with a note listing the other sixteen, but that receipt has not been verified.
- 04 **Elin:** Then the ² _____ is sixteen. The truck's presence does not change the confirmed count. I will keep that distinction when I speak to the receiving team.
- 05 **Hassan:** Someone marked the task nearly done after seeing the vehicle. We need a status that different teams will interpret consistently.
- 06 **Elin:** We can say ³ _____ is confirmed while receipt verification remains open. Those are separate milestones. A supplier's arrival is useful information, but it is not the completed receiving step.
- 07 **Hassan:** The supplier note could help the check, provided we do not treat its stated quantity as an independently confirmed count in our own record.
- 08 **Elin:** Correct. I will compare the ⁴ _____ with the receiving information through the approved process. Until that verification is recorded, the current confirmed total remains eighty, not ninety-six.
- 09 **Hassan:** Will you own that verification and the next report? The earlier handover went to a group address without explicit acceptance.
- 10 **Elin:** I accept the ⁵ _____ for checking the remaining sixteen and reporting the result. Please record me as the receiving lead so the next shift knows who has the task.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 46.

05

- 11 **Hassan:** I will record that acceptance now. Our next coordination check is thirteen thirty-five UTC, with thirteen forty-five still the planning target for off-block.
- 12 **Elin:** I will give a ⁶ _____ at thirteen thirty-five UTC. That is a commitment to report the verified position, not a promise that the remaining delivery will be complete by that time.
- 13 **Hassan:** Exactly. If some packs remain unverified, keep the balance visible. We cannot make the record match the plan merely because the target time is approaching.
- 14 **Elin:** I will update ⁷ _____ from evidence. If all sixteen are verified, the balance becomes zero. If fewer are verified, I will state the remaining amount rather than mark the task complete.
- 15 **Hassan:** And we should not use catering complete as shorthand for the entire aircraft being ready. Other teams still have their own required checks and responsibilities.
- 16 **Elin:** Agreed. ⁸ _____ here is limited to the catering activity. I will not use it as a flight-release statement or as proof that unrelated ground-service work has finished.
- 17 **Hassan:** We should review why the earlier handover had no acceptance, using the messages instead of immediately blaming a department.
- 18 **Elin:** Yes. The ⁹ _____ is established, but its cause is not. Preserve the messages and review the process. Solving the current ownership problem does not settle the later causal question.
- 19 **Hassan:** Let me read back the current arrangement: ninety-six required, eighty confirmed received, sixteen pending verification, Elin responsible, and a status report at thirteen thirty-five UTC.
- 20 **Elin:** That captures my ¹⁰ _____. Keep thirteen forty-five labeled as the off-block target. I will report the verified catering balance and any remaining exception at the agreed check-in.

ANSWERS / EXPLANATIONS: PAGE 85

1. required quantity | 2. outstanding balance | 3. truck arrival | 4. delivery note | 5. service handover | 6. status report | 7. confirmed receipt | 8. Task completion | 9. handover gap | 10. task acceptance

A partial receipt leaves a visible balance

F Say it

A service requires 120 packs. The record confirms 100, then verifies 15 more. Lead Jo accepts responsibility for the remaining check and will report at 14:10 UTC.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

5 / 14:10 / 115 / Jo

Coordinator: "The confirmed total is now ¹ _____."

Lead: "The outstanding balance is ² _____."

Coordinator: "The named receiving lead is ³ _____."

Lead: "My status report is due at ⁴ _____ UTC."

ANSWERS / EXPLANATIONS: PAGE 85

1. 115 | 2. 5 | 3. Jo | 4. 14:10

Rehearse with a fixed script

1. Check your answers, then read turns 1-10 with a partner using the corrected words.
2. Switch roles for turns 11-20. Stress words that distinguish facts from conditions or estimates.
3. Complete and check the four-line exchange. Read it twice, switching roles and keeping the printed facts.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

A meeting invitation is not access authorization

A Read the situation

Refuse an access shortcut professionally and offer the approved verification route without implying automatic entry.

06

Visitor Mr Vale arrives late for a meeting in a restricted airport work area. He shows an email invitation but has not completed the fictional site's visitor verification process. He asks employee Anika to admit him using her access and says the host will approve later. Anika is not authorized to bypass verification or provide an unapproved escort. She can keep him at public reception, contact the host through the approved directory, and refer the request to the access desk. Any permitted entry must follow the site's actual authorization and escort requirements. No entry permission is established in this case.

PEOPLE / Anika: Airport employee | Mr Vale: Visitor

A FIRM BOUNDARY CAN INCLUDE PRACTICAL HELP

Urgency, familiarity, and seniority may make a shortcut sound socially reasonable. A professional refusal can acknowledge the late meeting while preserving the access rule. Offer the approved route without accusing the visitor of criminal intent or promising that verification will succeed.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What does the email invitation establish in this case?

- | | |
|--|--|
| A A completed security check | B A claimed meeting arrangement, not completed access authorization |
| C Automatic restricted-area entry | D Permission to borrow employee access |

2. What can Anika do now?

- | | |
|--|--|
| A Approve her own exception. | B Admit the visitor and verify later. |
| C Contact the host through the approved directory and refer to the access desk. | D Lend her access to the visitor. |

3. Where should the visitor remain under the stated process?

- | | |
|--|---|
| A Anywhere an employee's access opens | B An unverified meeting room beyond the boundary |
| C Public reception | D Inside the restricted area |

Answers and explanations: page 86.

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

restricted area

A location where entry requires specified authorization.

IN USE protect a restricted area

access control

Measures determining who may enter or use a location or resource.

IN USE follow access control

access authorization

Permission for a person to enter the specified area.

IN USE verify access authorization

visitor verification

The approved process for checking a visitor's identity and purpose.

IN USE complete visitor verification

identity check

Confirmation that a person is who they claim to be.

IN USE conduct an identity check

visitor badge

A credential issued for an authorized visitor under local rules.

IN USE verify a visitor badge

access credential

A token or document used to demonstrate permitted access.

IN USE protect an access credential

credential sharing

Allowing another person to use an assigned access credential.

IN USE prohibit credential sharing

escort authorization

Permission to accompany a visitor under the site's rules.

IN USE verify escort authorization

approved escort

A person permitted to accompany a visitor under the relevant conditions.

IN USE arrange an approved escort

host confirmation

Verification of the visit through the responsible host.

IN USE request host confirmation

approved directory

A trusted source of official contact information.

IN USE use the approved directory

Precision check

A meeting invitation and host familiarity do not replace the supplied access process. Anika's own credential does not establish permission for the visitor, and her employee status does not establish that she may escort him.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

public reception

A visitor-contact location outside the restricted area.

IN USE wait at public reception

access desk

The function handling access requests and verification.

IN USE contact the access desk

visitor register

The record of visits under the local process.

IN USE update the visitor register

access scope

The areas and conditions covered by a permission.

IN USE confirm access scope

validity period

The time during which a credential or permission applies.

IN USE check the validity period

expired credential

A credential whose permitted period has ended.

IN USE identify an expired credential

access exception

A departure from the normal rule requiring the relevant authority.

IN USE verify an access exception

challenge procedure

The approved response for checking questionable access.

IN USE follow the challenge procedure

security escalation

Referral of an access concern through the security process.

IN USE use security escalation

urgency claim

A statement that time pressure requires immediate action.

IN USE assess an urgency claim

authorization boundary

The limit of what a person or permission allows.

IN USE maintain the authorization boundary

unverified visitor

A person whose required visitor checks are incomplete.

IN USE refer an unverified visitor

Precision check

Host confirmation, identity verification, permission scope, and any escort conditions are distinct checks within the actual site process. This language case provides no shortcut, complete security procedure, or guarantee that entry will be approved.

Phrases you can actually use

C Notice the language / 1 of 2

ACKNOWLEDGE URGENCY

"I understand that your meeting is running late."

SEPARATE INVITATION AND ACCESS

"The invitation does not complete the access process."

AVOID AN UNAPPROVED ESCORT

"I am not authorized to bypass the escort requirements."

NAME THE RESPONSIBLE DESK

"The access desk will handle the verification request."

STATE THE BOUNDARY

"I cannot admit you before the required verification."

PROTECT PERSONAL ACCESS

"I cannot let you use my credential."

OFFER A PRACTICAL ROUTE

"I can contact the host through our approved directory."

GIVE THE CURRENT LOCATION

"Please remain at public reception while we contact them."

06

Invited versus authorized

A meeting arrangement does not settle restricted-area entry.

My credential

Belongs to its assigned user and does not transfer the user's rights.

Afterward

Too late to satisfy a prior-entry condition in this case.

Phrases you can actually use

C Notice the language / 2 of 2

AVOID ACCUSING INTENT

"This is an authorization requirement, not a judgment about you."

REJECT RETROSPECTIVE APPROVAL

"Approval afterward would not satisfy the current entry requirement."

RESPECT THE ACTUAL PROCESS

"We will follow the site's authorization and escort rules."

DO NOT SELF-AUTHORIZE

"I cannot grant an exception on my own."

KEEP THE OUTCOME OPEN

"I cannot promise entry before the checks are complete."

CHECK THE RELEVANT SCOPE

"Any permission must cover the required area."

KEEP THE HOST INFORMED

"I can tell the host that you are waiting here."

CLOSE HELPFULLY

"Let us use the approved route to resolve the request."

06

Can contact

Offers a step without guaranteeing approval.

Not authorized

States a role boundary without blaming the visitor.

Approved route

Refers to the actual site's process, not an improvised workaround.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

06

1. Which response is both firm and helpful?

- A** I cannot admit you yet; I can contact your host and the access desk from reception.
- B** Use my access and we will check later.
- C** A senior host makes every check unnecessary.
- D** I will grant an exception because you are late.

2. Which statement is unsupported?

- A** The invitation alone does not complete access authorization.
- B** Anika may escort anyone because she works here.
- C** The visitor is still unverified.
- D** The access desk can review the request.

3. What should Anika use to contact the host?

- A** A public comment unrelated to the visit
- B** The approved directory
- C** Only a number the unverified visitor supplies
- D** A guessed personal account

4. What does a pending access request mean?

- A** The visitor has been found guilty of a crime.
- B** Every later request must be refused forever.
- C** Entry is not yet established as authorized.
- D** Entry is automatically approved.

Answers and explanations: [page 86](#).

A meeting invitation is not access authorization

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

06

WORD + PHRASE BANK

visitor verification / access scope / authorization boundary / approved directory / access authorization / public reception / escort authorization / credential sharing / access desk / access exception

- 01 **Mr Vale:** I am late for a meeting inside. Here is the email invitation. Could you let me through with you? The host can confirm everything after I arrive.
- 02 **Anika:** I understand the time pressure, but ¹ _____ has not been established. I cannot admit you before the required verification. I can help contact your host from public reception.
- 03 **Mr Vale:** I have visited before, and the host knows me well. Doesn't that count for something?
- 04 **Anika:** We still need ² _____ for this visit. The invitation explains the meeting request, but it does not complete the entry process. I will use the approved route to check it.
- 05 **Mr Vale:** Could I borrow your access? I will return it immediately. You can explain that you were helping me reach the meeting.
- 06 **Anika:** I cannot permit ³ _____. My access applies to me, not automatically to another person. Please remain here while I contact the host and the access desk.
- 07 **Mr Vale:** Then perhaps you can escort me. You are an employee, and I would stay beside you all the way to the room.
- 08 **Anika:** Employee status does not establish ⁴ _____. I cannot bypass the site's escort requirements. If an escort is appropriate, the access desk must arrange it through the actual process.
- 09 **Mr Vale:** I can give you the host's mobile number. It will be faster than searching, and they will certainly tell you to let me in.
- 10 **Anika:** I will contact the host through the ⁵ _____. That is our trusted route. Host confirmation is useful, but any entry must also meet the site's authorization and escort requirements.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 55.

- 11 **Mr Vale:** All right. Please make clear that I arrived for a real meeting. I do not want the host to think I simply failed to turn up.
- 12 **Anika:** I can tell them you are waiting at ⁶ _____. That gives the host an accurate update without implying that you have already been admitted or that the access checks are complete.
- 13 **Mr Vale:** Are you refusing to help, or is there an unfinished step? The meeting may finish before we resolve this.
- 14 **Anika:** It is an ⁷ _____, not a judgment about your intentions. I can contact the responsible people, but I cannot promise entry or grant an exception myself.
- 15 **Mr Vale:** Could the host approve it afterward if everyone agrees that the delay was unreasonable? That would avoid losing more of the meeting now.
- 16 **Anika:** A later ⁸ _____ cannot be assumed as permission to bypass the current requirement. Let us ask the access desk what approved arrangements are possible before anyone crosses the boundary.
- 17 **Mr Vale:** Understood. I will wait here. Please ask whether the host can meet me in reception or speak with me while the access request is being handled.
- 18 **Anika:** I can pass on that request. The ⁹ _____ will handle the verification, and the host can respond about meeting arrangements. Neither response should be treated as complete until confirmed.
- 19 **Mr Vale:** Thank you. I will not use another person's access or assume that the invitation has completed the checks. Please let me know the verified next step.
- 20 **Anika:** I will. Any approved entry must have the right ¹⁰ _____ and satisfy the actual site requirements. For now, you remain here and I will contact the responsible people through the approved route.

06

ANSWERS / EXPLANATIONS: PAGE 87

1. access authorization | 2. visitor verification | 3. credential sharing | 4. escort authorization | 5. approved directory | 6. public reception | 7. authorization boundary | 8. access exception | 9. access desk | 10. access scope

Keep invitation and permission separate

F Say it

A visitor has a meeting invitation but incomplete access verification. Employee Jo cannot share credentials or approve an escort. Jo can contact the host through the approved directory and refer to the access desk.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

desk / authorization / directory / credential

Visitor: "My invitation does not itself establish access ¹ _____."

Employee: "I cannot share my ² _____."

Visitor: "Please contact the host through the approved ³ _____."

Employee: "The access ⁴ _____ will handle the verification request."

ANSWERS / EXPLANATIONS: PAGE 87

1. authorization | 2. credential | 3. directory | 4. desk

Rehearse with a fixed script

1. Check your answers, then read turns 1-10 with a partner using the corrected words.
2. Switch roles for turns 11-20. Stress words that distinguish facts from conditions or estimates.
3. Complete and check the four-line exchange. Read it twice, switching roles and keeping the printed facts.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

An observed dent became an unsupported cause

A Read the situation

Separate firsthand observation, another person's report, and a causal conclusion in an occurrence record.

Ground-services employee Rosa observed a dent in the side panel of baggage cart C4 at 09:42 local time. She did not see an impact. Colleague Ivo reports hearing a bang near the cart at approximately 09:39, but did not see contact either. Relevant camera footage has not been reviewed. A draft report says that a tug driver struck C4 and caused the damage; no supplied evidence establishes that claim. Safety reviewer Daniel helps Rosa correct the draft while preserving the original version and the source of each account. Immediate operational controls follow the separate local process; this exchange does not authorize equipment return to use.

PEOPLE / Rosa: Ground-services employee | Daniel: Safety reviewer

07

NEUTRAL DOES NOT MEAN VAGUE

A report can be specific about times, locations, equipment, and observations without assigning premature blame. Avoiding an unsupported causal claim protects the investigation; it does not require deleting useful facts or minimizing the seriousness of reported damage.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What did Rosa directly observe?

- A** A dent in cart C4 at 09:42 local
- C** The exact time damage occurred

- B** A tug striking the cart
- D** A completed camera review

2. What is Ivo's account?

- A** He verified the exact cause.
- C** He saw a named driver strike C4.

- B** He heard a bang at approximately 09:39 without seeing contact.
- D** He reviewed the footage.

3. Which claim should be removed as unsupported?

- A** A tug driver struck C4 and caused the damage.
- C** Ivo reported a bang.

- B** Rosa observed a dent.
- D** Camera footage has not been reviewed.

Answers and explanations: [page 88](#).

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

occurrence report

A record describing an event or condition relevant to safety.

IN USE submit an occurrence report

initial report

The first recorded account before the review is complete.

IN USE qualify an initial report

firsthand account

Information from a person's own observation.

IN USE preserve a firsthand account

witness statement

An attributed account from someone with relevant observations.

IN USE record a witness statement

reported sound

An auditory event described by a person.

IN USE attribute a reported sound

observation time

When a person noticed a condition.

IN USE state the observation time

event time

When the event itself occurred.

IN USE distinguish the event time

approximate time

A time given with limited precision.

IN USE label an approximate time

chronology

The sequence of relevant events or observations.

IN USE establish the chronology

causal claim

A statement that one event produced another.

IN USE test a causal claim

contributing factor

A condition that helped produce or shape an event.

IN USE assess contributing factors

root cause

An underlying cause identified through the relevant analysis.

IN USE avoid premature root-cause claims

Precision check

09:42 is the time Rosa observed the dent, not a verified impact time. Ivo's approximately 09:39 sound is a separate reported observation. A three-minute sequence does not identify the contact, actor, or cause.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

evidence source

The origin of information used in a review.

IN USE identify the evidence source

corroboration

Independent support for an account or inference.

IN USE seek corroboration

camera footage

Recorded video that may provide relevant evidence.

IN USE preserve camera footage

review status

The current stage of an examination of evidence.

IN USE state the review status

damage description

Factual wording identifying the observed physical condition.

IN USE give a damage description

equipment identifier

The code distinguishing the equipment involved.

IN USE verify the equipment identifier

baggage cart

A vehicle or trailer used to carry baggage on the ground.

IN USE identify the baggage cart

tug

A vehicle used to move other ground equipment or aircraft under the relevant operation.

IN USE identify the reported tug

attribution

Stating who supplied a claim or observation.

IN USE preserve source attribution

version history

The record of changes to a document over time.

IN USE retain version history

factual amendment

A documented correction or addition to the factual record.

IN USE make a factual amendment

causation finding

A supported conclusion about what produced the event.

IN USE distinguish a causation finding

Precision check

Footage not yet reviewed must not be described as confirming or disproving the draft. Correct the unsupported claim transparently, preserve the original version, and keep sources separate. The report is not equipment-release authorization.

Phrases you can actually use

C Notice the language / 1 of 2

START WITH FIRSTHAND INFORMATION

"I observed a dent on the side panel of cart C4."

AVOID CLAIMING AN IMPACT

"I did not see contact occur."

PRESERVE TIME UNCERTAINTY

"He gives the time as approximately 09:39."

DESCRIBE THE EVIDENCE GAP

"The camera footage has not been reviewed."

STATE THE OBSERVATION TIME

"I noticed it at 09:42 local time."

ATTRIBUTE THE SECOND ACCOUNT

"Ivo reports hearing a bang near the cart."

SEPARATE OBSERVATION AND EVENT

"That is when I saw the damage, not necessarily when it occurred."

REMOVE THE UNSUPPORTED CAUSE

"The supplied evidence does not identify a tug strike."

Observed at

Gives the time of noticing, not necessarily the event time.

Reports hearing

Attributes the account and preserves that it is auditory.

Approximately

Retains limited precision; do not silently turn it into an exact timestamp.

Phrases you can actually use

C Notice the language / 2 of 2

KEEP THE EQUIPMENT PRECISE

"The affected cart identifier is C4."

RECORD THE CORRECTION

"Add a dated factual amendment explaining the change."

LEAVE INVESTIGATION OPEN

"The cause remains under review."

KEEP OPERATIONAL AUTHORITY SEPARATE

"This report does not clear the equipment for use."

PRESERVE THE ORIGINAL

"Retain the earlier draft in the version history."

AVOID PERSONAL JUDGMENT

"We should report actions and evidence, not assumed motives."

AVOID FALSE EXONERATION

"Removing the accusation does not establish that no contact occurred."

CLOSE THE ACCOUNT

"Distinguish what I saw, what I was told, and what remains unknown."

Not reviewed

Says nothing about what the footage will show.

Unsupported

Not established by the current evidence, not necessarily disproved.

Amendment

Correct transparently rather than erase the history.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which sentence is supported?

- A** The tug driver definitely caused the dent at 09:42.
- B** Ivo saw a collision.
- C** The camera confirmed an impact.
- D** Rosa observed a dent on C4 at 09:42 local and did not witness contact.

2. How should Ivo's time appear?

- A** Approximately 09:39, attributed to Ivo
- B** Exactly 09:39 as a verified impact time
- C** 09:42 because that is easier to align
- D** Omitted because approximate times are useless

3. What should happen to the original draft?

- A** Replace it with a claim that nothing happened.
- B** Preserve it and document the correction in version history.
- C** Delete it without trace.
- D** Keep the accusation unchanged to avoid admitting a correction.

4. What does removing the causal accusation establish?

- A** The named person is proved uninvolved.
- B** The equipment is safe to use.
- C** The footage has been reviewed.
- D** The record no longer presents an unverified cause as proved.

[Answers and explanations: page 88.](#)

An observed dent became an unsupported cause

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

attribution / factual amendment / firsthand account / damage description / causal claim / approximate time / version history / camera footage / observation time / causation finding

- 01 **Daniel:** The draft says a tug driver struck cart C4 and caused the damage. Before we keep that sentence, what did you personally observe?
- 02 **Rosa:** My ¹ _____ is narrower. I saw a dent on C4's side panel at nine forty-two local time. I did not see any impact or contact.
- 03 **Daniel:** Then nine forty-two is the time you noticed the damage. We should not automatically label it the time the damaging event occurred.
- 04 **Rosa:** Correct. It is the ² _____, not a verified event time. I do not know how long the dent had been there when I saw it.
- 05 **Daniel:** The draft also mentions a bang at nine thirty-nine. Did you hear that yourself, or is that information from somebody else's account?
- 06 **Rosa:** That needs ³ _____. Ivo told me he heard a bang near the cart at approximately nine thirty-nine. He did not see contact either, so his account does not identify an impact.
- 07 **Daniel:** Keep approximately. Turning a remembered time into an exact timestamp would give readers more precision than the source actually provides.
- 08 **Rosa:** I will preserve the ⁴ _____ and name the source. The revised chronology can show his reported sound and my later observation without treating them as a proven causal sequence.
- 09 **Daniel:** That sequence may be relevant, but it does not identify who caused the dent. Is there any reviewed video or other evidence supporting the tug statement?
- 10 **Rosa:** The ⁵ _____ has not been reviewed. I should not describe it as supporting the claim, and I cannot say it rules the claim out either.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 64.

- 11 **Daniel:** Exactly. The investigation can examine relevant evidence through the approved process. The initial report should not announce what that later review will conclude.
- 12 **Rosa:** I will remove the unsupported ⁶ _____ from the factual account. The report will say what was observed and reported, with the cause still under review.
- 13 **Daniel:** Removing the accusation should not erase the fact that damage was observed. Neutral reporting can still be specific about the equipment and its physical condition.
- 14 **Rosa:** I will retain the ⁷ _____, the C4 identifier, and the observation time. I will avoid substituting a vague phrase such as something happened somewhere on the ramp.
- 15 **Daniel:** What will you do with the earlier version? We need an honest correction process rather than a record that silently changes after people have read it.
- 16 **Rosa:** I will preserve the ⁸ _____ and add a dated amendment explaining the correction. That keeps the original wording traceable while making the current factual account accurate.
- 17 **Daniel:** Good. Also keep this reporting conversation separate from the equipment's operational status. A revised report is not permission to put the cart back into use.
- 18 **Rosa:** Understood. Any ⁹ _____ changes the account, not the separate local controls. Those controls continue under the relevant process, and this exchange does not authorize return to use.
- 19 **Daniel:** Read the current boundary back to me: what is directly observed, what is reported by another person, and what remains unresolved?
- 20 **Rosa:** I saw the dent at nine forty-two. Ivo reports a bang at approximately nine thirty-nine. The footage is unreviewed, and there is no established ¹⁰ _____ identifying how the damage occurred.

07

ANSWERS / EXPLANATIONS: PAGE 89

1. firsthand account | 2. observation time | 3. attribution | 4. approximate time | 5. camera footage | 6. causal claim | 7. damage description | 8. version history | 9. factual amendment | 10. causation finding

Keep observation time separate from event time

F Say it

A worker sees damage on cart K2 at 10:15 local. Pat reports hearing a bang at approximately 10:12 but saw no contact. The video is unreviewed and no cause is established.

Complete the four gaps. Use each bank entry once.

WORD + PHRASE BANK

10:15 / cause / Pat / unreviewed

Worker: "My observation time was ¹ _____ local."

Reviewer: "The earlier sound is attributed to ² _____."

Worker: "The video remains ³ _____."

Reviewer: "No ⁴ _____ has been established."

ANSWERS / EXPLANATIONS: PAGE 89

1. 10:15 | 2. Pat | 3. unreviewed | 4. cause

Rehearse with a fixed script

1. Check your answers, then read turns 1-10 with a partner using the corrected words.
2. Switch roles for turns 11-20. Stress words that distinguish facts from conditions or estimates.
3. Complete and check the four-line exchange. Read it twice, switching roles and keeping the printed facts.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

Verified records are not the same as total compliance

A Read the situation

Report evidence coverage accurately, assign outstanding checks, and avoid unsupported compliance claims.

An internal aviation audit-preparation list covers current training records for 30 staff. Twenty-seven records have been verified against the stated requirement. Three remain unverified: two assigned to records coordinator Daria and one to team lead Ash. Missing verification does not establish that those staff are untrained or that their records are expired. Quality reviewer Leo needs a factual readiness update by Friday at 15:00 local. The draft says all staff are compliant. Daria and Leo must replace that statement with the verified count, open checks, owners, and deadline. This is preparation evidence for one requirement, not an overall regulatory compliance determination.

PEOPLE / Daria: Records coordinator | Leo: Quality reviewer

08

AN HONEST GAP IS USEFUL MANAGEMENT INFORMATION

Pressure before an audit can encourage complete-sounding summaries. A bounded statement of evidence coverage is more useful than an unsupported claim that everyone complies. Name what has been verified and who will check the remainder without treating an open record question as a finding against a person.

Briefing checks

Circle one answer in each item. Use the briefing.

1. What proportion of the listed records is verified?

A 10%

B 27%

C 90%

D 100%

2. What do the three unverified records establish?

A Verification remains incomplete for those records.

B Three staff are proved untrained.

C Three records are proved expired.

D The entire operation is noncompliant.

3. What is the scope of this review?

A Every employee's entire professional competence

B Training-record evidence for one stated requirement

C Every regulatory obligation

D Final external certification

Answers and explanations: page 90.

The vocabulary that does the work

B Find the words / 1 of 2

Read the definitions and say the common word combinations aloud.

audit readiness

The state of preparation to support an audit with relevant evidence.

IN USE assess audit readiness

audit scope

The requirements, activities, or period covered by an audit.

IN USE define audit scope

audit criterion

A requirement or standard used to assess evidence.

IN USE identify the audit criterion

objective evidence

Verifiable information supporting an assessment.

IN USE provide objective evidence

training record

Documentation of a person's completed training and relevant status.

IN USE verify a training record

currency

Whether a credential or training status remains current under the relevant requirement.

IN USE verify training currency

competency

The ability to perform a role to the required standard.

IN USE distinguish demonstrated competency

evidence coverage

The share of the defined scope supported by verified evidence.

IN USE report evidence coverage

verification backlog

Outstanding records or items awaiting checking.

IN USE clear the verification backlog

records owner

The person responsible for maintaining or supplying a record.

IN USE identify the records owner

document register

An organized list of controlled documents and their status.

IN USE update the document register

controlled copy

A document version managed under the relevant control process.

IN USE use the controlled copy

08

Precision check

27/30 is 90% verified record coverage. The remaining 3/30 is 10% unverified, not a demonstrated 10% noncompliance rate. One additional verified record would make coverage 28/30, approximately 93.3%, with two checks still open.

The vocabulary that does the work

B Find the words / 2 of 2

Read the definitions and say the common word combinations aloud.

revision status

The current version position of a document.

IN USE confirm revision status

retention requirement

A rule governing how long a record must be kept.

IN USE check the retention requirement

traceability

The ability to follow evidence to its source and relevant requirement.

IN USE maintain evidence traceability

audit trail

The record showing actions, changes, and decisions over time.

IN USE preserve the audit trail

open item

A matter not yet resolved or verified.

IN USE track an open item

finding

A supported result of evaluating evidence against criteria.

IN USE distinguish an audit finding

nonconformity

A demonstrated failure to meet a specified requirement.

IN USE document a nonconformity

corrective action

Action addressing the cause of an identified nonconformity.

IN USE verify corrective action

closure evidence

Information supporting that an item has been satisfactorily resolved.

IN USE review closure evidence

readiness statement

A bounded summary of preparation status.

IN USE qualify the readiness statement

sampling limitation

A boundary arising from reviewing only part of a population.

IN USE disclose a sampling limitation

compliance determination

An assessment of whether applicable requirements are met.

IN USE avoid an unsupported compliance determination

Precision check

A current training record is evidence for a specified requirement, not proof of every aspect of competence or all regulatory compliance. Identify the review scope and criterion; do not enlarge the conclusion beyond what was checked.

Phrases you can actually use

C Notice the language / 1 of 2

STATE THE COUNT

"Twenty-seven of thirty records have been verified."

NAME THE GAP

"Three records still need verification."

AVOID ASSUMING EXPIRY

"We have not established that those records are expired."

STATE THE DEADLINE

"The readiness update is due Friday at 15:00 local."

EXPRESS THE COVERAGE

"That is ninety percent of the listed records."

AVOID A PERSONNEL JUDGMENT

"Unverified does not mean the staff member is untrained."

IDENTIFY THE OWNERS

"I own two checks, and Ash owns one."

CORRECT THE CLAIM

"All staff compliant exceeds the evidence we have."

08

Verified

Supported by the stated check, not merely present in a folder.

Unverified

A current evidence status, not proof of a failed requirement.

Current

Needs the applicable requirement and reference date.

Phrases you can actually use

C Notice the language / 2 of 2

LIMIT THE SCOPE

"This list concerns one stated training-record requirement."

PRESERVE THE AUDIT TRAIL

"Record who checked the item and when."

UPDATE THE REMAINING COUNT

"One additional verification leaves two items open."

KEEP THE DETERMINATION DISTINCT

"This preparation update is not an overall compliance decision."

REQUEST TRACEABLE EVIDENCE

"Please link each verified record to the applicable criterion."

SEPARATE PLAN AND CLOSURE

"An assigned action is not closure evidence."

AVOID BACKFILLING

"Do not create a completion entry without supporting evidence."

CLOSE WITH SPECIFICS

"Report the verified count, open checks, owners, and deadline."

08

Coverage

Describes how much of the defined list is checked.

Closed

Requires the specified supporting evidence, not just an owner.

All compliant

A broad conclusion requiring evidence beyond this limited list.

Choose the precise message

D Check your understanding

Circle one best answer for each item. Use the stated purpose and case facts, not the option that merely sounds most polite.

1. Which readiness headline fits the facts?

- A The audit has already granted certification.
- B Twenty-seven of thirty records verified; three checks remain assigned and open.
- C Every staff member meets every rule.
- D Three staff are confirmed untrained.

08

2. If one more record is verified, what is the new coverage?

- A 30 of 30, 100%
- B 28 of 30, approximately 93.3%
- C 28 of 28, 100%
- D 27 of 30, 90%

3. Which statement distinguishes an open item from a finding?

- A Audit preparation cannot contain uncertainty.
- B An unverified record needs checking; a nonconformity requires evidence of a failed criterion.
- C Every missing verification proves a violation.
- D A named owner automatically closes a finding.

4. What should support closing a record check?

- A Verified evidence linked to the relevant requirement and recorded review
- B A confident verbal promise alone
- C A copied date with no source
- D The approaching audit deadline

Answers and explanations: page 90.

Verified records are not the same as total compliance

E Conversations / turns 1-10

Complete the numbered gaps. Use each bank entry once, without changing its form. Cover the answers at the end until you finish.

WORD + PHRASE BANK

readiness statement / verified count / open items / records owner / nonconformity / evidence coverage / audit scope / audit trail / traceability / closure

08

- 01 **Leo:** The draft says all staff are compliant. The preparation list only shows twenty-seven verified training records out of thirty. We need a more accurate headline.
- 02 **Daria:** I will report ¹ _____ instead. Twenty-seven of thirty is ninety percent verified. Three records remain unverified, and their checks need to stay visible in the update.
- 03 **Leo:** Does unverified mean the staff missed training or their records expired? Neither should be implied without evidence.
- 04 **Daria:** No. The ² _____ are verification questions. We have not established that those people are untrained or that their records are expired. The missing check is not the same as a negative finding.
- 05 **Leo:** Who owns the remaining work? Saying someone will check later will not help us prepare a reliable update.
- 06 **Daria:** I am the ³ _____ for two checks, and Ash owns the third. I will keep those assignments explicit rather than place all three under a general team label.
- 07 **Leo:** The update is due Friday at fifteen hundred local. That deadline is for a factual readiness report, including any unresolved items, not for changing the status by assumption.
- 08 **Daria:** Agreed. The ⁴ _____ will give the verified count, remaining checks, owners, and deadline. If a record is still unverified, I will say so rather than force a complete result.
- 09 **Leo:** What evidence are we using to mark a record verified? We should be able to show the requirement checked, not just point to a file with the person's name.
- 10 **Daria:** Each check needs ⁵ _____ to the stated requirement and the relevant record. A document in a folder is not enough if its identity, currency, or applicable basis has not been verified.

The conversation, continued

E Conversations / turns 11-20

Continue with the word bank on page 73.

- 11 **Leo:** If one more record is verified today, how will you update the percentage without changing the population?
- 12 **Daria:** The ⁶ _____ becomes twenty-eight of thirty, about ninety-three point three percent. Two checks remain open. We should not change the denominator to twenty-eight and call the result one hundred percent.
- 13 **Leo:** Exactly. We also need to resist treating this single list as evidence for every regulatory obligation or every aspect of a person's ability to perform the job.
- 14 **Daria:** I will state the ⁷ _____ clearly. This preparation list concerns one training-record requirement. It is not a complete assessment of professional competence or an overall regulatory compliance determination.
- 15 **Leo:** If a check later demonstrates that a requirement was not met, then we can record the supported finding and follow the appropriate action process.
- 16 **Daria:** Yes. A ⁸ _____ needs evidence against a criterion. We should not label someone noncompliant because a check is pending, or hide a real finding once the evidence establishes it.
- 17 **Leo:** Preserve who performed each check and when. We need a traceable record, not a spreadsheet that silently turns green.
- 18 **Daria:** I will maintain the ⁹ _____. No unsupported completion entry or copied date should replace the actual evidence. Any correction must remain traceable in the controlled record.
- 19 **Leo:** Then our current message is ninety percent record coverage, three checks open, two with you and one with Ash, update Friday at fifteen hundred local.
- 20 **Daria:** Correct. A future ¹⁰ _____ will depend on verified evidence, not simply on an assigned owner or an approaching deadline. I will circulate the bounded update and revise it as checks are completed.

ANSWERS / EXPLANATIONS: PAGE 91

1. evidence coverage | 2. open items | 3. records owner | 4. readiness statement | 5. traceability | 6. verified count | 7. audit scope | 8. nonconformity | 9. audit trail | 10. closure

Report coverage without declaring universal compliance

F Say it

A list has 40 training records. Thirty-six are verified and four remain unverified. After one more check succeeds, the denominator stays 40. The list covers one requirement only.

Complete the four gaps. Use each bank entry once.

08

WORD + PHRASE BANK

37 / compliance / 90 / 3

Reviewer: "Initial verified coverage is ¹ _____ percent."

Coordinator: "After one more verification, the count is ² _____."

Reviewer: "The number still unverified is ³ _____."

Coordinator: "This does not establish overall regulatory ⁴ _____."

ANSWERS / EXPLANATIONS: PAGE 91

1. 90 | 2. 37 | 3. 3 | 4. compliance

Rehearse with a fixed script

1. Check your answers, then read turns 1-10 with a partner using the corrected words.
2. Switch roles for turns 11-20. Stress words that distinguish facts from conditions or estimates.
3. Complete and check the four-line exchange. Read it twice, switching roles and keeping the printed facts.

WORKING ALONE

Read both roles, pausing for two seconds when the speaker changes. Repeat with the bank covered, then check any missed expressions.

01 Briefing and language checks

Safety Culture and Stop-Work Authority

A Briefing checks / page 4

1. What did Dana directly observe?

D. An unidentified wet patch beside equipment

The brief establishes a visible condition but not its substance, source, or cause.

2. What is the affected task's current status?

B. Stopped under the local process

The local stop-work process remains active until the required assessment and authorization.

3. What does schedule pressure change about restart authority?

B. Nothing; the required authorization is still needed.

A deadline does not replace the fictional site's assessment and restart requirements.

D Language checks / page 9

1. Which message best preserves the facts?

B. Task stopped: unidentified wet patch observed beside equipment at Stand 6, 08:40 local.

The first message gives the observation, location, time, and actual task status without inventing a cause.

2. Which response to pressure is appropriate?

D. The task remains stopped until the required assessment and restart authorization.

The local process requires assessment and authorization regardless of schedule pressure.

3. What does a supervisor's acknowledgement establish?

D. The concern has been received.

Receipt of the report does not establish the technical findings or restart decision.

4. Which statement about reporting is accurate?

A. Record the observation and action without assigning an unverified cause.

Factual reporting preserves evidence; the case provides no universal immunity or confirmed fault.

01 Conversation answers

Safety Culture and Stop-Work Authority

E Dialogue gaps

Pages 10-11

1. hazard report. Turn 2. The hazard report communicates the observed potentially harmful condition; receiving it does not establish the cause or authorize restart.

2. direct observation. Turn 4. Direct observation is what Dana personally saw, as distinct from an inferred substance, equipment fault, or cause.

3. Schedule pressure. Turn 6. Schedule pressure explains the urgency to finish but does not satisfy the assessment or restart requirements.

4. restart authorization. Turn 8. Restart authorization is the required decision after assessment, not a choice made informally by a colleague under time pressure.

5. unidentified substance. Turn 10. Unidentified substance preserves the missing identification instead of labeling the material as a specific fluid without evidence.

6. situational awareness. Turn 12. Situational awareness depends on accurate relevant conditions and status, not additional details that have not been established.

7. authority gradient. Turn 14. The authority gradient is the effect of rank differences on speaking up; it should not conceal the active safety boundary.

8. closed-loop communication. Turn 16. Closed-loop communication confirms receipt and understanding, reducing the risk that a safety message is heard but interpreted incorrectly.

9. qualified assessment. Turn 18. A qualified assessment supplies the relevant evaluation, but the separate authorized restart decision must still be communicated.

10. hold point. Turn 20. The hold point is the boundary that remains in place until the specified assessment and authorization requirements are satisfied.

F Transfer conversation

Page 12

1. 9

Worker: "The observation was at Stand 9."

Stand nine is the supplied location of the observed condition.

2. 07:20

Supervisor: "The time was 07:20 local."

The brief gives seven twenty on the local clock.

3. unidentified

Worker: "The substance remains unidentified."

No assessment has established the material's identity or source.

4. authorization

Supervisor: "The task remains stopped pending the required restart authorization."

The local process requires an authorized decision before resuming.

02 Briefing and language checks

Operations Control and Dispatch Coordination

A Briefing checks / page 13

1. What is the aircraft assignment's status at 10:10 UTC?

A. Provisional

The snapshot explicitly labels fleet aircraft A12 as a provisional assignment.

2. What does 11:00 UTC represent?

B. A planning target for off-block time

The brief labels eleven hundred as a planning target, not an operational clearance.

3. Who owns the crew-status check?

B. Sara in crew control

Sara is the named crew controller responsible for that unresolved planning item.

D Language checks / page 18

1. Which short update is accurate?

C. At 10:10 UTC, A12 is provisional, crew is pending, and 11:00 is the off-block target.

The first update preserves the separate statuses and the planning nature of the time.

2. What does aircraft confirmation alone establish?

A. The aircraft assignment's status, not crew confirmation

One dependency's confirmation does not automatically resolve the others.

3. Which phrase should not be used for the 11:00 target?

A. Cleared departure

The case provides a target, not an operational authorization to depart.

4. What should happen at 10:25 if crew status remains unresolved?

D. Report it as pending with the current timestamp and owner.

An update should accurately preserve the remaining uncertainty rather than force closure.

02 Conversation answers

Operations Control and Dispatch Coordination

E Dialogue gaps

Pages 19-20

- 1. aircraft assignment.** Turn 2. The aircraft assignment is provisional in the supplied snapshot and must not be described as confirmed.
- 2. Crew control.** Turn 4. Crew control is the responsible function for the crew-status check; a populated planning field does not replace its confirmation.
- 3. target time.** Turn 6. A target time is the planning objective, not an authorized departure or an actual off-block event.
- 4. timestamp.** Turn 8. The timestamp identifies when the reported statuses were known and helps distinguish the correction from an older draft.
- 5. crew status.** Turn 10. Crew status is the separate unresolved item assigned to Sara, not something Joel's aircraft confirmation can settle.
- 6. dependency.** Turn 12. A dependency has its own status; resolving one does not automatically resolve another required planning input.
- 7. flight release.** Turn 14. Flight release involves the relevant authorized operating process and is not established merely by the two planning items discussed here.
- 8. confirmation source.** Turn 16. The confirmation source is the responsible person or record supporting a status change, not the existence of a polished draft.
- 9. UTC.** Turn 18. UTC supplies the common time basis explicitly required in this snapshot, preventing silent substitution of local clock times.
- 10. status snapshot.** Turn 20. The status snapshot summarizes the known position at a stated time without turning assumptions into operational confirmation.

F Transfer conversation

Page 21

1. provisional

Planner: "B7 is still provisional."

The aircraft assignment has not received the confirmation needed to change that status.

2. pending

Coordinator: "Crew confirmation remains pending."

The crew item is explicitly unresolved in the supplied snapshot.

3. target

Planner: "Thirteen hundred is the off-block target."

The stated time is a planning objective rather than a release.

4. 12:20

Coordinator: "The next update is at 12:20 UTC."

The supplied coordination check-in time is twelve twenty UTC.

03 Briefing and language checks

Maintenance Deferrals and MEL Language

03

A Briefing checks / page 22

1. What is the verified status of D17?

D. Under review with no deferral authorization recorded

Tomas confirms the pending review and absence of a recorded authorization.

2. What is D17?

C. An internal defect identifier

The brief explicitly distinguishes the internal defect record from an MEL reference.

3. Can the learner determine deferral eligibility from this case?

A. No; the fault and applicable technical conditions are not supplied.

The case teaches clarification language and deliberately does not supply an operational eligibility assessment.

D Language checks / page 27

1. Which correction fits the verified information?

A. D17 remains under review; no deferral authorization is recorded.

The correction matches Tomas's verified status and removes the unsupported operating claim.

2. Which pair must not be treated as interchangeable?

C. Internal defect identifier and approved MEL item reference

The internal record code does not supply the relevant approved document entry.

3. Which request stays within Priya's coordination role?

B. Please supply the applicable reference, revision, conditions, and authorized status record.

Priya can request accurate records but cannot replace the qualified authorization process.

4. What would an authorized deferral establish, in general?

D. Conditional postponement under the applicable basis, not completed repair

Deferral and rectification are distinct; any permission remains bounded by the applicable conditions.

03 Conversation answers

Maintenance Deferrals and MEL Language

03

E Dialogue gaps

Pages 28-29

- 1. under review.** Turn 2. Under review is the verified status, distinct from a deferral that has already received the relevant authorization.
- 2. defect identifier.** Turn 4. The defect identifier labels the internal record and does not identify the applicable approved MEL entry.
- 3. proposed deferral.** Turn 6. A proposed deferral is an option awaiting the relevant review and decision, not evidence that postponement is already authorized.
- 4. item reference.** Turn 8. The item reference identifies the relevant controlled document entry, which must be distinguished from the internal defect number.
- 5. MMEL.** Turn 10. The MMEL is an aircraft-type baseline and is not interchangeable with the specific operator's approved MEL.
- 6. repair interval.** Turn 12. The repair interval must come from the applicable approved basis; the coordination note provides no authority to invent it.
- 7. Rectification.** Turn 14. Rectification means correcting the defect, whereas an authorized deferral permits a bounded postponement under the relevant conditions.
- 8. maintenance control.** Turn 16. Maintenance control is the responsible coordination source in this case, rather than an unsupported forwarded note.
- 9. document revision.** Turn 18. The document revision identifies the controlled version relevant to the eventual reference and prevents an obsolete copy from being treated as current.
- 10. authorized sign-off.** Turn 20. Authorized sign-off must come from the appropriate qualified process; Priya's coordination correction does not supply it.

F Transfer conversation

Page 30

1. identifier

Coordinator: "Q8 is the internal defect identifier."

The code labels the case rather than an approved document entry.

2. review

Controller: "The verified status is under review."

The record has not yet reached an authorized deferral decision.

3. revision

Coordinator: "The controlled document revision is still missing."

The scenario supplies no verified version of the applicable document.

4. authorization

Controller: "The email does not establish deferral authorization."

Informal wording cannot replace the absent authorized decision record.

04 Briefing and language checks

Irregular Operations and Passenger Communication

04

A Briefing checks / page 31

1. What is the latest verified departure estimate?

C. No departure estimate is confirmed.

The latest verified operations message explicitly leaves the departure estimate unconfirmed.

2. What will happen at 15:10 local?

C. The next passenger status update

Lena commits to an update even if no new departure estimate exists.

3. What can the service desk do on the supplied facts?

C. Review individual connection and rebooking questions

The service desk can assess options, but no particular seat or financial remedy is established.

D Language checks / page 36

1. Which announcement is accurate?

D. There is no confirmed departure estimate; the next update is at 15:10 local.

The first announcement gives the verified uncertainty and the actual communication commitment.

2. Which response handles an onward connection appropriately?

C. The service desk can review your itinerary and available options.

The supplied assistance route permits individual review without an unsupported outcome guarantee.

3. What should happen to the conflicting channels?

C. Correct them to the latest verified status.

Consistent current information prevents passengers from planning around unsupported older messages.

4. Which statement about the delay's cause is appropriate?

D. I do not have an authorized explanation to share yet.

The brief supplies no authorized public cause and does not justify inventing one.

04 Conversation answers

Irregular Operations and Passenger Communication

E Dialogue gaps

Pages 37-38

1. conflicting messages. Turn 2. Conflicting messages describe the two inconsistent times the passenger received; neither is supported by the latest verified status.

2. flight information display. Turn 4. The flight information display is one of the channels that must be corrected to match the latest verified operations message.

3. authorized explanation. Turn 6. An authorized explanation is information cleared for this public update; the case provides none about the cause.

4. passenger update. Turn 8. The passenger update is scheduled for fifteen ten local, even if no new departure estimate has been confirmed.

5. departure estimate. Turn 10. A departure estimate concerns expected movement; the fifteen-ten communication time must not be mistaken for one.

6. onward connection. Turn 12. The onward connection is the later flight whose feasibility requires an individual itinerary review, not a general promise from the gate update.

7. Seat availability. Turn 14. Seat availability must be verified for a specific rebooking; a public display does not itself transfer or confirm the passenger's reservation.

8. baggage routing. Turn 16. Baggage routing is a separate practical detail of the itinerary that should be checked rather than assumed from a proposed seat.

9. compensation. Turn 18. Compensation is a separate policy or legal question; the operational update does not establish an approved payment.

10. channel consistency. Turn 20. Channel consistency means the current display and spoken announcements communicate the same verified status and distinguish updates from departure estimates.

F Transfer conversation

Page 39

1. departure estimate

Passenger: "Is 16:30 a confirmed departure estimate?"

The display is not supported by a verified estimate in this case.

2. update

Agent: "No; our next information update is at 16:45."

The commitment is to communicate, not to depart at that time.

3. itinerary

Passenger: "Where can I review my individual itinerary?"

The service desk can assess the passenger's specific travel sequence and options.

4. desk

Agent: "Please speak with the service desk."

The brief names the service desk as the individual assistance route.

04

05 Briefing and language checks

Ground Handling and Turnaround Performance

A Briefing checks / page 40

1. How many packs remain unverified in the receiving balance?

B. 16

Ninety-six required packs minus eighty confirmed received leaves sixteen outstanding.

2. What does the truck's arrival establish?

D. The truck is present, not that receipt and count are verified.

Physical arrival and the supplier's note do not establish verified receipt of the remaining packs.

3. What does Elin's acceptance establish?

B. Ownership of the verification and status task

Accepting responsibility names the task owner but does not complete the task or authorize departure.

D Language checks / page 45

1. Which handover is accurate?

C. Elin owns verification of the remaining 16; status due at 13:35 UTC.

The first message names ownership, quantity, and report time without claiming completion.

2. Which statement about the delivery note is accurate?

D. It claims a quantity that still needs receipt verification.

A supplier document is information to check, not a substitute for the receiving process.

3. If 12 additional packs are later verified received, what remains outstanding?

A. 4

Eighty plus twelve is ninety-two, leaving four of the required ninety-six.

4. Which overall conclusion is unsupported even after catering completion?

A. All flight-release requirements are satisfied.

The case covers catering coordination, not the complete turnaround and operational release process.

05 Conversation answers

Ground Handling and Turnaround Performance

E Dialogue gaps

Pages 46-47

1. required quantity. Turn 2. The required quantity is ninety-six packs, the reference against which confirmed receipt and the outstanding balance are calculated.

2. outstanding balance. Turn 4. The outstanding balance remains sixteen because only eighty of the required ninety-six have confirmed receipt.

3. truck arrival. Turn 6. Truck arrival is a verified milestone of vehicle presence, not proof of the remaining goods' receipt or task completion.

4. delivery note. Turn 8. The delivery note states the supplier's claimed quantity, which the receiving process still needs to verify.

5. service handover. Turn 10. The service handover transfers the specified verification and reporting responsibility once Elin explicitly accepts it.

6. status report. Turn 12. The status report is the commitment due at thirteen thirty-five; it does not guarantee that delivery will be complete by then.

7. confirmed receipt. Turn 14. Confirmed receipt changes only when the receiving process verifies additional packs, not when schedule pressure increases.

8. Task completion. Turn 16. Task completion concerns this specified catering activity only and does not establish completion of all other turnaround or release requirements.

9. handover gap. Turn 18. The handover gap is the missing named acceptance; its existence does not by itself prove who caused it or why.

10. task acceptance. Turn 20. Task acceptance means Elin has taken responsibility for verification and reporting, not that the goods are already accepted or the task finished.

F Transfer conversation

Page 48

1. 115

Coordinator: "The confirmed total is now 115."

One hundred original packs plus fifteen verified additional packs equals one hundred fifteen.

2. 5

Lead: "The outstanding balance is 5."

The required one hundred twenty minus one hundred fifteen leaves five.

3. Jo

Coordinator: "The named receiving lead is Jo."

The brief assigns acceptance of the remaining check to Jo.

4. 14:10

Lead: "My status report is due at 14:10 UTC."

Fourteen ten is the agreed reporting time, not a guaranteed completion time.

06 Briefing and language checks

Security and Access Control

A Briefing checks / page 49

1. What does the email invitation establish in this case?

B. A claimed meeting arrangement, not completed access authorization

The visitor still has to complete the site's separate verification and authorization process.

2. What can Anika do now?

C. Contact the host through the approved directory and refer to the access desk.

The brief permits the official verification route but not a bypass or unapproved escort.

3. Where should the visitor remain under the stated process?

C. Public reception

The case explicitly keeps the visitor at public reception while the request is handled.

D Language checks / page 54

1. Which response is both firm and helpful?

A. I cannot admit you yet; I can contact your host and the access desk from reception.

The first response preserves the boundary and offers the permitted practical next step.

2. Which statement is unsupported?

B. Anika may escort anyone because she works here.

Employee status does not establish escort authority under the supplied site process.

3. What should Anika use to contact the host?

B. The approved directory

The case identifies the approved directory as the trusted contact route.

4. What does a pending access request mean?

C. Entry is not yet established as authorized.

Pending authorization is a current process status, not a verdict on intent or a permanent refusal.

06 Conversation answers

Security and Access Control

E Dialogue gaps

Pages 55-56

- 1. access authorization.** Turn 2. Access authorization must be established through the site's process before entry; an invitation and urgency do not provide it.
- 2. visitor verification.** Turn 4. Visitor verification is the current required process, which prior visits and familiarity do not replace.
- 3. credential sharing.** Turn 6. Credential sharing would let another person use Anika's assigned access, which the supplied process does not authorize.
- 4. escort authorization.** Turn 8. Escort authorization is a separate permission; Anika is not authorized to provide an unapproved escort simply because she works there.
- 5. approved directory.** Turn 10. The approved directory is the trusted contact source specified in the case, rather than relying solely on details from an unverified visitor.
- 6. public reception.** Turn 12. Public reception is the permitted waiting location while the access request is verified.
- 7. authorization boundary.** Turn 14. The authorization boundary limits what Anika may allow; maintaining it does not mean refusing all assistance or judging the visitor's intent.
- 8. access exception.** Turn 16. An access exception requires the relevant authority and cannot be assumed retroactively to justify bypassing the current entry requirement.
- 9. access desk.** Turn 18. The access desk is the responsible function handling verification and possible permitted arrangements, not a guaranteed approval service.
- 10. access scope.** Turn 20. Access scope identifies the specific areas and conditions covered by permission, rather than treating any approval as unrestricted entry.

F Transfer conversation

Page 57

1. authorization

Visitor: "My invitation does not itself establish access authorization."

The invitation and the required entry permission are separate in this case.

2. credential

Employee: "I cannot share my credential."

Jo's assigned access cannot be used as permission for the visitor.

3. directory

Visitor: "Please contact the host through the approved directory."

The supplied trusted contact route is the approved directory.

4. desk

Employee: "The access desk will handle the verification request."

The case assigns the verification request to the access desk.

06

07 Briefing and language checks

Incident Reporting and Investigation

A Briefing checks / page 58

1. What did Rosa directly observe?

A. A dent in cart C4 at 09:42 local

Rosa saw the damage at 09:42 but did not witness the contact or its cause.

2. What is Ivo's account?

B. He heard a bang at approximately 09:39 without seeing contact.

The brief attributes a reported sound and approximate time to Ivo, not a witnessed impact.

3. Which claim should be removed as unsupported?

A. A tug driver struck C4 and caused the damage.

The supplied observations and reported sound do not establish a particular actor or causal contact.

D Language checks / page 63

1. Which sentence is supported?

D. Rosa observed a dent on C4 at 09:42 local and did not witness contact.

The first sentence limits the account to Rosa's direct observation and its known boundary.

2. How should Ivo's time appear?

A. Approximately 09:39, attributed to Ivo

The source supplied an approximate sound time, which should retain both attribution and uncertainty.

3. What should happen to the original draft?

B. Preserve it and document the correction in version history.

Transparent amendment preserves the record without retaining the unsupported causal assertion as fact.

4. What does removing the causal accusation establish?

D. The record no longer presents an unverified cause as proved.

A more accurate record does not itself determine causation, exoneration, or operational release.

07 Conversation answers

Incident Reporting and Investigation

E Dialogue gaps

Pages 64-65

- 1. firsthand account.** Turn 2. A firsthand account covers Rosa's own observation of the dent, not a contact or cause she did not witness.
- 2. observation time.** Turn 4. Observation time records when Rosa noticed the dent; the actual time of the damage-producing event remains unverified.
- 3. attribution.** Turn 6. Attribution identifies Ivo as the source of the reported sound and prevents it from becoming Rosa's claimed firsthand observation.
- 4. approximate time.** Turn 8. Approximate time marks the limited precision of Ivo's reported auditory observation rather than asserting an exact impact timestamp.
- 5. camera footage.** Turn 10. Camera footage exists as potential evidence in the case, but its contents have not been reviewed or established.
- 6. causal claim.** Turn 12. The causal claim assigns the damage to a tug driver without evidence establishing that contact, actor, or causal link.
- 7. damage description.** Turn 14. The damage description is the observed dent on C4's side panel, which remains relevant even when the unsupported cause is removed.
- 8. version history.** Turn 16. Version history retains the earlier draft and the documented change, rather than silently deleting the unsupported wording.
- 9. factual amendment.** Turn 18. A factual amendment corrects the record; it does not provide operational clearance or replace the site's equipment-control process.
- 10. causation finding.** Turn 20. A causation finding would require a supported conclusion from the appropriate review, which the supplied observations do not yet provide.

F Transfer conversation

Page 66

1. 10:15

Worker: "My observation time was 10:15 local."

The worker noticed the damage at ten fifteen, not necessarily when it occurred.

2. Pat

Reviewer: "The earlier sound is attributed to Pat."

Pat supplied the auditory account and its approximate time.

3. unreviewed

Worker: "The video remains unreviewed."

The case states that its contents have not yet been examined.

4. cause

Reviewer: "No cause has been established."

The observations do not identify how or by whom the damage occurred.

08 Briefing and language checks

Regulatory Audits and Readiness

A Briefing checks / page 67

1. What proportion of the listed records is verified?

C. 90%

Twenty-seven verified records divided by thirty listed records equals ninety percent.

2. What do the three unverified records establish?

A. Verification remains incomplete for those records.

An unverified status is an evidence gap, not a confirmed adverse finding.

3. What is the scope of this review?

B. Training-record evidence for one stated requirement

The brief limits the list to one training-record requirement and internal audit preparation.

D Language checks / page 72

1. Which readiness headline fits the facts?

B. Twenty-seven of thirty records verified; three checks remain assigned and open.

The bounded headline gives the verified evidence coverage without inventing broader findings.

2. If one more record is verified, what is the new coverage?

B. 28 of 30, approximately 93.3%

The denominator remains thirty and the verified count rises to twenty-eight.

3. Which statement distinguishes an open item from a finding?

B. An unverified record needs checking; a nonconformity requires evidence of a failed criterion.

The first statement separates absence of verification from demonstrated failure against a requirement.

4. What should support closing a record check?

A. Verified evidence linked to the relevant requirement and recorded review

Closure needs traceable verification, not confidence, schedule pressure, or unsupported record entries.

08 Conversation answers

Regulatory Audits and Readiness

E Dialogue gaps

Pages 73-74

1. evidence coverage. Turn 2. Evidence coverage describes the verified share of the defined record list, not a percentage of overall regulatory compliance.

2. open items. Turn 4. Open items are the three unresolved verification checks; they are not established failures by the staff concerned.

3. records owner. Turn 6. Records owner identifies Daria's responsibility for the two assigned checks, while Ash separately owns the third.

4. readiness statement. Turn 8. The readiness statement must accurately describe the evidence available at the deadline, including unresolved checks.

5. traceability. Turn 10. Traceability connects the verified record to its source, review, and applicable requirement rather than relying on a filename alone.

6. verified count. Turn 12. The verified count becomes twenty-eight while the defined population remains thirty, giving approximately ninety-three point three percent coverage.

7. audit scope. Turn 14. Audit scope limits this preparation evidence to the specified training-record requirement, not every operational or regulatory obligation.

8. nonconformity. Turn 16. A nonconformity requires demonstrated failure against a specified requirement; an unverified record alone does not establish it.

9. audit trail. Turn 18. The audit trail records verification actions and changes so the status can be reviewed rather than accepted from an unexplained color label.

10. closure. Turn 20. Closure requires the relevant verification evidence; assignment of an owner and deadline is only a plan for completing the check.

F Transfer conversation

Page 75

1. 90

Reviewer: "Initial verified coverage is 90 percent."

Thirty-six divided by forty equals ninety percent verified coverage.

2. 37

Coordinator: "After one more verification, the count is 37."

One additional verified record raises thirty-six to thirty-seven.

3. 3

Reviewer: "The number still unverified is 3."

Forty total records minus thirty-seven verified leaves three unverified.

4. compliance

Coordinator: "This does not establish overall regulatory compliance."

Evidence for one requirement does not determine compliance with every applicable obligation.

Find the move you need

Use these as precise language models. Replace details only when you know the actual facts, authority, and agreed conditions.

01 Safety Culture and Stop-Work Authority

State the action clearly: The affected task is stopped under our local process.

Separate observation and cause: I have not identified the substance or its source.

Check understanding: Please confirm that the task remains stopped.

Full phrase set: pages 7-8 | Dialogue: pages 10-11

02 Operations Control and Dispatch Coordination

Give the time basis: This is the status as of 10:10 UTC.

Correct the draft: Confirmed is not supported by this snapshot.

Name the crew owner: Sara in crew control owns the crew-status check.

Full phrase set: pages 16-17 | Dialogue: pages 19-20

03 Maintenance Deferrals and MEL Language

Quote the unsupported status: The note says deferred, but the authorization is not recorded.

Request the source: Please provide the applicable controlled reference.

Name the pending step: Maintenance control is still reviewing the item.

Full phrase set: pages 25-26 | Dialogue: pages 28-29

04 Irregular Operations and Passenger Communication

Acknowledge the conflict: You have received two different times, and I am sorry for the confusion.

Correct the display: The 15:00 display does not reflect a confirmed estimate.

Avoid invented reassurance: I cannot guarantee that you will make the connection.

Full phrase set: pages 34-35 | Dialogue: pages 37-38

Keep the conversation productive

Use these as precise language models. Replace details only when you know the actual facts, authority, and agreed conditions.

05 Ground Handling and Turnaround Performance

State the current count: We have 80 confirmed against a requirement of 96.

Attribute the claim: The delivery note lists the remaining sixteen.

Set the report time: Please provide status at 13:35 UTC.

Full phrase set: pages 43-44 | Dialogue: pages 46-47

06 Security and Access Control

Acknowledge urgency: I understand that your meeting is running late.

Protect personal access: I cannot let you use my credential.

Give the current location: Please remain at public reception while we contact them.

Full phrase set: pages 52-53 | Dialogue: pages 55-56

07 Incident Reporting and Investigation

Start with firsthand information: I observed a dent on the side panel of cart C4.

Attribute the second account: Ivo reports hearing a bang near the cart.

Remove the unsupported cause: The supplied evidence does not identify a tug strike.

Full phrase set: pages 61-62 | Dialogue: pages 64-65

08 Regulatory Audits and Readiness

State the count: Twenty-seven of thirty records have been verified.

Avoid a personnel judgment: Unverified does not mean the staff member is untrained.

Correct the claim: All staff compliant exceeds the evidence we have.

Full phrase set: pages 70-71 | Dialogue: pages 73-74

Find a term and its context

The page number leads to the definition and a typical word combination. Repeated terms have separate entries when they serve different lesson contexts.

access authorization verify access authorization	50
access control follow access control	50
access credential protect an access credential	50
access desk contact the access desk	51
access exception verify an access exception	51
access scope confirm access scope	51
accessibility assistance coordinate accessibility assistance	33
affected task identify the affected task	5
aircraft assignment verify the aircraft assignment	14
airworthiness avoid assuming airworthiness	24
applicability verify applicability	23
approved directory use the approved directory	50
approved escort arrange an approved escort	50
approximate time label an approximate time	59
assistance request record an assistance request	33
attribution preserve source attribution	60
audit criterion identify the audit criterion	68
audit readiness assess audit readiness	68
audit scope define audit scope	68
audit trail preserve the audit trail	69
authority gradient reduce the authority gradient	6
authorization boundary maintain the authorization boundary	51
authorized explanation use the authorized explanation	33
authorized sign-off verify authorized sign-off	24
